VALLEY CONNECTING.—This company was incorporated in Pennsylvania July 29, with a capital stock of $10,000, to construct one mile of steam railway in Mercer county, Pa. The incorporators are: Pres., Samuel McClure; Charles E. Phillips, Edward W. Budd, all of Sharon, Pa.; Fayette Brown, Cleveland, O.

STREET AND ELECTRIC RAILWAYS.

BENTON, ME.—The railroad commissioners granted a hearing, July 25, at Fairfield, on the application of the Benton & Fairfield Electric R. R., according to report, for a location between Fairfield and this place. E. F. Webb, Atty., Waterville.

FITCHBURG, MASS.—The Gardiner, Westminster & Fitchburg St. Ry. Co. has asked for a change of location for its proposed electric road in this city, according to report.

MILLBURY, MASS.—It is reported that franchises for a new electric railway from Grafton to this place, 10 miles, via North Grafton and Millbury Junction, have been granted, and construction will begin at once.

NEW BEDFORD, MASS.—The New Bedford, Middleboro & Brockton St. Ry. Co. has been granted a franchise to build its line in this city, according to report. Abbott P. Smith, Frederick C. Hinds and L. Le B. Holmes are interested in the company.

NORTON, MASS.—The Norton & Taunton St. Ry. Co. is reported to have been given permission by the railroad commissioners to issue $80,000 in bonds to build a power house and equip its line with electricity.

BUFFALO, N. Y.—The railroad commissioners, July 26, granted permission to the Buffalo Valley R. R. Co. to build an electric railway from Java to this city, 26 miles, according to press reports. The road will pass through Gardenville, Elma, East Elma, Marilla, Porterville, Wales Centre, Wales and Strykersville, and will carry both passengers and freight. Pres., E. E. Felton, Harrisburg, Pa.

CHATHAM, N. Y.—The Nassau Electric Ry. Co. has made application for permission to increase its capital from $600,000 to $1,500,000, and to consolidate with several other companies.

LOCKPORT, N. Y.—Surveys have been commenced for the line of the Buffalo & Lockport Electric Ry., from this city to Olcott, on Lake Ontario, 36 miles, via Tonawanda. Mgr., Burt Van Horn, Jr.

MOUNT VERNON, N. Y.—The Westchester Electric R. R. has filed a certificate of the extensions of its lines on Fulton Ave., from the Hutchinson River to North 4th Ave. and the city line, via 3d St., Franklin Ave., 18th St., 3d Ave. and Prospect Ave.; also from 6th St. and the western city line to 6th St. and the easterly city line, via Columbus Ave., Hawkhurst Lane and Old Boston Post Road.

RYE, N. Y.—It is reported that the Portchester Electric R. R. Co. has been granted a franchise in this town.

MONTCLAIR, N. J.—It is reported that the town council has granted permission to the North Jersey St. Ry. Co. to continue the construction of its electric railway on Valley Road, and to operate its line on Bloomfield Ave.

EASTON, PA.—Groman Bros., Bethlehem, are reported to have the contract for the new power house of the Easton Transit Co., whose electric railway runs from this city to Bethlehem.

EMAUS, PA.—It is reported that Hugh E. Crilly has the contract to build the electric railway from South Allen to this place. About 120 men are at work and it is expected that the road will be completed by Sept. 15.

GERMANTOWN, PA.—It is reported that the Germantown & Fairmount Park Ry. Co. has been organized to build the Falls of Schuylkill and Fairmount Park. Petitions are being circulated requesting the Councils of Germantown, Chestnut Hill and Mount Airy to grant franchises to the company. It is stated that the line when completed will be operated by the Union Traction Co., Philadelphia. The officers of the new company are, Pres., Chas. E. Morgan, Jr.; Secy. and Treas., Wm. Selfridge.

HOKENDAUQUA, PA.—The Hokendauqua & Egypt St. Ry. Co. was incorporated July 29 with a capital stock of $20,000, to construct and operate an electric railway three miles in length. The incorporators are, Pres., John W. Eckert; Directors, John L. Schwartz, Walter J. Saeger, Edwin R. Snyder and Patrick F. Cannon, Allentown, Pa.

PITTSBURG, PA.—It is reported that the Monongahela Traction Co. will lay a complete new line of electric railway from Duquesne to this city, at a cost of about $100,000, and will also pave its line from Braddock to Homestead. L. G. Woods may be addressed.——The Pittsburg & Birmingham Traction Co. is reported to be laying 90-lb. rails and otherwise improving its roadbed from Union Depot to the foot of Castle Shannon incline, at a cost of about $50,000. Pres., Harry Moore; Vice-Pres., A. C. Wettengel; Secy. and Treas., A. S. Petrie.

STROUDSBURG, PA.—The Stroudsburg Passenger Ry. Co. has accepted the ordinance recently granted by the borough council of East Stroudsburg permitting the former to change its motive power to electricity. It is now hoped to obtain similar permission in this place. Pres., Frank Smith.

WILMINGTON, DEL.—The property-owners in Brandywine hundred are disputing in the courts the right of the Front & Union Sts. Ry. Co. to build its electric railway extension from Chester to this city, across their property, according to press reports.

HAGERSTOWN, MD.—The Harrisburg Foundry & Machine Co., Harrisburg, Pa., has been awarded the contract for two 200-HP. engines, and Robt. Wetherill & Co., Chester, Pa., has secured the contract for three vertical boilers, two of 200 HP. and one of 150 HP., for the Hagerstown Electric Ry. Co., according to report. Two condensers, an additional boiler, with feed pump and necessary piping, was also contracted for. The company has purchased ten lots at Summit Ave. and West Lee St. for $5,500, on which, it is stated, the electric light plant of the company will be built.

MYERSVILLE, MD.—Douglas Bros. have the contract for the construction of the Myersville & Catoctin Ry., to run from this place to Middletown. They have finished grading and expect to have the track laying completed by Sept. 15. We are also informed that later the road will be extended to Hagerstown, via South Mountain. Pres., Cyrus F. Flook, Frederick; Ch. Engr., C. McC. Lemley, Myersville.

ROCKVILLE, MD.—H. M. Talbott, Atty., has made application to the county commissioners for a right of way for the Washington & Rockville Electric Ry. Co. over the Georgetown turnpike, from Montrose to this place, according to report.

WASHINGTON, D. C.—The Columbia St. Ry. Co. has obtained nearly all the land required for its eastern extension to Benning, and grading will soon commence. Pres., Nath. Wilson; Secy. and Treas., Theo. J. King.——The Washington & Glen Echo R. R. Co. has applied to the War Department for permission to lay its tracks across a portion of government property near Georgetown. Maj. A. M. Miller, U. S. Engrs., will report on the question.

LYNCHBURG, VA.—The Lynchburg Electric Ry. & Light Co., successor to the Lynchburg Electric Co., has been organized by Randolph Harrison, of this place, and H. G. Runkle, H. D. McDana, W. S. Johnston, R. A. C. Smith, Thos. D. Kent and Isaac Rosenwald, of New York. It is said that over $50,000 will be spent in rehabilitating the street railway property of the old company.

BIRMINGHAM, ALA.—The Birmingham Traction Co. is engaged in transforming its North Birmingham steam dummy line into an electric railway, and hopes to have the work completed by Oct. 1, according to report.

CHAGRIN FALLS, O.—The Cleveland & Chagrin Falls Electric R. R. Co. has begun an extension to its line from this place to Burton, 18 miles, to be known as the Chagrin Falls & Eastern Ry., and will extend the line, it is said, next season to Warren, thus forming a continuous line from Youngstown to Cleveland. Pres., Vincent A. Taylor; Secy., C. F. Lowe; Treas., Wm. Prescott.

CONNEAUT, O.—It is reported that the Pennsylvania & Ohio St. Ry. Co. has applied for a franchise in this place.

LANCASTER, O.—The Fairfield Traction Co. has been incorporated with $100,000 capital, by H. B. Peters and Wm. Davidson, to build an electric railway in this city.

SANDUSKY, O.—The Sandusky & Interurban Electric Ry. Co. has been incorporated with $500,000 capital by Harry A. Everett, E. W. Moore, Barney Mahler, Chas. H. Stewart and Wm. H. Price, who were reported in our issue of July 21 to have bought the Sandusky Electric St. Ry. The company will build an extension to the latter road to Lorain, via Huron and Vermillion.

ANDERSON, IND.—S. C. Parkhurst, of the Chicago & Southeastern Ry. of Indiana, is reported to be interested in the construction of an electric railway from this city to Jacksonton, 22 miles, via Eaton, Middletown, Winchester and West Eckton.

MONTICELLO, IND.—The Tippecanoe Electric R. R. Co. has been incorporated with $50,000 capital, by Chas. C. Spencer, Emory B. Sellers, Louis G. Gustovel, Clinton L. Bader and Henry Van Voorst, to build a road from this place to Covington, 110 miles, via Fowler. Address Chas. C. Spencer for particulars.

DURAND, MICH.—It is stated that application will be made in a few days for a franchise to build an electric railway from Coranna to this place, via Vernon.

GRAND RAPIDS, MICH.—The council has under consideration a new franchise for the Consolidated St. Ry. Co. to which there is much opposition from the citizens. Pres. and Gen. Mgr., G. S. Johnson.

HOUGHTON, MICH.—It is reported that T. W. Taylor has asked the council for a franchise to build a street railway in this place.

KALAMAZOO, MICH.—It is stated that the Michigan Traction Co. will build its projected line to Battle Creek, noted in our last issue, next spring. The city council has passed a resolution requiring the company to substitute a seven-inch standard girder rail of not less than 90-lbs. weight for the rail now in use between Portage St. and the Grand Rapids & Indiana Ry. crossing. Ch. Engr., Geo. S. Shafer, Philadelphia.

PLYMOUTH, MICH.—A press report states that the Detroit, Plymouth & Northville Ry. Co. has given a mortgage to the Union Trust Co. to secure an issue of $375,000 in bonds, for the purpose of constructing an electric railway over the tracks of the Detroit, Ypsilanti & Ann Arbor Ry. Pres., C. W. Casgrain; Secy., Henry F. Wickham; Treas., John A. Russell.

SAGINAW, MICH.—Pres. Isaac Bearinger, of the Interurban Ry. of this city, has been granted a franchise to build an electric railway on Davenport St., from Michigan Ave. to the bridge.——Operations on the Saginaw Suburban Ry., which is projected from this city to Flint, have been resumed, according to report. The contract to construct the road has been given to a company in Chicago. Secy. Swarthout may be addressed.

WAUKESHA, WIS.—Wm. Powrie, C. E., writes us that the Milwaukee-Waukesha Electric Ry., since its opening, June 25, has been doing a large and constantly increasing business; the running time has been reduced to one hour between the two cities. The road has cut into the passenger business of the steam roads so much that they are now selling 10-ride tickets at 25 cents a ride, the old rate being 60 cents each way. The rate on the electric railway is 50 cents for the round trip, with transfer in Milwaukee to any part of the city. The cars are equipped with air brakes, whistles and electric headlights which show up the track for two miles. The road will be extended to Oconomowoc in a short time.

DES MOINES, IA.—It is expected that the Des Moines City Ry. Co. will have its extension to Valley Junction in operation by Sept. 15. Pres., J. S. Polk; Supt., W. G. Owens.

LAWRENCE, KAN.—A meeting of business men of this city was held July 26, at the Commercial Club, in the interest of a proposed electric street railway in this place, according to report.

LEAVENWORTH, KAN.—The Kansas City & Leavenworth Traction Co. is reported to have accepted the franchise recently granted by the county commissioners for an electric railway between Kansas City, Kan., and this place. Pres., H. G. Pert; Secy., C. H. Chapin.

HOT SPRINGS, ARK.—D. S. Ryan, 414 Central Ave., informs us that the new power plant of the Ouachita Water Power Co. is to furnish the necessary power for the operation of the street cars in this city and for the line running to the lake, 4½ miles from the city. It will also supply power to the railway between Hot Springs and Malvern, 22 miles, or to Benton, Ark., 33 miles. The company has a free right of way for the projected railway to the lake and the promise of a franchise to operate the same through the city. Estimated cost of entire plant, $250,000. Further information may be found under Electric Light and Power.

DALLAS, TEX.—The Dallas Consolidated Electric St. Ry. Co. has completed financial arrangements to secure $800,000 to be used for the improvement of the line, according to report.

DENVER, COLO.—The board of aldermen has granted a franchise over the mayor's veto to the Colfax Electric Ry. permitting it to extend its line to Montclair, a suburb of this city.

PASADENA, CAL.—A new 650-HP. Ball & Wood engine and a Westinghouse multiple dynamo are being installed in the new power house of the Pasadena & Los Angeles Electric Ry., in this city. About $12,000 worth of new copper wire has also been recently put in place. The improvement will cost over $50,000. Pres., P. M. Green.

MEXICO, MEX.—The Riter-Conley Co., Pittsburg, is reported to have the contract for the erection of a 55 × 78-ft. boiler house, a 51 × 78-ft. engine house, and a 75 × 78-ft. coal storage sheds for the City of Mexico Tramways. The Babcock & Wilcox Co., New York, has received the contract to furnish 2,000-HP. of Glasgow boilers, and McIntosh, Seymour & Co., Auburn, have the contract for the engines. A 25-ton traveling crane will be required, according to report.

ELECTRIC LIGHT AND POWER.

HANOVER, N. H.—Lamb & Rich, Archs., have prepared plans for a power plant for Dartmouth College which call for a brick and steel building 157 × 57 ft. and a brick stack.

LOWVILLE, N. Y.—The village board has granted a franchise for lighting the town to Lafayette Wetmore. A plant to cost about $40,000 will be built at Belfort, on the Beaver River. It is proposed to furnish light and power to other places. A company will probably be organized soon. The power house will be 35 × 50 ft., the dam about 200 ft. long, etc. There will be two 30-in. wheels and two 660-HP. dynamos, etc. Bids are now being received for the work, according to reports.

NEW YORK, N. Y.—Bids are asked until Aug. 12 for furnishing the police department with electrical conductors. Wm. H. Kipp, Ch. Clk., 300 Mulberry St.

SPRINGVILLE, N. Y.—Bids are asked until Aug. 16 for the purchase of $4,850 4% 5—30-year electric light bonds. Watt Smith, Village Clk.

SEA ISLE CITY, N. J.—Walter Sexton, Pemberton, N. J., is reported as making arrangements for the immediate construction of the proposed plant, for which a franchise was recently granted.

GREENCASTLE, PA.—Geo. F. Blosser has been granted a franchise for a plant in this town.

WINCHESTER, VA.—Press reports state that the proposed plant for this place, recently voted for by the town, will have 70 2,000-c. p. arc lights.

FITZGERALD, GA.—C. C. Goodnow, Mayor, writes us that the following bids were received July 18 for furnishing the materials and for constructing a plant and water-works:

J. H. Harris, Fitzgerald, Ga.	$28,999
Consolidated Engineering Co., New Orleans	27,925
Moore & McCoy, Atlanta (accepted)	26,672

JACKSON, GA.—The question of building a plant and water-works is being considered, according to reports. M. L. Hendrick may be addressed.

MOULTRIE, GA.—At the election in July this place voted to issue bonds for a municipal plant and for completing the water-works.

ELLISVILLE, MISS.—The council is reported as considering a proposition to grant a franchise for a plant.

OXFORD, MISS.—Jno. F. Brown, Mayor, writes us that at the election held July 26 this place voted against building a plant and sewerage system. It is only a question of time when the town will have the improvements, however.

KOKOMO, IND.—The plant of the Citizens' Electric Light Co. was destroyed by an explosion and fire July 28, according to reports.

PORTLAND, IND.—It is reported that a fire at this place caused $3,000 damage to the city plant. Supt., O. N. Eiler.

BAY CITY, MICH.—Bids are asked by the city clerk until Aug. 15 for furnishing a new dynamo for the city light plant.

BELLAIRE, MICH.—Edward Suffern, Village Clk., writes us that on June 20 this place voted to build a plant to cost $8,000. About $5,000 in bonds will be issued, $2,000 of which will be used for a woodenware factory, the balance for an electric light plant. It is not likely that anything in regard to securing the plant will be done this year.

JONESVILLE, MICH.—The council is reported as considering the question of building a plant and water-works.

BUNKER HILL, ILL.—Bids are asked until about Aug. 23 for furnishing and constructing a plant, according to reports. Engr., Owen Ford, Security Bldg., St. Louis, Mo.

DANVILLE, ILL.—Bids are asked by the board of trustees of the National Home for Disabled Volunteer Soldiers until Aug. 16 for furnishing and installing lighting apparatus, etc., in certain buildings here.

SUPERIOR, WIS.—Bids are asked until Aug. 16 for lighting the streets with 50 to 200 1,200 or 2,000-c. p. arc lights for one to three years, also for gasoline lighting, etc. F. J. Seguin, Cy. Clk.

GAYLORD, MINN.—Bids are asked until Aug. 10 for furnishing and constructing a plant, as advertised in Engineering News July 21. (Postponement from July 28.) C. W. Clasen, Village Recdr.; F. Mansfield, Mayor.

NEW PAYNESVILLE, MINN.—Bids are asked until Aug. 8 for furnishing and constructing a plant and water-works, as stated in our advertising columns. M. S. Elliott, Recdr.; Fairbanks, Morse & Co., Engrs., St. Paul, Minn.

WINNEBAGO CITY, MINN.—The council is reported as making arrangements for the immediate construction of the proposed plant, for which $8,000 in bonds were voted July 2.

AURORA, NEB.—O. H. Kilbourne, Osceola, Neb., writes us that he has purchased all the machinery for the proposed plant, to cost $6,000.

HASTINGS, NEB.—Bids are asked by the city clerk for lighting the streets with electricity. The council has appropriated $3,000 for this year's lighting.

LIVINGSTON, MONT.—The electric light plant of the Livingston Electric Light Co. was destroyed by fire July 24. The loss was $32,000, more than half covered by insurance. A temporary service will be established. Pres., J. R. King.

HOT SPRINGS, ARK.—D. S. Ryan, 414 Central Ave., Hot Springs, writes us as follows with regard to the proposed power plant for the Ouachita Water Power Co.: The plant is intended to supply lights and power for entire city, including 190 hotels, to operate street cars in this city and to the lake, the latter 4½ miles from city. It is to operate railway from Hot Springs to Malvern, 22 miles, or to Benton, 33 miles. To supply lights and power for Pyrites mines, 2½ miles west, and for Silver mine, 28 miles west. Cross-sections and soundings made and levels over several miles above dam site. Capital desired, any reasonable arrangements. Examinations made by engineers of Jas. Leffel & Co., Springfield, O.; by chief engineer National Co., and the surveys, soundings and cross-sectioning with original surveys and measurements by Edw. Ruger, of Janesville, Wis., and under his directions. The plant will have a capacity for 180 arc and 10,000 16-c. p. incandescent lights; estimated cost, $250.000. Des. Engr., Geo. M. French, Hot Springs.

LITTLE ROCK, ARK.—Geo. G. Harkness, Secy. Bd. of Trade, writes us that preliminary surveys have been started for a dam and turbine wheels on the Ouachita River, near Rockyford, Ark. The dam will be about 700 ft. long. It is proposed to generate electricity and transmit it to Little Rock, a distance of 45 miles. Geo. C. Strong, Little Rock, may be addressed.

SHERMAN, TEX.—C. P. Gregory, Chn. St. Com., writes us that the council is contemplating putting in a new dynamo for the plant. M. H. Andrews may be addressed.

SEATTLE, WASH.—Local papers state that Chas. H. Baker, Pres. Snoqualmie Falls Power Co., left this city July 26 for eastern cities to arrange for the purchase of machinery for the proposed plant; estimated cost, $250,000. Wm. H. Baker, ex-Pres. Chicago Board of Trade, Chicago, Ill., may be addressed.

SANTA CRUZ, CAL.—Press reports state that a contract was signed July 22 for furnishing 150 HP. by the Big Creek Water Power Co. for the operation of the machinery at the powder works. It is expected soon to increase this to 450 HP.

TUSCARORA, NEV.—The Dexter Mining Co., it is reported, is making preparations to put in a plant. Surveys have been made and the company has advertised for bids to furnish the necessary poles for the electric line. When the plant is completed the company will have 195 HP., instead of 85, as at present. Gen. Mgr., S. B. Milner; Pres., John Dern.

HAMILTON, ONT.—The council is considering the question of engaging either J. Roderick Parks, Toronto, Ont., or Percy Domville, Hamilton, to prepare estimates, etc., for a municipal plant.

SHERBROOKE, QUE.—Press reports state that the Eastern Townships Light, Power & Carbide Co., formed recently, has decided to purchase the electric plant at North Hatley formerly owned by Edgar & Roy. The reason for forming a joint stock company is to meet the demand for electric light and power from other than the villages of Waterville, Hatley, Eustis and Compton, which were supplied by Edgar & Roy. The capital stock of the company is $50,000, but only half of this has been offered to the public, and has been about all taken up. Pres., A. J. Gordon, North Hatley; Secy. and Treas., O. E. Roy, Montreal.

MONTEREY, MEX.—It is stated that E. Dysterum, Supt. Compania de Luz Electrica y Fuerza Motriz, of Monterey, Mex., is visiting electrical plants and manufacturing establishments in New York. The company is extending its business, particularly in the way of power transmission.

EDINBURGH, SCOTLAND.—Press reports state that the electric lighting committee of Edinburgh is making additions to the plant, and several American manufacturers, who are represented in England or Scotland, will be the recipients of contracts in connection with the work. It is understood that the Babcock & Wilcox Boiler Co. has already received an order for nearly $15,000 worth of material, and that the General Electric Co. has also secured a contract.

NEW COMPANIES.—Jaques Cartier Water Power Co., 243 Washington St., Jersey City; $500,000, with $1,000 paid in; to operate in Canada; Russell H. Lansdole, Ernest W. Cooke, 243 Washington St., Jersey City.

Spartanburg Gas, Electric Light & Street Ry. Co., Spartanburg, S. C.; $200,000; Elliot Norton, William E. Lown, George G. Day, Albert Leszynsky, all of New York.

BRIDGES.

NEW HAVEN, CONN.—Bids are asked until Aug. 17 for constructing the substructure, retaining walls and approaches for the new Chapel St. draw bridge, across Mill River, as stated in our advertising columns. C. W. Kelly, Cy. Engr., 17 City Hall.

ELIZABETH, N. J.—Bids are asked until Aug. 11 for constructing a 2-span bridge of iron or stone at Bridge St. Louis Quien, Engr.

ALLEGHENY, PA.—The Fort Pitt Bridge Works, Canonsburg, has been awarded a contract at $30,000 for constructing a 400-ft. bridge, having a center span of 175 ft., over Wood's Run, at Davis Ave. Gustave Kaufman, Engr., Pittsburg.

CARDINGTON, PA.—Bids are asked until Aug. 8 for the masonry work for two bridges over Naylor's Run. Wm. P. Hipple, Chn. County Comrs., Media.

EASTON, PA.—Bids are asked until Aug. 4 for constructing an iron bridge on Peach St., according to reports. H. R. Fehr, Cy. Engr.

JOHNSONBURG, PA.—Bids are asked until Sept. 1 for constructing one or two iron or steel bridges on Center St., as stated in our advertising columns. H. Little & Sons, Engrs., Ridgway, Pa.

KITTANNING, PA.—J. M. Floesch, Ch. Engr., writes us that the following contracts have recently been let by the Allegheny & Western Ry. Co.: All the steel bridge work between Lindsey and the Allegheny River, a distance of 33 miles, to the Pencoyd Bridge Co., Philadelphia. This work includes two crossings of Mahoning Creek and one steel viaduct 830 ft. long and 60 ft. high over Big Mahoning Creek, near Dayton, and one 1,025 ft. long and 150 ft. high over Little Mahoning Creek, near Dayton; also numerous smaller spans over highways and streams. The substructure for the bridge over the Allegheny River at Mosgrove has been let to Jutte & Foley, Pittsburg. The superstructure for the Allegheny River bridge has been let to the Keystone Bridge Co., Pittsburg, and consists of a channel span 450 ft. long, two spans 300 ft., one span 240 ft. and a steel viaduct 400 ft. in length. The bridge is to be a deck truss with a clear height 60 ft. above low water. The steel superstructure of the bridges between the Allegheny River and Butler has also been let to the Keystone Bridge Co., Pittsburg. This work consists of two steel viaducts 400 ft. long and several smaller span bridges.

ANNAPOLIS, MD.—A contract has been awarded to W. T. Douglas, Baltimore, at $16,594, for constructing the bridge over Curtis Bay. A. K. Starlings, County Clk.

NEWPORT NEWS, VA.—Geo. Y. Alsop, Cy. Engr., has submitted plans for two steel bridges, at 24th and 25th Sts., each to be 550 ft. long.

CARTHAGE, O.—The following bids were received by the county commissioners July 27 for constructing a bridge over Mill Creek, near this place:

Youngstown Bridge Co., Youngstown, O.	$38,950
Cincinnati Bridge Co., Cincinnati, O.	36,000
Wrought Iron Bridge Co., Canton, O.	42,000
King Bridge Co., Cleveland, O.	38,000
Brackett Bridge Co., Cincinnati, O.	32,500
Toledo Bridge Co., Toledo, O.	39,900
Lafayette Bridge Co., Lafayette, O.	37,000
Champion Bridge Co., Wilmington, Del.	35,995
Oregonia Bridge Co., Cincinnati	39,600
Massillon Bridge Co., Massillon, O.	36,500
Penn Bridge Co., Beaver Falls, Pa.	37,165

CHILLICOTHE, O.—Willard & Cornwell, Louisville, Ky., have been awarded the contract for building a $20,000 iron bridge.

HAMILTON, O.—Bids are asked until Aug. 22 for constructing a 400-ft. bridge over the Miami River at Wood St.; estimated cost, $79,000. L. A. Dillon, County Engr.

MARION, O.—Bids are asked until Aug. 13 for a 130-ft. iron superstructure over Whitestone Creek, capacity 100 lbs. per sq. ft. U. K. Guthberg, County Audr.

LONDON, O.—Bids are asked until Aug. 10 for constructing six bridges, according to reports. W. D. Wilson, County Audr.

YOUNGSTOWN, O.—A contract was awarded to the Youngstown Bridge Co., on July 25, at $78,000, for constructing the South Ave. bridge.——F. M. Lillie, Cy. Engr., informs us that a petition has been circulated for the construction of a bridge across the Mahoning River, near the Ohio Steel Works.

GRAND RAPIDS, MICH.—Geo. M. Ames, Cy. Engr., informs us that a proposition has been suggested to construct a bridge at Lyon St., for the street railway company.

OWOSSO, MICH.—The Groton Bridge & Mfg. Co., Groton, N. Y., has been awarded a contract at $10,375 for constructing the bridge across West Main St.

CHICAGO, ILL.—The following bids were received June 25 for constructing a railway bridge at Campbell Ave., advertised in Engineering News. Jas. Reddick, Clk.:

	Excluding operation.	Including operation.
C. L. Strobel, Chicago, Ill	$235,425	$337,425
Edgemoor Bdg. Wks., Wilmington, Del.	286,195	371,195
Scherzer Rolling Lift Bdg. Co., Chicago.	369,140	510,880
King Bridge Co., Cleveland, O*	373,000	454,020
J. G. Wagner Co., Milwaukee, Wis.	366,750	416,750

*Waddell arch, tubular piers. Waddell cantilever, $423,020, $505,020; Waddell arch, $395,710; $476,710, respectively.

OSHKOSH, WIS.—Bids are asked until Aug. 16 for furnishing the material and for constructing a steel bridge across Sawyer Creek, as described in our advertising columns. Oscar Sanne, Engr., Colby & Abbot Bldg., Milwaukee, Wis.; Casper Fluor, Chn. Bd. Pub. Wks.

FLEMING, KAN.—Reports state that arrangements are being made for the construction of a bridge between Sheridan and Baker townships, near this place. Address John Oertle, Township Trustee.

DILLON, MONT.—Bids are asked until Sept. 5 for constructing a 60-ft. Howe truss bridge, on Big Hole River. E. H. Mayers, Clk.

COLFAX, WASH.—Bids are asked until Aug. 13 for furnishing the material and for constructing two bridges. John Tobin, County Audr.

ROSEBURG, ORE.—Bids are asked until Sept. 8 for constructing a bridge over Elk Creek. J. Lyons, County Judge.

LOS ANGELES, CAL.—Sawyer & McArthur have been awarded a contract, at $23,000, for constructing the 600-ft. bridge across the Santa Fe River, for the Los Angeles Traction Co. W. S. Hook, Mgr.

OROVILLE, CAL.—Bids are asked until Sept. 7 for constructing a bridge over Powell Creek. Address Supervisor Cass.

VANCOUVER, B. C.—Bids are asked until Aug. 11 for constructing a steel swing for the Granville St. bridge. Thos. F. McGuigan, Cy. Clk.

BUILDINGS

HALLOWELL, ME.—William Wiley, Gardiner, Me., has been awarded the contract for installing a hot-water heating apparatus in the new industrial school building, at $933. The contract for plumbing was awarded to John B. Smith & Co., of Lewiston, at $496.——It is said that the Hallowell Granite Co. has received the contract to erect the new city hall building in this city, to cost about $20,000.

BARRE, VT.—Reports state that the contract for erecting the new city hall building has been let to Mason & Co., Concord, N. H., at $36,000.

BOSTON, MASS.—Bids are asked by the Boston City Hospital, Harrison Ave., until Aug. 9, for the installation of a mechanical draft apparatus in connection with the power plant, boiler house, at the City Hospital on Albany St.; also for three new boilers, etc. Pres., A. Shuman.

ST. LOUIS, MO.—The contract for the steel work for the new city hall has been awarded to E. H. Connor, 1000 Fullerton Bldg., agent for Pittsburg Bridge Co.——Plans have been prepared for a new stone and iron church building, 71 × 118 ft., to be erected in this city for the Church of the Sacred Heart, to cost about $60,000. Archs., Barnett, Haynes & Barnett, 418½ Olive St.; Pastor, J. J. McCabe.

FORT WORTH, TEX.—It is reported that plans are being prepared for a 5-story steel frame office building to be erected at 7th and Main Sts., at a cost of about $50,000, for Mrs. John R. Hoxie, of Chicago.

IONE, CAL.—Bids are asked until Aug. 22 for the erection of an annex to the administration building, and two double cottages on the grounds of the Preston School of Industry, at Ione. B. T. K. Preston, Secy. Bd. of Trustees; W. W. Oates, Arch., both of Rooms 17 to 19 Salz Bldg., Main St., Stockton, Cal.

PETROLEA, ONT.—Bids are asked by the trustees of the Petrolea Methodist Church until Aug. 15 for the construction of a church building. T. Vandelinder, Secy. Bd. of Trustees; J. Erb, Arch., Sarnia, Ont.

SAN FRANCISCO, CAL.—Plans and specifications are asked until Sept. 19, an extension of time, for erecting a new hospital building on the almshouse tract at a cost of $300,000. Clk., J. A. Russell.

WATER-WORKS.

BREWER, ME.—H. F. Sparks, Supt. Water Dept., Public Works Co., writes us that the company has contracted for a Warren filter plant for the supply of Brewer and Veazie. A brick house will be built at Veazie, where the power house is located. The building will be put up by day labor.

BERLIN, VT.—It is stated that this place is considering the question of securing a new water supply, for which purpose a company will be organized. At present the supply is secured from Montpelier. Martin W. Wheelock may be addressed.

NANTASKET, MASS.—It is reported that a company is being organized to put in new works to cost about $100,000. The Hingham Water Co. at present supplies the town.

NEWBURYPORT, MASS.—Philip H. Lunt, Secy. Water Comrs., writes us that Cashman Bros., of this city, have been awarded the contract to put in the masonry foundation for the new stand-pipe. The contract for the steel tank has been let to E. Hodge & Co., Boston. A report says that it will be 65 ft. high by 40 ft. in diameter.

FULTON, N. Y.—O. C. Breed, Cy. Engr., writes us that the water commissioners have agreed to arbitrate with the Fulton Water-Works Co. for the purchase of the works. The final results of the negotiations are at present exceedingly problematical.

PORT JERVIS, N. Y.—P. E. Farnum, Pres. Port Jervis Water-Works Co., writes us that it will be several months before final action will be taken for a new water supply.

GRANVILLE, N. Y.—The question of an increased water supply is being considered. D. D. Woodward and Jno. Gilroy may be addressed.

NYACK, N. Y.—This place voted July 28 not to purchase the Odell Water-Works for $15,000.

ROME, N. Y.—Bids are asked by J. I. Sayles, Pres. Board of Managers Rome Custodial Asylum, until Aug. 18 for constructing water-works. It will consist of a steel stand-pipe, pipe, valves, hydrants, etc.

HOBOKEN, N. J.—The water commissioners have decided to buy a number of hydrants. Bids for furnishing them will not be asked.

BEAVER, PA.—Simon Harrold, Beaver Falls, Pa., is reported to have been awarded the contract for furnishing the material and for building a new reservoir and a pumping station at about $30,000. Engr., J. P. Leaf, Rochester, Pa.

CHARLEROI, PA.—James S. McKean, Pres. Union Trust Co., sold on July 27 the Charleroi water-works to an eastern syndicate represented by W. M. Bell, for $100,000. The company will spend $150,000 in improving the plant and connecting it with adjacent towns. A contract has been closed with Cronin & O'Herron, Pittsburg, for the construction of two reservoirs at a cost of $10,000. The National Pipe & Foundry Co., Scottdale, Pa., has secured the pipe contract, amounting to $15,000.

LANCASTER, PA.—Simon Shissler, Mayor, writes us that an ordinance will be presented to councils to appropriate $250.000 for improving the stand-pipe, putting in a new pump and a filter.

PHILADELPHIA, PA.—The bureau of water received the following bids July 26 for furnishing additional steam capacity for the Belmont pumping station: Riter-Conley Co., Pittsburg, five boilers $18,287, one boiler $3,637; I. P. Morris & Co., five $19,119, one $3,735; Worden Mfg. Co., five $23,160, one $4,632; Robert Wetherill & Co., Chester Pa. (accepted), five $18,000, one $3,600. For the annex which must be built to the present boiler house the bids were as follows: R. C. Ballinger & Co., $5,649; M. McManus, $5,759; H. C. Nichols & Co., $4,876.60; Philadelphia Construction Co., $5,933; H. P. Shoemaker & Co., $5,500; S. Gourley, Jr., $6,349; John H. Jordan, $6,431; Macy, Henderson & Co. (accepted), $4,398.

PITTSBURG, PA.—Press reports state that Laughlins & Co., Ltd., are preparing to build a water-works for their blast furnaces at the Eliza furnace to cost $150,000. The capacity will be about 20,000,000 gallons of water a day. The plant has been designed by E. K. Morse, Pittsburg. The pumps are being constructed by the Wilson-Snyder Mfg. Co., Pittsburg. The improvements of various kinds being made at the furnaces will cost about $500,000.

LAUREL, MD.—It is reported that the proposed works for the Laurel Water Co. will be erected at once. The plant will have a capacity for 500,000 gallons a day. The stand-pipe will have a capacity for 50,000 gallons. Wm. H. Minch, of Minch & Eisenbrey, and Jos. M. Cone, of Baltimore, are interested.

POCOMOKE CITY, MO.—Bids will be asked at once by the mayor for the purchase of $30,000 of bonds for the proposed works and sewerage system.

FITZGERALD, GA.—C. C. Goodnow, Mayor, writes us that the contract for building works and a light plant has been let to Moore & McCrary, Atlanta, Ga., at $26,622.

BESSEMER, ALA.—Henry F. De Bardeleben has been awarded the contract for building a dam, etc., for a reservoir for the works of the Bessemer Land & Improvement Co. at $5,000.

MOBILE, ALA.—Bids are asked until Sept. 1 for furnishing the material and for constructing works for this city, as stated in our advertising columns. Engr., T. W. Nicol, Mobile; Mayor, J. C. Bush.

GADSDEN, ALA.—Wm J. Brockway, Receiver Gadsden Water-Works Co., has filed a petition asking the U. S. Circuit Court to restrain this city from building the proposed municipal works.

CAMDEN, ALA.—The question of building works is being considered, according to reports. Jno. A. Milner, Engr., Birmingham, may be addressed.

SARDIS, TENN.—This place voted July 25 to build works, according to reports. Population (1890), 106.

CANTON, O.—The water-works trustees are considering the question of at once purchasing and laying 12,000 ft. of 20-in. water pipe.

SHARONVILLE, O.—The question of works for fire protection is being discussed, according to reports.

CINCINNATI, O.—Bids are asked by the water commission until Aug. 30 for grading the grounds, roads and river banks and for revetment of slopes, etc., for the works at California, O. The lowest bid for this work was submitted July 22 by Louis Drach at $91,901. The highest bid was $163,531.——Chas. G. Roth, Secy., writes us that the following bids were received July 29 for furnishing the sluice gates, etc., for the works, as advertised in Engineering News; the Ludlow Valve Mfg. Co.'s bid is for each sluice gate:

Bidders.	Six Sluice Gates.	One Sluice Gate.	One Hand Pump.
Coffin Valve Co., Boston	$8,150	$1,505	$110
Ludlow Val. Mfg. Co., Troy, N. Y.	990	1,295	400
L. & E. Greenwald Co., Cincinnati	8,216	1,679	100
Lane & Bodley Co., Cincinnati	9,975	1,900	300
Hoeffinghoff & Lane, Detroit	7,531	1,944	1,200
Mich. Brass & Iron Wks., Detroit	1,438	1,955	105
Vulcan Iron Works, Chicago	6,704	1,349	26
A. S. Smith Mfg. Co., Newark, N.J.	7,800	2,000	100

LANCASTER, O.—Bids are asked until Aug. 20 for furnishing and erecting for the Boy's Industrial School, two compound longitudinal duplex pumping engines of 500,000 gallons each. C. D. Hilles, Secy. and Steward.

ELYRIA, O.—Bids are asked until Aug. 24 for furnishing the material and for constructing improvements to the municipal works; estimated cost, about $150,000. Engr., L. E. Chapin, O.; Cy. Clk., W. H. Park.

LAKEWOOD, O.—Bids are asked until Aug. 27 for furnishing the material and for laying a 12-in. water main in Detroit St., from Summit Ave. to Rockey River bridge. U. W. Hird, Clk.

BLOOMINGTON, IND.—Geo. Champe, Cy. Engr., writes us that the water-works was sold at receiver's sale July 28 to Jas. D. Showers, of this city for $19,000. The works will be improved. Population, 9,000.

EAST CHICAGO, IND.—The East Chicago & Northern Indiana Water Co. has been incorporated; capital stock, $17,000; incorporators, G. W. Mayer, B. O. Mayer and J. H. Brown.

EVANSVILLE, IND.—Bids are asked by the board of water trustees until Aug. 15 for constructing the engine and boiler houses for the new water-works; estimated cost, about $50,000. Engr., Chas. Hermany, Louisville, Ky.

LAPORTE, IND.—Bids are asked until Aug. 15 for furnishing and constructing about four miles of 20-in. water pipe to the source of the new water supply and a pumping station on the Little Kankakee River. Engr., W. H. Rosencrans, South Bend, Ind.; Supt., G. R. Tyrrell.

COLEMAN, MICH.—The question of building works is being considered, according to reports.

MOUNT PLEASANT, MICH.—The council proposes to extend the works. Population (1890), 2,700.

JONESVILLE, MICH.—This town is reported as considering the question of building works and a light plant.

CHICAGO, ILL.—The Pittsburg Meter Co., Pittsburg, Pa., has been awarded the contract for furnishing this city with water meters. It is said that this year 8,000 meters will be installed and that in all about 300,000 meters will be purchased at a cost of about $8,000,000. L. E. McGann, Comr. Pub. Wks.

AUGUSTA, WIS.—Bids are asked until Aug. 15 for furnishing and constructing the proposed works, to cost about $12,000. Consult. Engr., A. M. Palitz, 1102 Pabst Bldg., Milwaukee; Cy., Wm. Johnston.

APPLETON, WIS.—Press reports state that the court has appointed a receiver for the Appleton Water-Works Co.

BELOIT, WIS.—The council proposes to submit to the people at a special election the question of issuing $210,000 in bonds to purchase the proposed works, according to reports.

OSCEOLA, IA.—The people of this place have voted to build works, to cost about $20,000.

NEW PAYNESVILLE, MINN.—Bids are asked until Aug. 8 for furnishing the material and for constructing the works and electric light plant, as stated in our advertising columns. Mayor, P. C. Pilon; Recdr., M. S. Elliott.

OSAGE, IA.—It is stated that an election will be held Aug. 5 to vote on the question of issuing $10,000 in bonds for works. Chn. Com., J. W. Williams; Mayor, Chas. Kathan.

BOZEMAN, MONT.—Geo. D. Pease, Cy. Clk., writes us that this city voted July 26 to issue $165,000 in bonds to purchase the works of the Bozeman Water-Works Co. If the bonds are sold and the works purchased the city will extend the mains about a mile.

GREAT FALLS, MONT.—C. H. Clark, Cy. Clk., writes us that the council has decided to purchase the works of the Great Falls Water Co. It is not likely any improvements will be made.

TRENTON, MO.—We are informed that the American Water & Gas Corporation, 52 Broadway, New York, is contemplating the filtration of the water at the works in this city. Alex. Potter, 137 Broadway, New York, has been retained to prepare the plans. He is engaged in making analysis of the sands available for filtration purposes, and will probably recommend a system of sand filtration. Treas., Wm. F. Ross.

BRECKENRIDGE, COLO.—This place has voted to issue $25,000 of 6% 20-year bonds for new works. Fred. C. Cramer, Engr., writes us that the survey and plans will be made before long.

WARD, COLO.—We are informed that an election will be held Aug. 9 to vote on the question of issuing $12,000 of 6% bonds to build the proposed works, noted in our issue of July 21. Bids for the purchase of the bonds are wanted at once. Engr., D. J. McCanne, 1600 17th St., Denver, Colo.

GOLDFIELD, COLO.—H. King, Mayor, writes us that the proposed works will have a steel tank of 200,000 gallons capacity, seven hydrants, valves, water meters, 18,000 ft. of pipe, etc. The work will be done by the town. Bonds will be issued. Population, 5,000.

PUEBLO, COLO.—Jno. W. Hill, 35 Glenn Bldg., Cincinnati, O., has submitted a report on the proposed improvements to the works. It is recommended that high-service pumps be put in. This, with other improvements, including a 30-in. supply pipe and 10,000,000-gallon tank, will cost about $67,000.

SUMPTER, ORE.—Bids are asked by the council for the purchase of a water-works franchise. There will be required about 1¾ miles of pipe, according to reports.

LOS ANGELES, CAL.—Arbitrators have been appointed to decide the question of the sale to the city of the works of the Los Angeles City Water Co. The council recently offered the company $1,000,000 for the works but this was refused. The 30-year contract with the company is said to have expired July 21.

PETALUMA, CAL.—The question of purchasing the works of the Sonoma County Water Co. is being considered by the council. O. Jacobsen, M. Walsh and J. V. Lon are on the committee.

SAN JOSE, CAL.—The bids for the erection of a steel tower and tank at the county infirmary grounds were rejected July 26, and the clerk was directed to advertise for new bids, they to be received by the board of supervisors until Aug. 15.

SAN MATEO, CAL.—C. E. Moore, Santa Clara, Cal., has been appointed to superintend the building of the works at this place; estimated cost, about $70,000.

PRESCOTT, ONT.—An election will be held Aug. 16 to vote on the question of building works.

ASHBURN, ONT.—Jas. Lawrence, P. M., writes us that this place is not considering the question of building works, as reported in our issue of July 14.

WINNIPEG, MAN.—H. T. Ruttan, Cy. Engr., writes us that the civic board has decided to ask for new bids for building the proposed new works. The following are the bids received July 25. W. F. Lee, Winnipeg, $72,388, and The Pneumatic Engineering Co., New York, $131,886.

GLASGOW, SCOTLAND.—The municipal council is reported to have decided to ask for new bids for furnishing 1,000 tons of cast-iron water pipe. A Philadelphia firm bid $5 a ton below English manufacturers.

SEWERAGE.

WEST GARDNER, MASS.—This town has voted to appropriate $5,000 for constructing certain sewers. C. W. Conant may be addressed.

BUFFALO, N. Y.—The city engineer has been directed to prepare plans for sewers in several streets.

FULTON, N. Y.—The question of building a sewer to drain Waterhouse Creek is being considered by the council and the board of health.

WEEDSPORT, N. Y.—The question of building a trunk sewer to cost about $4,000 is being considered.

FLEMINGTON, N. J.—A. Costa, Orange, N. J., was awarded the contract July 30, at $30,102, for furnishing the materials and for constructing a system, as advertised in Engineering News. The itemized bids will be published next week. W. H. Chapman, Engr.-in-Charge.

NEWARK, N. J.—The question of building 25,000 ft. of 15 to 8-in. pipe sewer in the 10th and 12th Wards is being considered; estimated cost, $25,000. Engr., Ernest Adam.

NEWARK, N. J.—Harrison Van Duyne, Pres. Bd. Pub. Wks., writes us that so far as Newark is concerned it is now joining with South Orange, Vailsburg, Clinton, etc., to have a preliminary survey made with a view of selecting the best route and estimating the cost of an outlet sewer to tide-water. South Orange on its own account had surveys made by Engineer Crane, of East Orange. This outlet for Newark is for the benefit of only a small portion of the city sloping to the west. The city proper empties in tide water of Newark Bay, etc.

ERIE, PA.—Bids are asked until Aug. 4 for a sewer in 26th St. B. E. Briggs, Cy. Engr.

NEWCASTLE, PA.—Waring, Chapman & Farquhar, 874 Broadway, New York, have been engaged to make plans for surface drainage of a portion of this city, for extension of house sewer system, and for main sewer entension.

OAKMONT, PA.—An election will be held here Aug. 16 to vote on the question of issuing $65,000 in bonds; $41,000 of which is for a sewerage system, and $16,000 for street improvements. Borough Solicitor, J. P. Hunter.

SOUTH BETHLEHEM, PA.—This place voted July 26 to issue $100,000 in bonds for constructing a system.

STOCKTON, PA.—The council is reported as again considering the question of building sewers at a cost of about $50,000.

YORK, PA.—The committee has adopted plans for sewers for which $180,000 will be appropriated out of the proposed $500,000 loan for public improvements. City Engineer McKinnon and Mayor Brant may be addressed.

POCOMOKE CITY, MD.—It is stated that the council will ask for bids at once for the purchase of $30,000 of bonds for building the proposed system and water-works. Work will probably be begun at once.

WAYCROSS, GA.—Waring, Chapman & Farquhar, 874 Broadway, New York, have been ordered to make examination, take levels, and report on sewerage and sewage disposal, preparatory to a vote on issuing bonds for construction later on.

MOBILE, ALA.—The council has directed the sewerage committee to report on a system for the city at the meeting to be held Aug. 22. J. C. Bush, Mayor.

OXFORD, MISS.—Jno. F. Brown, Mayor, writes us that this place failed to vote July 26 in favor of building a system and light plant. It is only a question of a short time when the improvements will be put in.

CONCORD, N. C.—Surveys for the proposed system are being made; population, 7,000.

NASHVILLE, TENN.—The question of building sewers in certain streets is being considered. Mayor Dudley may be addressed.

LOUISVILLE, KY.—The question of building new sewers and of improving the old ones is being considered. Mayor Weaver, City Engineer Parsons and Mr. Grainger of the board of public works may be addressed.

HAMILTON, O.—The board of control has ordered plans for new sewers in certain streets. Mr. McMaken, of the board, may be addressed.

KENTON, O.—Bids are asked until Aug. 13 for constructing about 17,500 ft. of 24 to 10-in. pipe sewer, etc. Engr., W. E. Myers; County Audr., James Bastable.

TOLEDO, O.—Bids are asked until Aug. 29 for building a 72 to 54-in. brick sewer in Adams St. L. P. Harris, Cy. Clk.

FORT WAYNE, IND.—Plans have been ordered by the council for sewers in certain streets.

WARSAW, IND.—The question of building a system is being considered.

HIGHLAND PARK, MICH.—The question of building a system at a cost of about $60,000, to empty into the Detroit system, is being considered.

CARMI, ILL.—It is reported that the Bray Construction Co. has been organized to build a system for this place. Chas. T. Bray and F. L. Geissler, of Belleville, are interested.

MENDOTA, ILL.—The Iowa Engineering Co., Clinton, Ia., has been engaged to make plans and superintend the building of a large extension to the sewers and six intermittent sand filters at Mendota. Mr. Chase, of the company, had charge of building nine miles of sewers here two years ago.

QUINCY, ILL.—It is proposed to construct 15 to 8-in. pipe sewers in about 20 streets.

PITTSBURG, KAN.—The question of building sewers in certain streets is being considered.

KANSAS CITY, MO.—Henry A. Wise, Cy. Engr., writes us that nothing, aside from surveys, has been done in regard to the proposed Westport sewer district.

GALVESTON, TEX.—The Galveston Sewer Co. has refused to sell its system to this city for $40,000. Secy., Geo. H. Henchman.

SPOKANE, WASH.—J. C. Broad submitted the lowest bid July 21 for constructing 1,187 ft. of sewers in Front Ave., from Bernard to Division Sts., at $4,565. The lowest bid for 1,453 ft. in Front Ave., from Division to Grant Sts., was submitted by Ilse & Dishman, at $7,500.

SANTA ANA, CAL.—The city trustees have engaged H. C. Kellogg, County Surv., to superintend the construction of the system. The money from the sale of the recent bond issue is expected to be received within a few days, and work on the system will be commenced immediately; estimated cost, $65,000.

SAN LUIS OBISPO, CAL.—It is stated that an election will soon be held to vote on the question of extending the system at a cost of about $36,000; Engr., Geo. Story.

SAN RAFAEL, CAL.—This place voted July 16 to issue $26,000 in bonds for building 8,000 ft. of pipe sewer. Chn. Com., Henry Eickhoff.

MARTINEZ, CAL.—The town engineer has been directed to prepare plans and specifications for sewers in certain streets.

TUCSON, ARIZ.—Chas. T. Connell, Recdr., writes us that the bonds for the proposed system have not yet been offered for sale. Some legal objection is to be overcome.

LONDON, ONT.—W. T. Ashbridge writes us that the contract for Section B of the system was awarded July 28 to Harding & Leatham, of London, at $13,746. One other tender was received, being $14,545. City engineer's estimate, $14,985. The work will include: 3,210 ft. of 20-in. cast-iron pipe (135 lbs. per foot); 80 ft. of 16-in. cast-iron pipe; 300 ft. of 20-in. steel riveted pipe; 55 ft. of 36-in. brick sewer; 1 syphon chamber, 10-ft. drain, 17 ft. deep; 5 cedar cribs, 6 × 8 ft. × 11 ft., filled with stone; 60 oak piles; 1 concrete culvert (2 walls, each 4 × 35 ft., base, 12 × 2 ft. on top); 1,200 cu. yds. of earth filling. A. O. Graydon, Cy. Engr.

GARBAGE DISPOSAL—STREET CLEANING

NEWPORT, R.I.—The following bids were received by the council July 25 for collecting and disposing of house offal for a term of three years, from Aug. 8: Collecting, John Sullivan, $20,754; J. J. O'Hearn and R. J. Lawton, $20,700; David Goggin, $23,400; Abram A. Brown, $20,500; J. P. Sullivan, $15,300; P. H. Horgan, $18,000; Richard Dugan, $14,940 (accepted). Disposing, J. K. Sullivan, $8,800; G. B. Reynolds, $11,500; T. P. Crowley, $7,602 (accepted), and A. B. Gladding, $3,300.

NEW YORK, N. Y.—The American Street Cleaning Co. of New York, was incorporated under the laws of New Jersey July 29; capital stock, $1,000,000. The company was organized to enter into contracts for street cleaning. The incorporators are all of New York with the exception of one. They are J. F. O. Meyer, 27 West St.; R. H. Beach, 44 Broad St.; W. C. Gotschall, 5 University Place; Frank Klein, 237 Broadway; W. R. Bergholz, 15 Cortlandt St.; J. L. Pell, 214 Broadway; A. M. Dederer, 486 Broadway, and James N. Walter, Jersey City.

NEW YORK, N. Y.—Bids are asked until 12 m., Aug 5 for alterations to the steam dumper "Cinderella." James McCartney, Comr. St. Cleaning, 346 Broadway, Manhattan.

ORANGE, N. J.—The question of building a garbage cremation jointly with Bloomfield, Montclair and West Orange is being considered. Dr. G. H. Richards and Dr. T. F. Phelan are the commissioners from Orange.

ERIE, PA.—The committee has recommended that a garbage disposal plant be built in this city at a cost of about $10,000.

WARREN, PA.—The board of trustees of the state hospital are again considering the question of securing a garbage disposal plant; estimated cost, $10,000.

MILWAUKEE, WIS.—Bids are asked until Aug. 12 for furnishing and installing a garbage crematory; bond, $12,000. G. H. Benzenberg, Chn. Comrs. Pub. Wks.; J. R. Wolf, Comptroller.

STREETS AND ROADS.

BOSTON, MASS.—Bids are asked until 12 m. Aug. 4 for macadamizing in Preverell St. and Telford St. Benj. W. Wells, Supt. Sts.

MEDFORD, MASS.—The council has appropriated $45,000 for the reconstruction of Main and Salem Sts.

PLYMOUTH, MASS.—Bids are asked until 12 m. Aug. 4 for constructing about 5,000 ft. of highway. T. C. Mendenhall, Chn. Massachusetts Highway Comn., Boston.

BUFFALO, N. Y.—Bids are asked until Aug. 15 for paving Porter Ave., with asphalt, from Fourth St. to the bridge. G. H. Selkirk, Secy. Bd. Park Comrs.

CORTLAND, N. Y.—The board of trustees has awarded a contract to the Warren-Scharf Asphalt Paving Co., at $71,593, for furnishing and constructing about 22,000 sq. yds. of asphalt paving, as advertised in Engineering News. W. C. Crombie, Clk.

MOUNT VERNON, N. Y.—Bids are asked until Aug. 16 for the purchase of $40,000 of 4% street bonds. Wm. N. Hoyt, Cy. Clk.

NEWBURGH, N. Y.—The council is considering the expenditure of $26,667 for asphalt paving.

NEW YORK, N. Y.—Bids are asked until Aug. 16 for paving asphalt bicycle paths on six avenues, in the Borough of Queens. Jas. P. Keating, Comr. Highways, 150 Nassau St.

OSWEGO, N. Y.—Bids will soon be asked for about 1,800 sq. yds. of asphalt paving in West Oneida and Mohawk Sts., to cost about $3,500. Frank Ormsby, Cy. Engr.

SYRACUSE, N. Y.—The council has awarded a contract to the Columbia Construction Co., at $9,257, for paving in Park Ave., with sheet asphalt; the Asphaltina Construction Co., at $21,677, for asphaltina paving in portions of Barker Ave., Matty Ave., Wilkinson and Tracy Sts., and the Empire Contracting Co., at $40,629, for paving in Park Ave., with Alcatraz asphalt.

SHARPSBURG, PA.—Bids are asked until Aug. 9 for grading portions of Middle St. Jas. A. Robinson, Chn. Com.

WINCHESTER, VA.—C. E. Hoover & Co., Winchester, have been awarded a contract at $6,738, for constructing 4,900 sq. yds. of brick pavement, curbing, etc.

BIRMINGHAM, ALA.—F. Y. Anderson informs us that petitions have been filed with the county commissioners to build the Red Mountain Boulevard, and H. Schoel, Engr., is making an estimate of the cost. It is proposed to make the boulevard 60 ft. wide and 5½ miles long, to be located on the bench running on the north side of the mountain.

MONTGOMERY, ALA.—Bids are asked until Aug. 8 for brick paving in a portion of Holcombe St. and Lawrence St. R. H. Somerville, Treas.

LOUISVILLE, KY.—Bids are asked until 12 m. Aug. 5 for constructing asphalt pavement on portions of 26th St. and Oak St.; also until Aug. 6 for paving portions of Von Borries Ave. and Hepburn Ave. with asphalt, Chas. F. Granger, Chn. Bd. Pub. Wks.

CANTON, O.—Bids are asked until Aug. 29 for removing the old pavement and for furnishing and constructing a brick pavement on South Cherry St. L. E. Chapin, Cy. Engr.; Louis N. Levy, Cy. Clk.

FINDLAY, O.—Bids are asked until Aug. 8 for grading and macadamizing in Maple Ave., from Lima to Hancock Sts. A. W. Ray, Clk.

FREMONT, O.—Bids are asked until Aug. 15 for grading, curbing, paving and macadamizing in Hayes Ave. and Napoleon St., as stated in our advertising columns. Henry Hughes, Cy. Engr.

MALTA, O.—Bids are asked until Aug. 29 for paving portions of Front, Bell and Main Sts., with brick. Paul R. Murray, Engr.; W. S. Connor, Clk.

TOLEDO, O.—Bids are asked until Aug. 15 for furnishing the material and grading and draining in Felt St., and until Aug. 29 for furnishing the material and paving portions of Erie St., Fassett St. and Lawrence Ave., with Wassell repressed blocks, etc. L. P. Harris, Cy. Clk.

ZANESVILLE, O.—Bids are asked until Aug. 13 for grading Zane Ave. Chas. N. Bainter, Cy. Clk.

CAMBRIDGE CITY, IND.—Bids are asked until Aug. 24 for constructing cement sidewalks on several streets. Dan. E. Petro, Clk.

INDIANAPOLIS, IND.—Bids are asked until Aug. 10 for asphalt paving in Delaware St., and graveling in Barth Ave. M. A. Downing, Chn. Bd. Pub. Wks.——Bids are asked until Aug. 30 for constructing seven miles of gravel road; estimated cost, $19,608. J. R. Riggs, County Audr.

KOKOMO, IND.—The council has voted to pave North Main St. with brick for a distance of 4,076 ft.

COLDWATER, MICH.—Bids are asked until Aug. 16 for furnishing the material and for constructing brick pavement on concrete foundation on Chicago St., as stated in our advertising columns. P. H. Sweeney, Cy. Clk.

MUSKEGON, MICH.—Smith & Nelson have been awarded a contract by the county commissioners, at $9,498, for building the road to North Muskegon.

WYANDOTTE, MICH.—The council has decided to spend $3,000 in laying new crosswalks.

CHICAGO, ILL.—The board of public improvements has passed ordinances for the paving of about 20 miles of streets, with asphalt, granite, brick and macadam, to cost about $400,000.

PEORIA, ILL.—Bids are asked until 2 p. m., Aug. 5, for furnishing gravel and team work, for the construction of the Galena Road, in Richwoods township. John M. Hart, County Comr.

ASHLAND, WIS.—Bids are asked until Aug. 11 for paving a portion of 2d St. Chas. Crogster, Chn. Bd. Pub. Wks.

EAU CLAIRE, WIS.—Alderman Hammond has introduced an ordinance for brick paving on portions of South Barstow, Kelsey and four other streets.

MARYVILLE, MO.—A committee, consisting of John C. Curfman, Dr. S. C. McCluskey and A. A. Alden has been appointed to consider the question of county road improvements.

SEDALIA, MO.—Bids are asked until 5 p. m., Aug. 5, for paving on Ohio St. with brick. Jos. A. Starr, Chn. Com.

BEAUMONT, TEX.—The council has passed an ordinance to issue $13,000 of 6% street and water bonds. Mayor, D. P. Wheat.

HOUSTON, TEX.—Bids are asked until Aug. 20 for the purchase of $100,000 of street improvement bonds. I. A. Miller, Cy. Engr.; P. S. Banner, Secy.

OAKLAND, CAL.—Bids are asked until Aug. 15 for macadamizing on Fruitvale Ave. and the San Leandro Road. G. L. Nusbaumer, County Surv.

SPOKANE, WASH.—A contract has been awarded to the City Street Improvement Co., San Francisco, at $49,835, for paving Riverside Ave. with sheet asphalt, from Monroe St. to Division St. B. H. Fowle, Secy. Bd.

MANUFACTURING PLANTS.

FALL RIVER, MASS.—The Fall River Bleachery, at Fall River, Mass., has placed the contract for its new mill with the Berlin Iron Bridge Co., of East Berlin, Conn. The building will be 65 × 200 ft., with side walls of stone and supporting framework of steel.

MIDDLETOWN, CONN.—C. E. Dustin, Hartford, Conn., is reported as again making efforts to secure capital for the construction of a plant for manufacturing electrical goods.

BEAVER FALLS, N. Y.—The strawboard pulp mill of the Jas. P. Lewis Co. has been destroyed by fire, causing a reported loss of $50,000; insurance, $18,000.

JAMESTOWN, N. Y.—The Broadhead worsted mills have been damaged by fire to the extent of $50,000; fully insured.

TROY, N. Y.—The Trojan Car Coupler Co. having purchased a portion of the Gilbert Car Co.'s works on Green Island, are to make additions and alterations and to remove its plant there. Proposed additions include blacksmith shop. 75 × 50 ft., main shop, 50 × 190 ft. Pres., A. H. Renshaw; Secy., Eugene Seitz.

HOMESTEAD, PA.—Press reports state that about $500,000 will be spent in erecting two new manufacturing plants just below Homestead. The Leechburg Foundry & Machine Co. and the Shiffler Bridge Co. will move their respective plants there before the year is ended. The property has been bought at a cost of $130,000, and plans are ready and the survey about to be made. Building will begin about September 1. The Leechburg Foundry & Machine Co. is now located at Leechburg while the Shiffler Bridge Works are at 48th St. and the Allegheny Valley R. R. George Mesta, Pres. Leechburg Foundry & Machine Co.; W. J. Walker, Pres. Shiffler Bridge Co.

LOCK HAVEN, PA.—The main building of the Farrandsville Fire Brick Works, owned by Fredericks Munroe & Co., was totally destroyed by fire July 27. The building was a frame structure 220 × 70 ft., and contained valuable machinery. It will be rebuilt at once. The loss is estimated at $40,000, with no insurance.

PHILADELPHIA, PA.—The bakery belonging to Henry Wanklin & Co., Mitchell St. and Greene Lane, Roxborough, was destroyed by fire July 22, causing a reported loss of about $30,000.——Architects Hales & Ballinger, 102 So. 12th St., are preparing plans and specifications for a 3-story brick factory and dye house to be erected for J. H. Keim, woolen manufacturer, at Fifth St. and Allegheny Ave.

PITTSBURG, PA.—The Chautauqua-Eureka Ice Co. has awarded the contract for the erection of a new ice and storage plant, to replace that destroyed by fire, to Alexander Gilleland, at $100,000. The new warehouse will be much larger that the one burned. It will be bounded by Pike and 13th Sts. and Mulberry Alley.

LYNCHBURG, VA.—It is stated that P. C. Hubbard will rebuild his machine shops, factory, etc., at once. The main building will be 40 × 100 ft.

MANCHESTER, VA.—The Richmond Cotton Mills Co., it is stated, has placed a mortgage for $30,000, which it will use for purchasing new machinery. No contracts have yet been let. Secy., C. M. Woodford.

HEILEG, N. C.—A roller flour mill is to be established here or at Rockville soon by a company of local farmers and business men. Address Calvin M. Miller, County Surveyor, Concord, N. C.

COLUMBIA, S. C.—The Granby Cotton Mills of Columbia, decided on July 27 to increase its capital stock from $200,000 to $800,000, and to quadruple the capacity of its plant. Machinery and a new power plant are yet to be bought. The Richland Cotton Mill Co., of Columbia, will also add 12,000 more spindles to its equipment. Mr. Whaley is president of both companies.

ATLANTA, GA.—A new outfit will soon be bought for the textile department of the Atlanta Technical School as the city has just appropriated $3,000 additional to the $3,000 donated by Mr. French, of Pittsburg.

CORDOVA, ALA.—Press reports state that the Ivy Coal & Coke Co. will build additional coke ovens, etc.

ENSLEY, ALA.—J. E. Lacy & Co., of Jasper, Ala., have been awarded the contract for the grading and excavating for the large steel plant to be erected here.

MOOREFIELD, ILL.—The Peoria & Eastern R. R. Co., it is said, will build new shops at Moorefield. Estimated cost, $30,000, together with turn-tables, additional tracks and other improvements. The plans have been prepared and work will begin at once.

OTTUMWA, IA.—The Janney Mfg. Co. of this place, will soon erect several new buildings, and will install therein a 100 or 125-HP. power plant.

COFFEEYVILLE, KAN.—The Coffeyville Vitrified Brick Co. informs us that it has not yet determined whether it will erect a new plant at this place or not.

LEAD, S. DAK.—The Deadwood-Terra shaft house was burned July 26, causing a loss of about $50,000. Three hundred men were employed. It is expected to rebuild at once.

MONTREAL, QUE.—The factory of the Mergenthaler Linotype Co. was damaged by fire July 29; reported loss, $50,000.

GAS PLANTS.

PITTSFIELD, MASS.—The Pittsfield Coal Gas Co. will install a new gas engine, etc., to cost about $9,000.

PHILADELPHIA, PA.—Reports state that the United Gas Improvement Co. proposes to lay about 12 miles of new mains.

ALLEGHENY, PA.—The Riter-Conley Co., Prebel Ave., Allegheny, has been awarded a contract for constructing a gas holder for the Allegheny Heating Co., at $225,000. The heating company is arranging to purchase ground adjoining the plant of the Allegheny Gas Works as a site for the holder, which will have a capacity of 5,000,000 cu. ft. of gas.

CHARLOTTE, N. C.—The Charlotte Electric Ry. Co. will construct a gas plant and system at this place, of the Lowe water gas type. About 10 miles of 4 to 10-in. pipe will be purchased.

KENOSHA, WIS.—The Kenosha Gas & Fuel Co. is constructing a new plant, to cost about $30,000.

SUPERIOR, WIS.—Bids are asked until Aug. 16 for furnishing and maintaining 500 Welsbach lamps from 80 to 100-c. p., and 4,500 16-c. p. naphtha or gasoline lamps. F. J. Sequin, Cy. Clk.

WAUKEGAN, ILL.—It is reported that Louis M. Grant, Chicago, has purchased the stock of the old gas company, and will erect new works, at a cost of about $50,000.

CHICAGO, ILL.—The Universal Gas Co. has arranged to construct a 5,000,000 cu. ft. gas holder, according to reports.

DULUTH, MINN.—Bids are asked until Aug. 15 for furnishing and maintaining 200 Welsbach lamps. H. W. Cheadle, Cy. Clk.

NEW COMPANIES.—Verna Petroleum Oil Co., Corsicana, Tex.; $15,000; to construct and operate a gas system: J. J. Culbertson, Paris; R. K. Erwin, and J. U. Singleton, Waxahachie, Tex.

Electric Gas Light Co., Baltimore, Md.; $10 000; to manufacture acetylene gas machines; Geo. C. Wedderburn, Prudencio de Murgunondo, Jas. H. Couper, John W. Kolb and Frank C. Pearre, Baltimore.

MISCELLANEOUS CONTRACTS.

DREDGING.—Stockton, Cal.—Bids will soon be asked by the board of public works for dredging the harbor channel.

GUN FORGINGS.—Washington, D. C.—Bids are asked until Aug. 10 for furnishing 8-in. gun forgings. J. D. Long, Secy. Navy Dept.

CLEARING.—Point Wilson, Wash.—Bids are asked until Aug. 13 for clearing at Point Wilson. Capt. Harry Taylor, U. S. Engr., Burke Bldg., Seattle, Wash.

CULVERT.—Omaha, Neb.—Bids are asked until Aug. 12 for furnishing the material and constructing an 8-ft. brick culvert; bond, $50,000. D. M. Haverly, County Clk.

TELEPHONES.—St. Paul, Minn.—Superintendent King, of the police patrol system, has recommended a proposition to purchase telephones for a private system.

DRAINAGE.—Cissna Park, Ill.—Bids are asked until Aug. 15 for dredging a ditch and laying about 3,550 lin. ft. of 6 to 12-in. tile. H. B. Harvey, Village Clk.

BONDS.—Montreal, Que.—Bids are asked until Aug. 8 for the purchase of $150,000 of 4% harbor improvement bonds. Jos. Woods, Secy. and Treas. Quebec Harbor Comrs.

DREDGING.—Waukegan, Ill.—Bids are asked until Sept. 5 for dredging Waukegan Harbor to a depth of 18½ ft., as stated in our advertising columns. H. Thacker, Cy. Clk.

DREDGING.—Bridgeport, Conn.—Bids are asked until Aug. 31 for dredging the harbor, as stated in our advertising columns. Maj. Smith S. Leach, U. S. Engrs., New London, Conn.

TELEPHONE EXCHANGE.—Greenfield, Ind.—Reports state that W. A. Vail, Supt., Central Union Telephone Co., Indianapolis, is making arrangements to establish a telephone exchange.

DREDGING.—Boston, Mass.—Bids are asked until 12 m. Aug. 4 for dredging a channel to a depth of 16 ft., between Congress St. and Mount Washington Ave. Wm. Jackson, Cy. Engr.

BONDS.—Healdsburg, Cal.—Bids are asked until Aug. 25 for the purchase of $80,000 of 5% bonds for waterworks, sewers and general improvements. C. H. Pond, Clk. Bd. of Trustees.

FIRE ALARM SYSTEM.—Washington, D. C.—The Gamewell Fire Alarm Co., New York, has been awarded a contract by the commissioners, at $37,500, for installing a new fire alarm system.

PIER.—Brooklyn, N. Y.—Bids will soon be asked by J. S. Cram, Comr. Docks and Ferries, Pier A, New York, for the completion of the recreation pier at North Second St., East River; estimated cost, $12,000.

ALARM SYSTEM.—Dallas, Tex.—A franchise has been granted to O. J. Gorman and others, of this city, to construct and operate a district messenger call, fire alarm system, etc. W. A. Fraser, Cy. Electrician.

DAMS AND SHORE PROTECTIONS.—Mississippi River.—Bids are asked until Aug. 30 for constructing dams and shore protections, as described in our advertising columns. Capt. C. McD. Townsend, U. S. Engrs., Rock Island, Ill.

BONDS.—Salt Lake City, Utah.—Bids are asked until Aug. 16 for the purchase of 200 20-year 4% bonds of the denomination of $500 each, and of 400 bonds of the denomination of $1,000 each. G. H. Backman, Cy. Recdr.

DREDGING.—New York, N. Y.—Bids are asked until 11 a. m. Aug. 5 for about 16,000 cu. yds. of mud dredging and 4,500 cu. yds. of crib dredging at the foot of Watts St., North River. J. Sergeant Cram, Comr. Docks, Pier A. North River.

TUNNEL.—Fort Wayne, Ind.—Plans will be prepared by F. M. Randall, Cy. Engr., according to reports, for the construction of a tunnel on Clinton St., from Holman to Murray Sts., under the railway tracks. Councilman Lennart may be addressed.

ABUTMENTS AND WING WALLS.—Boston, Mass.—A contract has been awarded to James McGrau & Co., at $42,878, for constructing three granite abutments, 119 ft. long each, and two wing walls, each 35 ft. long, on B and C Sts. William Jackson, Cy. Engr.

DITCH.—Melville, N. Y.—A ditch will be constructed from Melville to Buffalo Lake, a distance of about 17 miles, at a cost of about $20,000. Hans Gronerued, Beaver Falls; T. F. Miller, Hector; Judge Vanderburg, St. Paul, Minn., and A. M. Knight, Glencove, N. Y., are interested.

GRADING, EXCAVATION, ETC.—California, O.—Bids are asked until Aug. 30 for the grading of grounds, roads and river bank, revetment of slopes and excavation of Clear Well, near the California. The bids for this work received recently were rejected. Chas. G. Roth, Clk. Comrs. Water-Works, Cincinnati, O.

DOCK.—Cleveland, O.—Bids will soon be asked by the director of public works for constructing the new Erie St. dock. The improvement to be made at the foot of Erie St. consists of the construction of a pile and timber pier with stone filling in continuation of the present pier as now constructed, 70 ft. northerly along Erie St., and thence west parallel with the government breakwater to Seneca St.; and also for constructing piers for a slip 200 ft. wide.

IMPROVING CRUISER.—Washington, D. C.—Press reports state that the board of construction of the navy department has decided to refit and renew the "Alert," an iron third-class cruiser of the old navy, now at the Mare Island navy yard, San Francisco, Cal. The rig will be changed from ship to barkentine, a spar deck will be added, new boilers installed, and the vessel generally and thoroughly overhauled. It will be equipped with a battery of six 4-in. rapid-fire guns. The total cost of these improvements, it is expected, will be about $100,000.

LOCK WALLS, ETC.—Louisville, Ky.—The following bids were received by Capt. J. G. Warren, U. S. Engrs., July 28, for building masonry lock walls and abutments for the dams of lock No 8 on the Kentucky River: Thomas C Sheridan, Buffalo, W. Va., $188,398; J. V. Hoag, Pittsburg, Pa., $198.038; Christie, Lowe & Heyworth, Chicago, $201,523; William A. Kirk, Madison, Ind., $205,596; Mason, Hoge & Co., Frankfort, Ky., $208,560; Walter Bradley & Co., Oswego, N. Y., $230,447. The site for lock No. 8 is about four miles above Hickman, about 22 miles above High Bridge, and about 12 miles below Valley View. The work contemplated in the present contract is the construction of the stonework alone of the two lock walls and abutment, including the preparation of sites. The cofferdam and excavation at the site for the lock and abutment are to be completed during the working season of 1898. The whole work must be completed before Dec. 31, 1899.

CONTRACT PRICES.

ASPHALT PAVING.—Reading, Pa.—The following bids were received by the board of public works July 18, 1898, for about 52,000 sq. yds. of asphalt paving; the lowest bid being about $7.000 in excess of the appropriation of $100,000, all the bids were rejected: Pennsylvania Asphalt Co.—Asphalt paving, a sq. yd., $2.05; resetting 8-in. granite curbing, a ft., $1.15; 6-in., $1.05; resetting 8-in. and 6-in., 30 cts. Richardson & Ross, Philadelphia.—Asphalt paving a sq. yd., $2.24; setting 8-in. granite curbing, $1.25; 6-in., $1.12; resetting 8-in., 50 cts.; 6-in., 40 cts. Alcatraz Paving Co.—Asphalt paving, a sq. yd., $2.07; setting 8-in. granite curbing, $1.17 a ft.; 6-in. $1.04; resetting 8-in., 28 cts.; 6-in., 26 cts.

BRICK PAVING.—Rock Island, Ill.—W. A. Darling, Cy. Engr., writes us that the following bids were opened July 11 for 17,710 sq. yds. of brick paving; estimated cost, $25,636:

	Flick & Johnson.	Edwards & Walsh.
Curb	$0.46	$0.45
Paving with macadam foundation	1.23	1.23
Paving with concrete foundation	1.48	1.41

ASPHALT PAVING.—Baltimore, Md.—The following bids were received July 19, for asphalt paving in Mount Royal Ave., from Guilford Ave. to Dolphin st.; L. F. Lewis, Cy. Comr.:

Bids Received at Baltimore, Md., July 19, 1898, for Asphalt Paving.

Quantities.			‡Southern Asphalt Paving Co., Baltimore.	Jas. P. McGovern, Baltimore.	R. Parker McCormick, Baltimore.	Barber Asphalt Paving Co., New York.	J. S. Filbert, Baltimore.

*Including grading, a 6-in. concrete base, 1½-in. binder and 2-in. wearing surface. †Including grading, a 6-in. concrete base, 2-in. sand cushion, 10-in. gutter stones, and pouring joints with asphalt cement. ‡Awarded contract for sheet asphalt.

STEEL RAILS.—Tientsin, China.—E. G. Adams, Jr., Professor of Civil Engineering, Imperial Tientsin University, has sent us the following table from the Pekin and Tientsin "Times," of the bids received in March, 1898, by the Imperial Chinese Ry. for furnishing 7,000 tons of rails and other supplies. The bidders all do an import and export business in Tientsin. The rate of exchange of Tientsin taels at the date of receiving the bids was about 158⅝ taels to $100 U. S. currency. In our issue of June 30 we gave prices for rails received in April. The bids were as follows, the prices probably being for the long ton:

Bidder.	Price a ton. Rails, taels.	Fish-plates, taels.	Bolts, taels.	Spikes, taels.
Jardine, Matheson & Co.[1]	47.54	59.25	119.54	113.69
Wm. Forbes & Co.[2]	48.00	60.71	99.81	90.04
George Turner[3]	48.00	60.25	116.25	111.00
Louis Spitzel & Co.[4]	48.75	68.71	86.85	86.85
Birch & Co.[1]	48.88	60.62	115.36	110.47
Wm. Forbes & Co.[3]	49.56	62.27	101.37	91.60
Vander Stegen & Co.[5]	49.36	68.71	90.39	84.19
Carlowitz & Co.[1]	50.70	63.00	119.55	114.60
Wm. Forbes & Co.[3]	50.83	63.54	123.18	117.31
Buchheister & Co.[1]	51.00	64.00	122.00	117.00
Mitsui Bussan Kaisha[2]	51.05	63.40	121.40	114.15
Tientsin Trading Co.[1]	51.88	64 61	121.15	115.85
Mandl & Co.[6]	57.75	75.40	108.45	103.30

The following are the rail-makers: [1]Cammel & Co.; [2]To approval; [3]Barrow; [4]Maryland Steel Co.; [5]Cockrill & Co.; [6]Krupp.

ELECTRIC LIGHTING.—Long Beach, Cal.—The Long Beach & San Pedro Electric Co. has submitted a bid for the lighting of Long Beach. The proposition is based on the moonlight schedule, and offers to provide 16-c. p. lights, two on a standard, for $1.40 each a month, the standards to be 150 ft. apart.

ELECTRIC AND GAS LIGHTING.—Ironton, O.—We are informed that the following bids were received July 14, 1898, for electric and gas lighting: Ironton Electric Light & Ry. Co., 100 or more arc lamps, 1,200 nominal c. p., moonlight, $65 for five years and $60.50 for 10 years; all night, $75 and $70.50 for 5 and 10 years, respectively; 2,000 nominal c. p., moonlight, $85 and $80; all night, $95 and $90; 400 or more inclusive 25 c. p., moonlight, $24.50 for 10 years; 50 c. p., all night, $32.50 for 10 years.

Ironton Gas Co., 100 to 200 gas lamps, all night, $16; moonlight, $15; 200 to 300 gas lamps, all night, $15; moonlight, $14; 300 to 400 or more gas lamps, all night, $14.50; moonlight, $13.50. All the gas lighting is for 5 years.

LAYING WATER PIPE.—Boston, Mass.—The Metropolitan Water Board received the following bids July 21, for laying water pipe in Section 25; contract awarded Michael Russo:

GRADING AND PAVING.—Scottdale, Pa.—We are informed that the following contract was let July 22, 1898, for grading and paving, as advertised in Engineering News: Funkhauser & Coats, New Brighton, Pa., grading, per cu. yd., 25 cts.; curbing, per lin, ft., 45 cts.; crossing, stone, per sq. ft., 20 cts.; paving with Layton brick, per sq. yd., 90 cts. Foundation for paving brick is 8 ins. of coke cinders rolled with a 10-ton roller, and 1 in. of sharp sand.

Bids Received at Boston, Mass., July 21, 1898, for Laying Water Pipe in Section 25.

Quantities.		Michael Russo, Boston, Mass.	Jos. D Gennaro, Boston, Mass.	Bruno & Salamone, Boston, Mass.	Benj. P. Bill, Malden, Mass.	L. A. Taylor, Worcester, Mass.	John J. Falvey, Somerville, Mass.	Chas. Linnehan, Cambridge, Mass.

PAVING CEMENT.—New York, N. Y.—Bids for furnishing 100,000 gallons of No. 6 paving cement for use in Manhattan were received as follows Aug. 2: Jas. Lyons, 7½ cts. a gallon; Wm. B. Burke, 8 cts. a gallon.

WATER PIPE.—Atlanta, Ga.—A press report states that the following bids were received June 22 for furnishing about 250 tons 6-in. cast-iron water pipe, weighing 33 lbs. per ft., etc., as advertised in Engineering News: Pipe—H. B. Cooper, Atlanta, $16.70 a ton, f. o. b., Atlanta, freight prepaid; American Pipe Works, Chattanooga, Tenn., $16.25 a ton, same conditions; Glamorgan Pipe & Foundry Co., Lynchburg, Va., $16.25 a ton, same conditions (accepted). Special castings, ordinary standard weight—H. B. Cooper, 2¼ cts. a lb.; American Pipe Works, 2¼ cts. a lb.; Glamorgan Pipe & Foundry Co., 1⅘ cts. a lb. Supt. Water-Works, Park Woodward.

ENGINEERING MATERIAL PRICES.

TRACK MATERIALS—

New York—Angle bars, 1.05 cts. to 1.10 cts.; spikes, 1.40 cts. to 1.50 cts.; track bolts, hexagonal, 1.80 cts. to 1.85 cts.; square, 1.60 cts. to 1.75 cts.

Chicago—Angle bars, 1.15 cts. to 1.25 cts.; spikes, 1.50 cts. to 1.60 cts.: track bolts, hexagonal, 1.90 cts. to 2.00 cts.; square, 1.80 cts. to 1.90 cts.

RAILS, STEEL—

New York, new, $18.00 to $19.00; old iron, $11.00 to $11.50; old steel $9.00.

Chicago, new, $20.00 to $22.50; old iron, $12.25 to $12.50, steel, $10.50 to $11.00.

Pittsburg, new, $18.00; old iron, $13.50 to $13.75; steel, $10.50.

STRUCTURAL STEEL—

New York—Beams, $1.30 cts. to 1.35 cts.; channels, 1.30 cts. to 1.35 cts.; tees, 1.35 cts. to 1.40 cts.; angles, 1.20 cts. to 1.25 cts.; rivets, 1.75 cts. to 1.80 cts.

Chicago—Beams, 1.30 cts. to 1.35 cts.; channels, 1.30 cts. to 1.45 cts.; tees, 1.35 cts. to 1.40 cts.; angles, 1.20 cts. to 1.25 cts.

Pittsburg—Beams, 1.15 cts. to 1.25 cts.; channels, 1.15 cts. to 1.25 cts.; tees, 1.15 cts. to 1.20 cts.; angles, 1.05 cts. to 1.15 cts.

PLATES AND SHEETS—

New York—Universal mill plates, 1.20 cts. to 1.25 cts.; tank, 1.35 cts. to 1.40 cts.; shell, 1.35 cts. to 1.40 cts.; flange, 1.60 cts. to 1.70 cts.; firebox, 2.25 cts. to 2.50 cts.

Chicago—Universal mill plates, 1.25 cts. to 1.30 cts.; tank, 1.15 cts. to 1.25 cts.; shell, 1.50 cts. to 1.60 cts.; flange, 1.25 cts. to 1.45 cts.; firebox, 1.75 cts. to 4.00 cts.; sheets, 2 cts. to 2.05 cts.

Pittsburg—Universal mill plates, 1.00 cts. to 1.10 cts.; tank, 1.07½ cts. to 1.10 cts.; shell, 1.15 cts. to 1.20 cts.; flange, 1.10 cts. to 1.20 cts.; firebox, 2 cts. upwards; sheets, 1.85 cts. to 2 cts.

MERCHANT STEEL—

Machinery, per lb., 1.60 cts. to 1.70 cts.

Tool, per lb., 4.75 cts. to 7 cts.

IRON—

Pig Iron:

New York, No. 1, $11.00 to $11.25; No. 2, $10.00 to $10.50.

Chicago, No. 1, $11.50 to $12.00; No. 2, $11.00 to $11.50.

Pittsburg, No. 1, $10.40 to $10.50; No. 2, $10.00 to $10.25.

Bar Iron:

New York, common, $1.07½ cts. to 1.10 cts.; refined, 1.15 cts. to 1.20 cts

Chicago, common, 1.05 cts. to 1.10 cts.; refined, 1.10 cts. to 1.20 cts.

Sheets:

Common American, per lb., 1.40 cts. to 2.50 cts.

Russia, per lb., 10½ cts. to 11 cts.

LUMBER—

New York:

Hemlock timber, 20 ft. and under, per M, $12.00 to $12.50.

Piling, Eastern spruce, 35 to 40 ft., 30 to 40% 12-in. butts, 4½ cts. to 4¾ cts.

Spruce, special cargoes, per M, $15.00 to $17.50.

Yellow pine, random cargoes, $14.50 to $17.00.

North Carolina pine, $2.25 to $2.40 advance over Norfolk rates.

San Francisco:

Oregon pine, per M, $15.50 to $17.50.

Redwood, per M, $17.00 to $19.00.

Redwood tank stock, up to 10 ft., $21.00 to $24.00.

GENERAL MATERIALS—

Lead, New York, 3.90 cts. to 3.95 cts.

Nails, Pittsburg, 1.40 cts.

Solder, per lb., 8¼ cts. to 11½ cts.

Spelter, per lb., 3.90 cts. to 4.00 cts.

Copper, ingots, 11.25 cts. to 11.50 cts.

Granite, rough, New York, cu. ft., 40 cts. to 50 cts.

Limestone, New York, cu. ft., 70 cts. to 80 cts.

Ohio freestone, New York, cu. ft., 85 cts. to 90 cts.

Slate, Penn. block, per square, $4.00 to $5.00.

White lead, American, per lb., 5½ cts. to 6 cts.

Lime, common state, per bbl., 70 cts.

INDUSTRIAL NOTES. 48

PERSONAL.

Mr. George V. Lorings has been appointed City Engineer of Decatur, Ill., to succeed Mr. Dickerson, resigned.

Capt. Walter Leslie Fisk, M. Am. Soc. C. E., Corps of Engineers, U. S. Army, stationed at Portland, Ore., has been promoted to be Major.

Mr. Edward M. Bigelow, M. Am. Soc. C. E., Director of the Department of Public Works, Pittsburg, Pa., expects to sail for Europe Aug. 13.

Prof. Aaron N. Skinner has been appointed Professor of Mathematics at the Naval Observatory, Annapolis, Md., with relative rank of Lieutenant.

Mr. W. M. Deutsch, recently Manager of the New York Filter Mfg. Co., New York, has been appointed General Manager of the Continental Filter Co., 44 Wall St., New York.

Mr. M. J. McGinty, Secretary of the Ferguson Contracting Co., railway contractors, 69 Wall St., New York city, was recently married to Miss Margaret Effinger Dean, at Harrisonburg, Va.

Mr. F. T. Chambers, Civil Engineer, United States Navy, has been detached from the New York Navy Yard and ordered to duty in connection with the coaling station at Pago Pago, Samoan Islands.

Mr. James W. G. Walker, Civil Engineer, United States Navy, whose appointment was noted in our last issue, has been ordered to duty in connection with the Nicaraguan Canal Commission.

Mr. Wm. Kent, M. Am. Soc. M. E., and one of the Associate Editors of this journal, has been appointed a member of a commission to consider the pollution of the rivers and streams of the State of New Jersey.

Mr. Creighton H. Hollingsworth, Jun. Am. Soc. C. E., of Waltham, Mass., has been appointed Assistant Engineer of the American Lake Superior Power Co. on the construction of its plant at Sault Ste. Marie, Mich.

Capt. Geo. A. Zinn, Corps of Engineers, United States Army, has been relieved from duty at Milwaukee, Wis., and ordered to Louisville, Ky., to relieve Capt. Jas. G. Warren, Corps of Engineers, who will in turn relieve him at Milwaukee.

Mr. J. W. Beardsley, civil engineer, with the Sanitary District of Chicago, has resigned his position in order to accept that of Assistant Engineer under the Board of Engineers on the Deep Waterways Commission, with headquarters at Ogdensburg, N. Y.

Major Louis Duncan, First Regiment of United States Volunteer Engineers, recently encamped at Peekskill, N. Y., has resigned. Dr. Duncan's appointment was noted in our issue of June 2. He is a Past President of the American Institute of Electrical Engineers, and is Professor of Electrical Engineering in Johns Hopkins University, Baltimore, Md.

Lieut. Francis R. Shunk, Corps of Engineers, United States Army, has been relieved from temporary duty at San Francisco, Cal., under Col. Chas. R. Suter, M. Am. Soc. C. E., Corps of Engineers, and has been ordered to duty at the United States Military Academy, West Point, N. Y. Lieut. Chester Harding, Corps of Engineers, has been relieved from duty at Newport, R. I., under Major Danl. W. Lockwood, Corps of Engineers, and has also been ordered to duty at the U. S. Military Academy.

Mr. Robert Campbell Gemmell, M. Am. Soc. C. E., civil and mining engineer, of Salt Lake City, Utah, has been appointed State Engineer by Governor Wells. He is a graduate of the University of Michigan, Ann Arbor, and has been largely engaged in railway and water supply work in the West. He is engineer of the De Lamar Mines, Mercur, Utah, and is a member of the State Board of Health. He succeeds Col. Willard Young, of the Second Regiment of United States Volunteer Engineers.

Mr. George W. Dickie, Manager of the Union Iron Works, San Francisco, Cal., and builder of the U. S. battleship "Oregon," was born at Ardroth, Scotland, about 60 years ago. He was trained in his father's shipyard; served for a time on the North British Ry., and then commenced the construction of textile machinery and hydraulic apparatus. He came to San Francisco some years ago and was Chief Constructing Engineer for the Risdon Iron Works. About 1884 he became connected with the Union Iron Works as Chief Engineer in charge of ship-building. The Superintending Engineer of the Union Iron Works is Mr. Robert Forsyth.

OBITUARY.

Mr. William Warner, architect, of Elk River, Minn., died July 26, aged 64.

Prof. William Shubert, civil engineer, of Allentown, Pa., died recently, aged 83.

Mr. John O. Deeds, mechanical engineer, of Pittsburg, Pa., died July 31, aged 34.

Mr. Daniel Boehmer, contractor, of Manitowoc, Wis., died July 29, aged 71, as the result of a fall from a building during a storm, July 19.

Mr. Andrew Nicol, for many years Superintendent of the mines of the Delaware & Hudson Canal Co., of Green Ridge, Pa., died Aug. 6, aged 81.

Mr. Arthur Hunter, Chief Engineer of the Allegheny City Light Co., Allegheny, Pa., died Aug. 4, aged 42. He was a mechanical and civil engineer.

Mr. C. W. Canfield, civil engineer, for some years past Paymaster of the Union Bridge Co., Athens, Pa., died there July 30. He had been in the employ of this company and of Kellogg & Maurice for 25 years.

Mr. H. T. Knight, for 14 years Superintendent of the Natoma Water & Mining Co., and for the past six years Chief Engineer of the Sacramento Electric, Gas & Railway Co., of Sacramento, Cal., died July 24, at Harbin Springs, Cal.

Mr. John J. Schoenleber, electrical engineer, President of the Northwestern Enginering Co., St. Paul, Minn., died Aug. 5, aged 32. He was a graduate of the Iowa State College, Ames, Ia., and of Purdue University, Lafayette, Ind.

Mr. Ichabod Jean, contractor and builder, of Baltimore, Md., died Aug. 4, aged 83. Among some of the buildings in that city which were erected by him are the City Hall and the Academy of Music. He was for a time Inspector of Buildings of Baltimore.

Mrs. Harriet S. Totten, widow of Col. George Muirson Totten, the famous civil engineer who built the Panama R. R., died Aug. 3, aged 89. Mrs. Totten assisted her husband, who died in 1884, in his engineering labors, and accompanied him on all his trips to Panama, extending over a period of 25 years. She was a frequent writer on Central American topics.

Dr. George C. Hubbard, head of the Health Department of the Borough of Richmond, New York city, died at his home in Tottenville, Aug. 3. He was appointed Assistant Sanitary Superintendent of the Health Board, Jan. 1, 1898, upon the consolidation of the cities. He was a veteran of the Civil War, in which he served in the Union Army as an Assistant Surgeon.

Mr. Adolph Heinrich Joseph Sutro, Mining Engineer, builder of the Sutro Tunnel, and late Mayor of San Francisco, Cal., died in the latter city Aug. 8. He was born about 1830, and was educated as a mining engineer and mineralogist. He went to California in 1850, and engaged in mining. In 1860 he planned the great four-mile tunnel for draining the Comstock Mines, which, after hard work in securing capital, was commenced in 1869 and finished in 1871. He made a fortune out of the tax of $2 a ton on all ore extracted, and he devoted a part of his income to collecting a library and to building the great public resort near the Cliff House on the ocean front of San Francisco. In his battle with the Southern Pacific Ry. Co. for a five-cent fare to the latter place he developed those anti-monopoly fighting qualities that made him so popular with the people of San Francisco, and which finally led to his being made Mayor. He leaves an estate that is nominally worth $10,000,000; but is heavily mortgaged.

Mr. Jean Louis Charles Garnier, architect, of Paris, France, died last week. He was born in Paris, Nov. 6, 1825, and in 1842 entered the L'Ecole des Beaux-Arts, where he spent six years, winning the Grand Prix in architecture on finishing his course. He then visited Greece and made a study of the Temple of Jupiter in the Island of Egina, from which he prepared a polychromatic design for its restoration that attracted much attention at the Salon des Beaux-Arts, in 1853, and at the Exposition Universalle, in 1855. In 1861 he won the open competition of plans for the Grand Opera House to be built in Paris and was also entrusted with the execution of the work. The building was completed in 1875 and at that time had cost nearly 50,000,000 francs. Among other notable works of M. Garnier's were the Casino at Monte Carlo, the Observatory at Nice, and the various constructions designed to illustrate "The History of Human Habitation," exhibited at the Paris Exposition of 1889. He received the cross of the Legion of Honor in 1864, later becoming an officer and commander. In 1867 he became a Corresponding Member of the Institute of British Architects, and was presented with its gold medal in 1886. He was elected a member of the Academie des Beaux-Arts in 1874.

Dr. James Hall, who has been State Geologist of New York since 1837, died at Echo Hill, Bethlehem, N. H., this week. He was born in Hingham, Mass., Sept. 12, 1811 and graudated from the Rensselaer Polytechnic Institute, Troy, N. Y., in 1832. He was Assistant Professor of Chemistry at that institution for four years and in 1836 was made Professor of Geology. In that year the Geological Survey of New York was organized and he was appointed Assistant Geologist, the following year being appointed State Geologist. In 1855 he declined to accept the position of Chief of the Department of Paleontology of the geological survey of Canada, which was offered him. He was one of the founders of the American Association of Geologists and Naturalists in 1840, which later grew into the American Association for the Advancement of Science, of which he was at one time President. He was also a founder of the National Academy of Science and the International Congress of Geologists, of which latter society he was a Vice-President when it met in Paris in 1878, in Boulogne in 1881 and in Berlin in 1885. In 1848 he was elected a Foreign Member of the Geological Society of London, receiving one of its medals in 1858. In 1884 he was elected Correspondent of the Paris Academy of Science and in 1895 he was elected a member of the Russian Academy of Sciences. He was also a member of many other scientific societies and was a frequent contributor to scientific, especially geological and paleontological literature. He was appointed State Geologist of Iowa in 1855 and of Wisconsin in 1857.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

AMERICAN MATHEMATICAL SOCIETY.
Aug. 19-20. Annual meeting, Boston, Mass. Secy., F. N. Cole, Columbus University, New York city.
AMERICAN CHEMICAL SOCIETY.
Aug. 22-23. Annual meeting, Boston, Mass. Secy., Albert C. Hale, 551 Putnam Ave., Brooklyn, N. Y.
AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.
Aug. 22-27. Annual meeting, Boston, Mass. Secy., F. W. Putnam, Salem, Mass.
GEOLOGICAL SOCIETY OF AMERICA.
Aug. 23. Annual meeting Boston, Mass. Secy., H. L. Fairchilds, Rochester, N. Y.
AMERICAN FORESTRY ASSOCIATION.
Aug. 23-24. Annual meeting, Boston, Mass. Pres., Francis H. Appleton, 101 Tremont St., Boston, Mass.
NATIONAL IRRIGATION CONGRESS.
Sept. 1-3. Annual convention, Cheyenne, Wyo. Secy., J. C. Harpham.
TECHNICAL SOCIETY OF THE PACIFIC COAST.
Sept. 2. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.
GERMAN-AMERICAN TECHNICAL SOCIETY.
Sept. 3-7. Annual meeting Philadelphia Section, Reading, Pa. Secy., A. Schumann, 532 North 4th St., Philadelphia, Pa.
ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Sept. 5. Secy., H. J. March, Library Bldg., Buffalo, N. Y.
AMERICAN STREET RAILWAY ASSOCIATION.
Sept. 6-9. Annual convention, Boston, Mass. Secy., T. C. Pennington, 2020 State St., Chicago, Ill.
AMERICAN SOCIETY OF CIVIL ENGINEERS.
Sept. 7. Secy., C. W. Hunt, 220 W. 57th St., New York city.
CENTRAL RAILWAY CLUB.
Sept. 9. Secy., H. D. Vought, 114 5th Ave., New York city.
MONTANA SOCIETY OF ENGINEERS.
Sept. 10. Secy., A. S. Hovey, National Bank Bldg.,Helena, Mont.
THE LOUISIANA ENGINEERING SOCIETY.
Sept. 12. Secy., J. F. Coleman, 712 Union St., New Orleans, La.
ASSOCIATION OF EDISON ILLUMINATING COMPANIES.
Sept. 12-13. Annual meeting, Sault Ste. Marie,Mich. Secy., Wilson S. Howell, Newark, N. J.
NORTHWEST RAILWAY CLUB.
Sept. 13. Secy., T. A. Foque, Soo Line, Minneapolis, Minn.
CIVIL ENGINEERS' CLUB OF CLEVELAND.
Sept. 13. Secy., Wm. H. Searles, Case Library Bldg., Cleveland, O.
ROADMASTERS' ASSOCIATION OF AMERICA.
Sept. 13. Annual meeting, Denver, Colo. Secy., J. B. Dickson, Sterling, Ill.
NEW YORK STATE STREET RAILWAY ASSOCIATION.
Sept. 13-14. Annual meeting, Brooklyn, N.Y. Secy., H. A. Robinson, New York city.
BROOKLYN ENGINEERS' CLUB.
Sept. 15. Secy., A. J. Prevost, Jr., 191 Montague St., Brooklyn, N. Y.
NORTHWESTERN TRACK AND BRIDGE ASSOCIATION.
Sept. 16. Secy., D. W. Meeker, St. Paul, Minn.
ENGINEERS' CLUB OF MINNEAPOLIS.
Sept. 19. Secy., H. E. Smith, 1620 S. E. 4th St., Minneapolis, Minn.
ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.
burg, Pa.
Sept. 20. Secy., R. A. Fessenden, 410 Penn Ave., Pittsburg, Pa.
BOSTON SOCIETY OF CIVIL ENGINEERS.
Sept. 21. Secy., S. E. Tinkham, City Hall, Boston, Mass.
WESTERN FOUNDRYMEN'S ASSOCIATION.
Sept. 21. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.
CENTRAL STATES WATER-WORKS ASSOCIATION.
Sept. 27-29. Annual meeting, Springfield, O. Secy., John Fisher, 11 Riley St., Hamilton, O.
AMERICAN INSTITUTE OF MINING ENGINEERS.
Oct. 18. Annual meeting Buffalo, N. Y. Secy.,R. W. Raymond, P. O. Box 223, New York city.

ASSOCIATION OF RAILWAY SUPERINTENDENTS OF BRIDGES AND BUILDINGS.—The eighth annual convention of this Association will be held at Murphy's Hotel, Richmond, Va., from Oct. 18 to 20. The program is as follows: Oct. 18.—Morning—Convention called to order and the transaction of usual routine business. Afternoon—Committee reports and discussion of reports presented at the last convention. Oct. 19.—Morning—Discussion of reports of committees on investigation. Afternoon—Further discussion and answering questions propounded by members. Oct. 20.—Morning—Miscellaneous business and election of officers. Afternoon—Excursions to points of interest.

The excursion list includes visits to Newport News, Old Point Comfort, the Newport News Navy Yard, Washington, D. C., and the many points of interest in and about Richmond.

GERMAN-AMERICAN TECHNICAL SOCIETY.—The annual meeting of the Philadelphia section of this Society will be held at Reading, Pa., Sept. 4-7. The convention will begin with an informal reception by the Philadelphia Society at 532 North 4th St., Philadelphia, Pa., on the evening of Sept. 3. On Sept. 4 there will be an excursion to Reading, where the day will be spent in sight-seeing and excursions.

Monday, Sept. 5, there will be a meeting of delegates, followed by trips to Mt. Penn, Carsonia Park and Woodvale. The evening will be given up to a banquet.

Tuesday, Sept. 6, "General Engineering Day," will be given up to visiting industrial establishments. Those proposed at present are: Carpenter Steel Works, Reading Hardware Works, Repair Shops of R. R. Co., and Reading-Scott Works. During the afternoon excursions will be made to points of interest.

Wednesday, Sept. 7.—The party will take a trolley trip to Highland House. During the business session on Sept. 6, which will consist of reading of reports of delegates and minutes of meetings, Mr. Otto C. Reyman, Pittsburg, Pa., will read a paper on "Acetylene."

NATIONAL IRRIGATION CONGRESS.—The seventh annual meeting of this organization will be held at Cheyenne, Wyo., on Sept. 1 to 3. The Executive Committee states that the Congress is composed of the following: Five delegates from each state and territory, to be appointed by the Governors thereof; one delegate from each city in the United States having a population of less than 25,000, and two delegates from each city having a population of over 25,000; one delegate each from any regularly organized irrigation, agricultural and horticultural society, society of engineers, irrigation companies, agricultural colleges and commercial bodies, and duly accredited representatives of any foreign nation or colony; and members of the United States Senate and House of Representatives, and Governor of a state or territory; any member of a state or territorial irrigation commission; the chairman of each section and the permanent officers of the Congress.

NEW YORK STATE STREET RAILWAY ASSOCIATION.—It is announced that the sixteenth annual convention of this Association will be held at the Hotel St. George, Brooklyn, N. Y., on Sept. 13 and 14. It is expected that papers will be presented on the following topics:

"Points on the Care of Dynamos;" "The Use and Abuse of Transfers;" "How Can We Increase Our Receipts?" "Low Joints; How to Prevent Them;" "The Power Station from an Economic Standpoint;" "The Office; Suggestions for Record, Reports, Etc.;" "Track Bonding; How Can We Obtain the Best Results?" "Street Railroad versus the State; the Relation to Each System for Single Track Roads;" "General Track Construction; the Most Approved Method of Freight and Express Service on Suburban and Interurban Lines;" "Are Air and Power Brakes on Electric Cars Practicable?" "The Most Approved Plan of Long-Distance Power Transmission;" "The Best Method of Preventing Accidents;" "Pleasure Resorts as a Means of Stimulating Travel; Are they Profitable?" "The Effect upon Street Railroads of the Application of Electricity to Steam; Possibilities and Advantages from an Up-to-Date Street Car Service and Why the Rate of Fare Should Not be Reduced;" "Daily Inspection of Car Equipment and How Can We Accomplish the Best Results?" "Receipts from Other Sources;" "How to Obtain Best Results from Sale of Advertising Privileges, Power, Etc."

RAILWAYS.

ALABAMA.—Reports state that Burton & Brown are building a narrow gage railway from their mills at Minooka, on the Louisville & Nashville, to their timbered lands five miles south of Calla, Ala. This line will be two or three miles long. County Surveyor A. P. R. Dahl will survey the route.

ALABAMA & FLORIDA.—R. M. Quigley & Co., St. Louis, Mo., have been awarded the contract for clearing, grading and track-laying on this new road, from Georgiana to River Falls, Ala., a distance of about 30 miles. M. H. Smith, Pres. Louisville & Nashville R. R. Co., Louisville, Ky., is said to be interested in the new line.

ATCHISON, TOPEKA & SANTA FE.—Press reports state that the block system on this line is being rapidly extended and that by the end of another year the Chicago and Eastern divisions will be equipped. It is expected to commence work soon on the installation of the block system, from Ottawa to Purcell, Kan.

ATLANTA, KNOXVILLE & NORTHERN. — This company is making extensive improvements on its line. Every trestle on the road is being filled. The work has been in progress but a short time, and to complete it will require about two years' time, as there are many trestles on the road, and the improvement is one which cannot be rushed.

ATLANTIC COAST LINE.—It is officially announced that, commencing Aug. 1, the Atlantic Coast Line R. R. Co. of South Carolina will become the legal successor by consolidation of the following five railway companies: the Wilmington, Columbia & Augusta, the North Eastern of South Carolina, the Cheraw & Darlington, the Manchester & Augusta, the Florence of South Carolina. The principal office of the company will be at Charleston, S. C. Pres., C. S. Gadsden, Charleston, S. C.; Gen. Mgr., J. R. Kenly, Wilmington, N. C.——Reports state that the Manchester & Augusta branch will be extended about 25 miles, contracts for the construction of the same to be awarded in about one month.

BURLINGAME & NORTHWESTERN.—This company was incorporated in Kansas July 29, with a capital stock of $340,000, to operate the old Manhattan, Alma & Burlingame Ry., between Alma and Burlingame, Ark., 47 miles. The directors are: E. B. Purcell, of Manhattan; Howell Jones, of Topeka, Kan.; Adiel Sherwood, of St. Louis, Mo.; W. S. McClintock, of Topeka. Adiel Sherwood recently purchased the line at receiver's sale.

CLEARFIELD SOUTHERN.—G. H. Gearhart, Clearfield, Pa., informs us that all the surveys have been made and the capital secured for the construction of this proposed railway, from Belsena Mills to Clearfield Bridge, a station on the Beach Creek R. R. Pres., A. W. Lee, Clearfield; Ch. Engr., Samuel Bruger, Unionville, Pa.

CLEVELAND & NEW CASTLE.—D. D. Streeter & Co., of Chicago, have been awarded the contract for constructing the portion of this new line between Akron and Niles, O.; and Ryan & McDonald, of New York, have the contract for that portion between Niles and New Castle, Pa. Sub-contracts are being let. Pres., J. H. McVey; Ch. Engr., J. H. Pirkey, both of Youngstown, O.

COLUMBIA & WESTERN.—Press reports state that the Canadian Pacific Ry. Co. assumed charge of the Columbia & Western Ry., the narrow-gage line between Trail and Rossland, B. C., on July 22, and is now operating it. The road is being largely relocated, and the contract for rebuilding it and widening the gage has been let to Winters, Parsons & Boomer, of Butte, Mont., who have begun grading. They expect to complete the work in three months; estimated total cost, $120,000. It is expected that the smelter will be in blast by August 1. Laborers are in great demand. E. P. Gutelius, Gen. Mgr.

DELAWARE.—Strong & Totten, 32 Liberty St., New York, have the contract for the construction of this proposed steam railway, from Delhi to Andes and Bovina Center, Delaware County, N. Y., on the New York, Ontario & Western Ry., 15 miles. Pres., Henry Davie; Ch. Engr., Thomas Murray, both of Delhi, N. Y.

FORT WAYNE, DELPHI & PEORIA.—John Vanatta, Pres., Brookston, Ind., informs us that the surveys have been completed, the profiles made and the capital stock secured for this proposed line between Brookston and Peoria, Ill., via Fowler, Ind.; Milfold and Buckley, Ill., 175 miles. This new line will be a branch of the Chicago, Indianapolis & Louisville Ry. Ferd. Hall, Ch. Engr., Chicago, Ill.

ILLINOIS CENTRAL.—Press reports state that Pres. Stuyvesant Fish, of the Illinois Central, and other western capitalists, made application in Alabama, Aug. 9, for a charter for a railway from West Point, Miss., in a northerly direction into Alabama, terminating for the present in the coal fields of the Mississippi Valley Coal Co. This line will be operated in connection with the Illinois Central, and the first 60 miles of the road are expected to be completed by Jan. 14, 1899.

KENTUCKY.—Judge B. F. Day, of Mount Sterling, Ky., has recently closed a sale of 6,000 acres of timber land on Beaver Creek, Menefee county, to John B. Fassett, Tunkhannock, Pa.; John T. Phillips, Dallas, Pa.; and John T. Halleck, Wilkes Barre, Pa. It is reported that a railway will be built across the property at once to Rothmell or to Yale.

LOUISVILLE, HENDERSON & ST. LOUIS.—It is reported that this company contemplates the extension of its road from West Point, its present terminus, to Louisville. The line now has an entrance into Louisville over the tracks of the Illinois Central R. R. The right of way has already been secured, and about two-thirds of the distance has been graded. R. N. Hudson, Ch. Engr., Cloverport, Ky.

NEW ORLEANS & WESTERN & PORT CHALMETTE TERMINAL.—C. B. Van Nostrand, Pres., 36 Wall St., New York, is said to have finally arranged with Contractor Stewart, of New Orleans, La., for the improvement work to be made at the new terminal in New Orleans.

OHIO RIVER & CHARLESTON.—Reports state that this line will be extended from Gaffney, the present terminus, to Spartanburg, S. C. A. N. Molesworth, Ch. Engr. and Supt., Johnson City, Tenn.

OREGON RAILROAD & NAVIGATION.—This company has let the contract for improving eight miles of its track in Oregon to Hale & Smith; to cost about $175,000.

RICHMOND, PETERSBURG & CAROLINA.—The W. P. Chapman Co., general contractor of this railway, Petersburg, Va., writes us that, contrary to current reports, the directors of this railway company have not voted to terminate the contract with the W. P. Chapman Co., nor has such cancellation been considered. The W. P. Chapman Co. holds its contract from the Colonial Construction Co., which is the financial end of the railway company.

ST. LOUIS, IRON MOUNTAIN & SOUTHERN.—Reports state that this company is extending its yard facilities at St. Louis, Mo., to quite an extent. The block system is in use at St. Louis, and for some distance down the main line; similar extensions are proposed at Memphis, Tenn., and the introduction of the block system will follow such extensions. This matter, like the new depot, however, may be held up until the litigation of the city against the company is over.

TENNESSEE CENTRAL.—It is announced that the necessary funds have been secured for the completion of this road, from Monterey to Knoxville, Tenn., a distance of about 100 miles. About fifteen miles of grading and all the track laying remain to be done. The work is to be finished in 90 days, and then through connections from Nashville to Harriman, on a direct line will be established over the Nashville, Chattanooga & St. Louis Ry. to Lebanon, thence over Crawford's road to Monterey, and from Monterey to Harriman over the Tennessee Central. This arrangement will only be temporary, as the Tennessee Central will build its own lines from Harriman through to Nashville as soon as practicable. Then the road from Nashville to Clarkesville will also be constructed. The work is to be finished within two years. Pres., Jere Baxter, Nashville, Tenn.

SAN FRANCISCO & SAN JOAQUIN VALLEY.—Two contracts for grading the Point Richmond extension of this railway are said to have been let to Woods Bros. and Cy. Moring, of Stockton, Cal. They will grade the roadbed across Robert's Island, from the San Joaquin River to Whisky Slough, a little over four miles of heavy grade work across reclaimed land, which is below highwater mark on the river, but is filled in. W. B. Storey, Jr., Ch. Engr., San Francisco, Cal.

SUGAR CREEK.—J. W. Davis, Pres., Coffman, W. Va., informs us that this company is getting the right of way for its projected railway as quickly as it can. The route is from McDonald to Raleigh Court House, W. Va., along Sugar Creek, to a coal region, a distance of 18 miles. The company desires to lease these coal lands on a royalty. J. M. Clarke, Ch. Engr., Kanawha Falls, W. Va.

TITUSVILLE, CAMBRIDGE & LAKE ERIE.—Wheeler & Co., Bowling Green Bldg., New York, have been awarded the contract for the construction of a 30-mile section of this railway. F. P. Brown, Gen. Supt., Titusville, Pa.

WASHINGTON & CHESAPEAKE BEACH.—The construction of this line is being rapidly pushed. The road is already in operation from Deanwood, D. C., to Marlboro, a distance of twelve miles. It is the intention to run both steam and electric trains over the line, connecting for the present with the Alexandria branch of the Baltimore & Ohio R. R., at Deanwood, thence to Hyattsville, Md., reaching Washington over the Baltimore & Ohio tracks to the station at C St. and New Jersey Ave.

WISCONSIN.—Negotiations are said to be in progress between the Wisconsin & Michigan, the Ann Arbor, the Dunbar & Wausaukee and the Holmes & Sons' railway companies, the last two exclusive logging roads, whereby the three are to have terminals at Menominee, Wis. If the deal is made the Wisconsin & Michigan will remove its eight miles of rails between Peshtigo and the harbor to a new line to be built from Bagley Junction to Menominee, a like distance. The Dunbar & Wausaukee will build from Wausaukee to a connection with the Wisconsin & Michigan at Bagley Junction, a distance of fourteen miles, and the Holmes & Sons' road will build from its present eastern terminus at Muskauna Creek to a connection with the Wisconsin & Michigan, at Kerry Gow, a distance of six miles. This new railway scheme will carry with it the erection at Menominee of a large union station, and also the construction of a new car barge slip for the Wisconsin & Michigan. The latter road is now being extended to Quinnesec and the Menominee iron range.

STREET AND ELECTRIC RAILWAYS.

MALDEN, MASS.—The aldermen of this town have granted permission to the Boston Elevated R. R. to extend its tracks on Broadway and Eastern Ave., Maplewood.

HARTFORD, CONN.—Frank Caum, Supt. Hartford St. Ry. Co., informs us that a brick and iron addition to the power station, 40 × 75 ft., is now being built and is expected to be in use by October 1. A 30 × 52 × 48-in. cross-compound engine, with a 850-K-W. General Electric generator and a Worthington independent condenser will be installed. There are no novel features except the all-concrete foundations of the building, built by the Hartford Paving & Construction Co., in which 1,200,000 lbs. of concrete were used. The iron work in the building is by the Berlin Iron Bridge Co., of East Berlin, Conn. E. S. Goodrich, Pres. Hartford St. Ry. Co.; N. McD. Crawford, Gen. Mgr., Hartford.

SUFFIELD, CONN.—The charter of the Suffield & East Granby St. Ry. Co. was sold on Aug. 1 to George W. Dunham, of Flemington, N. J., who is said to hold a controlling interest in the Springfield & Southwestern St. R. R. Co. It is now thought that the proposed electric railway for this town will now be built, as the suit pending between the two companies will probably be withdrawn.

BROOKLYN, N. Y.—A certificate of merger has been filed by the Nassau Electric Ry. Co. of Brooklyn, with the Secretary of New York State, merging these companies: Kings County Electric Ry. Co., Coney Island Ry. Co. and the Union Ry. Co. of Brooklyn.

FULTON, N. Y.—O. C. Breed, Engr., Fulton, has prepared plans for repaving the curves and turnout for the Fulton & Oswego Falls St. Ry. Co., the changes made being suitable for the use of electric motive power. The present line is operated by horses.

LAURENS, N. Y.—Reports from Oneonta, N. Y., state that Owen Phillips has completed a new survey for an extension of the electric railway from West Oneonta to Laurens. It is said that the grade is a good one, and is on much higher ground than the one laid out by Mr. Covert last fall.

MOUNT VERNON, N. Y.—It is announced that the Nassau Electric R. R. Co., of Brooklyn, has bought the privileges of the North Mount Vernon Electric R. R. Co. for $15,000. The line is about 1½ miles in length and of late has not been operated.

NEW HARTFORD, N. Y.—It is reported that the New Hartford & Clayville Electric R. R. Co. has applied to the village trustees for a franchise.

OSWEGO, N. Y.—It is reported that the Lake Ontario & Riverside Ry. Co. has purchased a quantity of rails in New York, to cost about $3,000. These rails are required for the new extension of the line in East Bridge St., and it is expected that they will be laid next month. Receiver, F. H. Tidman.

PEEKSKILL, N. Y.—The Railroad Commission has granted the application of the Peekskill Traction Co. for permission to construct an electric street railway in Peekskill and from that village to the state camp and thence to Verplank's Point.

STILLWATER, N. Y.—Work on the Mechanicsville & Stillwater Ry. is progressing rapidly. The track is laid to within about one mile of Waterford.

UTICA, N. Y.—The Railroad Commission announced Aug. 4 that it has granted the application of the Frankfort & Utica Electric R. R. Co. to be permitted to use the overhead electric trolley system. No date has yet been fixed by the commission for the adjourned hearing on the company's application to be allowed to cross the tracks of the West Shore R. R. at grade at a point near Utica. Among those interested are, Col. Clinton Beckwith, of Herkimer, N. Y.; and John V. Quackenbush, of Mohawk, N. Y.

CAMDEN, N. J.—The Camden & Suburban Ry. Co. is laying a second track on Market and Federal Sts. The extension to Beideman's station by way of River Road, Stockton, is also being pushed.

ELIZABETH, N. J.—The Union County Board of Freeholders Aug. 4 received bids for the franchise for a trolley line between Elizabeth and Plainfield. The only bid received was that of John Kean, Pres. Elizabeth City Horse R. R. Co., at $250,000. Mr. Kean previously made an offer of $100,000.

HACKENSACK, N. J.—The reorganization committee of the Union Traction Co. of New Jersey, composed of Eliot Norton, Chm.; Wm. L. Trenholm, Daniel B. Halstead, Max Milian Calm and Geo. G. Duy, of New York, contemplate the completion of the company's line into Hackensack, requiring the construction of 6½ miles of track. Secy., G. Rowland Munroe, care of Van Schaick & Norton, 100 Broadway, New York.

PLAINFIELD, N. J.—It is reported that the Plainfield St. Ry. Co. applied to the council, Aug. 8, for a franchise to operate a trolley line from East 5th St. through Richmond St. to East 2d St., and through the latter street to the city line. The company filed the required number of consents, representing all except 131 feet of the entire street, and as only one remonstrance was presented, the franchise was granted.

PETERSBURG, VA.—At a meeting of the council Aug. 1, an ordinance was passed granting a franchise to the Piedmont Traction Co. of Charlottesville, to build an electric street railway in this city. It is said that the company will begin the construction of the line at once.

SPARTANBURG, S. C.—We are informed that the Spartanburg Gas, Electric Light & St. R. R. Co. has been organized in South Carolina, with a capital stock of $250,000, to acquire property now owned by the Aetna Light & Power Co., which includes the street railway in this city, and a graded road for a freight line to Glendale and Clifton, 10 miles. It is proposed to build the street railway, freight line, etc., as more fully stated under Electric Light and Power. Eliot Norton, Vice-Pres., 100 Broadway, New York.

CLEVELAND, O.—It is reported that the Urban & Suburban Ry. Co. has been incorporated by E. W. Moore; H. A Everett, Pres. Akron, Bedford & Cleveland R. R., Garfield Bldg., and others. It is proposed to construct an electric railway between Cleveland and Toledo.

DELAWARE, O.—The Delaware Electric St. Ry. was sold by Receiver Cone, July 30, at public auction, to B. W. Brown and others, of Delaware, at $13,525.

LEETONIA, O.—The Leetonia Ry. Co. was incorporated Aug. 4 with a capital stock of $1,000, to construct a railway from Salem township, Columbiana county, to Leetonia. The incorporators are John McKeefrey, W. D. McKeefrey, N. J. McKeefrey, C. R. Shontz and Paul M. Mossman.

MONTICELLO, IND.—Chas. C. Spencer, Pres. Tippecanoe Electric R. R. Co., informs us that the proposed route for this electric railway is from Rochester to Covington and Fowler, via Winamac, Pulaski, Buffalo, Monticello and Lafayette, Ind., a distance of 150 miles. This line does not parallel any other road, and passes through a rich and thickly populated country, in which corn, wheat, etc., is raised in abundance. From 20 to 30 miles of the right of way is secured, and capitalists stand ready to take the bonds and construct the railway.

GRAND RAPIDS, MICH.—The Grand Rapids & Belding Traction Co. contemplates the construction of an electric railway in this city. The company is capitalized at $200,000. Pres., Chas. B. Judd; Vice-Pres., J. P. Creque, both of Grand Rapids.

NILES, MICH.—The Indiana Ry. Co., which proposes connecting St. Joseph, Benton Harbor, Berrien Springs, Niles and other Berrien county points with South Bend, Ind., by an electric railway, has obtained the right of way through all the townships from St. Joseph to Niles, and this latter city will soon be asked for a franchise. If it be not granted the tracks will probably be built on the outskirts, as the company has permission to use Niles township. J. A. Russell, J. S. Hardell and William Van Cleave, of Detroit, Mich., are interested. The new railway will come over the Berrien Road from Berrien Springs to Niles.

LAWRENCE, KAN.—It was formally agreed by the citizens of Lawrence at a mass meeting held July 26 to accept the proposition of Frank Kern, of Mattoon, Ill. and Col. W. D. Ewing, of Boston, for the construction of an electric street railway in this city, and work on the new system is expected to begin at once. It is agreed that five miles of road shall be in operation December 1, and other lines will be built in the spring.

ST. LOUIS, MO.—The president and trustees of Winstanley Park have passed an ordinance granting to the St. Louis, Belleville & Suburban Electric St. Ry. a right of way through the village. Pres., F. F. Espenscheid.——The stockholders of the Central Traction Co. have voted to increase the paid-up capital stock from $100,000 to $5,000,000. It is proposed to construct the line as rapidly as possible. Pres., R. M. Snyder, Kansas City, Mo.; Secy., John H. Blessing, St. Louis.

DENVER, COLO.—The supervisors have passed the Colfax electric franchise over the mayor's veto, thus providing for the operation of an electric line to Montclair.

NELSON, B. C.—It is reported that S. C. Drummond, representing the British Electric Traction Co., London, England, had applied to the council for a charter for an electric railway in this city.

TAMPICO, MEXICO.—Press reports state that an American syndicate is arranging to build an electric street railway in this city.

ELECTRIC LIGHT AND POWER.

NORTH GORHAM, ME.—Press reports state that a contract has been awarded for electrical machinery for the plant in North Gorham at Great Falls, on the Presumpscot River, for the Sebago Power Co. It calls for two 250-K-W. alternators, with marble switchboards and all the necessary fixtures. The Cumberland Illuminating Co. is installing this plant, and will, within 90 days, be supplying power and light to Deering, Westbrook and Cape Elizabeth. A large amount of power can be sold here for motor, and it is understood that the Yarmouth Railway will take power of this company when they are ready to supply it. The company is under the same management as the Belknap Motor Co. The company will expend about $40,000.

BURLINGTON, VT.—The Consolidated Electric Light Co. has been awarded the 3-year contract for lighting this city. There will be required 140 2,000-c.p. arc lights.

HINESBURG, VT.—We are informed that the proposed plant, which will be operated by water power, will have a capacity for 16 arc and 500 incandescent lights; estimated cost, $8,000. Engr., Eugene Sanctuary, Montpelier, Vt.

MONTPELIER, VT.—The Bolton Falls Power Co. has about completed arrangements preparatory to entering upon the work of constructing the dam below the falls, having secured all the rights necessary for the enterprise. About 4,000 HP. will be developed. It is understood that there will be three contracts made—one for building the dam, one for building the power house and one for equipping the power house with machinery. G. H. Almon, Montpelier, G. E. Moody, Waterbury, Vt., and C. L. McMahon, Stowe, Vt., are interested. Engr., H. W. Allen, Manchester, N. H.

AMESBURY, MASS.—It is stated that the Amesbury Electric Light, Heat & Power Co. will purchase a 1,000 incandescent light machine this year. Supt., B. H. Young.

MYSTIC, CONN.—Arrangements are being made by Thos. C. Perkins, Hartford, Conn., for furnishing and constructing the proposed plant to cost about $15,000.

TALCOTTVILLE, CONN.—Talcott Bros. are reported to have begun the construction of a plant.

BUFFALO, N. Y.—Plans have been filed with the bureau of buildings for a brick transformer house to be erected at 2290 Niagara St. by the Cataract Power & Conduit Co. It will cost $2,500.

CHARLOTTE, N. Y.—R. M. Schwartz, Clk., writes us that plans for the proposed plant and water-works have not yet been completed by the Stanwix Engineering Co., Rome, N. Y.; estimated cost of plant, $10,000.

NEWBURG, N. Y.—The Consolidated Gas, Electric Light, Heat & Power Co. has sold $29,000 in bonds for extending its plant, according to reports.

PORT CHESTER, N.Y.—W. S. Comly, Secy. Port Chester Electric Lighting Co., writes us that the company has done nothing yet in regard to building the proposed plant.

MADISON, N. J.—Daniel Burns, of this place, has been awarded the contract for erecting the addition to the electric light plant at $4,500. The council will also purchase a new dynamo and switch board. The improvements in the station and the new engines, wells, dynamo and switch board will cost about $30,000.

VINELAND, N. J.—Capitalists and business men are forming a company to dam Muddy Run, four miles from here, for the purpose of furnishing electric power for manufacturing purposes and lighting the town with electricity.

PHILADELPHIA, PA.—The Pennsylvania Mfg., Light & Power Co., which recently purchased the Hestonville Railway Co.'s power station at 25th and Callowhill Sts., is making plans for the enlargement of the old station.

POTTSTOWN, PA.—Press reports state that the Schuylkill Valley Illuminating Co. proposes to change the 2,000-c.p. lights in Rogersford and Spring City to 1,200-c.p. Supt., W. D. Jones.

DURHAM, N. C.—At the election held Aug. 1 this place voted against issuing $225,000 in bonds for a plant, water-works, etc.

SPARTANBURG, S. C.—Eliot Norton, Vice-Pres., 100 Broadway, New York, writes us that the Spartanburg Gas, Electric Light & St. R. R. Co. has been organized under the laws of South Carolina, for the purpose of acquiring the property in Spartanburg now owned by the Aetna Light & Power Co., and which comprises the gas and electric light plant, street railway and graded road for a freight line to

Glendale and Clifton, 10 miles. The capital stock of the new company is $250,000. It is proposed to erect a new 50,000-ft. gas holder, extend the mains and service, build a water power for electric service and also to build the street railway and freight line, for all of which the money has been provided. Work will be begun early in September. Ch. Engr., J. Y. McClintock, Rochester, N. Y. Communications to be addressed to the company at its New York office

ATHENS, GA,—The council is reported to have decided to purchase a new 50-arc light dynamo.

COLUMBUS, GA.—Bids were asked by the Columbus Power Co. until Aug. 10 for constructing the proposed power plant to cost complete about $250,000. The contract for the wheels and iron work has been let to the Holyoke Machine Co., Holyoke, Mass., as noted in our issue of July 28.

GALLATIN, TENN.—The council has decided to build a municipal plant, and not grant a franchise, as at first proposed.

NASHVILLE, TENN.—The board of public works is considering the question of lighting the city hospital with 100 16-c.p. and 27 32-c.p. lights.

COVINGTON, KY.—Bids are asked until Aug. 17 for lighting that portion of the city now illuminated with gasoline with either gasoline, gas or electricity. Theo. Von Heone, Cy. Clk.

McARTHUR, O.—Bids are asked until Aug. 25 for furnishing and constructing a plant, described in our issue of July 28. Engrs., F. P. Roberts & Co., 510 Osborn Bldg., Cleveland; Pres. Bd. Trustees, Paris Horton.

MOUNT GILEAD, O.—Burton J. Ashley, Old Colony Bldg., Chicago, Ill., and Wellington, O., has submitted a report and estimates for a plant and water-works to cost complete about $35,000.

RICHWOOD, O.—Edward Schambs, Mansfield, O., has been awarded the contract for furnishing this city with 27 arc lights at $65 a year.

SOUTH CHARLESTON, O.—The question of building a plant is being considered, according to reports.

WOOSTER, O.—The council is reported to have rejected the bids received July 18 for electric lighting. The question of building a city plant is being considered.

MOUNT PLEASANT, MICH.—Congress has voted an appropriation of $10,000 for a plant, water-works, etc., at the Indian School. Supt., Rodney S. Graham.

CASS CITY, MICH.—The Fort Wayne Electric Corporation, Fort Wayne, Ind., has been awarded the contract for furinshing the plant for this place, excepting the engine which will be furnished by the Ridgeway Dynamo & Automatic Engine Co., Chicago, Ill.

JACKSON, MICH.—Bids are asked until Sept. 1 for constructing a dam, power house, etc., on the Kalamazoo River, for the Allegheny Hydraulic Co., Ltd., as stated in our advertising columns. Address Wm. G. Fargo, Engr., Jackson

LAWTON, MICH.—This place is considering the question of building a plant. An election to vote on the proposition will probably soon be held. H. C. Lammond, Village Clk.

GREENUP, ILL.—Local papers state that bids will be asked at once by the village board for furnishing and constructing a plant.

MARSHFIELD, WIS.—The council is reported to have asked for bids for lighting the streets. About 30 arc lights will be required. Chas. Schmieler, Cy. Treas.

MILWAUKEE, WIS.—The council will soon vote on the question of issuing $250,000 in bonds for a municipal plant.

DULUTH, MINN.—It is reported that the city will vote Aug. 30 on the question of issuing $100,000 in bonds for electric lighting. H. W. Cheadle, Cy. Clk.

GRAND FORKS, N. DAK.—The council is reported to have voted to build a plant. Population (1897), 12,000. Jno. Dinnie, Mayor; F. A. Brown, Audr.

KANSAS CITY, MO.—Alderman H. M. Beardsley, Chn. Com., is securing information for a municipal plant. Mr. Beardsley will visit Buffalo and a number of eastern cities.——Cornelius Sweetland and R. J. Ingraham, Providence, R. I., have applied for a franchise.

FORT WORTH, TEX.—Press reports state that on Aug. 1 Dr. A. D. Thomas, of Little Rock, Ark., filed application in the federal court for a receiver of the property of the Standard Light & Power Co., of Fort Worth. A hearing will be had before United States District Judge E. R. Meek in this city. The property is valued at $75,000.

HOUSTON, TEX.—Surveys for a site for the proposed municipal plant are being made. Aldermen Tuffly, Rosenthal and Robinson compose the committtee.

PARIS, TEX.—Bids are asked until Sept. 1 for lighting the city with arc lights for one to five years, as stated in our advertising columns. Jno. C. Gibbons, Mayor; W. C. Dean, Cy. Engr.

LAFAYETTE, COLO.—It is stated that the Rocky Mountain Power Co. will build a plant at Lafayette for transmitting power about 28 miles to Black Hawk and Central City; estimated cost about $150,000. Vice-Pres., A. N. Page.

SEATTLE, WASH.—Press reports state as follows: The Snoqualamie Falls Power Co. let contracts Aug. 8 for the completion of its plant. Snoqualamie Falls is 22 miles from Seattle, and about the same distance from Tacoma in an air line, and have an unbroken vertical fall of 270 ft. The flow of the river is equal to about 30,000 HP. at low water, and the plan of installation is such that at a small additional expense for dams and reservoirs the entire drainage from the snowfields of the Snoqualamie watershed of 1,000 square miles will be available, making over 100,000 HP., whenever business of the adjacent cities may demand it. The power house is hewn out of the solid rock, 250 ft. beneath the crest of the fall, where the waterwheels connect direct with generators, from which the electricity is transmitted by wire to Seattle and Tacoma. Chas. H. Baker, Seattle, and Wm. H. Baker, ex-Pres. Chicago Bd. of Trade, Chicago, Ill., are interested. Ch. Engr., Thos. T. Johnston, Security Bldg., Chicago.

WOODLEY, ORE.—Press reports state that bids will be received for the Grande Ronde Placer Mining Co.'s electric light installation at Woodley, consisting of a 15-HP. engine; a Thomson-Houston arc dynamo, adapted for 10 2,000-c.p. arc lights; a Westinghouse incandescent dynamo, for 15 16-c.p. lights, 100 volts, about seven miles of No. 6 insulated copper wire, together with the necessary aparatus and fittings in connection with plant. Paul Berthon, Baker City, Ore., may be addressed.

BERKELEY, CAL.—The town trustees decided July 26 to ask for bids for lighting the town with electricity for two years; check, $2,000.

HEALDSBURG, CAL.—Bids are asked until Aug. 26 for constructing a plant and water-works, and also for the purchase of $80,000 of 5% bonds, as stated in our advertising columns. C. H. Pond, Cy. Clk.

RED BLUFF, CAL.—It is stated that the Tehama Electric Co. will purchase two additional dynamos for its new plant. James Cross, San Francisco, Cal., and Wm. Sanders are interested.

THOROLD, ONT.—Bids are asked by the mayor until Aug. 17 for furnishing a plant of 1,500 to 2,000 lights capacity. Engr., R. J. Parke, 310 Foresters Temple, Toronto, Ont.

NELSON, B. C.—The question of either purchasing the present plant or of building a new one at a cost of about $40,000 is being considered, according to reports.

NEW COMPANIES.—National Light & Power Co., New York, N. Y.; $5,000,000, with $1,000 paid in. E. S. Savage, Rahway, N. J.; M. D. Valentine, Woodbridge, N. J.; Albert Bruns, Bronx Borough, New York; A. L. Sherer, Manhattan Borough, New York.

Worthington Water & Light Co., Worthington, Ind.; $5,000; John H. Brown, B. O. Mayer, Fuller McClellan.

Cherubusco Water & Light Co., Cherubusco, Ind.; $5,000; J. H. Brown, B. O. Mayer, Fuller McClellan.

Central Operating & Construction Co., Fond du Lac, Wis.; to build a light plant and water-works; Maurice McKenna, C. D. Smith.

BRIDGES.

SALEM, MASS.—The county commissioners have awarded the contract for building a bridge over Forest River at this city to Thos. Fitzgibbons, Beverly, Mass., at $18,725.

MOUNT VERNON, N. Y.—The council is considering the question of building bridges on South Fulton Ave., East Lincoln Ave., East Third St. and East Sixth St. Edwin W. Fiske, Mayor.

JERSEY CITY, N. J.—Bids are asked by the board of freeholders until Aug. 19 for the purchase of $26,000 of county bridge bonds.

NEW BRUNSWICK, N. J.—Bids are asked until Aug. 17 for repairing the Cheesequake Bridge. R. J. Dougherty, Cy. Engr., 113 Albany St.——The contract for the Washington Ave. bridge has been awarded to Wm. Farrier, New York, N. Y., at $1,565.

NUTLEY, N. J.—Bids are asked until 2.30 p. m., Aug. 11 for constructing a bridge over Third River, on Harrison St., to have steel beams, brick arches and masonry abutments. James Owen, County Engr., 800 Broad St., Newark.

PATERSON, N. J.—The board of freeholders will have plans prepared for the construction of a new bridge at Main St.

COCALICO, PA.—Bids are asked until Aug. 20 for constructing an iron bridge 75 ft. long and 16 ft. wide, over Cocalico Creek. John B. Eshleman, Chn. Comrs., Lancaster, Pa.

MEHOOPANY, PA.—The Mehoopany Bridge Co. has been incorporated with a capital stock of $25,000, to construct and maintain a toll bridge over the Susquehanna River. The directors are: Elley Colby, Owego, N. Y.; F. L. Siltser, S. L. Stark, C. A. Little and John B. Fosset, Tunkhannock, Pa.

PITTSBURG, PA.—The Creighton Bridge Co., Pittsburg, with a capital stock of $100,000, has been authorized to construct a bridge over the Allegheny River. The directors are: C. G. L. Peffer, M. D. Weyman, Mark D. Weyman and J. Frank Peffer, of Tarentum, Pa.

WESTCHESTER, PA.—Bids were asked until Aug. 10 for constructing a 76-ft. iron bridge at Landenberg, and also for the removal of the old iron structure. R. T. Garrett, Chn. Comrs.

CUMBERLAND, MD.—Reports state that the West Virginia, Central & Pittsburg Ry. Co., will construct a 250-ft. plate girder bridge, on the extension to Huttonsville. J. W. Galbreath, Ch. Engr., Cumberland.

BELLAIRE, O.—Reports state that an effort is being made to have the council construct a bridge from Franklin St. to Central Ave., on Rose Hill.

CINCINNATI, O.—F. S. Krug, County Engr., has recommended that the contract for building the substructure for two bridges on the Banklick road be let to Reubel Bros., at $2,050.

DELAWARE, O.—Bids are asked until Aug. 19 for constructing a steel bridge over the Olentangy River, in Liberty township, according to reports. E. S. Mendenhall, County Surveyor.

LONDON, O.—Bids are asked until Aug. 25 for constructing an iron superstructure and for the masonry work of six bridges, according to reports. W. D. Wilson, County Audr.

MOUNT VERNON, O.—Bids are asked until 12 m., Aug. 12, for furnishing the material and constructing an iron superstructure 110 ft. × 16 ft., over the Kokosing River, at Browns ford. W. A. Wander, County Audr.

SPRINGFIELD, O.—Plans have been submitted to the board of public affairs by Wm. Bagley for a bridge of two spans, 41 ft. each; to cost about $4,500.

PLYMOUTH, IND.—N. E. Leonard, Jr., Cy. Clk., informs us that a contract has been awarded to W. P. Bassett, of the Rochester Bridge Co., Rochester, Ind., at $2,950, for constructing a bridge over Yellow River.

CARMI, ILL.—The county supervisors have awarded the St. Louis Bridge Co., St. Louis, Mo., a contract at $1,629, for building three steel bridges over French Creek.

CHICAGO, ILL.—Bids are asked until Oct. 5 for furnishing and erecting certain bridge superstructures on the line of the river diversion channel of the Desplaines River. Jas. Reddick, Clk. Bd. Sanitary Trustees, Security Bldg., Chicago.——The following are the lowest bids received by the sanitary trustees Aug. 3 for building certain bridges: Summit and Lyons Highway, C. L. Strobel, $12,620; Chicago Terminal Co., Desplaines River, Wisconsin Bridge & Iron Co., $7,318; Romeo Highway, Heldmaier & Neu, $9,659; Chicago, Madison & Northern, Kedzie Ave., McArthur Bros., $5,743; Lemont Highway, Sackley & Petersen, $4,351; Willow Springs Highway, Sackley & Petersen, $5,386; Chicago Terminal Co., Desplaines River, Heldmaier & Neu, $7,500; Summit and Lyons Highway, Section F, McArthur Bros., $18,577; C. L. Strobel, Willow Springs Highway, main channel, Lemont Highway, Romeo Highway, $14,990 each.

ELORY, WIS.—We are informed that W. G. Kirchoffer, Engr., Baraboo, Wis., is preparing plans for a bridge to be constructed across the Baraboo River.

LA MOURE, N. DAK.—Bids are asked until Aug. 22 for constructing a bridge over the James River, according to reports. Chas. Alister, County Audr.

GRASS VALLEY, CAL.—The supervisors have asked for bids for building a new bridge over the Greenhorn Creek, between You Bet and Little York.

BRANTFORD, ONT.—Bids are asked until Aug. 20 for constructing a 100-ft. span highway bridge over a part of Grand River. T. H. Jones, Cy. Engr.

BUILDINGS

BOSTON, MASS.—Bids are asked by the city school committee, Mason St., until Aug. 15, for building an addition to the Norcross school building, on D and 5th Sts., South Boston. Chn., Thos. F. Strange.

NEW BEDFORD, MASS.—Bids are asked until Aug. 19 for building the Quittacas gate-houses. Engrs., Rice & Evans, 95 Milk St., Boston; Supt., R. C. P. Coggeshall.

PITTSFIELD, MASS.—The water department proposes to extend the mains to Tillotsons at a cost of about $10,000.

WATERTOWN, MASS.—Press reports state that the Watertown Water-Works Co. and the committee appointed by the town to take and manage the works have about reached an agreement. The company wanted over $450,000, while the town would give but $400,000. Both sides have agreed that the price shall be left to three referees, to consist of Moses Williams, John C. Freeman and Solomon Lincoln.

ALBANY, N. Y.—The contract for erecting a pumping station and intake for the water filtration plant has been let to Stone & Thurston, New York, at $2,977.——Wm. A. Reynolds has been awarded the contract for laying water mains in several streets, at $2,730.——The council has been asked to appropriate $22,000 for cleaning and improving the Bleecker reservoir. Geo. I. Bailey, Supt.

ALDEN, N. Y.—An election will be held Aug. 25 to vote on the question of issuing bonds to build works to cost about $16,000. Engr., J. F. Witmer, Ellicott Square, Buffalo, N. Y.

AMSTERDAM, N. Y.—It is proposed to build a new main from the distributing reservoir and also a new dam. S. E. Babcock, Cy. Engr. of Little Falls, N. Y., has furnished data to the council.

CHARLOTTE, N. Y.—R. M. Schwartz, Clk., writes us that specifications for the works are being prepared by the Stanwix Enginering Co., Rome, N. Y. The supply will be secured from Lake Ontario. Population, 1,305.

COPENHAGEN, N. Y.—The village trustees have been petitioned to take steps toward securing works.

DEPEW, N. Y.—It is reported that the residents of this place are endeavoring to have a pipe line laid from Buffalo to furnish the town with an increased water supply. Geo. Urbans, Jr., and J. J. Albright may be addressed.

GENESEO, N. Y.—An election will be held Aug. 15 to vote on the question of appropriating $8,000 for the purchase of a new pump for the station at Conesus Lake.

RHINEBECK, N. Y.—Wm. R. Hutton, 35 Broadway, New York, has submitted estimates for works to cost about $58,000 if the water is secured from Brown Pond, or about $50,000 if secured from wells, with a reservoir located on Gerger's Hill. Dr. Frank Latson, Pres. Village Bd.

ROME, N. Y.—The Stanwix Engineering Co. of this place has submitted estimates for gravity works, to cost about $150,000. It is proposed to secure the new supply of 8,000,000 gallons from Fish Creek.

TICONDEROGA, N. Y.—F. B. Richards, Pres., writes us that the proposed extension of the pipe line laid above the ground was to help out the reservoir at low water. The scheme for the present has been abandoned.

BRIDGETON, N. J.—Bids are asked until 7 p. m., Aug. 12, for furnishing and erecting a steel water tank, 100 ft. in diameter, and 33 ft. high, with steel skeleton frame for the top of the same (about 275,000 lbs.). Timothy Woodruff, Supt. Water-Works; David S. Blew, Chn. Water Com.

FORT LEE, N. J.—W. O. Allison and A. G. Sage, of Englewood Cliffs, N. J., have organized a water company to supply this place with water. The supply will be secured from artesian wells.

GLOUCESTER CITY, N. J.—The council is reported to have decided to ask for bids for furnishing a new pump of 2,500,000 gallons capacity. Supt., H. M. Hailey.

HAMMONTON, N. J.—A town meeting will soon be called to consider the question of granting a franchise to the Hammonton Water Co. A. H. Sutton, Pres. Bd.

PRINCETON, N. J.—H. B. Hooker & Son, Rochester, N. Y., are reported to have been awarded the contract for constructing 925 ft. of submerged pipe, a new well and a circular pump house for the Princeton Water Co.

BRADDOCK, PA.—Cronin & O'Herron, Pittsburg, Pa., have been awarded the contract, at about $20,600, for laying 13,630 ft. of 16 and 12-in. pipe. Supt. of Pub. Wks., Wm. Howat.

CHAMBERSBURG, PA.—Bids are asked until Aug. 20 for furnishing a 1,500,000-gallon power pump for the water-works, as stated in our advertising columns. Dr. P. B. Montgomery, Water Comr.

DUBOIS, PA.—The question of securing an increased water supply is again being considered.

FAYETTE CITY, PA.—Jno. Mullin, Cy. Clk., writes us that there are no prospects of works being put in at present, or in the near future, as has been reported. Population, 1,200.

KNOXVILLE, PA.—An election will be held Aug. 23 to vote on the question of issuing $12,000 in bonds for works, according to reports.

McKEESPORT, PA.—Bids are asked until Aug. 15 for furnishing 5,000 ft. of cast-iron water pipe, sinking five new wells, laying suction pipe, and for furnishing an iron fence at the high service station. R. A. Hutchins, Cy. Controller.

MILLVALE, PA.—The council it reported to have decided to purchase an additional pump for the water-works.

NAZARETH, PA.—Frank Kunkel, Secy. Nazareth Water Co., writes us that nothing further has been done than to appoint a committee to negotiate for the site for the additional water supply. The committee, it is expected, will report in a few days. As soon as the site is secured plans will be prepared.

PHILADELPHIA, PA.—Plans for the new reservoir on George's Hill for supplying water to West Philadelphia are about completed. Bids will probably soon be asked. The plans provide for a single basin extending to the northwest of the present reservoir. It will cover about 10 acres and will be about 30 ft. deep. The site selected is now a natural basin, with walls on the north, south and west sides, so that it will be necessary to build only one wall on the east side. The capacity of the reservoir is to be 50,000,000 gallons, at a depth of 20 ft., and 40,000,000 gallons at a depth of 15 ft. The present basin holds 40,000,000 gallons. The greatest elevation of the site is 222 ft., and, as at present contemplated, the surface of the basin will be at a height of 216 ft. above sea level. Estimated cost, $500,000.

STRASBURG, PA.—The proposition of the Strasburg Water Co. to furnish complete works for the borough has been accepted by the council, the price of the works being $19,000. Edgar B. Kay, Engr., Strasburg Water Co.

WASHINGTON, D. C.—Bids are asked by the district commissioners until Aug. 22 for driving wells, as stated in our advertising columns.——Col. Bingham, in charge of public buildings and grounds, in his annual report to the Chief of Engineers, just submitted, says that the need of a new conduit between Great Falls and the distributing reservoir is only a matter of time. The daily consumption of water for the past year was 47,000,000 gallons, or 170 gallons per capita per day. The conduit is capable of discharging into the reservoir about 76,500,000 gallons a day. The daily consumption has increased from 35% of the conduit capacity ten years ago to 62% now. The work of raising the height of the dam at Great Falls in order to increase the water supply of Washington was completed this year at a cost of $101,373.

LAUREL, MD.—W. H. Minch, of the Laurel Water-Works Co., Baltimore, writes us that nothing has yet been done in regard to putting in the proposed works. Address Jos. M. Cone, The Severn, Baltimore, Md.

POCOMOKE CITY, MD.—R. M. Stevenson, Mayor, writes us that Pownall & Minshall, 150 Nassau St., New York, have been engaged to make surveys and plans for the proposed works and sewerage system. Bonds for the improvement will soon be issued.

RICHMOND, VA.—The council has adopted resolutions looking to the filtering of the water supply.

HARPER'S FERRY, W. VA.—J. L. Dailey, Mayor, writes us that nothing toward securing works has been done except to get the sentiment of the people on the question. An official election will probably be held soon.

WHEELING, W. VA.—L. G. Hallock, Wheeling, has been awarded the contract for building the new pumping station at $37,807. Of this amount the well and river connection will cost $27,120, and the building, $10,687. This contract does not include the pumping engine of 12,000,000 gallons capacity. This contract will be let later. A. L. White, Cy. Engr.

DURHAM, N. C.—This place voted Aug. 1 against issuing $225,000 in bonds for works, an electric plant, etc.

MOBILE, ALA.—Bids are asked until Sept. 12 for the purchase of $750,000 of 4½% water-works and sewerage bonds. John Craft, A. S. Lyons, Finance Com.

McCOMB CITY, MISS.—Bids are asked by the mayor until Sept. 21 for furnishing and building works. Engrs., Sanders & Porter, Columbia Bldg., Louisville, Ky.

SARDIS, MISS.—This place having voted July 25 to build works, has engaged Alber & Byrne, Birmingham, Ala., to prepare plans and specifications for the works. J. Q. West, Mayor.

CHICAGO JUNCTION, O.—Bids are asked until Aug. 15 for building the power station, furnishing boilers, pumping machinery, connecting wells, etc. Engr., Chas. Sturtevant, St. Louis, Mo.; Clk., Louis Simmermacher.

CINCINNATI, O.—The water-works commission has awarded the contract for furnishing the sluice gates for the new works at California, O., to the Vulcan Iron Works Co., Chicago, Ill., at $8,079.

MOUNT GILEAD, O.—Burton J. Ashley, Old Colony Bldg., Chicago, has submitted a report and estimates for works and an electric plant to cost complete about $35,000: for water-works alone the cost will be $26,800. An election will soon be held to vote on the question of issuing the necessary bonds.

CHURUBUSCO, IND.—The council is reported to have voted to grant a franchise to the Churubusco Water & Light Co. The company was incorporated last month with a capital stock of $5,000, by J. H. Brown, B. O. Mayer and Fuller McClellan.

WORTHINGTON, IND.—The Worthington Water & Light Co. has been incorporated with a capital stock of $5,000, by John H. Brown, B. O. Mayer, and Fuller McClellan.

LA PORTE, IND.—An election will probably be held Aug. 23 to vote on the question of improvements to the works and the water supply. The committee consists of Chas. G. Replogle, W. C. Weir and Jno. C. Wilhelm.

BENTON HARBOR, MICH.—The question of securing a better water supply is being considered. It is proposed to extend the intake into Lake Michigan at a cost of about $25,000.

CASS CITY, MICH.—The following have been awarded contracts for furnishing and building the works and electric plant, to cost $18,000: Pumping machinery—Dean Bros. Steam Pump Works, Indianapolis, Ind.; Boiler—McKinnon Mfg. Co., Bay City; Heater—Stilwell-Bierce & Smith-Vaile Co.; Cast-iron pipe—American Pipe & Foundry Co., Chattanooga, Tenn., and Cincinnati, O.; Hydrants—Michigan Brass & Iron Works, Detroit; Valves and boxes—Rensselaer Mfg. Co., Troy, N. Y.; Dynamos, Switchboards, etc.—Fort Wayne Electric Corporation, Fort Wayne, Ind.; Engines—Ridgeway Dynamo & Automatic Engine Co., Chicago.

HUBBARDSTON, MICH.—The village board is considering the question of putting in small works for fire protection only.

LAKE ODESSA, MICH.—This place will vote Aug. 16 on the question of issuing $11,000 in bonds for works, according to reports.

LAURIUM, MICH.—It is reported that this place will vote on the question of issuing $15,000 in bonds for works.

LAWTON, MICH.—This place voted July 26 against issuing $9,500 in 5% bonds for works.

MOUNT PLEASANT, MICH.—Congress has appropriated $10,000 for water-works, a sewerage system, etc., for the Indian school here. Supt., R. S. Graham.

PAW PAW, MICH.—Bids are asked until Aug. 17 for furnishing the material and for building the proposed works, to cost about $18,000, as stated in our advertising columns. Wm. H. Mason, Village Clk.

YALE, MICH.—Mac Walker, Fenton, Mich., has been awarded the contract for furnishing the material and for building the works, at $10,987.

GRAYVILLE, ILL.—The council is reported to have appropriated $32,000 for building a new reservoir for the water-works. It is stated that work will soon be begun.

OXFORD JUNCTION, IA.—Bids are reported as being asked by the city clerk for furnishing and constructing works.

BLAIR, WIS.—Stevens & Vincent, Chippewa Falls, Wis., are reported to have been awarded the contract for building the works at $4,154.

ARKANSAS CITY, KAN.—An election will be held Aug. 12 to vote on the question of issuing $95,000 in water bonds.

LA PLATA, MO.—Press reports state that this place will soon issue $40,000 in bonds for works.

CRIPPLE CREEK, COLO.—Press reports state that at a meeting of the council Aug. 3, the committee, consisting of N. M. Seigsred, A. E. Carlton and H. L. Shepherd, made its report and recommended the purchase of the works of the Michigan Pipe Line Co., for $292,000. The report was accepted.

DENVER, COLO.—John C. Swan, Greeley, Colo., has been awarded the contract for sinking an artesion well 1,000 ft. deep for the capitol grounds.

GRAND JUNCTION, COLO.—The council is reported to have repealed the ordinance passed in April to purchase the works of the Grand Junction Water Co. for $55,000. It is stated that the company failed to furnish title. W. P. Ela, Mayor.

BENICIA, CAL.—It is reported that the Benicia Water Co. will soon begin the construction of improvements to the works to cost about $15,000. Baker & Hamilton are interested.

GREENVILLE, CAL.—Bids are asked until Aug. 23 for furnishing and constructing works and a sewerage system for the Indian School here. Supt., Edward N. Ament.

HEALDSBURG, CAL.—Bids are asked until Aug. 26 for furnishing the material and for constructing the proposed works and light plant, and also for the purchase of $80,000 of 5% bonds for the work, as stated in our advertising columns. C. H. Pond, Cy. Clk.

LOS ANGELES, CAL.—The Consolidated City Water Co. has been incorporated with a capital stock of $2,480,000, by W. H. Perry, W. J. Broderick, S. H. Mott and H. W. Hellman.

SHERBROOKE, QUE.—The question of extending the water mains in certain streets is being considered.

PETERBORO, ONT.—Bids are asked until Aug. 15 for furnishing and building works for Ashburnham. Specifications, etc., may be seen at the office of the Peterboro Water Co. John Wood, Clk.

WINNIPEG, MAN.—Bids are asked until Sept. 6 for constructing wells and pumping station for the supply of 4,000,000 gallons of water daily, as stated in our advertising columns. H. N. Ruttan, Cy. Engr.; C. J. Brown, Cy. Clk.

SEWERAGE.

LAWRENCE, MASS.—It is probable work on sewers in certain streets will soon be begun at a cost of about $7,000.

NORTH SOMERVILLE, MASS.—Bids are asked until Sept. 3 for furnishing pumping engines, etc., for an addition to the sewage pumping plant at North Somerville, as stated in our advertising columns. Wm. M. Brown, Jr., Ch. Engr. Metropolitan Sewerage Comrs., 1 Mount Vernon St., Boston.

TAUNTON, MASS.—The council has voted to appropriate $16,000 for new sewers.

EAST HARTFORD, CONN.—The Meadow Fire District is again considering the question of building sewers in the business portion of the city.

WEST HARTFORD, CONN.—A. B. Alderson, 68 Gladden St., New Britain, Conn., is making surveys for the purpose of designing a system for West Hartford Centre.

DUNKIRK, N. Y.—Bids are asked until Aug. 16 for constructing a 12-in. pipe sewer in Fox St. W. C. Baumgartner, Cy. Clk.

LITTLE FALLS, N. Y.—The council has voted to build sewers in three streets, at a cost of about $20,000. Mayor Dasey may be addressed.

SYRACUSE, N. Y.—John W. Bustin has been awarded a contract at $50,000 for building a trunk sewer in Midland Ave.

BAYONNE, N. J.—Martin Murray has been awarded the contract for constructing a new sewer in certain streets at $17,200.

NEWARK, N. J.—The question of the sewering of the Clinton Hill annexed district of Newark was considered by the board of works Aug. 4. A delegation of property owners in the district appeared before the board and urged the building of lateral sewers. Engineer Ernest Adam submitted a report recommending the building of a trunk sewer in Clinton Ave. and another in Clinton Place and Runyon St., to cost about $59,000. Rudolph Hering, New York, made a report indorsing Engineer Adam's plans for a lateral sewer system in the Tenth and Twelfth Wards.

PLAINFIELD, N. J.—Bids are asked until Aug. 25 for filling two disposal beds at the sewage disposal farm. E. T. Barrows, Chn. Com.

RED BANK, N. J.—The council has been petitioned not to build an outlet sewer to the Shrewsbury River.

SOUTH ORANGE, N. J.—A conference was held in South Orange Aug. 3 between representatives of South Orange, Irvington, Vailsburg, Newark and West Orange in reference to the proposed sewer to carry the sewage of the different localities to tidewater. Reports state that it was decided to employ Alexander Potter, 137 Broadway, New York, to make a preliminary survey of the outlet sewer to tidewater and submit his estimate of the cost.

BELLEVUE, PA.—Harvey Sloan has been awarded the contract for building the proposed system at $58,000.——The council has asked for bids for the purchase of $48,000 of sewer bonds.

PHILADELPHIA, PA.—The bureau of surveys has decided to enlarge the 3-ft. brick sewer in Chestnut St.

PITTSTON, PA.—Bids are asked until Aug. 11 for constructing lateral sewers, etc. J. H. Mullin, Cy. Clk.

READING, PA.—The board of public works has recommended that the contract for building the house sewer in the 9th District be let to Samuel W. Frescoln, Reading, at $41,878. The next lowest bid was submitted by David Peoples, Philadelphia, at $43,375.

SOUTH BETHLEHEM, PA.—We are informed that this place voted July 26 not to build a system. Chas. E. Webster, Burgess.

POCOMOKE CITY, MD.—R. M. Stevenson, Mayor, writes us that Pownall & Minshall, 150 Nassau St., New York, have engaged to make a survey and plans for a system and water-works. Bonds for the improvements will soon be issued.

RICHMOND, VA.—The council is considering the question of building certain sewers. Councilman Allen, Chn.

CONCORD, N. C.—Bids are asked by the mayor until Aug. 15 for constructing 9,000 ft. of 15 to 8-in. pipe sewers.

OWENSBORO, KY.—Bids are asked until Aug. 15 for building sewers in certain streets. W. P. Small, Mayor.

CLEVELAND, O.—Bids are asked until Aug. 11 for constructing sewers in three streets; and until Aug. 25 for constructing sewers in three streets; checks $500 to $2,000. Geo. R. Warden, Dir. Pub. Wks.

SPRINGFIELD, O.—The council is considering the question of building sewers in several streets.

PERU, IND.—Bids are asked by the city clerk until Aug. 30 for constructing lateral sewers.

RICHMOND, IND.—The council is considering the question of building sewers next season to cost about $25,000. Mayor Ostrander may be addressed.

HIGHLAND PARK, MICH.—Jas. Hanley, Detroit, has been awarded the contract for building sewers at $51,850. The outlet will be into the Detroit system.

LAURIUM, MICH.—This place voted in July to issue $35,000 in bonds for a system, and $15,000 in bonds for extending the water works.

MOUNT PLEASANT, MICH.—Congress has appropriated $10,000 for a sewer, water-works, etc., for the Indian School. Supt., R. S. Graham.

PONTIAC, MICH.—Bids are asked until Aug. 19 for constructing 1,600 lin. ft. of 8-in. lateral sewer, as stated in our advertising columns. Wm. J. Fiske, Cy. Engr.

SAGINAW, MICH.—Bids are asked until Aug. 12 for building sewers in several streets. Alfred Davies, Clk. Bd.

BELLEVILLE, IL.—Bids are reported as having been asked by the city clerk for building pipe sewers in two streets.

CHICAGO, ILL.—Bids are asked until Aug. 17 for building sewers in a number of streets. L. E. McGann, Pres.

ELMHURST, ILL.—This place will build 640 ft. of 12-in. in Maple Ave.; average cut, 11 ft. There will be five manholes and four catchbasins with iron covers. Engr., Geo. I. Herrick, Wheaton, Ill.

MEADOTA, ILL.—Bids are asked until Aug. 16 for constructing 4,700 ft. of 12 to 10-in. pipe sewers, 11 manholes, etc. Engrs., Iowa Engineering Co., Clinton, Ia.; Geo. Holland, Cy. Clk.

MILWAUKEE, WIS.—The contract for the building of the outlet to the 30th St. tunnel was let Aug. 2 to G. E. Zimmerman at $24,994. His bid was $13.75 a foot for one section of 1,328 ft. and $16.75 a foot for a second section of 408 ft. The commissioners estimate that the work would cost $30,000. The other bidders were: August Muedling, John O. Jones of Racine, F. H. Nakielski, R. J. Hickey, E. Bowler, Crilley & Son and Charles Forrestal.

ST. PAUL, MINN.—Bids are asked until Aug. 15 for constructing a 15-in. pipe sewer in Waltham Ave. C. N. Bronson, Clk. Bd. Pub. Wks.

DES MOINES, IA.—Bids are asked until Aug. 15 for constructing a 15-in. pipe sewer in East 6th St. G. A. Eberhart, Com. Pub. Wks.

NEW HAMPTON, IA.—Bids are asked until Aug. 25 for building a sewer in this town, requiring about 445 ft. of 8-in. pipe; 660 ft. of 12-in. pipe; 2,820 ft. of 20-in. pipe; 17,000 brick in specials; 11 manhole heads; one 8-in. flusher (De La Hunt), and an outfall cistern. Engrs., Boynton & Warriner, Cedar Rapids, Ia.

GREENVILLE, CAL.—Bids are asked until Aug. 23 for constructing a system and water-works at the Indian School. Supt., E. N. Ament.

SANTA ANA, CAL.—Bids are asked by the board of city trustees until Aug. 22 for furnishing the material and for constructing the proposed system; to cost $65,000. Engr., H C Kellogg.

RAT PORTAGE, ONT.—C. W. Belyea, R. E. Dowsett and the mayor have been appointed a committtee to consider the advisability of building a system.

NELSON, B. C.—It is proposed to build about 3,000 ft. of 15 to 8-in. pipe sewers at a cost of about $4,500.

GARBAGE DISPOSAL—STREET CLEANING

MANCHESTER, N. H.—We are informed that the joint council committee on public health has called a public meeting for Aug. 12 to consider the matter of garbage crematories.

WILMINGTON, DEL.—Bids were asked until Aug. 9 for removing the ashes and rubbish for one year, from Sept. 1. H. J. Wiley, Secy. Bd. Dir. St. Dept.

FREDERICK, MD.—Bids were asked until Aug. 10 for removing the garbage, etc., from the streets, alleys, etc., for one year, from Sept. 1. E. A. Gittinger, Cy. Register.

OAKLAND, CAL.—Bids are asked until Aug. 22 for sweeping and cleaning the paved streets of this city. H. W. Thomas, Secy. Dept. Pub. Wks.

STREETS AND ROADS.

PORTLAND, ME.—Bids are asked until Aug. 15 for furnishing and constructing about 3,410 sq. yds. of granite paving, 2,010 lin. ft. of curb, and 42 cu. yds. of rubble. W. B. Allen, Chn. County Comrs.

TRURO, MASS.—Bids are asked until Aug. 18 for constructing about 6,000 ft. of highway. T. C. Mendenhall, Chn. Massachusetts Hignway Comn., Boston.

CROMWELL, CONN.—Bids are asked until Aug. 16 for grading and macadamizing a section of road between Cromwell Center and Berlin. C. S. Pease, First Selectman.

GUILFORD, CONN.—Bids are asked until Aug. 19 for grading and graveling a road between Guilford and Branford. W. E. Griswold, First Selectman.

NEW BRITAIN, CONN.—The aldermen have recommended a proposition to the council to lay six-inch macadam from Hartford Ave. to Lawlor St., to cost $2,864. G. C. Dunham, Cy. Engr.

SUFFIELD, CONN.—Bids are asked until Aug. 20 for grading and macadamizing a section of North St. Edmund Halladay, First Selectman.

WATERBURY, CONN.—Bids are asked until Aug. 16 for brick paving on North Main St., according to reports. R. A. Cairns, Cy. Engr.

NAUGATUCK, CONN.—Bids are asked until Aug. 23 for constructing about 1,900 lin. ft. of macadam road, as stated in our advertising columns. S. S. Beardsley, Borough Clk.

ALBANY, N. Y.—Bids are asked until Aug. 15 for grading, curbing and paving in Elm St., from Delaware Ave. to Grand St. Thos J. Lanahan, Clk. St. Dept.

NEW YORK, N. Y.—Bids are asked until Aug. 18 for furnishing 800 cu. yds. of trap rock screenings and 100 cu. yds. of broken stone. Geo. C. Clausen, Chn. Park Comrs., Arsenal, Central Park.

BUFFALO, N. Y.—Bids are asked until Aug. 18 for paving a portion of Babcock St. and Ferry St. R. G. Parsons, Secy. Bd. Pub. Wks.

FULTON, N. Y.—O. C. Breed, Cy. Engr., writes us that a contract for 800 sq. yds. of brick paving has been awarded to A. S. Webb, Syracuse.

ROCHESTER, N. Y.—Bids are asked until Aug. 19 for grading, to cost about $650 and cement walks; estimated cost, $1,836; also for a sewer to cost $3,000. Chas. M. Beattie, Clk.——The council is considering a proposition to pave portions of North Clinton St. with Medina block and asphalt, and has ordered a macadam pavement on Ave. B, at an estimated cost of $8,900.

ROCHESTER, N. Y.—Whitmore, Rauber & Vicinus have submitted the lowest bid for paving in Main St., with Hornellsville brick, at $56,173.

TROY, N. Y.—Bids are asked until Aug. 19 for granite paving and curbing on Broadway. E. Ogden Ross, Secy.

CAMDEN, N. J.—Bids are asked until Aug. 16 for paving in Vine and 10th Sts., with Belgian block, and for constructing certain sewers. Wm. Z. Gibson, Chn. Com.

MERCHANTVILLE, N. J.—The council has appropriated $1,000 for highways.

NEWARK, N. J.—The board of public works has awarded a contract to the Newark Asphalt Paving & Construction Co. for asphalt paving in Elm St., at $25,962; Livingston St., $11 250, and Charlton St., at $9,608; and to John F. Shanley, at $6,936, for granite paving in Pacific St.

NEW BRUNSWICK, N. J.—Bids are asked until Aug. 17 for graveling the South Amboy and South River Road. R. J. Dougherty, County Engr., 113 Albany St., informs us that a contract will be let in September for macadamizing on the South River Road; estimated cost, $2,000.

MEADVILLE, PA.—A contract has been awarded to Peter Schenck, Butler, for paving on Mead Ave. with brick. D. T. McKay, Jr., Cy. Clk.

SCRANTON, PA.—A contract has been awarded to Geo. MacDonald, at $15,000, for constructing brick paving on Providence Road and North Main Ave. J. P. Phillips, Cy. Engr.

PITTSBURG, PA.—Bids are asked until Aug. 27 for improving the Library Road. F. W. Patterson, County Road Engr.; E. N. Randolph, Clk.——Ordinances have been passed by the council for the grading and paving of portions of 26 streets. Chas. Geyer, Mayor.

PITTSBURG, PA.—Bids are asked until Aug. 16 for grading and paving Grant Boulevard, between 5th Ave. and Forbes St. E. M. Bigelow, Dir. Pub. Wks.

READING, PA.—Bids are asked until 3 p. m. Aug. 11 for grading Windsor St.; surety, $100. S. S. Hoff, Cy. Engr.

ROCKVILLE, MD.—Bids are asked until Aug. 16 for constructing about nine miles of macadam roads, according to reports. W. W. Welsh, County Clk.

ALEXANDRIA, VA.—Bids are asked until 12 m., Aug. 11, for 500 lin. ft. of curbing, grading and 1,060 sq. yds. of brick paving on King St. E. C. Dunn, Cy. Engr.; B. B. Smith, Chn. Com.

LOUISVILLE, KY.—Bids will soon be asked for constructing about $100,000 worth of asphalt pavement. Chas. F. Granger, Chn. Bd. Pub. Wks.

CHILLICOTHE, O.—Bids are asked until Aug. 13 for the purchase of $23,675 of street improvement bonds. W. J. Elyth, Cy. Clk.

HAMILTON, O.—Portions of North Second St., South Second St., South Third St. and Ross St., will soon be paved. J. J. M'Maken, Chn. Bd. Control; M. O. Burns, Cy. Clk.

DAYTON, O.—Bids are asked until Aug. 19 for paving the sidewalks on Pulaski St. with stone, cement or asphalt. J. L. Baker, Pres.; J. E. Gimperling, Comptroller.

OBERLIN, O.—Bids are asked until Aug. 16 for 2,000 sq. yds. of brick paving, according to reports. W. B. Gerrish, Cy. Engr.

PIQUA, O.—Bids are asked until Aug. 20 for furnishing the material and for curbing, guttering and constructing sidewalks. H. E. Whitlock, Cy. Engr.; Seth McCullough, Clk.

ORRVILLE, O.—Bids are asked until Aug. 30 for the purchase of $11,000 of 6% street improvement bonds. Ed. Wirth, Clk.

TOLEDO, O.—Bids are asked until Aug. 20 for furnishing material and constructing concrete walks in the court house park. Wm. M. Godfrey, County Audr.

TOLEDO, O.—Bids are asked until Sept. 12 for furnishing the material and for grading, curbing and paving portions of Knower and Rockingham Sts. L. P. Harris, Cy. Clk.

XENIA, O.—The county commissioners have awarded a contract to Harry Tavener, Clifton, for constructing about three miles of road at $1,600 a mile.

VERNON, IND.—Bids are asked until 10 a. m. Aug. 12 for constructing about 36 miles of pike road. Wm. A. Cheever, Chn. County Comrs.; Henry Hinchman, County Audr.

SOUTH BEND, IND.—Bids are asked until Aug. 22 for cement sidewalks on South Michigan St., grading on Diamond Ave. and Johnson St., and brick paving on Carroll St. L. A. Hull, Cy. Clk.——The council has recommended an issue of $110,000 of street bonds.

CHICAGO, ILL.—Bids are asked until Aug. 15 for grading North 48th Ave., between Lake St. and Chicago Ave. L. E. McGann, Comr. Pub. Wks.

URBANA, ILL.—Bids are asked by the board of local improvements until Aug. 17 for constructing about 5,300 sq. yds. of brick paving on concrete, and 3,300 lin. ft. of combination curb and gutter, as stated in our advertising columns.

MANITOWOC, WIS.—Reports state that bids are asked for the purchase of a steam roadroller.

WATERTOWN, WIS.—Henry C. Mayer, Chn. Com., informs us that bids will soon be asked for brick or macadam paving.

WAUKESHA, WIS.—Wm. Powrie informs us that the council has ordered brick paving in Madison St., Broadway, South St. and Clinton St.; estimated at 30,000 sq. yds. John Dye, Cy. Engr.; address H. E. Blair.

WAUWATOSA, WIS.—Bids are asked until Aug. 15 for furnishing material and grading, graveling, building sidewalks, etc., on Pabst Ave. Reinertsen & Vause, Engrs., 30 Builders' and Traders' Exchange.

ST. PAUL, MINN.—L. W. Rundlett, Cy. Engr., has submitted plans for paving Washington St., from Third to Seventh St., with asphalt; estimated cost, $11,250, according to reports.

DES MOINES, IA.—The council will improve East Ninth St. and eight other streets, at a cost of about $8,000.

KANSAS CITY, MO.—A contract will be let Aug. 15 for asphalt paving to cost about $60,000. John Donnelly, Cy. Engr.

ST. JOSEPH, MO.—Bids are asked until Aug. 16 for grading four sections of road. Theo. Steinacker, County Surv.

WEBSTER GROVES, MO.—Bids are asked by the board of aldermen for macadamizing certain streets.

DEADWOOD, S. DAK.—Bids are asked until 1 p. m., Aug. 13, for grading and 400 cu. yds. of filling. J. B. Welch, County Audr.

GRAND FORKS, N. DAK.—It is reported that the question of paving about four miles with cedar block is being considered; also macadamizing and brick paving. Alexander Oldham, Cy. Engr.; F. A. Brown, Cy. Audr.

HELENA, MONT.—Bids are asked until Aug. 15 for furnishing a road machine, for grading, etc. Edward Horsky, Cy. Clk.

FREMONT, NEB.—Bids are asked until Aug. 22 for furnishing the material and for brick paving, curbing, cement walks, etc. W. D. Thomas, Chn. Bd. Pub. Wks.

DALLAS, TEX.—Bids are asked until Aug. 16 for three blocks of brick paving. T. L. Lawhon, Cy. Secy.

DENVER, COLO.—Bids are asked until Aug. 16 for paving Logan Ave., from Eighth Ave. to Colfax. Donald W. Campbell, Ch. Engr. Bd. Pub. Wks.

DURHAM, ONT.—Granolithic sidewalks will be constructed in several streets, at a cost of $5,000, according to reports.

KEMPTVILLE, ONT.—Reports state that about 8,000 lin. ft. of granolithic sidewalks are to be constructed. S. H. Guest, Clk.

PETERBOROUGH, ONT.—Dolan & Sheehey, Belleville, have been awarded a contract for about 5,000 lin. ft. of sidewalk, according to reports. S. R. Armstrong, Clk.

WINDSOR, ONT.—Stephen Lusted, Cy. Clk., informs us that there has been no appropriation for asphalt paving, as stated in our issue of July 21.

NIAGARA FALLS, ONT.—We are informed that the town is about to construct 8,700 lin. ft. of 6, 8 and 10-ft. concrete and brick walks, with stone curbing and crossings. C. H. Mitchell, Cy. Engr.

MANUFACTURING PLANTS

BURNSIDE, CONN.—We are informed that plans have been completed for extensive alterations and additions to the two-machine paper mill of the Taylor Mfg. Co., at Burnside, and that the general contract has been awarded to Watson H. Bliss & Sons, of Hartford. Butts & Crosby, Archs. and Engrs., 49 Pearl St., Hartford, Conn.

ORANGE PARK, FLA.—J. F. Eldridge, Treas. Duval & Clay Sugar Co., of Orange Park, informs us that this company proposes to improve its property and build a mill on St. John's River, 10 miles south of Jacksonville. The capital stock is $300,000, of which about two-thirds is already subscribed. Mr. Eldridge desires to communicate with manufacturers of sugar mill machinery.

OTTUMWA, IA.—The Janny Mfg. Co., Ottumwa, informs us that bids will be received from Aug. 15 to 20 for the erection of three 2-story and seven 1-story buildings, each 50 × 150 ft., to be used in the manufacture of farm implements. A 100-HP. Corliss engine and a boiler will be needed, also electric power to run the entire plant. Arch., D. C. Mitchell, Ottumwa.

GAS PLANTS.

SPARTANBURG, S. C.—The Spartanburg Gas, Electric Light & St. R. R. Co., recently incorporated, will build a new 50,000-ft. gas holder, extend the mains, etc., of the old plant, as noted under Electric Light and Power. Vice-Pres., Eliot Norton, 100 Broadway, New York.

COVINGTON, KY.—Bids are asked until Aug. 17 for lighting a certain portion of the city with gas, gasoline or electricity. Theo. Von Hoene, Cy.. Clk.

SAN JOSE, CAL.—Bids are asked by the Electrical Improvement Co., 45 West Santa Clara St., until Aug. 30 for excavating and laying gas mains.

MISCELLANEOUS CONTRACTS.

BONDS.—Tiffin, O.—Bids are asked until Aug. 20 for the purchase of $25,000 of 6% bonds. J. B. Ehrenfried, Clk.

WHARF.—Fort Morgan, Ala.—Bids are asked until Aug. 23 for constructing a wharf. Address John Simpson, Depot Q. M., Atlanta, Ga.

RETAINING WALL.—Troy, N. Y.—Bids are asked until 11 a. m. Aug. 12 for building 25 lin. ft. of retaining wall. E. Ogden Ross, Secy.

STEEL HULL.—Seattle, Wash.—Bids are asked until Sept. 5 for constructing a steel hull tugboat. Capt. Harry Taylor, U. S. Engr., Burke Bldg.

SMOKELESS POWDER.—Washington, D. C.—Bids are asked until Sept. 3 for furnishing 1,000,000 lbs. of smokeless powder. John D. Long, Secy. Navy.

BONDS.—Newark, N. J.—Bids are asked until Aug. 15 for the purchase of $500,000 of 4% county park bonds. D. H. Johnson, Chn. Finance Com., Bd. Freeholders.

BOILERS.—National Home, Wis.—Bids are asked until Aug. 19 for furnishing the Home with two steam boilers of the horizontal sectional water-tube type. J. E. Armitage, Treas.

LEVEE WORK.—Dayton, O.—Bids are asked until Aug. 19 for widening and strengthening sections A and C of Mad River levee. J. L. Baker, Pres.; J. E. Gimperling, Comptroller.

FIRE ALARM SYSTEM.—Mobile, Ala.—Bids are asked until Sept. 15 for a complete fire alarm system, as stated in our advertising coumns. Cary W. Butt, Chn. Com.

STEEL PROJECTILES.—Washington, D. C.—Bids are asked by the navy department until Aug. 23 for furnishing 100,000 six-pound, 100,000 three-pound, and 100,000 one-pound steel projectiles.

DREDGING.—Boston, Mass.—Bids were received Aug. 4 from the Eastern Dredging Co., at $2,245, and the Bay State Dredging Co., at $2,500, for dredging the Fort Point Channel. Wm. Jackson, Cy. Engr.

LEVEE WORK.—Tallulah, La.—Bids are asked until Aug. 15 for raising and enlarging the East Carroll and Madison Parish levees. J. T. McClellan, Pres.; A. T. Lane, Secy. Bd. Comrs., Fifth Louisiana Dist., Tallulah.

CYLINDER PLATES.—Plum Beach Light House, R. I. —Bids are asked until Aug. 16 for furnishing seventh-course cylinder plates, for the Plum Beach light house. Lt.-Col. D. P. Heap, U. S. Engr., Tompkinsville (S. I.).

NAVAL SUPPLIES.—Philadelphia, Pa.—Bids are asked by the navy department, Washington, D. C., until Aug. 23 for furnishing planing machines, lathes, cranes, boilers, engines, machinery, etc., for the League Island navy yard at Philadelphia.

RUBBER SUCTIONS.—Charleston, S. C.—Bids are asked until Sept. 9 for furnishing rubber suctions for the dredges "Charleston" and "Winwah Bay," as stated in our advertising columns. Maj. E. H. Ruffner, U. S. Engr., Charleston.

COAL HANDLING PLANT.—New London, Conn.—Bids are asked by the navy department, Washington, D. C., until Aug. 31 for constructing a plant for the storage and handling of coal. M. T. Endicott, Chief Bureau Yards and Docks, Washington.

DAM ABUTMENTS, ETC.—Brantford, Ont.—Bids are asked until Aug. 20 for constructing stone and concrete piers and abutments, a timber sluiceway dam, excavation, embankments and rip-rap walls. Chas. Whitney, Chn. Bd. Wks.; T. H. Jones. Cy. Engr.

DIKES.—Hudson River, N. Y.—Bids are asked until Sept. 8 for constructing and repairing dikes in the Hudson River, and for furnishing paving and rubble stone, as stated in our advertising columns. Col. J. W. Barlow, U. S. Engr., Army Bldg., New York.

CONSTRUCTION MATERIALS.—Fort Delaware, Del.—Bids are asked until Sept. 5 for furnishing and delivering, at Fort Delaware, cement, broken stone, sand, steel beams, etc., as described in our advertising columns. Lt.-Col. C. W. Raymond, U. S. Engr., Philadelphia, Pa.

MASONRY, SHORE PROTECTION, ETC.—Cleveland, O.—Bids are asked until Aug. 17 for furnishing the material and for constructing a riprap protection at Gordon Park; stone masonry work in Rockefeller Park, and a shore protection at Edgewater Park. C. W. Pratt, Jr., Ch. Engr. Bd. Park Comrs., Hickox Bldg., 185 Euclid Ave.

METAL WORK.—New Haven, Conn.—The following bids were received Aug. 1 for furnishing and constructing the metal work for the New Haven Harbor breakwater light house. Lt.-Col. D. P. Heap, U. S. Engr., Tompkinsville (S. I.), N. Y.:

Russel Wheel & Foundry Co., Detroit, Mich.	$17,330
Allentown Rolling Mills, Allentown, Pa.	17,962
Atlanta Machine Works, Atlanta, Ga.	18,485
John P. McGuire, Cleveland, O.	18,500
Wiemer Machine Works, Lebanon, Pa.	21,000
Tacony Iron & Metal Co., Philadelphia, Pa.	23,874
M. L. Vander Kloot, 1 Madison Ave., New York.	39,586

CONTRACT PRICES

ASPHALT PAVING.—Spokane, Wash.—The city commissioners received the following bids July 14, 1898, for 21,000 sq. yds. of asphalt paving in Riverside Ave.:

	City St. Imp. Co.	N. W. Asphalt Co.	Alcatraz Co.	Fife & Conlan.

PARK LIGHTING.—Washington, D. C.—The Potomac Electric Lighting Co. has been awarded the contract for lighting Lafayette, Franklin, Judiciary and Lincoln Parks at 24 cts. a light a night. Bids recently opened for electric lighting of the grounds south of the Executive Mansion, the grounds of the Executive Mansion, and the Washington Monument grounds, were as follows: U. S. Electric Light Co., 19 cts. a light a night for grounds south of the Executive Mansion, 24 cts. for the Executive Mansion and Monument grounds. The bids of the Potomac Electric Power Co. were 20 cts. and 25 cts., respectively.

DREDGING.—Washington, D. C—The following bids were received by the bureau of yards and docks July 16, 1898, for dredging and for building a quay dock at Dry Dock No. 1: Dredging —Morris & Cumings Dredging Co., New York, 23½ cts. a cu. yd.; R. G. & J. S. Packard, 130 Pearl St., New York, 18 cts. a cu. yd.; Theron L. Smith, Smithtown, N. Y., 29½ cts.; The International Constructing Co., Syracuse, N. Y., 24¾ cts. Quay wall, coal dock—Stacy B. Opdyke, Jr., 1232 Belmont Ave., Philadelphia, $99.50 a lin. ft.; P. Sanford Ross, Jersey City, $116.10; Samuel W. Frescoln, Reading, Pa., $119; J. & F. Kelly, 62 Beard St., Brooklyn, $103.73; Frank W. McNeal, 80 Reade St., New York, $132; The Houston Construction Co., Broad and Chestnut Sts., Philadelphia, $134; Quay wall between Dry Dock No. 1 and Main St.—P. Sanford Ross, Jersey City, $105.33; J. & F. Kelly, Brooklyn, $94.67; Houston Constructing Co., Philadelphia, $126; Frank W. McNeal, New York, $127; Stacy B. Opdyke, Jr., Philadelphia, $98.

PAVING.—Sioux City, Ia.—The following bids were received July 13, 1898, for asphalt and brick paving in certain streets: Sixth St.—Barber Asphalt Paving Co., $2.24 a sq. yd.; E. J. Hanlon, $2.36 a sq. yd. Water and Fifth Sts., three blocks—J. W. Smith, sand filler, $1.69; Portland cement, $1.77; paving cement, $1.75; Murphy grouting, $1.79. E. J. Hanlon, sand, $1.71; Portland, $1.76; paving, $1.95; Murphy, $2. M. L. Flinn, sand, $1.80; Portland, $1.84; paving, $1.93; Murphy, $2. Smith, Moss & Brown, Chicago, sand, $1.82; Portland, $1.85; paving, $1.94; Murphy, $2. Hansen Bros., sand, $1.86; Portland, $1.91½; paving, $1.96; Murphy, $2. Third St., brick—Hansen Bros., sand, $1.70¾; Portland, $1.87¾; paving, $1.72¾; Murphy, $1.97¾. E. J. Hanlon, sand, $1.71; Portland, $1.76; paving, $1.85; Murphy, $2. M. L. Flinn, sand, $1.80; Portland, $1.84; paving, $1.93; Murphy, $2. Smith, Moss & Brown, sand, $1.82; Portland, $1.85; paving, $1.94; Murphy, $2. Certain alleys—J. W. Smith, $1.44½; E. J. Hanlon, $158; Hansen Bros., $1.64; M. L. Flinn, $1.67; Smith, Moss & Brown, $1.69. Each bidder made propositions for resetting old curb and laying new curbs on the streets on which he bid. Stephen Coleman offered to lay new curbing at 60 cts. a lin. ft. and to reset Third St. and Sixth St. curbing at 8 cts. a ft. and Water St. and Fifth St. curbing at 8½ cts. a ft.

WATER PIPE, ETC.—Renovo, Pa.—The following contracts have been let for furnishing 8-in. cast-iron water pipe, hydrants, etc., as advertised in Engineering News; Secy. Comrs., Wm. J. Straley: Pipe—R. D. Wood & Co., Philadelphia, Pa., $18.90 a ton; hydrants, etc.—J. O. Frost's Sons Mfg. Co., Towanda, Pa., 20 double nozzle fire hydrants, $20 each; 3 fire hydrants, with crane attachment for supplying water for sprinkling carts, $30 each; 7 8-in. gates, $14.50; 3 6-in. gates, $9.25; 3 air valves, $5; 3 valve boxes at $2. Laying pipe—James Carr, Bedford, Pa., 14½ cts. a lin. ft. Other bids for laying pipe, digging trench, back filling, setting of valves, valve boxes, gates, fire hydrants, and air valves, were as follows: J. H. Mussina, 16 cts. a ft.; D. M. May, 18 cts. a ft.; M. Fitzgerald, 17 cts. a fe.; Thos. Delaney, 18 cts.; E. H. Post, 21 cts.; H. Malone, 17 cts.; E. F. Kitzer, 18½ cts. The other bids for furnishing 8-in. pipe were as follows: Warren Foundry & Machine Co., $19.40 a ton; Chas. Millar & Son, $20.27; National Foundry & Pipe Works, $19.39; Buffalo Cast-Iron Pipe Co., $19.90; Chattanooga Foundry & Pipe Co., $18.93; R. D. Wood & Co., $18.90; Jackson & Woodin Mfg. Co., $19.25; Donaldson Iron Co., $18.94; E. K. Post, $19.54.

SUPPLIES.—Washington, D. C.—The following contracts for furnishing terra cotta sewer pipe for the fiscal year 1899 have been awarded: 6-in., 1,000 ft., 5 cts., Angus Lamond; 2,000 ft., 4¾ cts., Thomas Somerville & Sons.; 1,000 ft., 5 cts., Potomac Terra Cotta Co. 10-in., 10,000 ft., 11 cts., Potomac Terra Cotta Co. 12-in., 13,000 ft., Potomac Terra Cotta Co. 15-in., 4,600 ft., 19 cts., Thos. Somerville & Sons; 2,400 ft., 20 cts., Potomac Terra Cotta Co. 18-in., 2,000 ft., 27 cts., Thos. Somerville & Sons; 2,000 ft., 28 cts., Potomac Terra Cotta Co. 24-in., 3,000 ft., 53 cts., Thomas Somerville & Sons; 2,000 ft., 55 cts., Potomac Terra Cotta Co. The following bids were opened by the district commissioners July 23. Laying cement sidewalks: Crawford Paving Co., $1.04 a sq. yd., class A, $1.32 class B; F. M. Kemp & Sons, 98 cts. a yd., class A, $1.18 class B; Colburn Bros., 95½ cts. a yd., class A, $1.18¾ class B. Lamp posts: C. Rittenhouse, $8.75 each; M. J. Drummond & Co., $5.40; Midvale Foundry Co., Allentown, Pa., $4.46; Stewart R. Carr & Co., $4.90; James J. Lacey & Co., $5.92; Bethlehem Foundry & Machine Co., $5.19.

BRICK PAVING.—Champaign, Ill.—Ralph P. Brower, Cy. Engr., writes us that the following bids were received July 14 for certain brick paving, as advertised in Engineering News; contract was awarded to G. Maffioli for Veedersburg (Ind.) and Galesburg (Ill.) brick, and gravel concrete; the board reserving the right to substitute broken stone concrete at any time:

WATER PIPE.—Montgomery, Ala.—It is reported that Guild & Co., Chattanooga, Tenn., were awarded the following contract, July 16, for furnishing about 10 miles of cast-iron water pipe, as advertised in Engineering News: 8-in. pipe, 10,320 ft., 50½ cts. a ft.; 6-in. pipe, 35,840 ft., 39⅔ cts. a ft.; and 4-in. pipe, 28 cts. a ft. R. H. Somerville, Cy. Treas.; Engr., Nesbit Wingfield, Atlanta, Ga.

Bids Received at Champaign, Ill., July 14, 1898, for Brick Paving.

DREDGING.—Lorain, O.—G. A. Resek, Cy. Clk., informs us that the following bids were received Aug. 2, 1898, for dredging, as advertised in Engineering News:

Bidder.	Dredging, a cu. yd. Mud.	Dredging, a cu. yd. Shale.	Logging, per hr.
John Stang, Lorain, O.	$0.07½	$0.35	$10.00
Breymann Bros., Toledo, O.	.10	.30	.....
L. P. & J. A. Smith, Cleveland.	.10	.50	10.00
Carkin, Stickney & Cram, Detroit	.13	.42	10.00

MACADAM ROAD.—Plymouth, Mass.—A. B. Fletcher, Secy. Massachusetts State Highway Comn., informs us that the following contract was let Aug. 4, 1898, to Edward D. Bell, Roxbury, Mass., for building a macadam road in Plymouth: Excavation, 750 cu. yds., at 25 cts. a cu. yd.; gravel, 500 cu. yds. at 40 cts.; shaping, 11,666 cu. yds., 2¼ cts.; broken stone in place, 2,800 tons, $1.29 a ton; finishing between limits—labor, 20 cts. an hour; double teams, 55 cts., and single teams, 30 cts.; cobblestone gutters, 100 sq. yds., 77 cts.; total, $4,339.

COMBINED GUTTER AND CURB.—Minneapolis, Minn. —The council received the following bids July 29, 1898, for furnishing an artificial combined curb and gutter, 10 ins., as may be required during this season: Stillwater Stone Sidewalk Co., 41 cts. per lin. ft.; Portland Stone Co., 34½ cts.; Standard Stone Sidewalk Co., 36½ cts.; Flour City Paving Co., 45 cts.; Star Paving Co., 39 cts., all to be made of coarse sand and cement.

PIER.—Napatree Point, Conn.—Capt. Thos. A. Scott, New London, Conn., was awarded the following contract Aug. 3, 1898, for building a pier at Napatree Point for U. S. government: Timber, $34 a 1,000 ft., B. M., in place; $35 for lumber in place, $45 for piling in place; 4 cts. a lb. for miscellaneous iron; 5 cts. a lb. for c.-i. cleats. The pier will be 400 ft. in length, about 300 ft. trestle work over shallow water, and the last 100 ft. heavier work.

SEWERAGE SYSTEM.—Flemington, N. J.—We are informed that the following bids were received July 30 for constructing a sewerage system, sewage disposal beds, etc., as advertised in Engineering News; A. Costa was awarded contract; W. H. Chapman, Engr.-in-Charge:

ASPHALT PAVING.—Baltimore, Md.—The following bids were received by L. F. Lewis, Cy. Comr., July 19, for furnishing the material and for asphalt paving in Fulton Ave., from Presstman St. to Pennsylvania Ave.; contract awarded Southern Asphalt Paving Co.:

Bids Received at Baltimore, Md., July 19, 1898, for Asphalt Paving.

Quantities.		Southern Asphalt Pvg. Co.*	J. S. Filbert, Baltimore.	Barber Asp. Pvg. Co., N. Y.	Robertson & Anderson.
Block asphalt paving, including all necessary grading, a 6-in. concrete base, 2 ins. of sand and paving blocks	12,900 sq. yds.	.....	.....	.....	$2.48

INDUSTRIAL NOTES.

CHAS. F. BURNS & CO., 44 North Water St., Rochester, N. Y., electrical engineers and manufacturers of electrical supplies, have dissolved partnership by mutual consent.

MR. L. WILSON, 53 Dearborn St., Chicago, is sinking an artesion well for the Illinois Central R. R. at Gilman, Ill. It has reached a depth of 500 ft., and will be carried down to about 1,800 or 2,000 ft.

THE BERLIN IRON BRIDGE CO., East Berlin, Conn., has a contract to furnish and erect fireproof buildings, consisting of a steel framework covered with corrugated iron, for the refining plant of the Guggenheim Smelting Co., Perth Amboy, N. J.

THE WESTINGHOUSE MACHINE CO. and the Westinghouse Electric & Mfg. Co., Pittsburg, invited a number of prominent engineers to visit their works at East Pittsburg, July 30, to inspect some new engines to be shipped to England, and also to view their extensive workshops.

THE P. H. & F. M. ROOTS CO., Connersville, Ind., announce that its rotary force pump has been endorsed by the New England Factory Mutual Fire Insurance Association. The record made by this pump for durability and good work is, the company claims, fast dispelling the prejudice against the rotary form of pump.

THE WESTINGHOUSE MACHINE CO., Pittsburg, reports that it has through its New York office the initial order from Cuba since the beginning of hostilities with this country, it being for a 100-HP. Westinghouse engine and dynamo, together with boiler, boiler pump, piping, etc., for a complete steam plant to be installed in Santiago.

THE CONTINENTAL FILTER CO., 44 Wall St., New York, has issued a circular letter stating that it is now prepared to build gravity filters, with sedimentation tanks; also that it proposes to use a coagulant produced "from a certain use of the metal of aluminum." It also states that it has secured as General Manager, Mr. Wm. Deutsch, formerly Manager of the New York Filter Co.

THE E. P. ALLIS CO., Milwaukee, Wis., has a contract from the Franklin Mining Co., Houghton, Mich., for the machinery of its new mill, including a 15,000,000-gallon steam pump and five large stamp mills, with stamps 20 × 24 ins., resting on solid foundations weighing 72 tons each, according to report. The mill will also contain a 1,000-HP. surface condenser.

THE SPRINGFIELD BOILER & MFG. CO., Springfield, Ill., is reported to have a contract from the U. S. Government for a dredging boat, 192 ft. long and 70 ft. wide, to be used on the Mississippi River. It will be equipped with powerful machinery, having side wheels like a steamboat, making it, it is said, the only self-propelling suction dredge in existence and will cost about $100,000 complete.

THE BELLEFONTAINE BRIDGE & IRON CO., Bellefontaine, O., advises us that it is quite busy at present and has the following contracts, among others, on hand: Signal tower at the crossing of the Detroit & Lima Northern Ry. and the Cleveland, Cincinnati, Chicago & St. Louis Ry., Bellefontaine, O.; high truss bridge, 170 × 16 ft., with one 6-ft. sidewalk, Paulding, O.; high truss bridge, 206 × 18 ft., Vermillion county, Ind.; structural iron for school building, Waterbury, Vt.; 150 × 16-ft. bridge, Henry county, Ill.; high truss bridge, 100 × 18 ft., Johnson county, Ind.; high truss bridge, 125 × 16 ft., Miami county, Ohio; structural iron for 3-story business block, Tiffin, Ohio; high truss bridge, 150 × 14 ft., on tubular piers, Sullivan county, Ind., and also contracts for 90 other bridges and buildings throughout the Central states.

THE HAYS CONSTRUCTION CO., Troy, O., has closed contracts with the Commissioners of Miami County, Ohio, for masonry work of nine bridges to replace bridges washed out by high water. The company has also closed contracts with the Cleveland, Cincinnati, Chicago & St. Louis Ry. Co. for the erection of masonry work approximating 1,000 yds., for two bridges west of Troy, O., on the line of the Peoria & Eastern Ry.

THE FUEL ECONOMIZER CO., Matteawan, N. Y., is busy at present and reports its business prospects as most encouraging. Among recent sales are the following: Milwaukee Electric R. R., Milwaukee, Wis., 2,000 HP.; Worcester Bleach & Dye Works, Worcester, Mass., 350 HP.; Merchants' Cotton Co., St. Henri, Que., 600 HP.; Excelsior Mills, 300 HP.; Lehigh Valley Coal Co., Wilkesbarre, Pa., 2,000 HP. (two orders); Western Cold Storage Co., Chicago, Ill., 300 HP.; Cheney Bros., South Manchester, Conn., 2,000 HP.; Blackstone Mills, Blackstone, Mass., 500 HP.; La Belle Mill Water & Power Co., Goldfield, Colo., 1,000 HP.; Dominion Cotton Mills Co., Magog, Que., 1,000 HP. (twelfth order); Frick Co., Waynesboro, Pa., 150 HP.; D. M. Bare & Co., Roaring Springs, Pa., 600 HP., and Rome Brass & Copper Co., Rome, N. Y., 350 HP.

THE MICHIGAN BRASS & IRON WORKS, Detroit, Mich., informs us that it has never been busier than now, every department being crowded to its fullest capacity, with more men on the pay rolls than ever before. Contracts lately taken include the following: One hundred 5-in. Michigan compression fire hydrants for the city of Detroit, this lot being in addition to those noted some time ago; 100 of the same type of hydrant for the village of Delray, a suburb of Detroit; 10-in., 12-in. and 20-in. St. Louis pattern gate valves, for the city of St. Louis; over a carload of 10-in. to 26-in. valves inclusive, for the city of Spokane, Wash.; a carload of hydrants for the city of Grand Rapids, Mich.; valves and hydrants for the cities of Jackson and Saginaw, Mich.; hydrants for the city of Allegheny, Pa.; 30-in. sluice gates for the Great Plains (Colo.) Water Storage Co., etc.

PERSONAL.

Mr. George V. Lorings has been appointed City Engineer of Decatur, Ill., to succeed Mr. Dickerson, resigned.

Mr. E. Anderson has been appointed City Electrician and Chief Engineer of the water and electric light plants of Grand Forks, B. C.

Mr. Charles O. Scull, of Baltimore, Md., has been elected President of the Erie & Central New York Ry., to succeed Mr. Stewart Browne, of New York, resigned.

Mr. Luther E. Gregory, Civil Engineer, United States Navy, has been detached from the New York Navy Yard and ordered to the navy yard at Portsmouth, N. H.

Mr. Ferdinand W. Peck, Commissioner-General to the Paris Exposition, whose appointment was reported in our issue of July 28, has announced the following appointments to his staff, with the statement that no further ones will be made until his return from Paris: Director of Affairs, Mr. Paul Blackmar; Director of Mining and Mineralogy, Mr. F. J. V. Skiff; Temporary Director of Press Bureau, Mr. Robert J. Thompson; Private Secretary, Mr. J. H. McGibbons, and Secretaire Francaise, Count de Valcourt Vermont. The headquarters of the commission are in the Auditorium Bldg., Chicago.

Mr. John A. Ockerson, M. Am. Soc. C. E., Principal Assistant Engineer to the Mississippi River Commission, with headquarters in St. Louis, Mo., has been appointed by President McKinley, as a member of the above commission, to succeed Mr. Henry Flad, M. Am. Soc. C. E., whose death was announced in our issue of June 23. The position which is for life carries with it a salary of $3,500 a year. Mr. Ockerson is a graduate of the University of Illinois, Urbana and Champlain, Ill., and has been engaged on engineering work on the Mississippi River for the past 22 years, of which 17 years have been spent on the commission's engineer corps. He is also a member of the St. Louis Engineers' Club and the National Geographical Society, and is the author of "The Mississippi River from St. Louis to the Sea," and a number of important papers relating to various phases of the Mississippi River improvement work.

OBITUARY.

Mr. William Gardner, engineer for gas plants and manufacturer of fire clay materials for gas works, formerly of Pittsburg, Pa., died at his home in Colorado Springs, Colo., Aug. 5. He built the first gas works in Portland, Ore., and was one of the original members of the American Gaslight Association. In 1889, as Consulting Engineer, he reconstructed the gas works at Johnstown, Pa., and in 1893 erected the gas works in Altoona, Pa., which was his last important work.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

AMERICAN MATHEMATICAL SOCIETY.
Aug. 19-20. Annual meeting, Boston, Mass. Secy., F. N. Cole, Columbus University, New York city.

AMERICAN CHEMICAL SOCIETY.
Aug. 22-23. Annual meeting, Boston, Mass. Secy., Albert C. Hale, 551 Putnam Ave., Brooklyn, N. Y.

AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.
Aug. 22-27. Annual meeting, Boston, Mass. Secy., F. W. Putnam, Salem, Mass.

GEOLOGICAL SOCIETY OF AMERICA.
Aug. 23. Annual meeting, Boston, Mass. Secy., H. L. Fairchilds, Rochester, N. Y.

AMERICAN FORESTRY ASSOCIATION.
Aug. 23-24. Annual meeting, Boston, Mass. Pres., Francis H. Appleton, 101 Tremont St., Boston, Mass.

NATIONAL IRRIGATION CONGRESS.
Sept. 1-3. Annual convention, Cheyenne, Wyo. Secy., J. C. Harpham.

TECHNICAL SOCIETY OF THE PACIFIC COAST.
Sept. 2. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.

GERMAN-AMERICAN TECHNICAL SOCIETY.
Sept. 3-7. Annual meeting, Philadelphia Section, Reading, Pa. Secy., A. Schumann, 532 North 4th St., Philadelphia, Pa.

ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Sept. 5. Secy., H. J. March, Library Bldg., Buffalo, N. Y.

AMERICAN STREET RAILWAY ASSOCIATION.
Sept. 6-9. Annual convention, Boston, Mass. Secy., T. C. Pennington, 2020 State St., Chicago, Ill.

AMERICAN SOCIETY OF CIVIL ENGINEERS.
Sept. 7. Secy., C. W. Hunt, 220 W. 57th St., New York city.

CENTRAL RAILWAY CLUB.
Sept. 9. Secy., H. D. Vought, 114 5th Ave., New York city.

MONTANA SOCIETY OF ENGINEERS.
Sept. 10. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.

THE LOUISIANA ENGINEERING SOCIETY.
Sept. 12. Secy., J. F. Coleman, 712 Union St. New Orleans, La.

ASSOCIATION OF EDISON ILLUMINATING COMPANIES.
Sept. 12-13. Annual meeting, Sault Ste. Marie, Mich. Secy., Wilson S. Howell, Newark, N. J.

NORTHWEST RAILWAY CLUB.
Sept. 13. Secy., T. A. Foque, Soo Line, Minneapolis, Minn.

CIVIL ENGINEERS' CLUB OF CLEVELAND.
Sept. 13. Secy., Wm. H. Searles, Case Library Bldg., Cleveland, O.

ROADMASTERS' ASSOCIATION OF AMERICA.
Sept. 13. Annual meeting, Denver, Colo. Secy., J. B. Dickson, Sterling, Ill.

NEW YORK STATE STREET RAILWAY ASSOCIATION.
Sept. 13-14. Annual meeting, Brooklyn, N. Y. Secy., H. A. Robinson, New York city.

DENVER SOCIETY OF CIVIL ENGINEERS.
Sept. 13. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Colo.

THE RAILWAY SIGNALING CLUB.
Sept. 13. Secy., Earl M. Seitz, C. & N. W. Ry., Chicago, Ill.

ROADMASTERS' ASSOCIATION OF AMERICA.
Sept. 13. Annual meeting, Denver, Colo. Secy., J. B. Dickson, Sterling, Ill.

ENGINEERS' CLUB OF CINCINNATI.
Sept. 15. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.

BROOKLYN ENGINEERS' CLUB.
Sept. 15. Secy., A. J. Prevost, Jr., 191 Montague St., Brooklyn, N. Y.

NORTHWESTERN TRACK AND BRIDGE ASSOCIATION.
Sept. 16. D. W. Meeker, St. Paul, Minn.

ENGINEERS' CLUB OF MINNEAPOLIS
Sept. 19. Secy., H. E. Smith, 1620 S. E. 4th St., Minneapolis, Minn.

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.
Sept. 20. Secy., R. A. Fessenden, 410 Penn Ave., Pittsburg, Pa.

BOSTON SOCIETY OF CIVIL ENGINEERS.
Sept. 21. Secy., S. E Tinkham, City Hall, Boston, Mass.

WESTERN FOUNDRYMEN'S ASSOCIATION.
Sept. 21. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.

CENTRAL STATES WATER-WORKS ASSOCIATION.
Sept. 27-29. Annual meeting, Springfield, O. Secy., John Fisher, 11 Riley St., Hamilton, O.

AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENT
Oct. 12. Annual meeting, Washington D. C. Secy., D. L. Fulton, Bureau of Highways and Sewers, Allegheny, Pa.

AMERICAN INSTITUTE OF MINING ENGINEERS
Oct. 18. Annual meeting, Buffalo, N. Y. Secy., R. W. Raymond, P. O. Box 223, New York city.

PACIFIC COAST GAS ASSOCIATION.—The 6th annual convention of this association was held at San Francisco, Cal., on Aug. 19-20. The following officers were elected for the ensuing year: Pres., Chas. F. Adams, Portland, Ore.; Vice-Pres., J. Clements, Red Bluff, Cal.; Secy. and Treas., John A. Britton, Oakland, Cal.

THE INTERNATIONAL MINING CONGRESS.—At the recent meeting of this organization, held at Salt Lake City, Utah, July 6-9, the following resolutions were adopted:

We do unanimously petition the Congress of the United States to create a new department of mines and mining, whose purpose shall be to aid, develop and foster the mining industry of the United States by every influence within its reach.

That the president of this association is hereby directed to appoint such committees and take such action as shall bring this measure to the attention of every member of Congress, and to stand firm in its support, without compromise of any nature, until favorable action has been secured.

AMERICAN STREET RAILWAY ASSOCIATION.—The entertainment program of the meeting to be held in Boston, Sept. 6-9, includes a trip to Concord and Lexington on Tuesday afternoon, and a reception in the evening. Wednesday afternoon, excursion will be taken down the harbor, and there will be a clambake at Nantucket Beach. Thursday afternoon is scheduled for a trip to Plymouth; in the evening the usual banquet will be held; Friday evening will be given up to a trolley excursion to Norumbega Park. The indications are that the exhibition part will be particularly successful, and already 24,750 ft. has been assigned to leading street railway supply firms and manufacturers.

INTERNATIONAL ASSOCIATION FOR THE TESTING OF MATERIALS—American Section.—The first annual meeting of the American Section will be held Aug. 27 at the Engineers' Club, 1122 Girard St., Philadelphia, Pa. The program includes an afternoon session for general business and an evening session, at which the following subjects will be discussed:

"The relation of the International Association to producers and consumers," to be opened by Dr. Charles B. Dudley and Mr. William R. Webster; "In what manner will the adoption of standard specifications improve industrial methods and processes," to be opened by Prof. Rolla C. Carpenter and Mr. Gus C. Henning.

The officers of the American Section are: Chairman, Prof. Mansfield Merriman; Vice-Chairman, Prof. Henry M. Howe; Secy., Richard L. Humphrey; Treas., Paul Kreuzpointner; Members of the International Advisory Council, Dr. R. G. G. Moldenke and Prof. Henry M. Howe.

The Association's official organ is "Baumateiralienkude," and the subscription price to members is $2.50; others, $3.50; obtained from the secretary, Mr. Richard L. Humphrey, Testing Laboratory, City Hall, Philadelphia, Pa.

OHIO ELECTRIC LIGHT ASSOCIATION.—The 4th annual meeting of this association is scheduled to be held at Sandusky, O., Aug. 18-19. The following is the list of papers to be presented:

"Positive and Negative Economies in Small Central Stations," E. P. Roberts; "Some Suggestions Relative to Determining the Cost of Electrical Supply," M. E. Turner; "The Meter's Relation to the Dividend," Caryl D. Haskins; "Comparative Commercial Qualities of Old and Modern Transformers as Applied to an Exchange," J. H. Perkins; "Long-distance Transmission of Power," E. J. Berg.

In addition, the following topics will be discussed:

"What are the advantages and disadvantages of enclosed arc lamps for outside lighting?" "Can the candle power of arc lamps be accurately determined by the use of a portable photometer?" "In what way can competition of the gasoline incandescent burner be most successfully met?" "Is it advisable for a plant to change from 15,000 volts alternating single-phase to 7,200 two-phase if no question of motor business is concerned?" "What are the types and makes of engines in use in the smaller plants of the association; the time of their installation and their condition at the present time?"

ROADMASTERS' ASSOCIATION OF AMERICA.—The 16th annual meeting will be held at Denver, Colo., Sept. 13-15, at which committee reports on the following subjects will be presented:

1. Best method of preventing the creeping of rails.
2. Tie-plates; the results and benefits obtained from their use.
3. Track joints; results obtained from the use of various devices.
4. The advisability of increasing the length of rails, and the advantages to be derived from using miter cut ends for the rails.
5. At what degree of curvature should widening of the gage begin, and how much should the gage be widened for each degree?
6. Late improvements in frogs and switches.

There will also be a paper by Mr. H. W. Church on "Discipline in its Practical Application to Track Forces," and Mr. C. M. Hobbs, of the D. & R. G. R. R., will deliver an illustrated lecture on "Colorado versus Switzerland." The business proceedings will include the consideration of proposed amendments to the constitution.

The meetings will be held in the hall of the Chamber of Commerce, and the Railway and Track Supply Association will have its headquarters and exhibit near this building.

Several excursions have been arranged, and after the convention there will be a trip to Colorado Springs, Pike's Peak, Leadville and Glenwood Springs.

J. B. Dickson, Secy.

ASSOCIATION OF RAILWAY SUPERINTENDENTS OF BRIDGES AND BUILDINGS.—The 8th annual meeting of this association will be held Oct. 18-20, at Richmond, Va., as announced in our last issue. The list of subjects to be reported upon is given as follows:

Pile-rings and method of protecting pileheads in driving; Cost and manner of putting in pipe culverts; Best floors for shops and roundhouses; Roundhouse smokejacks and ventilation; Cattleguards and wingfences; Prevention of fire in railroad buildings; Storage of fuel, oil and other station supplies at way-stations; Railroad highway crossing gates; What repairs, and how can they be safely made, to metal and wooden spans without the use of falsework; Care of iron bridges after erection, including best method of protecting them from injury by salt water drippings from refrigerator cars; Turntable construction.

At a meeting of the executive committee held in Chicago on Feb. 21, the requirements for eligibility of an applicant were defined by a resolution which said in substance that the clause in the constitution referring to entrance requirements, "should, in accordance with the action of the association in the past, be construed on the basis that the applicant must be in the employ of a railroad company, either as a superior officer with general control over questions affecting the bridge and building department, or as a subordinate official having actual responsible charge of work connected with the construction or maintenance of railroad bridges or buildings, independent of the actual title, whether as superintendent, supervisor, engineer, general foreman, general inspector, master of road, master carpenter, etc., but not to include persons only in sub-charge of individual jobs or special classes of work, such as gang-foremen, inspectors, clerks, draftsmen, etc."

THE CIVIL ENGINEERS' CLUB OF CLEVELAND.—A regular meeting of this club was held Aug. 9, at which Mr. Lehman B. Hoit read a paper on "Test Meters for Boiler Plants." After describing the requisites of a water meter, as attached to a service pipe to measure the total consumption, the importance of accuracy of record in meters used to measure boiler feed water was emphasized.

The old method of testing boilers by weighing the water cannot now be applied, owing to the expense of so doing. In every day service the fuel consumption is much greater than determined by a test. An accurate meter serves the purpose of a continuous test, and is as essential in determining the efficiency of boilers and the relative value of fuels as the steam indicator is in determining the power developed by the engine. By noting the readings in a log-book, the duty performed by the boilers is known. Incidentally the test meter also indicates the relative skill of different sets of firemen and tends to prevent waste on their part.

A Worthington meter was exhibited and described. It was stated that the error in modern meters has been proved to be only a small fraction of 1%, and as the rate of error was constant, it could be easily eliminated in the general result.

By request Mr. Hoit then exhibited some blue prints of the Worthington steam acumulator, and described its construction and operation. As compared with a weight accumulator, this has several advantages. It requires no bulky weight, no heavy foundations, and produces no water hammer requiring extra strength in connections.

The water hammer of a weighted accumulator often amounts to 25%, and sometimes 50%, of the static pressure.

It is particularly adapted to the regulation of plants operated by water pressure, such as hydraulic presses and passenger elevators. A sudden demand in the service by reducing the water head causes additional steam to be supplied to the pumps, and also in certain cases to an auxiliary pump, by which means the loss of head is promptly restored. The whole action is automatic and requires no attention on the part of the engineer. In large plants, and especially where the service is very fluctuating, these machines have proved very advantageous and economical. The effect of the accumulator is somewhat analogous to that of a steam governor.

Wm. H. Searles, Secy.

RAILWAYS.

ASHLAND & WOOSTER.—J. L. Eberhardt, Ch. Engr., Wooster, O., informs us that the surveys are completed, and the right of way obtained for the whole line, except from Apple Creek to Wooster and Austin, a distance of 12 miles. The total length of the completed line will be 50 miles, running from Ashland to Beach City, via Jeromeville, Austin, Millbrook, Wooster, Apple Creek and West Lebanon, O. The capital for construction has been secured. Contracts will not be let, but the company will do its own work. Grading is completed from Apple Creek east to West Lebanon, and steel laid for six miles, and the line is in operation for light traffic from Jeromeville to Austin and the junction with the Findlay, Fort Wayne & Western Ry. Pres., H. B. Camp, Akron, O.

BOOMER COAL & COKE.—Clifton Buxton, Ch. Engr., Ohio Central R. R., Toledo, O., informs us that if an extension is built to this company's new mines up Boomer's Branch, that it will simply be a siding about one mile in length.

DENVER & RIO GRANDE.—Orman & Crook, Contractors, Pueblo, Colo., inform us that they are now employing 400 men on the extension of this line from Leadville to the Ibex mining district, known as the Crysolite extension, 10 miles in length; and that it is expected to complete the work by Oct. 1.

GRAND MARAIS & NORTH SHORE.—Press reports state that R. W. Nichols, Surveyor of St. Louis county, Duluth, Minn., is making the surveys for this proposed line between Duluth and Port Arthur, Ont., via Grand Marais, Minn., a distance of 185 miles.

GULF, BEAUMONT & GREAT NORTHERN.—The charter of this company was filed and approved in Texas, Aug. 5; the capital stock to be $250,000, and the principal office at Beaumont, Tex. It is proposed to construct and operate a standard gage railway commencing at a point on the Gulf of Mexico, about one mile south of Sabine Pass, Tex., and run northwardly through the counties of Jefferson, Orange, Hardin, Tyler, Jasper, Newton, Sabine, St. Augustine, Angelina, Nacogdoches, Shelby, Panola, Rusk, Gregg, Harrison, Marion, Upshur, Camp, Cass, Morris, Titus, Franklin, Hopkins, Delta, Red River and Lamar to the city of Paris, a distance of about 350 miles. The incorporators are, Wm. A. Fletcher, Wm. Weiss, Wilbur S. Davidson, F. A. Holbig, Frank M. Aldridge, Wm. M. Wilson, Willard C. Averill, George C. Greer, Geo. R. Wansbrough, Mark Weiss, S. H. Van Warner, of Jefferson county; John H. Kirby, of Harris; W. T. Atkins and Sam A. McNeeley, of Marion.

HALIBURTON, WHITNEY & MATTAWA.—It is announced that an application will be made in October for the incorporation of this company, which proposes to construct a railway from Mattawa, Ont., to the Ottawa, Arnprior & Parry Sound Ry., at Whitney, and thence to Haliburton. Solicitors, Gordon & Sampson, Toronto, Ont.

HAYTI.—It is announced that the construction of the projected railway in Hayti within the next two months is assured. The government has granted to Cincinnatus Leconte, Minister of the Interior and Public Works, and Blanc Eusebe, the exclusive privilege of constructing the line, the concession to last for 60 years. The railway will be narrow gage, running from Cape Haytien to La Grande Riviere du Nord, a distance of about 18 miles to the northeast. It is said that contracts for supplying the material have not yet been let, and that it is to be bought wholly in the United States. Engr., H. Thomasseh.

MERCHANTS & MANUFACTURERS.—It is now proposed by some to make this projected railway in Detroit, Mich., an elevated system. The scheme as originally outlined was to construct a tunnel underneath Fort St. and Cadillac Square, between the Fort St. Union station and the Brush St. station, and at the same time to build a surface line between the two points along the streets near the river. Lewis Warfield, Ch. Engr., 54 Wall St., New York.

MEXICO.—Press reports state that J. P. Riverall, Gen. Mgr., Hidalgo Express Co., Mexico City, Mexico, has been granted a concession to construct a railway from Palo Herrado to San Andres, Tuxtla and side branches. The plans have been approved, and it is proposed to begin work at once. Purchases of the various kinds required will, it is said, be made in the United States, and F. E. Lee will superintend the construction of the line.

MISSOURI, KANSAS & TEXAS.—Press reports state that this company has contracted with Jones & Laughlins and the Pittsburg Locomotive & Car Works for locomotives, machinery, structural iron for bridges, steel rails, etc., valued at about $500,000. S. B. Fisher, Ch. Engr., St. Louis, Mo.

ONTARIO & RAINY RIVER.—Surveys are said to have commenced for this proposed railway from the western terminus of the Port Arthur, Duluth & Western Ry. along the north side of the boundary line. The Canadian government having granted a subsidy to the company, the construction of the line from Gunflint to Fort Frances will soon be constructed.

OREGON & MISSOURI.—Reports state that this company is about to be organized, with a capital stock of $100,000, to construct a railway from a point on the Kansas City, St. Joseph & Council Bluffs R. R. at Forest City, or Curzon Switch, to Oregon, and eventually to Fillmore, Mo., 17 miles. Irving H. Wheatcroft, Vice-Pres and Gen. Mgr. Colorado Valley Ry., Sweetwater, Tex., is said to be interested.

PHILADELPHIA & READING.—Reports state that this company will soon begin the construction of a new line at Shippensburg, Pa., on the Philadelphia, Harrisburg & Pittsburg R. R., to a connection with the Western Maryland R. R., a distance of about 1½ miles, thus doing away with the large and heavy grade the company now has to contend with to reach the Western Maryland tracks. The surveys for the new extension have been made, and bids have been asked for the construction of the road. It is also said to be the intention of the Reading and the Western Maryland Railway companies to build a large freight yard. H. K. Nichols, Ch. Engr., Philadelphia, Pa.——E. D. Smith & Co., contractors, of Philadelphia, have completed the work of filling in the trestle on this line at Yardley, Pa., which was 55 ft. high, and required the dumping of 37,764 carloads of earth.

RARITAN TERMINAL & TRANSPORTATION.—This company was incorporated in New Jersey Aug. 4, with a capital stock of $50,000, with $2,000 paid in. It is proposed to construct and operate a railway in Perth Amboy, N. J. The incorporators are, Adolph Lewisohn and Jesse Lewisohn, New York; Jas. C. McCoy and W. E. Tobey, Perth Amboy; Joseph Rechert, Hoboken, N. J.; Sidney Riddlestorffer, Upper Montclair, N. J.; Edgar Buffum, Newark, N. J. Principal office, 258 Smith St., Perth Amboy, N. J.

ROCHESTER & SODUS BAY.—This company was incorporated in New York, Aug. 15, with a capital stock of $1,000,000, to build and operate a 45-mile railway from the United States government pier at Sodus Point to Rochester, N. Y. The directors are, Walter B. Duffy, Thomas J. Nicoll, John C. Woodbury, Daniel B. Pratt, George Wilder, Nathaniel Foote, A. Masters McDonald, Joseph C. Tone, Ira M. Laddington, George Wilson, Charles Van Voorhis, of Rochester; John A. Sullivan, of New York. The stock is taken principally by Wayne and Monroe county residents.

TITUSVILLE, CAMBRIDGE & LAKE ERIE. — A. H. Steele, Pres., 43 Cedar St., New York, informs us that no contracts have yet been awarded for the construction of a 30-mile extension of this railway, as stated in our last issue. Estimates, however, are now being made for the extension referred to.

UNION, CORNUCOPIA & EASTERN.—Bids are being received for the construction of this proposed railway from Union, Ore., to the Seven Devils mines, Idaho, 122 miles, including the building of a number of bridges, etc. The line, which will be standard gage, will be laid with 70-lb. rails, and five Howe truss bridges will have to be built. Grading has already been commenced on the Union, Cove & Valley Branch line between Union and Cove, a distance of 12 miles. Materials and equipment are now being purchased for this branch, which is expected to be in operation by Jan. 1. G. E. Howe, Ch. Engr.; Joseph Johnson, Supt. of Construction, both of Union, Ore.

STREET AND ELECTRIC RAILWAYS.

NASHUA, N. H.—The Nashua St. Ry. Co. was granted a franchise Aug. 9 to extend its lines from the present terminal on Main St. to the Massachusetts state line at Tyngsboro, the gage of said track to be 56½ ins., and the motive power electricity. Pres., John A. Fisher; Gen. Mgr., P. F. Sullivan.

PORTSMOUTH, N. H.—W. H. Moore, of Portsmouth, informs us that the bids are all in for the construction of the Portsmouth & Dover R. R., from Portsmouth through Newcastle and Rye, six miles, but that the contract has not yet ben awarded. Pres., Frank Jones, Portsmouth, N. H.

DEDHAM, MASS.—The selectmen of Dedham have granted a franchise to the Norfolk Western St. Ry. Co. to place its tracks on High St. in this town, and the road must be completed by Nov. 1 or $5,000 be forfeited to the town. This line is projected to run from Medfield to Dedham, via Wellesley, Needham and Watertown, thus connecting the outlying towns of Norfolk county with the county seat in Dedham.

MILFORD, MASS.—A petition has been filed with the selectmen by Charles W. Shippee for the construction of an electric street railway connecting Milford with Hopkinton. The line asked for begins on Cedar St., Hopkinton town line, thence through Cedar to Dilla, Purchase, Pearl, Main and Franklin Sts. The petition is signed by Joseph G. Ray, Edgar K. Ray, Geo. W. Wiggin, W. S. Reed, Edward H. Rathburn, Orestus T. Doe. A hearing on the petition will be given on Sept. 1. It is the intention of the company to extend the railway from Hopkinton to Westboro via Woodville, and later to build to Woonsocket and Attleboro, thus making a continuous line of about 40 miles length. A location has already been asked for in Bellingham, and it is probable that an arrangement will be made with the Milford, Holliston & Framingham St. Ry. Co. whereby the latter's line will be used from Caryville to Milford.

EAST WINDSOR, CONN.—The East Windsor R. R. Co. has obtained a charter from the state legislature to build an electric line from the terminus of the Hartford St. Ry. at East Windsor to a connection with the Enfield, Long Meadow and Springfield line at Warehouse Point. S. D. Rockwell, of Warehouse Point, Conn., is one of the directors; Pres., Charles Woodward.

BROOKLYN, N. Y.—It is reported that the 5th Ave. and Lexington Ave. lines of the Brooklyn Elevated R. R. Co. will have their motive power changed to the Sprague electric system at an estimated cost of $800,000.

FALLSBURG, N. Y.—We are informed that Wheeler & Boody, Bowling Green Bldg., New York, have recently been awarded the contract for the construction of about 23 miles of electric railway for the Fallsburg & Monticello R. R. Co. Pres., B. Van Steenbergh, 53 Broadway, New York.

NEW HARTFORD, N. Y.—The citizens of New Hartford, Claysville and Paris have declared their sentiment at public hearings to be in favor of the proposition to grant franchises to the Sauquoit Valley Electric St. R. R. Co. for the construction of a line through these places. Pres., A. P. Seaton.

NEW YORK, N. Y.—The state railroad commission, Aug. 11, approved the application of the Metropolitan St. Ry. Co., of New York, for permission to increase its capital stock from $30,000,000 to $45,000,000. It was also announced to-day that the board had granted 18 applications of the company for leave to change its motive power on its various lines, which, with the permits granted last week to the lines of the Third Ave. R. R. Co., embraces the fulfilment of the projected new system of surface railways in the Borough of Manhattan.

SCHENECTADY, N. Y.—Press reports state that the General Electric Co. has purchased the plants of the Schenectady St. Car Co. and the Schenectady Illuminating Co., and will hereafter operate both plants with its own power, soon to be obtained from the Hudson River at Mechanicsville. The street car lines will probably be greatly improved and extended.

SOLVAY, N. Y.—The village trustees have granted a franchise to the Syracuse, Skaneateles & Moravia R. R. Co. to construct and operate a double track electric railway through this village. Pres., Wing T. Parker, Moravia, N. Y.

ELIZABETH, N. J.—The Union county board of freehodlers, Aug. 16, awarded the franchise for the construction of an electric railway between Elizabeth and Plainfield, 12 miles, to John Kean, representing the Elizabeth City Horse R. R. Co. As stated in our last issue, the company's bid was $250,000. The proposed railway will be built parallel to the Central R. R. of New Jersey on a new boulevard to be made by widening the present road from 66 ft. to 100 ft. The money paid for the franchise is expected to be used in building the boulevard. Plans and estimates for the work have been prepared by F. J. Hubbard, of Plainfield, and J. L. Bauer, Elizabeth.

WEEHAWKEN, N. J.—It is reported that the New Jersey Elevating & Transfer Co. has begun the construction of a new inclined railway from 19th St. in Weehawken to Weehawken St. and Mountain Road in West Hoboken, to be used by vehicles and pedestrians. The contract, it is stated, has not yet been let for the structural steel, nor is it definitely decided whether the motive power will be steam or electricity. The grade will be 72 ft. in 100 ft. Thos. H. McCann, Supt. of Construction, Hoboken, N. J.

BALTIMORE, MD.—It is reported that the David E. Evans Co. has been awarded the contract for the extension of the Baltimore Consolidated Ry., running south on Bond St., from Pratt to Gough St.

RICHMOND, KY.—Reports state that the Richmond, Nicholasville, Irvine & Beattyville R. R. will be put up for sale for the second time on Sept. 6, through the failure of Adolph Segal, of Philadelphia, to make his purchase good by July 23. The upset price will again be $160,000. Receiver, John McLeod.

EATON, O.—Chas. S. Parkhurst, P. O. Box 575, Anderson, Ind., informs us that the survey has been completed and the right of way is now being obtained for the proposed electric railway which the Western Ohio Traction Co. contemplates building from Eaton to Gratis, and thence to Jacksonboro and Middletown, O., a distance of 22 miles. As soon as the right of way is obtained it is expected to issue bonds for construction purposes. The Patton electric motor system will be used. The promotors of the line are Mr. Parkhurst and Walter W. Brandon, of Anderson.

SANDUSKY, O.—Chas. H. Stewart, Secy. Sandusky & Interurban Ry. Co., Cleveland, O., informs us that the right of way has been obtained and the capital secured for this proposed line from Sandusky to Lorain, via Huron and Vermillion, but that contracts for construction work will not be let until next year. Pres., H. A. Everett, Cleveland, O.; Ch. Engr., Thomas Wood, Sandusky.

DUNKIRK, IND.—The Dunkirk & Redkey Traction Co. was incorporated Aug. 12, with a capital stock of $75,000, to construct a line from Dunkirk to Redkey, Jay county. The incorporators are, H. C. Billingsley, Charles A. Hasbrouck, Elmer Bishop and W. H. Kewser.

DETROIT, MICH.—The Detroit, Utica & Rome Ry. Co. has been organized with capital stock of $300,000, to build an electric railway connecting the towns mentioned, a distance of 34 miles. It is hoped to have the line in full operation by January. The directors are, Alexander McVittie, Frank E. Kirby, Frank D. Andrus and Elliott G. Stevenson, of Detroit; Geo. B. Davis, of Utica, and Marvin I. Brabb, of Romeo.

ESCANABA, MICH.—The Escanaba Electric Ry. Co. has been reorganized and officers elected as follows: Pres. and Mgr., A. R. Moore; Vice-Pres., O. B. Fuller; Secy., I. C. Jennings; Treas., Edward Erickson. It is said that the line will be put into good condition, and inside of 90 days connection will be made at Wells with the Soo line. Aditional cars will be purchased and sheds built. Parks and resorts will be made along the Escanaba River, and it is expected that the road will later on be extended to Gladstone.

NORTHVILLE, MICH.—The township board at this place, Aug. 10, granted a franchise to the Detroit, Plymouth & Northville Electric R. R. Co. to construct its line through Northville.

SAGINAW, MICH.—It is reported that the receivers of the street railway have been authorized to issue $33,000 worth of additional certificates to be used in paying city taxes and building the track on South Michigan Ave.

EAST ST. LOUIS, ILL.—William Ortgier, of East St. Louis, one of the incorporators of the East St. Louis & Collinsville Electric Ry. Co., informs us that his company has sold the right of way which it owned to the Mississippi Valley Electric Ry. Co., of St. Louis, Mo., and of which J. H. Mehling is the president. The new company, it is said, will proceed at once to build two lines, one from East St. Louis to Edwardsville, via Collinsville and Glen Carbon, and the other from East St. Louis to Edwardsville via Brooklyn, Venice, Madison, Granite City and Alton.

QUINCY, ILL.—Press reports state that the entire electric street railway system was sold Aug. 5 to a Maine syndicate, represented by W. B. McKinley, of Chicago, and which controls the street car systems and the electric light plants in Joliet, Bay City, Champaign, Springfield, O.; Trenton, Mo., and other cities. The consideration was about $220,000. It is said that the syndicate will at once spend $100,000 for extensions and rolling stock.

MILWAUKEE, WIS.—The contracts for the construction of a new power house for the Milwaukee Electric Ry. Co. were awarded Aug. 3, as stated under Buildings; estimated cost, $600,000. It is said that the plant will be supplied with five 1,600-HP. engines, made by E. P. Allis & Co., and five boilers from the Edgemoor Iron Co.

SAN ANTONIO, TEX.—John H. Clark, of this city, was appointed receiver of the West End St. Ry. Co., by Judge Camp, Aug. 8, on application of the bondholders.

WHITTIER, CAL.—An ordinance has been passed granting a franchise to A. B. Patton to construct a cable or electric railway in this city.

ELECTRIC LIGHT AND POWER.

MONTPELIER, VT.—We are informed that bids for constructing the power plant at North Duxbury or Bolton Falls for the Consolidated Lighting Co. of Montpelier will soon be received. The company expects to light about half a dozen villages, and to lease power for electric railways and other purposes. The plans and specifications are about ready. Des. Engr., H. W. Allen, Manchester, N. H.; C. P. Pitkit, Montpelier, is in charge of the work.

FRAMINGHAM, MASS.—Frank E. Henning, Town Clk., writes us that nothing will be done at present in regard to the proposed electric light plant.

PITTSFIELD, MASS.—Wm. Dodson, W. R. Hunnewell and J. W. Mason have been appointed a committee to consider the advisability of lighting the streets by electricity.

MYSTIC, CONN.—Bids will be asked about Sept. 1 for constructing a plant to cost about $25,000 for the Mystic Electric Light & Gas Co. We are informed that the plant will have arc and incandescent lights, 150-HP. steam plant with engine, and 15,000 light alternator, line, poles, etc. No contracts have been let yet. The plant will light Mystic and Stonington. Thos. C. Perkins, Gen. Mgr. and Des. Engr., Danforth, Conn.

HYDE PARK, N. Y.—Fred. W. Vanderbilt has authorized Owen Morris, Engr., Hyde Park-on-the-Hudson, to prepare plans for a stone masonry dam across the Crum Elbow Creek for a 6,000,000-gallon storage reservoir for electric and water power purposes on the estate.

BERLIN, PA.—G. B. Hough, of the Berlin Electric Light Co., writes us that the proposed plant will be put in operation about Sept. 1. The plant will have a 75-HP. Westinghouse engine, 750-light Westinghouse dynamo, 20 arc light Brush dynamo, 75-HP. Erie boiler, etc., to cost $5,000.

NEWPORT NEWS, VA.—The Newport News & Old Point Ry. & Electric Co. has applied for a franchise to Jan. 1, 1949. W. J. Payne, Pres. Newport News Gas Co., is interested. Mayor, A. A. Moss.

CHARLESTON, S. C.—The following bids were received Aug. 1 for installing a plant at Battery Jasper, Sullivan's Island, S. C., by Maj. H. C. Ruffner, U. S. Engr., Charleston, S. C.: General Electric Co., Schenectady, N. Y., $5,700; New York Finance & Construction Co., 141 Broadway, New York, $6,698; N. J. Foundry & Machinery Co., Jersey City, N. J., $5,632. Bidders specification, $5,542.

ELLISVILLE, MISS.—J. F. Parker, Mayor, writes us that no organized effort has been made to put in a plant.

NEW ORLEANS, LA.—An ordinance has been introduced calling for bids by the City Clerk until Jan. 2 for lighting the city with electricity, gas or oil; bond, $50,000.

DICKSON, TENN.—The Business Men's League is reported as considering the question of lighting the town by electricity.

FRANKLIN, KY.—The question of building a plant here is again being considered, according to reports.

LEXINGTON, KY.—The Triumph Electric Co., 859 Hathaway St., Cincinnati, O., has been awarded the contract for furnishing the asylum in this city with a plant. Prof. Paul Anderson may be addressed.

SOUTH CHARLESTON, O.—Wm. Cherry, Mayor, writes us that nothing definite has yet been done in regard to the proposed plant, reported in our issue of last week.

KOKOMO, IND.—Press reports state that applications for receiver for the Citizens' Electric Light & Power Co. of this place were filed Aug. 12, with claims aggregating $12,800, by the American Savings Bank, of Grand Rapids, Mich., the Capital City National Bank, and by Joseph L. Cohn, of Indianapolis. The corporation is capitalized at $40,000.

EATON RAPIDS, MICH.—Bids are asked until Aug. 20 for furnishing and putting in a water power plant in this place for A. R. Welch, of Chelsea, Mich. The plant will have 60 2,000-c. p. and 1,000 16-c. p. lights. It is proposed to install a direct-current 220-volt machine. Mr. Welch wishes samples of enclosed arc lamps. He will be in the market for everything except water wheels.

GRAND RAPIDS, MICH.—It is reported that the Consolidated Water Power Co. has decided to build a dam on the Wisconsin River. It will have a 30-ft. head; will furnish 12,000 HP. and will cost about $30,000. Engr., T. W. Orbison, Appleton, Wis.

JONESVILLE, MICH.—C. F. Wade, Pres., writes us that a committee is preparing a report on the advisability of putting in a plant. The report will soon be submitted.

MOUNT PLEASANT, MICH.—Chas. M. Brooks, Mayor, writes us that the question of building a plant in connection with the improvements to the water-works is being considered. The complete improvements will cost about $28,500. Population, 4,000.

SAULT STE. MARIE, MICH.—The American Lake Superior Power Co. has been granted a franchise, according to reports. Work on the plant, which will cost about $2,000,000, will be begun in a few weeks. The bids were received July 1, and the contract will be let at once. Ch. Engr., H. von Schon.

CHICAGO, ILL.—The Chicago Edison Electric Light Co. has completed the absorption of the following companies, according to reports: The Hyde Park Thomson-Houston Light Co., Hyde Park Electric Light & Power Co., People's Light & Power Co. (Hyde Park), People's Electric Light & Motor Power Co. (town of Lake), Mutual Electric Light & Power Co. (Hyde Park), Englewood Electric Light Co., West Chicago Light & Power Co., Western Light & Power Co. (Lakeview), Edgewater Electric Light & Power Co., Chicago Sectional Electric Light Underground Co., and Commonwealth Electric Light Co. The only electric light company not included in the deal is the Cosmopolitan Company. While it has a franchise and some wires laid, it has not yet got a plant. Arrangements have been made with a local syndicate to take $2,500,000 of first mortgage bonds to be issued by the Commonwealth Company under the terms of the trust deed to the Northern Trust Company. Of the money to be obtained by the sale of these bonds, which were disposed of at par, $2,000,000 is to go to pay for the first nine companies given in the above list. Of the $500,000 remaining $350,000 is to be used in construction work and $150,000 to pay off the old indebtedness of the Commonwealth Company.

MATTOON, ILL.—The Mattoon Light, Heat & Power Co. has been granted a 20-year franchise by the council and will at once begin building a plant. From the new plant power for fulfillment of the terms of the Somerville & Marks electric light contracts will be furnished, and the company also intends to furnish steam heat in the central district of the city. J. F. Marks, secretary and treasurer, writes us that the Mattoon Heat, Light & Power Co. has purchased a hot-water heating plant. The plants are owned by Somerville & Marks, who have incorporated the above company.

ROCK ISLAND, ILL.—Bids are asked until Aug. 27 for extending the wing dam of the water power pool for about 10,000 ft., etc. Capt. S. E. Blunt, U. S. A., Rock Island.

MARSHFIELD, WIS.—Bids are asked until Oct. 1 for lighting the city with 28 2,000-c. p. lights for terms of five and ten years. Population, 6,000. Henry Horn, Mayor; J. A. Thomas, Cy. Clk.

NEW PAYNESVILLE, MINN.—M. S. Elliott, Recdr., writes us that W. I. Gray & Co., 703 Sykes Block, Minneapolis, have been awarded the contract at $9,144 for building the plant and water-works. P. C. Pilon, Pres.

WINNEBAGO CITY, MINN.—A. C. Drew, Pres. Council, writes us that the matter of a plant will be taken up very soon.

ABILENE, KAN.—Bids are asked until Sept. 1 for furnishing and installing a plant about three miles from here for Jacob Brower & Co. The plant, which will be operated by water power, will have a capacity for 25 2,000-c. p. arc and 1,000 16-c. p. incandescent lights. Work will be begun soon as possible after Sept. 1. Correspondence is solicited.

NATIONAL MILITARY HOME, KAN.—Bids are asked until Aug. 24 for extending the plant at the western branch of the National Home for Disabled Volunteer Soldiers, according to reports. W. B. Shockley.

PLEASANTON, KAN.—The question of building a plant is being considered, according to reports.

WELLINGTON, KAN.—The council is considering the question of erecting a plant in connection with the proposed water-works, the two to cost about $125,000.

REDLANDS, CAL.—The certificate of the increase of the capital stock of the Redlands Electric Light & Power Co. was filed in San Bernardino Aug. 4 by W. J. Curtis, attorney for the company. The increase is from $200,000 to $500,000, and is made in order to extend the scope of the company's operations, improve the plant, circuit lines, property, etc. Directors, H. H. Sinclair, Chn.; F. G. Feraud, Secy.; J. F. Drake, J. H. Fisher and George B. Ellis.

SAN JOSE, CAL.—The mayor has recommended that a municipal plant be built at a cost of about $40,000.

SHERBROOKE, QUE.—Councilmen Olivier, Le Baron, Cate and Guay have been appointed a committee to consider the advisability of building a municipal plant.

HAMILTON, ONT.—S. H. Kent, Acting City Clerk, writes us that an engineer (Percy Domville, Hamilton,) has been appointed to report on the cost of a municipal plant. The present contract, which is said to be for 384 2,000-c. p. arc lights expires in 1900.

LUNENBURG, N. S.—It is stated that the Lunenburg Gas Co. has decided to install a plant on Mush-a-Mush River at the head of Mahone Bay, for the purpose of supplying Mahone and Lunenburg with an all-night electric service.

BUENOS AYRES, ARGENTINE.—Press reports state that machinery is being purchased for new plants in various cities of this country. The specifications call for American machinery. Carlos Bright, Civil Engr., Buenos Ayres, may be addressed.

NEW COMPANIES.—Mason Electric Light Co., Mason, Tex.; $5,500; L. Guggenheim, V. M. Loring, John Lemberg, Otto Donoh, Richard Grosse.

Berlin Electric Light Co., Berlin, Pa.; $4,000, with $400 paid in; W. S. Matthews, Berlin; J. A. Berkey, G. B. Haugh, J. M. Bricker, H. F. Barron, Somerset.

Mexico City Light, Heat & Power Co., New York; $5,000,000, with $150 paid in; Henry C. Bush, 32 Pine St., New York; Frank Johnston, Wm. C. Foster, Frederick Giblin, New York.

Lansdowne Electric Light Co., Lansdowne, Pa.; Tamany P. Street, Henry C. Staatzell, Richardson Shoemaker, J. Milton Lutz, Muntha J. Kelly.

BRIDGES.

RUMFORD FALLS, ME.—The selectmen have awarded a contract to the New Columbus Bridge Co., Columbus, O., at $9,700, for constructing a 198-ft. single span bridge across the Androscoggin River.

NORTHFIELD, MASS.—The following bids were received by the county commissioners July 30 for constructing the superstructure of a bridge over the Connecticut River. Engrs., Edward S. Shaw, 12 Pearl St., Boston, and Clapp & Abercombie, Ponds Block, Greenfield, Mass.:

	With wooden stringers.	With steel stringers.	Abutment piers.

*Awarded contract.

NEW YORK, N. Y.—John C. Rodgers has been awarded a contract, at $1,036,192, for the construction of the Willis Ave. bridge, over the Harlem River at 1st Ave. The itemized bids were in our issue of Sept. 23, 1897. Jno. L. Shea, Comr. Bridges, Stewart Bldg.

OWEGO, N. Y.—The town board has appropriated $2,500 for the construction of two bridges.

LANDENBURG, PA.—A contract has been awarded by the county commissioners to the Schuylkill Bridge Co., Phoenixville, Pa., at $1,785, for constructing a 76-ft. iron bridge over White Clay Creek.

NEWPORT NEWS, VA.—The committee has submitted a report to the council, recommending that bids be asked for furnishing plans and for constructing two bridges, one at 34th St. and one at 25th St.

CHILLICOTHE, O.—The county commissioners have awarded a contract to the King Bridge Co., Cleveland, O., at $11,500, for the superstructure of the Main St. bridge; also to the Iron Substructure Co., Columbus, O., at $1,295, for the Deer Creek bridge.

LORAIN, O.—The county commissioners, Elyria, O., have engaged F. C. Osborn, Cleveland, O., to prepare specifications for the construction of a 120-ft. span bridge at Erie Ave. Bids will soon be asked.

TIFFIN, O.—Bids are asked until Aug. 20 for building a bridge in Pleasant township. Address the county auditor.

GRAND RAPIDS, MICH.—The Toledo Bridge Co., Toledo, O., has been awarded a contract, at $8,600, for constructing two bridges, 550 and 250 ft. long respectively, on the Muskegon and North Muskegon roads.

ONTONAGON, MICH.—Bids are asked until 10 a. m., Aug. 19, for constructing an iron bridge across the Iron River, in Carp Lake township. W. N. Cunningham, Highway Comr.

CHICAGO, ILL.—Press reports state that the engineering department has prepared plans and estimates for replacing a number of bridges along the river with bascule structures, to cost about $5,000,000. Bonds will be issued.——Scherzer Rolling Lift Bridge Co., Monadnock Block, Chicago, has been awarded a contract, at $369,140, for constructing the Campbell Ave. bridge, according to reports.

PARK FALLS, WIS.—Bids are asked by the city clerk until 2 p. m., Aug. 18, for constructing a wooden and iron bridge over the Flambeau River. W. F. Turner, Chn.

CHOTEAU, MONT.—Bids are asked until Sept. 6 for constructing a steel or iron bridge over the Marias River. A. C. Warner, County Clk.

ST. JOSEPH, MO.—Bids will soon be asked by the council for the construction of the South 6th St. viaduct, according to reports.

PUEBLO, COLO.—New bids will be asked for constructing the First St. bridge. Mayor Orman may be addressed.

PENDLETON, ORE.—Bids are asked until Sept. 7 for constructing two bridges. B. S. Borroughs, County Clk.

CHEHALIS, WASH.—Bids are asked until Aug. 20 for constructing three bridges over the Chehalis River, to cost about $15,000. Allen P. Schooley, County Audr.

CHEHALIS, WASH.—Reports state that a contract has been awarded to the Columbia Bridge Co., Portland, Ore., for constructing a steel bridge at Gray's Harbor, to cost about $9,000.

NEVADA CITY, CAL.—County Supervisor Buffington has been authorized to prepare plans for a bridge over Greenhorn Creek.

LOS ANGELES, CAL.—Bids are asked until Sept. 19 for the purchase of $23,000 of 4% bridge bonds. C. H. Hance, Cy. Clk.

SAN JOSE, CAL.—Bids are asked by the county clerk until Sept. 6 for constructing a bridge over Stevens Creek.

STOCKTON, CAL.—D. Tumelty & Son have been awarded a $3,587 contract by the county supervisors, for constructing a steel bridge across Mokelume River.

MOUNTAIN HOME, IDAHO.—Bids are asked until Sept. 15 for moving and repairing the birdge over South Boise River, at Pine Grove. W. H. Manion, County Clk.

ARNPRIOR, ONT.—Bids are asked until Aug. 30 for constructing an iron bridge over the Madawaska River. Frank A. Hibbard, Engr., Ottawa, Ont.; Sam. Kedey, Chn. Com.

ST. JOHN, N. B.—Bids are asked until Aug. 20 for painting the cantilever bridge and western trestle. T. B. Robinson, Secy. St. John Bridge & Ry. Extension Co., 103 Prince William St.

BUILDINGS.

BOSTON, MASS.—Bids are asked by the city school committee, Mason St., until Aug. 22, for erecting a high-school building at South Boston; bond required, $30,000. Arch., Herbert D. Hale, 13 Exchange St.

BRIDGEPORT, CONN.—Plans are asked until about Jan. 1 for the new city hall building, to cost about $150,000. Dr. C. Lincoln Banks, Chn. Com.

BUFFALO, N. Y.—Bids are asked by the department of public works until Aug. 25 for the installation of a ventilating plant for the chemical laboratory at the Masten Park High School; also until Aug. 31 for the erection of a brick lavatory at School No. 35, etc.——Bids are asked by the park commissioners until Aug. 26 for the construction of a series of propagating houses in Delaware Park.

ELLIS ISLAND, N. Y.—The contract for erecting the five buildings on Ellis Island, in New York Harbor, for the new immigrant station, has been awarded to R. H. Hood & Co., St. Paul Bldg., 220 Broadway, New York, on slightly revised plans, at $419,298. The full list of bids received by the supervising architect on July 30 was published in our issue of Aug. 4.

NEW YORK, N. Y.—Bids are asked by the department of public buildings, lighting and supplies, at 346 Broadway, until Aug. 23, for erecting two Otis hydraulic passenger elevators in the brownstone building, City Hall Park, and for the construction and erection of wrought iron balcony, with stairs leading to same, and for new bookcases in the room known as the Library of the Supreme Court, in the County Court-House in City Hall Park, Borough of Manhattan.——Bids are asked by the department of health, at Criminal Court Bldg., until Aug. 24, for alterations to the disinfecting depot, foot of East 16th St.——Plans have been filed by Lorenz F. J. Weiher, Jr., Owner and Architect, 125th St. and Park Ave., for three 5-story brick flat buildings at Brook and Elton Aves., to cost $50,000; by Henriette K. White, 208 West 118th St., for a 10-story brick flat and store building at 80th St. and Columbus Ave., to cost $235,000. Arch., Henry F. Cook, 111 5th Ave.; by Neil Hansen, 647 Amsterdam Ave., for three 5-story brick flat and store buildings at Amsterdam Ave. and 147th St., to cost $60,000. Archs., Angell & Higginson, 108 Fulton St.; by J. W. Simpson, 34 West 20th St., for a 4-story brick and stone dwelling on 5th Ave., near 74th St., to cost $50,000, and for an adjacent building to cost $45,000. Arch., C. P. H. Gilbert, 1123 Broadway.——The contract for erecting the masonry of the new building for the St. Jerome Roman Catholic Church, at 137th St. and Alexander Ave., is said to have been let to Henry McNally, 287 4th Ave., and for the carpentry contract, to William Burns, 287 4th Ave.; estimated cost, $80,000. Archs., Delhi & Howard, 1193 Broadway.——D. C. Weeks & Son, 289 4th Ave., have the general contract for erecting a 12-story store and office building at 110 to 116 Nassau St., for Levi P. Morton. Archs., Clinton & Russell, 32 Nassau St.

OGDENSBURG, N. Y.—The following bids were received by the supervising architect, Washington, D. C., Aug. 9, for the removal of the old heating and ventilating apparatus, and for installing a new heating and ventilating apparatus in the U. S. building at Ogdensburg:

		Time.
Blake & Williams, New York	$5,281	Oct. 1
Edward Joy, Syracuse, N. Y.	5,950	2 mos.
Edward P. Bates, Syracuse, N. Y.	4,835	Oct. 1
Chas. Lavies, Ogdensburg	4,806	"
E. Rutzler, New York	5,291	"

ORIENT POINT, N. Y.—The following bids were received by Lt.-Col. D. P. Heap, U. S. Engrs., Tompkinsville (S. I.), N. Y., Aug. 11, for furnishing the material for and erecting the Orient Point light station, as advertised in Engineering News:

Allentown Rolling Mills, Allentown, Pa.	$9,912
Atlanta Machine Works, Atlanta, Ga.	10,380
Chamblin & Scott, Richmond, Va.	10,566
John P. McGuire, 51 Scranton Ave., Cleveland, O.	10,800
Tacony Iron & Metal Co., Philadelphia, Pa.	13,500
Russel Wheel & Foundry Co., Detroit, Mich.	13,970
M. H. Treadwell & Co., 120 Liberty St., New York.	14,434
Chas. L. Rowland, 102-114 Greene St., Brooklyn, N.Y	15,750

ROCHESTER, N. Y.—A. W. Van Alstyne has been awarded the contract for the carpentry work at School No. 19, at $9,885.

HAMILTON, N. J.—Bids are asked by the board of education until Aug. 18 at 3 p. m., for erecting a 4-room brick school building; deposit required, $500. Pres., John Sykes, 111 East State St. Arch., W. A. Poland, 11 West State St., both of Trenton, N. J.

WEST HOBOKEN, N. J.—A brick, stone and iron addition to the Hudson County Savings Institution will soon be erected on Spring St., at a cost of about $35,000. Arch., Herman Kreitler, 62 Broad St., New oYrk.

CORRY, PA.—J. A. Nixon, of Titusville, Pa., has been awarded the contract for erecting the high school building, at $21,555. Archs., McCollum & Ely, Washington, Pa.

GLENSHAW, PA.—Bids are asked by the directors of Shaler township until Aug. 20 for the erection of a second-story to the school building at Glenshaw. Secy., Jacob Ochsenhirt.

PACKERTON, PA.—Bids are asked, according to reports, for the erection of a 2-story brick and iron storehouse, 73 × 301 ft., for the Lehigh Valley R. R. Co. C. E. Webster, Ch. Engr., South Bethlehem, Pa.

WASHINGTON, PA.—Bids are asked by the town council of this borough until Aug. 22 for the removal of the buildings within the lines of Brownson Ave. Secy., J. N. White.

WILMINGTON, DEL.—Bids are asked until Aug. 29, extension of time from Aug. 8, for the erection of a new high school building on Delaware Ave. William Turner, Chn. Bldg. Com.

LAUREL, MD.—Jas. T. Loveless, Washington, D. C., was awarded the contract, Aug. 10, for the construction of the new high-school building, complete, at $8,345.

WASHINGTON, D. C.—Dr. G. F. Whiting will build at once an office building at No. 1331 F St., N. W. Arch., W. M. Poindexter, 806 17th St., N. W.——J. M. Dunn has been awarded the contract for constructing an addition to the station house on 5th St., N. W., at $4,649.

PETERSBURG, VA.—The Pittsburg Heating Supply Co. was the lowest bidder, Aug. 15, on the installation of a heating apparatus in the U. S. building in this city, at $1,104; time, 40 days.

MARIETTA, GA.—Bids are asked until Aug. 20 for the erection of a new Methodist Church building. T. M. Brumby, Chn. Com.; Hayden & Wheeler, Archs., Equitable Bldg., Atlanta, Ga.——Bids are asked until Sept. 29 for a 3-story brick and marble court house, 60 × 80 ft., for Cobb county. Archs., Golucke & Stewart, 24½ Whitehall St., Atlanta.

ST. PETER, MINN.—Bids are asked until Aug. 24 for a steam heating plant for the court-house. Charles Hensel, County Audr.

MILWAUKEE, WIS.—Contracts have been let for the construction of the new power house for the Milwaukee Ry. & Light Co., to cost about $600,000. The interior steel construction work will be done by W. R. Roberts & Co., of Chicago; the brick and mason work, by the Paul Reisen Co., of this city; the sidewalks, floors, roofs, etc., by the Northwestern Tile & Cement Co.; the terra cotta trimmings, by Evans & Howard, of St. Louis.

LINCOLN, NEB.—John Roberts, of Lincoln, was the lowest bidder for a heating and ventilating apparatus for the U. S. building, at $2,399; time, 55 days.

SOUTH OMAHA, NEB.—Bids are asked by the supervising architect, Washington, D .C., until Sept. 7, for a low-pressure steam heating and ventilating apparatus for the post-office building in this city, as stated in our advertising columns.

BISMARCK, N. DAK.—It is reported that the total loss from the fire in this city on Aug. 8 will be about $600,000; insurance, $250,000. Among the losers are the First National Bank, the post-office, C. H. Phelps and Joseph Hare.

DONIPHAN, MO.—Ripley county has decided by popular vote to issue $20,000 court-house and jail bonds. Bids for the purchase of the bonds will soon be asked.

KANSAS CITY, MO.—William Harmon has been awarded the contract for the reconstruction of the Union station, at about $42,000. Archs., Van Brunt & Howe, 1214a Main St., Kansas City.

GOLIAD, TEX.—Bids are asked until Sept. 3 for reconstructing the Goilad county jail. Henry Shaper, County Judge.

SAN ANTONIO, TEX.—Plans and specifications are asked by the city council until Sept. 5 for a one-story central market house to be erected on Paschal Square at a cost of about $40,000; first prize, $500; second prize, $250. Mayor, Bryan Callaghan; Cy. Clk., Theo. Vinke.

COLORADO CITY, COLO.—Reports state that the Manitou & Pike's Peak R. R. Co. has signed a contract for a large observatory to be built on the top of Pike's Peak.

CHEMAWA, ORE.—Bids are asked until Aug. 27 for erecting one brick school and assembly building for the Indian Industrial School. Supt., Thos. W. Potter.

PORTLAND, ORE.—The supervising architect, Washington, D. C., received the following bids Aug. 8 for plaster models for the U. S. Custom House building in this city: Jas. F. Earley, Washington, D. C., $508; time 42 days; C. W. Buhler, Washington, D. C., $415, time, 48 days.

FRESNO, CAL.—A fire in this city Aug. 10, destroyed $500,000 worth of property on the Southern Pacific Co.'s reservation, from Mariposa St. to Mono St.

LOS ANGELES, CAL.—Bids are asked by the supervisors of Los Angeles county until Sept. 14 for the construction of a brick building for the county hospital. T. E. Newlin, County Clk.

UKIAH, CAL.—Bids are asked until Sept. 3 for erecting an administration building for the Mendvano State Hospital. Secy., W. W. Cunningham; Archs., Cunningham Bros. San Francisco, Cal.

WHEATLAND, CAL.—The business portion of this town was burned Aug. 12, causing an estimated loss of $185,000; insurance, about one-half of loss.

LOVELOCKS, NEV.—Bids are asked until Sept. 19 for constructing a jail building here for Humboldt county. Geo. E. Miller, County Clk., Winnemuca, Nev.

HALIFAX, N. S.—Bids are asked by the Intercolonial Ry. Co. until Aug. 22 for the erection of a grain elevator at Halifax. D. Pottinger, Gen. Mgr., Moncton, N. B.

QUEBEC, QUE.—Reports state that Joseph Gosselin, of Levis, has been awarded the contract for erecting new buildings for Judge Chauveau on the site of the old city hall; estimated cost, $75,000.

ARNPRIOR, ONT.—Bids are asked by the department of public works, at Ottawa, Ont., until Aug. 22, for the construction of a heating apparatus in the public building in Arnprior. Secy., E. F. E. Roy.

INGERSOLL, ONT.—Bids are asked by the department of public works until Aug. 23 for the construction of a building in this city. Secy., E. F. E. Roy, Ottawa, Ont.

NIAGARA FALLS, ONT.—Bids are asked until Aug. 20 for the identical reconstruction of the Clifton House, recently destroyed by fire. Darling & Pearson, Toronto Ry. Chambers, Toronto, Ont., Architects for Bush Estate.

WATER-WORKS.

AUBURN, ME.—E. S. Paul, A. M. Pulsifer and R. M. Mason have been appointed a committee to investigate the question of a pure water supply from Lake Auburn.

PITTSFIELD, MASS.—F. E. Hatch, Supt. water-works, writes us that the proposed Tillotson extension, noted last week, has not as yet been definitely decided upon.

NEW HAVEN, CONN.—A resolution has been adopted by the council authorizing the appointment of a joint committee to investigate the question of the municipal ownership of the water-works, gas plants, street railways, etc., of the city. Councilman O'Sullivan may be addressed.

ALBANY, N. Y.—Stone & Thurston, 220 Broadway, New York, have been awarded the contract for furnishing and building the pumping station and intake at the filtration plant at $22,977, instead of $2,977, as noted in our issue of last week. The prices for the various items of the work are given under Contract Prices.

CATTARAUGUS, N. Y.—W. B. Wilson, Buffalo, N. Y., has been awarded the contract for extending the works, at a cost of about $7,000.

CROWN POINT, N. Y.—The Crown Point Water-Works Co. has been incorporated with a capital stock of $5,000 by James E. Pond, Freeman C. Pond, Margaret A. Pond, Ruth D. Pond, Elbert M. Johnson, Lysander R. Berry and Edwin R. Eaton, all of Crown Point. J. E. Pond is the owner of the small works built in this place in 1895.

CROWN POINT, N. Y.—J. E. Pond, Pres. and Supt. Crown Point Water-Works Co., writes us that contracts will be let Aug. 20 for furnishing four bends, one cross, four gates, valves, etc., for the proposed improvements to the works put in three years ago.

ELLIS ISLAND, N. Y.—The following bids for water supply pipe from Jersey City to Ellis Island, N. Y. H., were received by the treasury department Aug. 8:

Bidder.		Time, days.
Merritt & Chapman D. & W. Co., New York	$16,744	60
Holmes & Cogan, Jersey City	14,045	50
Geo. B. Inman, New York	13,300	40
Jno. Cornwell, Jr., New York	32,000	58
J. T. Brown, New York	12,970	60
Jno. McNamee, Brooklyn, N. Y	15,500	60
Jno. R. Sheehan, New York	12,700	60

JOHNSTOWN, N. Y.—An election will be held Aug. 23 to vote on the question of building a reservoir, etc., for an additional water supply, to cost about $75,000. A. J. Nells, Cy. Attorney.

RHINEBECK, N. Y.—We are informed that the city has not come to any conclusion in regard to works, noted in our last issue. The question will be submitted to the voters at the next election. Population, 1,500. Frank Latson, Pres. Village Bd.

ROME, N. Y.—Chas. C. Hopkins, Cy. Engr., writes us that none of the bids recently received for an auxiliary pumping plant was accepted. The commissioners now favor submitting to a vote of the taxpayers the question of a gravity supply from Fish Creek or Mohawk River, in accordance with plans prepared in 1897 by the Stanwix Engineering Co., Rome. Estimated to cost from $110,000 to $162,000, depending upon source and capacity.

BRIDGETON, N. J.—Timothy Woodruff, Supt. water-works, informs us that the following bids were received Aug. 12 for furnishing and installing a 100-ft. steel water tank:

Tippett & Wood, Phillipsburg, N. J	$9,497
New Jersey Steel & Iron Co., Trenton, N. J	8,180
Riter-Conley Co., 29 Cortlandt St., New York	8,611
Sotter Bros., Pottstown, Pa	10,650
*J. H. & F. Ferguson, agents, Betz Bldg., Phila.	7,097
R. D. Wood & Co., 400 Chestnut St., Philadelphia.	8,120
Warren City Boiler Works, Warren, O	7,450
Cox & Sons Co., Bridgeton, N. J	11,474
Broomell, Schmidt & Co., York, Pa	8,707
Youngstown Bridge Co., 150 Nassau St., N. Y	7,242
Leighton Lea, Girard Bldg., Philadelphia	7,180
Wilkins & Kuemmerle, Betz Bldg., Philadelphia.	10,525

---

*Awarded contract, agents for E. Keeler Co., Williamsport, Pa.

GLOUCESTER CITY, N. J.—Bids are asked until Sept. 1 for furnishing and erecting a 2,500,000-gallon pump at the water-works, as stated in our advertising columns. W. J. Thompson, Chn. Com.; D. F. Lane, Cy. Clk.

JERSEY CITY, N. J.—Bids are asked until Aug. 24 for furnishing a large number of ⅝ to 10-in. water meters. Geo. T. Bouton, Clk. Comrs.

ORANGE, N. J.—The city engineer is preparing plans for a pumping station at Campbell's Pond, Millburn, and for deepening and cleaning the pond; estimated cost, $25,000.

SENECA FALLS, N. Y.—The question of the municipal ownership of the works and the electric light plant is being considered.

DEVON, PA.—Bids are asked until Aug. 22 for constructing a 4,000,000-gallon reservoir at Devon for the works owned by the American Pipe Mfg. Co., as stated in our advertising columns. Ch. Engr., J. A. Ledoux, Fidelity Mutual Life Bldg., Philadelphia.

DU BOIS, PA.—D. S. Herron, Cy. Solicitor, writes us that there is no prospect of anything being done to secure an increased water supply.

EVANS CITY, PA.—Geo. Fehl, Pres. Council, writes us that plans for the proposed works are not completed. The supply will be secured from small streams. Population, 1,400. Engr., J. P. Leaf, Rochester, Pa.

GROVE CITY, PA.—Chandley Bros. & Co., Beaver Falls, Pa., have been awarded the contract at $15,000 for building the new works, according to reports.

HARRISBURG, PA.—Bids are asked until Aug. 23 for laying a 6-in. water pipe in Second St. E. Mather, Pres.

HASTINGS, PA.—The Susquehanna Water Co. has been incorporated with a capital stock of $500 by Col. J. L. Spangler, Bellefonte, Pa.; W. P. Duncan, Philipsburg; R. B. Spangler and C. F. Fraser, Hastings, and James A. McClain.

McDONALD, PA.—Bids are asked until Aug. 25 for constructing a storage dam for the Citizen's Water Co., as stated in our advertising columns. Engr., R. S. Smith, Carnegie Bldg., Pittsburg, Pa.; Secy., E. S. McWreath.

MILLVALE, PA.—At the election in November this place will vote on the question of issuing $5,000 in bonds for a new pump, $10,800 for a town hall, etc. H. I. Riley, Borough Solicitor. P. O., Bennett, Pa.

BALTIMORE, MD.—The council committee on health has decided that a filtration plant is necessary for the Lake Roland water supply. G. Stewart Johnston, Chn. Com.; Dr. H. H. Imholfe, Acting Chn. Com.

CUMBERLAND, MD.—E. A. Wilder, Fredonia, N. Y., has submitted a proposition to put in a filtration plant at this place, to cost about $38,000.

PALATINE, W. VA.—C. W. Walker, Asst. P. M., writes us that the city will complete the works this fall. The contract has not yet been let. Population, 1,600. Des. Engr., J. M. Prickett; Chn. Com., T. D. Harden.

PARKERSBURG, W. VA.—John V. Dunbar, Cy. Engr., writes us that this city will vote Aug. 30 on the question of issuing $35,000 in bonds for increasing the storage capacity of the reservoir and for extending the water mains, etc. No plans have yet been prepared.

DAVIDSON, N. C.—W. J. McKay, Mayesville, S. C., Pres. Bd. Trustees, Davidson College, writes us that the board has resolved to have works built at the college as quickly as possible. A committee has been appointed to secure plans and estimates. Address Prof. H. L. Smith, Chn. Water Com., Davidson, N. C.

ROME, GA.—H. M. Smith, Cy. Engr., writes us that the city is investigating the filter question, and will soon decide upon some plan. Mr. Smith writes that in the meantime those who have filters to place or plans to submit may take advantage of this opportunity. The daily consumption is about 1,500,000 gallons, river water.

DRY TORTUGAS, FLA.—Philadelphia papers state that the construction bureau, navy department, has awarded the contract for the construction of a distilling plant on Dry Tortugas Island to the Sugar Apparatus Mfg. Co., Philadelphia. This island is about 60 miles west of Key East, the extreme of the Florida keys, and has been used as a naval watering station for a number of years. An old fort is situated here, and a small garrison is generally kept on duty. S. Morris Lillie, President of the successful company, who prepared the plans for the new plant, states that it will cost about $35,000, and will have a capacity of 60,000 gallons of distilled water each 24 hours. The method is the same as that followed in a number of sugar refineries. At present the sole source of water supply is by cisterns for holding rain water.

MONTGOMERY, ALA.—The city engineer has been directed to prepare plans, etc., for covering the reservoirs of the water-works at the Court St. station. C. P. Hardaway, Cy. Clk.

LOUISVILLE, KY.—Bids are asked by the Louisville Water Co., 549 3d St., until Sept. 1 for the construction of a clear-water reservoir and filter house, grading and paving roads and disposing of waste material at Crescent Hill. Local papers state that the work will be a filtration plant, stand-pipe and pumping station. The new reservoir will be connected with the old one and will have a capacity of 25,000,000 gallons, or one-fourth the capacity of the old one. The water will pass from the present reservoir into the filter station and thence to the new tank from which it will be pumped into a stand-pipe. The passage between the reservoirs will lower the water 35 ft. below the present reservoir. Check, $10,000; bond, $100,000. Chas B. Long, Pres.

CHARDON, O.—H. O. Bostwick, Mayor, writes us that the subject of works to be owned by the village is being considered. No definite steps have been taken in the matter as yet.

CINCINNATI, O.—Bids are asked until Aug. 19 for furnishing such supplies as may be required by the water department for the year ending Jan. 1, 1899. A. B. Battermann, Pres. Bd. City Affairs.

AUBURN, IND.—We are informed that this place is still considering the question of works.

ALLEGAN, MICH.—The question of a new pump and pumping station, to cost about $20,000, is being considered. Trustee Priest may be addressed.

BAY CITY, MICH.—Bids are asked by the city clerk until Aug. 22 for laying new 6-in. water mains in Walnut St.

MOUNT PLEASANT, MICH.—Chas. M. Brooks, Mayor, writes us that the council is considering the question of overhauling and enlarging the works. Nothing definite has been decided upon as yet. The cost will be about $20,000 for improving the works alone or $28,500 with an electric light plant added.

CHICAGO, ILL.—Bids are asked until 11 a. m., Aug. 18, for furnishing such special castings for water pipe as may be required during the year ending July 31, 1899; check, $500. L. E. McGann, Comr. Pub. Wks.

DUBUQUE, IA.—We are informed that nothing definite has been done in regard to the city purchasing the works of the Dubuque Water Co. The city is figuring with the company with a view to buying the works. E. C. Blake, Cy. Engr. Press reports state as follows: As the outcome of the bad water recently furnished this city by the water company, the council has revoked the company's charter. The minor stockholders of the company have made a proposition to the council looking towards a permanent improvement of the plant with a cheapening of the cost to the consumers.

NEW SHARON, IA.—Jackson & Moss, Des Moines, Ia., have begun the construction of the proposed works, to cost $8,500, according to reports.

OSAGE, IA.—Chas. Kathan, Mayor, writes us that at the election held Aug. 5 this place decided to put in works by a vote of 5 to 1. The supply will be secured from deep wells. An elevated tank will probably be erected. There will be two wells with complete pumping outfit. Nearly five miles of mains will be laid and 50 hydrants set. The contract for wells has been let. It is expected to advertise for a tank and mains in a few days; estimated cost, $25,000. J. P. Williams, Chn. Com.

LANESBORO, MINN.—Bids are asked until Sept. 1 for furnishing and laying about 10,000 ft. of 4 to 8-in. water pipe, etc. Engr., Geo. Bradish, La Crosse, Wis.; Clk., O. M. Habberstad.

NEW PAYNESVILLE, MINN.—M. S. Elliott, Recdr., writes us that the following bids were received Aug. 8 for furnishing and building works and an electric light plant; P. C. Pilon, Village Pres.:

Daniel W. Mead, Rockford, Ill.	$9,790
Patrick Doherty, St. Paul	9,571
Fairbanks, Morse & Co., St. Paul, Minn.	10,149
W. I. Gray, Minneapolis (accepted)	9,144

DEADWOOD, S. DAK.—The council has accepted the proposition to secure an additional water supply from Gayville. A dam 75 ft. long and 6 ft. high will be built at once, according to reports. Mayor Star, Alderman Treber, Chn. Com., and F. C. Tucker, Cy. Engr., may be addressed.

LINCOLN, NEB.—The council has voted that water meters must be used by all consumers of water. Local papers state that about 2,000 meters will be required.

WELLINGTON, KAN.—B. F. Evans, Newton, Kan., has been awarded the contract to sink a test well for the proposed new municipal works, to cost about $125,000.

SEDALIA, MO.—Eastern parties are reported to have purchased the works of the Sedalia Water & Light Co. It is stated that the works will be improved and that a better and increased water supply will be furnished. Col. O. A. Crandall is interested in the new company.

WEBSTER GROVES, MO.—The council, it is reported, will soon ask for bids for the purchase of $5,000 of 20-year 5% bonds for the proposed works; the supply to be secured from the St. Louis works.

McKINNEY, TEX.—Press reports state that bids will soon be asked by the council for furnishing and constructing the proposed works, the bonds for which have been sold; estimated cost, $18,000. J. M. Pearson, Mayor.

GUTHRIE, OKLA.—G. M. De Groff, Cy. Clk., writes us that the two bids received July 5 for furnishing a new water supply have been rejected.

SHAWNEE, OKLA.—Another election will be held Sept. 2 to vote on the question of building works, to cost about $10,000. Benj. Diesker, Cy. Clk.

ALTMAN, COLO. — Press reports state that William Gillpatrick, formerly connected with the Altoona Light, Water & Power Co., has purchased the works from John A. Brod & Co. and will at once begin extending the water mains from Middle Beaver Creek to the towns of Goldfield and Independence.

FLORENCE, COLO.—P. M. McGuire, Mayor, writes us that Hiram Phillips, Oriel Bldg., St. Louis, Mo., is making a survey and plans for the proposed gravity works. Population, 4,500.

SEATTLE, WASH.—Capt. W. W. Robinson, Jr., Assist. Q. M. in charge of the construction of the army post, has issued a call for bids for the construction of 2,200 ft. of 6-in. water main from the east line of the army post to the site of the buildings. The main will connect with the main now being laid by the city to the post.

SEATTLE, WASH.—The council has voted to direct the judicial committee to prepare a resolution directing the board of public works to ask for new bids for constructing the Cedar River water-works addition.

WASCO, ORE.—The council is reported to have voted to build works at a cost of about $2,500.

SAN FRANCISCO, CAL.—The Spring Valley Water-Works Co. has voted to issue $4,000,000 in 4% bonds. The bonds will be issued under a third mortgage, to bear date Sept. 1, 1898, payable in eight years from date. It is said that the company proposes to use the money thus obtained for the erection of pumping works deemed now to be necessary owing to the recent drouth.

WILLOWS, CAL.—Bids are asked until Sept. 5 for furnishing and installing a water tank, etc., at the county hospital. Clk., W. H. Sale.

PHOENIX, ARIZ.—We are informed that this city contemplates the erection of municipal works. There will be 16 miles of 6 to 20-in. cast-iron water pipe, a pumping station of 4,000 gallons a minute, an elevated tank, 35 ft. in diameter and 50 ft. in height, placed on a 100-ft. steel framed base. Plans, specifications, etc., are being prepared by Ernest Abs Hagen, 338 Byrne Bldg., Los Angeles, Cal., and Hotel Adams, Phoenix. Mayor, J. C. Adams.

SUTTON, QUE.—C. A. Tartre, Secy. Treasury, writes us that the proposed works are being built by the city at a cost of about $13,000. Population, 800.

RIVER DU LOUP, QUE.—It is reported that this place will soon begin the construction of the proposed works. Engr., Walter Shanley, St. Lawrence Hall, Montreal, Que.

IRRIGATION.

CANON CITY, COLO.—A. A. Maclean and Herman H. Dunham are to construct a canal along Beaver Creek, about six miles long and 12 ft. wide, to irrigate about 22,000 acres in Tremont county.

DUPUYER, MONT.—Reports state that M. S. Darling, Fort Benton, is making surveys and estimates for an irrigation system from Birch Creek to the lower Dupuyer River. W. G. Conrad, Kyle Brice and C. E. Conrad, of Great Falls, Mont., are interested.

NEW COMPANIES.—North Loup Improvement Co., Loup City, Neb.; $3,000; J. P. Goodrich, A. T. Jones and George E. Johnson, North Platte, and C. E. Coffin, Lincoln.

SEWERAGE

BROOKLINE, MASS.—Jos. Driscoll has been awarded the contract for building a main sewer in Beacon St. at $1,855.

CLINTON, MASS.—Bids are asked until Sept. 1 for constructing sections 1 and 2 of the system, reservoir, pumping station, etc., as described in our advertising columns. Wm. N. Davenport, Secy. Metropolitan Water Bd., 3 Mt. Vernon St., Boston.

NEW BRITAIN, CONN.—M. O. Webster, Mayor, writes us that the question of sewage disposal is being investigated. No decision has been arrived at as to what changes will be made. The city has 27 miles of sewers, with outlets discharging into streams. Consult. Engr., Samuel M. Gray, Providence, R. I.; Clk., G. C. Dunham.

SOUTH NORWALK, CONN.—Jos. R. Taylor, Cy. Clk., writes us that the city will construct a 24-in. overflow storm water sewer to relieve the sewers in the lower portion of the city; estimated cost, $500.

COHOES, N. Y.—Prof. Palmer C. Ricketts, Troy, N. Y., engaged by the public improvement commission to judge the plans received for the system of sewerage, has recommended to the commission the plan signed I. X. L. By this plan most of the present sewers can be used. Those in the central part of the city run into a main along the Mohawk River and across that stream diagonally from the foot of Cedar St. to Bridge Ave., then along the east bank of the Mohawk to an outlet at the end of Locust Ave. In the future, if necessary, the city could build the sewer to an outlet at the south end of Adams Island. The sewers in the southern part of the city would empty into a main in Eagle's Nest ravine and empty at the foot of the ravine. The plan would also drain the north end of the island into the Mohawk River at a point above Buttermilk Falls, and the southern part into the Ship St. sewer. This would use some of the old sewers, including the ravine sewer. In this plan there are ten miles of new sewers in the separate system, one mile of new sewers in the combined and 5.4 miles of old sewers. Estimated cost, $127,792.

HUDSON, N. Y.—Bids are asked until Aug. 25 for constructing a 10-in. pipe sewer in Columbia St. W. S. Hallenbeck, Cy. Clk.

LANCASTER, N. Y.—This place voted against appropriating $1,200 for plans for the proposed system.

LITTLE FALLS, N. Y.—S. E. Babcock, Cy. Engr., writes us that surveys have been ordered for sewers on the south side of the Mohawk River and Erie Canal. Work cannot begin until canal navigation is closed. There will be required about three miles of 24 to 8-in. pipe sewer in rock.

LONG ISLAND CITY, N. Y.—James H. Johnson, Engr., Sewer Dept., Queens Borough, is preparing plans, etc. for relaying about 3,320 ft. of 24-in. pipe sewer in Jamaica. It is probable that bids will be asked in a few days. Other sewer work is also proposed.

NEW YORK, N. Y.—Bids are asked until Aug. 24 for repairing the wooden box sewer at 42d St., North River. M. F. Donohue, Acting Comr. of Sewers, 265 Broadway.

SCHENECTADY, N. Y.—Bids are asked until Aug. 22 for constructing about 7,100 ft. of 10 and 8-in. pipe sewers. John Allen, Chn. Com.

SYRACUSE, N. Y.—The council is arranging for the construction of a $50,000 trunk sewer in Midland Ave., to drain the southern portion of the city.

WESTFIELD, N. Y.—The question of building a system will be delayed until next year. Samuel C. Crandall, Pres. Village.

JERSEY CITY, N. J.—Bids are asked until Aug. 24 for constructing 310 ft. of 36-in. brick oval sewer and 1,050 ft. of 18-in. pipe sewer, etc. Geo. T. Bouton, Clk. Bd.

KEARNEY, N. J.—Bids are asked until Aug. 23 for building pipe sewers in one street, and also until Sept. 13 for building 5,200 ft. of brick trunk sewer in this city, as described in our advertising columns. W. S. Logan, Township Surv., Arlington, N. J.; Wm. J. Gorsuch, Chn.; J. F. Kelly, Clk.——Plans are being prepared for the sewering of a portion of the northeasterly section of the township.

STOCKTON, N. J.—The council has been petitioned to build sewers. Town Surveyor Thomson and City Clerk Abbott may be addressed.

TRENTON, N. J.—The council has voted to build sewers in certain streets. C. Edward Murray, Cy. Clk.

WOODBRIDGE, N. J.—The question of building a system is being considered, according to reports.

CARNEGIE, PA.—Bids are asked until 12 m., Aug. 18, for constructing 1,000 ft. of 5-ft. brick storm sewer. R. J. Hardy, Clk.

CRAFTON, PA.—Bids are asked until Aug. 23 for constructing about 476 ft. of 8-in. pipe sewer, etc., and for the purchase of $19,500 of 4% bonds for sewers, etc. Engr., F. A. McDonald, Penn Bldg., Pittsburg, Pa.; Clk., R. H. Thomson.

NEW KENSINGTON, PA.—Bids are asked until Aug. 22 for constructing about 13,000 ft. of 24 to 6-in. pipe sewers. Address the borough engineer, at 78 Fidelity Bldg., Pittsburg, or J. C. Reed, Chn. Com.; W. D. Snyder, Secy.

PITTSBURG, PA.—The question of building brick and pipe sewers in certain districts of the city is being considered. Wm. R. Brown, Cy. Engr.; S. T. Paisley, Supt. Dept. Highways and Sewers.

PITTSTON, PA.—J. C. Farren & Co., Wilkes-Barre, Pa., have been awarded the contract, at $3,423, for building a sewer in Broad St.

READING, PA.—Bids are asked until Aug. 18 for constructing a storm sewer in 12th St. S .S. Hoff, Cy. Engr.

SLATINGTON, PA.—The council has rejected the bids recently received for building about 1,000 ft. of 30 and 24-in. pipe sewer, and will now do the work itself at a cost of about $2,000.

SOMERSET, PA.—The question of issuing $25,000 in bonds for a system is being considered.

WILKINSBURG, PA.—Bids are asked until Aug. 22 for constructing a 24-in. pipe sewer, culverts, etc. Frease & Spearling, Borough Engrs.

WASHINGTON, D. C.—The district commissioners have authorized the following work: Construct sewer in O St., N. W., between 35th and 36th Sts.; in 36th St., between O and P, and in P between 35th and 36th; estimated cost, $3,400. On Meridian St., between Huron St. and Columbia Road; estimated cost, $2,900.

ATLANTA, GA.—The county commissioners have asked the city to co-operate with the county in the building of new sewers.

LEXINGTON, KY.—Bids will soon be asked by the city clerk and mayor for building 1,800 ft. of 27-in. pipe sewer in East Main St., at the C. & O. R. R. crossing.

CINCINNATI, O.—Bids are asked until Aug. 25 for constructing sewers in Follett St. Geo. H. Spellmire, Clk. Bd. City Affairs.

HAMILTON, O.—Reuben R. Marble, Columbus, O., is reported to have been engaged to report on the best plan for sewers in the Market St. district.

NAPOLEON, O.—James P. Rago, Mayor, writes us that plans for a system are being prepared by Riggs & Sherman, The Nasby, Toledo, O.

NILES, O.—The question of new sewers is being considered, according to reports.

SANDUSKY, O.—It is proposed to build sewers in certain streets. A. W. Miller, Cy. Clk.

TOLEDO, O.—Bids are asked until Aug. 29 for constructing 15-in. pipe and 24-in. brick sewers in certain streets. L. P. Harris, Cy. Clk.

WELLSVILLE, O.—An election will soon be held to vote on the question of building a system to cost about $75,000. Mayor Dennis and Clerk Wells may be addressed.

YOUNGSTOWN, O.—The board of health has voted to urge the council to take steps towards improving the system.——Dr. W. L. Buechner, of the board of health, has recommended that an engineer be engaged to plan a complete reconstruction of the system.

FORT WAYNE, IND.—It is probable that a sewer will soon be built in South Wayne, a suburb about to be annexed to this city.

INDIANAPOLIS, IND.—Bids are asked until Aug. 22 for constructing sewers in several streets. M. A. Downing, Pres. Bd. Pub. Wks.

KOKOMO, IND.—A. W. Smith, Cy. Engr., informs us that the council has passed a resolution to construct a 4-ft. brick sewer, about 3,500 ft. long. The ordinance will be introduced Sept. 12.

OWOSSO, MICH.—Riggs & Sherman, The Nasby, Toledo, O., have been engaged to superintend the construction of the system.

CHICAGO, ILL.—The board of local improvements proposes to build a sewer in the 95th St. district to drain about 10,800 acres; estimated cost, $1,500,000, and also for improving the pavement on Archer Ave. for three miles at a cost of about $500,000.

KEWANEE, ILL.—Bids are asked until Aug. 23 for constructing sewage disposal tanks. Jno. H. Pierce, Pres. Bd. Local Improvements. The contract for building the system has been let to Munn & Eagan, Nebraska City, Neb., at $24,894.

MONTICELLO, ILL.—The board of local improvements has voted to build a sewer in North State St. Councilman H. D. Peters and J. A. Bender may be addressed.

MURPHYSBORO, ILL.—Bids are asked until Aug. 19 for laying sewer pipe in certain streets. J. L. Ashman, Cy. Clk.

VENICE, ILL.—It is stated that the village authorities have employed two engineers to make surveys for the proposed chain of sewers, connecting Granite City, Newport, Madison and Venice, and it is estimated that the cost of building the sewers will be about $30,000.

COUNCIL BLUFFS, IA.—Bids are asked until Aug. 22 for constructing a storm sewer. N. C. Phillips, Cy. Clk.

WHITE EARTH, MINN.—It is stated that plans for sewers and water-works at the White Earth Indian school have been completed, and will be submitted to the secretary of the interior, Washington, D. C., for approval this week.

LAWRENCE, KAN.—Bids are asked until Aug. 22 for constructing lateral sewers and for curbing. A. G. Honnold, Cy. Clk.

KANSAS CITY, MO.—Bids are asked until Aug. 22 for constructing a pipe sewer in district No. 11; check, $200. ——The board of public works has approved plans for the Vine St. sewer, to cost about $5,000.——Plans for the Westport sewerage system will be completed about Oct. 1. Henry A. Wise, Cy. Engr.

JOPLIN, MO.—An election will be held Aug. 23 to vote on the question of issuing $30,000 in bonds for extending the system.

ST. JOSEPH, MO.—The council has voted to extend the Blacksnake sewer. P. J. Kirschner, Mayor.

SHERMAN, TEX.—C. P. Gregory, Chn. Com., writes us that the council has done nothing as yet in regard to the proposed sewers. It is waiting to hear from eastern contractors.

DENVER, COLO.—Plans are reported as being prepared by H. C. Lowrie, Engr. Bd. Pub. Wks., for a storm sewer to drain 2,000 acres.

PUEBLO, COLO.—Bids will probably soon be asked by the council for building a system for Ward No. 8, Bessemer. Plans prepared by City Engineer E. W. Hathaway have been accepted. The next council meeting will be held Aug. 29. Mayor Orman may be addressed.

BILLINGS, MONT.—Bids are asked by the city clerk until Sept. 6 for furnishing the material and for constructing a system, plans for which were prepared some years ago by Geo. K. Reider, Helena, Mont. Population, 12,000.

NEVADA CITY, CAL.—The trustees will soon take steps to provide the city with a system; estimated cost from $30,000 to $40,000.

POMONA, CAL.—C. P. Patterson, Pres. Bd. Trustees, writes us that an initial movement is being made for the proposed system.

SAN LUIS OBISPO, CAL.—William Shipsey, Chn. Bd. of Trustees, informs us that the city engineer has prepared plans for a system; estimated cost, $36,000. An election will be held Sept. 5 to vote on the question of issuing bonds.

PHOENIX, ARIZ.—We are informed that it is proposed to build a separate system. On account of the level country, the system will require pumping and sewage disposal works. Des. Engr., Ernest A. Hagen, Hotel Adams, Phoenix, and Byrne Bldg., Los Angeles, Cal.

STRATFORD, ONT.—W. F. Van Buskirk, Cy. Engr., has submitted a report on sewage purification, in which he recommends the adoption of a system of filtration. He estimates the cost as follows: Two tanks (90 × 30 ft.), with necessary valves, screens and discharge pipes, $7,400; sludge well, $600; seven filters (100 × 60 ft.), with pipes, valves, etc., $9,860; outlet pipe from beds, $1,215; incidentals and engineering, $1,907.

TORONTO, ONT.—The residents of Parkdale are considering the question of a sewage disposal plant, to cost about $30,000. A committee has been appointed to visit certain cities in Massachusetts to investigate methods of sewage disposal. Alderman J. J. Graham, F. W. Monteith and Mr. Saunders, of the board of works, may be addressed.

GARBAGE DISPOSAL—STREET CLEANING

NEW YORK, N. Y.—Bids are asked until Aug. 26 for the unloading of deck scows of the department at Riker's Island. Jas. McCartney, Comr. St. Cleaning, 346 Broadway.

ROCHESTER, N. Y.—Local papers state that the board of health will soon have to consider the question again of garbage disposal.

UTICA, N. Y.—The council has passed over the mayor's veto the ordinance awarding the garbage disposal contract to Henry Staffenbach, at $6,500 a year, for 10 years.

ATLANTIC CITY, N. J.—Sylvester Leeds has been awarded the contract for collecting and removing the garbage for the next five months at $4,400. The contract for removing garbage from the city wharf in scows until Jan. 1 was awarded Aug. 8 to Wallace Smith at 50 cts. per ton of 2,240 lbs.

ERIE, PA.—F. Hanlon, Cy. Clk., writes us that the city has under consideration the question of the disposal of garbage, and action has been taken to make an appropriation of $10,000 for the erection of a crematory.

WILMINGTON, DEL.—The contract for removing ashes for the year from Sept. 1 has been let to Jos. B. Stidham at $7,200.

FORT THOMAS, KY.—Major Hall, commanding, at Fort Thomas, has recommended to the war department that a crematory be built.

MILWAUKEE, WIS.—The commissioners of public works received the following bids Aug. 12 for furnishing and installing a garbage disposal plant: Engle Sanitary & Crematory Co., $52,500 and $63,500; F. C. Gross and Joseph Schaaf, $58,500; F. H. Kratzer, $53,700; Dixon Garbage Crematory Co., $58,000; Gorman Bros., $61,000; Jacob Jacobi (no bond), $79,019. Local papers state as follows: The bid of F. C. Gross and Joseph Schaaf is to sell the Wisconsin Rendering Co.'s plant at Mequon, which, it is said, can reduce 100 tons of garbage a day by the Merz system, at a cost not to exceed 22 cts. a ton. This was accompanied by an offer to enter into a contract with the city for the disposal of garbage, delivered at the plant, for $14,500 a year, or delivered on board boat or cars in the city for $22,000 a year. As the specifications call for the erection of a plant on Jones Island, it is not likely that this bid will be considered. The Engle Sanitary & Crematory Co., of Des Moines, Ia., guarantees that the cost of disposing of garbage will not exceed 32½ cts. a ton, that not over 200 lbs. of coal for each ton of garbage cremated will be used, and that it will require not more than six men to operate the plant. For $9,000 additional the company offers to furnish power for the pumping station. The bid of F. H. Kratzer, 140 Reed St., is to dispose of garbage by the Pattitz system. It sets forth that one ton of coal will be required to dispose of 10 tons of garbage, and that five employees can operate the plant. Gorman Bros., Toledo, O., propose to put in the Smead system. They say a force of nine men will be required and 300 lbs. of coal to a ton of garbage. The Dixon company, Toledo, guarantees that not more than 240 lbs. of coal will be used in the cremation of a ton of garbage, and that 16 men will be sufficient.

STREETS AND ROADS.

PORTLAND, ME.—Bids are asked until Aug. 19 for furnishing about 2,500 sq. yds. of granite paving blocks. Geo. N. Fernald, Comr. Pub. Wks.

LUNENBURG, MASS.—Bids are asked until 12 m., Aug. 18, for building 2,300 lin. ft. of state highway. T. C. Mendenhall, Chn. Massachusetts Highway Comn., Boston.

REVERE, MASS.—Bids are asked until Aug. 22 for 9,000 cu. yds. of grading, 16,000 cu. yds. of filling, 750 lin. ft. of drain, 2,600 sq. yds. of broken stone, etc., in Revere parkway. Edwin B. Haskell, Park Comr.; Wm. T. Pierce, Engr.

WILLIAMSTOWN, MASS.—Bids are asked until 12 m., Aug. 18, for constructing 3,800 lin. ft. of highway. T. C. Mendenhall, Chn. Massachusetts Highway Comn., Boston.

SOUTH NORWALK, CONN.—Jas. R. Taylor, Cy. Clk., informs us that a contract has been awarded to W. R. Johnson, at $10,000, for brick paving on South Main St.

BUFFALO, N. Y.—The board of supervisors has voted in favor of macadamizing the White Corners Road at a cost of $36,400.

GLENS FALLS, N. Y.—Bids are asked until Sept. 5 for furnishing the material and for constructing a brick pavement, as stated in our advertising columns. G. P. Slade, Cy. Engr.; W. M. Cameron, Clk.

LANSINGBURG, N. Y.—Bids are asked until Aug. 22 for about 50,854 sq. yds. of macadam pavement and 22,840 lin. ft. of curbing. Chas. A. Roemer, Village Engr.; F. M. Miter, Clk.

LE ROY, N. Y.—The board of trustees has decided to purchase a new stone crusher, according to reports.

SCHENECTADY, N. Y.—Ordinances have come before the council for brick paving in three streets and macadamizing in North St.; also a petition for grading, curbing, etc., in Hamilton St. Louis R. Sebring, Cy. Engr.

HASBROUCK HEIGHTS, N. J.—Bids are asked until Sept. 6 for the purchase of about $13,500 of 4% paving bonds, etc. G. H. Ramsden, Borough Clk.

JERSEY CITY, N. J.—Bids are asked until Aug. 24 for about 1,000 cu. yds. of excavation, 4,400 sq. yds. of macadam, 2,175 lin. ft. of curb, etc., on Pearsall Ave. Geo. T. Bouton, Clk. St. Comrs.

KEARNEY, N. J.—Contracts have been awarded for the improvement of two streets. Wm. J. Gorsuch, Chn., Arlington. Wm. S. Logan, Township Surv., 160 Midland Ave., Arlington, N. J.

NEWARK, N. J.—Bids are asked until Aug. 25 for paving and repaving in portions of Fulton St. and six other streets with 45,000 sq. yds. of sheet asphalt. M. F. McLaughlin, Gen. Supt. St. and Water Comrs.

PATERSON, N. J.—Bids are asked until 8 p. m., Aug. 19, for grading and macadamizing portions of 17 roads. Wilson M. Lawson, Chn. Com.; Geo. U. Botbyl, Clk. Bd. Freeholders.

RAHWAY, N. J.—The council will have Seminary St. macadamized at a cost of about $2,000.

VINELAND, N. J.—Bids are asked by the council for paving Landis Ave., according to reports.

WOODBURY, N. J.—Geo. S. Pierson, of the committee, informs us that the board of freeholders at a meeting held July 21 received a petition for macadamizing about three-fourths of a mile in Broad St. Wm. M. Carter has been appointed to prepare plans, etc.

CARBONDALE, PA.—Bids are asked until Aug. 24 for 6,480 sq. yds. of brick paving, as stated in our advertising columns. F. B. Clifford, Cy. Clk.

MILTON, PA.—An ordinance has been passed to pave Broadway and Front St. with brick. W. K. Wertman, Pres.; Wm. C. Miller, Clk.

EASTON, PA.—C. H. Lutzens & Sons have submitted the lowest bid for macadamizing in nine streets, at $47,932.

NEW KENSINGTON, PA.—Bids are asked until Aug. 22 for paving and curbing portions of Fifth Ave. J. C. Reed, Chn. Com.; W. D. Snyder, Secy.

PHILADELPHIA, PA.—Bids are asked until Aug. 23 for repaving certain alleys with brick. Benj. Lee, Health Officer, City Hall.

READING, PA.—Bids are asked until 3 p. m., Aug. 18, for 13,000 lin. ft. of curbing and 41,500 sq. yds. of asphalt paving. S. S. Hoff, Cy. Engr.; H. H. Hammer, Clk.

WASHINGTON, PA.—Bids are asked until Aug. 22 for grading and brick paving. J. N. White, Secy.

BALTIMORE, MD.—W. E. Reilley, Chester, Pa., has been awarded a contract for furnishing the Standard Lime & Stone Co. with 100 car loads of crushed stone for repaving Edgmont Ave.

ROCKVILLE, MD.—W. W. Welsh, County Clk., informs us that the following bids, received Aug. 10, for macadamizing, advertised in Engineering News July 28, have been rejected:

Owen Patterson & Co., 1302 John St., Baltimore	$55,500
B. D. Pierce, Jr., Co., Bridgeport, Conn.	52,000
Shea & Gunnell, Lay Hill, Md	37,700

WESTMINSTER, MD.—The council has decided to spend $3,000 for macadamizing in Main St.

WASHINGTON, D. C.—Bids are asked by the district commissioners until Aug. 27 for grading in certain streets, as stated in our advertising columns.

MONTGOMERY, ALA.—The council has awarded a contract to the Coaldale Brick & Tile Co., Birmingham, for furnishing and laying 1,350,000 brick, at a cost of about $25,000.

CARTHAGE, O.—Bids are asked until Sept. 6 for the improvement of the Hamilton pike road. E. F. Layman, Village Engr.; L. Hall, Clk.

CINCINNATI, O.—Bids are asked until Aug. 29 for macadamizing and improving Red Bank Ave. R. P. Butterfield, Clk. Bd. Cy. Affairs.

CLEVELAND, O.—Bids are asked until Aug. 31 for seven-eighths of a mile of grading and paving, on the Ridge Road. Julius C. Dorn, Clk. County Comrs.——Bids are asked until Sept. 7 for grading, draining and brick paving in East Madison Ave. Geo. R. Warden, Dir. Pub. Wks.

FREMONT, O.—Bids are asked until Sept. 5 for brick paving, etc. R. J. Christy, Chn. Com.

LIMA, O.—Bids are asked until Aug. 19 for macadamizing in Shugar Alley. C. E. Lynch, Cy. Clk.

MANSFIELD, O.—Bids are asked until Sept. 10 for improving portions of Lexington Ave., East Johns St., Marion Ave. and West Ave. F. M. Remy, Cy. Clk.

SPRINGFIELD, O.—Resolutions have been passed to grade and gravel portions of ten streets. W. F. Bauer, Pres.; Philip Huonker, Cy. Clk.

TOLEDO, O.—Bids are asked until Sept. 12 for furnishing the material and for paving portions of Knower and Rockingham Sts. with Buckeye blocks, etc. L. P. Harris, Cy. Clk.

WARREN, O.—Bids are asked until Aug. 23 for about 1,100 sq. yds. of brick paving. E. P. Dickey, Cy. Engr.

YOUNGSTOWN, O.—F. M. Lillie, Cy. Engr., informs us that bids will be asked about the middle of September for about 7,800 sq. yds. of sheet asphalt or block pavement, on Scott St.; estimated cost, $20,000.

SHOALS, IND.—Bids are asked until Sept. 8 for constructing eight sections of macadam roads. Horation Harrymann, County Audr.

COLUMBUS, IND.—Bids are asked until Aug. 19 for constructing 6½ miles of gravel roads. H. C. Harris, Chn. County Comrs.

INDIANAPOLIS, IND.—Bids are asked until Aug. 22 for brick paving, etc., in portions of Pawnee, Arizona and Sterling Sts. M. A. Downing, Chn. Bd. Pub. Wks.

KOKOMO, IND.—A. W. Smith, Cy. Engr., informs us that 12,000 sq. yds. of brick paving will be laid. Bids will be asked later.

RICHMOND, IND.—Bids are asked until Sept. 2 for constructing a brick walk, stone curbing, etc., in Main St. Jas. H. Winder, Clk.

DETROIT, MICH.—The board of public works is considering the question of paving Second Ave. with asphalt, at a cost of about $40,000.

CHICAGO, ILL.—Bids are asked until Aug. 24 for building a slag roadway 8 ft. wide, from 114th St. to Hegewisch. L. E. McGann, Comr. Pub. Wks.

MATTOON, ILL.—Bids are asked until Aug. 30 for 10,522 sq. yds. of brick paving, 4,098 lin. ft. of curbing, catch-basins, etc. A. C. Loomis, Cy. Engr.; Jno. F. Scott, Pres.

MOUND CITY, ILL.—Bids are asked until Aug. 24 for repairing the Mound City national cemetery roadway. Maj. T. E. True, Depot Q. M., Washington, D. C.

QUINCY, ILL.—Bids are asked until Aug. 20 for paving five alleys. Address Secretary Heckle, Bd. Local Improvements.

DES MOINES, IA.—Bids are asked by the board of public works until Aug. 22 for about 15,000 sq. yds. of brick paving and curbing.

MINNEAPOLIS, MINN.—A portion of University Ave. will be paved with brick. Address Alderman Lane.

ST. PAUL, MINN.—Bids are asked until Sept. 5 for constructing a macadam road on Rice St., etc. D. M. Sullivan, County Audr.

MILWAUKEE, WIS.—The commissioners of public works have advertised for bids for the laying of asphalt pavement on several streets in the 18th Ward. The work must be completed within 30 days after the contracts are awarded.

OMAHA, NEB.—Bids are asked until Aug. 31 for about 35,000 cu. yds. of grading. D. M. Haverly, County Clk.

KANSAS CITY, MO.—Bids are asked by the park board until Aug. 24 for macadamizing the Paseo drives.

KANSAS CITY, MO.—Bids are asked until Aug. 22 for constructing stone sidewalks and paving a number of streets with brick. H. A. Wise, Cy. Engr.

MARSHALL, MO.—Bids are asked until Aug. 29 for 24,300 sq. yds. of macadam paving, 18,000 lin. ft. of curbing, etc. A. R. James, Cy. Clk.

TACOMA, WASH.—Reports state that the county commissioners have ordered surveys to be made for a wagon road, about 22 miles long.

LOS ANGELES, CAL.—Bids are asked until Aug. 20 for grading the Santa Monica and Malibu Coast Road. T. E. Newlin, County Clk.

OAKLAND, CAL.—Bids are asked until Aug. 22 for macadamizing in 20th St. and East 18th St. J. W. Tompkins, Cy. Clk.

OWEN SOUND, ONT.—Reports state that an election will be held Aug. 25 to vote on the question of borrowing $10,000 for macadamizing, and for the purchase of a steam road roller.

MANUFACTURING PLANTS.

AUBURN, ME.—E. O. Wells & Co., of Auburn, have been awarded the contract to build a 4-story factory, 136 × 80 ft., for the Turner Center Dairying Association.

BOSTON, MASS.—The New England Sanitary Product Co. is erecting at Old Harbor Point, near Boston, an absolutely fire-proof 2-story building, 120 × 130 ft., with skeleton steel framework, consisting of steel columns built in the walls, carrying heavy steel floor beams and girders and clear span roof trusses which support the roof. The structural steel work in this plant was designed and is being furnished and erected by the Berlin Iron Bridge Co., of East Berlin, Conn.

BRIDGEPORT, CONN.—It is reported that the Union Metallic Cartridge Co. will build an extension to its factory, at a cost of $50,000.

DOLGEVILLE, N. Y.—It is reported that Armour & Co. have decided to enlarge the felt works at this place, which have recently been bought by them.

NEW BRIGHTON (S. I.), N. Y.—The Kings Patent Plaster Mills, at New Brighton, Richmond Borough, was burned Aug. 6, causing damage estimated at $100,000.

DUBOIS, PA.—The contract for rebuilding the J. Mahler glass warks, which were destroyed by fire on June 25, has been awarded to a Pittsburg firm, according to reports.

EATON, PA.—Bids are asked by the Seitz Brewing Co. until Aug. 30 for erecting a new brewery on Bushkill St. Pres., John A. Seitz.

LANCASTER, PA.—It is reported that the Lancaster Board of Trade has offered a site of 14½ acres, and the necessary bricks for the building of a large steel plant, which Charles James, of Tacony, Pa., formerly connected with Disston Sons' steel plant, at Tacony, and a number of Philadelphia and New York capitalists propose locating here. It will be called the Lancaster Steel Co., and is to have a capital of $400,000, of which sum the people of Lancaster are asked to subscribe $100,000.

EDENTON, N. C.—The Edenton Cotton Mfg. Co., of Edenton, was incorporated with a paid-up capital stock of $80,000 Aug. 15, by C. S. Vann, W. D. Pruden, F. A. White, C. T. Falk and others. The company expect to build and equip at once a spinning and cotton mill at Edenton. No contracts have been let.

SKYCO, N. C.—The Consolidated Ice Co. was incorporated in this state Aug. 15 with a paid-up capital of $5,400, to establish and operate an ice plant at Skyco. The incorporators are W. S. C. Pugh, R. C. Evans, E. R. Daniels, and W. P. Lemon.

CINCINNATI, O.—Reports state that the Lodge & Shipley Tool Co. will soon erect a new plant on Colerain Ave., near Elam St., to be 300 × 100 ft., and to cost about $50,000. Pres., William Lodge.

NORWALK, O.—The plant of the Sprague Umbrella Co. was burned Aug. 9, causing a loss of about $75,000; insurance, $52,500. The building was a 2-story frame structure, 42 × 150 ft., with a wing 32 × 100 ft.

PAINESVILLE, O.—The plant of the Robison Basket Co. was destroyed by fire Aug. 7, causing a reported loss of $100,000; insurance, $55,000.

CHICAGO, ILL.—A fire in this city Aug. 12 damaged the factory of the American Cutlery Co., at 173 to 193 Mather St., causing a reported loss of $75,000.

PUEBLO, COLO.—A fire in this city damaged the plant of the Central Ore Sampling Works; estimated loss, $25,000.

FLAGSTAFF, ARIZ.—The sawmill and box factory of the Arizona Lumber & Timber Co. were destroyed by fire Aug. 2, causing a loss of about $75,000; insurance, $35,000.

MONTREAL, QUE.—The rolling mill, nail mill and lock mill of Peck, Benny & Co. were burned Aug. 3, causing a reported loss of $100,000; fully insured.

GAS PLANTS.

TORRINGTON, CONN.—It is reported that the Torrington Electric Light Co. is considering the question of installing a gas plant, and will increase the capital stock from $24,000 to $100,000.

WILLIAMSPORT, PA.—Reports state that the Williamsport Gas Co. is considering the question of extending its plant. Address Jay W. Lane.

BOONE, IA.—It has been voted to allow a company to construct a gas plant.

LITTLE ROCK, ARK.—Plans have been completed for the extension of mains through North Little Rock, according to reports. Address Manager Pullen.

SAN BERNARDINO, CAL.—The county supervisors want estimates for installing a plant to furnish gas for the court house and jail, to cost about $1,000.

MISCELLANEOUS CONTRACTS.

ENGINEER.—Berlin, Ont.—The clerk is advertising for a town engineer.

RETAINING WALL.—Troy, N. Y.—Bids are asked until 11 a. m., Aug. 19, for constructing a retaining wall on Harrison Place. E. Ogden Ross, Secy.

FIRE ENGINES.—Racine, Wis.—Reports state that the city has decided to purchase steam fire engines.

BONDS.—Los Angeles, Cal.—Bids are asked until Sept. 19 for the purchase of about $300,000 of 4% city bonds. C. H. Hance, Cy. Clk.

BONDS.—St. Paul, Minn.—Bids are asked until Aug. 20 for the purchase of $50,000 of 10-year 3½% county bonds. D. M. Sullivan, County Audr.

BONDS.—Taunton, Mass.—Bids are asked until 12 m. Aug. 18 for the purchase of $70,000 of 4% bonds. Edward Mott, Chn. County Comrs.

DRY DOCK.—West Superior, Wis.—It is reported that the American Steel Barge Co. is arranging for the construction of a new dry dock.

GUN FORGINGS.—Washington, D. C.—Bids are asked until Aug. 24 for furnishing 4-in. and 14-lb. gun forgings. J. D. Long, Secy. Navy Dept.

TELEPHONE SYSTEM.—Neepawa, Man.—Reports state that an election will be held to vote on the question of appropriating $6,000 for a telephone system.

BONDS.—New Orleans, La.—Bids are asked until Aug. 25 for the purchase of $325,000 of 5% levee bonds. T. J. Duggan, Secy. Bd. Levee Comrs., Masonic Temple.

TELEPHONE LINE.—Rockwood, Mich.—Reports state that the People's Telephone Co., of Wayne and Monroe counties, will extend its line to Monroe, via Scofield and Maybee.

REPAIRING STEAMER.—Washington, D. C.—Bids are asked until Aug. 23 for repairing the hull and machinery of the revenue cutter "Forward." O. L. Spaulding, Asst. Secy., Treasury Dept.

FIRE HOSE.—St. Louis, Mo.—Bids are asked until 12 m., Aug. 19, for furnishing 3,250 ft. of 2½-in. rubber-lined cotton hose, 2,000 ft. of 2½-in. 5-ply rubber hose, etc. Jas. Richardson, Comr. of Supplies.

SEA WALLS.—Baltimore, Md.—Bids are asked until Sept. 9 for constructing sea walls, etc., at North and Hawkins Points, as stated in our advertising columns. Lieut. Chas. W. Kutz, U. S. Engr., 9 Pleasant St.

SUPPLIES.—New York, N. Y.—Bids are asked until Aug. 22 for furnishing oils, plumbing material, tools, iron fittings, belting and packing, etc. Adolph Simis, Jr., Comr. Dept. Pub. Charities, East 26th St.

TELEPHONE SYSTEM.—Springboro, Pa.—A franchise has been granted to the Conneautville Telephone & Light Co. to construct and operate a telephone system throughout the borough of Spring. A. R. Seeley, Burgess.

BONDS.—Los Angeles, Cal.—The council has passed an ordinance to issue $160,000 in bonds for the construction of certain tunnels, and $10,000 in bonds for the purchase and improvement of certain lands. C. H. Hance, Cy. Clk.

TRAVELING CRANES.—Chicago, Ill.—Bids are asked until Aug. 30 for furnishing plans, etc., and for erecting electric traveling cranes for the new water pumping stations, as stated in our advertising columns. L. E. McGann, Comr.

LEVEE WORK.—Brownsville, Tenn.—Messrs. J. N. E. Moore, W. Halliburton, J. Anthony and W. W. Dupree have been appointed a committee to prepare specifications and to award contracts for the proposed levee work along the Hatchie River.

CYLINDER PLATES.—Tompkinsville (S. I.), N. Y.—Bids are asked until Aug. 24 for furnishing seventh-course cylinder plates for the Plum Beach Light-House, R. I., as stated in our advertising columns. Lieut.-Col. D. P. Heap, U. S. Engr., Tompkinsville.

DOCKS AND SLIPS.—Seattle, Wash.—Local papers state that Jas. J. Hill, Pres., Great Northern Ry. Co., is in the city in regard to the construction of docks and slips and a grain warehouse, between Harrison and Newark Sts. F. H. Britton, Asst. Gen. Supt., Spokane.

STEEL COAL SHEDS, ETC.—Pago Pago, Samoa.—Plans are being prepared at the bureaus of yards and docks, navy department, Washington, D. C., for the construction of steel coal sheds and piers, at this place, to cost about $250,000. Bids for the work have been asked, according to reports.

LEVEE WORK.—Vincennes, Ind.—The county commissioners have granted a petition by Chas. Pinkstaff, for an appropriation of $30,000 for strengthening about 18 miles of the Wabash levee, which will require about 183,381 cu. yds. of material. Bonds will be issued.

DREDGING.—Norfolk, Va.—A contract has been awarded to the American Dredging Co., Philadelphia, Pa., for dredging a channel 28 ft. deep and 450 ft. wide, in the Elizabeth River, from Hampton Roads to the Norfolk Navy Yard, to cost about $360,000. Capt. Thos. L. Casey, U. S. Engr.

LEVEE WORK.—West Memphis, Ark.—The bids received Aug. 3 by the St. Francis Levee Board, for constructing about 24 miles of levee, containing about 2,193 cu. yds. of material, have been rejected on account of being too high. Harry N. Pharr, Ch. Engr., informs us that new bids will not be asked this season. John B. Driver, Pres. Bd., West Memphis.

MINING MACHINERY. — Pittsburg, Pa. — Local papers state that Messrs. K. T. Fukius, T. Dan, T. Matsubarba and T. Maketa, Mining Engrs. and owners of numerous coal mines in Southern Japan, are in Pittsburg to purchase mining and pumping machinery and the material to sink a shaft over 2,000 ft. deep.

SHIP CANAL.—Chicago, Ill.—Press reports state that surveys for a ship canal through the Calumet to connect with Wolf Lake and Lake George, are now being made, and a contract will be let about Oct. 1 for the employment of about 2,000 men. A. F. Knotts, Secy. Wolf Lake Harbor Com., is said to be interested.

CONTRACT PRICES.

BY-PASS.—Chicago, Ill.—The drainage trustees received the following bids June 29 for constructing a by-pass for Section 18 of the drainage channel, as advertised in Engineering News; projects 2 and 3:

Bids Received at Chicago, Ill., June 29, 1898, for Construction of a By-Pass.

Bidder.	Project No. 2. Construction of wall, 1,810 cu.yds.	Pine stringers, 8,550 ft. B.M.	Oak flooring, 22,500 ft. B.M.	Beams, bed plates, etc., 9,450 lbs.	Excavation, 5,100 cu.yds.	Total.	Project No. 3. Construction of wall, 400 cu.yds.	Cast-iron pipe and water gate.*	Excavation, 15 cu.yds.	Total.
Griffiths & McDermott, Chicago..	$4.60	$32.00	$34.00	$0.03	$0 65	$12,963	$3.75	$1,800	$0.65	$3,310

Total		$9,874	$7,791	$10,510

ARC LIGHTING.—Parsons, Pa.—Thos. M. Thomas, Clk., writes us that the Keystone Electric Construction Co., Tunkhannock, Pa., has been awarded the contract for furnishing this city with 20 2,000-c.p. arc lights for five years, at $77 a light a year.

LAYING WATER PIPE.—Boston, Mass.—The metropolitan water board awarded the following contract Aug. 9, 1898, to Bruno & Salamone, East Boston, for laying water pipe in a portion of Section 9: Laying 3,060 lin. ft. of 48-in. cast-iron pipe, at $1.79 a lin. ft.; 5 ft. of 16-in. cast-iron pipe, $1.00; 5 cu. yds. rock excavation above grade, 1 ct. a cu. yd.; 1 cu. yd. of rock excavation below grade, 1 ct.; 10 cu. yds. earth excavation below grade, $1.00; setting 2 air valves, at $3.00 each; 2 chambers for air valves, $45.00 each; 10 cu. yds. of concrete masonry, $4.00 a cu. yd.; total, $5,628.

INDUSTRIAL NOTES.

THE EASTERN PAVING BRICK CO., Catskill, N. Y., has a contract from the city of Paterson, N. J., for 1,500,000 vitrified paving bricks. The company, it is said, has a large amount of work on hand.

THE HAZARD MFG. CO., Wilkes-Barre, Pa., and 50 Dey St., New York, reports that it is now manufacturing all sizes of hard and soft drawn copper wire, and also round "figure 8" trolley wire, and can furnish any size promptly.

THE HOLYOKE MACHINE CO., Holyoke, Mass., has the contract for water wheels and iron work for the new 10,000-HP. power plant of the Columbus Power Co., Columbus, Ga. Mr. W. C. Whitner, of Columbus, is the designing engineer.

THE A. S. ALOE CO., St. Louis, Mo., advises our representative that in addition to manufacturing its own transits, levels and general engineering instruments, it also makes a specialty of buying and selling all kinds of second-hand instruments and carries in stock standard makes of engineering supplies of all descriptions.

THE PLUEGER & HENGER MFG. CO., St. Louis, Mo., has a contract from that city for 400 fire hydrants. It has also opened a Tinning Department, making a specialty of tinning on grey iron, something that, it claims, has not been accomplished successfully there before, and has met with the best results, having secured already some large contracts for this department.

THE SARGENT CO., Chicago, states that it has been running its open-hearth steel plant for the past few months at its full capacity on several large contracts, among which is one for the castings of 10-in. gun carriages for the U. S. government. The company claims to have been very successful in this class of work, readily meeting the physical tests prescribed by the government, as well as the short delivery, which is demanded in most cases.

THE FRONTIER IRON WORKS, Detroit, Mich., reports the following among recent shipments of Frontier tandem and gasoline engines: One 60-HP., for a 600-light village electric light plant, Norway, Mich.; one 40-HP., Bay City, Mich.; one 40-HP., Ogdensburg, N. Y.; one 40-HP., and several 20 and 25-HP. engines, the same type, Wichita Falls, Kan. The company claim for this engine a regulation equal to that of a steam engine, adapting it to electric lighting and similar duty at a decided economy of fuel and attendance.

THE CHICAGO PORTLAND CEMENT CO., Chicago, is said to be building a new plant for the manufacture of cement, at Oglesby, Ill., to replace the works at Hawthorne, Ill., which were destroyed by fire last February. The buildings are reported as to cost over $60,000, and the new machinery $100,000. The main building of steel and concrete will be 300 × 125 ft. and three stories high. A 70 × 250-ft. stock house, a 60 × 70-ft. boiler house, a 60 × 70-ft. engine house and a 50 × 80-ft. office building, three stories in height, will also be built, in addition to several smaller buildings. The officers of the company are: Pres., Norman Fraser; Vice-Pres., David R. Fraser; Secy. and Treas., Ralph Gates.

Contract Work Should Always be Advertised in a Paper Read by Contractors.

Nearly Every Prominent Contractor and Manufacturer of Contractors' Supplies in North America Reads Engineering News.

INDUSTRIAL NOTES 64

PERSONAL.

Dr. W. F. Blunt, of Lockhart, Tex., has been appointed a member of the State Board of Health of Texas, to succeed Dr. R. M. Swearingen, deceased.

Mr. Charles H. West has been elected Chief Enginner of the Mississippi Levee District, Greenville, Miss., to succeed Mr. William Starling, M. Am. Soc. C. E.

Mr. John D. King, for several years Superintendent of the New Brighton Water Co., New Brighton, Pa., has resigned. Mr. Bonbright Kennedy has been appointed to succeed him.

Mr. William E. McClintock, M. Am. Soc. C. E., formerly of the firm of McClintock & Field, civil engineers, of Brockton, Mass., has begun the practice of law at 644 Tremont Building, Boston, Mass.

Mr. J. F. Coleman, civil engineer, of New Orleans, La., expects to leave for Cuba and Porto Rico about Sept. 15 on a prospecting tour to investigate the outlook for civil engineers and contractors in those islands. He intends spending about 30 days on the trip.

Mr. William Forsyth, M. Am. Soc. M. E., Mechanical Engineer, of the Chicago, Burlington & Quincy R. R., with headquarters at Aurora, Ill., has accepted the position of Superintendent of Motive Power of the Northern Pacific Ry., with headquarters at St. Paul, Minn., to succeed Mr. E. M. Herr, resigned.

Mr. Thomas G. Long, M. Am. Soc. C. E., formerly of the Union Bridge Co., New York, is now Second Vice-President of the R. P. & J. H. Staats Co., lately reorganized and incorporated, with offices at 29 Broadway, New York. The company's work, as engineer and contractor, covers docks, bridges, buildings, foundations, masonry, etc.

Mr. L. N. Case, General Superintendent of the water department of Detroit, Mich., has ceased to hold that position, owing to its abolition by the Board of Water Commissioners, and has instead been appointed Acting Secretary during the absence of the Secretary. Mr. Case has been connected officially with the water department for over 30 years.

Mr. A. G. Menocal, M. Am. Soc. C. E., formerly Civil Engineer, U. S. Navy, whose "suspension from duty on furlough pay for three years" as a result of his trial in consequence of the failure of Dry Dock No. 3 at the New York Navy Yard, was noted in our issue of June 9, has been pardoned by President McKinley, who restores him to his former status in the navy. Mr. Menocal will be retired from active service Sept. 1 on account of the age limit.

OBITUARY.

Mr. Jacob Guest Jones, contractor, of Washington, D. C., died Aug. 16, aged 62.

Mr. Joseph A. Barstow, contractor, of Atlantic City, N. J., died Aug. 15, aged 71.

Mr. Joseph Clark, contractor, died at his home in Hazel Green, Ky., last week, aged 77.

Mr. David M. Smith, builder and contractor, of Brooklyn, N. Y., died Aug. 21, aged 80.

Mr. William Reed, contractor, of Allegheny, Pa., died in Wilkinsburg, Pa., Aug. 13, aged 85.

Mr. Edward H. Moore, Water Commissioner, of Stoneham, Mass., died Aug. 18, aged 47.

Mr. C. J. Gardner, President of the Utica Cement Co., Utica, N. Y., died at Colorado Springs, Colo., Aug. 18, aged 53.

Mr. Albert A. Pancoast, President of the Philadelphia & Reading Coal & Iron Co., Philadelphia, died at Elberon, N. J., Aug. 19, aged 58.

Mr. Robert A. Stranahan, formerly well known in the South as a constructor of gas works, died at his home in Boston, Mass., Aug. 9.

Mr. William E. Davis, Superintendent of the Clinton Bridge Co., Clinton, Ia., accidentally shot and killed himself Aug. 18 in that city. He was born at Athens, Pa., in 1872, and was educated at Cornell University, Ithaca, N. Y. Since then he has been connected with the Elmira Bridge Co., Elmira, N. Y., the Adirondack & St. Lawrence R. R., the Phoenix Iron Co., Phoenixville, Pa., R. W. Hildreth & Co., New York, and the Union Bridge Co., Athens, Pa. He was a son of Mr. George E. Davis, Superintendent of the last-named company.

Mrs. Sophia Braeunlich, Business Manager of the Scientific Publishing Co., New York, publishers of "The Engineering and Mining Journal" and "The Mineral Industry," died at Sault Ste. Marie, Mich., Aug. 11. She was born on Long Island, July 2, 1854, and was the first woman graduate of Packard's Business College, New York. She entered the service of the above company Dec. 11, 1879, and in 1888 she became Secretary and Treasurer of the same. She was appointed Business Manager Jan. 1, 1890. Mrs. Braeunlich was the first American woman elected a Fellow of the Imperial Institute of London.

Mr. Edward Dexter Brown, M. Am. Inst. E. E., died in the military hospital at Fort Meyer, near Washington, D. C., July 16, aged 30. He was born in Reading, Mass., and graduated from the Massachusetts Institute of Technology, Boston, Mass., in 1890. Since 1891 he had been with the American Telephone & Telegraph Co., with offices at 18 Cortlandt St., New York city, and since 1895 was the General Inspector, having risen through the lower engineering grades. On April 30, last, he resigned this position in order to go to the front with Troop C, New York Volunteer Cavalry, of which he had been a member for two years, holding the post of Corporal. He was taken sick with typhoid fever while at Camp Alger, Va.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

NATIONAL IRRIGATION CONGRESS.
Sept. 1-3. Annual convention, Cheyenne, Wyo. Secy., J. C. Harpham.

TECHNICAL SOCIETY OF THE PACIFIC COAST.
Sept. 2. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.

GERMAN-AMERICAN TECHNICAL SOCIETY.
Sept. 3-7. Annual meeting, Philadelphia Section, Reading, Pa. Secy., A. Schumann, 532 North 4th St., Philadelphia, Pa.

ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Sept. 5. Secy., H. J. March, Library Bldg., Buffalo, N. Y.

AMERICAN STREET RAILWAY ASSOCIATION.
Sept. 6-9. Annual convention, Boston, Mass. Secy., T. C. Pennington, 2020 State St., Chicago, Ill.

AMERICAN SOCIETY OF CIVIL ENGINEERS.
Sept. 7. Secy., C. W. Hunt, 220 W. 57th St., New York city.

CENTRAL RAILWAY CLUB.
Sept. 9. Secy., H. D. Vought, 114 5th Ave., New York city.

MONTANA SOCIETY OF ENGINEERS.
Sept. 10. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.

THE LOUISIANA ENGINEERING SOCIETY.
Sept. 12. "Evolution of Structural Design," F. T. Llewllyn. Secy., J. F. Coleman, 712 Union St., New Orleans, La.

ASSOCIATION OF EDISON ILLUMINATING COMPANIES.
Sept. 12-13. Annual meeting, Sault Ste. Marie, Mich. Secy., Wilson S. Howell, Newark, N. J.

NORTHWEST RAILWAY CLUB.
Sept. 13. Secy., T. A. Foque, Soo Line, Minneapolis, Minn.

CIVIL ENGINEERS' CLUB OF CLEVELAND.
Sept. 13. Secy., Wm. H. Searles, Case Library Bldg., Cleveland, O.

NEW YORK STATE STREET RAILWAY ASSOCIATION.
Sept. 13-14. Annual meeting, Brooklyn, N. Y. Secy., H. A. Robinson, New York city.

DENVER SOCIETY OF CIVIL ENGINEERS.
Sept. 13. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Colo.

THE RAILWAY SIGNALING CLUB.
Sept. 13. Secy., Earl M. Seitz, C. & N. W. Ry., Chicago, Ill.

ENGINEERS' CLUB OF CINCINNATI.
Sept. 15. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.

BROOKLYN ENGINEERS' CLUB.
Sept. 15. Secy., A. J. Prevost, Jr., 191 Montague St., Brooklyn, N. Y.

NORTHWESTERN TRACK AND BRIDGE ASSOCIATION.
Sept. 16. D. W. Meeker, St. Paul, Minn.

ENGINEERS' CLUB OF PHILADELPHIA.
Sept. 17. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.

ENGINEERS' CLUB OF COLUMBUS.
Sept. 17. Secy., H. M. Gates, 12½ North High St., Columbus, O.

ENGINEERS' CLUB OF MINNEAPOLIS.
Sept. 19. Secy., H. E. Smith, 1620 S. E. 4th St., Minneapolis, Minn.

ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Sept. 19. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.
Sept. 20. Secy., R. A. Fessenden, 410 Penn Ave., Pittsburg, Pa.

BOSTON SOCIETY OF CIVIL ENGINEERS.
Sept. 21. Secy., S. E. Tinkham, City Hall, Boston, Mass.

WESTERN FOUNDRYMEN'S ASSOCIATION.
Sept. 21. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.

ENGINEERS' CLUB OF ST. LOUIS.
Sept. 21. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.

CENTRAL STATES WATER-WORKS ASSOCIATION.
Sept. 27-29. Annual meeting, Springfield, O. Secy., John Fisher, 11 Riley St., Hamilton, O.

AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENT.
Oct. 12. Annual meeting, Washington, D. C. Secy., D. L. Fulton, Bureau of Highways and Sewers, Allegheny, Pa.

AMERICAN INSTITUTE OF MINING ENGINEERS.
Oct. 18. Annual meeting, Buffalo, N. Y. Secy., R. W. Raymond, P. O. Box 223, New York city.

NEW ENGLAND ROADMASTERS' ASSOCIATION.—The 16th annual meeting of this association was held at Boston, Mass., Aug. 17-18, and the program was carried out as announced in Engineering News of July 28.

THE LOUISIANA ENGINEERING SOCIETY.—A regular meeting of this society was held Aug. 8. Mr. C. H. Chamberlain, Assistant Engineer, T. & P. R. R., read an interesting paper on "Deep Bridge Foundations on the Atchafalaya River."

The society decided to apply for membership in the Association of Engineering Societies, and the Secretary was instructed to file the necessary application. An outing will be taken in September consisting of a tour of inspection of the drainage stations and canals now being constructed in and about New Orleans.

ASSOCIATION OF RAILWAY SUPERINTENDENTS OF BRIDGES AND BUILDINGS.—The Committee on Turntable Construction recently issued a list of questions, with the request that they be answered and returned as early as possible to Mr. Onward Bates, 1100 Old Colony Bldg., Chicago, Ill. The following are the questions:

1. How many turntables are under your care?
2. Description of your turntable? (Style and name of maker.)
3. Diameter of turntable pits?
4. Depth of pits at center?
5. Depth of pits at perimeter?
6. Diameter of circular track for balancing table?
7. Kind of foundation for center of table?
8. Kind of foundation for circular track?
9. Kind of pit walls?
10. Kind of curbing on pit walls?
11. Kind of paving in pit?
12. Method of draining pit?
13. Are any of your pits covered, and in what manner?
14. What is the length of your longest engine from center of forward truck wheel to center of rear tender wheel?
15. What is the weight of your heaviest engine including tender, in running order, with coal and water?
16. How long a table is required to balance these engines?
17. What is the distance from center of table to end of turning lever?
18. How many men does it take to turn your heaviest engine?
19. Give following particulars of turntables:
    (a) Deck or through girders or gallows frame?
    (b) Kind of centers (wheels, conical rollers, balls or pins)?
    (c) Method of balancing and adjusting height of center?
    (d) Number and diameter of balance wheels?
    (e) Method of adjustment at ends?
    (f) Kind of floor?
    (g) Kind of latch?
    (h) Kind of supports for rails at ends of table and on pit walls?
20. Do you have trouble with steel or iron tables rusting?
21. What kind of paint do you use on metal tables?
22. Are engines allowed to blow off steam while standing on tables?
23. Are you troubled with snow in pits?
24. Are you required to keep the tables locked when not in use, so that they cannot be turned by trespassers?
25. If you have tables turned by power, describe its application?
26. Please state your opinion as to the durability and wearing qualities of the turntables that have come under your observation?

NEW PUBLICATIONS.

STATE BOARD OF HEALTH OF MICHIGAN.—Report for the Year Ending June 30, 1896. Henry B. Baker, Lansing, Mich., Secretary. Cloth; 6 × 9 ins.; pp. CC. + 523; tables.

This report contains a vast mass of statistical information relating to meteorology, sickness and death in Michigan for the year 1895. Besides this an account is given of the detailed work of the board during 1896 and a number of papers on health matters are included.

STATE BOARD OF HEALTH OF NEW YORK.—Report for 1896. Baxter T. Smelzer, M. D., Secretary, Albany, N. Y. Cloth; 6 × 9 ins.; pp. 620; many tables and folding maps, 32 of the latter being in a separate case.

Under the laws of New York all plans for sewerage and sewage disposal systems must be presented to the State Board of Health for approval. A large part of the report before us is made up of plans and descriptions of such proposed work. Besides this there are some special reports on sewerage, water supply, garbage disposal and other subjects, and copies of the rules and regulations established by the board for the sanitary protection of certain water supplies. Most of the tables are composed of detailed mortality statistics for the state and its subdivisions.

COMMISSIONER OF EDUCATION.—Report for the Year 1896-97. Vol. I., Part I. Wm. T. Harris, Commissioner. Washington, D. C.: Pub. Doc. Cloth; pp. 1,136; tables and illustrations.

This thick volume treats of a wide range of subjects, including such diverse ones as Sunday schools and nitrifying organisms. It is a review of educational work in a variety of phases both in this country and abroad. Some of the chapter headings indicating the matter in the volume most likely to be of interest to our readers are as follows: "The Curriculum of the Land Grant Colleges;" "Requirements for Admission to the Freshman Class in Colleges, Universities and Schools of Technology;" "Entrance Requirements for Engineering Colleges;" "Some Recent Contributions of Biology, Sociology and Metallurgy to the Curriculum of Colleges Endowed by the Federal Government for the Benefit of Agriculture and the Mechanic Arts;" "Educational Directory."

EXPERIMENTAL TREE PLANTING IN THE PLAINS.—By Charles A. Keffer, Assistant Chief of the Forestry Division. Pub. Doc. Bulletin No. 18, Division of Forestry, U. S. Department of Agriculture, Washington, D. C. Paper, 8vo.; pp. 94; illustrated.

The experiments have been made to test the adaptability of various species in different regions, to develop methods of cultivation and to demonstrate forestry methods. Most of the plantations are in the Western plains, and the author discusses the advantage of such plantations as well as the conditions affecting tree growth. Reports are given of the several plantations in South Dakota, Nebraska, Kansas, Colorado, Utah and Minnesota, some of which are under the care of the state agricultural colleges.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

DUMPING WAGONS.—Wm. Beckert, 340 Ohio St., Allegheny, Pa. Paper; 6 × 9 ins.; pp. 10; illustrated.

This catalogue contains illustrated descriptions of dumping wagons for hauling garbage, brick, stone, gravel, dirt and other materials.

ELECTRIC GENERATORS AND MOTORS.—The Crescent Electric Machine Co., 643-647 Kent Ave., Brooklyn, N. Y. Pamph.; 9½ × 5¾ ins.; pp. 29.

This is an illustrated pamphlet describing the types of generators and motors manufactured for special service by this company. Tables of sizes and letters from users of the "Crescent" apparatus are also included.

FIRE-PROOF AND RUST-PROOF PAINTS.—Chicago Fireproof Covering Co., Chicago, Ill. Paper, 5 × 6¾ ins.; pp. 8.

This pamphlet describes the results of tests made by coating iron plates with various compositions and immersing them in water for 48 and 160 days. The company's specialties are a galvanic varnish for ironwork that is submerged or exposed to acids or gases, and "asbesto-clad," which is a fireproof paint for woodwork.

FIREPROOF CONSTRUCTION.—John A Roebling's Sons Co., New York, N. Y. Pamph.; 9 × 6 ins.; pp. 73; illustrated.

This is a very neatly gotten up pamphlet, illustrating and describing in considerable detail the different forms of fireproof floor systems, ceilings, partitions and column protections in cinder concrete and wire lath, which the John A. Roebling's Co. manufacture and erect. Tables of weights, detail specifications and other information useful to designers accompany the description of each type of construction.

RECENT BALDWIN LOCOMOTIVES.—Baldwin Locomotive Works, Philadelphia, Pa. Pamph.; 9 × 6 ins.; pp. 32; illustrated.

This is No. 6 of the series of pamphlets, which the Baldwin Locomotive Works is publishing, illustrating and desribing the locomotives recently built to fill its American and foreign orders. The locomotives illustrated in this number comprise, besides several ten-wheel simple and compound engines, a four-wheeled electric mining locomotive, a six-wheeled coupled mining locomotive, a rack locomotive built for the Leopoldina Ry. of Brazil, a six-wheeled suburban locomotive, and a number of American type engines.

STEEL FREIGHT CARS.—Schoen Pressed Steel Co., Pittsburg, Pa. Cloth; 9 × 12 ins. Not paged. Numerous full-page illustrations.

This book, which is a fine specimen of the printer's and engraver's art, contains half-tone cuts of the company's extensive shops, which cover 24 acres of ground, and of the bolsters, trucks and complete cars of different styles, made entirely of pressed steel. One of the photographs is an instantaneous view of a train in motion with 35 cars loaded with iron ore, the average load in each car being 108,000 lbs. The Schoen Pressed Steel Co. began ten years ago in a small way the manufacture of pressed steel articles, to take the place of cast iron in car construction. By degrees every piece entering into a car was designed, made and perfected, and after this work was complete the manufacture of entire cars was undertaken. Already some 4,000 of these steel cars are in use, of from 80,000 to 110,000 lbs. capacity.

RAILWAYS.

BALTIMORE & OHIO.—Press reports state that this company contemplates tunneling through the heavy grade at Mt. Airy. The grade is the heaviest between Harper's Ferry and Baltimore, Md., and to make the tunnel would necessitate the expenditure of about $1,000,000. W. T. Manning, Ch. Engr., Baltimore.

CHICAGO & WABASH VALLEY.—Benj. J. Gifford, Pres., Kankakee, Ind., informs us that the right of way has been obtained and the ties and rails secured for this proposed railway from his farm lands, mostly in Jasper county, to a connection with the Eastern Illinois Ry., a distance of about ten miles. No towns will be passed through. S. B. Hodges, Kniman, Ind.

COLUMBIA SOUTHERN.—E. E. Cooper, Ch. Engr., Wasco, Ore., informs us that the grading has been completed on this proposed railway from Wasco to Moro, Ore., 17 miles, and that five miles of track on the same has been laid. Pres., E. E. Lytle, Wasco.

EAST CAROLINA.—Work has been completed on this new line from Tarboro to Davison, N. C., and is being further extended seven miles south from Davison to Crisp. Pres., Henry Clark Bridges; Engr., W. J. Burnett, both of Tarboro, N. C.

GOLDSBORO, SNOW HILL & EASTERN.—This company was incorporated in North Carolina Aug. 15, with a capital stock of $300,000, to construct a railway from Snow Hill, Green county, to Pantego, Beaufort county, N. C., through Greene and Pitt counties, a distance of about 60 miles. The officers are, J. W. Lynch, Pres., of Suffolk; Colonel Alexander S. Bacon, Vice-Pres., of New York; Colonel J. H. Macleary, Gen. Mgr., of Suffolk; Dr. J. T. McCormick, Treas., of New York; Director, George W. Sugg, of Snow Hill, N. C.

DELAWARE.—We are informed that this company has been organized to build a 15-mile line of railway from Delhi to Andes, N. Y., and that arrangements have been made with a strong New York corporation to handle the bonds. A contract has been made with Thomas Murray, of Plainfield, N. J., to construct the road. Strong & Totten, 123 Liberty St., New York, are associated with him in the contract, and the grading, tracklaying and bridges have been sublet to Richardson & Reed, of Owego, N. Y. E. F. Musson, 4 Sheldon St., Norwich, N. Y., is chief engineer. Construction will begin at once, and the contract calls for completion before Jan. 1, 1899. Pres., Henry Davie, Delhi, N.Y.

HAWTHORNE, NEBAGAMON & SUPERIOR.—F. Weyerhauser, Chippewa Falls. Wis., informs us that this is a proposed logging railway to be built in Wisconsin for a distance of 35 miles. Grading has just been begun. No officers have yet been elected.

IOWA, MINNESOTA & NORTHERN.—This company was incorporated in Iowa Aug. 17, with a capital stock of $200,000, with headquarters at Mason City, Ia. The officers are, Pres., A. C. Frost, Chicago; Vice-Pres., David Secor, Winnebago City, Minn.; Treas., W. E. Brice, Mason City; Secy., J. S. Lindon, Clear Lake, Minn.

KANSAS, OKLAHOMA CENTRAL & SOUTHWESTERN.—J. H. Bartels, Pres., Bartlesville, Ind. Ter., informs us that 60 miles of this new line have been located and cross-sectioned, and the right of way for the same obtained. The Toledo Construction Co. has 30 miles of the route graded and now has 270 teams at work; 60 miles will be graded by Oct. 1. It is proposed to construct the whole 350 miles of railway, from Cherryvale, Kan., to Verona, Tex., before quitting work, after which preparations will be made towards the further extension from Vernon to San Antonio, Tex.

KEARNEY & BLACK HILLS.—This railway property was sold under foreclosure at Kearney, Neb., Aug. 18, to the Union Pacific R. R. Co., at $150,000. The length of the line is 65.4 miles.

LEAD BELT.—This company was incorporated in Missouri Aug. 9, with a capital stock of $4,000, to construct and operate a standard gage railway from the Mississippi River & Bonne Terre Ry. at Central Station to the Central Lead Co.'s plant, a distance of four miles, all in St. Francois county. The incorporators are, J. H. Bethune, Arthur Thatcher, W. E. Guy, F. H. Ludington, H. J. Cantwell, W. T. Gould and C. S. Rodgers, all of St. Louis, Mo.

LOUISVILLE, HENDERSON & ST. LOUIS.—R. N. Hudson, Ch. Engr., Cloverport, Ky., informs us that there is no immediate intention of completing the extension of this line from West Point, the present terminus, to Louisville. Ky. The grading between these points was done in 1893.

MASSACHUSETTS.—Philip D. Borden, Cy. Engr., Fall River, Mass., writes us that the railway company and the city have agreed upon a general plan for abolishing the grade-crossings in this city, and are now at work upon the details. It is not likely that any more street work will be begun before 1899.

MINNESOTA TRANSFER.—Reports state that McLeod & Co. have been awarded a contract for the construction of two miles of track, an office building, etc., to cost about $26,000. Improvements are also contemplated at the Twin City stock yards. Pres., John R. Hastings, St. Paul, Minn.

MUSCATINE NORTH & SOUTH.—Stirling Birmingham, Vice-Pres. and Secy., 120 Broadway, New York, informs us that the surveys have been made, most of the right of way obtained and the capital secured for the construction of this railway from Muscatine to Elrick via Grandview and Wapello, Ia., a distance of about 30 miles. Contracts have been sublet to Balch, Peppard & Johnson, of Minneapolis, Minn., by the Tennis Construction Co., Pres., Edgar A. Tennis, of Philadelphia, Pa., which is building and equipping the line under contract with the railway company. About five miles have already been graded, and a connection made with the Iowa Central at Elrick. Pres., Wm. R. Stewart, 11 Broadway, New York; Ch. Engr., W. L. Willis, Wapello, Ia.

NEW YORK, NEW HAVEN & HARTFORD.—Patrick Fitzgerald, New London, Conn., is said to have received the contract for building the Groton extension of the Norwich division of the Consolidated road from the New London Navy Yard to a point 1½ miles from the Thames River drawbridge.

OHIO SOUTHERN.—Reports from Lima, O., state that the sale of this railway has been postponed from Aug. 20 until Sept. 20.

OKLAHOMA CENTRAL. — This company was incorporated in Oklahoma Aug. 15, with a capital stock of $15,000,000. The road will run from Oklahoma City northwest through Canadian, Kingfisher, Blaine and Wood counties. It is reported that eight grading outfits, which have finished contracts on the St. Louis & Oklahoma City Ry., in Lincoln county, have gone north to Pawhuska, where they were to have begun, on Aug. 20, grading on the Kansas & Oklahoma Central from Coffeyville, Kan., to Guthrie. The incorporators are, O. P. Hamilton, Saline, Kan.; Herman Bruen, New York; Paul Cooke, Kansas City; S. C. Burrell and Phillip Koch, Watonga, Okla.; Thomas H. Davis, Saline, Kan., and McGregor Douglas, Oklahoma City.

ONTARIO & RAINY RIVER.—McKenzie & Mann, Toronto, Ont., are reported to have been awarded the contract for the construction of the first 25 miles of this proposed railway in the south central portion of Canada, near Lake Superior.

OREGON SHORT LINE.—Reports state that the construction of an extension of this railway, from Milford, Utah, to the Nevada state line, is assured. J. C. O'Melveney, Ch. Engr., Salt Lake City, Utah.

ST. ANTHONY & NATIONAL PARK.—This company was incorporated in Idaho Aug. 12, with a capital stock of $350,000, to build a railway to St. Anthony, Fremont county, a distance of 30 miles. The directors are, C. H. Moon, Pres.; S. R. Finley, Secy.; M. E. Jamison, Treas.; G. C. Baker, C. P. Bartlett and R. J. Costlett, of St. Anthony, Idaho; M. J. Kerr, of Ora, Idaho.

TEMPLE & SALADO.—C. J. Grainger, Pres., Palestine, Tex., informs us that the survey has been made and the right of way obtained for this proposed railway from Temple to Salado, Tex., 16 miles. One-half of the capital, or $50,000, has still to be secured by the sale of 3% 20-year guarantee bonds. The company expects to begin construction work as soon as these bonds are disposed of. T. Cronin, Supt. of Construction, Palestine.

VERA CRUZ & PACIFIC.—It is announced that this company will soon be in the market for a quantity of material, as it expects to begin work about Oct. 1 on the construction of the proposed railway from Cordoba, on the Mexican Ry., southeasterly to a connection with the Tehuantepec National Ry., 200 miles. Principal offices, Calle Medinas, No. 6, Mexico City, Mexico.

WESTMORELAND JUNCTION.—This company was incorporated in Pennsylvania Aug. 22 with a capital stock of $60,000, to construct a steam railway from North Irwin, Pa., to or near Griffiths Station on the Baltimore & Ohio R. R., a distance of five miles. The incorporators are A. Frank, Pres.; J. D. Brown, T. P. Herron, D. A. Kelley and J. Arthur Jones, all of Irwin, Pa.

STREET AND ELECTRIC RAILWAYS.

LACONIA, N. H.—At a meeting of the directors of the Laconia & Lakeport St. Ry. the following officers were elected: Harry L. Pierce, Pres.; Chas. T. Foster, Treas., both of Leominster, Mass.; Edmund Little, Clerk, of Laconia; Lewis S. Pierce, Supt., Leominster. It was also voted to proceed at once with the construction of the electric system and to raise the roof of the car house six ft., that being necessary in order to admit of the housing of the new electric cars.

MONTPELIER, VT.—F. C. Kennedy, Pres. Mad River Valley Electric R. R. Co., Burlington, Vt., informs us that the capital is now being secured for the construction of the proposed electric railway from Montpelier to Warren, via Middlesex, Moretown and Waitsfield, a distance of about 26 miles. The route is through the valley of the Mad River, with a connection with the Central Vermont R. R. at Middlesex and Montpelier, and it is expected to carry a large amount of produce to these places. The line will be built by the Burlington Construction Co., of which Mr. Kennedy is president. V. K. Nash, Ch. Engr., Woonsocket, R. I.

DEDHAM, MASS.—David Neal, Chn. of Selectmen, Dedham, informs us that the location of the Norfolk Western St. Ry. through this place, has been granted by the town and accepted by the company, and a bond of $5,000 deposited. The proposed route is from Dedham to Medfield, via Westwood, a distance of nine miles. Pres., W. W. Metcher, Medfield, Mass.; Ch. Engrs., Hodges & Harrington, Boston, Mass.

CATSKILL, N. Y.—The Catskill Electric Ry. Co. has been granted permission by the railroad commissioners to increase its capital stock from $30,000 to $400,000. The line was originally built to be operated only for a distance of two miles through the streets of Catskill Village, but it is now proposed to extend to Windham and Cairo, making a line 16 miles in length.

ROCHESTER, N. Y.—The Rochester & Sodus Bay Ry. Co. was incorporated in New York, with a capital stock of $1,000,000, as stated in our last issue under Railways, to construct a railway to be operated by other power than steam. Thos. J. Nicholl, Pres., 267 State St., Rochester, informs us that this will be an electric line running from Webster to Sodus Point, via Sea Breeze, Ontario, Union Hill, Williamson and Sodus, a distance of about 42 miles. The preliminary survey has been made, and most of the right of way obtained. Le Grand Brown, Ch. Engr., 267 State St., Rochester.

CRANFORD, N. J.—The township committee has postponed the public hearing on the petition of the Elizabeth & Westfield St. Ry. Co. for a franchise to build a trolley line through the township, until Sept. 12. Pres., A. A. Gaddis, Westfield, N. J.

ELIZABETH, N. J.—F. J. Hubbard, County Engr., Plainfield, N. J., informs us that the preliminary survey has been made and the right of way is now being obtained for the proposed electric railway to be built by the Elizabeth City Horse R. R. Co. between this city and Plainfield, via Cranford, Westfield and Fanwood, 12 miles, as noted in our last issue. Union county receives $250,000 for the franchise, which sum is to be expended in the construction of a boulevard, 100 ft. wide, and work upon which is expected to begin this fall. Contracts for building the railway will be let as soon as the necessary consents are secured. John Kean, Pres., Elizabeth.

DOYLESTOWN, PA.—The Newtown Electric St. Ry. Co. was granted a franchise, Aug. 15, to construct a line through the borough on Green St. to Main St. This company proposes to extend its line from Newtown to Doylestown, via Wightstown, Penn's Park, Wycomb, Forestville and Furlong, 13¾ miles. Pres., Thos. P. Chambers, Newtown, Pa.

HATBORO, PA.—The Hatboro & Horsham Electric Ry. Co. was incorporated, Aug. 18, to construct a trolley line between the towns named, a distance of 1¼ miles. The directors are: James Crawford, Alfred R. Gandy and Magnus Hellstrom, Pres., all of Philadelphia; S. Edward Hagar, Doylestown; John B. Peddle, Woodbury, N. J.

PHILADELPHIA, PA.—It is reported that the Southwestern Passenger Ry Co., which received a franchise in April to construct a line through that portion of Philadelphia lying between Moyamensing Ave. and the county line, has begun the work of track laying. The road will start at Otsego and Mifflin Sts. to Jackson and 5th Sts., to Moyamensing Ave., to Penrose Ferry Road, to Schuylkill Bridge, thence across the bridge to State Island Road and Bow Creek, to the county line. It is said that the road will be constructed on the most approved plan. Pres., Edgar A. Tennis.

STROUDSBURG, PA.—Frank H. Smith, Pres., Stroudsburg, informs us that the Stroudsburg Passenger Ry. Co. expects to change the motive power on its 2½ miles of railway between Stroudsburg and East Stroudsburg from steam to electricity. An extension, two miles in length, is contemplated. No contracts will be let, but the work will be done by the company.

WASHINGTON, D. C.—The Ferguson Contracting Co., 69 Wall St., New York, has been awarded the contract for constructing the remaining section of the Washington & Chesapeake Beach R. R., 15 miles in length. Work will begin at once and be completed by Jan. 1.

ELLICOTT CITY, MD.—Reports state that the final arrangements for the completion of the electric railway between Ellicott City and Baltimore, which have been so long interfered with by financial troubles, have now reached a point that gives assurance of the success of the enterprise. Mr. Yakel, the president of the Columbia & Maryland Ry. before its purchase by the Consolidated Ry. Co., is interested.

HAGERSTOWN, MD.—We are informed that the Hagerstown Electric Ry. Co. is building a large engine and boiler house, the structural steel work for which will be erected by the North Penn Iron Co., North Penn Junction, Philadelphia, Pa.

ERLANGER, KY.—L. Morelli, A. Victor and D. Riggs have been appointed a committee by Erlanger to solicit $12,000 in subscriptions for the electric line which it is proposed to build from Erlanger to Ludlow.

CLEVELAND, O.—The county commissioners, Aug. 17, granted a five-year franchise to the Cleveland Electric Ry. Co. to extend the Cedar Ave. line on the Coventry Road.

DUNKIRK, IND.—It is reported that the contract for building an electric railway between Redkey and Dunkirk for the Dunkirk & Redkey Traction Co., whose incorporation was noted in our last issue, has been awarded to the Electrical Installation Co., of New York and Chicago, and that the work is to be commenced at once and completed by Nov. 15. The line will probably be extended to Pennville.

MICHIGAN CITY, IND.—The Northern Traction Co. was incorporated in Indiana Aug. 19, with a capital stock of $150,000, to build an electric railway from Michigan City to Laporte. The incorporators are: John W. Lovett, W. W. Huffman, W. E. and C. W. Hooven and George Nichol.

DURAND, MICH.—The council granted a franchise to the Long Lake, Durand & Corunna Electric St. Ry. Co., Aug. 12, for the construction of a line from Corunna through Durand to Long Lake, and thence to Detroit. The power house and car barns are to be located here. Wm. E. Avery, of Detroit, is at the head of the company.

JACKSON, MICH.—Reports state that a decree has been entered in the circuit court ordering the sale of the street railway, naming the time after Aug. 31, to satisfy the mortgage held by the Fidelity Loan & Trust Co., amounting to $171,830. The property has been in the hands of a receiver for the past year.

SAGINAW, MICH.—The Saginaw & Frankenmuth Ry. Co. has been incorporated, with a capital stock of $50,000, to build an electric line between Saginaw and Frankenmuth, a distance of 14 miles. The officers are: James B. Peter, Pres.; H. C. Potter, Jr., Treas.; S. G. Higgins, Secy., all of Saginaw.

OREGON CITY, ORE.—Reports state that W. R. Burghardt, representing capitalists who desire to build an electric railway from Oregon City to a point on the Highland Road 8 miles east of the Willamette River, has petitioned the county court for a franchise to build the line. The court is said to be in favor of granting the franchise, but has postponed action until next month.

MONTEREY, CAL.—The Monterey & Pacific Grove St. Ry. Co. is contemplating the project of running its cars by an improved system that will greatly lessen the time of trip between the two towns. The line is now operated by horse-power. Mgr., Juan Malarin.

ELECTRIC LIGHT AND POWER.

WATERVILLE, ME.—The Union Gas & Electric Co. has commenced work upon its water power of the Messelonskee River where Bushey & Son will put in a stone dam which will furnish about 1,600 HP., for which it is reported a manufacturing concern doing a large business and giving employment to 1,000 men is negotiating.

MYSTIC, CONN.—Bids will be asked about Sept. 1 for constructing a plant to cost about $25,000 for the Mystic Electric Light & Gas Co. We are informed that the plant will have arc and incandescent lights, 150-HP. steam plant with engine, and 15,000 light alternator, line, poles, etc. No contracts have been let yet. The plant will light Mystic and Stonington. Thos. C. Perkins, Gen. Mgr. and Des. Engr., Hartford (not Danforth), Conn., as stated last week.

ATLANTIC CITY, N. J.—The council is reported to have adopted an ordinance giving to John H. Rothermel & Co., Reading, Pa., the franchise for constructing and operating an electric light plant in this city. The Rothermel Company was recently awarded a 5-year contract for furnishing the electric lights for the entire city at $105 a year.

COLUMBIA, PA.—It is stated that the engineer of the Martic Water & Power Co., which intends rebuilding the dam, is making surveys at the foot of Walnut St. It is probable that the power house for generating electricity will be located on the Wrightsville side of the river.

LANSDOWNE, PA.—Bids are asked until Sept. 2 for lighting the streets with electricity for one or five years from Oct. 1. H. L. Warren, Secy., P. O. Box 275.

NORRISTOWN, PA.—Local papers state that a proposition is being considered to build a plant near the dams of the John Hancock Ice Co., one of them at Greenlane, the other three-fourths of a mile higher up the stream, covering 40 acres, the latter having been constructed a year ago. At a cost of about $12,000, a plant could be erected, which would furnish light to Greenlane, East Greenville, Pennsburg, Red Hill and Sumneytown.

ROYERSFORD, PA.—The council is reported to have awarded the contract for lighting the borough to the Schuylkill Valley Electric Lighting Co., of Phoenixville, the present contractors. The committee will place additional arc lights in the borough.

HAGERSTOWN, MD.—Press reports state that the contract for the erection of a new power house in Hagerstown has been let to the Conococheague Brick Co., Williamsport, Md., operated by Victor Cushwa & Sons.

OAKLAND, MD.—It is reported that arrangements are being made for the proposed municipal plant to cost $14,000.

NEWPORT NEWS, VA.—Local papers state that W. J. Payne, Richmond, Va., who has just purchased the plant of the Chesapeake Light & Power Co., will soon begin to make a number of improvements to it. Gen. Mgr. and Secy., Segar Whiting.

WINCHESTER, VA.—Bids will probably soon be asked for building a plant of two 50-light arc dynamos of 2,000 c. p.; 71 arc lights of 2,000 c. p. The foundations for the dynamos are to be erected by the city. Wm. R. Willis, Secy. Com.

CHARLESTON, W. VA.—It is reported that the Wilson Aluminum Co., which was chartered some years ago, and which purchased the land on each side of the Kanawha River at Kanawha Falls, began Aug. 22 to construct a water power plant to generate electricity for manufacturing plants in the Kanawha Valley.

EDENTON, N. C.—W. D. Pruden, R. F. Cheshire and others, of the Edenton Cotton Mills Co., organized recently, are in the market for a plant as part of the equipment of the new cotton mill to be erected at this place at once.

BENNETTSVILLE, S. C.—D. D. McCall, C. S. McCall and others, of the new cotton mill company organized recently to build a manufacturing plant, will soon purchase a light plant for the mill.

COLUMBUS, GA.—The Columbus Power Co. has awarded the contract for building the power plant to Hathaway, Jones & Co., Baltimore, Md., at about $115,000.

TALLAHASSEE, FLA.—The council is considering the question of building a plant, according to reports.

FULTON, KY.—The plant of the Fulton Electric Light & Power Co., it is reported, will be extended. Supt., F. Carden.

MINSTER, O.—August Schunds, Village Clk., writes us that the following contracts were let Aug. 16 for furnishing and erecting the plant: Boiler and engine, Minster Machine Co., Minster, $2,495; dynamos, switchboard, etc., F. Bissell & Co., Toledo, O., $1,485; poles, wire, etc., Ambos Construction Co., Cleveland, O., $3,250.

CHURUBUSCO, IND.—The Seckner Contracting Co., The Rookery, Chicago, has been awarded the contract for building a plant and water-works at $18,500. Secy. and Treas., J. H. Brown, Chicago.

EVANSVILLE, IND.—The council has decided to levy a tax for the proposed municipal plant. W. M. Akin, Jr., Mayor.

MIDDLETOWN, IND.—A franchise has been granted for a plant to cost about $5,000.

VEEDERSBURG, IND.—The contract for building a plant and water-works at Veedersburg has been let to the Seckner Contracting Co., 351 The Rookery, Chicago, Ill., at $26,950. J. H. Brown, Secy. and Treas.

DECATUR, MICH.—Bids are asked until Sept. 6 for furnishing and building a plant. Engr., Geo. S. Pierson, Kalamazoo, Mich.; Clk., E. J. Rawson.

MOUNT PLEASANT, MICH.—R. S. Graham, Supt. Indian School, writes us that the specifications for the proposed plant, with a capacity of 8 arc and 350 incandescent lights, have not yet been issued.

SAULT STE. MARIE, MICH.—The American Lake Superior Power Co. has let the following contracts for furnishing the materials and for building the proposed power plant, as advertised in Engineering News: E. D. Smith & Co., Philadelphia, all the rock and earth excavation, known as sections 1, 2 and 3; total, about $1,000,000; Mason, Hoge & Co., Chicago, power house and forebay section; total, about $500,000; H. W. Hubbell & Co., Saginaw, intake section, dredging, $80,000. There are other contracts connected with the enterprise that will make the total cost of construction $2,000,000 in round numbers, and may exceed that sum. The turbines for the power house will alone cost about $300,000. Ch. Engr., H. von Schon, Sault Ste. Marie.

GRAND RAPIDS, WIS.—F. W. Orbison, Des. Engr., Appleton, Wis., writes us that bids for the proposed plant for the Consolidated Water Power Co., noted last week under Grand Rapids, Mich., will be received in the early spring. The land along the Wisconsin River for a distance of three miles has been secured by the company. The dam will cost about $80,000, and will furnish 6,000 HP. The power will be used for various purposes. N. Johnson and J. D. Walter, Grand Rapids, Wis., are in charge of the contemplated work.

GAYLORD, MINN.—We are informed that Triumph Electric Co., Chicago, has been awarded the contract for furnishing the dynamos, etc., and that A. I. Ide & Son, Fort Wayne, Ind., has been awarded the contract for the engine and steam plant. The other bidders were the General Electric Co., Schenectady, N. Y.; Fort Wayne Electric Corporation, Fort Wayne, Ind.; W. I. Gray & Co., Minneapolis; Twin City Iron Works, Minneapolis; Westinghouse Electric Mfg. Co., Chicago.

PERHAM, MINN.—This place is reported to have voted to issue bonds for a plant.

WATERTOWN, S. DAK.—O. M. Kislin & Co. have been awarded a franchise for lighting this city with electricity.

MASON, TEX.—L. Gugenheim, president of the new electric light company, writes us that the contract for the plant has been let to W. G. Schuwirth & Co., San Antonio, Tex.

OAKLAND, CAL.—H. S. Bullock has been granted a franchise for a plant on Sutter Creek and a line into Alameda county and Oakland.

SAN FRANCISCO, CAL.—The Merchants' Association of San Francisco is considering the question of a municipal plant. The sum of $250 has been set aside for the committee on public affairs to employ experts and devise means whereby the city can acquire its own lighting plant.

IDAHO FALLS, IDAHO.—This place voted Aug. 9 not to issue $5,000 in bonds for a plant.

QUEBEC, QUE.—Press reports state that the American company which is going to develop the water power of the Jacques Cartier River for electric light and power purposes for the benefit of this city in opposition to the Montmorency company, has acquired the chartered rights as regards Quebec of the Standard Light & Power Co., Montreal. It has a capital of $500,000. Pres., Emerson McMillan, of the banking firm of Emerson McMillan & Co., Wall St., New York.

BARRIE, ONT.—This place voted Aug. 16 to build a municipal plant at a cost of about $35,000. E. Downell, Town Clk. and Treas.

ROCHDALE, ENGLAND.—Bids are asked until Sept. 6 for furnishing and building a plant. Jas. Leach, Town Clk.

BRIDGES.

HERKIMER, N.Y.—The town board has annulled the contract made with the Owego Bridge Co., Owego, N. Y., to build the bridge over West Canada Creek in this place for $7,300, according to reports. New bids will be called for shortly. Commissioner Cress may be addressed.

MOUNT VERNON, N. Y.—M. J. Donlon, Highway Comr. of Pelham, N.Y., has been appointed a committee to procure estimates for the construction of the proposed new bridge between this city and Pelham, according to report.

UTICA, N. Y.—The Half-Way bridge has been declared unsafe for the passing over of the Belt Line Co.'s electric cars, and will probably be replaced by a new one, according to report.

JERSEY CITY, N. J.—Work has been begun in tearing down the old Pacific Ave. bridge. W. G. Triest, 39 Cortlandt St., New York, has the contract to build the new one.

NEW BRUNSWICK, N. J.—Permission has been granted the Brunswick Traction Co. to erect an additional bridge 10 ft. wide at its own expense adjoining the Green Brook bridge. Edward H. Radel, Secy. Brunswick Traction Co.

PATERSON, N. J.—A new stone arch or steel arch bridge is projected to replace the present one at Main St. over the Passaic River. It will be 40 ft. wide, including 7-ft. sidewalks, and plans are asked for until Aug. 25 by the freeholders.

CONNELLSVILLE, PA.—Permission has been granted to the Youghiogheny Bridge Co. to erect a bridge in Main St., according to report.

HARRISBURG, PA.—It is reported that a new bridge will be erected over the Conscocheague, between St. Thomas and Antrim townships.

NORRISTOWN, PA.—The following contracts have been awarded by the county commissioner: Sparks & Evans, stone bridge over Saw Mill Run, $6,995; Philadelphia Bridge Works, iron bridge over Manatawney Creek, at Pottstown, $3,092; Patton & Evans, masonry of same, $3,516; Schuylkill Bridge Works, iron bridge over Perkiomen Creek, at Godshall's Mill, $1,875; Willoughby H. Smith, masonry of same, $1,435; Schuylkill Bridge Works, iron bridge over Perkiomen Creek, at Yerkes, $3,375; Patton & Evans, masonry of same, at $4.77 per cu. yd.; W. H. Smith, masonry of bridge over the same creek at Palm Station, $1,442.

PHILADELPHIA, PA.—Chas. Nolan received the contract Aug. 19 for the masonry and the Phoenix Bridge Co. for the iron superstructure of the new bridges over Cedar and Richmond branch of the Philadelphia & Reading Ry. H. K. Nichols, Ch. Engr.——Sparks & Evans have received the contract, according to report, for the erection of the Vankirk St. bridge on the New York division of the Pennsylvania R. R. W. A. Pratt, Engr. of Bridges.

PITTSBURG, PA.—The Schultz Bridge & Iron Co., McKee's Rocks, Pa., was given the contract, Aug. 16, according to report, to remove the Schenley Park bridge, at $60 and the material of the structure.

WARREN, PA.—Bids are asked until Sept. 12 for the construction of a bridge across the mill-race on Pennsylvania Ave. Plans are also desired for the same until Sept. 7. L. T. Borchers, Chn. Bridge Comrs.; A. Rogers, Engr.

ANNAPOLIS, MD.—The Structural Iron Co., Baltimore, has been given the contract at $2,700, to construct the draw of the Severn River bridge, according to report. W. J. Sauer, Secy. and Treas.

BALTIMORE, MD.—The Wrought Iron Bridge Co., Canton, O., was awarded the contract Aug. 17, to build two bridges over Charles Run, at Monkton Mills, at a cost of $724 and $748. The contract for the masonry work on both bridges was given to John T. Diven for $692. W. H. Mays, Supt. of Bridges.

NEWPORT NEWS, VA.—Bids are asked until Sept. 6 for the purchase of $40,000 bridge bonds; check, $1,000. J. A. Massie, Cy. Clk.

CHARLESTON, S.C.—Maj. E. H. Ruffner, Corps of Engrs., U. S. A., will give a public hearing Aug. 25, on the application of the Wappoo Bridge Co. to build a bridge across Wappoo Cut.

WHITE SPRINGS, FLA.—Bids are desired on the construction of a 125-ft. bridge of wood or iron, on tubular abutments 32 ft. high. Address, C. F. Cone, White Springs.

JACKSON, MISS.—A. A. Falkes has been awarded the contract at $13,961 to build a brick arch bridge on Capitol St., according to report.

NATCHITOCHES, LA.—Bids are asked until Sept. 15 by the police jury for the construction of an iron bridge across Johnson Chute. Geo. W. Kline, Pres. Police Jury.

DAYTON, TENN.—The county commissioners are reported to be preparing to let the contract for a steel bridge over Little Richland Creek, at Allen's Mill, according to report.

LEXINGTON, KY.—Bids are asked until Sept. 1 for the construction of a 50-ft. wooden bridge. J. K. Gray, Comr.

CHILLICOTHE, O.—The county commissioners have decided to readvertise for bids for the construction of the iron bridge over the Scioto River, the contract for which had been let to the King Bridge Co., Cleveland.

COLUMBUS, O.—Bids are asked until Sept. 13 for 15,000 cu. yds. of fill and embankment and 1,815 cu. yds. of gravel top dressing on the approaches of the Clickenger bridge. Also for 260 perch of limestone masonry, 48 lin. ft. new limestone wheelcourses, 375 cu. yds. of excavation, 700 cu. yds. of fill and back fill, 2,260 ft. B. M. white oak lumber, 8,232 lbs. steel I beams, etc., for the rebuilding of a bridge over a run on the Amity pike. W. H. Halliday, Clk. County Comrs.

CINCINNATI, O.—Separate bids are asked until Sept. 20 for the construction of masonry and of the superstructure of a steel railway viaduct across the valley of Lick Run, east of the Little Miami River; bond, $500, with each bid. Aug. Herrmann, Pres. Water-Wks. Comrs.

LIMA, O.—Bids are asked until Sept. 12 for the construction of a bridge over the Ottawa River in Sugar Creek township. J. C. Cronley, County Engr.

GRAND RAPIDS, MICH. — E. H. Barnes, Res. Engr., writes us that the contract for the masonry of the new 105-ft. plate girder bridge to be built over the Muskegon River, near Upper Big Rapids, at a cost of $21,000, has been given to H. W. Tapp, Fort Wayne, Ind., and the contract for the superstructure to the Detroit Bridge & Iron Works, Detroit, Mich.

BARABOO, WIS.—W. G. Kirchhoffer, Cy. Engr., is reported to have made a survey and to be at work upon plans for a large iron bridge to be constructed across the Baraboo River at Elroy.

OSHKOSH, WIS.—Oscar Sanne, Engr., Milwaukee, writes us that the contracts for the steel bridge to be erected at this place were not let, as the bids were too high and not in conformity with the engineer's estimate. Bids are again asked until Sept. 6.

ALMA, NEB.—The following bids were received Aug. 9 for constructing nine county bridges: Canton Bridge Co., Canton (accepted), $3,365; Missouri Valley Bridge Co., Leavenworth, Kan., $3,500; Elizabeth Bridge Co., Elizabeth, Ill., $3,450; Geo. E. King, Des Moines, Ia., $3,400; Wrought Iron Bridge Co., Canton, O., $3,415; A. McLouth, McLouth, Kas., $3,600; Sheely Bridge Co., Lincoln, Neb., $3,440; Marsh Bridge Co., Lincoln, Neb., $3,560; Parks Bridge Co., Cedar Rapids, Ia., $3,440; St. Louis Iron & Bridge Works, St. Louis, Mo., $3,412; Dildine Bridge Co., St. Louis, $3,606; Kansas City Bridge Co., Kansas City, Mo., $3,520; and the Stark Bridge Co., Kansas City, $3,475. S. L. Roberts, County Clk.

WICHITA, KAN.—Bids are asked until Sept. 10 for building three steel bridges. A. M. Denny, County Clk.

MISSOULA, MONT.—O. E. Peppard, of this place, has been awarded the contract to build a 200-ft. steel bridge at Grantsdale, at a cost of $4,025, according to report.

PRINEVILLE, ORE.—Bids are asked until Sept. 7 for the construction of a 125-ft. bridge over Grand Ronde River at Island City. G. W. Benson, Clk. County Comrs.

CALUSA, CAL.—Bids are asked until Sept. 6 for building a new bridge on Princeton road, for removing a bridge and for repairing a bridge. Geo. K. Ford, Clk. of Bd.

PLACERVILLE, CAL.—Bids are asked until Sept. 6 for the construction of a combination deck bridge over the North Fork of Cosmunes River at Wisconsin Bar. A. S. Bosquit, Clk. of Bd. of Supervisors.

WILLOWDALE, ONT.—Bids are asked until Aug. 27 for the construction of the steel superstructure of a bridge over River Rouge, consisting of two 54-ft. span, 14 ft. wide. Peter S. Gibson & Son, Willowdale, Engrs.

EDMONTON, N. W. TER.—Bids are asked until Sept. 13 for the construction of the superstructure of a railway and general traffic bridge at Edmonton; check, $7,000. Address, E. F. E. Roy, Secy. Dept. of Pub. Wks., Ottawa.

BUILDINGS.

ST. ALBANS, VT.—Bids are asked by the supervising architect, Washington, until Sept. 19, for the steam heating and ventilating apparatus for the U. S. building in this city, as stated in our advertising columns.

BEVERLY, MASS.—The contract for the construction of a school bulding in this town is reported to have been let to S. R. Dexter, of Beverly, at $39,701. Bolger & Regan received the heating contract at $4,250.

BOSTON, MASS.—Plans are being prepared, according to reports, for a brick and stone dwelling to be erected at Beacon and Hereford Sts., for E. C. Swift, 46 Ames Bldg., at a cost of about $75,000. Archs., McKim, Mead & White, 160 5th Ave., New York.

NORTH ADAMS, MASS.—It is reported that Porter & Harnum, of North Adams, has been awarded the contract for the erection of a $125,000 hotel building on State St. for P. J. Boland.

ITHACA, N. Y.—Plans are stated to have been completed for the new chemical laboratory to be erected for Cornell University, to cost about $45,000. Work is expected to begin at once, and to be completed by June, 1899.

NEW YORK, N. Y.—Bids are asked by the department of public charities, foot of East 26th St., until Aug. 30, for the materials and work required for alterations to the old building on the pier of the department, foot of East 26th St. Archs., Horgan & Slattery, 1 Madison Ave.——Plans have been filed by Levi P. Morton, for a 12-story brick office building at 110 to 116 Nassau St., to cost $250,000. Archs., Clinton & Russell, 32 Nassau St.; by Peter Wagner, 215 West 106th St., for four 4-story brick dwellings on 95th St., west of Central Park, to cost $80,000. Arch., G. Fred. Pelham, 503 5th Ave.; by Wm. H. Lake, Yonkers, N. Y., for five 3-story brick dwellings at 154th St. and St. Nicholas Ave., to cost $75,000. Arch., Henri Fouchaux, 11th Ave. and 162d St.; by Bell & Groth, 81 East 125th St., for three 5 and 6-story brick flat buildings, at 3d and Boston Aves., to cost $125,000. Arch., C. A. Millner, 81 East 125th St.; by M. L. Fane, 239 East 22d St., for a 5-story and basement brick store and loft building at 8th Ave. and 36th St., to cost $75,000. Arch., F. P. Dinkelberg, 3 Union Square West; by Stewart & Smith, 459 Boulevard, for seven 5-story brick dwellings at 106th St. and Riverside Drive, to cost $140,000. Arch., Clarence True; by E. B. Grigsby, for a 5-story brick and stone dwelling at 59 East 67th St., to cost $50,000. Archs., Cable & Lucas, 1183 Broadway.——Thos. J. Reilly, 170 5th Ave., is reported to have been awarded the contract for the construction of a 11-story fireproof hotel building at 5th Ave. and 45th St., for the Matthew Byrnes Estate, to cost about $750,000. Archs., J. O'Rourke & Sons, 7 Clinton St., Newark, N. J.

NEW YORK, N. Y.—Bids are asked by the department of charities, foot of East 26th St., until Sept. 6, for the removal of old chimney and three old boilers, erection of self-supporting steel stack, four new down-draft boilers, erection of derrick and coal yard, and certain repairs, additions and alterations to steam-heating apparatus at Almshouse, Blackwell's Island; two bonds required, $8,000 each.——Press reports state that a 17-story brick and stone hotel building will soon be erected for a syndicate at southwest corner of Park Ave. and 42d St., to cost about $1,000,000. Plans are now being finished. Arch., Bruce Price, 1133 Broadway.

TOMPKINSVILLE (S. I.), N. Y.—Bids are asked until Sept. 15 for erecting the Plum Beach light-house, R. I., as stated in our advertising columns. Lt.-Col. D. P. Heap, U. S. Engrs.

CAMDEN, N. J.—Plans will be received by the commissioners of public instruction, at Broadway and Clinton Sts., until Aug. 30, for a new high school building, to be erected at Haddon and Newton Aves. Chn., Cornelius Sheperkotter.

ELIZABETH, N. J.—It is reported that plans are being prepared for a new gothic church building, 130 × 70 ft., to be erected for the Central Baptist Church on Jersey Ave. Pastor, Dr. E. T. Tomlinson; Archs., A. F. Leicht and F. T. Camp, 97 Cedar St., New York.

LONG BRANCH, N. J.—At the election held in this city Aug. 16 it was voted to appropriate $45,000 for the erection of a new high school building.

PATERSON, N. J.—The following bids were received by the supervising architect, Washington, D. C., Aug. 22, for a low pressure, return circulation, steam heating and ventilating apparatus for the post-office building at Paterson:

Edward Joy, Syracuse, N. Y.	$6,500	3 mos.
Frank Dobson, New York	7,395	*50 days.
Evans, Almiral & Co., New York	6,723	90 days.
Borges Bros. & Co., Columbus, O.	5,344	*75 days.
D. R. Burns, Philadelphia, Pa.	5,980	80 days.
Jno. F. Dalton, Savannah, Ga.	6,187	90 days.
McIlvain, Unkerfer & Co., Pittsburg, Pa.	5,335	60 days.
Gaylord & Eitapence, Binghamton, N. Y.	5,999	60 days.
Blake & Williams, New York	6,596	90 days.
Phila. Heating & Vent. Co., Phila., Pa.	7,939	8 weeks.
E. Rutzler, New York	7,345	75 days.
A. A. Sanborn, Boston, Mass.	6,672	....

*Working days.

LANCASTER, PA.—McLaughlin & Gersell, 220 East Walnut St., Lancaster, have received the contract for the construction of a building for the Lancaster Insane Asylum, at $71,956, according to reports.

PITTSBURG, PA.—The Central Methodist Episcopal Church, of which Dr. C. E. Moyg is pastor, contemplates the erection of a new church building at Academy and Franklin Sts., on property recently purchased.

VILLA NOVA, PA.—It is reported that the preliminary work for the erection of new monastery and college buildings at this place will begin next month; total estimated cost, $250,000 to $300,000.

WOODVILLE, PA.—The following bids were received by the commissioners of Allegheny county Aug. 16 for the construction of the new insane asylum building at the county home: John H. Trimble & Bros., $241,600; William Kerr & Sons, $240,000; H. L. Kreusler, $239,990; George A. Cochrane, $238,814; W. F. Trimble & Son, $238,068; Deeds Bros., $237,000; Rose & Fisher, $236,000; Kerr & Fox, $235,971; Murphy & Hamilton, $234,950; D. P. Osterling, $231,000; Jackson & Fulton, $228,450; A. & S. Wilson, $225,877; McIlvain, Unkefer & Co., $223,700. On the former set of bids received Aug. 3, D. P. Osterling was the lowest bidder, at $237,600. The contract was let to A. & S. Wilson, of Pittsburg, Pa.

WASHINGTON, D. C.—The following bids have been received by the district commissioners for the construction of an additional story to police station No. 8 U St., between 9th and 10th Sts, N. W.: George W. Corbett, $5,411; N. H. Thomas & Son, $5,370; Pavarini & Greer, $5,190; J. M. Dunn, $4,900.

BALTIMORE, MD.—The following bids were received by the supervising architect, Aug. 22, for modifications and repairs to the heating and ventilating apparatus, etc., of the U. S. building at Baltimore: Wells & Newton Co., Baltimore, Md., $2,475, 6 days; Crookhorner & Co., Baltimore, Md., $1,727, Sept. 15; Thos. C. Basshor & Co., Baltimore, Md., $1,874, 30 days; Philadelphia Heating & Ventilating Co., Philadelphia, Pa., $1,957, Sept. 25.

RALEIGH, N. C.—J. D. Elliott, Hickory, N. C., was awarded the contract, Aug. 20, by the trustees of the North Carolina Institution for the Blind, for erecting a new brick dormitory at the negro department, to cost $11,500; and also for the erection of a power house, the machinery for which is to be bought later, and a new dormitory at the white department, to cost $45,000.

OMAHA, NEB.—The following bids were received by the supervising architect, Washington, D. C., Aug. 16, for two hydraulic passenger elevators, one hydraulic mail lift and one hydraulic ash lift for the U. S. Building at Omaha: Crane Elevator Co., Chicago, Ill., $10,000, 90 days; Otis Bros. & Co., New York, $13,150, 90 days; Eaton & Prince Co., Chicago, Ill., $10,100, 120 days.

HOT SPRINGS, ARK.—A fire in this city, Aug. 20, destroyed the National and Windsor Hotel buildings, causing a reported loss of $75,000.

SEATTLE, WASH.—Bids are asked until Aug. 29 for constructing two houses at Point Wilson. Harry Taylor, Capt. Engrs., Burke Bldg., Seattle.

MONTREAL, QUE.—It is reported that plans are being prepared for Wm. J. McDermott, of Craig St., for a building to replace the old Irish National Hall, to cost about $80,000.

ST. THOMAS, ONT.—Bids are asked until Sept. 7 for remodeling and enlarging the court house of Elgin county in this city. Clk., K. W. McKay; Arch., N. R. Darragh, St. Thomas.

WATER-WORKS.

AUBURN, ME.—E. S. Paul, Pres. Water Com., writes us that all the work for a better water supply is being done by the day, under the management of the superintendent of water-works.

ALEXANDRIA BAY, N. Y.—Col. O. G. Staples writes us that a special meeting to consider the question of works has been called.

AMSTERDAM, N. Y.—J. R. Snell, Supt., informs us that the city is getting bids for the following iron and vitrified pipe. The plans and specifications for dams and laying pipe, etc., are not quite ready. The quantities of pipe are as follows: 270 lengths of 24-in. iron pipe, 2,120 lbs. to length; 280 lengths of 24-in. iron pipe, 2,349 lbs. to length; 280 lengths of 24-in. iron pipe, 2,580 lbs. to length; 197 lengths of 36-in. iron pipe, 4,070 lbs. to length; 10 lengths of 16-in. iron pipe, 1,152 lbs. to length; 100 lengths of 20-in. iron pipe, 1,924 lbs. to length; 25 tons specials. All pipe to be cast bell ends down, coated by Smith process, to be good, sound castings, tested to 300 lbs. pressure; weight in total to average as above, but a limit of variation in individual pipe of 4%. All f. o. b. Amsterdam. 20% limit of variation in reducing or enlarging order. Note price for delivery beginning Sept. 1 and ending April 1, 1899; 50% to be delivered before Dec. 1. Also price for winter delivery to begin April 1 and end July 1, 1899.

BUFFALO, N. Y.—The residents of Kenmore have asked this city to supply the suburb with water.

BUFFALO, N. Y.—Bids are asked until Aug. 31 for making repairs and additions to the pumping station, to cost about $10,000. R. G. Parsons, Secy. Bd. Pub. Wks.

DEERFIELD, N. Y.—The town board has accepted the proposition of the West Canada Creek Water Co. to supply this place with water. Secy., E. D. Mathews; Clk., P. D. Condon.

WHITESBORO, N. Y.—This place will probably soon vote on the question of building gravity works.

CALDWELL, N. J.—The Caldwell Water Co., incorporated Aug. 8 to supply this section with water, has asked the borough council for a franchise to establish works. Capital stock, $50,000, with $2,000 paid in. It is proposed to get a supply from driven wells, which would be at least 500 ft. in depth. The promoters of the company will meet a committee appointed by Mayor Jacobus. Pres., James Bowers; Secy. and Counsel, Walter Lindsley. M. B. Lindsley, Treas., writes us that the company proposes to supply Caldwell, township of Caldwell, North Caldwell, townships of Verona and Livingston; population, 5,000.

FLEMINGTON, N. J.—The council proposes to build city works, at a cost of about $40,000, according to reports. Edward B. Allen, Furman Williamson and Geo. H. Large are interested.

HIGHBRIDGE, N. J.—This place is considering the question of building works.

JERSEY CITY, N. J.—The street and water board received but one bid Aug. 18 for furnishing a new water supply. It was from Patrick H. Flynn, Brooklyn. He offered to furnish water by any one of three plans. The first names as the source of supply the Rockaway River, at Old Boonton, with one reservoir. The price of a million gallons varies from $36 for 25,000,000 gallons to $20 for 70,000,000 gallons. The price named for the completed works is $7,595,000 for a 50,000,000 gallon pipe line, or $8,745,000 for a 70,000,000 gallon pipe line. The second plan is the same except that it contemplates three reservoirs. The water is to be furnished by gravity at a pressure of 210 ft. above mean tide. The third bid was informal and was not considered.

SALEM, N. J.—Joseph H. Young and C. J. Young, 4618 Chester Ave., Philadelphia, have been awarded the contract for building the filtration plant of 500,000 gallons capacity at Salem, as advertised in Engineering News. Engr., C. Hungerford, 116 West 69th St., New York.

BEAVER FALLS, PA.—The People's Water Co., it is reported, will proceed with the construction of its proposed works, which was prevented during the summer by the supreme court; estimated cost, $100,000.

EVANS CITY, PA.—Bids are asked until Aug. 29 for furnishing and laying 13,600 ft. of 4 to 8-in. water pipe, a pumping station, reservoir, a 200,000-gallon pump, a gas engine, etc. Engrs., J. P. Leaf, Rochester, Pa.; Pres. Council, Geo. Fehl.

HARRISVILLE, PA.—This place voted Aug. 23 on the question of issuing $7,000 in bonds for works.

MILLHALL, PA.—A charter and franchise have been granted to the Millhall Water Co. The company will issue 5% bonds and start with enough takers to pay interest on bonds and running expenses. Capital wishing an investment with proper bonus can address Jas. P. Hardic, Williamsport, Pa., or Thomas Harmon, Lock Haven, Pa.

PATTON, PA.—The Patton Water Co. has asked for bids for furnishing and laying a 6-in. main in several streets. Supt., E. C. Brown.

PORT GRIFFITH, PA.—James P. Hardic, Williamsport, Pa., water-works contractor and builder, has just completed the laying of 1,150 ft. of 6-in. cast-iron pipe across the Susquehanna River, and several hundred feet on land, connecting with mains leading to the Pennsylvania Coal Co.'s braker at Port Griffith, Pa. The river pipe was laid in four days' time with a gang of five men; average depth of water, 3½ ft. Fred. Dittmar, of Williamsport, Pa., did the calking.

CUMBERLAND, MD.—Bids are asked until Sept. 5 for furnishing 9 dozen ¼-in. corporation cocks; 9 dozen 1-in. stops; 2 dozen 1-in. cocks; 2 dozen 1-in. stop-cocks; 5,500 ft. of pipe, valves, boxes, packing, etc. H. M. Fuller, Clk.

POCOMOKE CITY, MD.—Bids are asked until Sept. 7 for furnishing and constructing works and a sewerage system, as stated in our advertising columns. Engrs., Pownall & Minshall, 150 Nassau St., New York; Mayor, R. M. Stevenson.

LURAY, VA.—The question of building works is being considered.

MARION, N. C.—J. A. McDonald, Mayor, writes us that a private company is making estimates for works; population, 5,200. J. D. Burgin, Old Fort, N. C., may be addressed.

ARLINGTON, GA.—The question of issuing bonds for works and a light plant will probably soon be voted on.

COLUMBUS, GA.—L. H. Chappell, Mayor, writes us that no plans or appropriation has yet been made for artesian wells for a new water supply. The mayor wishes to secure the services of a party who will sink the well at his own risk.

GREENSBORO, GA.—This place is reported to have voted Aug. 9 to issue $22,000 in bonds for works. J. B. Williams, Mayor.

BESSEMER, ALA.—Councilman W. J. Long writes us that the contract for increasing the supply, enlarging reservoirs, etc., of the works of the Bessemer Water-Works Co. was recently let to Henry F. De Bardeleben at $5,000.

DICKSON, TENN.—The question of securing a water supply from Pain Spring is being considered by the Dickson Business League.

MOUNT STERLING, KY.—The council is reported as arranging for the construction of the proposed works. Mayor, Geo. W. Baird; Chn. Com., R. M. Burbridge.

CHURUBUSCO, IND.—The Seckner Contracting Co., The Rookery, Chicago, has been awarded the contract for building works and a light plant at $18,500.

CLARKSVILLE, IND.—Press reports state that the aldermen are making arrangements to put in a filtration plant and to improve the works at a cost of about $25,000.

EAST CHICAGO, IND.—The contract for extending the works has been let to the Seckner Contracting Co., Chicago, at $36,960.

EVANSVILLE, IND.—H. A. Mansfield, Indianapolis, Ind., submitted the lowest bid Aug. 15 for building the boiler house, engine house and stack at $43,600.

LAKE ODESSA, MICH.—This place voted Aug. 16 to issue $11,000 in bonds for works.

PAW PAW, MICH.—Wm. H. Mason, Clk., informs us that the following bids were received Aug. 17 for building works:

James W. Pearl, Boston Harbor, Mich..........	$16,300
T. C. Brooks & Sons, Jackson, Mich.............	16,396
Alexander & Shaw, Chicago, Ill.................	17,900
Kalamazoo (Mich.) Supply & Construction Co.	17,500

CHICAGO, ILL.—Bids are asked until Sept. 1 for constructing a 7-ft. cast-iron water gate, etc., for the Chicago Ave. tunnel connection. L. E. McGann, Comr. Pub. Wks. ——Bids are asked until Sept. 7 for installing water tanks at the Chicago Public Library. W. B. Wickersham, Secy.

GALFSVILLE, WIS.—This place is reported to have voted to build new works, to cost $5,000.

KAUKAUNA, WIS.—C. W. Weeks & Co., Chicago, and Luther Lindauer, Kaukauna, have been awarded the contract for building the works for the Kaukauna Water-Works Co., to cost about $75,000. The work is to be completed by Jan. 1.

OSCEOLA, IA.—J. W. Brown, Mayor, writes us that a committee has been appointed to decide upon plans for works. L. W. London, Chn. Com.

LANESBORO, MINN.—Bids are asked until Sept. 5 for furnishing and building complete works. O. M. Halberstad, Village Clk.

SPARTA, MINN.—Bids are asked until Sept. 9 for the purchase of $1,750 6% water bonds. E. McHale, Pres.

SPARTA, MINN.—The Virginia Iron Works, Virginia, Minn., and Jas. Dowling, Eveleth, Minn., submitted the only bids for building works at $7,992, and $5,450, respectively. Clyde Bender, Recdr.

WALNUT GROVE, MINN.—This place has voted to build works to cost about $3,500.

WAMEGO, KAN.—H. V. Hinckley, Topeka, Kan., has been engaged to prepare plans and specifications for works, and to superintend the construction.

WELLINGTON, KAN.—S. N. Brooks, Mayor, writes us that nothing definite has yet been decided upon in regard to works. The city is yet figuring on works. Population, 3,600.

TEHAMAH, NEB.—An election will soon be held to vote on the question of issuing $2,000 in bonds for extending the works.

SIOUX FALLS, S. DAK.—It is estimated that municipal works can be built for about $90,000.

ANACONDA, MONT.—Bids are asked until Sept. 5 for furnishing this city with a water supply for five years. About 50 hydrants are now used, but this number will be increased. T. O'Leary, Cy. Clk.

ST. JOSEPH, MO.—J. R. Rackliffe, Cy. Engr., writes us that the city is ready to make a contract for the construction of the proposed new works, under either private or municipal ownership. The works will include two low-service pumps of 8,000,000 gallons each; three high-pressure of 5, 8 and 10,000,000 gallons capacity; a stand-pipe, three settling basins, a filter with a capacity of 15,000,000 gallons, 11,000 tons of iron pipe, 600 hydrants, 225 tons of special castings, 500 valves, and a number of meters; estimated cost, $800,000.

WICHITA FALLS, TEX.—Chas. Carrol, Sedalia, Mo., has applied for a franchise for works and a light plant.

FLORENCE, COLO.—Hiram Philips, Oriel Bldg., St. Louis, Mo., has been engaged to prepare plans for works. The source of supply is Newton Creek Canon, about 11 miles distant, and 2,500 ft. above the city. The plans will be completed about Oct. 1, and the proposition to issue bonds will then be voted on. Estimated cost, $100,000.

FOSSIL, ORE.—The council will probably soon begin the construction of the proposed works, to cost about $6,000.

MEDFORD, ORE.—A committee has been appointed to consider the advisability of building a reservoir and of enlarging the works.

PORTLAND, ORE.—Residents of Woodstock and Ivanhoe are circulating petitions to have the Bull Run main tapped. It is estimated that a 4-in. pipe would supply the present demands, and it is proposed to bring the line from the main connected with the upper reservoir along the Milwaukee Road for a distance of two miles. From this line the Ivanhoe and Woodstock pipe systems may be connected and residents supplied.

STENT, CAL.—The question of securing a water supply from one of the nearby cities is being considered.

WHITTIER, CAL.—The question of issuing $40,000 in bonds for new city works is being considered.

FARMINGTON, UTAH.—E. A. Vail writes us that this village is having plans prepared for works which it is expected to build this year. There will be required about 6,500 ft. of 16-in. pipe and 2½ miles of smaller pipe.

IDAHO FALLS, IDAHO.—At the election held Aug. 9 this place voted a tie on the question of issuing $20,000 in bonds for works.

ATWOOD, ONT.—The "Bee" is urging the construction of works for fire protection.

PRESCOTT, ONT.—This place voted Aug. 18 to build works.

WINNIPEG, MAN.—Owing to arrangements not being completed, bids will not be opened Sept. 6 for a system of wells and pumping plant, as advertised in our issues of Aug. 11 and 18. H. N. Ruttan, Cy. Engr.; C. J. Brown, Cy. Clk.

BIRMINGHAM, ENGLAND.—Bids are asked until Sept. 13 for building 17¼ miles of the aqueduct from Cleobury Mortimer to Hagley. The contract consists principally of providing and laying two lines of cast-iron pipe and laying only two lines of steel pipe, 41 ins. in diameter. Engr., Jas. Mansergh, 5 Victoria St., Westminster, London; Town Clk., Edward Orford Smith.

SEWERAGE.

BOSTON, MASS.—The following bids were received Aug. 18 for building brick and pipe surface drain in Selden St passageway and Capen St., Dorchester. T. H. Connolly, $8,531; J. P. O'Connell, $10,501; Collins & Ham, $11,358; T. H. & G. W. Byrne, $12,117; J. J. Falvey, $12,317; D. E. Lynch, $12,933; Jones & Meehan, $13,570; H. P. Nawn, $14,457.

CLINTON, MASS.—Bids are asked by the Metropolitan Water Board, 3 Mount Vernon St., Boston, until Sept. 1 for constructing sections one and two of the system, as stated in our advertising columns. Wm. N. Davenport, Secy.

EVERETT, MASS.—The council has appropriated $10,000 for a sewer in Hendersonville.

SPRINGFIELD, MASS.—The council is arranging to construct a sewer in Worthington St., at a cost of about $15,000.

BUFFALO, N. Y.—Bids are asked until Sept. 2 for constructing 63 to 44-in. brick sewers in Hampshire St., and for a 12-in. pipe sewer in Kenmore Ave. R. G. Parsons, Secy. Bd. Pub. Wks.

DUNKIRK, N. Y.—Bids are asked until Sept. 6 for building a 15-in. pipe sewer in Railroad Ave. W. C. Baugartner, Cy. Clk.

OSWEGO, N. Y.—The board of health has asked the city engineer to prepare plans for a sewer in East Bridge St., to cost about $1,200.

NEWARK, N. J.—The board of works has published notices of intention to build the proposed brick and pipe main sewer in Clinton Ave., from Chadwick Ave. to Clinton Place, with laterals in a number of streets, and for 10 and 8-in. sewers in about 20 streets to connect with the East Branch intercepting sewer.

WOODBRIDGE, N. J.—Press reports state that bids will be asked by the township committee at once for building a portion of the proposed system. Des. Engr., C. C. Hommann.

MANSFIELD, PA.—Councils are reported to have voted to begin at once the construction of 15 to 10-in. pipe sewers for the proposed system.

McKEE'S ROCKS, PA.—E. F. Hughes has been awarded the contract at $5,000 for building certain sewers.

OAKMONT, PA.—This place has voted to issue $37,000 in bonds for local improvements; of this amount $21,000 will be for sewers and $16,000 for streets.

PHILADELPHIA, PA.—The residents of the 17th, 18th and 20th Wards are agitating the question of larger sewers in that section of the city.

SHERADEN (ALLEGHENY COUNTY), PA.—This place has voted to spend $8,000 for sewers and $8,000 for streets.

POCOMOKE CITY, MD.—Bids are asked until Sept. 7 for furnishing the materials and for constructing a system and water-works, as stated in our advertising columns. Engrs., Pownall & Minshall, 150 Nassau St., New York; Mayor, R. M. Stevenson.

RICHMOND, VA.—W. E. Cutshaw, Cy. Engr., writes us that the committee on streets will hear allegations for the construction of certain sewers, after which its recommendations will be submitted to the council for action. It is probable that bids will be asked about the middle of September.

GAINESVILLE, GA.—Survey and estimates for a system, it is reported, will soon be made.

NASHVILLE, TENN.—The city engineer has asked for bids for building a 10-in. pipe sewer in Public Square.

HENDERSON, KY.—Bids are asked until Sept. 6 for constructing a sewer in Washington St. W. I. Thompson, Mayor.

MANSFIELD, O.—Bids are asked until Sept. 17 for building a 30 and 27-in. storm water sewer in certain streets J. C. Burns, Chn. Com.

TIFFIN, O.—Bids are asked until Sept. 5 for changing the main sewer in the 4th ward. J. B. Ehrenfield, Cy. Clk.

YOUNGSTOWN, O.—Bids are asked until Sept. 5 for the purchase of sewer bonds. F. C. Brown, Clk.

CICERO, IND.—Bids are asked until Aug. 27 for constructing a sewer in Spring St. G. J. Holl, Town Clk.

KOKOMO, IND.—The council is reported by local papers to have voted to build a 4-ft. brick sewer in Union St.

RICHMOND, IND.—Bids are asked until Sept. 16 for building the North E St. brick and pipe trunk sewer to be 2,500 ft. long; bond, $10,000. J. H. Winder, Clk.; H. L. Weber, Cy. Engr.

COLDWATER, MICH.—Bids are asked until Sept. 1 for building 18 to 10-in. pipe sewer, etc., in certain streets, to cost about $900, and for paving to cost about $9,000. We are informed that the bids received for this work Aug. 16 were rejected. P. H. Sweeney, Clk.

LAURIUM, MICH.—This place, which voted July 23 to issue $35,000 in bonds for a system, will probably ask for bids in December for the construction. Des. Engr., Chas. F. Loweth, 94 E. 4th Ave., Minneapolis, Minn.; Clk., Jos. R. Murphy.

OWOSSO, MICH.—The city engineer writes us that it is proposed to build a mile of 24 to 8-in. pipe sewer at a cost of $5,500. Des. Engr., H. E. Riggs, The Nasby, Toledo.

KENOSHA, WIS.—Bids are asked by the city clerk for constructing 50 catchbasins.

RACINE, WIS.—It has been decided to build a sewer in 16th St. at a cost of about $4,000.

WAUKESHA, WIS.—Bids are asked until Sept. 2 for furnishing the material and constructing pipe sewers in certain streets. H. E. Blair, Cy. Comptroller.

SOUTH OMAHA, NEB.—It is proposed to build sewers in certain streets in South Omaha.

ANACONDA, MONT.—Patrick Walsh has been awarded the contract for building sewers in Districts 7, 8, 10 and 11, at $4,636.

DENTON, TEX.—This place is reported as considering the question of building a system.

SAN SABA, TEX.—Bids are asked until Sept. 1 for constructing a sewer to the river; check, $500. Jno. Seiders, County Judge.

INDEPENDENCE, MO.—Andrew Rosewater, Bee Bldg., Omaha, is reported to have recommended a system which will collect the sewage of the city at two or more points and dispose of it in air-tight tanks and by filtration. Estimated cost of two stations, $35,000; estimated cost of main sewers inside the city limits, $40,000. Mr. Rosewater's plan is for the city to issue $75,000 in bonds, build the plant for disposing of sewage and all the sewers necessary in the city. The council will take the report under consideration and probably call a special election.

ST. LOUIS, MO.—Bids are asked until Aug. 26 for reconstructing about 1,025 ft. of the bottom of the Mill Creek main sewer. B. H. Colby, Sewer Comr., 311 New City Hall.

GRASS VALLEY, CAL.—The city trustees will probably soon call an election to vote on the question of building a system.

CHARLOTTETOWN, P .E. I.—The council is reported as arranging for the construction of the proposed system, for which $50,000 in bonds will be issued at once. Two sewage pumping stations will be built.

MONTREAL, QUE.—The aldermen are considering the question of the better disposal of the sewage. T. J. O'Neill, Secy. Road Com., and Aldermen Dupre and Wilson may be addressed.

GARBAGE DISPOSAL—STREET CLEANING

PORTCHESTER, N. Y.—The question of a better method for the disposal of the garbage, waste, etc., is being considered, according to reports.

HAZLETON, PA.—The council is considering the question of garbage collection, etc. Councilman Ferry may be addressed.

KNOXVILLE, TENN.—The question of building a plant is being considered, according to reports.

BAY CITY, MICH.—The question of securing a garbage disposal plant is being considered.

LOS ANGELES, CAL.—The council will ask for bids at once for sweeping the streets. Bids will be asked under three specifications. The first provides for the sweeping of the business section by machines; the second for the sweeping of the business district by hand, and the third provides for sweeping of that portion of the city outside the given business area by machines.

STREETS AND ROADS.

PORTLAND, ME.—The county commissioners received the following bids Aug. 15 for paving the approach of Portland bridge, as noted in our issue of Aug. 11: W. L. White labor, $6,811; material, $4,521; Maine & New Hampshire Granite Co., labor, $2,136, material, $4,279; T. F. Griffin & Bro., labor, $2,362; material, $3,888; Geo. S. Staples, labor, $5,528; Fernald Bros. & Higgins, material, $4,467. The contract has been awarded to the Maine & New Hampshire Granite Co. for the labor and to T. F. Griffin & Bro. for material. An arrangement is said to have been made between the latter two concerns by which the work will all be done by T. F. Griffin & Bro., at the rate bid, $6,024. W. B. Allen, Chn. County Comrs.; Geo. N. Fernald, Comr. Pub. Wks.

BOSTON, MASS.—The street commissioners have decided to lay out and pave Rockford and Nottingham Sts., at Dorchester and will grant a public hearing Sept. 1.

SOMERVILLE, MASS.—Bids are asked until Aug. 29 by the Metropolitan Park Commission for 1,000 cu. yds. of earth grading, 2,000 sq. yds. of gravel walk surfacing and 4,200 sq. yds. of roadway foundation and broken stone surfacing on Middlesex Ave. Wm. T. Pierce, Engr., 13 Exchange St., Boston.

BRISTOL, CONN.—Bids are asked until Aug. 31 by the board of selectmen for grading and graveling a section of road between this place and Plymouth; check, $500. Hobart A. Warner, Fred. N. Manross and Anson Q. Perkins, Selectmen.

HADDAM, CONN.—Bids are asked until Aug. 31 by the board of selectmen for constructing and grading about 1,500 ft. of highway; bond, $1,000. Eph. P. Arnold, Willis A. Bonfoey and Chas. B. Northam, Selectmen.

LITCHFIELD, CONN.—Bids are asked until Sept. 5, by the board of selectmen for grading and telfordizing a section of road from this place to Morris. Chas. Merriman, Pat. C. Burke, Newton G. Tyler, Edgar D. Beach and Jerome D. Wheeler, Selectmen.

NORTH BRANFORD, CONN.—Bids are asked until Aug. 31 by the selectmen for constructing pavements; bond, $1,000. A. B. Hill, Engr., 82 Church St., New Haven.

ALBANY, N. Y.—Bids are asked until Sept. 5 by the board of contract and apportionment for 11,000 sq. yds. of vitrified brick paving; 6,530 lin. ft. of 6-in. granite curbing; 270 lin. ft. of circular granite curbing; 60,000 sq. ft. of new brick sidewalk; 10,000 sq. ft. of new 4-ft. flag sidewalk and six receiving basins, for Elm St., from Grand St. to Delaware Ave. Horace Andrews Cy. Engr.

BUFFALO, N. Y.—The commissioners of public works Aug. 18 received the following lowest bids: For surfacing Ferry St., from Niagara to Massachusetts Sts., Barber Asphalt Paving Co., New York, $14,533; for repaving Babcock St. with brick, L. H. Gipp, $20,000, with asphalt, Henry P. Burgard, $23,000. R. G. Parsons, Secy. Bd.

BUFFALO, N. Y.—Bids are asked until Sept. 2 for street work in Niagara Square. Address G. H. Selkirk, Secy. Park Comn.

LITTLE FALLS, N. Y.—Halliman Bros. have been awarded the contract to construct Ray St., and construct pipe, sewer and grade Loomis St., at $14,430. The only other bid was that of Jas. Creagh, $15,369. S. E. Babcock, Cy. Engr.

NEW ROCHELLE, N. Y.—The board of trade held a special meeting Aug. 11 to consider the proposition to bond the town for highway purposes. Action was deferred. C. W. S. Wilson, Village Engr.; G. R. Olney, Supt. Pub. Wks.

PORTCHESTER, N. Y.—Bids are asked until Sept. 6 by the village trustees for 19,850 sq. yds. of brick paving in three streets. J. A. Kirby, Engr.

ROCHESTER, N. Y.—The council is preparing to improve portions of Maple St., Post St., Front St., Center St., Chili Ave., Immel Place and Hudson Ave., by grading, paving, curbing and sidewalk.——The Warren-Scharf Asphalt Paving Co., New York, has been awarded the contract to construct an asphalt pavement on Clarissa St., from the river to Plymouth Ave., at $11,565, according to report. Edwin A. Fisher, Cy. Engr.

SCHENECTADY, N. Y.—Bids are asked until Sept. 1 for the improvement of the two miles of the Troy and Schenectady Turnpike, from the city line of Schenectady, easterly. C. W. Adams, State Engr., Albany, N. Y.

TROY, N. Y.—Bids are asked until Aug. 30 for brick paving on Harrison St., etc. E. Ogden Ross, Secy. Contracting Bd.

ATLANTIC CITY, N. J.—A paving ordinance is under consideration by the city council which provides for the macadamizing of all the cross avenues between Connecticut and Missouri Aves., twenty in number. Before amendment the ordinance provided for vitrified brick paving on certain streets. John P. Ashmead, Cy. Engr.

HASBROUCK HEIGHTS, N. J.—Bids are asked until Sept. 6 for macadam paving, etc., as stated in our advertising columns. Engr., Lemuel Lozier, Hackensack, N. J.; Clk., G. H. Ramsden.

CONSHOHOCKEN, PA.—The town council has passed an ordinance requiring owners of real estate on Cherry St. between Elm St. and the Pennsylvania R. R. to pave, curb and gutter in front of their property. Jos. W. Cavanagh, Pres.; Harry B. Heywood, Clk.

LANSDOWNE, PA.—The citizens will soon vote on a proposition to borrow $15,000 for the purpose of improving the streets. Thos. G. Janier, Borough Surv.

MAUCH CHUNK, PA.—The town council has voted to spend $1,500 in the construction of about 700 yds. of macadamized streets, according to report.

PHILADELPHIA, PA.—Bids are asked by the department of public works until Aug. 30 for sundry paving, grading, etc., in this city. Director, Thos. M. Thompson.

PHILLIPSBURG, PA.—Hugh E. Crilly, Allentown, has been given the contract to pave 1¾ miles of streets with brick at $30,000, according to report.

PITTSBURG, PA.—Bids are asked until Aug. 27 by the county commissioners for the improvement of the Beaver road, the Library road and the Sharpsburg and Kintanning road in Allegheny county; bond, $60,000 for each of the three contracts. F. W. Patterson, County Road Engr., 29 Court House, Pittsburg.

READING, PA.—The board of public works received bids Aug. 18 for 13,000 lin. ft. of curbing and 41,500 sq. yds. of asphalt paving, as noted in our last issue. The bidders were: Pennsylvania Asphalt Paving Co., Philadelphia; Alcatraz Co., New York; Richardson & Ross, and the Barber Asphalt Paving Co., New York.

WILMINGTON, DEL.—John Jacoby has been awarded the contract by the board of health to pave Lord St., between Poplar and Lombard Sts. with brick. Simmons & Bro. were the only other bidders.

ANNAPOLIS, MD.—Jos. Jewell was awarded Aug. 16 the contract to pave Prince George, Bladen and Compromise Sts. and Market Space, around the City Park. His bid was: Prince George St., $2,710; Compromise St., $460; Market Space, $745, and Bladen St., $393. Geo. Jewell, Cy. Comr.

CUMBERLAND, MD.—Bids are asked until Sept. 5 for furnishing vitrified paving brick, sand for street work, curbing and crossing stone and resetting curbing now in use, terra cotta pipe and oak and pine lumber. Howard M. Fuller, Clk.

ROCKVILLE, MD.—The county commissioners decided Aug. 19 to readvertise for bids for macadamizing 8 miles of the Rockville Pike. The appropriation is $25,000.

MONROE, LA.—Bids are asked until Sept. 8 for 7,788 sq. yds. of vitrified brick paving on 6 ins. of concrete. A. A. Forsythe, Mayor.

NEW ORLEANS, LA.—Bids are asked until Aug. 29 for asphalt paving in Rampart St. P. A. Rabouin, Comptroller.

FRANKFORT, KY.—Bids are asked until Aug. 26 for the construction of an artificial stone or cement pavement at the corner of Main or Montgomery and St. Clair Sts. W. S. Dehoney, Mayor; Ben. Marshall, Cy. Clk.

HENDERSON, KY.—Bids are asked until Sept. 6 for 2,000 cu. yds. of conglomerate gravel. Mayor, W. I. Thompson.

LOUISVILLE, KY.—The Assyrian Asphalt Co., Chicago, was awarded the contract Aug. 10 to pave three squares of Hepburn Ave. and one square of Von Borries Ave., with asphalt at about $21,000. Louis A. Mehler has been awarded the contract to reconstruct and pave 28th St., from Chestnut St. to Broadway and Magazine St., from 26th to 28th Sts., with vitrified brick. G. W. Gosnell received the contract to reconstruct several alleys and Frank Saffran the contract to lay the sidewalks on 9th St., from Grayson to Walnut Sts. Chas. F. Granger, Chn. Bd. Pub. Wks.

BOWLING GREEN, O.—A. Graham was awarded the contract Aug. 9 for paving North Grove St. at $4,732. The other bids were: J. C. Carland, Toledo, $4,976; W. C. Blystone, $4,980, or $4,866, according to which block was selected.

COSHOCTON, O.—Bids are asked until Sept. 5 for the purchase of 15 street bonds aggregating $22,500, which are issued for the purpose of paving Main St. with vitrified brick. Bids are also asked until Sept. 10 for 11,000 cu. yds. of excavation; 21,000 sq. yds. of brick paving; 6,900 lin. ft. of curbing. F. F. Wagner, Village Clk.

DAYTON, O.—Bids are asked until Aug. 29 for grading, graveling and paving with boulders, the alley south of Germantown St., from Summit to Greencastle Sts. J. L. Baker, Pres.; J. E. Gimperling, Cy. Comptroller.

NELSONVILLE, O.—Bids are asked until Sept. 10 for improving Chestnut St., as stated in our advertising columns. Asher Buckly, Mayor; Jas. Sharp, Village Clk.

TOLEDO, O.—Bids are asked by the commissioners of Lucas county, until Sept. 13 for 1,225 cords of crushed limestone. Wm. M. Godfrey, County Audr.

YOUNGSTOWN, O.—Bids are asked until Sept. 12 for the paving of Scott St., between Wuck and Belmont Avenues. H. W. Calvin, Cy. Clk.

INDIANAPOLIS, IND.—Bids are asked until Aug. 29 for grading and laying cement sidewalks on 13th St., from Illinois St. to Capital Ave., and for grading and brick paving the first alley east of New Jersey St., from St. Clair to Pratt Sts. M. A. Downing, Chn. Bd. Pub. Wks.

LAFAYETTE, IND.—The Indiana Construction Co., Don M. Roberts, Mgr., Terra Haute, has been awarded a contract for nine miles of cement sidewalk at $22,000, according to report. W. K. Eldridge, Cy. Engr.

LOST CREEK, IND.—Bids are asked until Sept. 5, according to report, by the county commissioners for the construction of new gravel roads in Lost Creek township.

ROCKVILLE, IND.—Bids are asked until Sept. 10 for the improvement of six highways in Parke county, aggregating a total length of 16 miles, including grading, draining, bridging and graveling. E. H. Owen, Auditor.

COLDWATER, MICH.—The council has rejected the bids received Aug. 16 for furnishing the material and constructing a brick pavement on concrete foundation on Chicago St., as advertised in Engineering News. New bids are asked until Sept. 1. The bidders were: J. J. Granville, Saginaw; John McLoughlin, Detroit; and W. McLane, Coldwater. P. H. Sweeney, Cy. Clk.

CHICAGO, ILL.—Bids are asked until Aug. 31 for grading, curbing, and paving in a number of streets. L. E. McGann, Pres. Bd. Local Improvements.

MANSFIELD, O.—Bids are asked until Sept. 12 for $13,600 six per cent. street improvement bonds, according to report; deposit, 10%. F. M. Remy, Cy. Clk.

MILWAUKEE, WIS.—Theo. C. Froemming has been awarded the contract for macadamizing Galena St., from 4th to 7th Sts, $3,914, according to report.——The park board is planning to extend the Highland Boulevard, thus uniting West Park with the present boulevard. G. H. Benzenberg, Cy. Engr.

CEDAR FALLS, IA.—The Likes Improvement Co., Des Moines, has received the paving contract amounting to $32,315, according to report.

KEOKUK, IA.—Bids are asked until Sept. 5 for 5,761 sq. yds. of brick, and 5,338 sq. yds. of macadam paving, etc. G. M. Walker, Cy. Engr.

OMAHA, NEB.—Bids are asked until Sept. 2 for repaving and resetting curbs on Poppleton Ave., from 29th Ave. to 32d St. John H. Butler, Chn. Bd. Pub. Wks.; Wm. Coburn, Secy.

KANSAS CITY, MO.—Contracts were awarded Aug. 11 by the public improvements committee of the council as follows: Walter Hickman, paving two alleys, $1,133; A. L. West, grading on Victor St., $801; G. K. White, grading on 29th St., $1,772; Wm. Trehey, grading on Lockridge St., $428; Jos. Gastl, curbing on Walnut St., $1,647; M. Schoonmaker, brick sidewalks, $504; Kansas City Cement Sidewalk Co., granitoid sidewalks, $929; Parker-Washington Co. granitoid sidewalks, $1,028; Bandera Co., natural stone sidewalks, $1,440. R. W. Godfrey, Secy. Bd.

ST. LOUIS, MO.—Bids are asked until Sept. 8 for constructing a granitoid walk in Hyde Park; deposit, $150. Also for constructing a granitoid walk in Benton Park; deposit, $120. M. L. Holman, Pres. pro tem.; Emory S. Foster, Secy.

SEDALIA, MO.—Bids are asked until Aug. 29 for paving Ohio Ave. with cedar blocks. Jos. Starr, W. L. Jones, T. J. Brown, Com. on Sts. and Alleys.

SPOKANE, WASH.—Geo. Latham was awarded the contract Aug. 10 for grading Mission Ave., from Division to Standard St., at $1,147, and Fife & Conlan the contract for grading Chestnut St., from 2d to 4th Aves., at $457.

SAN FRANCISCO, CAL.—The City Street Improvement Co. has been awarded the contract to asphalt Market St., from 2d to 6th St., at $13,776. Thos. Ashworth, Supt.

ANACONDA, MONT.—Arnold Mickels has been awarded the contract, at $2,150, to construct 12 miles of wagon road between Lincoln gulch and Helmville, along the Little Blackfoot River, according to report.

OWEN SOUND, ONT.—It is reported that the ratepayers will vote Aug. 25 on the proposition to borrow $10,000 for the purpose of macadam roads, for repairs and to buy a steam road roller.

MANUFACTURING PLANTS

PYRITES, N. Y.—The plant of the High Falls Sulphite Pulp & Mining Co., at Pyrites, was destroyed by fire Aug. 21. The loss is placed at $300,000; insurance, $50,000.

LODI, N. J.—John W. Ferguson is said to have been awarded the contract for the erection of a new silk mill for Boetager Bros., to cost between $75,000 and $100,000.

CHESTER, PA.—It is reported that Robert Wetherill & Co., engine builders, will erect a large foundry in this city in the fall. It will be built on Seventh St., and will be 145 × 65 ft.

SIEGFRIED, PA.—We are informed that the Lawrence Cement Co. expects to erect a number of fireproof mill buildings and stock houses at this place for a new plant to have a daily capacity of 2,000 bbls. of Portland and common cements. Plans are now being prepared by Lathbury & Spackman, 1619 Filbert St., Philadelphia. No contracts have yet been let.

BENNETTSVILLE, S. C.—A company composed of C. S. McCall, D. D. McColl, C. M. Weatherly, M. A. J. Moore and others, has been organized with a capital stock of $100,000, to operate a cotton mill. It is said that 20% of the capital stock will be subscribed in order to begin at once the erection of a new mill.

LEXINGTON, MISS.—The Lexington Compress & Oil Mill Co. will soon erect a cotton compress at this place, to cost about $30,000. Pres., R. E. Wilburn; Secy., W. H. Durden.

CINCINNATI, O.—The Lodge & Shipley Machine Tool Co. informs us that bids were to be received until Aug. 24 for the erection of a brick and steel building, 300 × 90 ft., to cost $18,000. A 100-HP. engine and a 125-HP. boiler will be installed. Arch., Bert Baldwin, Race and 5th Sts.

DAYTON, O.—A fire in this city, Aug. 14, damaged the plant of the Pasteur-Chamberlain Filter Co., causing a loss of about $50,000.

LORAIN, O.—Bids are asked until Aug. 27 for the erection of a new factory building for F. C. Whitmore. Arch., H. O. Wurmser, of Lorain.

NORWALK, O.—The Sprague Umbrella Co., whose plant was burned Aug. 9, causing a loss of about $60,000, writes us that it is not yet ready to consider bids for the reconstruction of the plant.

PAINESVILLE, O.—The Robison Basket Co., of Painesville, informs us that bids are now being received for the construction of a new basket plant to replace the one totally destroyed by fire Aug. 7, and valued at $72,000. It is expected to erect three 2-story iron covered buildings, 40 × 200 ft., and one 1-story structural iron building, 100 × 100 ft. Bids will also be received in 30 days on the necessary equipment, including a 150-HP. Corliss engine, an electric light plant and general equipment for wood working machinery.

WELLSTON, O.—Lathbury & Spackman, Consulting Engrs., 1619 Filbert St., Philadelphia, have been retained by the Alma Portland Cement Co., of Wellston, as engineers to design and furnish specifications and to superintend the erection of a plant to have an ultimate capacity of 1,000 bbls. a day. Construction is now under way and most of the contracts for machinery awarded.

MISCELLANEOUS CONTRACTS.

WHARF.—Chester, Pa.—The New Chester Wharf Co. proposes to build a wharf in this city this fall.

BONDS.—Buffalo, N. Y.—Bids are asked until Sept. 6 for the purchase of $466,004 of 3½% tax loan bonds. E. C. Knight, Comptroller.

ENGINE.—New Orleans, La.—Bids are asked until Sept. 15 for furnishing a 150-HP. engine for the mint. C. W. Boothby, Supt. Mint.

BONDS.—Tarentum, Pa.—Bids are asked until Aug. 31 for the purchase of about $25,000 of 30-year 5% improvement bonds. F. A. Ready, Clk.

LEVEE.—St. Joseph, La.—Bids are asked until Aug. 31 for building the Kempe levee, below St. Joseph. Maj. J. H. Willard, U. S. Engr., 3232 Prytania St.

SUPPLIES.—Watervliet, N. Y.—Bids are asked until Sept. 23 for furnishing iron, steel, hardware, etc. Col. A. Mordecai, Ordinance Dept., Watervliet.

BONDS.—Dayton, O.—Bids are asked until Sept. 26 for the purchase of $150,000 of levee and $50,000 of 4% water bonds. J. E. Gimperling, Cy. Comptroller.

PIER.—New York, N. Y.—Bids are asked until Sept. 2 for building a new pier at the foot of Watts St., North River, Manhattan. J. S. Cram, Comr., Pier A.

COAL CONVEYORS AND TANKS.—Chicago, Ill.—Bids are asked until Oct. 4 for furnishing and erecting coal conveyors, etc., at certain pumping stations, as described in our advertising columns. L. E. McGann, Comr. Pub. Wks.

DREDGING.—Oakland, Cal.—The council is considering the ordinance for dredging Lake Merritt, at a cost of about $80,000. Councilman Brosnahan may be addressed.

HEADSTONES.—Boston, Mass.—Bids are asked until Sept. 17 for purchasing 10,000 American white marble headstones in slabs. J. McE. Hyde, Q.-M., 195 Summer St., Boston.

JETTIES.—Portland, Ore.—Bids are asked until Oct. 25 for constructing jetties for improving Saquina Bay, Ore., as stated in our advertising columns. Maj. W. L. Fisk, U. S. Engrs.

DAM.—Pittsburg, Pa.—Bids are asked until Aug. 25 for constructing a coffer dam, at Heers Island, Allegheny River, according to reports. Maj. Chas. F. Powell, U. S. Engr., Federal Bldg.

SUPPLIES.—Fortress Monroe, Va.—Bids are asked until Sept. 16 for furnishing cement, broken stone, yellow pine lumber, steel beams, etc. Capt. Thos. L. Casey, U. S. Engr., 166 Cranby St., Norfolk, Va.

DOCKS.—Conneaut, O.—Reports state that the Pittsburg, Bessemer & Lake Erie R. R. Co. has purchased about 200 acres of land at Conneaut Harbor, for dockage purposes, to cost about $350,000. J. H. Reed, Pres., Pittsburg, Pa.

SUPPLIES.—Norfolk, Va.—Bids are asked until Sept. 16 for furnishing and delivering cement, broken stone, lumber, steel beams, etc., at Fort Monroe, as stated in our advertising columns. Capt. Thos. L. Casey, U. S. Engrs.

LAKE OUTLET.—Lake Manitoba, Can.—Bids are asked until Sept. 12 for excavating for a supplementary outlet for increasing and regulating the overflow at Lake Manitoba; check, $4,000. Res. Engr., W. F. Gouin, Winnipeg; Secy. Pub. Wks., E. F. E. Roy, Ottawa, Ont.

CANAL.—Chicago, Ill.—Bids are asked until Sept. 21 for constructing about eight miles of feeder of the Illinois & Mississippi Canal, as stated in our advertising columns. L. L. Wheeler, Asst. Engr., Sterling, Ill.; Maj. W. L. Marshall, U. S. Engrs., 1636 Indiana Ave., Chicago.

CEMETERY.—La Crew, Ia.—Bids are asked until Aug. 29 for preparing and enclosing a cemetery about three miles from this town. It will be 529 × 567 ft. There will be required about 3,100 ft. of 6 and 4-in. drain tile, a 3-rail iron fence 2½ ft .high, etc. Address W. B. Seeley, La Crew, Ia.

FIRE ALARM SYSTEM, ETC.—Dallas, Tex.—The District Messenger & Fire Alarm Co., granted a franchise for 35 years, and want to install a complete messenger service, fire and police call system, desires bids on boxes, indicators and registers, wire and construction material. O. G. Gorman, in charge of construction, is receiving bids on material. R. H. Gamble, Secy.

DRY DOCK, ETC.—Vancouver, B. C.—Press reports state that arrangements are now being made for a marine railway and dry dock. Reports have been received here that the British government intends to send a regiment of infantry to be stationed at Vancouver, and that it will build a dry dock here and place the harbor in a defensive condition.

DRY DOCK.—West Superior, Wis.—The American Steel Barge Co. has decided to build another dry dock at the plant in this city. Several months ago the company projected the dock, but owing to the fact that there was not sufficient channel room for vessels to reach the site selected, construction could not be commenced until the council voted to extend the lines. After a bitter fight in the council between the conflicting property interests, the aldermen voted last night to make the necessary alterations and secure the dry dock for this city. A meeting of the company's officials will be held Aug. 27 to approve the plans.

CONTRACT PRICES.

ASPHALT PAVING.—New Orleans, La.—The following bids were received Aug. 8 for asphalt paving in certain streets; the Barber Asphalt Paving Co.'s bid was for Trinidad Lake Asphalt, while that of the Southwestern Alcatraz Asphalt & Construction Co. was for Santa Barbara, Cal., asphalt, and the General Asphalt Co. will use rock asphalt; A. C. Bell, Cy. Engr.:

Bids Received at New Orleans, La., Aug. 8, 1898, for Asphalt Paving.—Canal St. from Delta to Liberty.

Items.			Barber Asphalt Paving Co.	Southwestern Alcatraz Asphalt & Construction Co.	Ayers Asphalt Paving Co.	Belden & Seely.
Asphalt pavement	On square blocks	42,000 sq. yds.	$2.38	$2.63	$2.65	$2.28

REPAIRING ASPHALT PAVEMENT.—Brooklyn, N. Y.—The commissioners of highways received bids Aug. 2 for repairing and maintaining about 16 miles of asphalt streets from Cranford & Co.,the Brooklyn Alcatraz Asphalt Co. and the Eastern Bermudez Asphalt Paving Co.,as follows: For Class No. 1—13 cts. a sq. yd., 11½ cts. and 13 cts., respectively; new bridge stones, 40 cts. a sq. ft., 47 cts. and 50 cts., respectively; new curb stones, 75 cts. a lin. ft., 78 cts. and 80 cts., respectively; restoring opening made in pavement, $3.00 a sq. yd., $3.15 and $3.28. Class No. 2—Repairing, etc., 13 cts., 15 cts. and 14½ cts.; Class No. 3—20 cts., 26 cts. and 23 cts.; Class No. 4—18 cts., 20 cts. and 21½ cts.

DIKE, DREDGING, ETC.—Virginia.—The following bids were received by Lt.-Col. Chas. J. Allen, U. S. Engr., Washington,D.C.,Aug.6,1898,for constructing a dike and for dredging, etc., as advertised in Engineering News: Dike in York River, Va., W. B. Bradley, Manchester, Va., $6 a lin. ft.; B. F. Sweeton & Son, Camden, N. J., $6.54; A. M. Clegg, Washington, $8.28; The Degnon-McLean Construction Co., 1 Broadway, New York, $6.50; Sanford & Brooks Co., 21 S. Gay St., Baltimore, $6.73; Justin McCarthy, Norfolk, Va., $5.85. Dredging and rock excavation: Item 1, Rappahanock River, dredging; 2, the same river, rock excavation; 3, Urbanna Creek dredging, a cu. yd.: A. M. Clegg and M. A. Dugan, Washington, item 1, 29¾ cts.; 2, $3; 3, 18 cts.; John Miller, Washington, item 1, 27 cts.; 2, $4.90; 3, 19 cts.; Chas. W. Johnson, Lewes, Del., item 1, 29 cts.; 2, $6.45.

HIGHWAY.—Truro, Mass.—The following contract was let Aug. 18, 1898, to C. W. Snow, Taunton, Mass., for building a road in Truro; A. B. Fletcher, Secy. Massachusetts State Highway Commission, Boston: 600 cu. yds. of excavation at 20 cts. a cu. yd.; clay, 600 cu. yds., $1.29; broken stone in place, 800 tons, $2.00; total, $2,494.

PROJECTILES.—Washington, D. C.—The following bids were received last week by the navy chief of ordinance for furnishing the following projectiles: Cast Steel—1,000 13-in., 1,000 12-in., and 600 10-in. Forged Steel—3,000 8-in., 5,000 6-in., 5,000 5-in., and 5,000 4-in. The Midvale Steel Co., Philadelphia, 13-in., $101; 12-in., $84.50; 10-in., $52.50; 8-in., $26.14; 6-in., $10.25; 5-in., $5.38; 4-in., $3.99. Alternate, all of cast steel and part of forged steel, as follows: 13-in., $97.89; 12-in., $82.10; 10-in., $50.89; 8-in., $26.14; 6-in., $10.25; 5-in., $5.38; 4-in., $3.99. If awarded the entire contract, the prices will be as follows: 13-in., $88.90; 12-in., $78.19; 10-in., $47.89; 8-in., $25.77; 6-in., $10; 5-in., $5.30; 4-in., $3.93; time, begin in 45 days and deliver 130 8-in. steel a week or the equivalent in weight of any size. Isaac G. Johnson & Co., Spuyten Duyvil (P. O., New York), N. Y., 13-in., $99; 12-in., $81; 10-in., $49; commence in 60 days and 12 each a week thereafter. American Ordnance Co., Bridgeport, Conn., 4-in., $4.05, 300 a week after 60 days; 5-in., $5.20, 300 a week after 90 days; 6-in., $10, 250 a week after 60 days; 8-in., $22.50, 200 a week after 90 days. Taylor Iron & Steel Co., High Bridge, N. J., 13-in., $102.82; 12-in., $78.96; 10-in., $46.56; commence in three weeks and deliver 100 a week and 200 if necessary. Cumberland Steel & Tin Plate Co., Cumberland, Md., 13-in., $95.40; 12-in., $79.35; 10-in., $49.20; commence in 90 days and 20 a week thereafter or 60 a week of any one size. Driggs-Seabury Gun & Ammunition Co., New York, 13-in., $106, 100 in 80 days, 30 a week; 12-in., $85, 100 in 80 days, 30 a week; 10-in., $55.20, 100 in 75 days, and 40 a week. Mannesman Tube Co., 6 Dupont Circle, Washington, 13-in., $106; 12-in., $89.50; 10-in., $57.60; 8-in., $27.50; commence in 70 days and 120 a week. United States Projectile Co., New York, 8-in., $22.50, 150 to 200 a week after 9 to 10 months; 6-in., $9.75, 175 to 250 after 7 to 8 months; 5-in., $5, 250 to 300 after 9 to 10 months; 4-in., $3, 300 to 400 after 6 to 7 months.

MACADAM ROAD.—Lunenburg, Mass.—The Massachusetts State Highway Commission, Boston, received the following bids Aug. 18, 1898, for building a macadam road in Lunenburg; contract was awarded C. H. Kelleher; A. B. Fletcher, Secy.:

Quantities.			C. H. Kelleher, Newburyport.	A. J. Wellington, Boston.	F. E. Ellis, Melrose.	Asa Goddard, Worcester.
Excavation		900 cu. yds.	$0.25	$0.50	$0.50	$0.50
Borrow		800 " "	.35	.50	.50	.50
Rubble masonry:						
Laid dry		92 " "	3.00	4.00	3.50	2.50
Laid cem't.		110 " "	6.00	8.00	6.50	5.00
Gravel		200 " "	.55	.60	.55	.50
Shaping		5,309 sq. yds.	.02	.02	.02	.02
Broken stone		615 tons	1.30	1.20	1.20	1.40
Trap rock		700 tons	1.75	2.00	2.10	2.00
12-in. pipe		30 lin. ft.	.60	.75	.60	.60
18-in. "		30 " "	.90	1.00	1.50	1.00
Guard rail		250 " "	.15	.20	.20	.20

Totals			$3,782	$4,589	$4,448	$4,213

ELECTRIC LIGHTING.—Brooklyn, N. Y.—The following bid was received from the Edison Electric Illuminating Co. for lighting the Borough of Brooklyn, for the ensuing year: For each 1,200-c. p., 34 cts., and 17 cts. for each 600-c. p.—this is for 3,500 lights or more; for any less number, 35 cts. for each 1,200-c. p., and 18 cts. for each 600-c. p.; for all electric current required for lighting offices in public buildings, 16½ cts. a K-W. power of current. The price of 34 cts. a 1,200-c. p. is the same as that of old contracts under which this company has been lighting Brooklyn. There are at the present time about 3,500 electric lights in Brooklyn, and Deputy Commissioner Walton has 500 Welsbach lights which he is intending to substitute for the electric lights in the residential streets, in which event the price of 35 cts. will prevail. This will make a difference of about $12,000 a year to the city.

BRIDGE MASONRY.—Greenfield, Mass.—The following bids were received recently by the county commissioners for the masonry work for the Northfield bridge; Engr., E. S. Shaw, Boston:

Bidder.	Masonry piers, complete.	Filling, grading, etc., a cu. yd.	Bank protect'n, etc., a sq. yd.
*Ellis & Buswell, Woburn	$7,000	.....	.....
L. F. Kittredge & Son, Lowell	9,443	$0.40	$1.35
A. H. Wright & Son, Springfield	9,044	.30	3.00

SAND, CONCRETE, ETC.—Washington, D. C.—The bid of the Columbia National Sand Dredging Co. to furnish the city 2,250 cu. yds. of paving sand at 45 cts. a cu, yd., and that of John B. Lord to furnish the city with 4,000 cu. yds. of concrete sand at 59 cts. a cu. yd.; 1,000 cu. yds. of building sand at 65 cts. a cu. yd., and 4,000 cu. yds. of screened gravel at 69 cts. a cu. yd., have been accepted by the commissioners.

DREDGING.—Norfolk, Va.—It is stated that the secretary of war has awarded the contract for dredging the channel from the sea to the Norfolk navy yard to the American Dredging Co., Philadelphia, Pa., at 14½ cts. a cu. yd. The appropriation for the work amounts to $360,000, and provides for a channel 28 ft. deep and 450 ft. wide, a width of 150 ft. to be obtained first. This work is to be completed by Dec. 1. The department was authorized to let the contract without advertising, and received an offer to do the work at 16 cts. a yd. By advertising and extending the time for the completion of the work until December a lower bid was obtained.

RAILWAY SUPPLIES.—China.—It is reported by Consul-General Goodnow that A. S. Forbes & Co., Tientsin, has been awarded the contract for furnishing 7,000 tons of railway supplies: Rails, $29.20 a ton; fish plates, $43,80; bolts, $65.70, and spikes, $58.40 a ton. In our issues of June 30 and Aug. 4, were published the bids for the various supplies.

ASPHALT STRIPS.—Brooklyn, N. Y.—Wm. N. Shannon, Deputy Comr. of Highways, received the following bids Aug. 16 for laying asphalt strips from 34th St. and Astoria ferries in Long Island City, to connect with the good roads in Queens leading out on Long Island: (1) being for the roadway of Fulton Ave., Boulevard, Broadway and Newtown Road, from the southerly side of Mills St. to Jackson Ave., Borough of Queens; and (2) for the roadway of Borden Ave., Jackson Ave., and Thomson Ave., from the coutherly side of Front St. to Woodside Ave., Queens, the foundation, stone block and wooden leaders being the same for both roadways excepting that of the Warren-Scharf Co.: Warren-Scharf Asphalt Paving Co.—Asphalt a sq. yd., (1) $1.85, (2) $1.80; concrete foundation, a sq. yd., (1) $4.50, (2) $4.25; stone block, a sq. yd., (1) 38 cts., (2) 35 cts.; wooden leaders, 1,000 ft., (1) $22.00, (2) $22.00. Barber Asphalt Paving Co.—Asphalt, a sq. yd., (1) $1.78, (2) $1.84; $4.50, 35 cts., $22.00, these bids being alike for both operations. Atlantic Alcatraz Asphalt Co.—Asphalt, a sq. yd., (1) $1.96, (2) $1.98; $4.44, 38 cts., $22.00, respectively, bids same both operations. T. U. Bowman.—Asphalt a sq. yd., (1) $1.95, (2) $1.80; $4.20, 30 cts., $16.00, respectively, bids same both operations.

LEVEE WORK.—Memphis, Tenn.—Local papers state that the following contracts for levee work were let Aug. 11, 1898, by Capt. Mason M. Patrick, U. S. Engrs.: Lower St. Francis Levee District—T. Mike, section 16, 16,000 cu. yds., 10½ cts.; sections 26-31, 30,000 cu. yds., 11 cts., and sections 41-47, 50,000 cu. yds., 14 cts. J. D. Montgomery, section 52, 18,000 cu. yds., 12½ cts., and sections 96-101, 50,000 cu. yds., 17 cts. W. H. Grider, sections 81-87, 20,000 cu. yds., 16 cts. White River Levee District—P. Cassidy, sections 4-14, 120,000 cu. yds., 11¼ cts. Upper Yazoo Levee District—Anderholdt & Lawrance, sections 81-82, 325,000 cu. yds., 14.9 cts a cu. yd.

MACADAM ROAD.—Ashfield, Mass.—Tuttle & Edgerly, Swampscott, Mass., were awarded the following contract Aug. 11, 1898, for constructing a macadam road in Ashfield for the Massachusetts State Highway Commission: Excavation, 1,500 cu. yds., 20 cts. a cu. yd.; excavation, borrow, 1,600 cu. yds., 20 cts.; ledge excavation, 400 cu. yds., 80 cts.; rubble masonry laid dry, 100 cu. yds., $6.00; rubble masonry laid in cement, 400 cu. yds., $6.75; 24-in., dry vitrified clay pipe, 40 lin ft., $2.00; Fencing used as guard rail, 1,400 lin. ft., 16 cts.; side drains, 500 lin. ft., 30 cts.; finishing between limits—labor, per hr., 20 cts.; double teams, 50 cts.; single teams, 35 cts.; stone monuments, 7, each, $1.50; 24-in. vitrified clay pipe, laid in cement, 40 lin. ft., $2.00; total, $4,785.

WATER-WORKS.—Huntington, Mass.—R. D. Maynard, Springfield, Mass., has been awarded the contract for constructing the works: Rubble masonry, a cu. yd., $3.25; puddled earth, a cu. yd., 40 cts.; dry earth filling, a yd., 40 cts.; clearing and grubbing, a yd., $3.00; laying 10-in. pipe, 5½ ft. deep., 16⅗ cts. a ft.; 8-in. pipe., 15⅗ cts.; 6-in. pipe, 14.7 cts.; 4-in. pipe, 14 cts.; rock excavation, a cu. yd., $2.50; building gate-house, $150; total, $6,611.

SIDEWALKS, CURBING, ETC.—Kansas City, Mo.—The council recently let the following contracts for laying sidewalks, curbs, etc.: Natural stone sidewalks, Baltimore Ave., from 16th to 17th St., 18¾ cts. a sq. ft.; 6th St,, from Forest to Tracy, 18½ cts.; 7th St., from Woodland to Brooklyn, 18 cts.; Bandera Flag Stone Co. Pressed brick sidewalks, McGee, from 18th to 20th St., 8⅞ cts., White & Redmond; Southwest Boulevard, from Summit to Madison, 8½ cts., C. Vincent; 9th St., from Cherry to Locust St., 8¾ cts., White & Redmond. Granitoid sidewalks, Perry Ave., Bellefontaine to Indiana, 14.95 cts., 7th St., Chestnut to Gladstone, 14.98 cts., Trestral Paving Co.; 36th St., Holmes to Jansen Pl., 19¾ cts., M. Schoonmaker; 36th St., McGee to Cherry, 15.99 cts., Trestrail Paving Co.; 36th St., Locust to Jansen Pl., 19¾ cts., M. Schoonmaker. Curbing, 8th St., from Wabash to Prospect, 9 cts a lin. ft., G. Kirn; Locust, 28th to 29th St., 10 cts., Joe Gastl; Grading, 23d St., from Wabash to Prospect, $2.90 a cu. yd., J. J. Armstrong; grading alleys between Brooklyn and Park, 13th and 14th Sts., 43 cts., P. Sullivan; Garfield, Brooklyn, 11th and 12th Sts., 39 cts., Wm. Trehav; Harrison, Campbell, 13th and 14th Sts., 45 cts., A. L. West; Wyandotte, Central, 10th and 11th, 46 cts., A. L. Smith.

MACADAM ROAD.—Warren, Mass.—A. B. Fletcher, Secy. State Highway Comn., Boston, informs us that the following contract was let Aug. 11, 1898, to John S. Lane & Son, of Springfield, Mass., for building a macadam road: Excavation, 300 cu. yds., 35 cts.; excavation, borrow, 600 cu. yds., 40 cts.; ledge excavation, 10 sq. yds., $2.00; rubble masonry laid in cement, 60 cu. yds., $4.00; gravel, 200 cu. yds., 50 cts.; telford, 100 sq. yds., 25 cts.; shaping, 4,445 sq. yds., 2 cts.; broken stone in place, 1,085 tons, $1.80; vitrified clay pipe, 12-in., 45 lin. ft., 50 cts.; fencing used as guard rail, 100 ft., 15 cts.; finishing between limits—labor per hr., 20 cts.; double teams, 50 cts.; single teams, 35 cts.; stone monuments, 10, each, $1.25; total, $2,822.

◆

INDUSTRIAL NOTES.

THE GILLETTE-HERZOG MFG. CO., Minneapolis, Minn., has opened a new branch office at Spokane, Wash.

THE JACKSON & WOODIN MFG. CO., Berwick, Pa., is reported to have an order from the Buffalo, Rochester & Pittsburg Ry. for 200 gondola cars.

TIPPETT & WOOD, Phillipsburg, N. J., have just completed a smoke stack, 140 ft. high, and a large water tower for the public buildings at Collins, N. Y.

H. K. PORTER & CO., Pittsburg, are reported to have the contract for a complete compressed air haulage and power plant for the Pennsylvania Coal Co., Pittston, Pa.

THE RICHMOND LOCOMOTIVE & MACHINE WORKS, Richmond, Va., is reported to have a contract for 12 locomotives for the Plant System, and for four locomotives from the Georgia & Alabama Ry.

THE NORTH PENN IRON CO., North Penn Junction, Philadelphia, has the contract for the structural steel work of the new engine and boiler house of the Hagerstown Electric Ry. Co., Hagerstown, Md.

THE LEECHBURG FOUNDRY & MACHINE CO., Leechburg, Pa., will, it is stated, move its plant from that place to Homestead, Pa., before the end of the year. Mr. Geo. Mesta is President of the company.

THE GROTON BRIDGE & MFG. CO., Groton, N. Y., is about to open an office in Porto Rico, and is desirous of handling a line of first-class sugar and coffee machinery. The company will be glad to correspond with manufacturers.

THE CARNEGIE STEEL CO., Homestead, Pa., is reported to have a contract from England for 30,000 tons of 2½-in. steel billets, to be used in the manufacture of bolts; also an order for 10,000 tons of plates for the city water-works, Sidney, Australia.

THE BETHLEHEM IRON CO., South Bethlehem, Pa., reports that it has been asked to bid on the forgings for the engine and shafting of a torpedo boat to be built in Japan for the Imperial Japanese Navy. The line of shafts, including the thrust and crank shafts are to be hollow. The company states that it is the only American concern that has been asked to bid on this work.

THE PHILADELPHIA ENGINEERING WORKS, Philadelphia, is reported to have orders for a 300-HP. cross-compound condensing Corliss engine, with two 100-HP. vertical water-tube boilers for shipment to Yokohama, Japan; two 300-HP. horizontal cross-compound Corliss engines for shipment to China, and one 450-HP. vertical cross-compound Corliss engine for Honolulu, Hawaii.

THE DAIMLER MFG. CO., 54 Wall St., New York, and 937 to 945 Steinway Ave., Long Island City, N. Y., has acquired all the real estate, plants, machinery, patents, etc., of the Daimler Motor Co. and will continue the business with enlarged facilities. The officers of the new company are: Pres., Frederick Kuebler; Vice-Pres., Horace Bacon; Treas. and Secy., Otto G. Nestle; Asst. Treas. and Asst. Secy., Adolph O. Krieger. The capital stock of the company is $500,000, of which $400,000 is said to be paid in.

THE THACKERAY INCINERATING & FERTILIZING Co., San Francisco, Cal., has established a subsidiary corporation at Cincinnati, O., for the states of Ohio, Kentucky and Indiana and has also just formed another for the New England States, with offices in Boston, which will begin operations Sept. 1. Mr. Charles J. Okell, Secy. and Treas., is now in New York for the purpose of establishing a branch office of the parent company. The company announces that it has in San Francisco the largest incinerator in the United States, and that the cost of incinerating garbage in that city is only 10 cts. a ton, owing to the fact that no fuel is required, the only expense being the cost of labor and repairs.

LATHBURY & SPACKMAN, 1619 Filbert St., Philadelphia, consulting engineers, have been retained by the Alma Portland Cement Co., Wellston, O., as engineers to design and furnish specifications and to superintend the erection of a plant in that place to have an ultimate capacity of 1,000 bbls. a day. Construction is now under way, and the contracts for machinery nearly all let. They have also been engaged by the Lawrence Cement Co., of Pennsylvania, as engineers for the erection of its new plant at Siegfried, Pa., which will have a capacity of about 2,000 bbls. a day of Portland and common cements. Large fireproof mill buildings and stock houses will be erected and the latest improved machinery installed. No contracts have yet been let. The firm has also finished plans and specifications for the enlargement and reconstruction of the plant of the Portland Cement Co., Salt Lake City, Utah, which was totally destroyed by fire last June. Contracts for steel buildings and all machinery have been let, and the construction is well under way. Plans and specifications for the introduction of the rotary system of burning cement at the large works of the Aalborg Portland Cement Co., Copenhagen, Denmark, have also been finished. The machinery is being constructed in this country, and will be shipped in the course of a month. In all of the above plants the system of burning in rotary kilns using pulverized coal as a fuel will be introduced.

THE GENERAL ELECTRIC CO., Schenectady, N. Y., has begun work on its new machine shop, to cost $175,000, which will form an important addition to the manufacturing facilities of the company. Contracts have been let to the Pencord Iron Works, Philadelphia, for the steel construction, and to J. J. Turner, of Amsterdam, N. Y., for the masonry, etc. The building will face on the central avenue, opposite Building No. 15, and will be 653 × 166 ft., divided into three aisles, the central one having a width of 65 ft. and the side ones each being about 50 ft. wide. The total floor space, it is claimed, will be at least 144,250 sq. ft., and the building will contain the machinery necessary to handle large apparatus. It is expected that the shop will be completed before the end of 1898. The machinery will be driven by current transmitted from Mechanicsville, 17 miles distant. In addition to the shop, several important extensions to other buildings are being made. The foundry, recently begun, is ready to receive the iron work, as the support for the large traveling crane has been erected. This building when finished will contain, it is claimed, the largest foundry under one roof in the world. The government of Victoria, Australia, has placed an order with the company for six Thomson recording Watt meters of 100 volts and varying capacities. which will be placed in the Electrical Bureau of the home office, Victoria, to be used, it is claimed, as the official standards by which all meters used in the colony will be tested.

NEW COMPANIES.—R. P. & J. H. Staats, Hoboken, N.J.; $100,000, with all paid in; to construct bridges, piers, tunnels, railways and canals; Robt. P. Staats, 149 West 85th St., New York; John H. Staats, Morristown, N. J.; Thos. J. Long, 7 West 43d St., New York; Dickinson W. Richards, 190 Park Ave., Orange, N. J.; Walter E. Castle, Fordham, New York.

Gordan Battery Co., Portland, Me.; $350,000, commencing with $250; to generate and deal in electricity; Pres., Arthur S. Pinkham; Treas., Charles E. Lockwood, both of New York.

Eberle Construction Co., New York, N. Y.; $24,000; to construct and equip railways to be operated by electricity and steam; David Longecker, Charles R. Eberle, Philadelphia; Edwin C. Stout, Alva Oatman, Thomas A. Matthews, New York.

International Electric Co., Cleveland, O.; $10,000; to manufacture and deal in electrical appliances; A. W. Mayers, E. H. Shaw, W. R. Studebaker, W. S. Hale and Charles Seaton.

Fulling Springs Quarry & Construction Co., East St. Louis, Ill.; $5,000; F. W. Hackman, Sr., Francis Kirsch and Fred Brandt.

Pasadena Construction Co., Pasadena, Cal.; $50,000; to construct roadways for motor vehicles; J. H. Campbell, J. E. Smythe, T. Lowe.

Richmond Construction Co., New York; $25,000; to do a general contracting business; John B. Newhall, Ernst Crossman, James McQuigham, Guy A. Hubbard, and Chas. J. Worth, New York.

National Iron Co., 525 Main St., East Orange, N.J.; $100,000, with $1,000 paid in; to manufacture architectural and structural iron work; Alfred O. Dunk, James D. Mattison and Geo. W. Carnrick, all of 525 Main St., East Orange, N.J.

Gardner Mfg. Co., Baltimore, Md.; $5,000; to manufacture gas machines for generating gas; Joshua G. Gardner, Andrew G. Stielman, James Russell, Laurence O. Wright Ward and Edw. L. Ward.

Payne Mfg. & Engineering Co., Elmira, N. Y.; $600,000, with $140,000 paid in; to manufacture engines, boilers, army and navy supplies.

Sanford & Brooks Co., Baltimore, Md.; $200,000; to build bridges, piers, etc.; Jos. B. Sanford, Newark, N. J.; Walter B. Brooks, Jr., Wm. H. Taylor, J. Frank Sinton and William H. Dorsey, Baltimore.

Angleton Telephone Co., Alvin, Tex.; $2,000; A. W. Wilkinson, W. A. Leonard and F. J. Bush.

Hoosier Telephone Co., Salem, Ind.; Dr. H. C. Hoggs, Pres., Salem; Frank Brewer, Vice-Pres., Smedley; Dr. G. M. Morris, Secy., Comton; and W. A. Denny, Treas., Martinsburg.

Rivesville & Montana Telephone Co., Rivesville, W. Va.; $50,000; to construct and operate a telephone from Fairmont to Rivesville; C. E. Gaskill, J. C. Gaskill, F. B. Clayton, J. P. Coogle, of Fairmont; J. D. Arnett, F. F. Pickett, A. S. Prichard, T. S. Cox, and J. G. Floyd, of Morgantown.

Siloam Springs Telephone Co., Clayton, Ill.; $1,500; G. L. Thompson, John Padgett, John W. Butz.

Edward Falls Land Co., Syracuse, N. Y.; $35,000; to deal in real estate; E. Powell, Philadelphia; A. Cady Palmer, Fayetteville; Daniel C. Gridley, Arthur Jenkins, John L. King, Thomas Hogan, Elbert F. Allen, and Gillis H. Stillwell, Syracuse.

Shenandoah Valley Car Works, Philadelphia, Pa.; $250,000, commencing with $500; to manufacture wood and metal railway ties, rails, cars, etc.; G. A. Hamilton, Chas. P. Poole, Chas. J. Hepburn and J. B. Rettew, all of Philadelphia; S. M. Hepburn, Carlisle, Pa.

London-Glasgow Mfg. & Colonization Co., Philadelphia, Pa.; $5,000,000, commencing with $500; to manufacture railway ties, rails and other railway equipment; G. A. Hamilton, Chas. P. Poole and others, of Philadelphia.

The Circulation of ENGINEERING NEWS among Prominent Contractors Probably EXCEEDS that of any other FIVE PAPERS.

INDUSTRIAL NOTES 72

PERSONAL.

Mr. Charles H. Schenck, President pro tem. of the New Orleans Levee Board, New Orleans, La., has resigned.

Mr. Frank J. Illig has been appointed Superintendent of the Water Bureau, of Buffalo, N. Y., to succeed Col. Francis G. Ward.

Mr. E. J. Roberts, Chief Engineer of the Spokane Falls & Northern Ry., with headquarters at Spokane, Wash., has resigned.

Prof. Edward Orton, State Geologist of Ohio, has been elected President of the American Association for the Advancement of Science.

Mr. H. R. Hobart, who has been for 23 years a member of the editorial staff of the "Railway Age," of Chicago, has resigned his position.

Mr. George F. Becker, of the U. S. Geological Survey, has been sent to the Philippine Islands as an expert on geological formation for the purpose of studying the mineral deposits.

Prof. Mark V. Slingerland, Assistant Entomologist of the College of Agriculture, Cornell University, Ithaca, N. Y., has been appointed State Entomologist of New York, to succeed Dr. J. A. Lintner.

Mr. Charles A. Hague, M. Am. Soc. C. E., consulting engineer, 39 Cortlandt St., New York, has been selected by the City Council of Camden, N. J., to make a test of the water-works of Camden.

Mr. C. C. Riley, Superintendent of Car Service of the Baltimore & Ohio Southwestern Ry., with headquarters at Cincinnati, O., has been promoted to the newly created position of Superintendent of Transportation, and his former position has been abolished.

Mr. David E. McComb, M. Am. Soc. C. E., Superintendent of Sewers, Washington, D. C., has been ordered to visit Boston, Mass.; Montreal, Que.; Chicago, Ill., and Milwaukee, Wis., to examine works in connection with the preparation of plans for the pumping station for the sewage disposal system of his city.

Mr. F. E. Drake, Assistant Manager of the Walker Co., Cleveland, O., has been appointed Special Mechanical and Electrical Adviser to Mr. Ferdinand W. Peck, Commissioner-General to the Paris Exposition of 1900. His duties will be to secure an adequate representation of American manufactures in both the mechanical and electrical fields, with a view to the development and increase of American export trade. He will sail from New York for France in company with Mr. Peck and staff on the steamer "La Touraine," Sept. 3, and expects to return to this country about the middle of October, when he will resume his duties with the Walker Co.

OBITUARY.

Mr. Philip A. Jackson, City Engineer, of Dorchester, Mass., died last week.

Mr. Frank W. Brown, of the firm of Brown Brothers, bridge and railway contractors, of Elizabeth, N. J., died Aug. 27, aged 80.

Mr. Martin L. Saulsbury, Civil Engineer, of Ridgley, Md., died Aug. 22, aged 26. He was a graduate of Lehigh University, South Bethlehem, Pa., in the class of 1893.

Mr. John Coon, junior member of the firm of Hammond & Coon, proprietors of the Lake Erie Boiler Works, Buffalo, N. Y., died Aug. 23, aged 53. He was also the Secretary of the Lake Erie Engineering Works.

Mr. Henry Mason, formerly Superintendent of the Quintard Iron Works, New York, died at his home in Brooklyn Aug. 27, aged 69. He was born in Newcastle-on-Tyne, England, and came to this country when 10 years of age. He entered the engineering department of the Quintard Iron Works in 1858, and was Superintendent for many years, being in charge of the installation of the engines and boilers of the ill-fated U. S. battleship "Maine."

Mr. James McCloskey, Manager of the firm of L. J. McCloskey & Co., Philadelphia, Pa., varnish manufacturers, died at Belmar, N. J., July 28, aged 68. He was one of the earliest pioneers in the mineral paint industry in this country, and in 1868 established a large paint factory in Philadelphia. In 1877 he organized a branch in that city of Berry Bros., Detroit, varnish makers, and was the manager of it for 19 years, resigning to take the position which he held at the time of his death.

Dr. John Hopkinson, the well-known English electrical engineer, and his son and two daughters were killed last week while ascending, without guides, a mountain in the canton of Valais, Switzerland. Dr. Hopkinson had intended starting for New York on Sept. 28 on business in connection with a syndicate which he was forming for the purpose of developing some of his recent inventions. Besides receiving the degrees of M. A. and D. Sc., Dr. Hopkinson was a Fellow of the Royal Society, a member of the Institute of Civil Engineers and a member of the Institute of Electrical Engineers. At different times he received the Telford Medal and Telford Premium of the Institute of Civil Engineers for valuable contributions to science. He was also a contributor to the Proceedings of the other societies, and the author of "Papers on Dynamo Electric Machinery." To electrical engineers he is perhaps best known as the author of the "Hopkinson Method" of dynamo testing.

Col. Sir Casimir Stanislaus Gzowski, M. Am. Soc. C. E., of Toronto, Ont., died at his residence, The Hall, in that city, Aug. 24. He was born in St. Petersburg, Russia, March 5, 1813, and his father was Count Gzowski, a Polish nobleman, an officer in the Imperial Guard. Sir Casimir was placed in the military college at Kremnitz at the age of nine, and remained there until 1830, when he received a commission in the engineering branch of the Imperial service. When the Polish rebellion against the Emperor Constantine broke out in 1831 he resigned his commission and joined the insurgents. The rebellion failed, and he, with many other officers, was exiled. He came to the United States, reaching New York in 1833 with but $40 in money and an entire ignorance of the English language. He began the study of it at once, however, supporting himself meanwhile by teaching French, Italian and German. Afterwards he went to Pittsfield, Mass., where he studied law, thinking that he would thus master the English most essential to the practice of engineering. In 1837 he was admitted to the bar in Pennsylvania. After four years in the practice of law he went to Toronto, Ont., and was engaged as an engineer by the Department of Public Works. For six years he held the position of Superintending Engineer of Roads and Harbors in Western Ontario. From 1850 to 1853 he was engineer of the harbor works at Montreal, Que., and Consulting Engineer of the ship canal improvement between that city and Quebec. He next became Chief Engineer of the St. Lawrence & Atlantic Ry., now part of the Grand Trunk system. He resigned this position to enter into partnership with Sir A. T. Galt, the late Hon. Luther H. Holton and the late Sir David Macpherson for the construction of the Grand Trunk Ry. from Toronto to Sarnia. In 1857 Sir Casimir and Sir David established the Toronto Rolling Mills for the manufacture of rails and other railway material. In 1870 he was appointed a member of a commission to inquire into the water communications of the Dominion, and in 1871 the firm of Gzowski & Macpherson constructed the international suspension bridge over the Niagara River. Sir Casimir was the engineer in charge of this work, and the same year was called upon to report on the enlargement of the Welland Canal, and also upon the Baie Verte canal scheme. He was the first President of the Canadian Society of Civil Engineers, of which he was elected a member Jan. 20, 1887, and was also the first Chairman of the Niagara Falls Park Commission. He was President of the Corporation of Wycliffe College. In 1872 he was made a Lieutenant-Colonel, in 1879 a Colonel and in the same year an honorary Aide-de-camp to the Queen. In 1890, in recognition of valuable services rendered to the Dominion of Canada, he was created a Knight Commander of St. Michael and St. George. He was elected a member of the American Society of Civil Engineers Dec. 2, 1868.

◆

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

GERMAN-AMERICAN TECHNICAL SOCIETY.
Sept. 3-7. Annual meeting, Philadelphia Section, Reading, Pa. Secy., A. Schumann, 532 North 4th St., Philadelphia, Pa.

ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Sept. 5. Secy., H. J. March, Library Bldg., Buffalo, N. Y.

AMERICAN STREET RAILWAY ASSOCIATION.
Sept. 6-9. Annual convention, Boston, Mass. Secy., T. C. Pennington, 2020 State St., Chicago, Ill.

AMERICAN SOCIETY OF CIVIL ENGINEERS.
Sept. 7. Secy., C. W. Hunt, 220 W. 57th St., New York city.

CENTRAL RAILWAY CLUB.
Sept. 9. Secy., H. D. Vought, 114 5th Ave., New York city.

MONTANA SOCIETY OF ENGINEERS.
Sept. 10. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.

THE LOUISIANA ENGINEERING SOCIETY.
Sept. 12. "Evolution of Structural Design," F. T. Llewllyn. Secy., J. F. Coleman, 712 Union St., New Orleans, La.

ASSOCIATION OF EDISON ILLUMINATING COMPANIES.
Sept. 12-13. Annual meeting, Sault Ste. Marie, Mich. Secy., Wilson S. Howell, Newark, N. J.

NORTHWEST RAILWAY CLUB.
Sept. 13. Secy., T. A. Foque, Soo Line, Minneapolis, Minn.

CIVIL ENGINEERS' CLUB OF CLEVELAND.
Sept. 13. Secy., Wm. H. Searles, Case Library Bldg., Cleveland, O.

NEW YORK STATE STREET RAILWAY ASSOCIATION.
Sept. 13-14. Annual meeting, Brooklyn, N. Y. Secy., H. A. Robinson, New York city.

DENVER SOCIETY OF CIVIL ENGINEERS.
Sept. 13. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Colo.

THE RAILWAY SIGNALING CLUB.
Sept. 13. Secy., Earl M. Seitz, C. & N. W. Ry., Chicago, Ill.

ENGINEERS' CLUB OF CINCINNATI.
Sept. 15. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.

BROOKLYN ENGINEERS' CLUB.
Sept. 15. Secy., A. J. Prevost, Jr., 191 Montague St., Brooklyn, N. Y.

NORTHWESTERN TRACK AND BRIDGE ASSOCIATION.
Sept. 16. D. W. Meeker, St. Paul, Minn.

ENGINEERS' CLUB OF PHILADELPHIA.
Sept. 17. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.

ENGINEERS' CLUB OF COLUMBUS.
Sept. 17. Secy., H. M. Gates, 12½ North High St., Columbus, O.

ENGINEERS' CLUB OF MINNEAPOLIS.
Sept. 19. Secy., H. E. Smith, 1620 S. E. 4th St., Minneapolis, Minn.

ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Sept. 19. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.
Sept. 20. Secy., R. A. Fessenden, 410 Penn Ave., Pittsburg, Pa.

BOSTON SOCIETY OF CIVIL ENGINEERS.
Sept. 21. Secy., S. E. Tinkham, City Hall, Boston, Mass.

WESTERN FOUNDRYMEN'S ASSOCIATION.
Sept. 21. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.

ENGINEERS' CLUB OF ST. LOUIS.
Sept. 21. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.

CENTRAL STATES WATER-WORKS ASSOCIATION.
Sept. 27-29. Annual meeting, Springfield, O. Secy., John Fisher, 11 Riley St., Hamilton, O.

CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Oct. 3. Secy., C. L. Annan, City Engineers' Office, St. Paul, Minn.

CHICAGO ELECTRICAL ASSOCIATION.
Oct. 7. Secy., J. R. Cravath, 825 Monadnock Block, Chicago, Ill.

AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENT.
Oct. 12. Annual meeting, Washington, D. C. Secy., D. L. Fulton, Bureau of Highways and Sewers, Allegheny, Pa.

AMERICAN INSTITUTE OF MINING ENGINEERS.
Oct. 18. Annual meeting, Buffalo, N. Y. Secy., R. W. Raymond, P. O. Box 223, New York city.

PENNSYLVANIA STREET RAILWAY ASSOCIATION.
Oct. 19-20. Annual meeting, Scranton, Pa. Secy., S. P. Light, Lebanon, Pa.

MASTER CAR BUILDERS' ASSOCIATION.—In accordance with the recommendations of the Committee on Prices, approved by the Association at the convention held June, 1898, Secretary Jno. W. Cloud has just issued a circular giving the weights of M. C. B. couplers and coupler parts, as reported by manufacturers.

ILLINOIS TELEPHONE ASSOCIATION.—A meeting of this association will be held Sept. 28-29 at Du Quoin. Among the papers to be presented the following are of general interest: "Past, Present and Future Apparatus," P. J. Hertz; "The Evolution of the Telephone Signal," H. P. Clausen; "Growth and Development of the Telephone Business in the State of Illinois Within the Last Three Years," A. M. Howell; "Progress of the Independent Telephone Business in the West Outside of the State of Illinois," James S. Cuming.

INTERNATIONAL ACETYLENE ASSOCIATION.—At a recent meeting of manufacturers of generators of acetylene gas a society was formed to unite the manufacturers of acetylene apparatus and calcium carbide. A constitution was adopted and officers elected. It was decided that the principal office should be in Chicago and that meetings should be held in January and July of each year. The following were selected for 1898: Pres., George Landis Wilson, Chicago; Vice-President, J. W. Earl, Minneapolis, Minn.; Secy., J. B. Carroll, Chicago; Treas., C. D. Moody, Louisville, Ky.; Directors, George F. Owen, Grand Rapids, Mich.; I. R. Barton, Batavia, N. Y.; Charles J. Wangler, St. Louis, Mo.

THE LAKE SUPERIOR MINING INSTITUTE.—The 5th annual meeting of this society was held at Ironwood, Mich., Aug. 16-18. Much of the time was devoted to visiting points of engineering interest in the vicinity. During the business sessions several papers of special interest to mining engineers were read.

Officers for the ensuing year were elected as follows: Pres., Wm. Kelly, Vulcan, Mich.; Vice-Presidents, J. B. Cooper, Lake Linden, Mich.; W. Fitch, Beacon, Mich.; E. F. Brown, Iron Mountain, Mich.; Geo. H. Abeel, Hurley, Wis.; Edwin Ball, Soudan, Minn.; Treas., A. J. Youngbluth, Ishpeming, Mich.; Secy., F. W. Denton, Minneapolis, Minn.

OHIO ELECTRIC LIGHT ASSOCIATION.—The 4th annual convention of this association was held on Aug. 18-19 at Sandusky, Ohio. The usual routine business was transacted, after which President H. K. Wood read his address. In this he advised that the companies use all their influence to oppose the growth of municipal ownership. At the afternoon session a paper entitled "Positive and Negative Economies in the Operation of Small Electric Light Plants" was presented by Mr. E. P. Roberts, Cleveland, Ohio. In this the question was considered from the standpoint of an existing plant and it was claimed that many plants could reduce operating expenses from 10 to 20% by considering such details as tightness of belts, pulleys out of line, leakage of engine valves and poor adjustment. The keeping of accurate records was advised.

Mr. M. E. Turner, Cleveland, O., also presented a paper on "Some Suggestions Relative to Determining the Cost of Electrical Supply," which was a discussion of the Weight Demand System and a consideration of what made up the cost of current production.

The following morning's session was devoted to two papers and their discussion. The first, by Mr. Caryl D. Hastin, entitled "The Meters' Relation to the Dividend," which considered the selection and installation of meters and such points as testing, cleaning, inspecting, etc.; the second, by Mr. J. H. Perkins, on "Comparative Commercial Qualities of Old and Modern Transformers as Applied to an Exchange." This paper was a discussion of the various losses in a transformer and its regulation, and it was pointed out that a marked saving resulted from the replacing of a number of small transformers by a few larger ones.

Mr. E. J. Berg presented at the afternoon session a paper on "Long Distance Transmission of Power," which argued against the use of multiphase systems of transmission, except for cases where the distance between generating and consuming stations was large enough to demand the highest voltages at present possible. The single phase and monocyclic systems were considered by him preferable, generally speaking. Regarding periodicity he favored 60 or 125-cycle for lighting distribution, although for motor service or rotary converters lower periodicity gave good results.

In response to questions it was stated by Mr. Scovil that the advantages of the enclosed arc over the open were a saving of labor and carbon besides a steadier light. He understood that the Boston Electric Light Co. saved about $10 per year per lamp by their use.

The candle-power of an arc lamp could, according to Mr. E. P. Roberts, be accurately determined by a portable photometer, but the method was too inconvenient for practice.

Other questions were briefly considered, after which Cleveland was announced as the meeting place for next year. Officers for the ensuing year were elected at the morning session as follows: Pres., Emil C. Schmidt, Sandusky; Vice-Pres., B. P. Holmes, Youngstown; Secy. and Treas., Samuel Scovil, Cleveland.

NEW PUBLICATIONS.

ADDRESSES ON RAILWAY SUBJECTS AT PURDUE UNIVERSITY.—Published by the University, Lafayette, Ind. Nine pamphlets, 5¼ × 7½ ins.; paper.

These pamphlets contain nine of the eleven addresses or railway subjects delivered before the students of the university during the school year, 1896-97. The following is a list of the subjects: "Problems in the Management of a Railway System," John T. Brooks, Pennsylvania Lines; "The Past, Present and Future of American Railways," Melville E. Ingalls, C., C. C. & St. L. Ry.; "The Mutual Obligations of Railway Corporations and the Public," John W. Noble; "Relation of Railways to the State," Addison C. Harris; "Railways and Their Servants," Addison C. Harris; "Business Problems of the Motive Power Department," Robert Quayle, C. & N. W. Ry.; "Railway Signaling," Frederic A. Delano, C., B. & Q. Ry.; "Car Designing and Construction," Arthur M. Waitt, L. S. & M. S. Ry.

REVIEW OF WORLD'S COMMERCE.—Introductory to Commercial Relations of the United States with Foreign Countries During the Years 1896-1897. Department of State, Washington. Paper; 9 × 5¾ ins.; pp. 284.

This is a compilation of the annual reports of U. S. Consular officers on the industries and commerce of their respective districts. It includes special reports upon trade conditions in these countries, noting those conditions favorable to an extension of our own trade, or pointing out disadvantages and hindrance to such trade. While the general statistics are given for all countries with which we have dealings, the commerce of Asia and that of the Pacific Islands is especially discussed.

BEESON'S MARINE DIRECTORY.—By Harvey C. Beeson, Royal Insurance Building, Chicago, Ill. Cloth, 8vo.; pp. 258.

This is the eleventh annual edition of this directory of the shipping interests of the Great Lakes. It contains lists of all the sailing and steam vessels on the lakes, with particulars of their dimensions, engines, builders and owners, and also lists of U. S. courts and marshals, vessel owners, vessels lost during the year, and particulars as to lake commerce, steamship inspection, pilot rules, canal rates and regulations, etc. There is also a lengthy classified directory of ship and engine builders, manufacturers and dealers in supplies, contractors for dredging and pier work, etc., etc. About 28 pages are devoted to an alphabetical descriptive list of the lake ports, giving the population, principal industries, traffic, transportation lines, etc. A number of half-tone illustrations of ships, engines, harbor views, etc., are distributed through the volume, and the advertising pages include numerous and varied industries.

TRADE OF PUERTO RICO.—By Frank H. Hitchcock, Chief, Section of Foreign Markets, U. S. Department of Agriculture. Bulletin No. 13. Government Printing Office, Washington, D. C. Pamph.; 6 × 9 ins.; pp. 84.

The probability that Puerto Rico (why not Porto Rico?) will soon be part of the territory of the United States makes the publication of this pamphlet a timely one. For the years 1887-91 the average annual imports were $14,412,345, and exports $10,548,872. For the years 1892-96 the annual average imports were $17,480,494, and exports $16.390,041. In the first of these periods, of the combined import and export trade, the United States obtained 25.78%, and Spain 25.58%. In the second Spain obtained 28.80%, and the United States only 19.45%. It is safe to predict that these figures will be greatly changed in the next five years. Of the imports in 1895 42.6% were agricultural, and 57.4% non-agricultural. Of the exports 96% were agricultural. The agricultural imports are chiefly rice, wheat flour and hog products. Of the exports, coffee and sugar form the great bulk, coffee amounting to over $9,000,000 in 1895.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

ELECTRICITY FOR MACHINE DRIVING.—Westinghouse Electric & Mfg. Co., Pittsburg, Pa. Pamph.; 6 × 9 ins.; illustrated.

This brochure is intended to point out a few of the advantages secured by the use of motors directly connected to various machines.

HOW TO SELECT A DYNAMO.—Walker Co., Cleveland, O. Circular.

This is circular No. 1,079 of the regular Walker series, and supersedes No. 1,049. As the title implies, it outlines the salient features of a good dynamo. The manner in which the Walker generators fit these requirements is pointed out.

ELECTRIC POWER MACHINERY. — Crocker-Wheeler Electric Co., Ampere, N. J. Pamph.; 7½ × 10 ins.; illustrated.

This is a remarkably well illustrated circular, in which the various types of generators and motors manufactured by the Crocker-Wheeler Co. are shown. The illustrations are accompanied by suitable descriptive paragraphs.

POWER PUMPS.—The Goulds Mfg. Co., 16 Murray St., New York city. Pamph.; 8 × 7¼ ins.; pp. 36; illustrated.

This pamphlet makes no attempt to describe in detail any of the machinery manufactured by the company, and is simply a series of illustrations of pumping plants installed throughout the country, accompanied in each case by a brief description.

RAILWAYS.

ALABAMA & FLORIDA.—We are informed that the surveys of this proposed line have been completed, the capital for construction secured and the contract awarded to R. M. Quigley & Co., St. Louis, Mo. The route is from Georgiana to River Falls, Ala., 30 miles, as previously stated, and it is expected to finish the work before Jan. 1. Pres., E. L. Moore, Georgiana, Ala.; Ch. Engr., Charles Seymour, Madisonville, Ky.

ATCHISON, TOPEKA & SANTA FE.—Reports state that Barney Lantry & Sons, of Strong City, Kan., have a contract to furnish this company with 50 carloads of crushed-stone a day, to be used on the main line west of Kansas City, Mo. The ballasting work is expected to be finished by next spring.

ATLANTIC, VALDOSTA & WESTERN.—It is announced that construction work has been completed on this line from Haylow, Ga., to Crawford, Fla., and that it is now being further extended from Haylow to Valdosta. A number of contracts for work along the line have still to be awarded.

BRANDON & SOUTHWEST.—Reports state that the preliminary surveys have been completed for this proposed railway into Brandon, Man., to be about 90 miles in length. It is said that Robert Waddell, Trenton, Ont., has the contract, and that he will begin work at Deloraine in about one month.

CANTON, ABERDEEN & NASHVILLE.—This company intends to build a line from Winfield, Ala., to be about nine miles in length. The company applied for a charter in Alabama, Aug. 9, with a proposed capital stock of $1,000,000. A number of Illinois Central R. R. officials are interested.

CLEARFIELD SOUTHERN.—P. E. McGovern, of Punxsutawney, Pa., is reported to have been awarded the contract for the construction of this railway from Belsena Mills, Pa., to Clearfield Bridge, a station on the Bridge Creek R. R., a distance of about 15 miles. It is expected to employ about 200 men on the work at first.

COOS BAY, ROSEBURG & EASTERN.—Work is in progress on a 3-mile extension of this railway in Coos county, Ore., now in operation from Marshfield, on Coos Bay, to Myrtle Point, a distance of about 26 miles. A further extension from Myrtle to Roseburg, 60 miles, is projected. Pres., T. R. Sheridan, Roseburg, Ore.

DETROIT & LIMA NORTHERN.—C. W. Haskell, First Vice-Pres., 30 Broad St., New York, informs us that this company does not intend to extend its line from Waponeta, O., direct to Chicago, as currently reported.

DURANGO, WESTERN & PACIFIC.—Press reports state that this company will soon advertise for bids for iron bridges, section houses, stations, round-houses, rolling stock, etc., and that an English syndicate, headed by W. A. Moffat, is back of the project. A subsidy of $12,000 a kilometer (.621 mile) for mountain road, and $7,000 a kilometer across the table land is said to have been granted by the Mexican government. The line will be 300 miles long, and the provisions of the subsidy require its completion in three years.

GRAND MARAIS & NORTH SHORE.—R. W. Nichols, Ch. Engr., Duluth, Minn., informs us that the terminus has been located for this proposed railway from Grand Marais to Two Harbors, Minn., a distance of 90 miles, and that the right of way has been secured and the preliminary surveys are in progress. It is expected to let contracts for the construction of the line as soon as the survey is completed. Pres., E. K. Lewis, Duluth, Minn.

KOOTENAY RY. & NAVIGATION.—Press reports state that this company has been organized in London, Eng., with a capital stock of $500,000, for the purpose of consolidating the Kalso & Slocan Ry. Co., and the International Navigation & Trading Co., and to connect these directly with the Great Northern and Northern Pacific Rys.

LEHIGH VALLEY.—We are informed that H. O. Duerr, Contracting Engr., South Bethlehem, Pa., has made a contract with the Lehigh Valley R. R. Co., extending over several years, to furnish it with stone ballast on the main line of the road. The contract consists in furnishing the stone from two points: the Eastern point is Redington, Pa., from which a dark blue limestone is furnished that is almost as hard as trap rock. Mr. Duerr has agreed to supply 500 yds. a day at each point, and has purchased from the Rodger Ballast Car Co. forty 80,000-lb. patent ballast cars and two plows for that purpose. It is the intention of the railway company to ballast the entire line with stone ballast instead of cinder and gravel, as has been done heretofore. The western point from which a delivery is made is at a place known as Flint Hill, near North LeRoy, N. Y. From this latter place a flint rock ballast is obtained. C. E. Webster, Ch. Engr., South Bethlehem, Pa.

LITTLE COAL RIVER RY. & MINING.—Henry S. Hopkins, Jr., Secy., St. Louis, Mo., informs us that the location is now being made for this proposed railway from St. Albans to Madison, W. Va., a distance of 50 miles. The capital for construction has been negotiated for, and the contract for constructing the entire line has been awarded to the Hopkins Bridge & Construction Co., of St. Louis. The line enters 35,000 acres of valuable coal lands, and the company's principal revenue will be derived from its coal business. Pres., Allan R. Sheffer, 160 and 164 Broadway, N. Y; Ch. Engr., N. M. Leete, Huntington, W. Va.

LITTLE ROCK, HOT SPRINGS & TEXAS.—Press reports state that Receiver Lonsdale has been authorized to receive private bids, until Oct. 1, for the purchase of this line. The railway is projected to run from Little Rock, Ark., to Wister, Ind. Ter., 155 miles, with branches, and was graded from Benton to Hot Springs, Ark., in 1895, and four miles of track laid from Benton to the Saline River.

MISSOURI, KANSAS & TEXAS.—S. B. Fisher, Ch. Engr., St. Louis, Mo., informs us that no improvements of consequence are at present projected on this line of railway. Pres., H. C. Rouse, 45 Wall St., New York.

MONTGOMERY, HAINESVILLE & CAMDEN.—P. S. Milner, Principal Asst. Engr., Birmingham, Ala., informs us that this company has just completed a 45-mile survey from Camden to Suggsville, Ala., the latter town being on the Mobile & Birmingham R. R. The line crosses the Alabama River, requiring a bridge 600 ft. in length, and is intended to give the Montgomery, Hainesville & Camden an outlet to the Gulf. Pres., Sol. D. Bloch, Montgomery, Ala.; Ch. Engr., J. A. Milner, Birmingham, Ala.

RICHMOND NICHOLASVILLE, IRVINE & BEATTYVILLE.—It is announced that this railway will be offered at public sale at Versailles, Ky., Sept. 6, under foreclosure. The line at present extends from Versailles to Irvine, Ky., a distance of 61 miles, and has been in operation since 1890. After grading the road from Irvine nearly to Beattyville and building a number of costly trestles the money gave out and the rails have never been laid. In 1893 the company was forced into the hands of a receiver. This will be the fourth time within two years that the property has been put up at auction.

SANDY HUFF.—This company was incorporated in West Virginia, Aug. 29, with a capital stock of $500, to construct a steam railway from Sandy Huff Creek, on the Norfolk & Western R. R., to Guyandotte River, at the mouth of Huff Creek, W. Va. The incorporators are: F. S. Hamlin, W. R. Leathers, Jas. F. Strother and John Effler, McDonald county, W. Va.; W. D. Janney, Wayne county, W. Va.

SIERRA OF CALIFORNIA.—Reports state that this company has decided to extend its line immediately to the sugar pine belt, 20 miles from Jamestown, Cal.; work to begin this fall. The Crockers own about 30,000 acres of timber lands in this country, and it is said to be their intention to erect mills where the timber will be cut and dressed. It is thought that the road will be extended over the mountains into Nevada next season. Pres., Prince A. Poniatowski; Vice-Pres., H. J. Crocker, both of San Francisco, Cal.

STOCKTON & TUOLUMNE.—We are informed that about 12 miles of the earthwork on the roadbed for this proposed railway has been completed in detached portions where the right of way could most easily be obtained. All work is now suspended, pending an issue of bonds which has been authorized. If bonds are sold soon work may be again resumed. The work done is between Stockton, Cal., and the foot-hills 25 miles to the east. Pres., Mrs. Annie Kline Rikert, Grand Hotel, San Francisco, Cal.

WESTMORELAND JUNCTION.—J. Arthur Jones, Secy., Irwin, Pa., informs us that this company, whose incorporation was noted in our last issue, expects to build a steam railway from Irwin, on the Pennsylvania R. R., to Guffeys, on the Baltimore & Ohio R. R., a distance of six miles. Surveys are rapidly progressing, and most of the capital for construction secured. Pres., A. Frank, Irwin.

STREET AND ELECTRIC RAILWAYS.

BENTON, ME.—Samuel Ferguson, of Waterville, Me., has been awarded the contract for building the Benton & Fairfield Electric Ry., to be about three miles in length and to cost $30,000. Heavy rails will be laid so as to permit the hauling of freight cars from the Maine Central to the pulp mill at Benton Falls.

CLINTON, MASS.—A franchise was granted to the Clinton, Hudson, Maynard & Clinton St. Ry. Co. Aug. 23 to build from Clinton to Hudson. The company has 18 months in which to build the line.

HYDE PARK, MASS.—It is reported that the Norfolk Suburban St. Ry. Co. contemplates the extension of its line in the Readville district to the grounds of the New England Horse Breeders' Association. Pres., Jas. D. McAvoy, Readville, Hyde Park.

MERIDEN, CONN.—We are informed that Sanderson & Porter, 31 Nassau St., New York, contractors for the proposed Meriden & Compounce Electric Ry., have awarded to the Berlin Iron Bridge Co., of East Berlin, Conn., the contract for furnishing seven steel bridge spans; a steel frame car barn, 50 × 100 ft., and a power-house, 45 × 75 ft. Francis Atwater, of Meriden, is one of the promotors of the project.

BUFFALO, N. Y.—Reports state that the Buffalo, Kenmore & Tonawanda Electric Ry. was sold at a referee's sale in Buffalo, Aug. 23, to Morris Cohn, of Niagara Falls, N. Y., a stockholder of the Buffalo & Lockport Ry. Co., at about $92,000.

COXSACKIE, N. Y.—We are informed that work has been suspended for the present by the Greene County Traction Co. on its electric railway to connect Coxsackie, Greenville, Middleburgh and other places. The road will be 42 miles in length, and is to be completed by 1900. J. V. W. O'Connor, of Coxsackie, is interested. G. W. Raines, Pres., New York.

HILTON, N. Y.—An extension of the Rochester, Charlotte & Manitou R. R. is said to be contemplated from the present terminus at Manitou to Hilton, a distance of four miles. If built, the line would probably consist of only a single track at first, and would accommodate both passengers and freight.

HUDSON, N. Y.—It is announced that a number of Brooklyn street railway promoters have purchased the Kinderhook & Hudson Ry., now operated from Hudson to Niverville, N. Y., a distance of 18 miles, and that it will be converted into a trolley line. Power will be supplied from Stuyvesant Falls. An extension to Philmont will probably be built next year. S. R. Raines, Pres. Kinderhook & Hudson Ry. Co., Hudson.

NEW PALTZ, N. Y.—It is reported that Jas. G. Graham, of Newburgh, N. Y., has been appointed temporary receiver for the New Paltz & Wallkill Valley Ry. Co., on the application of the directors for a voluntary dissolution of the corporation. The company was incorporated Jan. 16, 1897, with a capital stock of $150,000, by Henry M. Brundage, Portchester, N. Y.; Hugh H. Douglass, of Boston; Paul Shaffer, 801 3d Ave., New York, and others. This electric line extended from the West Shore R. R., at Highland, N. Y., to New Paltz, Ulster county.

NEW YORK, N. Y.—The franchise of the Fulton, Wall & Cortlandt Street Ferries R. R. Co. was sold at auction Aug. 25 by L. J. Phillips & Co., in pursuance of a judgment in foreclosure obtained by the Central Trust Co., of New York, to Joseph D. Donald, 81 Fulton St., at $621,276. The franchise provides for a street railway from the foot of Fulton St. to the Cortlandt St. ferry, and from the Wall St. ferry to the Cortlandt St. ferry. Edward Selleck, 45 William St., New York, is interested.——The Wall & Cortlandt St. Ferries Ry. Co. was incorporated Aug. 25, with a capital stock of $1,000,000, to operate under the franchise formerly owned by the Fulton, Wall & Cortlandt St. Ferries R. R. Co., and which was sold at auction Aug 25. The directors are, F. D. Moffat, 81 Fulton St.; Charles Buse, K. S. Hogg, E. L. Conant, H. W. Bean, M. E. Gill and J. P. Sheffield, all of New York.

SYRACUSE, N. Y.—Belden & Seeley are now at work on the new line of the Syracuse & Suburban R. R. Co. on East Fayette and Montgomery Sts. The work will probably be completed the latter part of this month.

WATERTOWN, N. Y.—The Watertown & Sacketts Harbor Rapid Transit Co. has been organized, with a capital stock of $100,000, to construct and operate an electric street railway from Arcade and Arsenal Sts., in Watertown, to Sacketts Harbor, on Lake Ontario, a distance of ten miles. It is proposed to carry freight and passengers. The incorporators are, William P. Casey, James J. Luddington, James H. Kinney and H. D. Barto, of Syracuse; G. Harrison Smith, Joseph Marrian, Wilbur F. Porter, Amelia E. Barron, D'Esting Moore, John E. Bergevin, Ora E. Riordan, Norris M. Van Brunt and Edward Cuff, of Watertown; S. Harland Wetmore, Leyden, N. Y.; William H. Reese, Evans Mills, N. Y.

ATLANTIC CITY, N. J.—The Atlantic City St. Ry. Co. has applied for a franchise to construct an electric railway from South Carolina Ave. and the beach to Arctic Ave., and thence on Rhode Island Ave. to Caspian Ave. Among the petitioners are: C. J. Adams, John J. Gardner and Levi C. Albertson.

COPLAY, PA.—We are informed that surveys have been completed and rights of way obtained for the electric railway of the Coplay, Egypt & Ironton St. Ry. Co. It will be six miles in length, connecting the three places named. Contracts for the construction will probably be awarded this week. J. G. Meyle, Coplay, is interested. Dr. H. Y. Horn, Pres., Coplay; Chas. Weirbach, Ch. Engr., Allentown, Pa. The incorporation of the company was noted in our issue of May 26.

EDGEWOOD PARK, PA.—The Edgewood St. Ry. Co. was incorporated Aug. 26 with a capital stock of $5,000, to construct a railway eight-tenths of a mile in length. The incorporators are, W. E. Guy, Pres.; J. C. Burkhard, William Porter and Edward Williams, all of Pittsburg, Pa.; Harry Fisher, Allegheny City, Pa.

RANKIN STATION, PA.—The Rankin & Hawkins St. Ry. Co. was incorporated Aug. 26 with a capital of $6,000, to construct an electric street railway one mile in length in the borough of Rankin. Pres., W. E. Guy, Pittsburg.

SWISSVALE, PA.—The Swissvale St. Ry. Co. was incorporated Aug. 26 with a capital stock of $5,000, to construct one mile of electric street railway in Swissvale. Pres., W. E. Guy, Pittsburg.

WILKINSBURG, PA.—The Wilkinsburg Connecting St. Ry. Co. was incorporated Aug. 26 with a capital stock of $5,000, to construct an electric street railway six-tenths of a mile in length. Pres., W. E. Guy, Pittsburg; Directors, J. C. Burkhard and others.

WASHINGTON, D. C.—The Siemens & Halske Electric Co., of Chicago, is reported to have been awarded a contract to furnish the Capital Ry. Co. with an electric power plant, consisting of a 100-K-W., 550-volt dynamo and other machinery, at $2,355. Pres., A. E. Randle.

ROANOKE, VA.—D. W. Flickwir, Recr., Roanoke, informs us that the Roanoke St. Ry. Co. is making no improvements or changes to its system, other than the regular repair work.

CLEVELAND, O.—It is reported that work has begun on the Cleveland & Eastern electric railway, and that contracts have been let for 15 miles of grading in Gauga county. Contracts are expected to be let within a few days for the power house, the running stock and the electrical equipment. The officers are, Pres., H. P. McIntosh; Vice-Pres., H. A. Sherwin; Secy. and Treas., E. G. Tillotson.

EATON, O.—Jas A. Gilmore, of Eaton, in behalf of the Western Ohio Traction Co., has applied to this town for a franchise over the roads leading to Middletown, a distance of 22 miles. The promoters of the project, as stated in our issue of Aug. 18, are Chas. S. Parkhurst and Walter W. Brandon, of Anderson, Ind.

MICHIGAN CITY, IND.—We are informed that John W. Lovett is president and W. W. Huffman chief engineer, both of Anderson, Ind., of the Northern Traction Co., which was incorporated Aug. 19 to build an electric street railway from Michigan City to Laporte.

DURAND, MICH.—H. Hutchinson, of Durand, writes us that right of way has been obtained in this village, but no surveys have yet been made for the projected road of the Long Lake, Durand & Corunna Electric Ry. Co., noted last week. Particulars can be obtained by addressing Wm. E. Avery, 88 Post St., Detroit.

HOUGHTON, MICH.—It is reported that the Houghton County St. Ry. Co. is being organized by business men from Calumet, Laurium, Hancock, Lake Linden and Houghton, to construct an electric street railway in Houghton county. A preliminary survey has been made from East Houghton to West Hancock.

SAUGATUCK, MICH.—The township boards of Laketown and Saugatuck have granted franchises to the Saugatuck, Douglas & Lake Shore Electric Ry. Co., to construct an electric railway. It is said that work will begin in the middle of October.

EAST ST. LOUIS, ILL.—The Illinois Central R. R. Co. has decided to install an electric system on the old St. Louis, Belleville & Southern Ry., between East St. Louis and Belleville, a distance of about 14 miles, according to reports.

KANSAS CITY, KAN.—At a meeting of the city council, Aug. 16, an ordinance was passed providing for the changing of the Fifth St. cable line into an electric road. Local papers state that the work of changing the system will be resumed at once and pushed to completion.

LAWRENCE, KAN.—A franchise was granted to the Lawrence Electric Ry. Co., Aug. 24, to replace its present street car system by an electric system. It provides that work shall commence within 60 days, and that five miles shall be completed by March 1, and the entire system, eight miles, by July 1.

KANSAS CITY, MO.—The Jackson County Electric Ry. Co. has applied to the county court for franchises for two new lines of electric railway, one to follow Independence Ave. from Kansas City to Independence; the other from the south city limits to Dobson. Pres., F. W. Sears.

GAINESVILE, TEX.—The Gainesville Park St. Ry. Co. was incorporated Aug. 23; capital stock, $100,000. Incorporators, J. M. Lindsay, Lewis Lindsay, Henry Lindsay, Geo. Lindsay, H. E. Eldridge.

LOS ANGELES, CAL.—A meeting of the citizens of San Gabriel and Alhambra has been held to raise a bonus of $20,000 to be paid the Los Angeles Terminal Ry. Co., to secure the construction of an electric line four miles long from South Pasadena to San Gabriel Sanitarium, passing the San Gabriel Mission and Alhambra. It is believed the money will be raised within a few weeks.

OAKLAND, CAL.—Local papers announce that the Southern Pacific Co. will soon adopt electric motors on all its lines in Alameda county, the San Pablo Ave. cable road to be the first line to be changed.——Also that the Oakland, San Leandro & Haywards Electric Ry. Co. has commenced the work of raising its tracks on East Twelfth St. to the official grade, and that the Oakland Transit Co. will improve its tracks on the thoroughfare as soon as new rails arrive from the East.

HONOLULU, HAWAII.—Press reports state that August Drieir, manager of Elell plantation, has given an order to Theodore Hoffman, Mgr. of the Hawaiian Electric Co., for the equipment of two miles of electric railway, including one 50-HP. electric locomotive. This will be the first electric line in the islands.

LONDON, ENGLAND.—Bids are asked until Sept. 5 for the materials and construction of the track and permanent way of about 13 miles of tramways (in sections) in the Potteries district of North Staffordshire, for the British Electric Traction Co., Ltd. For information, address Permanent Way Engr's. Office, Donington House, Norfolk St., Strand, W. C.

ELECTRIC LIGHT AND POWER.

CHESTER, MASS.—The question of building a plant is being considered.

MEDWAY, MASS.—The committee has decided to award the 5-year lighting contract to the Medway Electric Light Co. The plant is to be in operation Oct. 1. The company is endeavoring to secure business in Millis. Pres., John McGuinnis; Secy., C. P. Harding.

ALBANY, N. Y.—Jacob V. Jacobs, Deputy Supt. of Public Buildings, has submitted a report for a plant for the capitol building and grounds, according to reports. There are at present in use about 10,600 incandescent and 60 arc lights, costing $42,000 a year.

ALBION, N. Y.—Press reports state that the plant and franchise of the Albion Electric Light Co., the stock of which is owned principally by the estate of E. K. Hart and Wm. G. Swan, are to be sold to the new company, the Albion Power & Light Co. The old company was organized eight years ago. Its contract with the trustees for lighting the streets terminated last April, and was not renewed, as better terms were offered by Mr. Lum, the promoter of the new company. A large number of improvements will be made, including a new power house. Engr. and Gen. Mgr., Wallace G. Johnson; Secy., Sanford T. Church.

AUBURN, N. Y.—The contract for furnishing a plant for the state prison has been let to Barnes & Payton, Troy, N. Y., at $6,189. The plant will be installed by the convicts.

CENTRAL ISLIP, N. Y.—Bids are asked until Sept. 22 for furnishing the materials and for erecting a power plant, warming, ventilation and hot-water supply; water supply and distribution; plumbing and drainage; engines and generators; and the electric wiring and fixtures, of a new colony of hospital and accessory buildings at Central Islip, for Manhattan State Hospital. State Arch., I. G. Perry, Albany; Pres. Bd. Mgrs., Henry E. Howland, 1 Madison Ave., New York.

CENTERTON, N. J.—It is stated that the Parvin Mill at Centerton has been sold to Philadelphia parties for $10,000. It is understood that an electric light plant will be put in to light the nearby towns.

COHOES, N. Y.—The Cohoes Electric Light Co. is reported as considering the question of extending its plant.

CHESTER, PA.—Bids are asked until Sept. 2 for lighting the borough of Prospect Park with electricity. Chn. Com., F. McGinnis.

JOHNSTOWN, PA.—The 3-year lighting contract with the Johnstown Electric Light Co. expires Oct. 1. There is some discussion of the question of the city building a plant.

LANCASTER, PA.—Bids are asked until about Sept. 10 for the purchase of $100,000 of 30-year first mortgage bonds for extending the incandescent system, etc., of the plant of the Lancaster Electric Light, Heat & Power Co Pres., W. F. Beyer, 33 North Duke St.

OAKLAND, MD.—It is stated that the council has authorized R. S. Jamison, Mayor, to make D. E. Offutt an offer of $13,000 for his electric plant. The town now pays Mr. Offutt $170 a month for arc lights on the streets. Should Mr. Offutt accept the offer, the authorities will provide for an issue of bonds and improvements will then be made.

TRAPPE, MD.—J. I. Chaplain, M. D., writes us that it is proposed to construct a plant, but the plans are not sufficiently matured to ask for bids at present.

FREDERICKSBURG, VA.—T. McCracken, Chn. Com., writes us that this city is getting data as to cost of wiring, dynamos, engines, etc., for a plant. Mr. McCracken wishes to correspond with electric companies about building a plant. It is likely that the town will be ready to secure bids in about 10 or 15 days. The plant will cost about $9,000.

NORFOLK, VA.—Bids are asked until Sept. 13 for furnishing the navy yard with two direct-connected electric generating sets, one switchboard and 30 lightning arresters. Edwin Stewart, Paymaster-Gen., U. S. Navy, Washington,

ORANGEBURG, S. C.—The council is reported as arranging for the construction of a plant and water-works.

ARLINGTON, GA.—An election will probably soon be held to vote on the question of issuing bonds for a plant and water-works.

PENSACOLA, FLA.—Bids are asked until Sept. 24 for installing a plant at the navy yard. The appropriation for this work is $10,000. M. T. Endicott, Chn. Bureau Yards and Docks, Washington, D. C.

TUSCUMBIA, ALA.—The question of building a plant in connection with the proposed water-works is being considered, according to reports.

LAKE PROVIDENCE, LA.—R. L. Hill is reported as wishing to receive estimates for materials for a plant and water-works.

FRANKFORT, KY.—Arrangements are reported as being made for the proposed plant for the capitol building.

MOUNT GILEAD, O.—Geo. J. Young, Clk., writes us that at election held Aug. 27 this place voted against issuing $33,000 in bonds for a plant and water-works. On account of the light vote another election will probably soon be held.

NEW RICHMOND, O.—It is stated that an election will be held Sept. 6 to vote on the question of issuing $30,000 in bonds for a plant and water-works. Engr., E. F. Layman, 32 East 3d St., Cincinnati, O.

TOLEDO, O.—T. R. Cook, Supt. water-works, writes us that no steps have yet been taken towards establishing a plant at the pumping station. There has been considerable preliminary discussion.

WESTERVILLE, O.—The Westerville Electric Co. has secured a 10-year franchise and a 5-year contract to light the village. A plant will be built at once. A 40 K-W. 220-volt dynamo, a 60-HP. engine, etc., will be put in. E. S. Aldrich, 11 Wesley Block, Columbus, O., engineer in charge, wishes prices on the generator, on 10 220-volt enclosed arc lamps, 6,000 lbs. W. P. wire, 200 poles and all necessary supplies.

GRAND RAPIDS, MICH.—Bids are asked until Sept. 20 for furnishing buildings, machinery, etc., for a complete plant, as stated in our advertising columns. Pres. Bd. Pub. Wks., Wm. T. Johnston; Secy., Fred. A. Twamley.

CLINTON, MICH.—It is stated that the municipal plant will be extended. F. Ellis may be addressed.

ST. LOUIS, MICH.—Bids are asked until Sept. 9 for constructing a dam, power house, installing machinery, etc., and until Sept. 26 for the purchase of $20,000 of 4% bonds for the proposed plant, etc. Engr., E. Z. Burns; Cy. Clk., Jno. R. Wilson; Mayor, Parker Merrill.

CHICAGO, ILL.—Bids are asked until Sept. 9 for furnishing steam piping and a condenser for the electric light plant at Rice and Lincoln Sts. Edward B. Ellicott, Cy. Electrician.

GREENUP, ILL.—Bids are asked until Sept. 10 for furnishing and building a plant to be operated in connection with the water-works. Gasoline engines will be used. It will have a capacity for 17 arc and 200 20-c. p. incandescent lights; estimated cost, $2,000. Engr., J. C. Riper, Indianapolis; Clk., W. H. Cuningham.

SHELBYVILLE, ILL.—It is stated that the Trout Bros.' electric light plant, which has been in the hands of a receiver, was sold Aug. 23 to the Shelbyville Water & Light Co. for $9,300. The purchase gives the latter company a monopoly of the water supply and lighting of the town.

EAU CLAIRE, WIS.—It is stated that this city is securing data regarding municipal plants.

LONEROCK, WIS.—The question of building a plant is being considered, according to reports.

DULUTH, MINN.—Press reports state that a deal for the Jay Cooke property on the St. Louis River, owned by the St. Louis River Water Power Co., is in progress. An English syndicate is said to be negotiating for it and the price at which it is held is $1,500,000. About 10 miles of the river is included in the property. J. M. Butler, Philadelphia, Pa., represents the Cooke interests.

REDLAKE FALLS, MINN.—The council is reported as considering a proposition from Marcus Johnson for putting in a plant.

PLEASANTON, KAN.—J. P. Holmes, Cy. Clk., writes us that this place will not have electric lights, as was recently reported.

WATERTOWN, S. DAK.—O. M. Kirlin writes us that the equipment for the proposed plant has not yet been purchased, but will be very soon.

FARGO, N. DAK.—E. A. Hughes and Gen. Hughes, Bismarck, N. Dak., will let the contract at once for the proposed plant, according to reports.

LOS ANIMAS, COLO.—This place voted Aug. 23 against granting a 20-year franchise to J. B. Downing, Pueblo, Colo. It is stated that the opponents are in favor of the municipal ownership of the plant.

TACOMA, WASH.—The council has refused to grant a franchise to the Snoqualmie Falls Power Co. The Westinghouse Electric & Mfg. Co., Pittsburg, Pa., has been awarded the contract for 2,000-HP. generators, motors, etc., for the plant. Pres., C. H. Baker, Seattle, Wash.

PORTLAND, ORE.—Bids are asked until Sept. 19 for lighting the streets for a term of two years with arc and incandescent lights; check, $30,000. The present contract expires April 1, 1899. Chn. Com. J. C. Luckel.

DUNDAS, ONT.—It is stated that the council will grant a 15-year franchise to the Dundas Electric Light Co. The town will use 150 incandescent and four arc lights. Geo. H. Harper, Mgr.

MONTREAL, QUE.—Bids are asked until Oct. 1 for constructing a head-race complete for the power plant of the Shawinigan Water & Power Co., as described in our advertising columns. We are informed that the company has prepared plans to utilize Shawinigan Falls on the St. Lawrence River, 17 miles from Three Rivers, or about 100 miles from Montreal. There is a fall of 165 ft., with a water supply which will develop 200,000 HP. The company has decided to install at once a plant capable of developing 100,000 HP., and is now calling for bids for the construction of the head-race. It is understood that the company will be in a position to sell power at Three Rivers cheaper than it can be obtained at any other port in the world reached by ocean-going vessels, and at the falls at a proportionally low figure. Engrs., T. Pringle & Son, Imperial Bldg., Montreal; Secy., B. Shepherd.

NEW COMPANIES.—H. W. & M. Electric Co., New York; $25,000; Charles Hagedorn, 227 13th St., Brooklyn.

Keystone Electric Construction Co., Tunkhannock, Pa.; $10,000.

Standard Electric Co., Parsons, Pa.; $40,000.

Loveland Power & Electric Light Co., Loveland, O.; $10,000; I. W. Newcomer, C. C. Strickleman, W. H. Stubbs, H. A. Cayne, R. B. Corwin.

Keeseville Electric Co., of Chesterfield, N. Y.; $30,000; Orville S. Morse, Henry M. Prime, A. W. Boynton, Keeseville; George F. Morse, Peru, N. Y.; Henry E. Barnard, Plattsburg, N. Y.

Morrow Power & Electric Light Co., Morrow, O.; $10,000; W. H. Stubbs, R. R. Corwin.

Wetmore Electric Co., Lowville, N. Y.; $40,000; to light Lowville, Croghan and New Bremen; George W. Pulver, Syracuse; Jacob Strife, Oliver P. Hedden, Lowville; Thomas Glenn, Croghan.

Dunmore Electric Light Co.; $50,000, with $5,000 paid in; James E. Watkins, Taylor, Pa.; Deputy Recorder Anthony T. Irwin, Dunmore; ex-County Surveyor Abraham Dunning, ex-Mayor John H. Fellows; State Senator James C. Vaughn, Scranton.

Perry Electric Light, Heat & Power Co., Newport, Pa.; $13,000, with $1,300 paid in; Treas., Samuel S. Leiby, Marysville, Pa.; Jas. R. Van Dyke, Philadelphia; J. S. Leiby, Newport.

Consumers' Electric Co., Cleveland, O.; to light the west side of Cleveland; Pres. and Treas., A. W. Offerman; Secy., Chas., P. Salen.

Sonoma Water & Power Co., Genoa, Nev.; $10,000.

BRIDGES.

WESTFIELD, MASS.—The county commissioners have ordered the construction of a new 115-ft. iron or steel highway bridge, with a 22-ft. roadway and one sidewalk, over Little River, according to report.

YONKERS, N. Y.—The council is reported to have approved the plans for a bridge over the Nepperhan River, on Nepperhan St., prepared by S. L. Cooper, Comr. of Pub. Wks. Bids for the same will soon be asked.——Pennell & O'Hern have the contract for the masonry abutments of the Hastings Ravine bridge on Warburton Ave. extension, and Dougherty & Berrigan have the contract for the stone bridge over Rowley Brook.

HOBOKEN, N. J.—The Erie R. R. and the West Shore R. R. have agreed jointly to pay $15,000 of the cost of the proposed Park Ave. viaduct, to be erected by the freeholders, the total cost of which will be about $72,000. E. W. Harrison, Ch. Engr.

COCALICO, PA.—The Massillon Bridge Co., Massillon, O., was awarded the contract Aug. 20 for the superstructure of the new iron bridge over Cocalico Creek, as noted in our issue of Aug. 11. Its bid was $1,450. Kaufman & Kramer were awarded the contract for the masonry substructure at $2.50 a cu. yd. John B. Eshleman, Chn. Comrs., Lancaster, Pa.

EMAUS, PA.—The Passaic Bridge Co., Passaic, N. J., is reported to have been awarded the contract to build two iron bridges across the tracks of the street railway company on Perkiomen and 4th Sts.

LANDENBURG, PA.—William Founds has been awarded the contract for the masonry of an iron bridge at this place, according to report.

STROUDSBURG, PA.—The bridge over the Delaware River to the island at this place was washed away, Aug. 25, as the result of a cloudburst above Port Jervis.

MANNING'S FORD, VA.—Bids are asked until Sept. 12 for constructing a 69-ft. iron highway bridge over Broad Run at this place. P. W. Carper, E. F. Burch and Geo. M. Ellmore, Comrs., Leesburg, Va.

NEWPORT NEWS, VA.—Bids are asked until Sept. 19 for the construction of two iron bridges and approaches. J. A. Massie, Cy. Clk.

NEWPORT NEWS, VA.—Bids are asked until Sept. 6 for the purchase of $40,000 4½% bridge bonds; check, $1,000. J. A. Massie, Cy. Clk.

CINCINNATI, O.—The injunction granted the Cincinnati & Wooster Turnpike Co. restraining the county commissioners from constructing an approach to the Indian Hill bridge at the pike crossing has been dissolved, according to report.——The Brockett Bridge Co. has been awarded the contract to build the Mill Creek Bridge on Riddle Road, at $2,900.——A. J. Wellman has secured the contract for the superstructure of the bridge over Mill Creek, at $3,456, according to report.——The Cincinnati Bridge Co. was awarded the contract Aug. 13 for an iron bridge to cost $1,750 over the Miami Canal on Township Ave., according to report. The contract for the approaches was given to A. J. Henkel & Co., for $2,269. Guy M. Gest was awarded the contract for the substructure and approaches of the Mill Creek bridge on the Springfield pike at $35,155. F. S. Krug, Cy. Engr.

HAMILTON, O.—The following bids were received Aug. 22 by the county commissioners for the construction of the new Columbian Bridge: King Bridge Co., Cleveland, O., $55,221; Bellefontaine Bridge & Iron Co., Bellefontaine, O., $61,500; Rogers Iron Co., Springfield, O., $56,000; Variety Iron Works Co., Cleveland, O., $57,200 and $58,200; Youngstown Bridge Co., Youngstown, O., $50,648, and $50,900; Iron Substructure Co., Columbus, O., $59,000; Lafayette Bridge Co., Lafayette, Ind., $49,000, $35,000, $40,000, $23,000, $71,000, $57,300, $68,000 and $51,000; Oregonia Bridge Co., Oregonia, O., $49,500, $36,000, $41,000 and $23,500; Toledo Bridge Co., Toledo, O., $48,850 and $43,000; Penn Bridge Co., Beaver Falls, Pa., $55,195; Mt. Vernon Bridge Co., Mt. Vernon, O., $56,334; Champion Bridge Co., Wilmington, O., $56,975; Brockett Bridge Co., Cincinnati, O., $55,487; J. T. Guillaume, $69,500, $68,500 and $62,000, superstructure only, $42,000; New Columbus Bridge Co., Columbus, O., $57,365; Milwaukee Bridge & Iron Works, Milwaukee, Wis., $50,000; Wrought Iron Bridge Co., Canton, O., $51,100; Massillon Bridge Co., Massillon, O., $56,000 and $55,000; Cincinnati Bridge Co., Cincinnati, O., $55,550; Pittsburg Bridge Co., Pittsburg, Pa., $57,309; Peter E. Schwab, 38 different bids, varying in price from $31,000 to $79,000. L. A. Dillon, Cy. Engr.

LORAIN, O.—The Osborn Co., Cleveland, O., has been appointed engineer in charge of the new bridge over Black River at Erie Ave., the estimated cost of which is $175,000.

TIFFIN, O.—The Canton Iron Bridge Co., Canton, O., has received a contract to build an iron bridge at Tiffin.

WOODSFIELD, O.—Bids are asked until Sept. 9 for the erection of stone abutments for the Buschy Ford bridge. W. T. Wood, County Auditor.

ANDERSON, IND.—Thos. P. Kelly has been awarded the contract to build the stone viaduct at 11th and John Sts., at $2,900, according to report. H. H. Rogers, Cy. Engr.

BIG RAPIDS, MICH.—The Detroit Bridge & Iron Works, Detroit, is reported to have a contract for an $18,000 steel bridge for the Grand Rapids & Indiana Ry. Co. at Upper Big Rapids, over the Muskegon River.

MUSKEGON, MICH.—The council has passed a resolution, according to report, condemning the Biedler St. bridge and ordering it torn down. Clifford Gamble, Cy. Engr.

EAU CLAIRE, WIS.—It is reported that an election will be held Sept. 6 to vote on the question of issuing bonds for a new bridge to cost about $50,000. C. A. Alderman, Cy. Engr.

BRAINERD, MINN.—Bids are asked until Sept. 9 for the construction of a steel bridge over a ravine from Kingwood St. to Kindred St. F. A. Farrar, Cy. Clk.

MINNEAPOLIS, MINN.—The Sherwood-Sutherland Co. has been awarded a contract for repairing and paving the Wabash St. bridge, at $6,603, according to report.——The council is reported to have approved the recommendations of the ways and means committee that $30,000 be appropriated for widening the Central Ave. bridge over the East River. F. W. Cappelen, Cy. Engr.

BURLINGTON, IA.—High water is reported to have damaged or destroyed the following bridges: Rolling Mill road, 120-ft., destroyed; Dry Branch on Walker road, 100-ft., destroyed; Flint River, 100-ft., washed away; Honey Creek on Iowa City road, 38-ft. steel, badly damaged; Augusta township, 100-ft., badly damaged; Flint River on Bottom road, 24-ft., steel, destroyed; Mediapolis bridge on Iowa City road, 30-ft., destroyed; Yellow Springs branch, 90-ft., steel, destroyed; North Bottom bridge over Yellow Springs branch, 130-ft., destroyed; Howard branch, 30-ft., steel, washed away, and Washington road bridge, 90-ft., destroyed. Address County Bridge Commissioners.

OMAHA, NEB.—The county clerk has been instructed to call for bids for a 150-ft. steel bridge over the Elkhorn River, according to report.——The Canton Bridge Co., Canton, O., has received the contract to construct the 75-ft. steel bridge across a ravine on the Millard road for $1,675. R. W. Howell, Cy. Engr.; Geo. F. Monroe, Chn. Bd. Pub. Wks.

DILLON, MONT.—Bids are asked until Sept. 5 for constructing a 60-ft. wooden bridge at the Montgomery crossing on Big Hole River. E. H. Mayers, Clk.

HOUSTON, TEX.—About 200 citizens have petitioned the council to replace the present Franklin St. bridge by a new one, according to report. L. A. Gueringer, Cy. Engr.

CHEHALIS, WASH.—Peter Summersett and William Young were awarded the contracts for the Alpha and Salmon Creek wooden bridges, Aug. 5.——The San Francisco Bridge Co., San Francisco, Cal., was awarded the contract Aug. 20 for the Lincoln Creek bridge at $8,965. Savage & Schofield were awarded the contract for the Boistfort bridge at $2,500. Tweeden & Mills, Tacoma, Wash., received the contract for the Claquito bridge at $5,590. The original bids received Aug. 5 were rejected.

MONTESANO, WASH.—The Columbia Bridge Co. has been awarded the contract, according to report, for the construction of the 80-ft. steel draw span and the approaches of the South Bay bridge, at $9,236.

BUILDINGS.

ST. ALBANS, VT.—Bids are asked by the supervising architect, Washington, D. C., until Sept. 19, for the low-pressure, return circulation steam heating and ventilating apparatus for the U. S. building in this city.

BOSTON, MASS.—The following bids were received by the school-house committee Aug. 22 for the erection of a new high school building at South Boston: John S. Jacobson & Son, Boston, $242,971; W. L. Clarke & Co., $264,000; W. H. Keyes & Co., Boston, $265,187; Mead, Mason & Co., Boston, $266,600; James Fagan, $273,535; W. S. Sampson & Son, Boston, $281,000; Woodbury & Leighton, Boston, $282,000; Connery & Wentworth, $290,000; Chas. H. Dodge & Co., $328,323.——Reports state that the contracts for erecting the Dorchester high school and the Brighton school buildings have been awarded to Frank G. Coburn & Co., Melrose, Mass., at $217,900 and $34,900, respectively.

BROCKTON, MASS.—Bids are asked by the supervising architect until Sept. 28 for the construction (except heating apparatus and electric wire conduits) of the post-office building in Brockton, as stated in our advertising columns.

BROOKLYN, N. Y.—Bids are asked by the department of docks and ferries, Pier A, North River, New York, until Sept. 6 for preparing for and completing the recreation building at the foot of North 2d St., East River, in the Borough of Brooklyn. It is estimated that the following material will be required: 188,000 lbs. of structural steel; 2,050 lbs. of screw bolts; 3,100 sq. ft. of corrugated iron; 14,000 sq. ft. of tin roofing; 6,150 sq. ft. of exterior and interior metal work, etc.——Bids are asked by the bureau of yards and docks, navy department, Washington, D. C., until Sept. 17, for the erection of a storehouse for steel, the appropriation for which is $17,500. Mordecai T. Endicott, Ch. of Bureau.——Plans have been filed by Rev. James Duffy, Pastor of St. Agnes's Catholic Church, at Sackett and Hoyt Sts., for a new church building to be erected in Degraw St., near Hoyt St., at a cost of about $60,000. Arch., Thos. J. Houghton, 213 Montague St., Brooklyn.

CENTRAL ISLIP (L. I.), N. Y.—Bids are asked until Sept. 22 for the erection and finishing, power plant, warming, ventilation and hot-water supply; water supply and distribution; plumbing and drainage; engines and generators; and the electric wiring and fixtures of a new colony of hospital and accessory buildings at Central Islip for the Manhattan State Hospital. Henry E. Howland, Pres. Bd. of Mgrs., 1 Madison Ave., New York.

NEW YORK, N. Y.—Plans are being prepared, according to reports, for six 6-story stone store and apartment buildings, to be erected on 116th St., near 8th Ave., at a cost of about $200,000, for Thomas Martin, of Brooklyn, N. Y. Arch., F. T. Camp, 97 Cedar St., New York.——Plans have been filed by W. H. Gildersleeve, 213 West 4th St., for two 6-story brick warehouses and stable, at 244 to 248 West 27th St., to cost $70,000. Arch., G. A. Edelsvard; by the Church of the Holy Rosary, for a 1-story brick church building on 119th St., west of Pleasant Ave., to cost $90,000. Arch., T. F. Houghton, 213 Montague St., Brooklyn, N.Y.; Builder, John T. Brady; by Charles Thorley for a 9-story brick office and store building at Broadway and 42d St., to cost $60,000. Arch., H. F. Kilburn, 150 5th Ave.; by Arthur Gorsch, 1444 3d Ave., for four 5-story brick flats and store buildings on 125th St., west of Amsterdam Ave., to cost $80,000. Arch., S. Sass, 25 Chambers St.; by Eva Steinmetz, 579 West 146th St., for five 3-story brick dwellings on 149th St., west of Amsterdam Ave., to cost $70,000. Arch., C. Steinmetz; by George Brown for four 5-story brick flat and store buildings, at 148th St and 8th Ave., to cost $88,000. Arch., Jas. W. Cole, 403 West 51st St.; by Hyman & Oppenheim, 103 4th Ave., for four 6-story brick flat buildings at 323 to 331 East 16th St., to cost $114,000. Archs., Schneider & Herter, Bible House; by Jacob Jung, 31 West 117th St., for a 5-story brick flat and store buildings at 83d St. and Lexington Ave., to cost $50,000. Arch., Charles Stegmayer, 306 East 82d St.; by Louis Lese, 231 East 6th St., for four 6-story brick flat and store buildings at 105th St. and 1st Ave., to cost $113,000. Arch., G. F. Pelham, 503 5th Ave.; by Geo. A. Fisher, 695 East 141st St., for three 5-story brick dwellings on 90th St., west of Central Park West, to cost $54,000. Arch., G. F. Pelham.

ELIZABETH, N. J.—A. F. Leicht and F. T. Camp, Archs., 97 Cedar St., New York, inform us that they have prepared plans for a new stone church building, with a Sunday-school room, to be one and two stories high, for the Central Baptist Church of this city. It will have a slate roof and will be heated by steam. Bids will be received for erecting the building about Sept. 1.

JERSEY CITY, N. J.—Bids are asked by the clerk of finance committee until Sept. 7 for the purchase of $150,000 of 4% gold public library bonds.

WEST HOBOKEN, N. J.—We are informed that a 2-story brick extension to the building occupied by the Hudson Trust & Savings Institution will be erected by John Larkin, contractor, West Hoboken, to cost about $10,000. All contracts have been let, and no new heating plant will be required. Arch., H. Kreitler, 62 Broad St., New York.

WOODBURY, N. J.—Wm. M. Carter, Cy. Engr., writes us that the contract for building the new fire engine house has been let to John R. R. Fowler at $6,125.

CHESTER, PA.—Plans are being prepared for a new high school building to be erected in Chester at a cost of about $100,000. Arch., Seymour Davis, 907 Walnut St., Philadelphia.

NEW KENSINGTON, PA.—It is stated that the Opera House, Harmer's block, Jacobin's block and dwellings were destroyed by fire last week; loss, $50,000.

PENNSBURG, PA.—P. J. Guthrie, Philadelphia, has been awarded the contract for erecting the new Lutheran Church building at $11,000.

PHILADELPHIA, PA.—Chas. McCaul, 10 North 11th St., is reported to have been awarded the contract for erecting the new 14-story office building for the West End Trust & Safe Deposit Co.

PITTSBURG, PA.—Bids are asked until Sept. 14 for erecting a school building in the 20th ward. Arch., C. M. Bartberger, Westinghouse Bldg.; Secy. Bd. Education, C. M. Sheaffer.

BALTIMORE, MD.—Bids were received by Lieut.-Col. W. A. Jones, U. S. Light-House Engr., Baltimore, Aug. 25, for the construction of the Wade Point Light-House, N. C., as advertised in Engineering News, as follows:

John L. Grim, Philadelphia, Pa.	$16,300
Wilkins & Kuemmerle, Philadelphia, Pa.	10,000
Houston Construction Co., Philadelphia, Pa.	9,150
W. R. Taylor, Norfolk, Va.	9,140
F. C. Artur, Philadephia, Pa.	9,600

WASHINGTON, D. C.—The following bids have been received for the construction of an addition to engine house No. 14 on 8th St., between D and E Sts., N. W.; N. H. Thomas & Co., $5,447; Gleason & Humphreys, $5,701; P. J. Bresnehan, $5,750.

NEWPORT NEWS, VA.—Bids are asked until Sept. 19 for the construction of a brick jail and hospital building. J. A. Massie, Cy. Clk.

PETERSBURG, VA.—Bids are asked for the fireproofing and fitting up with metallic furniture of the clerk's office of this city. Chn. Com., John D. Watkins.

NASHVILLE, TENN.—A fire in this city Aug. 30 is reported to have destroyed $500,000 worth of property. The Phillips-Buttorff Mfg. Co. and A. J. Warren suffered the greatest loss.

COLUMBUS, O.—Bids are asked until Sept. 24 for constructing the new state capitol building. Archs., Hannaford & Sons, 6th and Vine Sts., Cincinnati; Chn. Com., A. S. Bushnell, Columbus; Clk., Opha Moore.

OXFORD, O.—Bids are asked until Sept. 13 for additions to the Miami University, and for a steam heating apparatus. W. O. Thompson, Chn. Bldg. Com.

SOUTH BROOKLYN, O.—Bids are asked until Sept. 14 for the purchase of $2,500 of 6% bonds for a city hall. Clk., W. T. Pupikofer.

TOLEDO, O.—Bids are asked until Sept. 6 for the construction of four fire engine houses to be located in this city. Cy. Clk., L. P. Harris.

LOGANSPORT, IND.—A fire in this town, Aug. 23, destroyed all the business buildings, including that of the Chicago Lumber & Coal Co; reported loss, $90,000.

DETROIT, MICH.—Bids were asked until Aug. 30 for furnishing the materials and for constructing a market building at Winder and Russell Sts.; check, $1,000. Pres. Bd. Pub. Wks., D. W. H. Moreland.

CARTERVILLE, ILL.—A fire at this place, Aug. 23, destroyed a number of buildings in the business portion of the town: estimated loss, $75,000.

CHICAGO, ILL.—Frederick Ayer, 213 Wabash Ave., has been granted a permit to build a 9-story business block to cost $200,000.——The elevator of the Northwestern Terminal Elevator Co., at Orleans St. and the river front, was destroyed by fire Aug. 22, causing a loss of $150,000, mostly on the building. Secy., E. W. Thompson.

DANVILLE, ILL.—Bids are asked by the National Home for Disabled Volunteer Soldiers, until Sept. 8, for erecting a building for the governor's residence at the Danville branch: also for erecting a guard-house. Address W. C. Gunnell, C. E., 4 Post-Office Bldg., Danville.——The Prox & Brinkman Mfg. Co., Terre Haute, Ind., were the lowest bidders, Aug. 16, for a heating and ventilating apparatus for a mess hall and kitchen buildings for this Home, at $5.390.

CHARLESTON, ILL.—The contract for building the Coles county court house has been let to A. G. Campfield, Richmond, Ind., at $74,500.

WEST SUPERIOR, WIS.—Bids were asked until Aug. 30 for erecting a 9-story theatre and office building for W. H. Miller, according to reports; estimated cost, $110,000. Arch., Geo. O. Garnsey, 185 Dearborn St., Chicago, Ill.

MINNEAPOLIS, MINN.—Pike & Cook, 220 South 4th St., Minneapolis, has been awarded the general contract for rebuilding the Andrus Bldg. at 5th St. and Nicollet Ave., to cost about $100,000. Arch., F. B. Long.

DES MOINES, IA.—S. T. Roberts was the lowest bidder for the erection of a building for the Nichols & Shepard Co., at $16,662.

ROSEDALE, KAN.—Bids are asked until Sept. 2 for constructing an 8-room brick and stone school building. Arch., L. G. Middaugh, Massachusetts Bldg., Kansas City, Mo.; Clk., W. E. Harvey.

TOPEKA, KAN.—The Hope Ventilator Co., 1633 West Prospect Place, Kansas City, Mo., is reported to have been awarded the contract for furnishing and installing the heating and ventilating apparatus at the insane asylum building at $8,549, and that for the Winfield asylum at $5,755.

ST. LOUIS, MO.—Bids are asked by the board of education until Sept. 10 for the erection of two school buildings in this city. Comr., Wm. B. Ittner.

MANDAN, N. DAK.—Bids are asked until Sept. 9 for building two school houses. Clk., J. T. Nelson.

VALLEY CITY, N. DAK.—Bids are asked until Sept. 5 for furnishing the steam heating plant for the court house, according to reports. Chn. County Comrs., E. K. Myhre.

FORT WORTH, TEX.—Bids are asked until Sept. 10 for the construction of the building for a Masonic Widows' and Orphans' Home for the Grand Lodge of Texas, near Fort Worth. Address A. M. Carter, Scott-Harrold Bldg.; Arch., S. B. Haggart, 703 Main St., Fort Worth.

DALLAS, ORE.—Bids are asked until Sept. 8 for the erection of a county court house in this city. E. Hayter, Clk. of County Comrs.; D. D. Neer, Arch., Portland, Ore.

TORONTO, ONT.—The board of control has accepted the bid of the Sprague Co. of New York, for erecting three electric elevators, with a plant for five, in the municipal building, at $26,475.

WATER-WORKS.

OAKLAND, ME.—The Maine Water Co., it is stated, will put in the proposed works in this place at once. The company was recently granted a franchise. W. T. Haines and Geo. Learned, Waterville, Me., are interested.

BOSTON, MASS.—Norcross Bros., Worcester, Mass., have been awarded the contract for building the new low service reservoir at Chestnut Hill, at $182,660. The bids will probably be given in our issue of next week.

SPRINGFIELD, MASS.—Local papers state that the commissioners expect to recommend to the next city government measures for improvements to the works and water supply, to cost from $100,000 to $300,000. F A. Holden, Clk.

ALDEN, N. Y.—This place has voted to issue $18,000 in bonds for works.

BAINBRIDGE, N. Y.—C. E. Clark writes us that the corporation has not decided the question of new works. There is a plant in operation owned by the Bainbridge Water-Works Co. It is said to be not entirely satisfactory. Population (1890), 1,050.

COPENHAGEN, N. Y.—Surveys for works are being made. It is proposed to secure a water supply from a lake in Pinckney, about five miles distant.

ELLIS ISLAND, N. Y.—Holmes & Cogan, Jersey City, were awarded a contract, Aug. 29, by the United States Government to lay a water pipe from the foot of Phillip St., Jersey City, to Ellis Island. The pipe line will be 2,000 ft. long, and the contract price is $14,045. The city will receive $100 a 1,000,000 gallons for all water furnished, but the quantity that will be needed will not be known until the supply is turned on. It is stated that it was for this reason that Jersey City insisted that the Government should pay for the laying of the pipe.

ROME, N. Y.—Morton & Hill, Attica, N. Y., have been awarded the contract at $10,290, for furnishing and erecting the water tower at the Rome State Custodial Asylum.

WHITESBORO, N. Y.—This place voted Aug. 26 against building works.

CAMDEN, N. J.—Chas. A. Hague, 39 Cortlandt St., New York, has been selected to test the water-works.

HIGHBRIDGE, N. J.—H. Satimer, Borough Clk., writes us that the proposed gravity works will cost about $12,000. The question of making the improvement has not yet been voted upon. Population, 1,300.

JERSEY CITY, N. J.—Bids are asked until Sept. 6 for furnishing 90 dozen ⅝-in. stop cocks, 50 dozen ¾-in., 25 dozen 1-in., and 6 dozen 1½-in. stop cocks, about 10,000 lbs. of lead, etc. Geo. T. Bouton, Clk. Bd. St. and Water Comrs.

MILFORD, N. J.—The council is considering propositions for building works.

SALEM, N. J.—We are informed that the contract for furnishing the pump for the filter plant at the water-works has been let to Henry R. Worthington, 86 Liberty St., New York, at $387; that for the filter basin was let to C. J. Young and Jos. H. Young, 4618 Chester Ave., Philadelphia, at $3,100.

SPRING LAKE, N. J.—It is stated that the council has appropriated $70,000 for new works.

BRADDOCK, PA.—This place voted, Aug. 23, to issue $81,000 in bonds to complete the works.

LEBANON, PA.—At the last meeting of councils ordinances were passed extending the water mains from Willow St. through Pheasant alley to Spring alley; and also for laying 8-in. water mains in Church St., from Sixth St. to Fifth St. An ordinance has been passed providing for 25 additional fire hydrants. J. D. Kerr, Secy. Water Board; Geo. W. Hayes, City Engr.

PHOENIXVILLE, PA.—M. P. Quinn, Pottsville, Pa., has been awarded the contract for laying water pipe in this city, according to reports.

PHILADELPHIA, PA.—Bids are asked until Sept. 6 for furnishing a permanent water supply in connection with the Pennsylvania Ave. subway and tunnels. Thos. M. Thompson, Dir. Pub. Wks.

DELAWARE CITY, DEL.—It is reported that the contractors have begun the construction of the proposed works. C. Taylor Leland, Quakertown, Pa., may be addressed.

MIDLAND, MD.—The question of building works to cost about $8,000 is being considered. It is proposed to secure the water supply from Mathes Run, about three miles distant.

POCOMOKE CITY, MD.—Bids are asked until Sept. 14 for constructing works and a sewerage system, as stated in our advertising columns. (Postponement from Sept. 7.) Engrs., Pownall & Minshall, 150 Nassau St., New York; Mayor, R. M. Stevenson.

WASHINGTON, D. C.—Bids for driving deep wells have been received from the following: Rust Well Machinery Co, Ithaca, N. Y.; J. E. Thomas & Son, Lyons, Pa.; Lebanon Valley Artesian Well Co., Lebanon, Pa.; C. Gruver, Alliance, Va.; Wm. C. Miller, Anacostia, D. C.; W. E. Dewitt and Prather & Niemyer, Washington, D. C.

BRISTOL, VA.—Bids are asked until Sept. 21 for furnishing the materials and constructing the proposed works, according to reports. It is proposed to secure a supply of 250,000 gallons of water a day from artesian wells, which have already been driven. Population (1890), 3,000. J. D. Mitchel, Chn. Com.

MOUNT PLEASANT, S. C.—The council is considering the question of securing a water supply. It has not been decided whether to use a standpipe or artesian wells. Intendant, R. V. Royall.

ELBERTON, GA.—An election will be held Sept. 20 to vote on the question of awarding a contract to Geo. J. Baldwin, Savannah, Ga., and 39 Cotton Exchange Bldg., New York; estimated cost of works, $25,000.

SYLVANIA, GA.—The question of issuing bonds for an artesian well for a water supply will probably soon be voted upon.

TUSCUMBIA, ALA.—The question of building works to cost about $25,000 is being considered, according to reports. It is proposed to secure the water supply from Big Spring.

LAKE PROVIDENCE, LA.—It is stated that R. L. Hill wishes to secure prices for machinery for works and a light plant.

JACKSON, O.—The question of building works will be voted upon Sept. 19.

NEW RICHMOND, O.—This place will vote, Sept. 6, on the question of issuing $30,000 in bonds for works and a light plant. Engr., E. F. Layman, 32 East 3d St., Cincinnati.

McCONNELSVILLE, O.—An election will be held Sept. 19 to vote on the question of issuing $20,000 in bonds for works.

MOUNT GILEAD, O.—Geo. J. Young, Clk., writes us that this place voted Aug. 27 against issuing $33,000 in bonds for works and a light plant. It is probable that another election will be held.

ATTICA, IND.—Work on the new reservoir has been begun and it will be completed this fall; its capacity will be 500,000 gallons, and it will be covered with masonry arches. J. A. Foster & Co. are the contractors, and Alvord & Shields, Chicago, Ill., the designing and constructing engineers.

DELPHI, IND.—The report made to the council by Alvord & Shields, The Rookery, Chicago, has been adopted and the changes in the works are being carried out under their direction. Bids for a new 1,000,000-gallon pump have been received. A 100,000-gallon reservoir is being built.

LA PORTE, IND.—We are informed that this city voted Aug. 23 to secure a new water supply. The new supply will probably be secured from Little Kankakee River, requiring an extension of four miles of 20-in. pipe; but the question of the source is still under discussion; estimated cost, $70,000. Population, 10,000. W. C. Weir and Milton J. Henoch, Cy. Engr., may be addressed.

MARION, IND.—Bids are asked by the city clerk until Sept. 3 for laying water pipe in a number of streets.

NEW ALBANY, IND.—Local papers state that the new water company has applied for a franchise.

LAKE ODESSA, MICH.—Wm. H. McCartney, Village Pres., writes us that this place will put in works this fall to cost about $10,000. The contract will probably be let in about two weeks.

LESLIE, MICH.—The question of issuing bonds for works is being considered.

MOUNT PLEASANT, MICH.—Riggs & Sherman, Toledo, O., have been engaged to prepare plans for works and a sewer system for the U. S. Indian School here. Supt., R. S. Graham.

ALEXIS, ILL.—Bids are asked by the city clerk until Sept. 1 for the purchase of $3,000 of 6% water-works improvement bonds.

DUBUQUE, IA.—E. C. Blake, Cy. Engr., writes us that the city has served notice on the Dubuque Water Co. of its intention to buy the works. The company will have six months' time in which to prepare for the sale, according to its charter. The works will be remodeled and put in first-class condition. The plant contains about 44 miles of mains varying in size from 4 to 16 ins.; 353 hydrants, standpipes, pumps, reservoir, etc. It is probable that the city will no more than get the purchase question settled before some time next year. It is hoped, however, to have everything in shape for next season.

EARLING, IA.—This place is reported to have voted to build works.

MAYNARD, MINN.—Bids are asked until Sept. 5 for building the proposed works, according to reports. K. H. Hollan, Recdr.

MINNEAPOLIS, MINN.—We are informed that the following bids were received Aug. 26 for furnishing one or two 10,000,000-gallon pumping engine, as advertised in Engineering News; F. W. Cappelen, Cy. Engr.:

Bidder.	—Engines— One.	Two.
The Holly Mfg. Co., Lockport, N. Y.	$41,000	$80,500
Lake Erie Eng. Works, Buffalo, N.Y.	57,250	109,500
Wilson-Snyder Mfg. Co., Pittsburg, Pa.	47,500	92,000
Henry R. Worthington, New York, N. Y.	42,300	82,300
Edw. P. Allis Co., Milwaukee, Wis.	48,000	94,000

WALKER, MINN.—Bids are asked until Sept. 6 for furnishing the materials and for building works; estimated cost, $6,000. Pres., Chas. Kinkele; Recdr., M. J. Quam.

DEADWOOD, S. DAK.—Francis C. Tucker, Cy. Engr., writes us that the contract has been let for the excavation to bed rock at the dam site for the extensions to the works. The water collected there will be brought in an 8 or 10-in. pipe about 1½ miles, and then pumped about 100 ft., so as to be added to the present supply. The addition will be about 500,000 gallons a day. This supply will be used as an auxiliary in case of the shortness of the present supply. D. A. McPherson, Chn. Com.

SIOUX FALLS, S. DAK.—Local papers state that W. R. Coates, Ypsilanti, Mich., will make a proposition for building new city works. S. B. Howe, Cy. Engr., writes us that nothing has yet been done toward the proposed new works.

JAMESTOWN, N. DAK.—The question of sinking a second and larger artesian well is being considered. The present well is 2 to 4 ins. in diameter and 1,467 ft. deep.

GREAT FALLS, MONT.—This city voted Aug. 20 to purchase the works of the Great Falls Water Co. for $375,000.

GOLDFIELD, COLO.—This place voted Aug. 24 to build works. It is stated that the water supply will be secured from Victor.

PUEBLO, COLO.—A new main will be built to Dundee. Trustees Davis and Mattice may be addressed. Consult. Engr., Jno. W. Hill, Cincinnati, O.

SEDALIA, MO.—L. P. Andrews, Secy. and Treas. Sedalia Water & Light Co., writes us that the works will have a general overhauling. The machinery will be repaired, the pumping station remodeled, a new reservoir, nine miles from the pumping station completed, and a conduit laid to connect the same. Part of the work will be let, the balance will probably be done by the company.

SEATTLE, WASH.—Local papers state that the commission will ask for bids about Sept. 10 for furnishing the materials and for constructing the Cedar River water-works addition. Plans and specifications are about completed, having been prepared under the direction of G. N. Miller, Asst. Engr. The improvements will cost about $1,000,000. Geo. Cotterill, Acting Cy. Engr.

OAKLAND, CAL.—The Contracosta Water Co. proposes to lay about 12 miles of water pipe from the artesian belt for an increased water supply.

SAN MATEO, CAL.—Geo. A. Kertell, Chn. Water Com., writes us that the city contemplates the construction of city works. The question of issuing $80,000 in bonds for the improvement will be voted upon Oct. 22. Chas. E. Moore, Santa Clara, Cal., has prepared preliminary plans and estimates. Population, $1,500. Pres., Bd. Trustees, A. B. Ford; Cy. Clk., R. H. Jury.

SAUSALITO, CAL.—M. M. O'Shaughnessy, 191 Crocker Bldg., San Francisco, is reported to have been engaged to make a report for an increased water supply.

VALLEJO, CAL.—The city trustees have made a survey for an increased water supply from Dugroad Creek, according to reports. Trustees Cooper and Rounds may be addressed.

TEMPE, ARIZ.—It is stated that the council wishes to receive proposals until October for a franchise for supplying this place with water.

MANTI, UTAH.—The question of securing an increased water supply from Funks Lake is being considered. The lake is six miles distant. Population (1890), 2,000.

ALMONTE, ONT.—The question of building works to cost about $50,000 is being considered. Town Clk., L. Coulter.

FRASERVILLE, ONT.—Thos. Crocket, Supt. Temisconata Ry. Co., Riviere du Loup, Que., has been granted a franchise for the proposed works. Engr., C. E. Hoare.

HINTONBURG, ONT.—E. J. Rainboth, Ottawa, is stated to have been granted a franchise for works, the construction to be begun at once.

PETERBORO, ONT.—It is reported that McQuillan & Co., Toronto, submitted the lowest bid at $6,295 for construction of the works at Ashburnham.

WIVENHOE, ENGLAND.—Bids, plans, etc., are asked until Sept. 29 for the proposed water supply for this place. Clk., C. W. Denton, 8 East Stockwell St., Colchester.

HONOLULU, HAWAIIAN ISLANDS.—Gear, Lansing & Co. propose to build works at the Diamond Head addition, according to reports. It is said that a 4,000,000-gallon pump will be purchased from Henry R. Worthington, New York. Supt., Andrew Brown.

IRRIGATION.

LONG CREEK, ORE.—It is reported that Godfrey & Tabor intend to run a ditch to tap Olive Lake. It will be 9 miles long and will cost about $15,000.

WOODBRIDGE, CAL.—The plant of the Woodbridge Canal & Irrigation Co. was sold at auction by Judge Morrow, Aug. 10, to G. Howard Thompson, at $21,000, according to reports.

SALT LAKE CITY, UTAH.—The Davis & Weber Counties Canal Co. has decided to let the contract for the building of the East Canyon dam to Parker, Ferrin Bros. and the Andrews Bridge Co. on a combination bid. The dam is for a reservoir in East Canyon back of Weber Canyon, from which to draw the late water supply for the Davis and Weber counties canal. The work will cost about $35,000.——Press reports state that H. B. Windsor, Pres. Utah Irrigation Co., Salt Lake City, is buying the necessary material for the extension of the company's pipe lines in the southwestern part of Utah, 250 miles south of Salt Lake City.

NEW COMPANIES.—Summer Lake Irrigation Co., Ana River, Township 30, Lake county; $10,000; W. H. Butts, D. S. Dufur, C. C. Hutchinson.

McPherson Irrigating Ditch Co., Gate, Okla., and Englewood, Kan.; to use the water in the Cimarron for irrigation purposes; Benj. F. McPherson, Blair F. Ruth and Ira M. Hewins, of Englewood, Kan.

West Fork Ditch Co.; $5,000; to build ditches in Choteau county, near Chinook; A. J. Davidson, Helena, Mont.; F. D. Parker and Winfield S. Reinbolt, of Chinook, Mont.

Spring Lake Irrigation & Improvement Co., Klamath Falls, Ore.; $10,000; James W. Jory and Charles F. Jory.

Lower Lathan Reservoir Co., Greeley, Colo.; $20,000; to build a reservoir covering 702½ acres east of La Salle, and to have a capacity of about 150,000,000 gallons; Pres., Asa Sterling; Vice-Pres., H. A. Irons; Secy., J. B. Phillips; Treas., A. J. Park.

Full Creek Ditch & Reservoir Co., Denver, Colo.; $64,000; to operate in San Miguel and Montrose counties; L. G. Gray, L. F. Watts and Sadie M. Gray.

SEWERAGE.

DANVERS, MASS.—It is stated that work has been begun on the new system for the Danvers hospital. The contract was recently awarded to F. C. Trumbull & Co., Boston, at $8,300. Snow & Barber, Boston, are the engineers who have the work in charge. The plant is on the west side of Dayton St., Danvers Center, and there are to be 10 filter beds, with 6 and 8-in. pipes leading from Asylum Hill. The largest beds are to be about 100 ft. square.

FALL RIVER, MASS.—Estimates are being prepared for sewers in a number of streets.

HOLYOKE, MASS.—The plans prepared by the city engineer for the new sewer for the Highlands have been approved by the state board of health.

PALMER, MASS.—C. T. Brainerd has been awarded the contract for building the sewers in Depot village, according to reports.

PROVIDENCE, R. I.—Bids are asked until 11 a. m. Sept. 2, for constructing about 2,000 ft. of 34 to 20-in. brick and 3,500 ft. of 18 to 8-in. pipe sewers, etc. Robt. E. Smith, Comr. Pub. Wks.

COHOES, N. Y.—Local papers state that the plans for a system marked "I X L," prepared by Hunter & Fernald, Melrose, Mass., have been adopted by the commission. These plans were described in our issue of Aug. 18. Estimated cost, $127,792.

PHILLIPSBURG, N. J.—Jas. E. Smith, Town Surv., writes us that T. S. Pursell has been awarded the contract for building 5,400 ft. of 24 to 12-in. pipe sewer, at about $6,000. S. P. Stone, Chn. Com.

TRENTON, N. J.—Bids are asked until Sept. 6 for constructing pipe sewers in certain streets, brick paving, etc. C. Edward Murray, Cy. Clk.

WOODBRIDGE, N. J.—An election will be held Sept. 20 to vote on the question of building sewers.

GETTYSBURG, PA.—The question of improving the system is being considered, according to reports. J. L. Kendlehart, Clk. Council.

HAZLETON, PA.—The question of building sewers in certain streets is being considered.

MERCER, PA.—This place voted Aug. 23 to issue bonds for a sewer in the east side.

MERCER, PA.—Bids are asked until 12 m., Sept. 2, for constructing 12,565 ft. of 10 to 6-in. pipe sewers. Engr., Geo. Zahnises, New Castle, Pa.; Clk., J. M. Campbell.

PHILADELPHIA, PA.—Bids are asked until Sept. 6 for constructing branch and main sewers, etc. Thos. M. Thompson, Dir. Pub. Wks.

RANKIN, PA.—This place has voted not to issue $25,908 in bonds for continuing the construction of the system.

WASHINGTON, D.C.—Bids are asked by the District Commissioners until Sept. 17 for constructing sewers, as stated in our advertising columns.

POCOMOKE CITY, MD.—Bids are asked until Sept. 14 for building a system and water-works, as stated in our advertising columns. (Postponement from Sept. 7.) Engrs., Pownall & Minshall, 150 Nassau St., New York; Mayor, R. M. Stevenson.

PARKERSBURG, W. VA.—Bids are asked until Sept. 13 for furnishing the material and for laying 1,400 ft. of 8-in. pipe sewer and brick pavement in two streets. W. T. Rittenhouse, Clk.

HENDERSON, KY.—Bids are asked until Sept. 6 for constructing a sewer in a certain street. W. I. Thompson, Mayor.

CLEVELAND, O.—Bids are asked until Sept. 8 and 15 for constructing sewers. Geo. R. Warden, Dir. Pub. Wks.

CLEVELAND, O.—Plans have been adopted for the reconstruction of the 5-ft. Taylor St. brick sewer.

COLUMBUS, O.—Bids are asked until Sept. 6 for constructing sewers in district 1. Jas. A. Fanning, Clk. Bd.

NILES, O.—Wm. Wilson, Cy. Engr., writes us that it is proposed to build about two miles of 40 to 8-in. brick and pipe sewers; average cut, 10 ft.

SHELBY, O.—Bids are asked until Sept. 19 for constructing six miles of lateral sewers. W. F. Sonnastine, Clk.

WELLSVILLE, O.—A. P. Dennis, Mayor, writes us that there has been no definite action taken in regard to a system, noted in our issue of Aug. 18. The question is being considered and will probably be voted on at the election in November.

HAMMOND, IND.—Bids are asked until Sept. 8 for constructing 860 ft. of two-ring 3½ ft., 1,290 ft. of two-ring 4 ft. and 250 ft. of three-ring 4-ft. brick sewer in West Hammond. Clk., Martin H. Finneran.

HARBOR SPRINGS, MICH.—Geo. S. Pierson, Kalamazoo, Mich., is preparing plans for sewers for Harbor Point summer resort.

LAURIUM, MICH.—Jos. R. Murphy, Clk., writes us that this place voted July 23 to issue $35,000 in bonds for the proposed system. Bids for the construction will probably be asked in January or February. Engr., C. F. Loweth, 94 East 3d St., St. Paul, Minn.

MOUNT PLEASANT, MICH.—Riggs & Sherman, The Nasby, Toledo, O., have been selected to prepare plans and specifications for water-works and sewers for the United States Indian School at Mount Pleasant. R. S. Graham, Supt.

CHICAGO, ILL.—The trustees of the Illinois & Michigan Canal have employed Alvord & Shields, The Rookery, Chicago, to report upon the proposed plans of the sanitary district of Chicago for changes in the canal between Lockport and Joliet. The question involves power as well as navigation interests, and arises from the increased flow of water which will be caused by the operation of the Drainage Canal.

SYCAMORE, ILL.—The council has decided to adopt the separate system of sewers, with sewage disposal works. It has engaged Alvord & Shields, 1140 The Rookery, Chicago, to prepare plans and to superintend the construction of the main outlet sewer, which will be built this fall.

MONMOUTH, ILL.—It is proposed to construct sewers in several streets.

BURLINGTON, IA.—The council has appropriated $6,000 to arch the Hawkeye sewer.

CALLENDER, IA.—Bids are asked until Sept. 5 for constructing certain sewers, according to reports. N. C. Rasmussen, Chn. Com.

SIOUX CITY, IA.—The question of additional sewers in Fourth and Water Sts. is being considered.

FARIBAULT, MINN.—Bids are asked until Sept. 12 for constructing 2,525 ft. of sand-rock tunnel, about 8,300 ft. of 15 to 8-in. pipe sewer, 27 manholes, etc. Engr., C. F. Loweth, 94 E. 4th St., St. Paul, Minn., and Davenport, Ia.; Mayor, P. F. Ruge.

FARGO, N. DAK.—S. F. Crabbe, Cy. Engr., writes us that it is proposed to build 3,200 ft. of 12-in. pipe sewers in 2d and 4th Sts.

GRAND FORKS, N. DAK.—Bids will soon be asked for sewers in certain streets. John Dinnie, Mayor.

COLUMBIA, MO.—This place will vote Sept. 27 on the question of building a system to cost $28,000.

JOPLIN, MO.—This place voted Aug. 23 to raise $30,000 by direct taxation for additional sewers.

SEDALIA, MO.—The council has voted to build sewers in two new districts. Mayor Overstreet may be addressed.

HOUSTON, TEX.—Bids are asked until Sept. 12 for constructing a brick sewer in the Riverside and Washington Road. County Judge W. N. Shaw.

SANTA ANA, CAL.—Bids are asked until Sept. 15 for furnishing the materials and for constructing 10,000 ft. of pipe sewer, a sewage disposal plant, etc., according to reports. Edward Telford, Cy. Clk.

SAN LUIS OBISPO, CAL.—An election will be held Sept. 5 to vote on the question of issuing $36,000 in bonds for a system. Cy. Clk., J. A. Goodrich.

OTTAWA, ONT.—Alderman Davis, Chn. Com., is urging the council to adopt plans for the disposal of sewage into the Ottawa River, the outlet sewers to be built to the middle of the stream.

TORONTO, ONT.—Dr. Sheard, of the board of health, and Alderman Crane have secured information, etc., for the disposal of sewage by precipitation and by filtration.

GARBAGE DISPOSAL—STREET CLEANING

CHESTER, PA.—B. R. Myers, of the councils, has recommended that steps be taken at once for building a plant to cost about $5,000.

LANCASTER, PA.—The council received the following bids Aug. 24 for cleaning and sweeping the streets from Sept. 1 to April 1: Adam M. Diller, $1,800; Frank B. Kendig, $1,840; Vincent Pfau, $2.25 a sq. a week—cleaning twice a week; I. M. Bernard & Bro., $1,600; A. Steinwandel, $3,433 a year; H. N. Herr, $1,675; Andrew Mehaffy and August Nutto, $1.25 a sq. a week; Jacob Workman, $1,750; F. H. Wilhelm, $2 a sq. a week, if city furnishes sweepers, and $3 if bidder furnishes sweepers.

CUMBERLAND, MD.—The question of a better method of garbage collection and disposal is being urged by the newspapers.

HAGERSTOWN, MD.—The council, it is stated, will soon consider the question of a garbage disposal plant.

HAMILTON, O.—Bids are asked until Sept. 6 for furnishing a street sweeper. M. O. Burns, Cy. Clk.

DETROIT, MICH.—Local papers state that Nettleton & Kahn, 1117 Union Trust Bldg., have prepared plans for a garbage crematory, office, stables, etc., for the Detroit Sanitary Co., at French's Landing. Mgr., M. H. Chamberlain, 51 Woodward Ave.

STREETS AND ROADS.

DAM.—West Superior, Wis.—Press reports state that Judge Vinje has decided the case of the Brule River Improvement Co. against the Mills & Le Claire Lumber Co. in favor of the defendant. The plaintiff asked the court to permanently restrain the defendant from building a dam across the Brule River for logging purposes. The judge allowed the construction of a dam of 7½ ft. head, with proper sluices.

JETTY WORK.—Ocean City, Md.—Press reports state that the council has accepted plans for a jetty north of the Atlantic Hotel to low-water mark, a distance of 150 ft. from the board walk. Piles will be driven to form the jetty, which is an experiment to find out exactly how the surf will affect the beach at that point. If the venture is successful in building up the beach, it is proposed to put in a series of jetties along the whole front of the town.

CABLE.—Sydney, N. S. W.—Press reports state that Sir Hugh Muir Nelson, Premier of Queensland; Sir George H. Reid, Premier of New South Wales, and Sir George Turner, Premier of Victoria, met in conference on Aug. 20, and discussed plans for a Pacific cable. They decided to make the definite offer that if Great Britain and Canada, collectively, would guarantee five-ninths of the cost of laying the new cable they would recommend to their respective legislatures to contribute one-ninth each, asking New Zealand to contribute the remaining one-ninth.

DRAINAGE CANAL, ETC.—Florida.—Press reports state that a company with $2,000,000 capital has been formed to reclaim the Florida Everglades. It proposes to construct a canal system 144 miles long which will drain 800,000 acres of land in southeastern Florida, which it has secured from the state. Among the directors of the company are J. R. Parrott, Vice-Pres. Flagler Ry. System, and James A. Ingraham, Land Comr. Flagler Ry. System. It is understood that the company is to begin operations immediately, under the title of the Florida Coast Drainage & Sugar Co.

COFFERDAM.—Pittsburg, Pa.—The following bids were received by Maj. Chas. F. Powell, U. S. Engr., Aug. 25 for the construction of a coffer and the building of a part of the chanoine dam at the Herrs Island lock in the Allegheny River: W. W. Hegeman & Co., New York, $57,735; W. Bradley & Co., Oswego, N. Y., $62,510; I. V. Hoag, Jr., Allegheny, $74,455; McIlvain & Unkefer, Pittsburg, $75,526; James Jackson, Pittsburg, $78,105; C. W. Friend, Pittsburg, $78,923; Jutte & Foley, Pittsburg, $80,339; Keeling & Ridge, Pittsburg, $81,647; A. W. McDonald Pittsburg, $89,560.

CONTRACT PRICES.

BRICK PAVING.—Chillicothe, O.—The following bids were received Aug. 13 for brick paving, as advertised in Engineering News; contract awarded Pfaff, Ringwald & Smith; Wm. H. Luchtenberg put in a bid of 12 cts. for tar filler:

Bids Received at Chilicothe, O., Aug. 13, 1898, for Brick Paving.

DREDGING.—Montgomery, Ala.—Maj. F. A. Mahan, U. S. Engr., informs us that the following bids were received Aug. 20 for dredging: National Dredging Co., Wilmington, Del., 17.9 cts. a cu. yd. for 2,300 cu. yds. of dredging, etc., a day; Rittenhouse-Moore Dredging Co., Mobile, Ala., 19.5 cts. a yd. for 3,000 yds. a day.

MACADAM PAVING.—Lansingburg, N. Y.—The following bids were recently received by the village trustees for macadam paving in Fifth Ave.: Henry Dumary, Albany—Excavating, $3 a cu. yd.; granite curb, $2.25 a lin. ft.; kosmocrete curb, $1.50 a lin. ft.; bluestone curb, $2.50 a lin. ft.; 8-in. macadam pavement, complete, 76 cts. a sq. yd. Thos. H. Karr, Troy—Excavating, 10 cts; granite curb, $1.40; kosmocrete curb, $1.50; bluestone curb, $1; macadam paving, 75 cts. a yd (awarded contract). Troy Public Works Co.—Excavation, $4; granite curb, $1.40; kosmocrete curb, $1.50; bluestone curb, $1.40; macadam paving, 85 cts. Crutchley & Murray, Lansingburg.—Excavation, $2; granite curb, $1.19; kosmocrete curb, $1.45; bluestone curb, $1.13; macadam paving, 79 cts. Donnovan Bros., Staten Island.—Excavation, $5; granite curb, $2; kosmocrete curb, $1.75; bluestone curb, $2; macadam paving, $1.35.

PIPE SEWER.—Schenectady, N. Y.—Henry Furman has been awarded the contract at 38 cts. a ft. for laying 3,000 ft. of 8-in. sewer pipe. S. B. Sebring, Cy. Engr.

LEVEE WORK.—West Memphis, Tenn.—Harry N. Pharr, Ch. Engr. St. Francis Levee District, informs us that the bids received Aug. 3, 1898, for levee work, were rejected, and will not be readvertised this season; the work was to be paid in certificates of levee board bearing 6%, and payable $40,000 a year, beginning with 1902. The bids are as follows: Keeney & Bailey, Cairo, Ill., Miles 141 to 144, 188,116 cu. yds., 14 cts. a cu. yd.; Miles 147 to 149, 168,666 cu. yds., 15 cts.; W. J. Bentley & Co., New Orleans, La., Miles 141 to 144, 14 cts.; 130 to 136, 455,008 cu. yds., 17.6 cts.; 136 to 141, 529,350 cu. yds., 22.9 cts.; 144 to 147, 373,800 cu. yds., 21.9 cts.; 147 to 151, 348,800 cu. yds., 18.9 cts.; not less than one nor more than two divisions to be awarded; R. M. Quigley & Co., St. Louis, Mo., Miles 127½ to 151½, 2,093,521 cu. yds., 17.93 cts.

BRICK SIDEWALK.—Baltimore, Md.—The following bids were received Aug. 3, 1898, for constructing a brick sidewalk around Collington Square, about 28,000 sq. ft., being covered; all bidders of Baltimore: C. A. Hook, 7.3 cts.; W. H. Doe (accepted), 6⅞ cts.; W. E. Morris, 8¼ cts.; C. W. Kraft, 9¼ cts.

SEWER MATERIAL.—Baltimore, Md.—The following contracts were let Aug. 3, 1898, for furnishing materials for the proposed Harris Creek sewer, all contractors of Baltimore: American Portland cement, 1,375 bbls., National Building Supply Co., $1.85 a bbl. Rubble stone, 900 cu. yds., I. H. Peddicord & Son, $1.60 a cu. yd. Sand, 395 cu. yds., B. Noha, 65 cts. a yd. Hand-made brick, 91,000, Smith & Schwarz Brick Co., $6.22 a M.; vitrified brick, 15,000, B. Wallis & Co., $19 a M.; machine-made brick, 120,000, J. R. Busey & Son, $6.90 a M.

PIPE SEWER.—Nanticoke, Pa.—The council recently received the following bids for trenching, backfilling, laying and cementing about 2,500 ft. of sewer pipe in West Church St.: Rebesher & Edmunds, 6 ft. and under, 18 cts.; 6 ft. to 7 ft., 19 cts.; 7 ft. to 9 ft., 25 cts.; laying and cementing, 6 cts.; rock, 97 cts. a cu. yd. G. S. Post & Co., Wilkes-Barre, 6 ft. and under, 36 cts.; 6 to 7½ ft., 40 cts.; 7½ to 9 ft., 54 cts.; 9 to 11 ft., 65 cts.; 11 to 14 ft., 79 cts.; rock, $1.25 a cu. yd.; shale rock, 68 cts. a cu. yd. Lyman E. Carle, Ashley, 6½ ft. and under, 27 cts.; 6½ to 7½ ft., 49 cts.; 7½ to 9 ft., 55 cts.; rock, 80 cts. a cu. yd.; hard pan, 70 cts. a cu. yd. Coon & Co., Wilkes-Barre, 6 ft. and under, 27 cts.; 6 to 8 ft., 33 cts.; 8 to 10 ft., 45 cts.; 10 to 12 ft., 70 cts.; rock, 80 cts. a cu. yd. Philpin & Lueder, 6 ft. and under, 16 cts.; 6 to 7½ ft., 20 cts.; 7½ to 9 ft., 25 cts.; 9 to 11 ft., 40 cts.; 11 to 14 ft., 74 cts.; 14 to 18 ft., $1; rock, shale and slate, $1.05 a cu. yd.

LEVEE WORK.—New Orleans, La.—The following are the lowest bids recently received by the board of state engineers for 2,500 cu. yds. of work on the Cairo levee, 10,000 cu. yds. on the Taylor levee and 145,000 yds. on the Choctaw Bayou levee: J. Thomas, 9 cts., 8.25 cts. and 9.33⅓ cts. for the Cairo, Taylor and Choctaw Bayou levees, respectively, and W. M. Rushing, 7.90 cts. on the Taylor levee.

ASPHALT REPAIRING.—Macon, Ga.—Local papers state that the council will award a contract to the Southern Asphalt Paving Co., at 6 cts. a sq. yd., for repairing the asphalt pavement of the city as may be required.

WATER PIPE.—Seattle, Wash.—A. E. Kirk has been awarded the contract for furnishing 1,000 ft. of 20-in. cast-iron water pipe, at $23.75 a ton. The other bids were as follows: W. D. Hofius & Co., $26; Caldwell Bros., Tacoma, $26.75; E. A. Hanbach Co., $26.50.

BRICK PAVING.—Binghamton, N. Y.—Jerome De Witt, Mayor, writes us that the contract for brick paving in Court St. has been let to Eugene Fee, at $1.72 a sq. yd.

BRICK SEWER.—Dallas, Tex.—We are informed that the following bids were received Aug. 18 for building a 7-ft. brick sewer through block 338: J. C. McCord, $7.75 a lin. ft.; concrete, $4.50 a cu. yd.; J. C. McCord, Jr., $6.75; concrete, $4; C. W. Olcott, 182 First Ave. (awarded contract), $5.91; concrete, $4.25.

ASPHALT BLOCK PAVING.—Sing Sing, N. Y.—The Hastings Pavement Co., New York, has been awarded the contract for paving Spring St., from Main St. to Waller Ave., at $2.25 a sq. yd., according to reports.

ENGINEERING MATERIAL PRICES.

TRACK MATERIALS—
- **New York—Angle bars, 1.05 cts. to 1.10 cts.; spikes, 1.40 cts. to 1.50 cts.; track bolts, hexagonal, 1.80 cts. to 1.85 cts.; square, 1.60 cts. to 1.75 cts.**
- Chicago—Angle bars, 1.10 cts. to 1.15 cts.; spikes, 1.50 cts. to 1.60 cts.; **track bolts, hexagonal, 1.90 cts. to 2.00 cts.;** square, 1.80 cts. to 1.90 cts.

RAILS, STEEL—
- New York, new, $18.00 to $19.00; old iron, $11.00 to $11.50; old steel $9.00.
- Chicago, new, $20.00 to $22.50; old iron, $12.00 to $12.50, steel, $10.00 to $11.00.
- Pittsburg, new $18.00 to $19.00; old iron, $13.50 to $13.75; steel, $10.00.

STRUCTURAL STEEL—
- New York—Beams, 1.40 cts. to 1.45 cts.; channels, 1.40 cts. to 1.45 cts.; tees, 1.45 cts. to 1.50 cts.; angles, 1.20 cts. to 1.25 cts.; rivets, 1.75 cts. to 1.85 cts.
- Chicago—Beams, 1.35 cts. to 1.45 cts.; channels, 1.35 cts. to 1.45 cts.; tees, 1.40 cts. to 1.50 cts.; angles, 1.25 cts. to 1.35 cts.
- Pittsburg—Beams, 1.15 cts. to 1.25 cts.; channels, 1.15 cts. to 1.25 cts.; tees, 1.15 cts. to 1.20 cts.; angles, 1.05 cts. to 1.15 cts.

PLATES AND SHEETS—
- New York—Universal mill plates, 1.25 cts. to 1.30 cts.; tank, 1.35 cts. to 1.40 cts.; shell, 1.35 cts. to 1.40 cts.; flange, 1.60 cts. to 1.70 cts.; firebox, 2.25 cts. to 2.50 cts.
- Chicago—Universal mill plates, 1.25 cts. to 1.30 cts.; tank, 1.25 cts. to 1.30 cts.; shell, 1.55 cts. to 1.65 cts.; flange, 1.30 cts. to 1.50 cts.; firebox, 1.75 cts. to 4.00 cts.; sheets, 2 cts. to 2.05 cts.
- Pittsburg—Universal mill plates, 1.00 cts. to 1.10 cts.; tank, 1.10 cts. to 1.15 cts.; shell, 1.25 cts. to 1.35 cts.; flange, 1.10 cts. to 1.25 cts.; firebox, 2 cts. upwards; sheets 1.85 cts. to 2 cts.

MERCHANT STEEL—
- **Machinery, per lb., 1.60 cts. to 1.70 cts.**
- Tool, per lb., 5.50 cts. to 7 cts.

IRON—
- **Pig Iron:**
  - New York—No. 1, $11.00 to $11.25; No. 2, $10.25 to $10.50.
  - Chicago—No. 1, $11.50 to $12.50; No. 2, $11.00 to $12.00.
  - Pittsburg—No. 1, $10.00 to $10.50; No. 2, $9.75 to $10.00.
- **Bar Iron:**
  - New York, common, $1.07½ cts. to 1.10 cts.; refined, **1.15 cts. to 1.20 cts.**
  - Chicago, common, 1.05 cts. to 1.07½ cts.; refined, 1.10 **cts. to 1.20 cts.**
- **Sheets:**
  - Common American, per lb., 1.40 cts. to 2.50 cts.
  - Russia, per lb., 10½ cts. to 11 cts.

LUMBER—
- **New York:**
  - **Hemlock timber, 20 ft. and under, per M, $12.00 to $12.50.**
  - **Piling, Eastern spruce, 35 to 40 ft., 30 to 40% 12-in.** butts, 4½ cts. to 4¾ cts.
  - **Spruce, special cargoes, per M, $15.00 to $17.50.**
  - **Yellow pine, random cargoes, $14.50 to $17.00.**
  - **North Carolina pine, $2.25 to $2.40 advance over Norfolk rates.**
- **San Francisco:**
  - **Oregon pine, per M, $15.50 to $17.50.**
  - **Redwood, per M, $17.00 to $19.00.**
  - **Redwood tank stock, up to 10 ft., $21.00 to $24.00.**

GENERAL MATERIALS—
- Lead, New York, 3.90 cts. to 3.95 cts.
- Nails, Pittsburg, 1.40 cts.
- Solder, per lb., 8¼ cts. to 11½ cts.
- Spelter, per lb., 3.90 cts. to 4.00 cts.
- Copper ingots, 11⅞ cts. to 12.00 cts.
- **Granite, rough, New York, cu. ft., 40 cts. to 50 cts.**
- **Limestone, New York, cu. ft., 70 cts. to 80 cts.**
- **Ohio freestone, New York, cu. ft., 85 cts. to 90 cts.**
- **Slate, Penn. block, per square, $4.00 to $5.00.**
- **White lead, American, per lb., 5½ cts. to 6 cts.**
- **Lime, common state, per bbl., 70 cts.**

◆

INDUSTRIAL NOTES.

J. C. RODGERS & SON, contractors, have removed their offices from 8 Solingen Bldg., 138th St. and Mott Ave., to 340 East 125th St., New York.

THE PORTSMOUTH STRUCTURAL STEEL & IRON CO., Portsmouth, O., reports it is very busy at present, and that the number of orders on hand render additional help necessary.

TIPPETT & WOOD, Phillipsburg, N. J., has a contract to furnish to Silver Spring, Md., a suburb of Washington, D. C., Saratoga, N. Y., and Media, Pa., additional stand-pipes to the present water systems.

THE PITTSBURG BRIDGE CO., Pittsburg, of which Mr. Albert Price is Superintendent, has added to its shop equipment a No. 5 Hills & Jones combined machine for heavy punching, coping and framing beams and channels. The company has received a contract, through Mr. E. H. Connor, Fullerton Bldg., St. Louis, western agent, to build for the Central Lead Co. a steel head frame and tipple for its Theodora Shaft, at Flat River, Mo.

THE BETHLEHEM IRON CO., South Bethlehem, Pa., will make the forgings of the engine for the Boston Elevated Railway Co. The shaft is to be 27 ft. 10 ins. long, and 37 ins. in diameter, having a hole 17½ ins. in diameter throughout its length, and when completed will weigh, together with cranks and fly-wheel hub, upwards of 150,000 lbs. This will be assembled at the works of the Bethlehem Iron Co., and transported in its entirety by rail to Boston.

THE W. E. CALDWELL CO., 200 E. Main St., Louisville, Ky., reports a decided activity in its line at present. It manufactures water tanks and steel towers for their support, and is one of the oldest firms engaged in this business. It makes a specialty of furnishing outfits for fire protection to mills and manufactories, and also puts in water-works systems for private grounds and for small towns. Some of its recent water-works contracts are for the towns of Odell, Ill.; Minden, Ia.; Hyattsville, Md.; Middletown, R. I.; Clark's Summit, Pa.; Sea Side Park, N. J.; Jasper, Fla.; Ensley, Ala.; Theological Seminary, Va., etc. The tanks used for these outfits range from 25,000 to 100,000-gallons capacity, and the towers from 50 to 90 ft. in height. The company announces that its new catalogue contains many useful tables of information.

THE BERLIN IRON BRIDGE CO., East Berlin, Conn., has a contract to build a fire-proof boiler house for the estate of C. M. Robertson, Montville, Conn., which recently lost its former one by fire. It will consist of a steel frame work, brick side walls, and a roof of corrugated iron covering, laid on patent anti-condensation roof lining. The building will be 50 ft. square, divided by a corrugated iron partition through the center, forming boiler room and pump room, and ventilation will be obtained by monitors on the ridge of the roof, each having a sash on the side.——The Berlin Iron Bridge Co. has also received a contract from Sanderson & Porter, contractors for the Meriden & Compounce Electric R. R., to furnish several bridges and buildings on the line of this road, consisting of seven spans, varying in length from 10 to 65 ft.; a car barn, 50 × 100 ft., and a power house, 45 × 75 ft. The bridges will be of steel, and the buildings will have steel frames, brick side walls, and fire-proof roofs, the roof of the power house being covered with corrugated iron and lined with patent anti-condensation roof lining.

PERSONAL.

Lieut.-Commander Franklin C. Prindle, Civil Engineer, U. S. Navy, M. Am. Soc. C. E., has been promoted to the relative rank of Commander.

Prof. Henry M. Paul, Professor of Mathematics at the Naval Observatory, Washington, D. C., has been ordered to the Navy Yard, Mare Island, Cal.

Mr. D. C. Holly, Chief Engineer of the water-works, at Paducah, Ky., has resigned. Mr. Asa Williams, of Owensboro, has been appointed to succeed him.

Mr. E. C. Oliver, civil engineer, of Alpeña, Mich., has accepted the position of Assistant Professor of Civil Engineering in the University of Illinois, Champaign, Ill.

Lieut. Frank O. Maxson, Civil Engineers, U. S. Navy, with headquarters at Puget Sound Naval Station, has been promoted to the relative rank of Lieutenant-Commander.

Lieut. Adolfo J. Menocal, Civil Engineer, U. S. Navy, on duty at the naval station at Key West, Fla., has been promoted from the junior grade to the full grade of Lieutenant.

Mr. A. C. Menocal, M. Am. Soc. C. E., Civil Engineer, U. S. Navy, was retired from active service Sept. 1, on account of age, and has been assigned to special duty with the Nicaragua Canal Commission.

Prof. Benjamin D. Woodward, Professor of the Romance Languages and Literature, of Columbia University, New York, has been appointed Assistant Commissioner-General to the Paris Exposition of 1900.

Mr. C. E. Van Bergen, Manager of the Duluth Gas & Water Co., Duluth, Minn., has been appointed Secretary and Manager of the Board of Water and Light Commissioners, in charge of the city plant.

Lieut. Charles Keller, Corps of Engineers, U. S. Army, has been relieved from duty at Beaufort, S. C., and has been ordered to Rock Island, Ill., for duty under Capt. Curtis McD. Townsend, M. Am. Soc. C. E., Corps of Engineers.

Capt. William L. Sibert, M. Am. Soc. C. E., Corps of Engineers, U. S. Army, has been relieved from duty at Little Rock, Ark., and has been ordered to Willet's Point, N. Y., for duty under Major John G. D. Knight, Corps of Engineers.

Major William Starling M. Am. Soc. C. E., formerly Chief Engineer of the Mississippi Levee District, at Greenville, Miss., has lately been apppointed Chief Engineer of the Lower Yazoo Mississippi District, to succeed Capt. William J. Hardee, M. Am. Soc. C E.

Col. Jared A. Smith, M. Am. Soc. C. E., Corps of Engineers, U. S. Army, of Cleveland, O., has been detailed to succeed Major Thomas W. Simons, Corps of Engineers, as a member of the board to examine the locality of a proposed bridge across the Niagara River.

Mr. Charles H. Nichols, Jun. Am. Soc. C. E., of the firm of Nichols & Potter, consulting engineers, 42 Church St., New Haven, Conn., has opened an office in the Hosley Block, Branford, Conn., in which place he has charge of the construction of the new water-works for the Branford Electric Co.

Mr. Ira G. Rawn, General Superintendent of the Baltimore & Ohio Southwestern Ry., with headquarters at Cincinnati, O., has been promoted to succeed Mr. W. W. Peabody as General Manager. The latter will retain his position of Vice-President, which office has been separated from that of General Manager and the office of General Superintendent has been abolished.

Prof. Arthur Beardsley, M. Am. Soc. C. E., who has had charge of the Department of Engineering and the Mechanic Arts, in Swarthmore College, Swarthmore, Pa., for the past 26 years, has resigned his professorship on account of impaired sight. In appreciation of his services he has been made Professor Emeritus. His successor is Mr. W. H. Stine, late Professor of Electrical Engineering in the Armour Institute, Chicago.

OBITUARY.

Mr. Oscar Wright, Superintendent of the Rockville Electric Light Co., Rockville, Ind., died Aug. 29.

Mr. Henry G. Humber, Inspector of the Sewers, of Denver, Colo., since 1887, died in that city Aug. 26, aged 53.

Mr. John B. Dyar, formerly President of the Michigan Radiator & Mfg. Co., of Detroit, Mich., died at Grosse Point, Mich., last week.

Major William Vance McCracken, railway contractor, of New York city, died Aug. 30, aged 62. He was born in Bucyrus, O., and served in the Union Army during the Civil War.

Mr. William Frederick Bender, mechanical engineer, proprietor of the firm of William Oliver & Son, stone contractors, of Baltimore, Md., died Aug. 27, aged 72. He was a native of Germany.

Mr. Henry M. Myers, President of the H. M. Myers Co., Beaver Falls, Pa., shovel manufacturer, died of heart failure Aug. 30, aged 67. He was born in Georgetown, O., and learned the blacksmithing trade in Cohoes Falls, N. Y. He became the manager of the axe and shovel works of Newmyer & Graff, Allegheny City, Pa., and in 1869 organized the shovel works of Myers & Arnold, Beaver Falls. He is said to have taken out over 50 patents in this country, Canada and Europe.

Mr. Wilson Eddy, for 30 years Master Mechanic of the Boston & Albany R. R., died at his home in Springfield, Mass., Sept. 2. He was born in Chelsea, Vt., Feb. 24, 1813, and at 19 went to Lowell where he was employed on the canal. In 1840 he entered the service of the Boston & Albany R. R. as a mechanic, and was soon promoted to be Foreman of the local shops at Springfield. He was appointed Master Mechanic of the road in 1850, and during the years he held that position he built 135 locomotives, among them the "Addison Gilmore," which, it is said, was the fastest locomotive in the world at that time, and which won a gold medal and diploma at a tournament in Worcester, Mass., Oct. 1 and 2, 1851, making nine miles in 11 min. 20 sec. He resigned his position in 1881, and was succeeded by his son, Mr. Horace Eddy.

Mr. James Samuel Thomas Stranahan, President of the Park Commission of Brooklyn, N. Y., from 1860 to 1882, and formerly President of the Board of Trustees of the Brooklyn Bridge, died of apoplexy, at Saratoga, N. Y., Sept. 3. He was born at Peterboro, N. Y., April 25, 1808, and studied civil engineering, abandoning it however to engage in Indian trading. He founded the town of Florence, N. Y., in 1832, and represented that section in the Assembly in 1838. In 1840 he went to Newark, N. J., and became interested in the construction of railways. He removed to Brooklyn in 1845 and was elected an alderman of that city in 1848. In 1854 he was elected to Congress and remained in Washington until 1857, when he was appointed a member of the Metropolitan Police Commission of Brooklyn. During the Civil War he was President of the War Fund Committee and established "The Brooklyn Union," now "The Standard-Union." He was appointed President of the Park Commission in 1860 and held that office until 1882. In recognition of his services on this commission his statue was erected at the entrance to Prospect Park in 1891. Mr. Stranahan was also President of the Union Ferry Co. of Brooklyn in 1888, and was a director for 35 years. He was the oldest member of the Chamber of Commerce of New York city and was long a trustee and director of the New York and Brooklyn Bridge.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

CENTRAL RAILWAY CLUB.
Sept. 9. Secy., H. D. Vought, 114 5th Ave., New York city.
MONTANA SOCIETY OF ENGINEERS.
Sept. 10. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.
THE LOUISIANA ENGINEERING SOCIETY.
Sept. 12. "Evolution of Structural Design," F. T. Llewllyn. Secy., J. F. Coleman, 712 Union St., New Orleans, La.
ASSOCIATION OF EDISON ILLUMINATING COMPANIES.
Sept. 12-13. Annual meeting, Sault Ste. Marie, Mich. Secy., Wilson S. Howell, Newark, N. J.
NORTHWEST RAILWAY CLUB.
Sept. 13. Secy., T. A. Foque, Soo Line, Minneapolis, Minn.
CIVIL ENGINEERS' CLUB OF CLEVELAND.
Sept. 13. Secy., Wm. H. Searles, Case Library Bldg., Cleveland, O.
DENVER SOCIETY OF CIVIL ENGINEERS.
Sept. 13. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Colo.
THE RAILWAY SIGNALING CLUB.
Sept. 13. Secy., Earl M. Seitz, C. & N. W. Ry., Chicago, Ill.
ROADMASTERS' ASSOCIATION OF AMERICA.
Sept. 13. Annual meeting, Denver, Colo. Secy., J. B. Dickson, Sterling, Ill.
NEW YORK STATE STREET RAILWAY ASSOCIATION.
Sept. 13-14. Annual meeting, Manhattan Beach, Brooklyn, N. Y. Secy., H. A. Robinson, New York city.
MASTER CAR AND LOCOMOTIVE PAINTERS' ASSOCIATION.
Sept. 13-15. Annual meeting, St. Paul, Minn. Secy., Robert McKeon, Kent, O.
NEW ENGLAND WATER-WORKS ASSOCIATION.
Sept. 14-16. Annual meeting, Portsmouth, N. H. Secy., J. C. Whitney, Newton, Mass.
ENGINEERS' CLUB OF CINCINNATI.
Sept. 15. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.
BROOKLYN ENGINEERS' CLUB.
Sept. 15. Secy., A. J. Prevost, Jr., 191 Montague St., Brooklyn, N. Y.
NORTHWESTERN TRACK AND BRIDGE ASSOCIATION.
Sept. 16. D. W. Meeker, St. Paul, Minn.
ENGINEERS' CLUB OF PHILADELPHIA.
Sept. 17. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.
ENGINEERS' CLUB OF COLUMBUS.
Sept. 17. Secy., H. M. Gates, 12½ North High St., Columbus, O.
ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Sept. 19. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.
ENGINEERS' CLUB OF MINNEAPOLIS.
Sept. 19. Secy., H. E. Smith, 1620 S. E. 4th St., Minneapolis, Minn.
ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.
Sept. 20. Secy., R. A. Fessenden, 410 Penn Ave., Pittsburg, Pa.
BOSTON SOCIETY OF CIVIL ENGINEERS.
Sept. 21. Secy., S. E. Tinkham, City Hall, Boston, Mass.
WESTERN FOUNDRYMEN'S ASSOCIATION.
Sept. 21. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.
AMERICAN SOCIETY OF CIVIL ENGINEERS.
Sept. 28. Secy., R. W. Pope, 26 Cortlandt St., New York city.
ENGINEERS' CLUB OF ST. LOUIS.
Sept. 21. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.
CENTRAL STATES WATER-WORKS ASSOCIATION.
Sept. 27-29. Annual meeting, Springfield, O. Secy., John Fisher, 11 Riley St., Hamilton, O.
AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS.
Sept. 28. Secy., R. W. Pope, 26 Cortland St., New York city.
CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Oct. 3. Secy., C. L. Annan, City Engineers' Office, St. Paul, Minn.
ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Oct. 3. Secy., H. J. March, Library Bldg., Buffalo, N. Y.
CHICAGO ELECTRICAL ASSOCIATION.
Oct. 7. Secy., J. R. Cravath, 825 Monadnock Block, Chicago, Ill.
AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENT.
Oct. 12-16. Annual meeting, Washington, D. C. Secy., D. L. Fulton, Bureau of Highways and Sewers, Allegheny, Pa.
AMERICAN INSTITUTE OF MINING ENGINEERS.
Oct. 18. Annual meeting, Buffalo, N. Y. Secy., R. W. Raymond, P. O. Box 223, New York city.
AMERICAN ASSOCIATION OF RAILWAY SUPERINTENDENTS OF BRIDGES AND BUILDINGS.
Oct. 18-20. Annual meeting, Richmond, Va. Secy., S. F. Patterson, Boston & Maine R. R., Concord, N. H.
PENNSYLVANIA STREET RAILWAY ASSOCIATION.
Oct. 19-20. Annual meeting, Scranton, Pa. Secy., S. P. Light, Lebanon, Pa.

NEW ENGLAND RAILROAD CLUB.—This club will take its annual outing on Sept. 13. The program includes music and dinner at Crescent Park, Narragansett Bay, and arrangements have been made for a special train which will leave Boston at 9.05 a. m.

MASTER CAR & LOCOMOTIVE PAINTERS' ASSOCIATION.—The 29th annual meeting of this association will be held at St. Paul, Minn., Sept. 13-16. The following subjects will be reported upon by the various committees: "Quick Drying Colors for Passenger Cars and Locomotives;" "The Railway Paint Shop Stock Room;" "Classification of Painting Repairs on the Outside and Inside Body of Passenger Cars;" "Painters and Painting as Compared with and Related to Other Mechanical Departments of Railway Work;" "The Difficulties and Environments of the Master Car Painter;" "A Historical Sketch of Railway Equipment Painters and Their Work in the Early Days;" "Do Railway Companies Give Proper Consideration to the Painting of Freight Cars?" "The Advantages Derived from Having a Suitable Shop for Painting of Locomotives Instead of Doing the Work in Round Houses and Machine Shops;" "Are the Railway Companies Justified in Surfacing and Varnishing Passenger Equipment, Cars and Locomotives?" "What Progress, If Any, Has Been Made in the Past Year in Paint Spraying?"

There will also be discussions on the following questions: "Do you paint roofing tin on both sides?" "What is the best filler for hardwood?" "What is the best varnish remover?" "Is there any advantage in the use of the gilding wheel?" "Which is the best for general purposes, grain alcohol, wood alcohol or alkaline?"

NEW ENGLAND WATER-WORKS ASSOCIATION.—The 17th annual convention will be held at Portsmouth, N. H., Sept. 14 to 16. Headquarters will be at the Hotel Wentworth and an exhibit of water-works appliances will be made. Exhibitors should address Mr. Henry F. Jenks, Pawtucket, R. I., for information concerning this. The following is the list of papers:

"Method for Determination of Color and the Relations of the Color to the Character of the Water." Frederick S. Hollis, Biologist, Metropolitan Water Board, Boston, Mass.
"Some Things that Should be Done in Constructing a Distributing System of Water-Works." William R. Hill, C. E., Chief Engineer and Superintendent, Syracuse, N. Y.
An informal talk on "Recent Sanitary Development in Certain Water Supplies." William T. Sedgwick, professor of Biology, Mass. Institute of Technology.
"Stand Pipes for Street Watering." F. F. Forbes, Supt., Brookline, Mass.
"Triple Expansion Pumping Engines." J. M. Betton, M. E., Brooklyn, N. Y.
"The Occurrence of Cristatella in the Storage Reservoir at Henderson, N. C." Robert S. Weston, C. E., Brockton, Mass.
"Description of the Monson, Mass., Water-Works." Frank L. Fuller, C.E., Boston, Mass.
"Man's Imitation of Nature in Purification of Water." Dr. Gardner T. Swarts, Secretary Rhode Island State Board of Health, Providence, R. I.
"Result of Tube Well Experiments in Lowell, Mass." George Bowers, C. E., City Engineer, Lowell, Mass.
"Surface Water Supplies." John C. Haskell, C. E., Supt., Lynn, Mass.
"Description of the Separate High Pressure Fire Service System of Providence, R. I." Edmund B. Weston, C. E., Consulting Engineer, Providence, R. I.

J. C. Whitney, Secy., Newton, Mass.

NATIONAL IRRIGATION CONGRESS.—The resolutions adopted at the annual convention held at Cheyenne, Wyo., Sept. 1, 2 and 3 favor an appropriation of not less than $100,000 for hydrographic surveys, for the measurement of streams and the survey of reservoir sites; strongly commend the care of forests begun by the Secretary of the Interior, and urge the formation of a Forestry Bureau and an appropriation by Congress sufficient for its support and management; urge upon the states legislation to prevent forest fires; favor the suggestion of Professor

Sargent, of Harvard University, that instruction in forestry be given at West Point, to prepare army officers for an intelligent understanding of forestry administration; commend the action of Cornell University in starting a school of forestry; favor the creation in the Department of Agriculture of a bureau of irrigation and a liberal appropriation for its support; express cordial appreciation of the value of irrigation investigations already made by agricultural experiment stations, and recommend that they give increased attention to the arid states; request Congress to make sufficient appropriations to construct the reservoir surveyed at Butte, Ariz., and to construct a water-shed reserve near Butte, Mont.; provide that a committee of five be appointed to present a bill to this Congress regulating and establishing uniform methods for appropriation and control of the waters of interstate streams; reaffirm the resolutions of the Phoenix congress on reservoirs, of the Lincoln congress on the public ownership of water, and of the Phoenix congress on the cession of public lands to the states under strict conditions insuring settlement, and indorse the Chittenden report favoring the construction of reservoirs and the recommendation of Elwood Mead favoring the leasing of the grazing lands.

WESTERN SOCIETY OF ENGINEERS.—The first fall meeting of this Society was held Sept. 7, at Chicago, Ill., and the following papers were presented: The "Equilibristat" (for railroad track inspection), D. J. Whittemore; "Mechanics of Suction and Suction Pipes," D. W. Mead; "Cableway Construction," Robt. D. Seymour; "Concrete Facing on a Sandstone Bluff at St. Paul," Onward Bates. The advance program for the year ending February, 1899, is given as follows: Sept. 21, "The Soudan and Recent British Campaigns There," H. G. Prout; Sept. 28, "The Foundations for the U. S. Government Post Office and Custom House Building at Chicago," William Sooy Smith; Oct. 5, "Track Elevation of the Chicago & Northwestern Ry.," Louis H. Evans. In discussion of this paper notes will be presented on the track elevation of Ill. Central Ry., H. W. Parkhurst; C., M. & St. P. Ry., Messrs. Wade, Rogers and Reichmann; C., B. & Q. R. R., G. H. Bremner; L. S. & M. S. Ry. and C. R. I. & P. Ry., L. H. Clarke; P., F. W. & C. Ry., W. H. Coverdale; P., C. C. & St. L. Ry., Thos. H. Johnson; 16th St. Crossing, G. W. Vaughn; (Title to be announced later), Robert B. Owens; Oct. 19, "Masonry" (illustrated), George S. Morison; Nov. 2, "Construction of Retaining Walls for the Sanitary District of Chicago," James W. Beardsley; "Berthier Method of Coal Calorimetry," Charles V. Kerr; "Brakes for Electrical Cars," William G. Price; Nov. 16, "The Manchester Ship Canal" (illustrated), Elmer L. Corthell; "Tables of Excessive Precipitations of Rain at Chicago," Edwin Duryea, Jr.; Dec. 7, "Electrolytic Corrosion of Underground Metallic Structures," Prof. D. C. Jackson; "Mechanical Plants of Large Buildings" (Part II.), Dankmar Adler; Dec. 21, "Foundations for Railroad Bridge Across the St. Lawrence River at Cornwall, Ont.," George E. Thomas; "Drawbridges on Chicago & Northwestern Ry.," William H. Finley; "Notes on Engineering Work," John S. Prell; Jan. 3, Annual Meeting; Jan. 18, "Establishment of Street Grades," Charles P. Chase; Feb. 8, "Measurement of the Discharge of the Niagara River," Clinton B. Stewart; "The Effect of Speed and Radii of Curves on the Inclination of Bicycle Tracks," John C. Quade.

NEW PUBLICATIONS.

LITERARY MAGAZINES.—In "Harper's" for September, Mr. W. C. Ford discusses the new revenue policy of the United States and points out the reasons why the stamp and other taxes which have recently been adopted are likely to be a permanent feature of our fiscal system. He emphasizes especially the fact that a protective tariff (as distinguished from a tariff for revenue) can no longer be expected to yield large returns to the treasury. "Days in the Arctic" is the title of an entertaining and well illustrated paper by Mr. F. G. Jackson, describing his experiences in Franz Josef Land. Hon. James Bryce discusses the policy which the United States had best pursue toward the former Spanish possessions, and considers the question from a broad standpoint. If we regard purely our material interests, he thinks that we will take none of these over-sea possessions as colonies; but he recognizes the feelings of national pride that will prompt an opposite course.

The September "Century" has two articles on the same topic, one by Carl Schurz, in which the dangers that beset us in acquiring these new territories are set forth, and the other by Hon. Whitelaw Reid, entitled "The Territory with Which We Are Threatened." Mr. Reid recognizes the arguments of those who foresee trouble from a policy of "colonial expansion;" but he shows that it is rather a matter of what we are obliged to do to fulfil our international obligations than what we want to do as a matter of self-interest. Emile Ollivier, the eminent French statesman, writes on "America, Spain and France," and emphatically declares that America has fought a just war and that to be relieved of her colonies will really be a blessing to Spain. "The Malay Pirates of the Philippines" are described by Prof. Worcester of the University of Michigan, and we commend the article to any of our readers who think that the task of governing the Philippines is likely to prove an easy one.

In "Scribner's" for September, Edgar R. Dawson, M. E., writes of the Jungfrau Railway, work on which is now in progress and which will be one of the highest railways in the world, reaching an altitude of 13,720 ft., if one counts as a part of the railway the 240 ft. elevated, which makes the last stage of the trip. The September "Cosmopolitan" has a paper on "Horseless Carriages in Paris," written from the popular point of view. Two other articles deserving mention here are "A Study of the Modern Battleship," and a description of the methods by which the great newspapers have given their readers the news of the war, at an expense for which their added returns do not begin to compensate. In the "Atlantic" for September, Mr. Worthington C. Ford writes on "New Opportunities for American Commerce." He thinks that there is little prospect of our building up any large market for American goods in China or the Philippines; but believes that Cuba and Porto Rico will prove very valuable possessions. "Fifty Years of American Science" is the title of a paper which was inserted at this time, we presume, because of the current semi-centennial meeting of the American Association for the Advancement of Science in Boston.

"Appleton's Popular Science Monthly" for September opens with a paper entitled "Geological Waterways Across Central America," in which various depressions are described which were once the beds of straits connecting the Atlantic and Pacific oceans. Some of these, we believe, are known to few engineers, and the article should have interest for all students of the Isthmian canal problem. The same magazine contains the fullest account we have seen in any American periodical of the purchase of the Swiss railways by the Government, which was ordered by an overwhelming popular vote on Feb. 20 last. The experiment Switzerland is making is one of great interest and its results will be attentively watched. It may be said that all the railways will not probably come into possession of the state for a half-dozen years yet, one after the other being taken, according to the dates fixed in their original charters.

The "North American Review" is devoted chiefly to current political problems, those in connection with the East and West Indies receiving, of course, greatest prominence. We may note that Hon. John B. Barrett, late U. S. Minister to Siam, urges that the Philippines will be a highly valuable acquisition for this country, and his article was written, curiously enough, before the declaration of war last spring.

The "Review of Reviews" has its usual critical discussion of current events, and we note especially an article on the cost and finances of the war, in which it is computed from official figures that the total cost of our war with Spain, including the garrisoning of our new possessions till Jan. 1 next, will reach $250,000,000. The pension bill is not included in this; and from the condition of many of the returning troops, it looks as if the typhoid-inoculated water, which the soldiers had to drink would in the end prove more costly than smokeless powder.

In the August "Fortnightly Review" we notice two articles worth mention here. One is "The Dynastic Crisis in Spain," by a Spaniard, explaining some of the reasons why the present occupant of the Spanish throne has felt great insecurity during the past few months, and the other is an article on the prevention of consumption.

LOSSES FROM CANALS FROM FILTRATION AND SEEPAGE.—Bulletin No. 48, Colorado Agricultural Experiment Station, Fort Collins, Colo. By L. G. Carpenter, Meteorologist and Irrigation Engineer. Paper; 6 × 9 ins.; pp. 36; tables and one illustration. Address, Director Experimental Station.

The conclusions drawn by the professor on this subject are given elsewhere in this issue. They are founded principally on actual measurements, made mostly in Colorado.

VEREIN DEUTSCHER INGENIEURE.—Membership list for 1898. Published by Geschäftsfühbrung und Redaktion der Vereinsschriften, Berlin, N. W. Charlotten Str., 43. Pamph.; 5¼ × 7½ ins.; pp. 285.

This is a list of members of the Society of German Engineers, giving their addresses. The names are arranged according to districts, but a complete alphabetical list of names is given with cross references to the district lists. The total membership of the Society is nearly 3,000.

REPORT ON THE WATER-WORKS SYSTEM OF MEMPHIS, TENN.—By John Lundie, Consulting Engineer, Chicago. Paper; 5¾ × 8½ ins.; pp. 46; illustrated.

In February, 1898, Mr. Lundie was directed to examine and report upon the water-works system, and to present an estimate of the cost of a similar plant. The report outlines the history of the water supply, and describes the present works, in which a 5-ft. tunnel ¾ mile long and 80 ft. below the surface, forms an underground reservoir fed by 60 artesian wells. The water is pumped by three Worthington vertical engines of 10,000,000 gallons capacity, taking water from a 10-ft. pump well to the tunnel. The supply is reported to be inexhaustible, and the cost of duplication of the plant, including land, is estimated at $1,283,938. To the report is appended the text of the present contract between the city and the Artesian Water Co.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

GAS AND GASOLINE ENGINES AND HOISTS.—The Weber Gas & Gasoline Engine Co., Kansas City., Mo. Pamph.; 9¼ × 6 ins.; pp. 64.

This is an illustrated description of the Weber gas engines and several special applications, such as agricultural engines for farmers, irrigators and dairymen. Illustrations and brief descriptions of hoisting engines are also given and a number of letters from users of Weber machinery are included.

ODORLESS SEWAGE DISPOSAL FOR TOWN AND COUNTRY HOUSES.—Edson Manufacturing Co., 132 Commercial St., Boston, Mass. Paper; 6½ × 3 ins.; pp. 20; illustrated.

This pamphlet describes a pump and fittings for lifting the contents of cesspools to tank wagons.

SPECIAL RIVETED PIPE.—Abendroth & Root Mfg. Co., 28 Cliff St., New York city. Paper; 8 × 7 ins.; pp. 32.

This catalogue describes the well-known spiral riveted pipe which is a specialty of this firm, and illustrates its use in many different fields. Special forms of joints, elbows, tees, etc., are also shown.

SNOW PLOWS FOR STREET RAILWAYS.—J. G. Brill Co., Philadelphia, Pa. Pamph.; 9 × 6 ins.; pp. 16; illustrated.

This pamphlet illustrates and describes briefly the standard snow plows, snow sweepers, and track scrapers manufactured by the above named company for street railway use.

STEAM PUMPS.—Dean Bros. Steam Pump Works, Indianapolis, Ind. Pamph.; 3½ × 6 ins.; pp. 16; illustrated.

This pamphlet illustrates and describes briefly a number of the standard boiler feed and pressure pumps manufactured by the above firm. A diagram and list of parts is also given for those who wish to order parts for repairing pumps of this firm's manufacture.

RECENT BALDWIN LOCOMOTIVES.—Bethlehem Locomotive Works, Philadelphia, Pa. Pamph.; 9 × 6 ins.; pp. 32; illustrated.

This is No.7 of the series of monthly descriptive pamphlets published by the above firm and it contains illustrations of a number of locomotives recently built to American and foreign orders, the latter mostly from Brazil and Mexico.

PUMPS AND GOVERNORS.—Gardner Governor Co., Quincy, Ill. Paper; 7¾ × 5¼ ins.; pp. 52.

The specialties included in this catalogue are various forms of steam pumps, pump and engine governors, speed and pressure governors for air compressors, balanced lever valves, and globe valves for steam engines. Price lists and tables of dimensions are given, and there are some pages of "useful information."

RESISTANCE METAL.—Herman Boker & Co., New York City. Pamph; 3½ × 7 ins.

This pamphlet contains a series of tablets in which the weights, sizes and resistances of various kinds of nickel and special resistance wires are given. The same data is given for resistance tape made of the same alloys. These tapes have a maximum length of about 300 ft., a maximum width of ¾-in. and a least thickness of between .003 and .002.

THE "NORTHWESTERN LIMITED" TRAIN: Passenger Department, Chicago & Northwestern Ry., Chicago., Ill. Pamph.; 6½ × 6 ins.; pp. 24; illustrated.

This little pamphlet contains a number of handsome half-tone views showing the interior fittings and equipment of the luxurious special passenger train recently put in operation between Chicago and St. Paul by the Chicago & Northwestern Ry. A brief description accompanies each of the engravings.

THE GRAND ARMY OF CINCINNATI. — Issued by the passenger departments of the Chicago, Indianapolis & Louisville Ry. and the Cincinnati, Hamilton & Dayton Ry. Paper; 5 × 7 ins.; pp. 24.

This is a handsome pamphlet, containing views of and information regarding Cincinnati and its surroundings, and its historic relation to the Civil War, in connection with the coming "encampment" meeting of the Grand Army of the Republic. Incidentally the advantages afforded by the two railways for transportation facilities are put forward.

ONE QUARTER OF A MILLION HORSE-POWER.—Westinghouse Electric & Mfg. Co., Pittsburg, Pa. Pamph.; 9 × 6 ins.; pp. 24; illustrated.

This pamphlet is a collection of especially good half-tones of Westinghouse polyphase apparatus, with brief descriptions and a list of 185 plants in this and foreign countries using such machinery. In this list are given the number and capacity of generators, motors, rotary transformers, and the transmission voltage, all of which are valuable for reference. It is unfortunate that the method of driving and rated power of engine or water wheel are omitted.

CONSTRUCTION NEWS.

CONDENSED LIST OF CONTRACTS PENDING WITH DATE OF OPENING BIDS.

Bids to be opened.	Work.	Place.	See Eng. News
Sept. 8.	Plumbing, and heating,	Manitowoc, Wis.	Aug. 25

RAILWAYS.

CALIFORNIA.—J. A. Dubbs, Mgr. Mexican Sulphur Co., Pittsburg, Pa., informs us that nothing further has yet been done towards the construction of the proposed railway to the sulphur mines, about 70 miles south of Yuma, Ariz., other than the completion of two surveys, one 67 miles in length to Yuma, and the other to San Diego, Cal., on the Pacific coast, 168 miles.

CHICAGO, PEORIA & WESTERN.—This company was incorporated in Iowa, Aug. 19, with a capital stock of $50,000. It is proposed to construct and operate a railway from a point on the Mississippi River, near the glucose works, thence northwesterly through the counties of Scott, Cedar, Linn, Benton, Tama and Marshall to Marshalltown. The officers, who are all connected to the Davenport Glucose Co., are: Pres., Lee S. Harrison; Vice-Pres., Louis H. Brandt; Secy. and Treas., Carl J. Langfeldt, all of Davenport. Reference was made to this company in our issue of Aug. 4.

CLEARFIELD SOUTHERN.—P. E. McGovern writes us from Clearfield, Pa., that he has been awarded the contract for the construction of this proposed railway from Belsena Mills, Pa., to Clearfield Bridge, a distance of about 16 miles, as reported in our last issue. The new line will penetrate large timber and coal districts. Construction work has already commenced, and the work will be pushed forward rapidly. Pres., A. W. Lee, Clearfield; Ch. Engr., Samuel Bruger, Fleming, Pa.

ELDON & ST. LOUIS.—The citizens of Shelbyville, Ill., expect to raise $7,500 towards the construction of this railway and also to grant the right of way, station grounds and switchyards in Black Creek township. The company contemplates building from Milton, Ia., to Mexico, Mo., a distance of 272 miles. C. J. Du Bois, Ch. Engr., Macon, Mo., has previously informed us that no contracts will be let until all of the right of way is obtained. Pres., S. H. Sawyer, Eldon, Ia.

EL PASO & NORTHEASTERN.—It is announced that George S. Good & Co., Lock Haven, Pa., has about completed the grading on the main line from Alafogorda Junction to Toboggan Gulch. Track-laying, under the direct supervision of the company, is now in progress near La Luz, N. Mex. Pres., C. D. Simpson, Scranton, Pa.

HAMPTON & BRANCHVILLE.—Reports state that this line will probably be extended from Mauldinton to Georges, S. C., on the South Carolina & Georgia R. R., a distance of 17 miles. The company now operates about 23 miles of railway. W. H. Mauldin, Pres. and Treas., Hampton, S. C.

LOWELL & HASTINGS.—Reports state that the Lowell & Hastings R. R. will be extended north from Lowell to Belding and south from Freeport to Hastings, Mich., by a Boston syndicate; also that operations will begin soon and the road completed in three months from that time. M. L. Sweet, Gen. Mgr., Grand Rapids, Mich.

MEXICO & SAN RAFAEL.—Reports state that surveys have been commenced for a line of railway from Chalco to Rio Frio, to form part of the line projected under the charter of the Xico & San Rafael Ry. Co. Robert Gayol, Ch. Engr.

MICHIGAN.—Balch & Peppard, of Minneapolis, Minn., are stated to have been awarded the contract for the construction of a railway to connect the Franklin, Jr., and Arcadian mines with the mill sites at Grosse Point. The proposed line, including terminals and sidings, will contain about 12 miles of track. The road will be of standard gage, and is expected to be completed and ready for use by next spring.

MINNEAPOLIS & ANOKA SUBURBAN.—Reports from Minneapolis, Minn., state that trains are expected to be running to Anoka, a distance of 20 miles, over this new line, by Oct. 1. Mr. Fisher, of St. Paul, is the contractor, and the grading is being done by Page Bros. and F. H. Eddy, of Anoka, Minn. The entire system, as contemplated, will be built by two companies, and will have a total length of 185 miles, from Minneapolis to Rainy Lake. From Camden Place to Champlin it will run on along the river, and there will cross to Anoka over a new bridge. From that point it will be known as the Minneapolis, Anoka & Rainy Lake Ry., and will run 70 miles to Mille Lacs, and thence 100 miles farther to Rainy Lake.

MOBILE & BAY SHORE.—This company has been incorporated in Alabama to build a railway from Mertz station, on the Duncan branch, down to or near Portersville and Alabama Port, a distance of about 27 miles. All the rights of way for the new line have been secured. The incorporators are: W. Butler Duncan and Adrian Iselin, Jr., of New York; A. J. Russell, of Meridian, Miss.; J. C. Clarke, J. H. Mason, C. S. Clarke and E. L. Russell, of Mobile, O.

OREGON R. R. & NAVIGATION.—W. H. Kennedy, Ch. Engr., Portland, Ore., informs us that a contract was let to Hale & Smith, of Portland, July 15, for rectifying the alinement for a distance of three miles between Cascade Locks and Viento. Estimated cost of improvements, about $60,000. Pres., A. L. Mohler, Portland.

PETERSBURG.—Bids are asked by this company, a part of the Atlantic Coast Line, Until Sept. 16, for the graduation of a line about ten miles in length, beginning about two miles south of Petersburg, Va., and running southeasterly in proximity to the existing railway, as stated in our advertising columns. E. T. D. Myers, Ch. Engr., Richmond, Va.

PHILADELPHIA & READING.—It is announced that preliminary plans have been prepared for the proposed elevation of this company's tracks along 9th St., from Wallace to Huntindon St., in order to avoid all grade crossings without materially disturbing the grade of any street; estimated cost, $2,200,000. Geo. S. Webster, Ch. of Bureau of Surveys.

PORTLAND, VANCOUVER & YAKIMA.—Press reports state that this line will soon be extended from its present terminus at Brush Prairie towards the Yacolt Prairie, for a distance of 15 miles. The company was incorporated in Washington last December to operate the old Vancouver, Klickitat & Yakima Ry., a 15-mile logging road, which it purchased with the intention of extending and improving the line. Pres., L. Gerlinger, Vancouver, B. C.; Vice-Pres., J. H. Hubbard, Portland, Ore.

SUGAR CREEK.—J. M. Clark, Ch. Engr., Kanawha Falls, W. Va., informs us that this company proposes to build a line from McDonald, W. Va., to coal property several miles distant. The right of way will probably be secured soon. Not all of the capital for construction has yet been obtained, and it is not definitely known when the contracts will be let. Pres., Col. J. M. Davis, Coffman, W. Va.

SOUTHERN.—Press reports from Birmingham, Ala., state that surveys have been completed for a branch line to the mines of the Ivy Coal & Coke Co., in Walker county, and that contracts would be let as soon as possible. The new line will leave the main road at a point 28 miles west of Birmingham, and run north along Horse Creek. The extension will be only for freight service.

UTAH.—J. H. McEwen, Agent for Jesse Knight, of Provo City, Utah, informs us that he is at present making a preliminary survey in Hobble Creek canyon only in order to establish a grade and to secure the right of way for a railway projected to connect Salt Lake and Denver.

UTAH & PACIFIC.—We are informed that this company proposes to construct 75 miles of railway from Milford, Utah, south to the Utah and Nevada state line on the old grade built by the Oregon Short Line R. R. Co. Bids were to be received for this work until Sept. 5. A chief engineer has not yet been appointed. Pres., A. W. M'Cune, Salt Lake City, Utah.

WASHINGTON COUNTY.—William Kenefick, Ellsworth, Me., informs us that his section of the work on this new railway, or that part extending from Ellsworth to East Machias, Me., a distance of about 60 miles, will be completed by Sept. 15. The other contractor at work on the line is R. F. Rivinac, Calais, Me. The completed line will extend from Calais to Ellsworth, 116 miles. G. M. Rushing, Ch. Engr., Machias, Me.

WESTMORELAND JUNCTION.—A. Frank, Pres., Irwin, Pa., informs us that the surveys have now been completed and most of the right of way promised for this proposed steam line from Irwin Junction to Guffeys, Pa., a distance of five miles. The capital has been arranged for, and contracts will be awarded as soon as the stock and bonds are placed. S. A. Taylor, Ch. Engr., Pittsburg, Pa.

WISCONSIN & MICHIGAN.—Press reports from Green Bay, Wis., state that T. J. McGrath has secured the contract for constructing eight miles of railway for this company from Fairthorn Junction to Vulcan, Wis.

WILKES-BARRE & NORTHERN.—Reports state that this company's property has been purchased by J. W. Hollenbeck, E. Troxell, John Graham, John A. Schmitt, George R. Bedford, Pierce Butler and Thomas S. Barber. The railway, extending from Luzerne to Harvey's Lake, Pa., a distance of 12 miles, will probably be improved at once. The new owners will meet for reorganization purposes on Sept. 10.

WYOMING & MISSOURI RIVER.—Work will be resumed, according to reports, on this proposed line between Belle Fourche, S. D., and Aladdin, Wyo., a distance of about 18 miles. Pres., George M. Nix, Dubuque, Ia.

STREET AND ELECTRIC RAILWAYS.

PORTSMOUTH, N. H.—George W. Killoren, of Wakefield, Mass., who has the contract for making the road bed and laying the rails for the proposed electric railway in this city, commenced work on New Vaughan St., Sept. 1. It is also said that Joseph Herbert, North Hampton, Mass., is preparing to commence work on the power house.

WAITSFIELD, VT.—This town has guaranteed $50,000 towards the construction of the proposed electric railway of the Mad River Valley Electric R. R. Co., noted in our issue of Aug. 25. The proposed line will run from Montpelier to Warren, via Middlesex, Moretown and Waitsfield, a distance of about 26 miles. Pres., F. C. Kennedy, Burlington, Vt.; Ch. Engr., V. K. Nash, Woonsocket, R. I.

FITCHBURG, MASS.—The Fitchburg & Ashby Ry. Co., which was incorporated by this year's legislature, has petitioned this city for a franchise to construct a street railway. The petitioners are, Francis W. Wright, Wm. O. Loveland, E. A. Hubbard, Albert M. Wilder, Harry F. Bingham and Alonzo A. Carr.

GRAFTON, MASS.—Reports state that work was begun Sept. 1 on the proposed electric line from Grafton to Worcester, via North Grafton and Millbury Junction, a distance of about seven miles. Operation is expected to commence on Nov. 1.

MEDFORD, MASS.—The aldermen of this town have granted the Boston Elevated R. R. Co. permission to build double track lines on Main and Salem Sts.

NEEDHAM, MASS.—The Needham & Boston St. Ry. Co. is being formed in Needham, according to reports, for the construction of a street railway between Needham and Spring St. in West Roxbury. The capital stock is $10,000, and the temporary directors are, C. Atherton Hicks, Frederick G. Tuttle, Edward F. Howe, Victor M. Berthold, Francis de M. Dunn, William W. Carter, of Needham; Edwin L. Booth, of Boston.

WORCESTER, MASS.—W. H. Tylee, of Worcester, who holds the contract for building and equipping the Worcester & Clinton St. Ry., informs us that the new line is completed except that part where the state is constructing a new highway. Operations could have commenced on Aug. 1 had this road been built. The route is from Worcester to Clinton, via Boylston, a distance of 12 miles. Pres., A. S. Paton, Leominster, Mass.; Ch. Engr., O. W. Rugg, Worcester.

BROOKLYN, N. Y.—It is reported that a plan has been agreed upon whereby the railway companies running cars over the New York and Brooklyn Bridge will, with the assent of the bridge commissioners, build two additional loops on the Brooklyn approach to the Bridge, at an estimated cost of $10,000. C. C. Martin, Ch. Engr. of the Bridge.

BUFFALO, N. Y.—The Buffalo, Tonawanda & Niagara Falls Electric R. R. Co. was incorporated Aug. 26 with a capital stock of $1,250,000, being a reorganization of the Tonawanda St. R. R. Co. It is said that the line running to Tonawanda from Niagara and Tonawanda Sts., Buffalo, which is known as the Smith Road, will be part of the new line; and that to finish the projected railway, 40 miles of new track must be laid. The new company has a franchise to operate between Tonawanda and Niagara Falls, and an application has been made in Niagara Falls for a franchise to build through that city. The directors are: Henry B. Smith, Bay City, Mich.; H. M. Gillett, Bay City, Mich.; Timothy E. Ellsworth, Lockport, N. Y.; James A. Roberts, George Sandrock and Clarence M. Howard, of Buffalo; James Low, Niagara Falls; John A. Read and Benjamin L. Rand of North Tonawanda.

NEW PALTZ, N. Y.—Jas. G. Graham, Receiver of New Paltz & Wallkill Valley R. R. Co., Newburgh, N. Y., informs us that nothing, except necessary repairs, will be done by him towards the extension and improvement of this line. As stated in our last issue, Mr. Graham has been appointed temporary receiver of this company, incorporated Jan. 16, 1897, and operating an electric railway from the West Shore R. R. at Highland, N. Y., to New Paltz.

BLOOMFIELD, N. J.—It is reported that the township committee has given permission to the Orange & Passaic Valley Ry. Co. to rebuild its line through Bloomfield and to narrow the gage. Work is expected to begin at once.

BRIDGETON, N. J.—The Fairfield township committee passed an ordinance Aug. 31, granting the South Jersey Traction Co. a franchise to build through the township.

CRAFTON, PA.—The Crafton & Chartiers Valley Traction Co. was incorporated in Pennsylvania Sept. 6 with a capital stock of $6,000, to construct one mile of electric street railway. The incorporators are, Frank Thornburg, Pres., Clifton, Ia.; William J. Scully, Edgewood, Pa.; David C. Thornburg, Pittsburg, Pa.; Florence C. Biggert, Idlewood, Pa.; Jas. E. Duncan, Washington, Pa.

WASHINGTON, D. C.—The district commissioners have granted the Capital Ry. Co. an extension of 60 days in order to further test its underground system. This system, known as the Brown, Westinghouse, or electro-magnetic, is laid from the Navy Yard to the Navy Yard bridge, a distance of about one-half mile, and has been down for several months. Pres., A. E. Randle.——The directors of the Washington & University R. R. Co. have elected the following officers: Pres., F. C. Kennedy, of Burlington, Vt.; Vice-Pres., J. D. Croissant; Secy., D. D. Stone.——A deed has been recorded transferring the entire property, including franchises, of the Washington & Maryland Ry. Co. to the City & Suburban Ry. Co., formerly the Eckington & Soldiers' Home Ry. Co. Pres., J. T. Crosby, of the City & Suburban Co.

NORFOLK, VA.—It is reported that the Port Norfolk Electric Ry. has decided to build a 25-mile extension of its line from Norfolk to Smithfield, Va. Work is to begin as soon as possible. M. W. Mason, Gen. Mgr. and Purchasing Agt.

NATCHEZ, MISS.—Abraham Moses, Secy. and Treas. Natchez Light, Power & Transit Co., Natchez, informs us that this company will not construct the proposed six miles of electric railway until after next March, at which time the light plant is expected to be started. A perpetual and exclusive state and city franchise has been obtained, as well as the right of way in the city of Natchez and the whole county of Adams. Pres., Maurice Moses, Natchez; Ch. Engr., Erle S. Roos, 484 42d Place, Chicago, Ill.

CINCINNATI, O.—It is reported that the Mill Creek Valley St. R. R. Co. has certified an increase of its capital stock from $500,000 to $1,750,000. Pres., L. C. Weir; Secy., O. B. Brown.

CONNEAUT, O.—The council has granted the Pennsylvania & Ohio Ry. Co. a franchise to build a street car line through this city. The new line will be part of a system to connect Conneaut, Ashtabula, Geneva, Painesville and Cleveland.

SAGINAW, MICH.—Jas. B. Peter, Pres., Saginaw, informs us that the surveys for the proposed Saginaw & Frankenmuth Ry. and the preliminary work of obtaining the right of way are now in progress. The capital for construction will be provided when needed, and it is expected to award the contracts in the early part of next year. The route as projected is from Saginaw to Frankenmuth, via Bridgeport, a distance of 14 miles, and the motive power will be electricity. The chief engineer has not yet been appointed.

MILWAUKEE, WIS.—Reports state that an agreement has been made between the city and the Milwaukee Electric Ry. & Light Co. whereby the latter is to raise its tracks on Island Ave. and the city is to grade and macadamize between the tracks. Manager Beggs will supervise the improvement.

SEDALIA, MO.—The Sedalia Electric Ry. and the Sedalia & Brown Springs Electric Ry., including 15 miles of track, with their lighting plant, was sold to Stewart & Co., of New York, Aug. 26, at $400,000. It is said that the new company will be known as the Sedalia Electric Co., with officers as follows: Pres., S. H. G. Stewart, New York; Vice-Pres., John D. Crawford, Sedalia; Secy. and Treas., Carlton H. Reeve, New York.

COLORADO SPRINGS, COLO.—It is again reported that the owners of the famous cog road running up Pike's Peak have decided to change the motive power from steam to electricity. It is estimated that the cost of making the change will be about $50,000.

HULL, ENGLAND.—Bids are asked until Sept. 30 for the supply of 45 electric motor cars, 20 trail cars, two sprinkler cars, two traversing platforms, for the corporation. A. E. White, Cy. Engr., Town Hall., Hull. Thos. G. Milner, Cy. Treas.

ELECTRIC LIGHT AND POWER.

CHESTER, MASS.—E. LeRoy Gardner writes us that it has not been decided definitely to construct a plant, but it is very likely to be built. The apparatus will be contracted for separately, and the plant will be installed under the supervision of an engineer, yet to be selected. Estimated cost, $3,500. The plant will be operated by water power, and will have capacity to furnish 500 16-c. p. lights.

CAZENOVIA, N. Y.—Mr. O'Connell, Cortland, N. Y., is reported to have applied for a franchise.

GENEVA, N. Y.—L. L. Moses, of Clyde, N. Y., and Frank G. Brown, Jr., of Syracuse, N. Y., have applied for a 50-year franchise, and a contract for furnishing this town with 100 2,000-c. p. arc lights.

PORT CHESTER, N. Y.—The Port Chester Electric Lighting Co. has been granted a 99-year franchise. The company has submitted a proposition to light the city with arc and incandescent lights at $95 and $20 a year. Wm. L. Ward, of the company, may be addressed.

BENNETT, PA.—An election will be held Nov. 8 to vote on the question of issuing $25,000 in bonds for additional machinery for the plant and water-works.

DUNCANNON, PA.—Bids are asked until Sept. 17 for constructing a plant. Engr., Robt. R. Jones, Harrisburg, Pa.; Clk., A. C. Lackey.

WRIGHTSVILLE, PA.—Bids are asked by the Martic Water & Power Co. until Sept. 22 for furnishing the materials and for constructing the proposed power plant, and until Oct. 10 for furnishing 24 turbine water wheels, etc., as stated in our advertising columns. Ch. Engr., Jas. H. Harlow, Wrightsville.

HAGERSTOWN, MD.—Press reports state that the council is arranging for the construction of the proposed municipal plant to cost about $60,000. The lighting contract with the Hagerstown St. Ry. Co. expires in about two years.

WINCHESTER, VA.—Bids are asked until about Sept. 15 for furnishing the materials and for building a plant in connection with the water-works, according to reports. Chn. Com., Henry Schneider.

ATLANTA, GA.—The question of the municipal ownership of the electric plant is being considered. Judge Geo. Hillyer may be addressed.

FORSYTH, GA.—The question of building a plant is being considered, according to reports. John H. Andrews, Chn.

NEW IBERIA, LA.—Press reports state that this place will probably vote on the question of issuing $80,000 in bonds for a plant and water-works. Secy., A. J. Cammack.

NATCHEZ, MISS.—Arrangements are being made for buying machinery for the plant for A. & M. Moses, recently awarded a 10-year contract.

WINONA, MISS.—It is stated that the Blackston Mercantile Co. wants bids for furnishing and installing a plant to cost about $8,000.

LYNCHBURG, TENN.—It is stated that this place is to be supplied with electric lights.

SOMERVILLE, TENN.—This place voted Aug. 29 to issue $10,000 in bonds for a plant and water-works.

COVINGTON, KY.—Bids are asked until Sept. 6 for lighting that portion of the city now lighted by gasoline. Clk., Theo. von Hoene.

FOSTORIA, O.—Press reports state that Samuel R. Bullock, of Philadelphia, has purchased the plants of the Fostoria Light & Power Co. and the Northwestern Ohio Natural Gas Co. He proposes to erect a plant in the southern part of the city for the manufacture of fuel and illuminating gas and electric light, removing the plants already purchased to that location on completion of the new plant, which will be about Nov. 1.

McARTHUR, O.—Paris Horton, Pres. Trustees, writes us that the following submitted bids Aug. 25 for furnishing and installing a plant: Ambos Construction & Electric Co., Cleveland, O., awarded the entire construction at $4,677, except for power-house which went to local parties; J. A. Erner & Co., Columbus; Westinghouse Electric & Mfg. Co., Pittsburg; Crocker-Wheeler Electric Co., Chicago; The Triumph Electric Co., Cincinnati; Craighead Co., Dayton, O.; General Electric Co., Schenectady, N. Y.; Fort Wayne Electric Corporation, Fort Wayne, Ind. The plant is to be completed by Oct. 15.

MINERAL POINT, O.—We are informed that the following bids were received Aug. 22 for furnishing and constructing a plant, as advertised in Engineering News: Generator, switchboards, etc.—Westinghouse Electric & Mfg. Co., Pittsburg, Pa., $1,025; Fort Wayne Electric Corporation, Fort Wayne, Ind., $1,155. Poles, wiring, lamps, etc.—Goughmour Electric Co., Canton O., $1,475; Fort Wayne Electric Corporation, $1,625. Engine—Russell & Co., Massillon, O., $577 and $508. Boiler—Russell & Co., $815 and $775. Plant complete—Ambos Construction Co., Cleveland, O., $4,172 (accepted); King & Wentz, Canal Dover, O., $4,998. Complete machinery, without building—Ambos Construction Co., $3,854 and $3,745. Building—C. S. Rodgers, Mineral Point, $919. Building and brick smokestack—Irvinweiler & Winger, Mineral Point, $490.

XENIA, O.—The council has awarded a contract for lighting the city to the Xenia Electric Light Co.

WILLIAMSPORT, IND.—It is reported that the council has let a contract to a Chicago company for furnishing and installing a plant and water-works to cost about $37,000.

CARO, MICH.—J. H. Harris, Mgr. J. H. Harris & Co., writes us that a new plant will be built here within a year or two. Both water and steam will be used. The plant will have a capacity for 40 2,000-c. p. arc and 2,000 16-c. p. incandescent lights.

MOLINE, ILL.—Press reports state that Major Blunt, commandant of the arsenal, has awarded the contract for a 2½-miles extension of the old wing dam, to the Moline Water Power Co., at $40,000. The improvement, for which a special appropriation was made by Congress before adjournment, is expected to give 3½ ft. more head at the government water power bulkhead, and will incidentally give Moline a harbor. The work will be completed this fall.

QUINCY, ILL.—Press reports state as follows: W. B. McKinley, of Chicago, representing an eastern syndicate composed of J. M. Haynes, Geo. E. Macomber and Dr. Hill, of Vickery, Hill & Co., Augusta, Me., and Senator Wallace, Rochester, N. H., on Aug. 27 purchased the Thomson-Houston electric light plant and the gas plant owned by the same company. The purchase price was $460,000 for both. The new owners will spend $100,000 in repairs. This is the same syndicate which recently purchased the street railway here. A Chicago syndicate has offered $72,000 for the Empire electric light plant, and will probably get it.

BOSCOBEL, WIS.—The city clerk writes us that no steps have yet been taken in regard to putting in a plant and water-works. The question so far has only been under discussion.

LITTLE FALLS, MINN.—The question of building a plant and water-works is being considered, according to reports. Mayor Vasaly may be addressed.

DICKINSON, N. DAK.—The council is reported as arranging for the construction of a plant and water-works.

HELENA, MONT.—C. W. Whitley, Mgr. Helena Water & Electric Power Co., writes us the present work is completing the water power plant, increasing same to 10,000 HP. from 3,200 HP. This work will probably be completed in December. Bids for the additional water-wheels and electric generators will be considered soon. Supt., M. H. Gerry, Jr.

HAMBURG, ARK.—The question of building a plant and water-works is being considered by the Arkansas Improvement Co., according to reports.

LAKE CITY, COLO.—A. E. Reynolds, Denver, Colo., is reported to have located a reservoir site at Lake San Cristobal for the proposed power plant. The transmission station will be built at Agenta Falls, about one-third of a mile below the dam. The plant will be used mainly for furnishing power to mines, factories, etc.

SANTA ANA, CAL.—A. G. Croswell, Elec. Engr., San Francisco, Cal., is reported as interested in a company being organized to build a plant in this town; estimated cost, $8,000 to $15,000. The machinery is to consist of a compound condensing engine of 125-H.P., three 40-HP. boilers, one 60-arc-light dynamo, one 500-incandescent-light dynamo, and two 400-light dynamos for a three-wire Edison system.

COBOURG, ONT.—Bids are asked until Oct. 31 for street lighting and water supply, as stated in our advertising columns. Town Clk., D. H. Minaker.

LONDON, ONT.—It is stated that the plant of the London General Electric Co. was destroyed Aug. 30.

NEW COMPANIES.—Standard Electric Co., Parsons, Pa.; $40,000, with $4,000 paid in; Treas., A. H. Squire, Tunkhannock, Pa.; J. H. Kenney, Parsons.

Jefferson Electric Light Co., Chicago, Ill.; $50,000; M. A. Fort, Harry Ferguson, William M. Copeland.

Worthington Light & Water Co.; $4,500; Worthington, Ind.; H. C. Knight, W. C. Knight, C. S. Knight, Thomas Duncan, M. S. Polhamus.

Southern Electric Co., Charlotte, N. C.; $10,000; Pres., S. B. Alexander, Jr.

City Heat & Light Co., Fostoria, O.; $250,000; George A. Snyder.

Georgia Lighting & Heating Co., Atlanta, Ga.; $100,000; to build and lease lighting plants and to furnish light; R. H. Wilhoyte, R. J. Thurmond, Jr., of Alabama; J. F. Burke, Atlanta; W. T. Glasgow, of Tennessee.

Mitchell Electric Co., Portland, Me.; $150,000, with $2,500 paid in; to manufacture and deal in electric car brakes, car controllers and other electric devices; Pres., Thos. H. McDonnell, of Quincy, Mass.; Treas., Wm. E. Pearson, Boston.

BRIDGES.

HERKIMER, N. Y.—The town board has awarded a contract to Patten & Munson, at $4,126, for the abutments for a bridge across West Canada Creek.

NEWPORT, N. Y.—Reports state that the town board is awarding contracts for the construction of 15 iron highway bridges to replace the stone arch bridges which have been recently destroyed.

WHITE SPRINGS, FLA.—Bids are asked by C. F. Cone, White Springs, for constructing a 125-ft. wooden or iron bridge, on tubular abutments, according to reports.

CLEVELAND, O.—The county commissioners have awarded a contract to the King Bridge Co., at $5,950, for constructing the South Park bridge, and the Variety Iron Works, at $6,450, for the Four Mile Lock bridge.

ELYRIA, O.—Bids are asked until Sept. 22 for the purchase of $175,000 of 4% bridge bonds. A. B. Hayes, County Comr.

ELROY, WIS.—W. G. Kirchoffer, Engr., Baraboo, Wis., informs us that bids will be asked about Sept. 8 for a substructure, to cost about $550, and until Sept. 20 for a superstructure of one span, 64 ft. long and 16 ft. wide, on masonry. Address L. E. Dixon, Elroy.

EAU CLAIRE, WIS.—S. S. Kepler, Mayor, writes us that a contract will be let about Oct. 1 for the abutments and piers for the proposed steel bridge. Plans have been completed. T. P. Cochrane, Clk.

BURLINGTON, IA.—The county commissioners are considering the question of replacing a number of bridges which have been destroyed at a loss of about $10,000.

BLUE EARTH CITY, MINN.—T. R. Coughlin, Mankato, Minn., has been awarded a contract, at $1,200, for a bridge over the Blue Earth River, according to reports.

ST. PAUL, MINN.—Press reports state that negotiations are being made with the railway companies for the repair of the bridges at Western Ave., Westminster St., Robert St., and University Ave.

NIOBRARA, NEB.—The Canton Bridge Co., Canton, O., has been awarded a contract at $6,000 for constructing 10 county bridges.

FLANDREAU, S. DAK.—Bids are asked until Oct. 3 for constructing an iron or steel bridge, 100 ft. long and 16 ft. wide. H. W. B. Souther, County Audr.

ST. JOSEPH, MO.—Bids are asked until Sept. 12 for certain bridge work. Theo. Steinacker, County Surveyor. ——Bids will soon be asked by the Chicago Great Western Ry. Co. for the construction of a steel viaduct at Grand Ave. H. Fernstrom, Ch. Engr., St. Paul, Minn.

PUEBLO, COLO.—The council has awarded a contract to the Pueblo Bridge Co., at $10,000, for constructing a bridge across the Mountain River at First St.

CHEHALIS, WASH.—Bids are asked until Oct. 10 for constructing a trestle, 1,500 ft. long, over the Chehalis River, on the Lincoln Road. Albert Schooley, County Auditor.

PORTLAND, ORE.—The Oregon R. R. & Navigation Co. will let contracts about Sept. 30 for the construction of 14 steel trestles, according to reports. A. L. Mohler, Pres. and Gen. Mgr., Portland.

SANTA BARBARA, CAL.—City Engineer Flournoy is preparing plans for a new bridge over Mission Creek, on West Ortega St.

SANTA CRUZ, CAL.—E. Mosher has been awarded a contract, at $4,000, for building a bridge over Salsipuedes Creek.

WILLOWDALE, ONT.—Bids are asked until Sept. 10 for constructing two stone abutments for a steel bridge over the west branch of the Humber River, according to reports. P. S. Gibson & Sons, Engrs.

BUILDINGS.

AMHERST, MASS.—Henry Mellen & Son, Worcester, Mass., was the lowest bidder for the erection of a veterinary laboratory and hospital stable for the Massachusetts Agricultural College at Amherst, at $17,985. H. C. Wood, of Westfield, was the next lowest bidder at $19,157.

BINGHAMTON, N. Y.—Bids are asked until Sept. 20 for the erection of a building to be used for a boiler house and laundry, and a building to be used for an isolation ward in connection with the city hospital, and for new heating apparatus. Burr W. Mosher, Cy. Clk.

BROOKLYN, N. Y.—It is reported that plans are being prepared for erecting two limestone dwelling houses at Carroll St. and Prospect Park West for Samuel Goldstein, of this city, to cost about $48,000. Arch., Montrose W. Morris, 45 Exchange Place, New York.

WINDSOR, N. S.—Bids are asked until Sept. 19 for a heating apparatus for the public building. E. E. Roy, Secy. Bd. of Pub. Wks., Ottawa, Ont.

LIVERPOOL, ENGLAND.—Designs are asked until Oct. 3, extension of time, for new buildings for the Royal Institution. Secy., Harold Waterhouse, 3 Cook St., Liverpool.

WATER-WORKS.

CONTOOCOOK. N. H.—G. A. Curtice, Secy. Water Bd., writes us that the contract for building works has been let to John Walker, New Market, N. H. The water supply will be secured from Bear Pond. The plans and specifications were prepared by Geo. P. Hadley, Goffstown, N. H.

ENFIELD, N. H.—Ira Copeland is reported as arranging for the construction of works.

HAMPTON, N. H.—Chas. M. Lamprey, Dir. and Clk. Hampton Water-Works Co., writes us that the directors will meet next month to decide upon plans for completing the works next spring. After the meeting surveys will be made.

BOSTON, MASS.—Bids are asked until Sept. 15 for laying 34,200 ft. of 12 and 16-in. water pipe, as stated in our advertising columns. Wm. N. Davenport, Secy. Metropolitan Water Bd., 3 Mount Vernon St., Boston.

HOLYOKE, MASS.—It is stated that the water commissioners are considering methods of water filtration with a view to putting in a plant this year. It is estimated that a plant of 1,500,000 gallons can be put in for $20,000.

NATICK, MASS.—Jas. McManus, Town Clk., writes us that a proposition to change the location of the pumping station was brought before the last annual town meeting. It would involve a new method of furnishing and a new source of supply to Lake Cochituate. The matter was deferred for the present in order that it may be further investigated. The question will probably be considered next year.

NORTHFIELD, MASS.—C. H. Webster, Secy. Northfield Water Co., writes us that the contract has not yet been let for furnishing and laying about 13,000 ft. of 4 and 6-in. water pipe for the extension to Minot Brook.

TURNER'S FALLS, MASS.—Willard E. Everett, of the committee, writes us that proposals have been sent out for building an extension to the works at a cost of about $13,000.

CROMWELL, CONN.—We are informed that the Cromwell Water Co., Waterbury, Conn., is in the market for the purchase of first-class pumps of 100,000 gallons capacity. F. W. Seibert, Jr., Waterbury, may be addressed.

ALBANY, N. Y.—Bids are asked until Sept. 30 for improving Bleecker reservoir, as stated in our advertising columns. Supt., Geo. I. Bailey.

BOLIVAR, N. Y.—The Bolivar Water Co. has been incorporated with a capital stock of $16,000 by S. F. Booth, J. B. Bradley and W. P. Cook, of Bolivar.

BUFFALO, N. Y.—B. I. Crooker, Buffalo, submitted the lowest bid Aug. 31 for repairing the water-works pumping station at $9,750.

JOHNSTOWN, N. Y.—W. W. Crouse, Clk., writes us that the city has voted to sell bonds to pay for the diversion of water land damages, etc. The bonds will be sold within a few weeks.

NIAGARA FALLS, N. Y.—Walter Jones, Cy. Engr., writes us that it is proposed to extend the 12-in water main to the city line, about 7,500 ft.; estimated cost, $10,000.

RHINEBECK, N. Y.—J. M. Johnson, Millersburg, Pa., is reported to have submitted a proposition to put in works.

CAMDEN, N. J.—The National Meter Co., 86 New Chambers St., New York, is reported to have been awarded the contract for furnishing a 36-in. meter, at $3,100.

FLEMINGTON, N. J.—We are informed that the proposed works will require about seven miles of 6-in. cast-iron water pipe and three miles of 8-in. pipe, 30 hydrants, standpipe, 20 × 100 ft., valves, etc. Capt. John J. Shields, Furman Williamson, E. B. Allen and Geo. H. Large have a franchise as individuals. It is expected that they will incorporate.

NEWARK, N. J.—The Pomeroy & Middleport Water Co. has been incorporated, with a capital stock of $100,000, with $30,000 paid in, by Geo. S. Wentz, Dufton, Pa.; Jno. L. Wentz, Scranton, Pa., and Geo. MacDonald, 800 Broad St., Newark.

BEAVER FALLS, PA.—Jno. Warren, Secy. People's Water Co., writes us that the company has let all contracts for furnishing materials and for constructing the proposed works.

BENNETT, PA.—At the election Nov. 8 this place will vote on the question of issuing $25,000 in bonds for an additional pump and machinery for the works and the electric light plant.

CONNEAUTVILLE, PA.—The council is considering a report on the proposed works; estimated cost, $10,000. The water supply will probably be secured from the Nicolls Springs.

DEVON, PA.—Skelly & Weaver, Norristown, Pa., have been awarded the contract by the American Pipe Mfg. Co., 112 North Broad St., Philadelphia, for building the new reservoir. The American Pipe Mfg. Co. is now building a sand filtration plant of 1,500,000 gallons capacity at its Pickering Creek pumping station. Ch. Engr., J. W. Ledoux, Philadelphia.

MILLHEIM, PA.—An election will be held Sept. 12 to vote on the question of issuing $7,000 in bonds for works. The water supply will be secured from Philips Creek, a mile north of the town.

PITTSBURG, PA.—We are informed that the experiments of the filtration committee, which have been conducted at the Brilliant pumping station since July, 1897, were concluded Aug. 31. Work on the tabulation of the data and on the preparation of the final report is now being pushed as rapidly as possible, but this work will probably not be completed for about two months. The report will be in the nature of a recommendation to councils and the question of building will remain with them. Consult. Engr., Allen Hazen, St. Paul Bldg., New York; Res. Engr., Morris Knowles; Chn., Robt. Pitcairn.

READING, PA.—The clerk of the select council writes us that the councils have passed an ordinance providing for holding an election in November to vote on the question of a loan of $225,000 to erect a land filtration plant for the water supply.

LAUREL, MD.—We are informed that a company will be formed to build the proposed works. D. G. Adelsberger, 722 Pennsylvania Ave., Baltimore, Md., is preparing plans, etc. Wm. H. Minch, J. Stuart MacDonald and Jos. M. Cone, Baltimore, are interested.

MIDLAND, MD.—G. T. Long, Midland, writes us that a company will be organized to put in works in the spring. The water supply will be secured from a source about 1½ miles distant. Mr. Long wishes to secure prices of pipe, etc.

PARKERSBURG, W. VA.—W. I. Rittenhouse, Cy. Clk., writes us that this city voted Aug. 30 against issuing $35,000 in bonds for improving the works. The vote was 266 for and 460 against the proposition.

WHEELING, W. VA.—A. L. White, Cy. Engr., writes us that the water board has awarded the contract for furnishing a 12,000,000-gallon pumping engine to the Holly Mfg. Co., Lockport, N. Y., at $56,000. It is to be installed by May 1. The contract for the well and building has been let to L. G. Hallock, Wheeling, at $37,807.

ELBERTON, GA.—W. B. Henry, Clk. Council, writes us that the contract for furnishing the materials and for building the works has been let to Geo. J. Baldwin, Savannah, Ga. The contract is subject to the approval of the people Sept. 20 by a two-thirds vote.

MACON, GA.—The Macon Gas Light & Water Co. proposes to furnish Vineville with water. The company has petitioned the court for permission to build a stand-pipe and reservoir.

SYLVANIA, GA.—The mayor writes us that it is proposed to have an artesian well and to build water-works. Population, 800.

HUNTSVILLE, ALA.—S. Meyers is reported to have been awarded the contract for erecting a new pumping station at about $15,000. There will be three pumps with a capacity of 9,000,000 gallons a day.

NEW IBERIA, LA.—Press reports state that this place will soon vote on the question of building works and a light plant to cost about $80,000. Population, 4,000. Secy., A. J. Cammack.

CLARKSVILLE, TENN.—The question of either sinking wells for a purer water supply or of building a filter plant is being considered, according to reports.

FAYETTEVILLE, TENN.—R. A. Conger, Cy. Clk., writes us that the question of issuing $30,000 in bonds for gravity works will probably be voted upon soon. Engrs., Guild & Co., Chattanooga, Tenn.

SOMERVILLE, TENN.—This place voted Aug. 30 to issue $10,000 in bonds for works and a light plant.

COVINGTON, KY.—Bids are asked by the South Covington & Cincinnati St. Ry. Co. until Sept. 14 for furnishing a 4,000,000 gallon pumping engine, etc. Engr., A. C. Harrington, Newport Power Station, Newport, Ky.

LOUISVILLE, KY.—The following bids were received Sept. 1 by the Louisville Water Co. for erecting a filtration plant, all local bidders: Fred. Hoertz & Co., $297,764; Edward Hely, $299,716; Myer & Coyne, $337,870. Ch. Engr., Chas. Hermany.

MT. STERLING, KY.—Geo. W. Baird, Mayor, writes us that the town will vote in November on the question of issuing $80,000 in bonds for works. The supply will be secured from a creek 4½ miles distant.

CANTON, O.—Bids are asked until Sept. 19 for the purchase of $15,000 of 5% water-works refunding bonds. Cy. Clk., L. N. Ley.

CLEVELAND, O.—Bids are asked until Sept. 17 for furnishing 100 tons of pig lead for the water-works department. Dir. Pub. Wks., Geo. R. Warden.

ELYRIA, O.—W. J. Hayes & Son, Cleveland, O., have been awarded the purchase of $150,000 of water-works extension bonds and $45,000 of water-works purchase bonds. It is probable that the contract for the improvements to the works will be let at once; the bids having been received Aug. 24. Cy. Clk., W. H. Park.

TROTWOOD, O.—The Water-Works Supply Co., it is stated, will begin the construction of its proposed works at once. Capital stock, $5,000. M. G. Pfoutz, T. M. Wagner and Dr. W. C. Mendenhall may be addressed.

WILLIAMSPORT, O.—Press reports state that this place has let a contract for building works and a light plant at $37,000.

NEW BOSTON, O.—Levi D. York, Portsmouth, O., it is stated, will build works at once for this place.

BLOOMINGTON, IND.—The City Water-Works Co. has been incorporated with a capital stock of $25,000 by Jos. D. Showers, H. F. Perry and W. J. Allen.

EVANSVILLE, IND.—Geo. F. Weikel has been awarded the contract for erecting the new water-works buildings and smokestack at $57,500.

NEW ALBANY, IND.—Press reports state as follows: Frank Scheffold, ex-Supt. New Albany Water Co., is at the head of a movement to organize a new company, said to be composed of Louisville and New Albany capitalists, and it is claimed that a franchise will be asked for from the council at a meeting of that body next month. It is said that the proposed company can put in complete works for $125,000. The old water company is making an effort to have its charter extended.

HOUGHTON, MICH.—The question of building an addition to the works for an increased water supply at a cost of about $20,000 is being considered.

LAKE FOREST, ILL.—The water-works company has had Alvord & Shields, The Rookery, Chicago, report upon the economical operation of the Lake Forest Water-Works. Extensions will probably be made in the course of another year to the inlet pipe and pumping station.

STREATOR, ILL.—The city council has engaged Alvord & Shields, Chicago, to make a report on the sufficiency of the fire protection afforded by the water company, under the terms of its franchise.

BOSCOBEL, WIS.—The city clerk writes us that no steps have yet been taken with regard to building new works and a light plant.

DES MOINES, IA.—This city voted Aug. 29 against the proposition to buy the water-works for $850,000.

MANILLA, IA.—Bids are asked until Sept. 13 for extending the present small city works, according to reports. Population (1890), 526. Mayor, C. O. Campbell.

PELLA, IA.—Bids were asked by the city clerk until Sept. 7 for constructing works, according to reports.

CLARA CITY, MINN.—Press reports state that K. H. Holian, Recdr., wants bids for constructing works.

ELBOW LAKE, MINN.—Bids are asked until Sept. 10 for constructing works. Recdr., W. E. Landeene; Pres., J. S. Jacobson.

LITTLE FALLS, MINN.—Estimates for works and a light plant are being secured, according to reports.

WHITE EARTH, MINN.—Bids are asked by J. H. Sutherland, U. S. Indian Agent, for constructing works and sewers for the White Earth reservation.

DICKINSON, N. DAK.—It is stated that this place is considering the question of works and a light plant.

ARKANSAS CITY, KAN.—The council has authorized the mayor to issue $95,000 in bonds for the purchase of the works of the Arkansas City Water Co.

PLATTE CITY, MO.—The question of building works is being considered.

COLORADO, TEX.—The Colorado Water-Works Co. has been incorporated with a capital stock of $5,000, by Benj. S. Van Tuyl and R. M. Webb.

WICHITA FALLS, TEX.—J. B. Quigley, of Sedalia, Mo., and Chas. Carrol have applied for a franchise for works and a light plant.

CRIPPLE CREEK, COLO.—J. Stanley Jones, as chairman of the mass meeting Aug. 15 to discuss the water question, has appointed a committee to further investigate the subject of municipal works.

TACOMA, WASH.—The residents of the north end have asked the council to furnish that portion of the city with more water.

CONDON, ORE.—H. Orchard has submitted a proposition to put in works to cost about $3,000.

HEALDSBURG, CAL.—The San Francisco Bridge Co., San Francisco, Cal., is reported to have been awarded the contract for building the works at $31,700. The Oakland Bank of Savings has purchased $82,650 of bonds for the works and the electric plant.

PASADENA, CAL.—The committee is reported to have recommended the construction of new municipal works to cost about $250,000.

MONTREAL, QUE.—Walter E. Wood has been awarded the contract, at $1,800, for digging a ditch across the Ogilvie dam on the Lower Lachine Road in connection with the water-works.

COBOURG, ONT.—Bids are asked until Oct. 31 for furnishing this city with a water supply and street lighting, as stated in our advertising columns. Town Clk., D. H. Minaker.

OSHAWA, ONT.—John Galt, Canada Life Bldg., Toronto, Ont., is making surveys and plans for the proposed works and a sewerage system.

IRRIGATION.

DENVER, COLO.—Reports state that the South Platte Land, Reservoir & Irrigation Co. will repair its canal and build three miles additional, making a total length of 33 miles. Water will be taken from the Platte River and stored in reservoirs.

DINUBA, CAL.—The Alta Irrigation District received bids Sept. 6 for the enlargement of the district system. W. P. Boon, Secy.

NILES, CAL.—Press reports state that Joseph Tyson, Henry Tyson, E. A. Ellsworth, Joseph Shinn, C. B. Overacker, Wm. Brier and George Lowery have started to sink wells from which water will be pumped for irrigating purposes.

SAN RAFAEL, CAL.—Press reports state that W. Bradbury, of San Francisco, has made known his intention to purchase a water site on the property of the American Land & Trust Co., near Larkspur. This is a natural gorge near the base of Mount Tamalpais with a living stream. A dam will be constructed which will make a lake covering more than 25 acres. Mr. Bradbury calculates that the lower end of the county can be supplied with water from this source.

NEW COMPANIES.—Rawlins Reservoir Co., Cheyenne, Wyo.; $5,000; to sell water for canals, reservoirs, etc.; E. Dickinson, John B. Berry and Erastus Young.

Dry Creek Irrigation Co., Monroe, Utah; $6,000; Moroni Hunt, Pres.; Abraham Sorensen, Secy; William Norgren, Treas.; F. W. Hunt, M. L. McNamara.

SEWERAGE.

HARTFORD, CONN.—Jos. C. Smith has been awarded the contract for building sewers in four streets, at $4,917.

NEW BRITAIN, CONN.—Bids are asked until Sept. 10 for the purchase of $50,000 of 4% 30-year sewer bonds. A portion of this amount will be used for new sewers and a portion to pay the expenses of a committee to investigate the question of sewage disposal. Chn. Com., S. H. Stearns.

WESTERLY, R. I.—The council is considering plans for a system, to cost about $193,000. The outlet, it is proposed, will empty into the Pawcatuck River, near the Rock. Consult, Engrs., Shedd, Sarle & Shedd, Providence, R. I.

BALLSTON SPA, N. Y.—The question of appropriating $4,000 for repairing and extending the Gordon Creek sewer will be voted upon.

AVALON, PA.—Bids are asked until 4 p. m. Sept. 8 for building 10 and 8-in. pipe sewers in a number of streets; check, $500. Engr., Jno. McBride, 341 Fourth Ave., Pittsburg; Treas., J. C. McDowell.

GETTYSBURG, PA.—I. L. Kendlehart, Secy. Town Council, writes us that nothing definite has been done about extending the sewers. It will probably be necessary to secure advice from an expert before anything is done.

NEW KENSINGTON, PA.—W. D. Snyder, Secy., writes us that the contract for building certain sewers has been let to Ott Bros., Allegheny, Pa.

OAKMONT, PA.—Bids are asked until Sept. 10 for constructing 58,350 ft. of 30 to 8-in. pipe sewers, 80 manholes, 25 flush tanks, etc. Engrs., Edeburn, Cooper & Co., 410 Grant St., Pittsburg, Pa.

PHILADELPHIA, PA.—The board of surveyors has approved plans for a 9-ft. brick sewer in 55th St.; estimated cost, $20,000.

PITTSBURG, PA.—The question of building a 4-ft. main sewer to drain a portion of the East End is being considered. Dir. Pub. Wks., E. M. Bigelow.

CONCORD, N. C.—W. F. Dowd, Charlotte, N. C., has been awarded the contract for furnishing the materials and for building a system. There will be required 9,000 ft. of 15 to 8-in. pipe.

AIKEN, S. C.—This place voted Aug. 25 to issue $10,000 in bonds, in addition to the $15,000 voted some time ago, for the proposed system. The council will probably ask for bids at once.

BIRMINGHAM, ALA.—Jas. L. Sandefer has petitioned the Chancery Court for an injunction restraining the city from emptying its sewage into Valley Creek.

MEMPHIS, TENN.—The Nashville, Chattanooga & St. Louis R. R. Co. has agreed to build a culvert 800 ft. long from Main and Georgia Sts. to Clay St., in order to drain a portion of the city, etc. It will be 6 or 8 ft. in diameter. City Engineer Bell is preparing plans.

CLEVELAND, O.—Bids are asked until Sept. 15 for building sewers in three streets. Dir. Pub. Wks., Geo. R. Warden.

EAST LIVERPOOL, O.—This place has voted to issue $15,000 in bonds for sewers and paving, according to reports.

TOLEDO, O.—Bids are asked until Sept. 19 for building a 15-in. pipe sewer in Greenwood Ave. Cy. Clk., L. P. Harris.——J. T. McKinney will be awarded the contract for building a 5-ft. sewer in Adams St. at $33,911.

INDIANAPOLIS, IND.—Bids are asked until Sept. 12 for pipe sewers, etc., in certain streets. Pres. Bd. Pub. Wks., M. A. Downing.

SYCAMORE, ILL.—Bids are asked until Sept. 12 for building sewers to cost $5,000. Au outlet for the present for the proposed system will be into the Kishwanken River. It is proposed to defer the construction of the disposal works until the main sewer and some of the branches are complete. Engrs., Alvord & Shields, The Rookery, Chicago; Cy. Clk., J. D. Berkler.

MILWAUKEE, WIS.—Bids were asked by the board of public works until Sept. 6 for constructing Section No. 6 of the 30th St. tunnel sewer. This section will cost about $75,000.

WHITE EARTH, MINN.—Bids are asked by Jno. H. Sutherland, U. S. Indian Agent, White Earth Agency, for building sewers and water-works for the reservation school.

OMAHA, NEB.—Bids are asked until Sept. 16 for building a sewer in district No. 231. Secy. Bd. Pub. Wks., Wm. Coburn.

JOPLIN, MO.—E. C. H. Squire, Cy. Clk., writes us that the city voted Aug. 23 to build, by a direct tax, 18,000 ft. of 20 and 10-in. pipe sewers; average cut, 9 ft. The work will not be started until the spring. There will be let in about 30 days a contract for 5,100 sq. yds. of brick paving. Cy. Engr., S. J. McKee.

VICTOR, COLO.—Andrew Rosewater, Bee Bldg., Omaha, Neb., has submitted plans for a system to cost about $57,980. Michael Donavan has applied for a 10-year franchise to build and operate the system. Mayor Doyle is opposed to granting a franchise.

OSHAWA, ONT.—John Galt, Canada Life Bldg., Toronto, Ont., is making plans for a system and water-works.

GARBAGE DISPOSAL—STREET CLEANING

BRIDGEPORT, CONN.—Local papers state that the Connecticut Reduction Co. has given up its contract for destroying the garbage of this city, for which it was awarded the contract three years ago. The board of health is said to be undecided how to destroy the garbage. Pres. Connecticut Reduction Co., Frank E. Clark.

WEST HAVEN, CONN.—Reports state that Swift & Co. will construct a crematory for the disposal of refuse at the slaughter house in Allingtown. Health Officer Bevan may be addressed.

BINGHAMTON, N. Y.—A. H. Abbott, Secy. Bd. of Health, writes us that the board has laid the matter of garbage disposal before the council. It has promised to have an amendment to the charter so as to appropriate a sufficient sum to build a crematory in 1899.

NEW YORK, N. Y.—Bids are asked until Sept. 14 for removing the night soil, offal and dead animals from the Boroughs of Queens and Richmond. M. C. Murphy, Pres. Dept. of Health, Centre and White sts.

UTICA, N. Y.—T. E. Kinney, Mayor, is urging the council to bury the city garbage. The mayor has appointed E. Prentiss Bailey and Geo. E. Dunham to confer with the board of health regarding the matter.

MONTCLAIR, N. J.—We are informed that a conference has been arranged between committees from several boards with regard to a garbage disposal plant. The question is undecided and nothing may be done for some time. W. O. Leighton, Health Inspector.

CHESTER, PA.—The board of health is reported to have recommended to the council the construction of a plant to cost about $2,000 or $4,000.

READING, PA.—The committee will consider the question of increasing the capacity of the garbage plant, from 25 to 80 tons per day. H. L. Boas may be addressed.

HAGERSTOWN, MD.—M. L. Byers, Cy. Clk., writes us that no definite action has been taken with regard to a garbage disposal plant.

WHEELING, W. VA.—A. L. White, Cy. Engr., will visit eastern cities this week to investigate methods of garbage reduction, disposal, etc., and will make a report on the subject.

NEW ORLEANS, LA.—Bids are asked until Sept. 12 for constructing a new garbage boat. Jno. F. Butts, Comptroller.

CHATTANOOGA, TENN.—A crematory will be built at Camp Thomas at once, according to reports. Capt. H. P. Young has charge of the sanitary department. J. J. Fisher, of Chattanooga, is said to have prepared the plans.

MILWAUKEE, WIS.—The committee is reported to have decided to recommmend for adoption by the council the plans of the Dixon Garbage Cremation Co., Toledo, O. This company proposes to build a plant for $58,000.

STREETS AND ROADS.

REVERE, MASS.—The following bids were received Aug. 22 for grading, etc., on the Revere Beach Parkway, between Eliot Circle and Campbell Ave., as noted in our issue of Aug. 18: Walter R. Brown, Lowell, $25,055; Thos. H. Gill, Somerville, $23,334; Mirick & Wentworth, Malden, $22,715; Richard Falvey, Somerville, $21,465; Martin Gill & Co., Somerville, $20,723; Joseph D. Gennaro, Boston, $18,896; B. D. Pierce Co., Bridgeport, Conn., $18,384; McCusker Bros., Waltham, $17,842; George A. Lancaster, Revere, $17,542; Cogan Bros. & Forschner, Atlantic, $16,943; Owen Cunningham & Son, Somerville, $16,150; Jas. J. Welch & Co., Salem, $15,636; Thos. Hurley, Lynn, $15,605; Johnston, Haines & Letteney, Boston, $14,877; J. A. Whittemore's Sons, Boston, $14,472. Edwin B. Haskell, Park Comr.; Wm. T. Pierce, Engr.

BOSTON, MASS.—Bids are asked until Sept. 8 for building two sections of the State Highway, 2,600 and 2,900 lin. ft., respectively (two contracts); check for each, $250. T. C. Mendenhall, Pres. Massachusetts State Highway Comn.

PITTSFIELD, MASS.—The aldermen have made appropriations for draining and repairing Allen Ave., between Dunham and School Sts.; for grading a portion of Appleton Ave., and for repairing North John St., according to report. A. A. Fobes, Cy. Engr.

SOMERVILLE, MASS.—Martin Gill & Co. have been awarded the contract for surfacing a portion of Middlesex Ave., consisting of 1,000 cu. yds. of earth grading, 2,000 sq. yds. of gravel surfacing and 4,200 sq. yds. of foundation and broken stone surfacing. E. M. Bailey, Cy. Engr.

WORCESTER, MASS.—The Boston Paving Co. has been awarded the contract to lay 25,000 sq. ft. of granolithic sidewalk, curbing and gutter paving at Richmond Heights, on Pleasant, Lenox and Beeching Sts., according to report. Lucien B. Stone, Comr. of Sts.

CROMWELL, CONN.—The B. D. Pierce, Jr., Co., Bridgeport, has received the contract to construct 4,100 lin. ft. of macadam roadway, at a cost of $3,010, according to report. C. S. Pease, Selectman.

HARTFORD, CONN.—The following bids were received for grading a roadway in Pope Park: Fred. T. Ley & Co., $1,175; H. J. Mullen, $835; R. F. Hudson, $1,258; R. W. Sherman, $1,067; A. H. McElwain, $786; Peter Suzio, $888. The bids were referred to C. H. Bunce, Cy. Engr., to ascertain the responsibility of the lowest bidder.

NEW HAVEN, CONN.—Bids are asked until Sept. 13 for constructing a broken stone pavement on Dixwell Ave., from Division St. to the city limits. Bids are also asked until Sept. 13 for laying a concrete walk and curbing on the easterly causeway of Tomlinson Bridge. C. W. Kelly, Cy. Engr.

ALBANY, N. Y.—The Callahan Road Improvement Co., 51 State St., received the contract, Sept. 2, to improve two miles of the Troy and Schenectady Turnpike, at $14,590, according to report. Campbell W. Adams, State Engr., Utica.

BROOKLYN, N. Y.—It is reported that bids will soon be asked for grading and paving a number of streets, among them portions of Regent Place, Pacific St., Park Place, Himrod St., 84th St., Ave. B. and Ocean Ave. N. P. Lewis, Engr. of Highways.

NEW ROCHELLE, N. Y.—At a special election, Aug. 30, the resolution to issue $150,000 for street improvements was defeated by a very small majority. H. S. Clarke, Village Pres.; G. R. Olney, Supt. Pub. Wks.

NEW YORK, N. Y.—Bids are asked until Sept. 15 for furnishing broken stone and screening of trap rock and gravel and delivering the same along certain streets in the borough of Queens. Jas. P. Keating, Comr. of Highways.

ROCHESTER, N. Y.—H. B. Hooker was awarded the contract Aug. 29 to macadamize Ave. B for $6,152; also to construct cement walks on Chili Ave. for $2,555. Chambers & Casey received the contract to improve Post St. for $1,684. Edwin A. Fisher, Cy. Engr.

ATLANTIC CITY, N. J.—It is reported that Mayor Jos. Thompson has approved the street paving ordinance noted in our last isue; the estimated cost of the work is $150,000. John P. Ashmead, Cy. Engr.

ELIZABETH, N. J.—It is stated that bids will be asked next week by the county board of freeholders for widening the road from Elizabeth to Plainfield, a distance of 12 miles. An issue of $75,000 of bonds will probably be authorized in addition to $250,000 received from John Kean for a franchise for an electric railway between these cities.

GLOUCESTER CITY, N. J.—The council has postponed the opening of bids for the paving of Broadway, between Salem and Market Sts., as noted in our last issue, until Sept. 15, according to report. Edw. J. O'Hara, Chn.

NEWARK, N. J.—G. W. Sharp & Son have been awarded the contract to lay the cement pavement in and about the new City Hospital at $940. Dr. Herold, Pres. Bd. of Health.——The following contracts were awarded Aug. 25 for paving, as noted in our issue of Aug. 18: New Jersey Asphalt Co., 736 Broad St., Newark, part of North 7th St., brick, $5,541; North 7th St., asphalt, $3,890; Fulton St., asphalt, $6,114; South 7th St., asphalt, $43,720. Barber Asphalt Paving Co., New York, Lincoln Park, from Washington St. to Clinton Ave., asphalt, $1,789. Atlantic Alcatraz Asphalt Co., New York, Sidney Place, asphalt, $1,953; Broome St., asphalt, $6,791; Ninth Ave., asphalt, $11,415. M. F. McLaughlin, Gen. Supt. St. and Water Comrs.

CRAFTON, PA.—Bids are asked until Sept. 13 for paving and curbing White Ave., between Noble Ave. and Station St. F. A. McDonald, Borough Engr., 811 Penn Bldg., Pittsburg; R. H. Thomson, Borough Clk.

ERIE, PA.—M. Whitman has been awarded the contract to gravel Ash St., at 35 cts. a sq. yd., according to report. Benj. E. Briggs, Cy. Engr.

MEADVILLE, PA.—Bids are asked until Sept. 14 for 1,480 sq. yds. of brick paving, etc., as described in our advertising columns. D. T. McKay, Jr., Cy. Clk.; W. A. Doane, Cy. Engr.

NEW KENSINGTON, PA.—W. D. Snyder, Secy., writes us that the bids received Aug. 31 for paving were all too high and were rejected. The council will readvertise at once for new bids.

PITTSBURG, PA.—Contracts were awarded Aug. 30 for the improvement of portions of three roads, as follows: Beaver Road, Booth & Flinn, $43,064; Kittanning Road, Keeling & Ridge, $29,161; Library Road, Booth & Flinn, $40,901. W. W. Murray and J. A. Clark, County Comrs.; Fred. W. Patterson, County Engr.

SHARPSBURG, PA.—E. C. Hulbert, Cy. Engr., writes us that the borough has decided to issue $60,000 bonds for the purpose of repaving all the cobble streets with modern pavement. There are about 45,000 sq. yds. of paving to be done, and the work will be pushed at once.

ROCKVILLE, MD.—Bids are asked until Sept. 20 for grading, masonry and macadam paving necessary in constructing a highway from Rockville, Md., to Washington, D. C. W. W. Welsh, Clk. County Comrs.; Taylor Gleaves, Constr. Engr., Lynchburg, Va.

LOUISVILLE, KY.—Bids are asked until Sept. 12 for improving portions of six alleys by grading, curbing and vitrified brick or block paving. Bids are also asked until Sept. 15 for improving the sidewalks on nine streets by regrading, recurbing, supplying metal gutters and brick paving. Thos. P. Craig, Secy. Bd. Pub. Wks.——The council has refused to approve the awarding of the contracts for asphalt paving to the Assyrian Asphalt Paving Co., according to report.

CINCINNATI, O.—Bids are asked until Sept. 13 for improving Bell Place, from Locust St. to 267 ft. south, by grading, curbing and macadamizing. A. B. Rattermann, Pres. Bd. of Cy. Affairs; Geo. H. Spellmire, Clk.——Ruebel Bros. have been given the contract at $6,108, to improve Red Bank Ave.

CLEVELAND, O.—The council has passed an ordinance to grade, curb and pave Hayward St. from Cedar to Central Aves. Geo. H. Billman, Pres.; Howard H. Burgess, Cy. Clk.

YOUNGSTOWN, O.—Bids are asked until Sept. 19 for the purchase of $20,000 bonds for paving Scott St., between Wick and Belmont Aves., $1,500 bonds for grading and improving Seneca St., between Oakland and Delaware Aves., and $400 bonds for constructing a sewer on Hogue St. F. C. Brown, Cy. Clk.

INDIANAPOLIS, IND.—Bids are asked until Sept. 12 for grading, curbing, gravel paving and building cement sidewalks on Tacoma Ave., from 10th St. to the south bank of Pogue's Run; check, $1,000. M. A. Downing, W. Scott Moore and T. J. Montgomery, Bd. Pub. Wks.

DETROIT, MICH.—It is reported that the board of works will call for bids for paving Cass St. from Lafayette to Michigan Sts., with asphalt. D. W. H. Morelands, Comr. Pub. Wks.

BLOOMINGTON, ILL.—Bids are asked until Sept. 15 for 480 ft. of stone curbing and about 1,100 sq. yds. asphalt paving on Centre St. C. F. Koch, Pres. Bd. of Local Improvement.

CHICAGO, ILL.—Bids are asked until Sept. 13 for 4,750 sq. yds. of asphalt paving, 2,245 lin. ft. of granite concrete curb, two new catch basins with connections, seven wooden catch basin covers replaced by iron covers and set, two wooden manhole covers replaced by iron covers and set, 390 cu. yds. of common filling, 170 cu. yds. of black soil, 1,300 sq. yds. of sodding and 25 elm trees, all for the West Chicago Park Commissioners; check, 10% of bid. Anton Peterson, Pres. Bd. of Local Improvements of the West Chicago Park Comrs.; Ernest G. Schubert, Secy.

EAU CLAIRE, WIS.—S. S. Kepler, Mayor, writes us that an ordinance has been passed providing for the laying of new vitrified brick pavements on certain streets and the removal of the old cedar blocks; also for the purchase of a 12-ton steam road roller. It is not expected, however, to contract for paving before 1899. T. P. Cochrane, Cy. Clk.

RACINE, WIS.—The board of public works rejected all bids for the grading of Kewaunee St., Aug. 27. Fred. Nelson was awarded the contract for the filling of La Salle St. at 11 cts. a cu. yd. O. Burlingame, Cy. Engr.

ST. PAUL, MINN.—L. W. Rundlett, Cy. Engr., has prepared plans and estimates for paving 10th St. from St. Peters St. to Rice St., and Rice St. from that point to the Great Northern Ry. tracks. The estimated cost is $20,000 for asphalt, $19,000 for sandstone and $17,000 for brick.——The board of public works is reported to be contemplating the construction of 25 miles of cement sidewalks.

WICHITA, KAN.—Bids are asked until Sept. 12 for the completion of three 5-ft. unfinished wooden sidewalks; check, $10. H. T. Kramer, Cy. Clk.

OMAHA, NEB.—Bids are asked until Sept. 16 for grading Fowler Ave. from Florence Boulevard to 24th St. Bids are also asked until Sept. 16 for curbing and paving 32d Ave., from Lincoln Ave. to Dorcas St., with asphalt, brick or stone; check, 2% of bid. Andrew Rosewater, Chn. Bd. Pub. Wks.; Wm. Coburn, Secy.

JOPLIN, MO.—E. C. H. Squire, Cy. Clk., writes us that the contracts for street paving will be let this month. S. J. McKee, Engr.

KANSAS CITY, MO.—Adam Armstrong was awarded the contract, Aug 24, for macadamizing the roadways and constructing artificial stone crosswalks on the Paseo drives at a cost of $46,000 for the former, and $800 for the latter. A contract was also awarded to the Dugan Cut Stone Co. to construct the South Paceo Park fountain at $9,382, according to report. R. W. Godfrey, Secy.

KANSAS CITY, MO.—Bids are asked until Sept. 12 for constructing a natural stone sidewalk on the west side of Troost Ave., between 8th St. and 9th St.; also for constructing granitoid sidewalks on 10 streets (separate bids for each); check with each bid, $200. Bids are also asked until the same date for grading 25th St., between Cherry and Holmes St.; for 136 lin. ft. of curbing on Bank St., for paving Central St. with vitrified brick, for paving Amarette St. with the same, and for paving the alley between Grand Ave. and McGee St. with the same (five contracts; check, $200 each). Henry A. Wise, Cy. Engr.

MARSHALL, MO.—The city council rejected all the bids received Aug. 29 for macadam paving and curbing, as noted in our issue of Aug. 18, on account of the bids being above the estimate of the street commissioners. Bids are again asked for until Sept. 14 for the same work. A. R. James, Cy. Clk.

ST. JOSEPH, MO.—Bids are asked until Sept. 12 for grading St. Joseph and De Kalb Road; check, $15. Theo. Steinacker, County Surv.

OREGON CITY, ORE.—J. Henry Smith, C. E., writes us that the contracts recently awarded to Danl. Lyons amounted to about 900 lin. ft. of roadway on the side of a bluff at a cost of about $2,400. More extensive work is promised for the near future.

WESTMOUNT, QUE.—At a council meeting Sept. 6, a resolution was to be introduced to open the Boulevard from its present terminus westerly to Glencoe Ave. Wm. Mints, Secy. and Treas.

OSHAWA, ONT.—Bids are asked until Sept. 9 for the construction of 500 lin. ft. of 8-ft. concrete sidewalks. John Bailes, Chn. Bd. of Wks.; Thomas Morris, Acting Clk.

MANUFACTURING PLANTS.

NEW MILFORD, CONN.—The factory of the New Milford Hat Co. was destroyed by fire Sept. 5, causing a loss of about $40,000.

NEW YORK, N. Y.—A fire in this city, Sept. 3, destroyed the works of the East Side Rubber, Bone & Ivory Works, 2220 to 2228 1st Ave., and 401 and 403 East 124th St., causing a reported loss of $60,000.——The drug and chemical factory at 3d Ave. and 18th St., occupied by Elmer & Amend, was damaged by fire, Sept. 5, causing an estimated loss of $125,000.

TROY, N. Y.—It is reported that Cluett, Coon & Co., shirt and collar manufacturers, will soon erect a new 6-story addition to their plant on River St.——Also that Searle, Gardner & Co., collar manufacturers, will erect a new factory building at River and Middleburgh St.

NEWARK, N. J.—A third fire occurred in the works of the Celluloid Mfg. Co., Sept. 4, causing a reported loss of over $100,000.

CHESTER, PA.—It is reported that Robert Wetherill & Co., boiler and engine builders, have awarded the contract to build a new foundry, 146 × 65 ft., on East 7th St., to Alva R. Kerr & Co., of Eddystone, Pa.

MAUCH CHUNK, PA.—The Keystone Construction Co., of Easton, is said to have been awarded the contract for furnishing and erecting the structural iron for the new plant to be built at Hazards by the Lehigh Zinc & Iron Co. Fourteen large buildings are expected to be built.

STATESVILLE, S. C.—Reports state that the Statesville Cotton Mills will purchase additional machinery to increase its capacity by one-third, at a cost of $14,580. The present equipment is 6,000 spindles and 180 looms.

DETROIT, MICH.—Plans have been prepared, according to reports, for a new plant and bottling works for the Union Brewing Co.; estimated cost, $50,000. Mgr., Joseph Aipel, 837 Leland St.; Arch., Gustav A. Mueller, Union Trust Bldg.

OWOSSO, MICH.—A fire in this city Sept. 3 destroyed Woodward's furniture factory, the plant of the Owosso Brewing Co. and other buildings. Reported loss, $175,000; insurance, about $90,000.

KENOSHA, WIS.—Reports state that the Laflin & Rand Powder Co. has bought a tract of land near Pleasant Prairie and will remove its plant at Plattville, Ia., to this place; estimated cost, $50,000.

TOLEDO, O.—The Bertram shipyards were destroyed by fire, Sept. 2, causing a loss to the shops and machinery of about $70,000.

GAS PLANTS.

BUFFALO, N. Y.—Alderman Geo. S. Potter has introduced a resolution to have the council ask bids for the construction of a municipal gas and electric lighting plant, to cost about $5,000,000.

PORTSMOUTH, VA.—The Portsmouth Gas Co. will extend its works for an additional capacity of 100,000 cu. ft.

ATLANTA, GA.—J. T. Burke, of the Georgia Lighting & Heating Co., writes us that the matter of lighting has been before the council committee. Mr. Burke has offered to light the city with a new gas lamp.

NEW COMPANIES.—Pittsburg Refining Co., Pittsburg, Pa.; $5,000,000, commencing with $100; to bore for oil and natural gas; Amos Steelsmith and Ferd Reiber, Butler, Pa.; E. H. Anderson, Wilkinsburg, Pa.; A. R. MacConnell and John J. McConnell, of Pittsburg.

Columbia Drilling Co., Pittsburg, Pa.; $100,000, commencing with $1,000; to drill for oil and gas; C. C. Beggs, W. J. Ruan, H. C. Beggs, J. H. Richardson and J. P. Beggs, all of Pittsburg.

Sheford Oil Co., Cleveland, O.; $5,000,000, with $10,000 paid in; to bore for oil and gas; J. S. Riddle, Chas. A. Post, E. T. Holmes, R. C. White, J. R. Post, all of Cleveland, O.

MISCELLANEOUS CONTRACTS.

TELEPHONE SYSTEM.—Le Mars, Ia.—The town has voted to grant a franchise to a telephone company. Address W. H. Hout.

BONDS.—Sheridanville, Pa.—Bids are asked until Sept. 13 for the purchase of $30,000 of 4% bonds. Chas. L. Criss, Borough Clk.

TUNNEL.—Boston, Mass.—Hearings are being given by the Boston Rapid Transit Commissioners on the question of building a tunnel to East Boston.

RETAINING WALLS.—Oakland, Cal.—The question of constructing retaining walls on 12th and 8th Sts. will be decided by the board of public works on Oct. 5.

TOWBOAT.—St. Louis, Mo.—Bids are asked until Oct. 1 for furnishing a steel hulled towboat. Maj. Thos. H. Handbury, U. S. Engr., Custom House, St. Louis.

DREDGING.—Oakland, Cal.—Bids are asked by the board of public works until Oct. 5 for dredging Lake Merritt, for which $80,000 has been appropriated.

COAL SHAFT.—Latrobe, Pa.—Bids are asked by the Latrobe Coal Co., Latrobe, until Sept. 30, for sinking and timbering a shaft at St. Vincent's monastery. D. N. Jones, Supt.

BANK PROTECTION.—New Orleans, La.—Bids are asked until Sept. 8 for pile bank protection work in the Third District, check, $2,500. Secy, Orleans Levee Bd., T. J. Duggan.

DRAINAGE CANAL.—Spokane, Wash.—Bids will probably soon be asked by Oskar Hubar, Civil Engr., Spokane, for constructing a canal seven miles long, to drain the Colville Valley.

LEVEE WORK.—New Orleans, La.—Bids are asked until Sept. 22 for about 461,000 cu. yds. of embankment for the Atchafalaya and Lafourche levees. Maj. J. H. Willard, U. S. Engr., New Orleans.

STONE JETTIES.—Green Harbor, Mass.—Bids are asked until Sept. 22 for constructing stone jetties, as stated in our advertising columns. Woodward & Emery, Chn. Comrs., 131 State House, Boston.

SHORE PROTECTION.—Fort Morgan, Ala.—Bids are asked until Oct. 5 for the construction of shore protection at Fort Morgan, as stated in our advertising columns. Address Major W. T. Rossell, U. S. Engrs., Mobile, Ala.

DRY DOCK.—Algiers, La.—Bids are asked until Oct. 21 for constructing a combined floating and graving steel dry dock, etc., at the naval reservation, Algiers. Estimated cost, $850,000. Mordecai T. Endicott, Ch. Bureau Yards and Docks, Washington, D. C.

STONE, CEMENT, ETC.—New York, N. Y.—Bids are asked by the park board, the Arsenal, Central Park, Manhattan, until Sept. 15 for furnishing 400 bbls. of Portland cement, about 2,700 cu. yds. of ½ to 2½ in. crushed stone, 10,000 ft., B. M., of timber, etc.

TIMBER FENDER.—Pittsburg, Pa.—Jotte, Foley & Co., Pittsburg, and Jas. Omslaer & Co., Park Bldg., Pittsburg, submitted the only bids received by Maj. C. F. Powell, U. S. Engr., for building a pile and timber fender at Lock No. 2, Turtle Creek, at $2,740 and $2,330 respectively.

SHORE PROTECTION.—Cleveland, O.—The following bids were received by the park board, Aug. 17, for constructing a shore protection in Edgewater Park. C. A. Strong & Son, $38,836; L. P. & J. A. Smith, $39,050; Engel & Ettner, $39,530; William Robinson, $46,321.

TELEPHONE SYSTEM.—Sandusky, O.—Press reports state that the Union Suburban Telephone & Telegraph Co., recently incorporated with a capital stock of $1,000,000, will soon begin the construction of its proposed lines. Pres., H. A. Everett, Cleveland, O.; Engr., C. W. Mason.

LEVEE.—Hanford, Cal.—The Buena Vista Reclamation District has resolved to construct 13 miles of levee to reclaim 30,000 acres, south of Lake Tulare, estimated cost $7,000. The work will be let either by contract or day labor. N. W. Motheral, L. D. Combs, T. O. Robinson, J. D. Hefton, E. O. Miller, R. Rey, L. G. Vragizan and J. F. Pryor compose the committee.

PIER.—New York, N. Y.—The dock and ferry board awarded the contract to Henry D. Steers, Bowling Green, for building a new pier at Watts St. The bids were in three classes: first, for the building of the main pier; second, for extra piles for a Pennsylvania ferry rack to be hereafter built, and third, for riprap stone to hold the pier in place at the outer end. Mr. Steer's bid for the work was $38,820 for the first class, $2,050 for the second, and 38 cts. a ft. for the third. Other bidders were W. H. Jenks, Gildersleeve & Ralf, R. P. & J. H. Staats, B. S. Cronin and P. S. Ross.

COALING STATION.—Pago Pago, Samoa.—Press reports state as follows: Bids for the erection of a coaling station at Pago Pago have been asked by Commander Z. L. Tanner, who is in charge of the work. He will not state the amount to be expended, but says the work will be of a substantial character, and at least a year will be required for its completion. Lieut. F. T. Chambers, of the Engineering Department of the Navy, will supervise the construction of the wharf and coalsheds. He will also provide for a water supply and make a complete topographical survey of the land belonging to the United States surrounding the harbor. Commander Tanner says that no fortifications are to be erected.

COAL HANDLING PLANT.—New London, Conn.—We are informed that the Bureau of Yards and Docks, Navy Department, Washington, D. C., received the following bids Aug. 31 for constructing coal sheds, coal handling machinery, etc., at New London:

Bidder.		Time, days.
Riter-Conley Co., Pittsburg	$185,700 and $155,000	..
J. W. Hoffman & Co., Philadelphia	137,500	..
F. W. McNeal Co., New York	174,999	150
Manhattan Supply Co., 160 Duane St., N. Y.	323,400	..
C. W. Blakesley & Son*	$192 000 and 171,000	4 mos.
J. A. Mead & Co., New York	$81,043 and 105,602	..
Engineering Contract Co., New York	160,000†	165
R. P. & J. H. Staats, 29 B'way, New York	166,000	..
Berlin Iron Bridge Co., East Berlin, Conn.	159,900	6 mos.
R. H. Hood & Co., 220 B'way, New York	173,975	6 mos.
McGuire & Hall, 26 Cortlandt St., N. Y.	164,980	..
Wm. Seaver Engineering Co.§	$206,677 and 361,777	8 mos.
Union Bridge Co., 1 B'way, New York	125,370‡	6 mos.

*New Haven. †Enlarged plant, $185,000. §Cleveland, O. ‡Alternate bids of $155,880, $155,360, $192,000 and $191,570.

CONTRACT PRICES.

VALVES.—Boston, Mass.—The Metropolitan Water Board received the following bids Aug. 25 for furnishing water valves:

Bidder.	Valves			
	20-in., 6 each.	16-in., 8 each.	12-in., 8 each.	Total.
Camden (N. J.) Iron Works*	$172	$110	$75	$2,512
Coffin Valve Co., Neponset, Mass	178	119	88	2,724
Atlantic Works, Boston, Mass.	298	214	148	4.684

*Awarded contract.

ELECTRIC LIGHTING.—West Superior, Wis.—Press reports state that the council voted Aug. 24 to accept the following proposition of William Burgess for street lighting for five years; 150 arc lights 1,200-c. p., $75 a year; 200 arc lights, 1,200-c. p., $75; 300 arc lights, 1,200-c. p., $72.50; all lights over 300, $70; 150 arc, 2,000 c. p., $80; 200 arc, 2,000 c. p., $80; all lights over 200-300, $77.50; over 300, $75. The above proposition on being accepted, Mr. Burgess will furnish commercial lighting as follows: Arc lights, 7 o'clock, a month, first, $5; additional, $5; 10 o'clock, a month, six nights a week, first, $6; additional, $5.50; 12 o'clock, a month, seven nights a week, first, $7; additional, $6.50; all night, seven nights a week, $8; additional, $7.50. Incandescent lights: Meter rates, 5-10 cts. a light hour or 10 cts. a 1,000 watts. Contract rates: Running later than 10 o'clock, $50; not later than 12 o'clock, $55; all night, $65, 16 c. p.

BRIDGE MASONRY.—Fort Wayne, Ind.—Chas. E. Moellering & Co. were awarded the contract, Aug. 19, for the abutments of the Walton Ave. bridge over the Maumee River, at $5.98 a cu. yd. for stone, $4.25 a cu. yd. for concrete, 16 cts. a cu. yd. for excavation, and 40 cts. a cu. yd. for wet excavation. Stringer & Wright were awarded the contract for the abutments of the Clinton St. bridge over Spy Run and the bridge over Black Creek, in Maumee Township, at $7.78 a cu. yd. for stone. Their bids are $592 and $354, respectively. Wm. H. Boshorn, County Engr.

SAND.—Washington, D. C.—The district commissioners have accepted the following proposals: Columbia National Land Dredging Co., to furnish the city with 2,250 cu. yds. of paving sand at 45 cts.; John B. Lord, to furnish the city with 4,000 cu. yds. of concrete sand at 59 cts., 1,000 cu. yds. of building sand at 65 cts., and 4,000 cu. yds. of screened gravel at 69 cts.

SEWER WORK.—St. Louis, Mo.—L. H. Meyer, 108½ North 8th St., St. Louis, was awarded the contract at $11.00 a lin. ft. Sept. 1, 1898, for taking out 928 ft. of wooden bottom in the Mill Creek sewer and replacing the same with concrete. The highest bid was $21.50 a ft. B. H. Colby, Sewer Comr.

ASPHALT PAVING.—Scranton, Pa.—The following bid was received Sept. 1, 1898, for paving Quincy Ave., between Pine and Gibson Sts.: Barber Asphalt Paving Co., asphalt pavement, $2.37 a sq. yd.; 4 × 12-in. curb, 46 cts. a lin. ft.; 6 × 12-in. curb, 53 cts. a lin. ft.; 6 × 12-in. curb with tile drain, 60 cts. a lin. ft.; circular curb with tile drain, 98 cts. lin. ft.; dressing and resetting old curb, 27 cts. a lin. ft. The curb is to be set in concrete. Joseph P. Phillips, City Engr.

ASPHALT PAVING.—Paterson, N. J.—The Paterson Construction Co., Pres., Chas. M. King, has been awarded the contract at $1.98 a sq. yd. for 29,500 sq. yds. of asphalt paving and at 40 cts. a lin. ft. for 300 ft. of crosswalk.

BRICK PAVING. — Hagerstown, Md.—E. G. Buck has been awarded the contract at $1.22 a sq. yd. for paving two blocks of Franklin St. with Clearfield brick; cement filler to be used.

ASPHALT WALK.—Toledo, O.—The county commissioners received the following bids last month for constructing 19,000 ft. of 18-ft. asphalt walk around the court house park: Schillinger Bros., $1.15 a lin. ft.; Frank Hill, $1.33; Warren-Scharf Asphalt Paving Co., $1.69; M. F. Sullivan, $1.97.

PUMPING STATION.—Boston, Mass.—The Metropolitan Water Board received the following bids Aug. 25 for building the low-service pumping station at the Chestnut Hill reservoir, as advertised in Engineering News; Norcross Bros.'s bid was accepted; all local bidders:

Bids Received at Boston, Mass., Aug. 25, 1898, for the Construction of a Low-Service Pumping Station.

PIPE SEWERS.—Palmer, Mass.—C. W. Johnson has been awarded the following contracts for constructing certain sewers: 15-in. main sewer, 38 cts. a ft.; 10-in. laterals, 38 cts. a ft.; manholes, $32 each; catchbasins, $16 each.

BRICK PAVING.—Schenectady, N. Y.—We are informed that the following contract has been let to John Twomey, Schenectady, for brick paving, curbing, etc., in Dock St.: All paving, vitrified brick, a sq. yd., $1.80; granite block, $2.65; cobblestone, 18 cts.; 4-in. curbing, a lin. ft., 60 cts.; 8-in. curbing, $1.15; catchbasins, complete, each, $90; retaining wall, a cu. yd., $4.10; iron rail for retaining wall, a ft., $1; water taps, each, $8; sewer connections, a lin. ft., 70 cts.; lead pipe, AAA ¾-in., a lin. ft., 80 cts.; 15-in. sewer, laid, a ft., 80 cts.; 10-in. sewer, laid, a ft., 60 cts., and filling, a cu.yd., 20 cts.

MACADAMIZING.—Paterson, N. J.—The county board of freeholders received the following bids Aug. 19, 1898, for building portions of 17 macadam roads: F. J. Marley, three roads, bid ranged from 26 cts. to 31½ cts. a sq. yd.; Edward Dowling, three roads, 18 cts., 21 cts. and 28 cts.; Bunn & Daniels, three roads, 22 to 25 cts.; McKiesnan & Bergen, five roads, 23 to 33½ cts.; Wright & Lindsey, five roads, 28 to 35 cts.; Daniels & Stanley, four roads, 22 to 30 cts.; R. M. Torbet, four roads, 24 to 33 cts.; Wolf & Bergen, two roads, 26 and 29 cts.; Francisco Bros., three roads, 20, 24 and 27 cts.; Colfax & Steele, one road, 30 cts.; Nelson Cassidy, three roads, 23 and 28 cts.; John Grish, one road, 24 cts.

IMPROVING RIVER.—Rock Island, Ill.—Capt. C. McD. Townsend, U. S. Engr., Rock Island, received the following bids Aug. 30 for constructing dams and shore protection between Dubuque and Le Craire, Ia., for continuing the improvement from the mouth of the Missouri River to St. Paul, Minn., as advertised in Engineering News; John Pickley's bid was recommended for acceptance:

Bidder.	In place		
	Rock, 30,000 cu. yds.	Brush, 37,000 cu. yds.	Total.
John Tibey, Dubuque, Ia.	$0.96	$0.40	$43,600
A. B. Teasdale, Cassville, Wis.	.95	.35	41,450
John Pickley, Dubuque, Ia.	.76	.25¼	32,143
Jacob Richtman, Elsberry, Mo.	.90	.30	38,100
A. Kirchner, Fountain City	.96	.30	39,900
Fetter & Crosby, La Crosse	1.00	.26	39,620
A.J. Whitney, Rock Island, Ill.	1.00	.30	41,100

The following additional bids were recommended for acceptance for improving the Mississippi River from the mouth of the Ohio River to St. Paul, Minn., and for continuing the improvement of the river from the mouth of Missouri River to St. Paul: Dams and shore protections between Rock Island and New Boston, Ill.—Fetter & Crosby, La Crosse, Wis., 32,000 cu. yds. of rock in place, $1.00 a cu. yd.; 32,000 cu. yds. of brush in place, 28 cts. a cu. yd.; dams and shore protections between Reed's Landing and Winona, Minn., and Winona and La Crosse—Jacob Richtman, Elsberry, Mo., 25,000 cu. yds. rock, 90 cts.; 50,000 cu. yds. brush, 30 cts.; between New Boston, Ill., and Burlington, Ia.—Albert Kirchner, Fountain City, Wis., 28,000 cu. yds. rock, $1.00; 25,000 cu. yds. brush, 29 cts.; between Burlington and Montrose, Ia.—Albert Kirchner, 37,000 cu. yds. rock, 91 cts.; 46,000 cu. yds. brush, 26 cts; between Keokuk, Ia., and Quincy, Ill.—Albert Kirchner, 21,000 cu. yds. rock, 95 cts.; 28,000 cu. yds. brush, 27 cts.; between Hamburg, Ill., and Cap au Gris, Mo., and between Cap au Gris and mouth of the Illinois River—James Short, St. Charles, Mo., 30,000 cu. yds. rock, 73 cts.; 60,000 cu. yds. brush, 37 cts.

◆

INDUSTRIAL NOTES.

THE MAYBERRY & WATSON CO., Birmingham, Ala., is reported to have sold 20,000 bbls. of cement to the Alabama Steel & Shipbuilding Co., of the same city, for the construction of its new plant at Ensley, Ala.

THE SHIFFLER BRIDGE CO., Pittsburg, through its eastern office, 45 Broadway, New York, is erecting the steel frame work for the tank house of the Raritan Copper Works, Perth Amboy, N. J. The building is 212 × 307 ft., and will be used for the electrolytic refining of copper. The plant will be the largest in the East, it is claimed.

MR. GEORGE W. KNOPF, Carnegie Bldg., Pittsburg, consulting and contracting engineer, is erecting a steel boiler house, 133 ft. long, and a steel power house, 82 ft. long, for the Pittsburg Plate Glass Co., to be used in connection with its recent extensive additions at Ford City, Pa. Both buildings have side walls of brick and are roofed with slate. He is also erecting the structural steel in a five-story store building for Rosenbaum Bros., Cumberland, Md., the material for which was manufactured by Jones & Laughlins, Ltd.

ABENDROTH & ROOT MFG. CO., 28 Cliff St., New York, has sold 35 carloads of its Root's spiral riveted pipe to the city of Paris, Tex., at a cost of about $40,000. The company reports that recent contracts have also been received from Kewanna, Ind.; Mokena, Ill.; Augusta and Blair, Wis.; Alden, Buffalo Centre, Colfax, Minden, New Sharon and Oxford Junction, Iowa; Herman, Neb.; Siloam Springs, Ark.; Milan and Slater, Mo. The pipe is made from 4-in. to 24-in. diameter and will stand pressures from 500 to 1,200 lbs. a sq. in. It has been in use for ten years at Eagle River, Wis.; for 18 years at Lexington, Mo.; and for 26 years at Rochester, N. Y.

THE VULCAN IRON WORKS CO., Toledo, O., reports that it has recently sold two more large "Giant" B, Special 75-ton steam shovels to be used on the Massena Canal, at Massena, N. Y. Also a 55-ton "Giant" B steam shovel to go to Sweden. This shovel is bolted instead of being riveted, in order that it may be transported and is to be used in iron mines, the purchaser having seen the shovels at work in the Messabe country, Michigan. The company further states that it has had an immense business this year, and that had it not been that previous indications caused a stocking up it would have been unable to fill the orders received. Good business during the entire year is indicated by present conditions.

THE ASSOCIATED EXPANDED METAL COMPANIES of the United States held their semi-annual meeting in Boston Aug. 30 and 31. There were representatives present from 11 companies, in addition to those from the Canadian company. Mr. John F. Golding, the inventor, who was also present, is interested in the English company, which controls the business throughout Europe by means of six distinct companies in France, Belgium, Germany, Austria, Russia and Italy. The proceedings of the Boston meeting were largely routine, and a special committee, which is to compile and issue a revised and enlarged catalogue, was appointed. All the companies reported satisfactory conditions in all branches, notwithstanding the dull period of the last six months. The delegates were entertained by the Eastern Expanded Metal Co., of Boston, including a lecture and entertainment at the Exchange Club on Aug. 30, followed by a collation, at which there were present nearly 100 architects and engineers of Boston and New England. Mr. Merrill Watson is Secretary of the associated companies.

THE AMERICAN WOOD PRESERVING CO., Philadelphia, Pa., has recently received an order for about 1,100 gallons of its preservative Woodiline from the New York Central & Hudson River R. R. Co In November, 1897, a small quantity of the compound was used by the latter company for the treatment of wooden signal boxes as an experiment. The Queen & Crescent Co. placed an order in July, 1896, for 800 gallons of Woodiline for use on white oak ties and bridge timbers over the Cumberland River, at Burnside, Ky. This company has also just placed another larger order for the preservative. An important eastern railway company, we are informed, has had since Jan. 1, 1898, over 7,500 gallons of Woodiline. The Boston Elevated R.R.Co.has placed an order for over 2,000 galls. in the same time. The Bangor & Aroostook R. R. has recently duplicated its order of two years ago and the Richmond, Fredericksburg & Potomac R. R., the Cumberland Valley R. R., the Northern Central Ry. and others, having been early experimenters with Woodiline, are now regular users of the compound, which seems able to demonstrate its value as an inexpensive wood preservative wherever it is used. The officers of the company are, Mr. Frederick S. Hovey, Pres., and Mr. J. J. Hovey, Secy. and Treas.

THE WESTINGHOUSE ELECTRIC & MFG. CO., Pittsburg, has the contract to build the plant of the Snoqualmie Falls, Wash., involving the tranmission of 10,000 HP. a distance of 45 miles, without other than normal losses in the dynamos, transformers and over the line. The power station is to be located at Snoqualmie Falls, 45 miles from Tacoma, and 31 miles from Seattle, to which places the current is to be transmitted and there utilized by Westinghouse motors. The contract involves the installation at the above points, of four three-phase rotary-armature dynamos, having a normal aggregate capacity of 6,000 K-W., and which are to be direct-connected to water-wheels; two 75-K-W. exciter dynamos also to be direct connected to water-wheels; high and low potential switchboards for the main power station and sub-stations at Seattle and Tacoma, involving 76 marble panels with all necessary instruments, switches, etc.; high tension oil insulated static transformers having an aggregate capacity of 10,875 K-W.; rotary transformers with a total output of 2,700 K-W. and 6 type "C" motors developing 1,600 HP., with adequate lightning protection at both ends of the line. These machines when installed will make available for industrial, railway and lighting purposes the power of Snoqualmie Falls. The line potential will be 25,000 volts, and its current will be carried over bare aluminum wires to sub-stations where lowering transformers will sufficiently reduce the voltage for safe transmission within the limits of the cities.

NEW COMPANIES. — City Refuse Utilization Co., 60 Grand St., Jersey City, N. J.; to remove and utilize refuse; $50,000, with $1,000 paid in; Herbert Tate, 60 Grand St., William W. Gooch, Henry W. Meen.

National Motor Co., St. Louis, Mo.; $100,000; H. H. Henigen, O. D. Harris, L. A. Allard and William P. Larew.

Turbine Motor Co., 24 Morris St., Jersey City, N. J.; $100,000, commencing with $1,000; to manufacture all kinds of engines, boilers, machines, etc.; Louis J. Auerbacher, 157 Grand St.; J. C. Stines, 24 Morris St.; Orville R. Van Vechten, 24 Morris St., all of Jersey City.

Standard Drop-Forging Co., Boonton, N. J.; $10,000, commencing with $1,000; to conduct a general business of drop-forging, etc.; Dickinson W. Richards, Orange, N. J.; Frank O. Affeld, Jr., Brooklyn, N. Y.; Thos. G. Boone, Boonton.

Chicago Vapor Light Co., Chicago, Ill.; $1,000,000, commencing with $100; to manufacture incandescent gas machines and apparatuses; T. M. Moe, R. P. Benedict, W .R. Hanze, W. H. Woodron and G. H. Powell, all of Chicago.

Atlas Elevator Co., Minneapolis, Minn.; $500,000, commencing with $5,000; to operate grain elevators, warehouses, etc.; A. G. Moritz, C. M. Harrington, F. C. Van Dusen, Gustav F. Ewe and Frank M. Mann, all of Winona, Minn.

War Munition Co., Cleveland O.; $1,000,000, commencing with $50; to manufacture powder, projectiles, etc.; E. G. Sherlin, C. A. Sherlin, W. E. Irish, H. H. Anderson and B. Davenport, all of Cleveland.

Operating & Investment Co., Philadelphia, Pa.; $2,000,000, commencing with $500; to equip and own railways, boilers, machinery, etc.; T. L. Mattson, Henry Morris, G. H. Millet, Howland Coit and E. A. Moore, all of Philadelphia.

Union Terminal Coal Storage Co., Claremont, Baltimore, Md.; $500,000, commencing with $500; to conduct a cold storage business; D. B. Martin, E. F. Cook, Henry Lammertz, J. J. Martin and F. R. Shattuck, all of Philadelphia, Pa.

Porto Rico Commercial Co., 60 Grand St., Jersey City, N. J.; $500,000, commencing with $1,000; to do a general shipping and commission business, and to build docks, piers, etc.; Wm. D. Martin, Felix B. Ruthenburg and Isaac W. Taussig, all of New York; Allan L. McDermott, Jersey City.

West India Land & Trading Co., 60 Grand St., Jersey City, N. J.; $25,000, commencing with $2,500; Benjamin W. Morrill, East Orange, N.J.; John Farr and Geo. C. Kobbé, Short Hills, N. J.

Adam Weber Co., Crow's Mills Lane, Weber, N. J.; $150,000, with all paid in; to manufacture clay retorts, fire brick, etc.; Adam Weber, Oscar B. Weber, Albert J. Weber, Chas. C. Weber, and Adolph Ehrenzeller, all of Weber, N. J.

Heckert & Ballztey Hollow Axle Co., 76 Montgomery St., Jersey City, N. J.; $1,000,000, commencing with $1,000; to manufacture and sell steel and iron; John McIntyre, Jersey City, N. J.; Edwin Ballztey, Glen Echo, Md.; William Heckert, Wm. H. Wallace and Geo. B. Hibbard, all of New York.

National Motor Carriage Co., $500,000; Arthur S. Winslow and Thomas D. Merrigan, of New York; Charles W. Parker, of Jersey City, N. J.

Broadhead Contracting Co., Newark, N. J.; $125,000, commencing with $1,000; to do a general contracting business; A. D. Brodhead, Elizabeth, N. J.; Jas. E. Brodhead, Flemington, N. J.; Calvin E. Brodhead, Jr., Perth Amboy, N. J.; Charles Holzhauer, Newark, N. J.; Fred J. Faulks, Newark, N. J.

Citizens' Telephone Co., Spartanburg, S. C.; $8,900; Pres., W. H. Clarke; Mgr. and Treas., C. E. Fleming; Directors, J. H. Montgomery, D. E. Converse, W. H. Clarke, R. H. F. Chapman, John W. Simpson, H. B. Carlisle, B. F. Shockley, John W. Floyd and C. E. Fleming.

Esmond Electric Traction & Signal Co., New York; to build, equip and maintain railways and signals and signal stations and furnish electric heat, light and power; D. M. Maxon, G. E. Cruse, C. S. Jones, D. A. Davies and R. H. E. Starr, all of New York.

WATER SUPPLY AND STREET LIGHTING.

The Town of Cobourg, Ontario, Canada, will receive separate tenders addressed to John Purser, Chairman of the Fire, Water and Light Committee, until 12 noon of the 31st day of October next:

1st.—For the supply of water for fire protection and public use, and,

2d.—For lighting the streets of the Town.

For particulars address the undersigned,

D. H. MINAKER,
Town Clerk.

Cobourg, Ont., Aug. 30, 1898. 36-8t

U. S. ENGINEER OFFICE, Mobile, Ala., September 5, 1898.—Proposals for construction of SHORE PROTECTION at Fort Morgan, Ala., will be received until 12 m., Oct. 5, 1898, and then opened. Information furnished on application. WM. T. ROSSEL, Maj., Engrs. 36-4t

---

RAILWAY GRADING.

PETERSBURG RAIL ROAD COMPANY,
ENGINEER'S OFFICE.
RICHMOND, VA., Sept. 3, 1898.

Sealed proposals will be received at the Engineer's Office, Byrd Street Station, Richmond, Va., to be opened the 16TH INST., at noon, for the Graduation of a line about ten miles in length, beginning about two miles south of Petersburg, Va., and running southerly in proximity to the existing railroad.

Profile and specifications may be seen and other information had at the office of the Petersburg Railroad in Petersburg, Va., or at the Engineer's Office, at Byrd Street Station, Richmond, after THURSDAY, THE 8TH INST.

The company reserves the right to reject any and all bids.

E. T. D. MYERS,
Chief Engineer.

36-1t

IMPROVING BLEECKER RESERVOIR.

ALBANY CITY WATER-WORKS.
OFFICE OF THE SUPERINTENDENT.

Sealed proposals will be received by the Board of Water Commissioners, at their office in the City of Albany, N. Y., until Tuesday, September 20th, at 11 o'clock a. m. of that day, for Improving Bleecker Reservoir, consisting of a concrete division wall, cleaning out reservoir and laying distributing pipes.

All bids must be enclosed in a sealed envelope and delivered to said Board at its meeting held at the time and place aforesaid, at which time and place bids will be publicly opened and read, and the award of the contract made as soon thereafter as practicable.

Every proposal for the work must be accompanied by a draft or certified check in the sum of $2,000, issued by a bank in good credit within this state, payable at sight to the Chamberlain of the City of Albany. The amount of bond required on execution of contract for its faithful performance and execution will be $15,000.

The work shall be commenced within one week after signing the contract, and be completed on or before February 1, 1899.

The person or persons to whom the work may be awarded will be required to execute the contract with the required surety within ten days of the date of the award.

Plans may be seen and specifications, form of proposal, bond and contract obtained at this office.

The right is reserved to reject any or all bids.

GEORGE I. BAILEY,
Superintendent.

Dated Albany, N. Y., Sept. 6, 1898. 36-1t

PERSONAL.

Mr. Charles Blucher, civil engineer, of Butte City, Mont., was married Sept. 6 to Miss Nellie Ward, of Bethlehem, Pa.

Mr. J. L. Sterritt has been appointed Superintendent of Streets of Sing Sing, N. Y., to succeed Mr. Edgar F. Wheeler.

Mr. G. M. Briggs, civil engineer and surveyor, has opened an office in the Farmers' and Manufacturers' Bank Building, Poughkeepsie, N. Y.

Mr. W. M. Leftwich, Jr., has been appointed City Engineer of Nashville, Tenn., to succeed Mr. W. W. Southgate. Mr. Felix Smith has been appointed Assistant City Engineer.

Capt. Charles Meyer, City Engineer, of Hoboken, N. J., is dangerously ill with typhoid fever, contracted at Camp Thomas, Chickamauga Park, Ga. He is an officer in the 9th Regt., U. S. Volunteers.

Gen. Peter C. Hains, M. Am. Soc. C. E., Corps of Engineers, U. S. Army, of Baltimore, Md., has returned from Porto Rico and will at once resume his duties as a member of the Nicaragua Canal Commission.

Mr. W. M. Scanlon, who was formerly with the Lee Construction Co., New York city, builders of fireproof floors, is now Superintendent for the firm of Thompson & Adams, builders, Townsend Building, New York city.

Mr. James T. Taylor, M. Am. Soc. C. E., has resigned his position as Chief Engineer of the Pecos Irrigation & Improvement Co., Eddy, N. Mex., and has accepted the position of Chief Engineer of the Honolulu Sugar Co., with offices at Honolulu, H. I.

Mr. William R. Hill, M. Am. Soc. C. E., Chief Engineer and Superintendent of the Water Department, of Syracuse, N. Y., has been appointed as one of the appraisers of the plant of the Fulton Water-Works Co., Fulton, N. Y., which the latter city proposes to purchase.

Mr. J. R. C. Wrenshall, Supervisor of Road, of the Baltimore & Ohio R. R., with headquarters at Baltimore, Md., has been appointed Acting Division Engineer of Maintenance of Way, in charge of the Third Division, with headquarters at Cumberland, Md., to succeed Mr. George L. Hall, resigned.

Col. Samuel M. Mansfield, Corps of Engineers, U. S. Army, on duty at Boston, Mass., has been ordered to San Francisco, Cal., to relieve Col. Chas. R. Suter, M. Am. Soc. C. E., Corps. of Engineers, of his duties as a member of the California Debris Commission to regulate hydraulic mining in that state, and also as Division Engineer of the Pacific Division.

Mr. Morgan Brooks, M. Am. Inst. E. E., President and Manager of the Electrical Engineering Co., Minneapolis, Minn., has been appointed Professor of Electrical Engineering in the University of Nebraska, Lincoln, Neb., to succeed Prof. Robert Bowie Owens, M. Am. Inst. E. E., resigned. Prof. Brooks is a graduate of Brown University, Providence, R. I., in the class of 1881, and of the Stevens Institute of Technology, Hoboken, N. J., in the class of 1883. He has delivered lectures to the engineering students of the University of Minnesota. He will also retain his former position.

OBITUARY.

Mr. Henry Hartwick, building contractor, of Green Ridge, Pa., died Sept. 3, aged 68.

Capt. J. H. Gunning, road builder and contractor, of Vicksburg, Tenn., died Sept. 5.

Mr. John Lovett Keeling, contractor and builder, of Baltimore, Md., died Sept. 6, aged 68.

Mr. Hamilton B. Gaylord, builder, of Philadelphia, Pa., died Sept. 11, aged 82. He was at one time Supervisor of Highways of that city.

Mr. Thomas I. George, civil engineer, died at Towson, Md., Sept. 4, aged 56. He was formerly connected with the United States Goedetic Survey.

Mr. James Wilson, contractor, of Allegheny, Pa., was killed Sept. 2 by falling from the tower of Carnegie Library in that city. He was 60 years of age.

Mr. Walter S. Alexander, of St. Paul, Minn., died Sept. 5. He was the first President of the Eastern Ry. of Minnesota, and from Dec. 1, 1890, until the latter part of 1893 he was also the General Manager of that road. Since December, 1895, he had been connected with the Union Pacific as Assistant to the Master-in-Chancery, in charge of the receivership cases.

Mr. Daniel H. Johnson, for several years Superintendent of the water-works of Salem, Mass., died at Stamford, Conn., Sept. 7, aged 63. He was also a member of the water board for a number of years.

Mr. James P. Hyde, inventor of sanitary and plumbing devices, died at his home in New York city Sept. 9, aged 63. He is said to have been the inventor of the first wooden hydrant in use in that city.

Judge Thomas M. Cooley, who was for four years Chairman of the first Interstate Commerce Commission, died at his home, Ann Arbor, Mich., Sept. 12. He was born in Attica, N. Y., Jan. 6, 1824, and began the study of law in Palmyra, N. Y., in 1842, removing to Michigan in 1843, where he was admitted to the bar in 1846. He followed his profession there and also edited a newspaper. In 1857 he was assigned the task by the State Senate of compiling the general statutes of that state. In 1858 he was appointed Reporter for the Supreme Court of the state, and held that office seven years, during which time he published eight volumes of reports and a digest of all the state decisions. In 1859 he was appointed a professor in the law department of the University of Michigan, which was organized in that year, and was afterwards Dean of the Faculty for many years. In 1864 he was elected to fill a vacancy in the state Supreme Court, and in 1868 and 1869 was Chief Justice. In 1881 he was made Professor of Constitutional and Administrative Law in the School of Political Science of the above-named university, and was Dean of this latter school, as well as Professor of American History in the university. In 1887 he was appointed Receiver of the Wabash R. R., but soon resigned the position to accept the appointment by President Cleveland as Chairman of the first Interstate Commerce Commission. He held the position until 1891, when ill health, resulting from overwork, compelled his resignation. Judge Cooley was an able and voluminous writer on legal subjects, and one of the highest authorities on constitutional law.

Oct. 19-21. Annual meeting, Niagara Falls, N. Y. Secy., Alfred E. Forstall, Montclair, N. J.
ENGINEERS' CLUB OF CINCINNATI.
Oct. 20. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.
NEW YORK RAILROAD CLUB.
Oct. 20. Secy., W. W. Wheatley, 168 Montague St., Brooklyn, N. Y.
SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Oct. 20. Secy., F. A. Charpiot, P. O. Box 13, Savannah, Ga.
AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENT.
Oct. 26-28. Annual meeting, Washington, D. C. Secy., D. L. Fulton, Bureau of Highways and Sewers, Allegheny, Pa.

AMERICAN GAS LIGHT ASSOCIATION.—The annual meeting of this association will be held Oct. 19-21 at Niagara Falls. The following papers will be presented: "The Effect of the Depth of Fire Upon the Practical Efficiency of a Water-Gas Generator," Mr. J. M. Rusby, Jersey City, N. J.; "Notes on Mains and Main Laying," Walton Forstall, Philadelphia, Pa.; "The Loss of Illuminating Power of 25 to 30 Candle Gas when Mixed with Air," Dr. E. G. Love, New York, N. Y.; "A Comparison Between the Cost of Pumping Gas by Steam and Gas Engines," Mr. H. L. Rice, Norfolk, Va. Papers will also be read by Mr. E. C. Jones, San Francisco, Cal., and Mr. Irvin Butterworth, Columbus, Ohio.

NATIONAL IRRIGATION CONGRESS.—The seventh annual meeting was held at Cheyenne, Wyo., commencing on Sept. 1, Hon. Joseph M. Carey presiding. After the transaction of routine business a number of interesting papers were read. Mr. E. S. Nettleton, of Colorado, spoke of the success and failures in canal building and the causes thereof; he mentioned that in 1892 Colorado had 1,500,000 acres irrigated, which yielded crops valued at $22,000,000. The value of the 6,800,000 acres now under irrigation in that state had risen from $17,000,000 to $87,000,000. Mr. F. H. Newall, of the U. S. Coast and Geodetic Survey, presented a paper on the measurement of streams with relation to irrigation; Senator F. E. Warren told of the work being done in Congress for irrigation, and thought that the progress being made was satisfactory under the present appropriation of $50,000 per year; Mr. J. S. Emery, of Kansas, discussed the storage of water, and Mr. Elwood Mead, State Engineer of Wyoming, read a paper upon the obstacles to settlement in the arid regions. Mr. Mead said that there were still about 500,000,000 acres of public land in the West which brought no return in rentals or taxes to either the state or the nation. The greater part of this is arid pasture land and he believed that fully 300,000,000 acres of this land could be leased to stockmen without interfering with irrigable land. A rental of 1 ct. per acre would bring in $3,000,000 annually, which sum could be expended upon reservoirs and canals for permanent development.

AMERICAN PUBLIC HEALTH ASSOCIATION.—The 26th annual meeting of this association will be held at Ottawa, Canada, Sept. 27-30. Secretary C. O. Probst has issued a circular calling attention to the meeting and giving instructions regarding hotel and railway arrangements and including other information. The list of subjects for consideration, to be reported upon by committees, is as follows: "Pollution of Water-Supplies;" "Disposal of Garbage and Refuse;" "Animal Diseases and Animal Food;" "Demography and Statistics in Their Sanitary Relation;" "Car Sanitation;" "Steamship and Steamboat Sanitation;" "The Etiology of Yellow Fever;" "The Relation of Forestry to Public Health;" "The Cause and Prevention of Infectious Diseases;" "Public Health Legislation;" "The Cause and Prevention of Infant Mortality;" "Thansportation of Diseased Tissues by Mail;" "The Period During Which Each Contagious Disease is Transmissible and the Length of Time for Which Each Patient is Dangerous to the Community;" "Sanitation, with Special Reference to Drainage, Plumbing and Ventilation of Public and Private Buildings;" "International Arrangement for Protection Against the Transmission of Infectious Diseases;" "Disinfectants;" "To Examine Into the Existing Sanitary Municipal Organizations of the Countries Belonging to the Association, with a View to Report Upon Those Most Successful in Practical Results;" "The Duties and Responsibilities of the Healthy Man for His Own and Others Health."

NEW PUBLICATIONS.

A QUARTER CENTURY OF PUBLIC HEALTH WORK IN MICHIGAN.—By Theo. R. MacClure, Chief Clerk State Board of Health Office, Lansing, Mich. Paper, 7 × 9 ins.; pp. 48; illustrated. Address Board.

This is a review of the work of the State Board of Health of Michigan from 1873 to 1898. There are a number of photographs of members and ex-members of the board.

OHIO STATE BOARD OF HEALTH.—Report for the Year Ending Oct. 31, 1897. C. O. Probst, M. D., Secretary, Columbus, O. Cloth; 7 × 10 ins.; pp. 308; tables and illustrations. Address the Board.

The detailed work of the Board for the year is given in this report, including special reports on new works for water supply and sewerage. There is also a report on tests of mechanical filters at Lorain, O. most of which was published in Engineering News for Oct. 28, 1897.

AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENTS.—Proceedings of the Fourth Annual Convention, Nashville, Tenn., October, 1897. Secretary, D. L. Fulton, Allegheny, Pa. Paper; 6 × 9 ins.; pp. 336; tables, plates and illustrations in the text.

This volume contains a number of valuable papers and reports on street paving, sprinkling, cleaning and lighting, sewerage, water supply, pipe coatings, assessments for public improvements, electrolysis and other subjects.

COTTON FIRES AND COTTON BALES.—By R. H. Scotter, C. E. Publications of the British Fire Prevention Committee, 1 Waterloo Place, Pall Mall, London. Pamph.; 6 × 9 ins.; pp. 16.

This is a brief account of fires in cotton warehouses in Liverpool, and of different systems of baling cotton. The common "turtle-back" form of American bales is condemned as being the most liable to facilitate the breaking out of fire and its spreading into a conflagration, and the new style of round bale adopted by the American Cotton Co. is claimed to be the safest of all.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins)

WATER WHEELS AND WATER MOTORS.—American Impulse Wheel Co., 120 Liberty St., New York. Pamph., 5¾ × 8½ ins.; pp. 36.

This pamphlet contains illustrations and price lists, etc., of the Cazin impulse wheel for high heads, also of the McCormick turbine for low heads, and the same data for water motors.

PROTECTIVE COATINGS FOR IRON AND STEEL.—W. W. Lawrence & Co., Pittsburg, Pa., and Buffalo, N. Y. Pamph., 5¼ × 6¾ ins.; pp. 15.

This pamphlet contains an interesting discussion of the requirements of a good coating for metal, and advertises the merits of "Permanent Paint No. 2050," and "Asphaltic Bridge Conservative No. 1033."

PAINTING TO PREVENT CORROSION; WITH SPECIFICATIONS. By A. H. Sabin, M. Am. Chem. Soc., M. Am. Soc. M. E., etc., etc. Edward Smith & Co., 45 Broadway, New York. Leather, 3½ × 6 ins.; pp. 80; illustrated. $1.25.

This little book can hardly be called advertising matter in the sense that trade literature ordinarily is. In fact we are informed in the introduction that the greater part of the subject matter was submitted in manuscript to the criticism of numerous prominent engineers, and the contents seem to bear out the statement that unusual care has been taken in other respects to present an unprejudiced scientific treatment of the subject of paints for and the painting of metal work to prevent corrosion. For this reason and because the author has, as is well known, devoted much time to the study of paints for metal work, the book is really a valuable contribution to the literature of the subject. The contents consist of an introductory and somewhat general consideration of the questions of preparing metal surfaces for paint and the best methods of applying the paint itself, which is followed by two sets of specifications, one for the very best character of work and the other for ordinary work. In both cases the author gives, first, the clause of the specification proper and then follows with an explanation of the various reasons for the particular requirements it contains. A different style of type and different colored ink distinguish the specification proper from the explanatory matter. The book closes with a general discussion on the painting of structural work, illustrated by views showing different examples of corrosion on the Washington St. Bridge in Boston, Mass. (Eng. News, Jan. 27, 1898). Scattered through the book are quite a number of illustrations of buildings and other structures whose metal work has been painted with the above company's "durable metal coating," and a separate advertising supplement is devoted particularly to explaining the merits of this and the other paints manufactured by the same firm.

CONSTRUCTION NEWS.

CONDENSED LIST OF CONTRACTS PENDING WITH DATE OF OPENING BIDS.

Bids to be opened.	Work. Place.	See Eng. News.
Sept. 15.	Fire alarm system, Mobile, Ala. Advertised, Eng. News, Aug. 11 to Sept. 1.	Aug. 11
Sept. 15.	Light-house, Tompkinsville (S. I.), N. Y. Advertised Eng. News, Aug. 25 and Sept. 1.	Aug. 25
Sept. 15.	Asphalt paving, Bloomington, Ill.	Sept. 8
Sept. 15.	Stone, cement, etc., New York, N. Y.	Sept. 8
Sept. 15.	Laying water pipe, Boston, Mass. Advertised, Engineering News, Sept. 8.	Sept. 8
Sept. 15.	Sewers, Cleveland, O.	Sept. 8
Sept. 15.	Sidewalks, etc., Niagara Falls, Ont.	Sept. 15
Sept. 15.	Paving, New York, N. Y.	Sept. 15
Sept. 15.	Asphalt paving, Cedar Rapids, Ia.	Sept. 15
Sept. 16.	Fire hose, Saginaw, Mich.	Sept. 15
Sept. 16.	Enlarging garbage plant, Reading, Pa.	Sept. 15
Sept. 16.	Tunnel sewer, Milwaukee, Wis.	Sept. 15
Sept. 16.	Grading, Shelton, Conn.	Sept. 15
Sept. 16.	Macadamizing, Bridgeport, Conn.	Sept. 15
Sept. 16.	Grading, etc., Duluth, Minn.	Sept. 15
Sept. 16.	Sewer, Omaha, Neb.	Sept. 8
Sept. 16.	Asphalt paving, (2 contracts), Omaha, Neb.	Sept. 8
Sept. 16.	Railway grading (10 miles), Petersburg, Va. Advertised, Engineering News, Sept. 8.	Sept. 8
Sept. 16.	Pipe sewers (6 miles), Shelby, O.	Sept. 1
Sept. 16.	Brick and pipe sewer, Richmond, Ind.	Aug. 25
Sept. 16.	Supplies, Norfolk, Va. Advertised Eng. News, Aug. 25 and Sept. 1.	Aug. 25
Sept. 17.	Storm sewer, Mansfield, O.	Aug. 25
Sept. 17.	Brick paving, Watertown, Wis. Advertised, Engineering News, Sept. 1.	Sept. 1
Sept. 17.	Sewers, Washington, D. C. Advertised, Engineering News, Sept. 1.	Sept. 1
Sept. 17.	Electric plant, Duncannon, Pa.	Sept. 8
Sept. 17.	Pig lead, Cleveland, O.	Sept. 8
Sept. 17.	Heating and ventilation, Danville, Ill.	Sept. 8
Sept. 17.	Steam generators, League Island, Pa.	Sept. 15
Sept. 17.	Macadamizing, Rockton, N. Y.	Sept. 15
Sept. 19.	Brick sewer, Jersey City, N. J.	Sept. 15
Sept. 19.	Water-works and sewers, Darlington, Okla.	Sept. 15
Sept. 19.	Paving, flagging, etc., Jersey City, N. J.	Sept. 15
Sept. 19.	Grading, etc., Napa, Cal.	Sept. 15
Sept. 19.	Sidewalks and paving, Syracuse, N. Y.	Sept. 15
Sept. 19.	Brick paving, etc., Patton, Pa.	Sept. 15
Sept. 19.	Brick or stone paving, Grand Forks, N. Dak.	Sept. 15
Sept. 19.	Grading, Alameda, Cal.	Sept. 15
Sept. 19.	Sidewalks, etc., Indianapolis, Ind.	Sept. 15
Sept. 19.	Steel or wooden bridge, Walla Walla, Wash.	Sept. 15
Sept. 19.	Building repairs, Bradford, Pa.	Sept. 15
Sept. 19.	Paving bonds, Youngstown, O.	Sept. 8
Sept. 19.	School building repairs, Rochester, N. Y.	Sept. 8
Sept. 19.	Pipe sewers, Toledo, O.	Sept. 8
Sept. 19.	Heating, Windsor, N. S.	Sept. 8
Sept. 19.	Electric lighting, Portland, Ore.	Sept. 1
Sept. 19.	Jail building, Newport News, Va.	Sept. 1
Sept. 19.	Bridges (2), Newport News, Va.	Sept. 1
Sept. 19.	Heating and ventilating, St. Albans, Vt. Advertised Eng. News, Aug. 25 and Sept. 1.	Aug. 25
Sept. 19.	Hospital plans, San Francisco, Cal.	Aug. 4
Sept. 19.	Jail, Lovelocks, Nev.	Aug. 18
Sept. 19.	Bridge bonds, Los Angeles, Cal.	Aug. 18
Sept. 20.	Viaduct, Cincinnati, O.	Aug. 25
Sept. 20.	Electric light plant, Grand Rapids, Mich. Advertised, Engineering News, Sept. 1.	Sept. 1
Sept. 20.	Highway, Rockville, Md.	Sept. 8
Sept. 20.	Hospital building, Binghamton, N. Y.	Sept. 8
Sept. 20.	Building work, Brooklyn, N. Y.	Sept. 15
Sept. 20.	Pipe sewers, Troy, N. Y.	Sept. 15
Sept. 20.	Pipe sewers, Crafton, Pa.	Sept. 15
Sept. 20.	Sewer pipe, Schuyler, Neb.	Sept. 15
Sept. 20.	Water bonds, Strasburg, Pa.	Sept. 15
Sept. 20.	Grading, paving, etc., Schenectady, N. Y.	Sept. 15
Sept. 20.	Asphalt paving, Long Island City, N. Y.	Sept. 15
Sept. 20.	Steel jail, Dunkirk, N. Y.	Sept. 15
Sept. 20.	Brick sidewalks, Kansas City, Mo.	Sept. 15
Sept. 20.	Court house repairs, Charleston, Ill.	Seut. 15
Sept. 21.	Rotary nozzles, New York, N. Y.	Sept. 15
Sept. 21.	School bonds, ($8,000), Leroy, N. Y.	Sept. 15
Sept. 21.	Repairing sewers, Wildwood, N. J.	Sept. 15
Sept. 21.	Water-works, McComb, Miss.	Sept. 15
Sept. 21.	Incandescent lamps, Chicago, Ill.	Sept. 15
Sept. 21.	School building, New Brunswick, N. J.	Sept. 8
Sept. 21.	Water-works, Bristol, Va.	Sept. 1
Sept. 21.	Canal, Chicago, Ill. Advertised, Aug. 25 to Sept. 15.	Aug. 25
Sept. 22.	Hospital buildings, etc., Central Islip, N.Y.	Sept. 1
Sept. 22.	Electrical apparatus, Central Islip, N.Y.	Sept. 1
Sept. 22.	Power plant, Wrightsville, Pa. Advertised, Eng. News, Sept. 8 and 15.	Sept. 8
Sept. 22.	Bridge bonds, Elyria, O.	Sept. 8
Sept. 22.	Levee work, New Orleans, La.	Sept. 8
Sept. 22.	Stone jetties, Green Harbor, Mass. Advertised, Eng. News, Sept. 8 and 15.	Sept. 8
Sept. 22.	Barge, Biloxi, Miss.	Sept. 15
Sept. 22.	Heating, Ogdensburg, N. Y.	Sept. 15
Sept. 22.	School building, Osceola, Wis.	Sept. 15
Sept. 22.	Piles for bridge, Suffolk, Va.	Sept. 15
Sept. 23.	Sidewalks, Indianapolis, Ind.	Sept. 15
Sept. 23.	Asphalt paving, Omaha, Neb.	Sept. 15
Sept. 23.	Road work, Albany, N. Y.	Sept. 15
Sept. 23.	Asphalt paving, Niagara Falls, N. Y.	Sept. 15
Sept. 23.	Gravel roads, Brownstown, Ind.	Sept. 15
Sept. 23.	Cement walks, North Vernon, Ind.	Sept. 15
Sept. 23.	High-school building, Camden, N. J.	Sept. 8
Sept. 23.	Supplies, Watervliet, N. Y.	Aug. 25
Sept. 24.	Capitol building, Columbus, O.	Sept. 1
Sept. 24.	Electric plant, Pensacola, Fla.	Sept. 1
Sept. 24.	Quay wall, San Francisco, Cal.	Sept. 1
Sept. 24.	School building, Shreveport, La.	Sept. 8
Sept. 24.	Building material, Pine Ridge, S. Dak.	Sept. 8
Sept. 24.	Street bonds, Cambridge, O.	Sept. 15
Sept. 26.	Water pump, Marietta, O.	Sept. 15
Sept. 26.	Electric light plant, Modesto, Cal.	Sept. 15
Sept. 26.	Bridge substructure, Westfield, Mass. Advertised, Engineering News, Sept. 15.	Sept. 15
Sept. 26.	Bonds, Dayton, O.	Aug. 25
Sept. 27.	Municipal building work, Brooklyn, N. Y.	Sept. 15
Sept. 27.	High school building, Burlington, Vt. Advertised, Eng. News, Sept. 15 and 22.	Sept. 15
Sept. 28.	School building, Orange, N. J.	Sept. 15
Sept. 28.	Water-works, Harrisville, N. Y.	Sept. 15
Sept. 28.	Electric light bonds, Coffeyville, Kan.	Sept. 15
Sept. 28.	U. S. building, Brockton, Mass. Advertised, Eng. News, Sept. 1 and 8.	Sept. 1
Sept. 29.	Water-works, Wivenhoe, England.	Sept. 1
Sept. 29.	Court house, Marietta, Ga.	Aug. 18
Sept. 29.	Steel bridge, Durango, Colo.	Sept. 15
Sept. 30.	Storm sewer, Amsterdam, N. Y.	Sept. 15
Sept. 30.	Gravel road (7 miles), Rockville, Ind.	Sept. 15
Sept. 30.	Water bonds, Colton, Cal.	Sept. 15
Sept. 30.	School building, Sheboygan, Wis.	Sept. 15
Sept. 30.	Improving reservoir, Albany, N. Y. Advertised, Engineering News, Sept. 8.	Sept. 8
Sept. 30.	Coal shaft, Latrobe, Pa.	Sept. 8
Oct. 1.	Towboat, St. Louis, Mo.	Sept. 8
Oct. 1.	Arc lighting, Marshfield, Wis.	Aug. 18
Oct. 1.	Monitors (4), Washington, D. C.	July 7
Oct. 1.	School building (equipment), St. Thomas, Ont.	July 7
Oct. 1.	Road roller, Sheboygan, Wis. Advertised, Engineering News, Sept. 1.	Sept. 1
Oct. 1.	Head-race (power plant), Montreal, Que. Advertised, Eng. News, Sept. 1 to 15.	Sept. 1
Oct. 1.	Electric plant, New Richmond, O.	Sept. 15
Oct. 1.	Arc lighting, Huntington, W. Va.	Sept. 15
Oct. 1.	School building, Sitka, Ala.	Sept. 15
Oct. 3.	Block pavement, Toledo, O.	Sept. 15
Oct. 3.	Superstructure and repair, Chillicothe, O.	Sept. 15
Oct. 3.	Street work, Toledo, O.	Sept. 1
Oct. 3.	Building plans, Liverpool, England.	Sept. 8
Oct. 3.	Building superstructure, Philadelphia, Pa. Advertised, Eng. News, Sept. 8 and 15.	Sept. 8
Oct. 3.	Bridge, Flandreau, S. Dak.	Sept. 8
Oct. 4.	Coal conveyors, etc., Chicago, Ill. Advertised, Eng. News. Aug. 25 to Sept. 29.	Aug. 25
Oct. 4.	Bridge, Stockton, Cal.	Sept. 15
Oct. 4.	Brick paving, etc., Norwalk, O.	Sept. 15
Oct. 5.	Granite paving, Cincinnati, O.	Sept. 15
Oct. 5.	Bridge superstructure, Chicago, Ill.	Aug. 11
Oct. 5.	Dredging, Oakland, Cal.	Sept. 8
Oct. 5.	Shore protection, Fort Morgan, Ala. Advertised, Eng. News, Sept. 8 to 29.	Sept. 8
Oct. 10.	Turbine wheels (24), Wrightsville, Pa. Advertised, Eng. News, Sept. 8 and 15.	Sept. 8
Oct. 10.	Trestle, Chehalis, Wash.	Sept. 8
Oct. 10.	Paving, Toledo, O.	Sept. 15
Oct. 12.	Hospital buildings, San Francisco, Cal.	Sept. 15
Oct. 12.	Park bonds, Spokane, Wash.	Sept. 1
Oct. 13.	Hire of dredging plant, Mobile, Ala. Advertised, Eng. News, Sept. 15 to Oct. 6.	Sept. 15
Oct. 14.	Cement walks, North Vernon, Ind.	Sept. 15
Oct. 17.	Gasholder, etc., Edinburgh, Scotland.	Sept. 1
Oct. 21.	Dry dock, Algiers, La.	Sept. 8
Oct. 24.	Markets, etc., Belem, Brazil.	Apr. 28
Oct. 25.	Jetties, Portland, Ore. Advertised, Eng. News, Aug. 25 to Sept. 15.	Aug. 25
Oct. 30.	School building, Chehalis, Wash.	June 16
Oct. 31.	Water supply, Cobourg, Ont. Advertised, Eng. News, Sept. 8 to Oct. 27.	Sept. 8
Oct. 31.	Electric lighting, Cobourg, Ont. Advertised, Eng. News, Sept. 8 to Oct. 27.	Sept. 8
Nov. 1.	Court house, Garner, Ia.	Sept. 8
Dec. 31.	Plans for station, etc., Stockholm, Sweden.	June 23
Jan. 1.	City hall plans, Bridgeport, Conn.	Aug. 18

RAILWAYS.

ARIZONA.—Press reports state that M. Loewenstein and Max Cohn, owners of the King of Arizona mine at Camp Gleason, are making preparations to build a narrow-gage railway from their property to their mill at Mohawk, Ariz., on the Gila River, a distance of 35 miles.

ATCHISON, TOPEKA & SANTA FE.—B. Lantry Sons, Strong City, Kan., inform us that they will continue to supply Santop rock ballast until cold weather sets in for use on this company's main line west of Kansas City. They have been furnishing about 50 carloads a day all summer. ——Reports state that this company has begun the building of a long switch extending three miles east of Mulvane, Kan., to the farm of Ross Stubbs in Sedgwick county, where a rich field of agatite has been found, and for the mining of which a company has been organized and capitalized to the amount of $50,000. W. H. Earl, Res. Engr., Newton, Kan., informs us that this is only a short track running out to proposed cement works.

ATLANTIC & LAKE SUPERIOR.—Reports from Canada state that those interested in the Atlantic & Lake Superior Ry. have succeeded in floating its bonds in England, and the construction of the proposed extension will begin at once. J. M. Shanly, Ch. Engr., New Carlisle, Que.

AVOYELLES.—This company has been chartered, with a capital stock of $150,000, to operate the old St. Louis, Avoyelles & Southwestern Ry., 36 miles in length, and to construct extensions thereto. Pres., W. B. Spencer, New Orleans; Vice-Pres., Nathan G. Pearsall, Marksville, La.

BRANTFORD & WOODSTOCK.—Reports state that a new line will be surveyed from Brantford to Niagara Falls, via Hamilton, Ont., to connect with the Brantford & Woodstock Ry. W. H. Mitchell, of Kingston, Ont., is said to have a contract for ten miles of grading from Woodstock to Burford, work to be finished by Oct. 15.

CANTON, ABERDEEN & NASHVILLE.—First Vice-President Welling; Second Vice-President Harahan, and Engineer G. B. Fitzhugh, all of the Illinois Central Railway, have been authorized by the Secretary of State of Alabama, to receive subscriptions to the amount of $1,000,000, to the capital stock of this proposed railway from Aberdeen, Miss., to Winfield, Ala., a distance of about 100 miles.

CHICAGO, INDIANA & EASTERN.—Fremont Wilson, Ch. Engr., Fairmount, Ind., informs us that construction work is now under way on the extension of this line between Swayzee, Ind., and Fairmount, a distance of 11 miles. Grading has been completed between these points, and track has been laid within five miles of Swayzee. Work will begin on the extension of the line to Converse, about five miles farther, as soon as track has been laid to Swayzee. This company now has ten miles of railway in operation from Fairmount to Matthews, and an extension from Matthews southeasterly to Richmond is contemplated which will make the completed line from Converse to Richmond about 75 miles in length. Pres., Eugene Stewart, 100 Washington St., Chicago, Ill.

CHICAGO, MILWAUKEE & ST. PAUL.—Reports state that this company has a corps of surveyors at work between Lynn and Stanley, Wis., a distance of about 35 miles, preparatory to a possible extension of its line from the present terminus, near Lynn, to Stanley, on the Wisconsin Central Ry. D. J. Whittemore, Ch. Engr., Chicago, Ill.

CHOCTAW, OKLAHOMA & GULF.—It is announced that Pres. Francis I. Gowan, of Philadelphia, has authorized Henry Wood, Gen. Mgr., to organize a new corporation, to be known as the Choctaw & Memphis R. R. Co., to extend this railway from Wister Junction, Ind. Ter., to a connection with the Little Rock & Memphis R. R. at Little Rock, Ark., a distance of about 150 miles. Surveys are now in progress, and work is expected to commence as soon as locations are made. The citizens of Little Rock have been asked to raise $100,000 to aid in the construction of the road. F. A. Molitor, Ch. Engr., South McAlester, Ind. Ter.

COLUMBIA & WESTERN.—Over 2,000 men are now said to be at work on the construction of the Robson & Penticton branch of this railway now in process of construction from Robson to Midway, B. C., a distance of 105 miles. About 25 sub-contractors are at work between Robson and a point 25 miles west of Brooklyn, under the supervision of the general contractors, Mann, Foley Bros. & Larsen. The contract for constructing the bridges has been let to Porter Bros., McArthur & Roberts, and that for getting out the timber and ties for the line, to the Peter Genelle Mill Co., of Naskup, B. C., and McPherson Bros. & Stout. It is said that about 5,000,000 ft. of this lumber will be used. J. W. Stewart, Supt. of Construction; F. P. Gutelius, Acting Ch. Engr, Trail, B. C.

CRYSTAL RIVER.—Reports state that the main line of this railway will be extended from Glenwood Springs to Hotchkiss, Colo., on the north fork of the Gunnison River. From Pitkin county a line will be built to Delta, in order to connect with the Denver & Rio Grande. The capital stock is $100,000 and the incorporators are, J. C. Osgood, A. C. Cass, D. C. Beaman and J. A. Kebler.

DOOLEY SOUTHERN.—About 8 miles of this new line have been completed from Richwood to Pinia, Ga. A further extension of 27 miles to Irvinville is under way. Pres., B. P. O'Neal, Richwood, Ga.

GALESBURG & GREAT EASTERN.—This company was incorporated, Sept. 6, with a capital stock of $250,000, to construct and operate a railway to connect Galesburg and Lacon, via Etherly, Ill. The incorporators and directors are, Henry Harms, Edward J. Harms, Henry J. Harms, Adam Harrer, Albert J. Harms, Willis Smith, John W. Smith, all of Etherly. Twelve miles of the line have already been in operation between Galesburg and Etherly.

GREAT NORTHERN.—Work has been completed on the extension of the East Minnesota branch from Fosston to Deer River, Minn., 98 miles, and from Cloquet, Minn., to the Nemadji River Bridge, 28 miles, thus giving the railway an entrance into Duluth over the Duluth, Superior & Western Ry., which is now under this company's control. A. Guthrie & Co., St. Paul, Minn., were the contractors.

GULF, BEAUMONT & KANSAS CITY.—Jas. F. Weed, Ch. Engr., Beaumont, Tex., writes us that this company is extending its road from Kirbyville to Jefferson, under the charter of the Gulf, Beaumont & Great Northern R. R. The first 10 miles from Kirbyville to Gibraltar is now under construction. The line is located to San Augustine and the location is being rapidly pushed forward from San Augustine to Jefferson, Tex., via Center. The road is chartered from Sabine Pass to Paris, Tex., a distance of 350 miles. It is expected to build at once the 160 miles from Kirbyville to Jefferson, and immediately thereafter the south division from Beaumont to Sabine Pass. From Kirbyville to San Augustine, a distance of 70 miles, the road passes through the virgin pine forests of East Texas, and there will be no competition for any business originating between the Neches and the Sabine rivers. From San Augustine to Jefferson, and on to Paris, the road passes through the richest agriculaural district of Texas. With deep water facilities at Sabine Pass, and in connection with the Gulf, Beaumont & Kansas City Ry., this railway should do an immense business in lumber traffic to the North and export freight to the South. It will connect with the Missouri, Kansas & Texas, the St. Louis & Iron Mountain, the Houston, East and West Texas, and the Texas Pacific railways, between Center and Jefferson.

HOLLY RIVER & ADDISON.—This company was incorporated in West Virginia, Sept. 10, with a capital stock of $600, to construct a steam railway between Palmer Junction, on the West Virginia & Pittsburg R. R., to Addison, W. Va., a distance of from 15 to 20 miles. The incorporators are G. W. Curtis, Sutton, W. Va.; J. M. Marple, Marpleton, W. Va.; Chas. R. Durbin, Grafton, W. Va.; J. H. Brewster, Brewster, W. Va.; J. T. McGraw, Grafton,

HOLSTON VALLEY.—W. T. Neeley, Secy. and Treas., Bristol, Tenn., informs us that this company has not yet made any plans for extending its line to Shady, Tenn. The road is at present operated from Bristol to Big Creek, a distance of 16 miles.

INDIANA, ILLINOIS & IOWA.—Press reports state that it has been decided to extend this line, the original Chicago Outer Belt System, from Streator, Ill., to a point on the Mississippi River, near Keithsburg or Muscatine, Ia., a distance of about 175 miles. Two corps of surveyors are now in the field, and it is expected that construction will soon be commenced; estimated cost, $750,000. D. Nowlan, Engr. Maintenance of Way, Kankakee, Ill.

INDIANA STONE.—The Eureka Lumber Co. is reported to have been awarded the contract for building this proposed branch of the Chicago, Indianapolis & Louisville Ry. from Clear Creek to Harrodsburg, Ind., a distance of ten miles. Work is to begin soon.

LAUREL & NORTHWESTERN.—Governor McLaurin, of Mississippi, Sept. 5, issued a proclamation permitting the organization of this company, which will build a railway through the counties of Jones and Covington. C. C. Miller, of Meridian, Miss., is said to be at the head of the enterprise.

MEXICAN CENTRAL.—Reports state that about 40 miles of track has been laid on the new extension of this line from Jiminez to Parral, Mexico, a distance of about 55 miles. L. Kingman, Ch. Engr., Mexico, Mex.

MIDLAND OF NOVA SCOTIA.—Reports state that construction work on this line, between Windsor and Truro, N. S., is progressing rapidly, and it is expected that the grading of the 40 miles between Windsor and the Shubenacadie River will be completed by the end of next month. The work of grading and constructing a bridge over the St. Croix River will probably be completed this fall, but no rails will be laid until next spring. It is expected to open the line to traffic about the middle of next summer. Pres., William Strachan, Montreal, Que.

MISSISSIPPI VALLEY.—H. A. Schwanecke, Ch. Engr., Marshall, Mo., informs us that no work is at present under way on this new line of railway, but that it is expected to resume the construction this fall. The proposed route is from East St. Louis to Cairo, via East Carondelet, Harrisonville, Prairie du Rocher, Kaskaskia, Chester, Rockwood, Leo Rock, Grand Tower, Gray's Point and Thebes, a distance of 151 miles. The location has been made of the whole line and construction commenced on 23 miles, between Chester and Leo Rock, besides ten miles being graded south of Harrisonville. A large part of the right of way has also been obtained between Grand Tower and East St. Louis. The firms holding the contracts are the Ware Construction Co., the Massachusetts Tie Co., Cahill & Co., and the St. Louis Bridge & Iron Co., all of St. Louis, Mo. Pres., Thos. N. Chase, St. Louis.

NORTHERN OF KANSAS CITY.—This company was incorporated in Missouri Sept. 3, with a capital stock of $125,000, to build and operate a standard gage railway from Trimblo, in Clinton county, to Gower, in Buchanan county, a distance of eleven miles. The incorporators are Robert Gillham, C. A. Braley, J. T. Nolthenius, F. B. Wilcox and B. N. Simpson, all of Kansas City, Mo.

NORTHWEST.—Isaac E. Blake, Pres., 11 Broadway, New York, informs us that contracts will be let immediately for the construction of this proposed railway from Nagle to Oxbow, via Connor Creek, Flickbar and Powder, Ore., a distance of 55 miles. The surveys have been completed and some preliminary work done; a tunnel and several bridges will have to be built. The total issue of $1,100,000 of bonds has been fully and responsibly disposed of. Carlos Gillespie, Ch. Engr., Huntington, Ore.

ONTARIO & RAINY RIVER.—William Heald, Toronto, Ont., is said to have received the contract for constructing the first 20 miles of this railway, which is proposed to connect a point on the Port Arthur, Duluth & Western, 22 miles west of Port Arthur, Ont., and the Manitoba boundary.

OREGON & MISSOURI NORTHERN.—This company was incorporated in Missouri Sept. 3, with a capital stock of $100,000, to construct and operate a railway from a point in Holt county, on the Kansas City, St. Joseph & Council Bluffs R. R., to Oregon, a distance of five miles. The incoroporators are Irving H. Wheatcroft, A. J. Clark, C. B. Holmes, George G. Moore and others, of Sweetwater, Tex., most of whom are connected with the Colorado Valley Ry. Co.

PERU.—Consular reports state that surveys are being made for a railway to be built from Pacasmayo, on the Pacific coast, to the coal district in the province of Hualgayoc, near the summit of the Andes, 121 miles distant, in order to develop the mining district conceded to C. B. Jones in 1892. A line is already in operation from Pacasmayo to Yonan, 41 miles. G. Clinton Gardner, formerly superintendent of the Pennsylvania R. R. and builder of the Mexican National Ry., states that the cost of constructing the line and purchasing the rolling stock should not exceed $3,000,000.

ST. LOUIS & SAN FRANCISCO.—B. Lantry & Son, Strong City, Kan., are furnishing this company with rock ballast.

SIERRA OF CALIFORNIA.—The West Coast Construction Co. is reported to have sub-lèt a portion of the contract for extending this line from Jamestown to Sonora, Cal., 20 miles, to Erickson Bros., of San Francisco. Pres., Prince A. Poniatowski, San Francisco, Cal.

STATESBORO & EGYPT.—This company has been organized in Statesboro, Ga., according to reports, to construct a railway from Statesboro to a connection with the Florida Central & Peninsula R. R., 31 miles distant. W. C. Parker and R. Simmons are among those interested.

WISCONSIN & MICHIGAN.—S. M. Fischer, Pres., Old Colony Bldg., Chicago, Ill., informs us that T. McGrath, of Green Bay, Wis., has been awarded the contract for the construction of an eight-mile extension of this railway north of Fairthorn Junction, as stated in our last issue. Work has begun in clearing the right of way and graders' tools are on the ground. After having located the line farther on, it is expected to let the contract for constructing eight additional miles of line, which will then terminate at Quinnesec, Mich.

STREET AND ELECTRIC RAILWAYS.

LEWISTON, ME.—John A. Jones, Ch. Engr., Lewiston, Brunswick & Bath Electrical R. R. Co., Lewiston, informs us that this new line has been completed, and that regular trips are now being made over the entire route from Lewiston to Brunswick, via Lisbon, Topsham and Bath, a distance of 36 miles, with a branch from Lewiston to Sabatus about six miles in length. Pres., A. L. Shaw, Bath, Me.

DEDHAM, MASS.—W. W. Mitchell, Pres. Norfolk Western St. Ry. Co., Medfield, Mass., informs us that contracts are now being let for constructing this proposed electric line between Medfield and Dedham, via Westwood, a distance of nine miles. Engrs., Hodges & Harrington, 60 State St., Boston Mass.

FITCHBURG, MASS.—The Gardner, Westminster & Fitchburg Ry. Co. was granted a franchise Sept 6 to construct a street railway to the Westminster town line. This company first petitioned the board of aldermen in October, 1896, but has been opposed by the Fitchburg & Westminster Co.

PLYMOUTH, MASS.—It is reported that the directors of the Plymouth & Sandwich St. Ry. Co. have voted to proceed with building operations, and that a committee has been directed to award contracts for construction work as far as White Horse Beach. Engrs., Harriman Bros., 3 Somerset St., Boston. Address D. E. Damon, Plymouth.

WATERTOWN, MASS.—The Newtonville & Watertown St. Ry. Co. has petitioned the selectmen of Watertown for permission to lay an additional track in Main St., from Watertown Square to Beacon Square. The railway runs from Needham to Allston, through Newtonville and Watertown, and is a single track line from Newtonville to Allston.

WEST SPRINGFIELD, MASS.—It is reported that the West Springfield & Agawam Ry. Co. has been organized to build a trolley line to Agawam. Among those interested are, Jesse W. Starr, George A. Hill, M. L. Tourtellotte, W. B. Chandler, Frank S. Rice, H. L. Morton, H. L. Inman and F. M. Robbins, all of West Springfield.

WHITMAN, MASS.—G. H. Peanon, Town Clk., informs us that the Brockton and Whitman electric railway, which it is proposed to build through this place, has all been surveyed. A town meeting will be held Sept. 23 to consider the application of the company for a franchise.

ALBANY, N. Y.—Surveys are said to be in progress by the Albany Ry. Co. for a new belt line to extend through Delaware Ave., from Madison Ave. and then to Grand St. Edgar S. Fassett, Gen. Mgr.

HOOSICK FALLS, N. Y.—The power station of the Bennington & Hoosick Valley Electric Ry., at Hoosick Falls, was wrecked in a storm Sept. 8 causing damage estimated at $3,500. C. B. Story, Gen. Mgr.

NEW HARTFORD, N. Y.—A hearing will be held at the Cottage Hotel, Utica, on Sept. 24 to consider the application of the Utica Belt Line St. R. R. for a franchise to build in the town of New Hartford.

NEW YORK, N. Y.—The work of changing the motive power of the Broadway cable line of the Metropolitan St. Ry. Co., to electricity, was begun Sept. 9 with a force of about 200 men. Pres., H. H. Vreeland.

NYACK, N. Y.—Press reports state that the Nyack Traction Co. was organized at the office of A. B. Wilgus, 36 Wall St., New York, on Sept. 8, and H. C. Howard appointed president. It is said that surveys for the proposed trolley line will soon be started in order to complete the work before winter sets in.

OSWEGO, N. Y.—Reports state that F. H. Tidman, Receiver of the Lake Ontario & Riverside Ry. Co., has been authorized to issue $15,000 in certificates in order to pay for new rails and a portion of the paving in Bridge St.

YONKERS, N. Y.—It is announced that the Yonkers R. R. has been purchased by the Union Ry. Co., and that it is proposed to extend the track through Dobb's Ferry and Irvington to Tarrytown.

ELIZABETH, N. J.—The Elizabeth St. Ry. Co., which operates a horse-car line on East Grand, New Smith and East Jersey Sts., petitioned the council for a franchise Sept. 6 to change the motive power to the overhead trolley system. A hearing on the application will be given on Sept. 24.

EASTON, PA.—Mayor Hartzell vetoed the ordinance Sept. 6 granting permission to the Easton, Palmer & Bethlehem Electric Ry. to enter the city. The line connects Easton with Bethlehem and is almost completed.

PITTSBURG, PA.—The Pittsburg & Birmingham Traction Co. has under consideration the extension of its line to Whitehall, via Becks Run. The residents of Baldwin township ask for a 5-cent fare and promise the company franchises to Castle Shannon, a distance of over five miles. Pres., Harry Moore.

BALTIMORE, MD.—It is reported that the Baltimore & Northern Electric Ry. Co. has awarded the contract for the stringing of additional feed wire to carry the increased power, which the company is to take from the Belt power house of the Baltimore & Ohio R. R., to J. G. White & Co.

PETERSBURG, VA.—The Petersburg Electric St. Ry. will be sold on Nov. 10, by order of the corporation court. About three miles of line are now in operation.

CHIPPEWA FALLS, WIS.—The Chippewa Valley Electric St. Ry. Co. ran its first car in this city Sept. 1. The line being constructed by this company between this city and Eau Claire may be opened about Sept. 15.

DE PERE, WIS.—The Fox River Electric Ry. Co. has asked the council of De Pere for a franchise to extend its line into that city. Receiver, Mitchell Joannes, Green Bay.

LAWRENCE, KAN.—The Lawrence Ry. Co. was incorporated in Kansas Sept. 6 with a capital stock of $250,000, to build a system of electric railway at Lawrence to handle passengers, freight and mail; the entire line will be 9.89 miles in length. The main line will run from Bismark Grove, in North Lawrence, past the Union Pacific depot and over Massachusetts St. out to Haskell institute; with branches from Massachusetts St. to the state university, the Santa Fe depot, Kentucky St., the McCook Athletic Park, to the cemetery, and from Mississippi and Warren Sts. to the university. The directors are, R. W. Ludington, T. J. Sweeney and S. P. Moore, of Lawrence; C. W. Kincaid, William S. Hooper and Frank Kern, of Mattoon, Ill.; W. D. Ewing, Boston, Mass.

CLAYTON, MO.—The St. Louis county court Sept. 3 granted a franchise to the St. Louis & Kirkwood R. R. Co. to construct a cross county connecting line from the Houseman Air Line, at Brentwood, through Clayton to De Hodiamont, to the main line of the St. Louis & Suburban Ry., thus giving a continuous line from Meramec Highlands to Florissant, and providing the Suburban system with three routes from Meramec Highlands, Kirkwood and Webster Groves to the center of St. Louis. Work must be begun within three months after accepting the franchise.

ST. LOUIS, MO.—Press reports state that the St. Louis, Fenton & Southwestern R. R. Co. will be incorporated within a few days in Missouri, with a capital stock of $1,000,000, to construct 44 miles of electric railway from the city limits, at a connection with the St. Louis, Iron Mountain & Southern R. R. and the Southern Electric Ry., through Fenton to Ware. It is said that work will begin this month, and that the third-rail system will be used. Pres., Thos. F. Sneed.

GAINESVILLE, TEX.—J. M. Lindsay, Pres. Gainesville Park St. Ry. Co., Gainesville, informs us that this company, which was incorporated Aug. 23, already has over four miles of line in operation, and that it also has the right of way and authority to build on all of the streets in this city. It is expected to make the present system eight miles in length. J. Bragellon, Ch. Engr.

ALHAMBRA, CAL.—The people of this place are considering a proposition of the Terminal Ry. Co. to extend its main line, when electricity is installed thereon, from South Pasadena to Alhambra, a distance of three miles.

MEXICO CITY, MEXICO.—Reports from Mexico City state that the Federal District St. Ry. Co. of that city has submitted plans for approval for building an electric street car line to the national department of public works. It is said to be the ultimate intention of the company to equip all of its line in the City of Mexico with electricity; the improvement first to be applied to the Guadaloupe & San Angel line, which traverses the most thickly populated part of the city and runs to many suburbs. The principal power house will be located in what is known as the Indianilla district. The relaying of the track for electric traction and the installation of machinery and conduits will require about eighteen months.

ROME, ITALY.—Press reports state that the Italian Meridonial R. R. Co. at Rome, has just resolved upon the construction of an electric railway between Mandela and Subiaco, in the Province of Rome, and that it is proposed to utilize the water power of the Anniera River for the production of the motive power.

ELECTRIC LIGHT AND POWER.

LEWISTON, ME.—Press reports state as follows: A deal has been closed whereby the Androscoggin Water Power Co. delivers to a syndicate, represented by Waldo Pettingill, Rumford Falls, Me., 67,000 acres of wild land in Oxford county for $200,000. H. Plummer, of Lisbon Falls, Me., is agent of the power company.

BAINBRIDGE, N. Y.—C. C. Hovey has been granted a franchise for a plant, according to reports.

CAZENOVIA, N. Y.—Thos. O'Connell, of Cortland, N. Y., and Jno. O'Connell, of Marathon, N. Y., propose to built a plant.

SYRACUSE, N. Y.—Local papers state that the council will probably soon ask for bids for furnishing and installing a plant for the city hall to cost about $2,000. Alderman Segar, Chn. Finance Com., may be addressed.

CAMDEN, N. J.—Thos. Stephen, Arch., 302 Masonic Temple, Camden, is preparing plans, estimates, etc., for a 5-story warehouse and light manufacturing building to cost $25,000, an addition to the Camden high school building, and also for a pen factory, to cost $50,000. These buildings will require pumps, dynamos, engines, boilers and shafting. Mr. Stephen wishes to correspond with manufacturers.

BRADDOCK, PA.—The question of building a municipal plant to cost about $12,000 is being considered; population, 15,000. It is proposed to have the plant light North Braddock and Rankin as well as this city.

LANSDALE, PA.—The council, it is stated, has let the contract for furnishing and installing a plant to the General Electric Co., Schenectady, N. Y. The plant is to be completed in about 80 days.

ST. CLAIR, PA.—The council proposes to purchase a new 100-HP. steel boiler and a 100-ft. smokestack for the plant, according to reports. Chn. Com., C. J. Fame.

BALTIMORE, MD.—Mayor Malster has signed the ordinances authorizing the construction of the proposed system of underground conduits for the electric wires. The city will issue $1,000,000 of 3½% bonds at once for the work. The electrical commission will at once appoint an engineer to prepare plans and specifications and to superintend the construction.

HUNTINGTON, W. VA.—Bids are asked until Oct. 1 for furnishing 75 2,000-c. p. arc lights, according to reports. Cy. Clk., C. T. Taylor.

McADENSVILLE, N. C.—R. G. Love, Gastonia, N. C., proposes to build an electric plant in connection with the new cotton mill about to be built in this place.

COLUMBIA, S. C.—The Granby Cotton Mfg. Co. has increased its capital stock to $800,000, for the purpose of enlarging its mills and also the electric plant.

SPARTANBURG, S. C.—The Whitner Co., Anderson, S. C., has contracted to build a new plant at this place. The plant of the Aetna Light & Power Co., of this city, has been ordered sold, and the sale will take place at once. For further information see our issue of Aug. 11. Vice-Pres., Eliot Norton, 100 Broadway, New York.

OCALA, FLA.—The council is arranging to issue $15,000 in bonds for improving the plant, according to reports.

PENSACOLA, FLA.—Bids are asked until Sept. 24 for installing a light and power plant at the navy yard in this city. The appropriation for the work is $10,000. Mordecai T. Endicott, Chief Bureau Yards and Docks, U. S. N., Washington, D. C.

HOUMA, LA.—Wilson & Jastremski, Houma, have been granted a 15-year franchise. Work on the plant, it is stated, will begin at once.

NEW IBERIA, LA.—A. J. Cammack, Secy. and Attorney, writes us that the election called for Oct. 17 to vote on the question of a plant and water-works will probably be changed to a later date on account of irregularities in securing signatures to the petition. Nothing can be done until after the election. Population, 7,000.

NEW ORLEANS, LA.—Cohn & Ber and T. M. Miller & Co. have applied for franchises to erect plants and to light this city. Miller & Co. purpose to begin the construction before July 1, 1899, and to have $25,000 worth of work completed in one year from that date.

THIBODEAUX, LA.—The question of building a plant by special tax will probably be voted upon at the election in November.

NATCHEZ, MISS.—Maurice Moses, Pres., writes us that bids will be asked about the end of the month for furnishing the materials and for building the proposed plant to be owned by A. & M. Moses. It will be operated by steam, and will have a capacity of 120 2,000-c. p. arc and 2,000 16-c. p. incandescent lights. The Natchez Light, Power & Transit Co. will be incorporated. The entire plant is yet to be purchased. The city has made a contract to take 100 arc lights.

NEW RICHMOND, O.—Bids are asked until Oct. 1 for furnishing and building a plant to be operated by steam. It will have a capacity for 40 2,000-c. p. and 1,000 16-c.

p. lights; estimated cost, (probably with water-works), $30,000. Des. Engr., E. L. Layman, 32 East 3d St., Cincinnati, O.

COLUMBUS, O.—Councilman Beard introduced a resolution Sept. 6 authorizing the council to rescind the contract with the Columbus Electric Light & Power Co. for lighting this city, the arc lights, it is alleged, not being up to the contracted candle power.

NEW ALBANY, IND.—The Light, Heat & Power Co. has been granted permission to build a 2-story brick addition to its power house, according to reports. Mgr., M. Ruthenberg.

DECATUR, MICH.—The council will soon ask for bids for furnishing and building a plant, according to reports.

HOUGHTON, MICH.—The Peninsula Electric Light & Power Co. has increased its capital stock from $150,000 to $200,000. Mgr., L. E. Morgan.

ST. LOUIS, MICH.—As the regularity and sufficiency of the board of public works of this city has been questioned, notice is given that no bids were opened Sept. 9 for building a plant, and that none will be opened Sept. 26 for the purchase of $20,000 of 4% bonds for the work. New proceedings will be commenced as soon as possible toward securing the improvement. Clk., Jno. R. Wilson; Mayor, Parker Merrill.

CHICAGO, ILL.—Bids are asked until Sept 21 for furnishing incandescent lamps for the public library building. Secy, W. B. Wichersham.

GREENUP, ILL.—W. H. Cuningham, Village Clk., writes us that bids were received Sept. 10 for furnishing and building a plant. The specifications were amended so as to entirely cut out the incandescent service, and also modified as regards size of poles, quality of wire. Poles were substituted for arms for supervision of street lights. The bids were as follows:

Bidder.	Original bid.	Amended bid.
Advance Electric Co.*	$3,455	....
Griswold & Kline, Casey, Ill	2,900	$1,950
R. A. Gay, Effingham, Ill	5,600	1,975
Sanborn Electric Co.†	3,565	2,535

*8 W. Market St., Indianapolis. †22 E. Ohio St., Indianapolis.

SALEM, ILL.—T. C. Reed & Co., Chicago, have been awarded the contract, at $9,000, for furnishing the machinery and installing a plant with a capacity of 50 2,000-c. p. arc and 1,500 16-c. p. incandescent lights.

RICHLAND CENTER, WIS.—A committee is reported to have been appointed to investigate the question of putting in a plant. E. R. Stevens may be addressed.

BUFFALO CENTER, IA.—B. S. Wilder, Lake Mills, Ia., is reported as arranging for the immediate construction of a plant.

HARTLEY, IA.—The council is reported as considering the question of building a plant, according to reports.

SEYMOUR, IA.—The question of building a plant and water-works is being considered.

LITTLE FALLS, MINN.—An election will be held Oct. 4 to vote on the question of issuing $60,000 in bonds for a municipal plant and water-works. It is estimated that the plant will cost about $9,500, and that water-works about $40,000.

PERHAM, MINN.—Chas. F. Loweth, 94 East 4th St., St. Paul, has furnished plans for a plant with a capacity for 7 arc and over 300 incandescent lights, and for a water-works system.

WEST SUPERIOR, WIS.—Press reports state that the council has voted to award a city lighting contract to the Superior Water Light & Power Co., the company having agreed to furnish lights at the same price that Wm. Burgess did in his proposition, noted under Contract Prices last week, and which the council previously accepted. The basis for the contract is $80 a light of 2,000-c. p.

WAYNE, NEB.—The John T. Burke Electric Supply Co., Omaha, Neb., has been awarded the contract for furnishing and building a plant.

COFFEYVILLE, KAN.—Bids are asked until Sept. 28 for the purchase of $17,000 of 6% electric light bonds. Cy. Clk., D. S. Elliott.

WICHITA, KAN.—The council has been petitioned to build a municipal plant. The council is having trouble with the Wichita Light, Gas & Power Co., which is reported by local papers as removing its lamps. A new company is said to be figuring on putting in a plant. W. H. Herbig, of the committee, and Councilman Volk may be addressed.

SHELBINA, MO.—This place voted Sept. 6 to issue $5,000 in bonds for extending the plant. Supt., E. P. Weaver.

HENRIETTA, TEX.—A company is being organized to build a plant, according to reports. E. B. Carver may be addressed.

MASON, TEX.—V. M. Loring, Secy. Mason Electric Light Co., writes us that the contract for the plant has been let. It will be operated by steam and will have a capacity for 400 16-c. p. incandescent lights; estimated cost, $5,500. Des. Engr., Wm. G. Schwirth, San. Antonio, Tex.

COLORADO SPRINGS, COLO.—Geo. W. Jackson, of Colorado Springs, has been granted permission to furnish electricity from the water from Pike's Peak for light and power purposes. Z. G. Simmons, Vice-Pres., Manitou & Pike's Peak Ry. Co., may be addressed.

TACOMA, WASH.—C. B. Talbot, Civil Engr., Tacoma, has submitted a proposition to have the city own its plant. Mr. Talbot's scheme is to bring power generated by the south fork of the Puyallup River, which can be made to furnish 7,000 HP. He wants the city to tap the river 26 miles from town, construct a ditch 8 ft. deep and 38 ft. wide for a distance of about 20 miles, to come to an end three miles from Maplewood Springs, where a fall of nearly 300 ft. can be secured. Estimated cost, $100,000.

HEALDSBURG, CAL.—C. H. Pond, Clk., writes us that the following bids were received Aug. 26 for furnishing and building a plant and water-works: California Bridge Co., San Francisco, Cal., $35,400; A. W. Garrett, Healdsburg, city distributory, $24,986; San Francisco Bridge Co., $32,514; James Stanly, $29,640; Williaus Bilser, $29,260; C. D. Vincent, $36,250. The contract for the electric plant was let to Jas. Stanly, San Francisco, and that for the water-works to the San Francisco Bridge Co., San Francisco.

LOS ANGELES, CAL.—It is proposed to enlarge the plant at the Soldiers' Home. Maj. Wm. H. Bonsall, Soldiers' Home, Cal., may be addressed.

MODESTO, CAL.—Bids are asked by the clerk of the board of trustees until Sept. 26 for furnishing a plant in connection with the water-works.

SANTA ANA, CAL.—A company has been organized to build a plant in this city at a cost of about $15,000.

WILLIAMS, ARIZ.—It is stated that the council will build a plant in this place at once.

HAMILTON, ONT.—The council has engaged Percy Domville, Elect. Engr., Hamilton, to make a complete report upon the cost of installing a municipal electric light and power plant capable of providing 400 arc lights of 2,000-c. p. and 3,000 incandescent lights of 16-c. p., with provision for enlargement to meet the city's requirements for the next 20 years. The report is to include an estimate of the annual cost of operation. S. H. Kent, Asst. Cy. Clk.

BRUSSELS, BELGIUM.—Geo. W. Roosevelt, U. S. Consul at Brussels, states in a report that in view of the increased use of electricity in this country there is a good opportunity for the introduction of American electric apparatus.

NEW COMPANIES.—Santa Anna Water Power Co., Gonzales, Texas; $5,000; to construct a dam across the Guadalupe River and to utilize and control the water power created thereby: R. S. Dilworth, F. R. Starr, Jr., C. T. Rather, G. W. Betts, J. W. Nixon.

BRIDGES.

BOSTON, MASS.—A contract has been awarded to Woodbury & Leighton, at $15,795, for the Boston approach to the Charlestown bridge.

WESTFIELD, MASS.—Bids are asked until Sept. 26 for constructing the abutments, retaining walls and foundations for the new bridge over Little River, at Main St., as described in our advertising columns. O. A. Granger, Chn. Com.; O. E. Parks, Town Engr.

SUFFOLK, VA.—Bids are asked until Sept. 22 for furnishing and driving 36 cypress piles at the bridge across Nansemona River. R. R. Smith, Clk.

WELDON, N. C.—The Atlantic Coast Line has decided to construct a steel bridge across the Roanoke River, near this place. G. Gardner, Ch. Engr., Wilmington, N. C.

AUGUSTA, GA.—The South Carolina & Georgia R. R., the Charlotte, Columbia & Augusta, and the Florida Central & Peninsular R. R. have had a number of bridges destroyed by storms.

MACON, GA.—An iron bridge is to be constructed over the Ocmulgee River, on Fifth St. Address Mayor Price.

HAZLEHURST, MISS.—The county supervisors have voted to build at once two iron bridges over the Pearl River, one to be located at Rockport and one at Georgetown. The supervisors of Simpson county have appropriated $2,500 toward the Georgetown bridge.

CHILLICOTHE, O.—Bids are asked until Oct. 3 for a superstructure of two spans, 242 ft. long each, and for the repair of a 154-ft. span. A. W. Jones, County Engr.; H. S. Adams, County Audr.

COSHOCTON, O.—The county commissioners have decided to build a bridge across the Walhonding River, in Bethlehem township. A hearing will be given Sept. 26. Newton Speckman, County Audr.

DETROIT, MICH.—The board of public works has decided to construct overhead footwalks on the Belle Isle bridge, at an estimated cost of $15,000.

CHICAGO, ILL.—We are informed that a contract has been let to Roemheld & Gallery, at $10,000, for removing and placing three spans of the 61st St. viaduct, at three streets over the upper north branch of the Chicago River. A. G. Riter, Cy. Bridge Engr.

EAU CLAIRE, WIS.—The city has voted in favor of issuing $40,000 in bonds for the construction of the new bridge over the Chippewa River, at Kelsey St.

DES MOINES, IA.—Alderman Hall is preparing plans for a brick and masonry bridge of five arches, over the Des Moines River, on North Bluff St. The work will be done by local labor, according to reports.

DULUTH, MINN.—The Duluth, Missabe & Northern Ry. Co. has awarded a contract to the Wisconsin Bridge & Iron Co., Milwaukee, Wis., for a bridge 400 ft. long, including approaches with a Warren truss span of 165 ft., over the Cloquet River. A steel bridge will be constructed over the Duluth incline road in West Duluth, to take the place of the present trestle. It will consist of two spans of 50 ft. each. The contract has not yet been let. C. H. Martz, Ch. Engr., Duluth.

WICHITA, KAN.—Reports state that a bridge is to be constructed across the Chickasaw River, near Pouca City.

OMAHA, NEB.—The question of repairing the L and Q St. viaducts, at a cost of about $3,000, is being considered by the railways, according to report. Address City Engineer Beal, or Chief Engineer King of the Stock Yards Co.——The Stock Yards Co. has awarded C. E. H. Campbell, Council Bluffs, Ia., a contract to construct a viaduct 700 ft. long, having a capacity of 300 lbs. per sq. ft., at a cost of about $10,000.——The council has taken steps toward the construction of the new 16th St. viaduct, to be erected by the railway companies.

WATERLOO, NEB.—The county commissioners, Omaha, received the lowest bid from J. R. Sheeley & Co., Lincoln, at $2,800, for a 150-ft. steel bridge over the Elkhorn River.

ST. JOSEPH, MO.—The council committee has accepted plans for the new South 6th St. viaduct, which will be constructed by the city and the railroads; estimated cost, $32,500. J. R. Rackliffe, Cy. Engr.——The plans for the viaduct to be constructed by the Chicago Great Western Ry. Co. on Grand Ave., have been submitted to the council, the structure will be 600 ft. long, with a center span of 170 ft.; estimated cost, $15,000. H. Fernstrom, Ch. Engr., St. Paul, Minn.

DURANGO, COLO.—Bids are asked until Sept. 29 for a steel bridge over the Animas River, according to reports. George Weaver, County Clk.

WALLA WALLA, WASH.—Bids are asked until Sept. 19 for constructing a wooden or steel bridge across Mill Creek, at Fourth St. C. W. McLean, Cy. Clk.

LOS ANGELES, CAL.—Street Superintendent Finch has estimated that it will cost $1,200 to replank the Victoria Bridge, which is 600 × 30 ft.

STOCKTON, CAL.—Bids are asked by the county supervisors until Oct. 4 for building a steel bridge across Calaveras River on the Jack Tone Road. County Surv., Geo. A. Atherton, Stockton.

QUEBEC, QUE.—Press reports state as follows: At a meeting of the Quebec Bridge Co. Sept. 9, it was decided to at once call for bids for the construction of the bridge, which is estimated to cost from $3,000,000 to $4,000,000. The amount of capital so far subscribed is $286,000. The report states that the Dominion Government has given assurances that a subsidy of 33⅓% on the cost of the enterprise would be voted at the next session of Parliament. It is expected that the Province of Quebec and the city of Quebec between them will vote subsidies amounting together to another third of the cost, and the balance of the cost will be met by issuing bonds.

ROBSON, B. C.—On account of the death of Mr. Matthew, of Matthew & Keith, the contract for the bridge construction on the Robson-Penticton branch of the Columbia & Western Ry., has been reawarded to Porter Bros. and McArthur & Roberts.

BUILDINGS.

LIVERMORE FALLS, ME.—A fire in this town, Sept. 10, destroyed a large part of the business section, causing a reported loss of about $60,000.

BURLINGTON, VT.—Bids are asked by the school commissioners until Sept. 27 for the construction of a new high school building, as stated in our advertising columns. Supt., H. O. Wheeler; Arch., W. R. B. Wilcox, of Burlington.

BOSTON, MASS.—W. S. Sampson & Son, Boston, and G. A. Cahill, were the lowest bidders, Sept. 6, for erecting schools in South Boston and West Roxbury, at $36,600 and $29,515, respectively.

NEWPORT, R. I.—The Ocean House, on Bellevue Ave., was damaged by fire, Sept. 9, causing an estimated loss of about $90,000; insurance, $30,000. Owner, Henry J. Barbey, New York.

BROOKLYN, N. Y.—Bids are asked by the department of public buildings, lighting and supplies, at 346 Broadway, New York, until Sept. 20, for the work and material necessary to complete the alterations and entire furnishing of the room on the south side of hall, top story, of the City Hall, Borough of Brooklyn; also until Sept. 27, for materials and work required for certain repairs and alterations to the municipal building of the Borough of Brooklyn; Archs., Horgan & Slattery, 1 Madson Ave., New York.——Plans have been prepared, according to reports, for two 4-story brick and stone dwellings, at Carroll St. and Prospect Park West, to cost $48,000. Owner, S. Goodstein, 279 Bridge St., Brooklyn; Arch., Montrose W. Morris, 45 Exchange Place, New York.

DUNKIRK, N. Y.—Bids are asked by the council until Sept. 23 for erecting a new steel jail.

ITHACA, N. Y.—Col. Oliver H. Payne is reported to have made a gift of $1,500,000 to Cornell University in order to establish a new medical college.

LEROY, N. Y.—Bids are asked by the board of education until Sept. 21 for the purchase of $8,000 of school bonds. Clk., Harry H. Falkner.

NEW YORK, N. Y.—Plans are being prepared for a 5-story fireproof stone residence, 35 × 80 ft., to be erected on 79th St., between 5th and Madison Aves., to cost about $125,000. Arch., C. P. H. Gilbert, 1123 Broadway.——Plans are being revised, according to reports, for the new addition to be built for the Catholic Protectory at Van Nest, to cost about $30,000. Archs., Farnsworth & Miller, 111 Nassau St.——Plans have been filed by John Heller, 24 Greenwich Ave., for two 5-story brick flat buildings at 135th St. and Willis Ave., to cost $69,000. Arch., H. T. Howell, 748 East 138th St.; by Ed. C. Edwards, 952 Bergen St., for a 6-story brick warehouse at West Broadway and Prince St., to cost $70,000. Arch., Franklin Baylies, Bible House; by Leith & Glenn, for two 6-story brick flat buildings on 92d St., near the Boulevard, to cost $75,000. Archs, Neville & Bagge, 217 West 125th St.; by John McSweeney, 241 West 103d St., for three 5-story brick and stone flat and store buildings at 125th St. and the Boulevard, to cost $90,000. Archs., Jones & Leo, 967 Boulevard; by Ernest R. and Clarence J. Lawson, 898 West End Ave., for a 6-story brick flat building on 117th St., near Manhattan Ave., to cost $100,000. Arch., G. Fred. Pelham, 503 5th Ave.; by James Livingston, 8 West 91st St., for six 4-story brick dwellings on 103d St., near West End Ave., to cost $120,000, and by Jas. Kilpatrick for two 6-story brick flat buildings on 95th St., near Amsterdam Ave., to cost $120,000. Archs., Neville & Bagge, 217 West 125th St.; by Meyer Beyer, 748 East 138th St., for four 4-story brick flat buildings on 140th St., near St. Ann's Ave., to cost $72,000. Arch., Harry T. Howell; by Louis Perelstein, 96 Monroe St., for a 6-story brick flat and store building at Oak and Monroe Sts., to cost $50,000. Archs., Horenberger & Straub, 122 Bowery; by C. F. Miller, 35 Wall St., for a 6-story brick and stone office and studio building at 564 to 568 5th Ave., to cost $185,000. Arch., C. P. H. Gilbert; by F. W. Gill, 217 Keap St., Brooklyn, N. Y., for two 6-story brick flat buildings at 92d St. and Central Park West, to cost $155,000. Arch., G. W. Spitzer, 156 5th Ave.; by the Riverside Building Co., for six 6-story brick and stone dwellings, at 83d St. and Riverside Drive, to cost $150,000. Arch., C. W. True, 459 Boulevard; by Lorenz F. J. Weiher, Jr., Owner and Arch., 125th St. and Park Ave., for four 5-story brick flat buildings at 150th St. and Brook Ave., to cost $110,000; by Herbert and Henry Jones, 110 Beekman St., for four 5-story brick flat buildings at Brook Ave. and 150th St., to cost $110,000. Arch., L. F. J. Weiher, Jr.——E. F. Dodson & Co., 1123 Broadway, is reported to have been awarded the general contract for constructing a 7-story apartment building on Central Park West, near 94th St., for William Call, to cost about $100,000. Archs., J. E. Ware & Co., 487 5th Ave.

NORTH TARRYTOWN, N. Y.—An election will be held here Sept. 15 in order to decide whether it be advisable to build an addition to the school building, to cost about $20,000.

OGDENSBURG, N. Y.—Bids are asked until Sept. 22, according to reports, for the heating, ventilating and electric wiring of a building for the St. Lawrence State Hospital.

PORT JERVIS, N. Y.—Lorenzo Wood, Port Jervis, is stated to have been awarded the contract for erecting the new Church St. school building at $16,984.

TROY, N. Y.—The Union R. R. Co., of Troy, expects to make extensive alterations to its present station at Troy, including an entire new glass roof; the paving of Union St. with brick, new curbing, etc., and the taking out and replacing part of present tunnel between Congress and Ferry Sts., and strengthening the remainder with concrete. Estimated cost, $100,000. Secy., F. A. Harrington.

NEWARK, N. J.—Plans are about completed for a new school building to be erected at 7th Ave. and Factory St., at a present cost of $35,000. Archs., Ward & Davis, 203 Broadway, New York.

ORANGE, N. J.—Bids are asked until Sept. 28 for erecting the proposed addition to the Lincoln Ave. school building, to cost about $15,000.

TRENTON, N. J.—The Broad St. Bank has given the contract for the structural iron work of its new building on East State St. to the New Jersey Steel & Iron Co., at $20,795. Estimates have been received for the mason work for the foundation, but the contract has not yet been given.

BRADFORD, PA.—Bids are asked until Sept. 19 for the repairing of the Era hook and ladder building. Address Jas. A. Lindsey.

CHESTER, PA.—The contract for erecting the Crozer Home for Incurables is reported to have been awarded to a Chester firm, at $47,480.

PHILADELPHIA, PA.—It is reported that bids will soon be asked for erecting a 12-story apartment house at Broad and Spruce Sts., to cost $750,000. Archs., Dull & Peterson and Crawford Coates, 1107 Walnut St.——The following bids were received by the navy department Sept. 3 for

constructing a steel storehouse, 347 × 61 ft., at the League Island Navy Yard: Thos. M. Leeds, 1216 Race St., Philadelphia, $24,239; J. E. & A. L. Pennock, 305 Walnut St. Philadelphia, $21,487; H. L. Forte, Drexel Bldg., Philadelphia, $28,000; Macey, Henderson & Co., 1215 Filbert St., Philadelphia (accepted), $21,926; Chas. McCaul, 10 North 11th St., Philadelphia, $24,100; Penn Bridge Co., Beaver Falls, Pa., $27,000; Stacey B. Opdyke, Jr., Philadelphia, $28,278.

DENBIGH, VA.—The B. F. Smith Fireproof & Construction Co., of Washington, D. C., was awarded the contract for erecting the new jail building for Warwick county Sept. 6, to cost about $8,000.

ATLANTA, GA.—The county commissioners have decided to employ Grant Wilkins to draw plans for a new court house annex, to cost about $100,000.

MADISONVILLE, KY.—The Pauly Jail & Mfg. Co., St. Louis, Mo., is reported to have received the contract for erecting the proposed Hopkins county jail, at $6,998. Arch., W. C. Morton.

MOREHEAD, KY.—Clark & Howard, of Lexington, Ky., have been awarded the contract for erecting a new court house for Rowan county, at $14,000.

PORT CLINTON, O.—It is reported that plans have been prepared for a new court house for Ottawa county, to cost about $100,000. Archs., Wing & Mahurin, Pixley Block, Fort Wayne, Ind.

WASHINGTON, O.—The Masonic Temple in this town was burned Sept. 11, causing an estimated loss on the building of $40,000.

IRONWOOD, MICH.—Plans have been prepared for a 3-story brick and stone school building, to cost $25,000. Archs., Charlton, Gilbert & Demar, Milwaukee, Wis.

CHARLESTON, ILL.—Bids are asked by the supervisors of Cole county until Sept. 20 for the repairing of the court house. J. K. Rardin, Chn. Bldg. Com.; C. W. Rapp, Arch., 100 Washington St., Chicago, Ill.

CHICAGO, ILL.—The Peavey Grain Co. is said to contemplate the erection of an additional elevator at South Chicago, to cost $100,000.

OSCEOLA, WIS.—Bids are asked until Sept. 22 for the erection of a school building; deposit, $150. Address C. W. Staples, Clk. of School Bd.; Orff & Gilbert, Archs., Minneapolis, Minn.

SHEBOYGAN, WIS.—Bids are asked until about Sept. 30 for erecting a brick and stone school building, 75 × 100 ft., at a cost of about $23,000. Arch., Charles Hilpertshauser.

WAUSAU, WIS.—Reports state that the Northwestern Ry. Co. will make improvements at this place to cost $50,000, including a freight and a passenger station.

DES MOINES, IA.—Reports state that Proudfoot & Bird have prepared plans for a 7-story brick building, to be erected at 5th and Locust Sts., in the spring, by Conrad Youngerman; estimated cost, $100,000.

ST. JAMES, MINN.—The Mankato Plumbing & Heating Co. has been awarded the contract for a steam heating system for the Armstrong Hotel, at $2,625. Arch., F. Thayer, Mankato, Minn.

SOUTH OMAHA, NEB.—The following bids were received by the supervising architect, Washington, D. C., Sept. 7, for a low pressure steam heating and ventilating apparatus for the post-office building at South Omaha:

		Time.
Pittsburg Heating Supply Co., Pittsburg..	$4,100	80 days.
Chafer & Becker, Cleveland, O...........	5,670	80 "
Korsmeyer Plumbg. & Htg. Co., Lincoln.	3,595	80 "
John Rowe & Co., Omaha, Neb..........	4,724	.. ....
Dare & Manning, Omaha, Neb...........	5,642	80 days.
Chas. D. Symms, Lemars, Ia............	4,444	70 "

TWIN BRIDGES, MONT.—It is reported that D. A. Pease, of this city, expects to erect a hotel building here to cost $50,000.

JEROME, ARIZ.—This town was almost entirely destroyed by fire Sept. 11, causing a loss estimated at $1,000,000.

CHEMAWA, ORE.—Pugh & Gray were the lowest bidders for the construction of the proposed school building for the Harrison Training School, at $18,000.

SAN FRANCISCO, CAL.—Bids are asked by the bureau of medicine and surgery, navy department, until Oct. 12, for erecting a new naval hospital at the U. S. Navy Yard, Mare Island. W. K. Van Reyper, Surgeon-General, U. S. N., Washington, D. C.

SITKA, ALASKA.—Bids will be received by John G. Brady, Governor of Alaska, at Sitka, until Oct. 1, for the construction of a school building and teacher's residence at Wood's Island, in St. Paul Harbor, to cost about $2,200.

NEW WESTMINSTER, B. C.—A fire in this city Sept. 11 destroyed most of the business portion of the city. Estimated loss, $2,000,000; insurance, about $1,250,000.

WATER-WORKS.

DANFORTH, ME.—The town clerk writes us that the question of putting in works, which was discussed early in the season, has been dropped.

HALLOWELL, ME.—Local papers state that the commissioners will build a 3,000,000-gallon reservoir near the City Farm pumping station. The reservoir will be 240 × 390 ft.

ESSEX JUNCTION, VT.—G. A. Brownell, Chn. Com., writes us that the committee is investigating the best means of furnishing a water supply to the town. The works will not be built this season. T. W. Sibley is also on the committee.

MONTPELIER, VT.—The Barre & Montpelier Power & Traction Co., it is stated, has decided to install a pumping plant for its car barn and property here.

WEST SPRINGFIELD, MASS.—N. T. Smith, Chn. Comrs., writes us that nothing has yet been done with regard to the proposed improvements to the works. A special town meeting will soon be held to consider the question. The water board will report plans for an additional reservoir and some other changes to the works. Population, 6,700.

HARRISVILLE, N. Y.—Bids are asked until Sept. 28 for furnishing the materials and for building the proposed works recently voted for. Chn. Comrs., F. W. Werner.

NEWARK, N. Y.—The plant of the Newark Water-Works Co. has been sold to the bondholders of the company.

NIAGARA FALLS, N. Y.—The question of extending the city mains to the Niagara University is being considered by the council. It will require a larger pumping capacity to furnish water to the university. Mayor Hastings may be addressed.

RHINEBECK, N. Y.—Jos. M. Johnson, of Millersburg, Pa., has been granted a franchise for works and also a contract for furnishing the town with water. The construction will probably be begun at once.

JERSEY CITY, N. J.—Garwood Ferris has submitted a report in favor of plan No. 1 submitted by Pat'k H. Flynn, Brooklyn, N. Y., for furnishing this city with a water supply. This plan has for its source of supply the Rockaway River at Old Boonton, and is to provide a gravity supply of 70,000,000 gallons a day. The cost will be $8,745,000. It is stated that Mayor Hoos is opposed to the plan. A final conference will be held Sept. 26.——The street and water board will ask for bids at once for furnishing three meters to be placed at Belleville, Kearney and Harrison.

BENNETT, PA.—We are informed that the water supply for this place will be furnished by the Millvale Water-Works by the erection of an additional pump. The question will be voted upon Nov. 8. Address W. A. Young.

BLUERIDGE SUMMIT, PA.—D. G. Adelsberger, Civil Engr., 722 Pennsylvania Ave., Baltimore, Md., is reported to have submitted a plan for new works for this place.

BRADFORD, PA.—The Hazlehurst Water Co. was incorporated Sept. 12 to furnish water to Hazlehurst; capital stock, $12,000, with $1,200 paid in; incorporators, Edwin E. Tait, Treas., Bradford, Pa.; P. C. Blaisdell, Bradford.

CHAMBERSBURG, PA.—The council has voted to purchase a 2,000,000-gallon pump from the Stilwell-Bierce & Smith-Vaile Co., Dayton, O., for $1,950.

CHARLEROI, PA.—The Charleroi Water Co. has let the contract for furnishing two 2,500,000-gallon pumping engines to the Wilson-Snyder Mfg. Co., Pittsburg.

GALLITZIN, PA.—Jas. L. Mitchell, Tyrone, Pa., is reported to have purchased the works in this town. He will improve the plant at once. Population (1890), 2,392.

LANCASTER, PA.—Simon Shissler, Mayor, writes us that Allen Hazen, 220 Broadway, New York, has been engaged to advise the city of the best method of securing a purer water supply. After receiving the report, if favorable, the committee will ask for a loan in the spring to carry out Mr. Hazen's recommendations.

McKEE'S ROCKS, PA.—The question of building municipal works is being considered, according to reports. At present a supply is secured from the works of the Monongahela Water Co., Pittsburg.

STRASBURG, PA.—bids are asked until Sept. 20 for the purchase of $20,000 of 4% water bonds. The council in August accepted a proposition from the Strasburg Water Co. to furnish complete works for $19,000. Burgess, B. F. Book.

YORK, PA.—Local papers state that the board of health is desirous of having another water company to furnish the city with an additional water supply, which is to be filtered. President Hay, of the board, and Mayor Brant may be addressed.

MARTINSBURG, W. VA.—The council is reported as arranging for the immediate construction of the proposed improvements to the works. They will include a new 2,500,000-gallon pump, an increased water supply, etc. Supt., J. M. Shaffer.

DENTON, MD.—The question of building works is being considered, according to reports.

MADISON, GA.—The mayor writes us that no steps have been taken by the city toward building the works under discussion some months ago.

SYLVANIA, GA.—An election will be held Sept. 27 to vote on the question of issuing bonds for an artesian well and a water supply, noted in our issue last week.

MOBILE, ALA.—The following submitted bids Sept. 1 to J. C. Bush, Mayor, for constructing the proposed municipal works, as advertised in Engineering News: W. D. Boyce & Co., St. Louis, Mo.; Addyston Pipe & Steel Co., Cincinnati, O.; Holly Mfg. Co., Lockport, N. Y.; C. H. Eglee Co., Boston, Mass., complete, $538,000; Alabama Construction Co., Anniston; Pleuger & Henger Mfg. Co., St. Louis, Mo.; Healy & McLean, Chicago; Chapman Valve Mfg. Co., Boston; Michigan Brass & Iron Works, Detroit; J. P. Neely, Chattanooga; Glamorgan Pipe & Foundry Co., Lynchburg, Va.; American Pipe & Foundry Co., Chattanooga; Henry R. Worthington, New York; M. T. Lewman & Co., Louisville, Ky., and J. N. Hazlehurst, Atlanta, bidding together, $531,984; Guild & Co., Chattanooga, Tenn., $533,609; Ludlow Valve Mfg. Co., Troy, N. Y. Supervising Engr., T. W. Nicol, Mobile.

CLARKSDALE, MISS.—The Clarksdale Water & Light Co. was incorporated Sept. 3 with a capital stock of $35,000, by Walter Clark, E. L. Anderson and W. P. Holland.

McCOMB CITY, MISS.—Bids are asked until Sept. 21 for constructing works to cost about $40,000. Engrs., Sanders & Porter, Columbia Bldg., Louisville, Ky.; Mayor, C. C. Jarvis.

WINONA, MISS.—The Winona Ice, Electric Light & Water Co. has been incorporated with a capital stock of $100,000, by E. R. Blackston, D. B. Turner and others. The works will probably not be built until after the electric plant is completed.

NEW IBERIA, LA.—A. J. Cammack, Secy. and Attorney, writes us that an election was called for Oct. 17 to vote on the question of building works and a light plant, but it is likely to be set for a later date on account of irregularities in getting signatures to the petition; population, 7,000.

GALLATIN, TENN.—An election will be held Sept. 24 to again vote on the question of building works; estimated cost, $25,000. Mayor, W. L. Oldham.

LOUISVILLE, KY.—Fred. Hoertz, Louisville, has been awarded the contract at $297,390 by the Louisville Water Co. for furnishing the materials and for building the proposed filter plant. The plant is to be completed by Dec. 31, 1899. Pres., Chas. R. Long.

ELYRIA, O.—P. H. Boynton, water-works trustee, writes us that construction on the new works has been stopped for the present on account of an injunction.

FORT RECOVERY, O.—J. D. S. Neeley, Lima, O., is interested in the proposed works for this place.

MARIETTA, O.—Bids are asked until Sept. 26 for furnishing a 3,000,000-gallon pumping engine for the water-works. (Postponement from Aug. 29.) Supt., J. B. West; Pres. Water Comrs., J. H. McConnell.

NEW RICHMOND, O.—We are informed that an election to vote on the question of building works was called for Sept. 12. The water supply will be secured from the Ohio River. A filtration plant will be put in; estimated cost, including electric plant, $30,000. Engr., E. F. Layman, 32 East 3d St., Cincinnati.

BLOOMINGTON, IND.—H. F. Perry, Pres. City Water-Works Co., recently incorporated, writes us that the plant has been in operation several years. Some changes will probably be made by the new company, but no steps have yet been taken in that direction.

CONNERSVILLE, IND.—This place voted Sept. 3 to keep the works in the present location. It is proposed to make a number of improvements to the works.

HENRYVILLE, IND.—The question of building works is being considered, according to reports.

LAKE ODESSA, MICH.—It is stated that this place has voted to issue $10,000 in bonds for the proposed works. Village Pres., Wm. H. McCartney.

EATON RAPIDS, MICH.—This place voted last week to build works to cost about $25,000; population, 2,500. Engrs., Alvord & Shields, The Rookery, Chicago; Secy. Water Bd., Jos. H. Gallery.

GRAND RAPIDS, MICH.—Fire Marshal Lemoine has recommended that the city build two new stand-pipes.——The water-works trustees are considering the question of purchasing another pump for the works.

CHICAGO, ILL.—W. B. Wickersham, Secy. Chicago Public Library, writes us that Thomas & Smith, 16 North Canal St., Chicago, submitted the only bid Sept. 7, at $5,370 for furnishing four pressure water storage tanks. Mr. Wickersham says that the reason given by some contractors for not bidding was that they would not be bound by the clause in the specifications requiring union labor.

KENNEY, ILL.—H. C. Suttle and Andy Hawkyard are interested in the proposed works for this place.

MOLINE, ILL.—Jacob A. Harmon, 21 Arcade Bldg., Peoria, Ill., prepared preliminary plans, estimates and report on a water supply improvement for this city, and submitted same to the council Sept. 8. The plans contemplate the construction of natural or slow sand filters having a capacity of 3,000,000 gallons per 24 hours, a distribution reservoir of 5,000,000 gallons, two settling basins of 2,800,000 gallons each, a water tower and tank, which has a capacity of 185,000 gallons, a pumping station and about $15,000 or $20,000 worth of mains. It is expected that detail plans and specifications will be ready in January.

BARABOO, WIS.—Press reports state that the council has ordered the Baraboo City Water-Works Co. to furnish a larger water supply.

SPRING VALLEY, WIS.—The council, it is stated, will soon issue $2,600 in bonds for works for fire protection.

SEYMOUR, IA.—The question of building works and a light plant is being considered, according to reports.

LITTLE FALLS, MINN.—An election will be held Oct. 4 to vote on the question of issuing $60,000 in bonds for municipal works and a light plant.

PERHAM, MINN.—C. F. Loweth, 94 East 4th St., St. Paul, has prepared plans for small works and a light plant. A steel tower 80 ft. high will be built.

WINONA, MINN.—Local papers state that the question of putting in a pumping plant at the artesian well is being considered; estimated cost, $13,000.

TOPEKA, KAN.—It is stated that Mayor Fellows has called an election to vote on the question of either purchasing the works of the Topeka Water Co. or of building new works. For either plant $440,000 will be issued.

LITTLE ROCK, ARK.—The council fire committee has been directed to investigate the alleged low pressure of the water supply furnished by the Home Water Co. Mayor Woodson and Councilman Reid may be addressed.

COLORADO, TEX.—Robt. M. Webb, Secy. and Treas. Colorado Water-Works Co., recently incorporated, as noted in last week's issue, writes us that the company will do no new work, the plant having already been built; it was only purchased from the owners and a new company organized.

DARLINGTON, OKLA.—Bids are asked until Sept. 19 for furnishing the materials and for building the proposed works and sewers for the school on the Cheyenne and Arapahoe agency. Maj. A. E. Woodson, Acting U. S. Indian Agent, Darlington, or the Indian office, Washington, D. C., may be addressed.

SHAWNEE, OKLA.—Benj. Diesker, Cy. Clk., writes us that this place voted Sept. 2 to issue bonds for works. The supply will be secured from the river about one-fourth mile distant. The plant is not to cost more than $35,000. No contract has been let, nor are the bonds ready for sale. Population, 6,000. Engr., John M. Walker, Independence, Kan.

WAGONER, IND. TER.—J. S. Thatcher, 504 Cockrell Bldg., Dallas, Tex., has completed plans and specifications for the proposed works for this place. The works will consist of a compound duplex steam pump of 1,000,000 gallons capacity, about 10 miles of 4 to 10-in. cast-iron water pipe, 16 × 100 ft. stand pipe, etc. Bids will be received by the city clerk until about Oct. 1.

BRECKENRIDGE, COLO.—Bids were asked until Sept. 12 for furnishing the materials and for building works. The plant is to be completed in 60 days from date of contract. Town Clk., Jas. K. Darnell.

CHEYENNE WELLS, COLO.—The question of securing a water supply is being considered, according to reports.

GOLDFIELD, COLO.—A. W. Grant, Cy. Clk., writes us that the contract for building the proposed works was let Sept. 3 to local contractors. The issue of $25,000 of bonds has been sold. A report states that Sam'l Cummings has the contract.

WARD, COLO.—It is stated that the election called for Aug. 9 to vote on the question of issuing $12,000 in 6% bonds has been postponed to Sept. 27. Engr., D. J. McCanne, 1600 17th St., Denver, Colo.

CENTRALIA, WASH.—It is stated that the works of the Centralia Water Co. will be improved. Pres., W. C. Sharpstien.

FAIRHAVEN, WASH.—It is reported that the Fairhaven City Water & Power Co. has asked for bids for the construction of a 20-in. main from Lake Padden to the city. At present a 14-in. pipe is supplying the city with water.

McMINNVILLE, ORE.—Press reports state that the town is considering the question of securing an increased water supply from the mountains.

THE DALLES, ORE.—The commissioners have been authorized by the council to engage J. B. Goit, The Dalles, to prepare plans, specifications, etc., for extending the works, putting in larger pipes, and for securing a better water supply. S. Polton and M. Randall are on the committee.

COLTON, CAL.—Bids are asked until Sept. 30 for the purchase of 6% water-works bonds. Clk., G. E. Slaughter.

GLENDORA, CAL.—The Glendora-Azusa Water Co. has been incorporated with a capital stock of $50,000, of which $5,100 is paid in; incorporators, D. A. Cole, J. H. Odell, E. O. Kennard, Glendora; and A. P. Griffith, W. R. Powell, W. C. Ormiston and G. C. Matthews, Azusa.

LOS ANGELES, CAL.—Press reports state that on Sept. 11 Judge Oscar appointed Frank A. Gibson, cashier of the First National Bank, to be receiver of the Los Angeles City Water Co., pending the decision of the litigation now under way between the company and the city.

RED BLUFF, CAL.—It is stated that the construction of municipal works, at a cost of about $50,000, is proposed. Town Clk., J. F. Teass.

WHITTIER, CAL.—The board of trustees, it is stated, will soon ask for bids for the purchase of $40,000 of 20-year bonds, for the proposed municipal works.

GRANTSVILLE, UTAH.—A. F. Doremus, Salt Lake City, is reported to have been awarded the contract for building works at about $19,000.

SALT LAKE CITY, UTAH.—The question of securing an increased water supply is being considered. Mayor, John Clark.

IDAHO FALLS, IDAHO.—George Chapin, Chn. Bd. Trustees, writes us that it will be three weeks from Sept. 3 before any steps can be taken for the proposed works, as the city has to wait until the bids for purchasing the bonds are received. The law compels one month's advertising. Population, 1,400.

OTTAWA, ONT.—Robert Surtees, Cy. Engr., has been directed to prepare a statement of cost of a 20,000,000-gallon reservoir and stand-pipes of the same capacity. Mr. Surtees is stated by local papers to have recommended the installation of an extra pump of 10,000,000-gallons as an auxiliary.

STRATHROY, ONT.—Press reports state that this place is considering the question of building works and a sewerage system.

WATERLOO, ONT.—The owners of the works offer to sell the property to the city for $25,000. A board of trade committee, consisting of S. Snyder, Pres. Bd.; Messrs. Fischer, Moore, J. Conrad and Diebel, has been appointed to consider the question in conjunction with the council.

MEXICO, MEX.—The department of communication is making borings near Ajusco for an increased water supply. At first the supply will be for flushing the sewers, according to reports.

HALIFAX, ENGLAND.—The water committee has decided to recommend to the council to proceed with the Walsham Dean reservoir extensions, to cost about $1,000,000.

SEWERAGE.

FRANKLIN, N. H.—The council has voted to build an outlet sewer in a certain street. Mayor Adams may be addressed.

AMHERST, MASS.—At the town meeting to be held Sept. 17 the question of building sewers in three streets will be considered. Chn. Selectmen, Wm. E. Smith.

BOSTON, MASS.—Wm. M. Brown, Jr., Ch. Engr. and Supt. Metropolitan Sewerage Comn., 3 Mount Vernon St., Boston, writes us that the following bids were received Sept. 3 for building additions to the pumping stations of the system, as advertised in Engineering News: Deer Island Station—Edward P. Allis Co., Milwaukee, $27,200, duty guaranteed, 80 million; Geo. F. Blake Mfg. Co., New York, $22,200, duty guaranteed, 75 million; Holly Mfg. Co., Lockport, N. Y., $20,785, duty guaranteed, 75 million; East Boston Station—Allis Co., $2,600; Blake Mfg. Co., $22,200; Holly Mfg. Co., $20,785, duty guaranteed, respectively, as for Deer Island; Charlestown Station—Allis Co., $25,800, duty guaranteed, 75 million; Blake Mfg. Co., $22,200, duty guaranteed, 70 million; Holly Mfg. Co., $20,785, duty guaranteed, 70 million; Alewife Brook, North Somerville Station—Burhorn & Granger, New York, $7,800, duty guaranteed, 50 million; Blake Mfg. Co., $7,500, duty guaranteed, 50 million; P. H. & F. M. Roots Co., 109 Liberty St., New York, $6,745, duty guaranteed, 68 million; Prindle Pump Co., 120 Liberty St., New York, $5,980, duty guaranteed 50 million. The additions for which bids were asked for the North Somerville Station includes a vertical compound condensing engine directly connected with a vertical centrifugal pump; a vertical tubular boiler of the Manning type, and necessary connections. Conditions of maximum capacity: Quantity pumped, 20 cu. ft. per sec. Lift, 13 ft.

HOLYOKE, MASS.—John J. Fitzpatrick, Cy. Engr., writes us that the plans for the Highlands sewers are being prepared. The length will be about 9½ miles. The money has not yet been appropriated.

OLNEYVILLE, R. I.—It is proposed to construct sewers in certain streets.

WESTERLY, R. I.—I. B. Crandall, Pres. Town Council, writes us that a few years ago an approximate cost, with general plans for a system, was made. It is not thought that anything will be done towards securing the system for some years.

AMSTERDAM, N. Y.—Bids are asked until Sept. 30 for constructing storm sewers in certain streets. Secy. Comrs., Geo. McClumpha.

BALLSTON SPA, N. Y.—D. W. Maher, Pres., writes us that plans and specifications for a sewer in Gordon Creek for the extension of the same have been prepared by Harvey M. Gear. An appropriation for this work has been voted by the taxpayers; estimated cost, $4,000.

BUFFALO, N. Y.—The aldermen received the following bids Sept. 6 for constructing a 5-ft. 3-in., 5-ft. 4-in., 5-ft., 4-ft. 9-in., 4-ft. 6-in., 4-ft. 3-in., 4-ft., 3-ft. 9-in. and 3-ft. 6-in. brick sewer in Hampshire St. and Ferry St., from Albany St. to Elmwood Ave.: John Harrer, $34,800; Wm. Franklin, Jr., $34,900; Ritzmann & Miller, $37,900; W. A. Rappich, $38,376; Henry Harter, $38,985; Christ Smith, $45,595.

COHOES, N. Y.—Edward Hayes, Cy. Engr., writes that the statement in our issue of Sept. 1 that "plans for a system marked IXL, prepared by Hunter & Fernald, Melrose, Mass., have been adopted by the commission," is not correct. They received the prize for the best plan submitted. The plan adopted was made by Mr. Hayes, and is similar to the old plan made about a year ago with Rudolph Hering, 100 William St., New York, as consulting engineer.

LANSINGBURG, N. Y.—It is proposed to build a sewer in an alley between 24th and 25th Sts., at a cost of $2,004.

LITTLE FALLS, N. Y.—The council has voted to enlarge certain sewers at a cost of about $8,386, acording to reports. City Engineer Babcock and Mayor Dasey may be addressed.

NEWBURG, N. Y.—The board of public works has recommended to the council the construction of a new sewer in Third St., to cost about $26,647.

SYRACUSE, N. Y.—The city engineer has recommended the construction of a 56 × 84 to 34 × 51-in. brick sewer in West Colvin St. to cost about $26,000, and a 24-in. brick sewer to cost $8,200.

TROY, N. Y.—Bids are asked until Sept. 20 for constructing pipe sewers in three streets. Secy. Contracting Bd., E. Ogden Ross.

JERSEY CITY, N. J.—Bids are asked until Sept. 19 for constructing about 6,000 ft. of 60 to 36-in. brick sewer, etc. Clk. Bd St. and Water Comrs., Geo. T. Bouton.

WILDWOOD, N. J.—Bids are asked until Sept. 21 for repairing and completing the construction of the sewerage system. Clk., Jed Du Bois.

WOODBRIDGE, N. J.—It is stated that an election will be held Sept. 28 to vote on the question of building a system.

BRADDOCK, PA.—The council has been petitioned to build a sewer in Holket Ave. Supt. Pub. Wks., Wm. Howat.

CRAFTON, PA.—Bids are asked until Sept. 20 for constructing 5,140 ft. of 30 to 8-in. pipe sewers. Engr., F. A. McDonald, 813 Penn Bldg., Pittsburg; Clk., R. H. Thomson.

WAYNESBURG, PA.—This place voted Sept. 6 against issuing $19,000 in bonds for constructing a system.

GAINESVILLE, PA.—G. P. Boone, Cy. Clk., writes us that a system for this city has been talked of, but it is not likely that anything will be done this year towards building it.

RANKIN, PA.—The council is reported to have decided to build sewers and pave certain streets notwithstanding that the proposition to issue $25,000 in bonds for the work failed to carry at the recent election.

ORANGEBURG, S. C.—This place is reported to have decided not to build a system at present.

SAVANNAH, GA.—It is stated that the following bids were received by the committee Sept. 1 for building a mile of brick and about 49 miles of pipe sewers for the proposed house drainage system, as advertised in Engineering News: Lauer, Hageman, Brayer & Albaugh, Rochester, N. Y., $269,828; Cranford & Co., Brooklyn, N. Y., $153,495; Greenville Construction Co., $177,021; James F. McCabe, Baltimore, Md., $206,221; Herbert Tate, New York, about $170,000; Miles & Bradt, Atlanta, Ga. (received by mail after opening of bids), about $151,000. Cy. Engr., W. J. Winn.

NASHVILLE, TENN.—The residents of the 10th ward have petitioned the board of public works to build an extension to the Lick Branch sewer at a cost of about $30,000.

COLUMBUS, O.—Director of Public Works Jacobs has suggested that a number of sewers be built at a cost of about $150,000.

MARIETTA, O.—The council has passed an ordinance to build a storm sewer in the Fifth district. Cy. Clk., Carl Becker.

MIDDLETOWN, IND.—It is proposed to construct a sewer in 9th St. Clk., W. L. Campbell.

DELRAY, MICH.—Bids are reported to have been asked by the town clerk for building 9,000 ft. of sewers. The outlet will be into the Rouge River.

WYANDOTTE, MICH.—G. B. Palmer, Engr., Michigan Alkali Co., is reported to have prepared estimates for a system to cost about $33,000.

BLOOMINGTON, ILL.—It is proposed to build the Valley sewer at once.

MILWAUKEE, WIS.—Bids are asked until 10.30 a. m., Sept. 16, for constructing Section No. 6 of the 30th St. sewer tunnel; check, $11,250. The bids for this work received Sept. 8 were considered too high, they ranging from $26 to $32.70 a ft.; total, $78,000. Chn. Bd. Pub. Wks., Geo. H. Benzenberg.

RACINE, WIS.—P. B. Johnson has been awarded the contract for building the sewer extension in 16th St. at $11,641.

DECORAH, IA.—It is proposed to build a system, according to reports. Cy. Clk., E. Mather.

ST. PAUL, MINN.—Bids are asked until Sept. 15 for constructing a sewer in Charles St. Clk. Bd. Pub. Wks., C. H. Bronson.

COLUMBUS, NEB.—Bids are reported as being asked by the West End Sewer Co. for building two miles of pipe sewer at a cost of $5,000.

SCHUYLER, NEB.—Bids are asked until Sept. 20 for furnishing six cars of 25 to 18-in. pipe sewer, according to reports. Clk., N. H. Mapes.

GRAND FORKS, N. DAK.—The aldermen have voted to ask for bids for constructing sewers in certain streets.

BROOKFIELD, MO.—This place, it is stated, will vote at once on the question of issuing $14,000 in bonds for a system.

SEATTLE, WASH.—T. Ryan and J. W. Fitts have been awarded the contracts for building sewers in Dearborn St. and Taylor Ave. at $2,666 and $1,261, respectively.

OAKLAND, CAL.—It is proposed to build sewers in 24th St. at a cost of $8,500, an outlet sewer for the east side, at a cost of about $30,000 and a sewer in the vicinity of Telegraph Ave. and 49th St.

MONTREAL, QUE.—The road committee has decided to recommend to the aldermen the construction of sewers and a sewage disposal farm for St. Denis, to cost about $75,000. Aldermen Brunet and Turner may be addressed.

OTTAWA, ONT.—This city voted Sept. 8 in favor of the main drainage by-law, which authorizes the council to spend $425,000 for a trunk sewer. Chn. Com., Alderman Samuel J. Davis; Consult. Engr., Rudolph Hering, 100 William St., New York.

STRATHROY, ONT.—The question of building a system and water-works is being considered, according to reports.

GARBAGE DISPOSAL—STREET CLEANING

BOSTON, MASS.—Press reports state as follows: Street Superintendent Wells signed a contract Sept. 10 with Herbert Tate, Pres., and Mr. Gooch, Counsel, of the City Refuse Utilization Co. of New York, at $5,500 a year, for the disposal of the refuse in the city. The contract is for 10 years, the city reserving the right to purchase the plant at the end of the first five years. The material will be handled in a building to be erected at Fort Hill Wharf. Work on the plant will begin next week, completing it in time for the plant to be in operation Dec. 1.

ALBANY, N. Y.—The board of contract has given the contract for removing the street dirt, awarded to Jos. S. Droogan last March, to John C. Wasserbach.

BUFFALO, N. Y.—Henry P. Burgard has been awarded the 5-year contract for street cleaning, beginning Sept. 15; bond, $50,000.

UTICA, N. Y.—The council has let the contract for collecting the garbage to Emmett J. Hurley, at $6,445.

READING, PA.—Bids are asked until 4 p. m., Sept. 16, for reconstructing or enlarging the crematory to a capacity for destroying 80 tons of unstrained garbage a day; surety, $3,000. Cy. Engr., S. S. Hoff.

UNIONTOWN, PA.—The borough council is reported as considering the question of purchasing a garbage disposal plant.

WEST CHESTER PA.—A. M. Eachus, St. Comr., is reported as urging the city to purchase additional street sprinklers, etc.

LOUISVILLE, KY.—The board of public works is considering the question of building a crematory to cost about $10,000.

EVANSVILLE, IND.—Frank Pritchett has been awarded the contract for sweeping the streets for one year from Sept. 15 at 18 cts. for 10,000 sq. ft.; total, $5,000.

MARION, IND.—The council and the board of health are considering plans for rebuilding the burned garbage disposal plants.

SOUTH BEND, IND.—L. A. Hull, Cy. Clk., writes us that action is not likely to be taken this season toward securing a garbage disposal plant. The question is only being agitated. Cy. Engr., W. H. Rosencrans.

GALVESTON, TEX.—Dr. W. C. Fisher, Cy. Health Officer, has stated that the city should have two garbage disposal plants.

DENVER, COLO.—The question of a better method of garbage disposal is being considered, according to local papers. Dr. Munn and Superintendent Clark, of the board of health, may be addressed.

SPOKANE, WASH.—W. M. Potter, Health Officer, writes us that nothing has yet been done in regard to a garbage disposal plant.

STREETS AND ROADS.

PITTSFIELD, MASS.—The highway commissioners, Boston, have awarded a contract to Harris & Letteny, Boston, at $6,787, for constructing a section of state roads.

WESTMINSTER, MASS.—C. H. Kelliher, Newburyport, Mass., has been awarded a $3,963 contract for building a state road in this place.

BRIDGEPORT, CONN.—Bids are asked until Sept. 16 for macadamizing on East Main St., according to reports. F. C. Mullins, Clk. Com.

NORWALK, CONN.—Reports state that the question of constructing about 7,000 sq. yds. of brick paving on concrete, is being considered. Chas. N. Wood, Cy. Engr.

SHELTON, CONN.—Bids are asked until 8 p. m., Sept. 16, for grading a section of Canal St. Engr., D. S. Brinsmade, Derby, Conn.; C. V. Case, Borough Clk.

ALBANY, N. Y.—Bids are asked until Sept. 23 for improving the White's Corners Plank Road, between Buffalo and Hamburg. J. L. Little, Division Engr., Powers Block, Rochester; Geo. C. Diehl, County Engr., Buffalo; C. W. Adams, State Engr., Albany.——Plans are being prepared by the clerk of the board of contract, for paving Hamilton St., from Quail St. west. A contract has been awarded to Mulderry Bros., at $32,079, for the brick paving in Elm St.

BUFFALO, N. Y.—The board of public works has awarded a contract to the Barber Asphalt Paving Co., at $33,097, for surfacing Niagara St., from Niagara Square to Porter Ave.

LONG ISLAND CITY, N. Y.—Bids are asked until Sept. 20 for laying asphalt bicycle strips on Fulton Ave. and five other streets. J. P. Keating, Comr. Highways, 150 Nassau St., New York.

NEW YORK, N. Y.—Bids are asked until 11 a. m. Sept. 15 for taking up and relaying pavement now in Park Ave., from 126th St.; also for paving with asphalt pavement the roadway of 19th St., from Eighth to Ninth Ave., etc. J. P. Keating, Comr. Highways, 150 Nassau St.

NIAGARA FALLS, N. Y.—Bids are asked by the board of public works until Sept. 23 for asphalt paving on Cherry St. Walter Jones, Cy. Engr.

PORTCHESTER, N. Y.—The trustees are considering the bid of Erbeck Bros., Homestead, Pa., at $44,533, which was the lowest for paving in Main St.

ROCKTON, N. Y.—Bids are asked until 4.30 p. m., Sept. 17, for grading and macadamizing about 1½ miles of road. F. C. Crane, Cy. Engr., Amsterdam.

SCHENECTADY, N. Y.—Bids are asked by the council until Sept. 20 for grading, flagging, etc., in North St., and paving Hamilton St., from Veeder Ave. to Hulett St.——The question of paving Clinton and Union Sts. will be considered by the aldermen at the October meeting.

SYRACUSE, N. Y.—Bids are asked until Sept. 19 for furnishing the material and for grading plank sidewalks and asphalt paving on certain streets. M. Z. Haven, Cy. Clk.

JERSEY CITY, N. J.—Bids are asked until Sept. 19 for about 1,350 cu. yds. of sand filling, 7,000 sq. ft. of flagging, 6,250 sq. yds. of Belgian paving, etc., on Charles St. Geo. T. Bouton, Clk. Bd. St. Comrs.

PERTH AMBOY, N. J.—A petition has been presented to the board of aldermen for the extension of Wayne St. to Easton St.

WEST HOBOKEN, N. J.—The council has awarded the Barber Asphalt Co. a contract, at $59,552, for paving Clinton Ave.

ALLEGHENY, PA.—New bids are asked for regrading and paving Pennsylvania Ave., from Allegheny Ave. to Beaver Ave. Robt. McAfee, Dir. Pub. Wks.

MAUCH CHUNK, PA.—The council has decided to spend $40,000 in street improvements. The question of increasing the bonded indebtedness to that amount will be voted on at the November election.

NEW KENSINGTON, PA.—It has been voted to issue $45,000 in bonds for street paving, and $15,000 in bonds for sewers, etc.

NORTH WASHINGTON, PA.—Reports state that the council will issue $10,000 in paving bonds.

PATTON, PA.—Bids are asked until Sept. 19 for brick paving, grading, etc., of Magee Ave. E. C. Brown, Borough Engr.

SHAMOKIN, PA.—Ward & Stucker, Harrisburg, Pa., have been awarded a contract to pave Independence St. with Mack brick, which will require about 521,000 brick, at an estimated cost of $20,000.

CUMBERLAND, MD.—Conda Wilson, Chn. St. Com. and J. W. Cook, County Comr., have decided to use the county's appropriation of $2,000 for paving a street west of Mill St.

WILLIAMSPORT, MD.—Reports state that the Cumberland Valley R. R. Co. will macadamize the road to Downsville, a distance of four miles. Address Mayor Thompson.

NEW ORLEANS, LA.—We are informed that the council has rejected all the bids for asphalt paving, etc., in Canal St. The itemized bids were given in our issue of Aug. 25. The specifications called for bids for paving the entire street including the neutral ground, on which four or five street railway tracks run for the entire distance. While the bids were being considered an attempt was made by the city authorities to make some arrangement with the railways by which the paving of the neutral ground could be carried on simultaneously with the rearrangement of their tracks. This, however, fell through, and the railways have threatened to take the matter to court. The council then considered the bids for the street and neutral ground separately, and finally decided to reject all bids. The paving of Claiborne and Camp Sts. was awarded to the General Asphalt Co., at $24,687, and to the Ayres Asphalt Paving Co., at $39,174, respectively.

CAMBRIDGE, O.—Bids are asked until Sept. 24 for the purchase of $9,000 of 4½% street bonds. T. R. Deselm, Cy. Clk.

CINCINNATI, O.—Bids are asked until Oct. 5 for grading, granite curbing and granite paving in Delhi Ave. G. H. Spellmire, Clk. Bd. Cy. Affairs.

NORWALK, O.—Bids are asked until Oct. 4 for furnishing the material and constructing a brick pavement, etc., on Norwood Ave. F. W. Christian, Cy. Clk.

ORRVILLE, O.—Herring & Son, Mansfield, O., have been awarded a contract for paving Main St., to cost about $11,000.

SALEM, O.—Davis & Caldwell, Youngstown, O., submitted the lowest bid Sept. 5 for paving North Lundy St., at $4,392.

TOLEDO, O.—Bids are asked until Oct. 10 for paving in Kelsey Ave. with Wassal or Buckeye repressed blocks, etc. L. P. Harris, Cy. Clk.

TOLEDO, O.—Bids are asked until Oct. 3 for furnishing and constructing Wassall block pavement, etc., on 6-in. concrete foundation, on Ontario St. L. P. Harris, Cy. Clk.

ANDERSON, IND.—The council is considering a proposition to pave six streets with asphalt.

BROWNSTOWN, IND.—Bids are asked until Sept. 23 for constructing 12 gravel or macadam roads. John D. Durment, County Audr.

INDIANAPOLIS, IND.—Bids are asked until 10 a. m., Sept. 19, for constructing cement sidewalks, etc., on portions of five streets, and asphalt paving in 11th St. M. A. Downing, Chn. Bd. Pub. Wks.

INDIANAPOLIS, IND.—Bids are asked until Sept. 23 for sidewalks on Pennsylvania St. and Holloway Ave. M. A. Downing, Chn. Bd. Pub. Wks.

NORTH VERNON, IND.—Bids are asked until Sept. 23 for furnishing the material and constructing cement walks on State St., between Walnut and Greenburg Sts., and until Oct. 14 for cement sidewalks on Hicks St. Chas. H. Everett, Cy. Clk.

ROCKVILLE, IND.—Bids are asked until Sept. 30 for grading and graveling about seven miles of road in Adams and Florida townships. E. H. Owen, County Audr.

OWOSSO, MICH.—The Warren-Scharf Asphalt Paving Co. was awarded a contract Sept. 6 by the council for asphalt and brick combination pavement, to cost about $35,000, according to reports.

CEDAR RAPIDS, IA.—Bids are asked until 12 m., Sept. 15, for asphalt paving on First Ave., between 10th and 13th Sts. R. N. Buck, Chn.

DULUTH, MINN.—Bids are asked until 10 a. m., Sept. 16, for grading, etc., in 34th and 52d Aves. R. Murchison, Clk. Bd. Pub. Wks.

OMAHA, NEB.—Bids are asked until Sept. 23 for resetting old curb and paving with sheet asphalt, brick or stone on 32d Ave. Andrew Rosewater, Chn. Bd. Pub. Wks.

GRAND FORKS, N. DAK.—Bids are asked until 7 p. m., Sept. 19, for brick or stone paving. F. A. Brown, Cy. Audr.

KANSAS CITY, MO.—Bids are asked until Sept. 20 for furnishing and constructing brick sidewalks on Hickory St. H. A. Wise, Cy. Engr.

DENVER, COLO.—The Denver Paving Co. has submitted the lowest bid, at $71,222, for paving with alcatraz asphalt on Champa St.

PORTLAND, ORE.—The council has awarded contracts to the Trinidad Asphalt Paving Co., at $2,544, for paving in Fifth St., and at $15,542 for paving in Alder St.

ALAMEDA, CAL.—Bids are asked until 11 a. m., Sept. 19, for grading a road. F. C. Jordan, Clk.

NAPA, CAL.—Bids are asked until 7:30 p. m., Sept. 19, for grading First St., from Combs to Monroe St. H. H. Thompson, Cy. Clk.

NIAGARA FALLS, ONT.—Bids are asked until 4 p. m., Sept. 15, for 47,000 sq. ft. of concrete sidewalk, 7,000 sq. ft. of brick sidewalk, 8,000 lin. ft. of stone curb, etc. C. H. Mitchell, Engr.; John Robinson, Town Clk.

MANUFACTURING PLANTS.

MILTON, N. H.—The entire plant of the Waumbeck Woolen Mills was burned Sept. 11, at a reported loss of about $90,000; insurance, $70,000.

ALBANY, N. Y.—The Helderberg Cement Co., 86 State St., which recently put in operation a new plant at Howe's Cave, N. Y., is contemplating the quadrupling of its plant this winter.

CONSHOHOCKEN, PA.—The brewing plant at this place was burned Sept. 8; total estimated loss, $100,000.

PHILADELPHIA, PA.—George C. Dietrich is stated to have been awarded the contract for erecting the ordnance machine shop No. 2 for the Midvale Steel Co., at Nicetown, at $69,000.

LYNCHBURG, VA.—The Lynchburg Cotton Mills Co. expects to double the capacity of its plant.

RICHMOND, VA.—Press reports state that a large shipyard may be established in this city as the result of the award for the construction of several torpedo-boats and destroyers to W. R. Trigg & Co., of Richmond. The government allows three months in which to make preparations.

WARSAW, VA.—L. A. Courtney, whose canning plant was recently burned, is expected to rebuild at once.

McADENSVILLE, N. C.—It is reported that contracts will soon be let for erecting a large cotton spinning plant at this place. Among those interested are, J. H. McAden, Charlotte, N. C.; G. C. Love, Gastonia, N. C., and A. P. R. Lyne, Mount Holly, N. C.

REIDSVILLE, N. C.—The capacity of the Edna Cotton Mills is expected to be doubled.

NEWBERRY, S. C.—E. B. Wilbur and others contemplate erecting a cotton mill at this place.

SPRINGFIELD, S. C.—M. L. Gleaton, of Springfield, is interested in a 5,000-spindle cotton mill which it is proposed to erect here.

SHEFFIELD, ALA.—Press reports state that the Anglo-American Steel Co., of Sheffield, incorporated in Alabama Aug. 31, with a capital stock of $1,000,000, will soon erect a large steel mill in this town.

LEXINGTON, MISS.—The Lexington Compress & Oil Mill Co., of Lexington, informs us that W. O. Glass, Yazoo City, Miss., has been awarded the contract for erecting the new buildings, to cost about $8,000. All the contracts let amount to $30,000; some other small additions may be needed.

MEMPHIS, TENN.—The Memphis Grain Elevator & Mfg. Co., and the Eagle Mills, were destroyed by fire Sept. 8. Total loss, $242,000; insurance, $75,000.

TOLEDO, O.—It is reported that the contract for constructing the Ford glass plant has been awarded to the Shiffler Bridge Co., Pittsburg, to cost $250,000.

DETROIT, MICH.—Plans have been prepared, according to reports, for a new brick factory building, 85 x 240 ft., to be erected on Harper Ave., for Murphy, Wasey & Co., at a cost of about $30,000. Arch., R. E. Raseman.

SOUTH MILWAUKEE, WIS.—It is reported that the United States Glue Co. will establish a new plant at Oak Creek, two miles from this city, and that six buildings will be erected at a cost of about $100,000. Pres., Fred. Vogal, Jr.; Vice-Pres., A. O. Trostel, of Milwaukee.

CONTRACT PRICES.

SEWERAGE SYSTEM.—Clinton, Mass.—The Metropolitan Water Board, Boston, received the following bids Sept. 1 for constructing section 2 of the proposed sewerage system, including the intercepting sewer, reservoir, pumping station, force mains, etc., as advertised in Engineering News; contract awarded Owen Cunningham & Son:

Bids Received at Boston, Mass., Sept. 1, 1898, for Constructing Section 2 of the Sewerage System for Clinton.

CONSTRUCTION MATERIALS.—Fort Delaware, Del.—Lieut.-Col. C. W. Raymond, U. S. Engr., Philadelphia, received the following bids Sept. 5, 1898 for furnishing various construction materials, as advertised in Engineering News: American Rosendale cement, 36,000 bbls., Lawrenceville Cement Co., New York, Beach's brand, 68¾ cts. a bbl.; Newark & Rosendale Lime & Cement Co., New York, Newark brand, 77½ cts.; Lawrence Cement Co., New York, Hoffman brand, 68 cts.; American Portland cement, 4,000 bbls., Wm. J. Donaldson, Philadelphia, Alpha brand, $2.35; Walter F. Bradley Co., Philadelphia, Penn brand, $1.91; Commercial Wood & Cement Co., Philadelphia, Lehigh brand, $2.10; Chas. Warner Co., Wilmington, Del., Atlas brand, $2.45 a bbl.; Broken stone, small, 24,000 cu. yds., Standard Lime & Stone Co., Baltimore, Md.; $1.12 a cu. yd.; Jno. T. Dyer, Norristown, Pa., 98 cts.; Irvine & Carty, Philadelphia, $1.40; Robt. Patterson & Son, Philadelphia, $1 54¼; Delaware Construction Co., Wilmington, $1.04½; Brandywine Granite Co., Wilmington, Del., $1.20; Broken stone, large, 5,000 tons of 2,240 lbs.; (1) being delivered in scows, and (2) delivered in cars, Standard Lime & Stone Co., (1) $1.12 a ton; Jno. T. Dyer, (2) 73 cts.; Delaware Construction Co., (1) 90 cts., (2) 90 cts.; Brandywine Granite Co., (1) 85 cts., (2) 85 cts.; Sand, washed, 9,000 cu. yds., Robt. Patterson & Son, 37½ cts. a cu. yd.; Chas. Warner & Co., 28 cts.; Sand, unwashed, 18,000 cu. yds., Patterson & Son, 29½ cts. a cu. yd.; Delaware Construction Co., 24 cts.; Warner & Co., 24 cts.; I-beams, (1) being for steel I-beams and channels, 163,660 lbs., (2) for bearing plates, 19,668 lbs., and (3) for standard connections, angles and bolts, 1,748 lbs., Phoenix Iron Co., Philadelphia, (1) 1½ cts. a lb.; (2) 1½ cts.; (3) 3 cts. a lb.; A. & P. Roberts Co., Philadelphia, (1) 1 438-1,000 cts.; (2) 1 33-100 cts.; (3) 1 76-100 cts.; Standard Supply & Equipment Co., Philadelphia, (1) 1 4,375-10,000 cts.; (2) 1 3,275-10,000 cts.; (3) 1¾ cts.; totals of bids recommended for acceptance, John T. Dyer, Norristown, Pa., all broken stone, $27,170; Commercial Wood & Cement Co., Philadelphia, American Portland cement, $8,400; Chas. Warner & Co., Wilmington, Del., all sand, $6,840; Standard Supply & Equipment Co., Philadelphia, I-beams, plates, bolts, etc., $2,644; Lawrence Cement Co., New York, American Rosendale cement, $24,480.

SEWAGE FILTER BEDS.—Clinton, Mass.—The following bids were received by the Metropolitan Water Board, dam and aqueduct department, Boston, Sept. 1, for constructing filter beds for the sewerage system in this city, as advertised in Engineering News; contract awarded to Newell & Snowling Construction Co.:

Bids Received at Boston, Mass., Sept. 1, 1898, for Constructing Filter Beds for Sewerage System.

Bidder.	Earth excavation, 64,000 cu.yds.	Masonry. Brick, 80 cu.yds.	Masonry. Cncte., 65 cu.yds.	Stone paving, 15 cu.yds.	Vitrified pipe. 24-in., 1,180 lin. ft.	Vitrified pipe. 18-in., 3,680 lin. ft.	Vitrified pipe. 12-in., 250 lin. ft.	Vitrified pipe. 8-in., 1,720 lin. ft.	Vitrified pipe. 6-in., 1,440 lin. ft.	Total.
Owen Cunningham & Son, Somerville......	$0.20	$11.50	$5.00	$2.50	$1.20	$0.60	$0.45	$0.35	$0.20	$18,709

DREDGING.—Waukegan, Ill.—The council has let the contract to Calkins, Stickney & Hoit, Detroit, for dredging in the harbor, at 12 cts. a cu. yd.

BRICK PAVING.—Glens Falls, N. Y.—The Troy Public Works Co., Utica, N. Y., has been awarded the contract, at $1.68 a sq. yd., for paving a portion of Glen St. with bevelled-edged brick made by the Eastern Paving Co., Catskill, N. Y.

MISCELLANEOUS CONTRACTS.

BONDS.—Calgary, Alberta, N. W. Ter.—Bids are asked until Oct. 1 for the purchase of $25,000 of 4% bonds. C. McMillan, Cy. Clk., Calgary.

FIRE HOSE.—Saginaw, Mich.—Bids are asked until 4:30 p. m., Sept. 16, for furnishing 1,000 ft. of 2½-in. fire hose. Controller, A. F. Lewis.

BARGE.—Biloxi, Miss.—Bids are asked until Sept. 22 for constructing a barge for the use of dredging. A. C. Smith, Asst. Surgeon, Quarantine Station, Biloxi.

ROTARY NOZZLES.—New York, N. Y.—Bids are asked until Sept. 21 for furnishing three rotary nozzles. Fire Comr., Jno. J. Scannell, 157 E. 67th St., Manhattan.

DREDGING.—Tecumseh, Ont.—Bids are asked until Sept. 17 for dredging in the East Marsh drain. A. J. Halford, Engr., Windsor, Ont.; W. Renaud, Township Clk., Tecumseh.

PIERS, Cleveland, O.—The board of public works has awarded a contract to the L. P. & J. A. Smith Co., Cleveland, at $157,000, for the construction of five piers between Seneca and Erie Sts.

STEAM GENERATORS.—League Island, Pa.—Bids are asked until Sept. 17 for installing steam generators at the League Island navy yard. M. T. Endicott, Ch. Bureau Yards and Docks, Washington, D. C.

DREDGING PLANT.—Mobile, Ala.—Bids are asked until Oct. 13 for the hire of a dredging plant for work at Mobile River and Bay, as stated in our advertising columns. Maj. Wm. T. Rossell, U. S. Engr., Mobile.

DOCK.—Vancouver, B. C.—The New Vancouver Coal Co. proposes to construct a new loading dock, according to reports.

FIRE TRUCK, ETC.—New Rochelle, N. Y.—The trustees will hold an election Oct. 17 to vote on the question of appropriating $5,000 for the purchase of an aerial fire truck and additional hose. The money will be secured by issuing bonds.

FIRE ALARM SYSTEM.—New Orleans, La.—The fire and lighting committee has referred a petition to the assessment committee, recommending that $25,000 be appropriated for a new fire alarm system. Councilman Lafaye may be addressed.

TELEPHONE LINE.—Monroe, Wis.—Reports state that J. F. Sears, Monticello; Erwin Gabriel, Stewart, and Dr. McKeller, Blanchardsville, are about to erect a long-distance telephone line from Monroe to Blanchardville, including all intervening points.

DREDGING, ETC.—Stockton, Cal.—It is reported that steps are being taken by the board of public works to dredge a channel near this city and for the purchase of two self-dumping mud scows with a capacity of 150 cu. yds. Address the superintendent of streets.

LOCK WALLS, ETC.—Kentucky River, Ky.—Thos. C. Sheridan, Buffalo, W. Va., has been awarded a contract, at $188,398, for constructing the masonry lock walls and abutments for the dams of lock No. 8, Kentucky River, as described in our issue of Aug. 4. Capt. J. G. Warren, U. S. Engr., Louisville, Ky.

SEA WALLS, ETC.—Baltimore, Md.—We are informed that the following bids were received Sept. 9 for constructing sea walls and embankments at North and Hawkins Points, Md., advertised in Engineering News Aug. 18 to Sept. 8. Second Lt. Chas. W. Kutz, U. S. Engr., Baltimore:

Geo. F. Nardin, Baltimore (whole work)........	$28,362
Riley & Brubaker, Philadelphia (whole work)....	37,833
T. B. Jones & Co., Baltimore (whole work).......	36,367
R. P. McCormick, Baltimore (whole work).........	24,967
A. Weber and J. C. Smith, Baltimore (whole work).	28,015
W. D. Johnston, Phila.; J. O. Reynolds, N. Y....	36,036
Wm. E. Anderson, Baltimore (Class B)..........	8,022
Owen Patterson, Baltimore (whole work).........	36,719
Kirk, Driscoll & Co., Syracuse, N. Y. (whole work).	28,986
Wm. McRoberts, Jr., Baltimore (Class B).........	34,144
Roland W. Finch, Baltimore (Class B)..........	8,499
R. P. Fitch, New York (whole work)	39,351
Sanford & Brooks Co., Baltimore (whole work)..	40,243

TELEPHONE SYSTEM.—Kenton, O.—The Home Telephone Co. has let the contract for the construction of the new telephone system to the Central Construction Co., of Wauseon.

TELEPHONE LINE.—Pierre, S. Dak.—Reports state that Nornagle Zeitlow, of the Dakota Central Telephone Co., was in town Aug. 30 to make arrangements to extend the line west from Wolsey.

COALING STATION.—Pago Pago, Samoa.—Cotton Bros., Oakland, Cal., have submitted the lowest bid, at $133,387, for constructing the steel coaling sheds, wharf, etc., for the U. S. coaling station here. A report states, however, that the contract was let Sept. 13 to Healey, Tibbitts & Co., San Francisco, at $142,900.

DREDGING, ETC.—Wilmington, Del.—Bids are asked until Oct. 10 for dredging and rock removing for a channel 150 ft. wide and 18 ft. deep, in the Christiana River and Delaware Harbor, as stated in our advertising columns; $205,846 has been appropriated for this work. Wm. F. Smith, U. S. Agent, Wilmington.

◆

INDUSTRIAL NOTES.

EXHIBITS AT THE ANNUAL CONVENTION OF THE AMERICAN STREET RAILWAY ASSOCIATION.

JAMES BRYAN & CO., Pittsburg, Pa., exhibited their rail bonds.

VACUUM OIL CO., Rochester, N. Y., had an exhibit of its products.

THE CORNING BRAKE-SHOE CO., New York, showed its brake-shoes.

OHIO BRASS CO., Mansfield, Ohio, had an attractive display of brass goods.

CHAS. SCOTT SPRING CO., exhibited springs for trolley poles, car trucks, etc.

MEAKER MFG. CO., North Chicago, Ill., exhibited several car-fare registers.

STERLING ARC LAMP CO., New York, exhibited several of its enclosed arc lamps.

KOSMIC OIL FILTER CO., Easton, Pa., exhibited three sizes of Kosmic oil filters.

THE WILLIAMS TRUSS RAIL JOINT CO., Boston, Mass., exhibited a full-sized rail joint.

THE AMERICAN RAILWAY SUPPLY CO., New York, displayed a number of car name plates.

THE MONARCH STOVE & MFG. CO., Mansfield, Ohio, exhibited a track cleaner and car stoves.

JOHN T. McROY, New York, was on hand with specimens of the McRoy vitrified clay conduit.

ELMER P. MORRIS, New York, represented manufacturers of various street railway supplies.

HAM SAND-BOX CO., Troy, N. Y., exhibited a sample "Ham" Sand-Box for use upon trolley cars.

THE DUFF MFG. CO., Allegheny, Pa., showed four or five jacks suitable for car and railway work.

SENFORD MILLS, Senford, Me., displayed samples of plush and mohair suitable for car upholstery.

THE WEBER RAILWAY JOINT MFG. CO., New York, had on exhibition specimen Weber rail joints.

NEW YORK SWITCH & CROSSING CO., New York, had in operation a full-sized electric switch point.

PEARSON JACK CO., Boston, Mass., showed several sizes and styles of its well-known car replacing jack.

D. C. SWEET, Springfield, Mass, had a full-sized Sweet's carwheel grinding machine on exhibition.

A. O. NORTON, Boston, Mass., had several Norton jacks suitable for car replacement and general street railway work.

R. BLISS MFG. CO., Pawtucket, R. I., exhibited a platform equipped with two Wood's patent folding platform gates.

CHRISTENSEN ENGINEERING CO., Milwaukee, Wis., had a comprehensive exhibit of the Christensen air-brake system.

THE CHICAGO RHEOSTAT CO., Chicago, Ill., had on exhibition specimens of its automatic motor starting rheostat.

E. F. DE WITT & CO., Lansingburgh, N. Y., had on exhibition a "Common Sense" sand box for street railway use.

ROCHESTER HOSE BRIDGE CO., Rochester, N. Y., had one of its hose bridges assembled on the floor of the main hall.

LYTE STEEL & LEAD WOVEN TREAD CO., Boston, Mass., had samples of a new form of car step tread on exhibition.

DIAMOND STATE IRON CO., Wilmington, Del., had on exhibition models of the "Churchill" rail joint for tee and girder rails.

THE WM. H. GALLISON CO., Boston, Mass., called attention to its steam piping by means of a large Gallison relief valve.

GOLD STREET CAR HEATING CO., New York, had a number of car heaters on hand, of both flat and cylindrical types.

THE COLUMBIA MACHINE WORKS, Brooklyn, N. Y., had a line of trolley wheels, overhead fittings, commutator bars, etc.

THE ADAMS & WESTLAKE CO., Chicago, exhibited car curtains, lights, flexible rail bonds and numerous other supplies.

THE SANITARY ENGINEERING CO., Philadelphia, Pa., had on hand full-sized models of the "Botfield" noiseless manhole cover.

McCARDELL, WEST & CO., Trenton, N. J., exhibited one of its Trenton trolley wagons with revolving platform and extension tower.

BEMIS CAR BOX CO., Springfield, Mass., exhibited a single truck for short cars and a center-bearing double truck for long cars.

NEW YORK CAR WHEEL WORKS, Buffalo, N. Y., exhibited full-sized standard machined car wheels for electric street railway service.

THE PANTASOTE CO., New York, had several street car seats covered with different patterns of "Pantasote," a substitute for leather.

HAMPDEN CORUNDUM WHEEL CO., Brightwood, Mass., displayed a full-sized special grinding machine for truing up car wheels.

BIBBER-WHITE CO., Boston, Mass., exhibited a full line of trolley fittings, also a number of spring snap knife switches, commutators, etc.

ROBINSON RADICAL TRUCK CO. had two small working models to illustrate the action of the three pairs of wheels in rounding curves.

REED MFG. CO., Erie, Pa., Frederick C. McServees, agent, New York, exhibited several different sizes of the Reed standard pipe wrench.

J. H. McGRADY, Boston, Mass., had a model of a car roof on exhibition upon which was mounted a set of Swift's illuminated reversible signs.

THE R. WOODMAN MFG. & SUPPLY CO., Boston, Mass., exhibited an assortment of ticket punches, single and duplex, and speed gages.

AMERICAN VITRIFIED CONDUIT CO., New York, had a working full-sized exhibit of its subway system.

THE ASHTON VALVE CO., Boston, Mass, exhibited a large assortment of its well-known valves and steam gages.

THE TONKIN BOILER CO., New York, had a Tonkin, internally fired, water-tube boiler installed at one end of the exhibition hall.

THE SAFETY THIRD-RAIL ELECTRIC CO., New York, exhibited a model elevated road about 70 ft. in circumference, operated by its system.

THE STERLING SUPPLY & MFG. CO., New York, showed its fare registers, a variety of brass car fittings, car fenders and other supplies.

PENNSYLVANIA CAR WHEEL CO., Pittsburg, Pa., had specimen motor car and trailer wheels. These were 24, 28, 30 and 33 ins. standard wheels.

THE CONSOLIDATED CAR-HEATING CO., Albany, N. Y., had an array of car heaters, switches, regulators, etc., for various kinds of service.

PENNSYLVANIA STEEL CO., Steelton, Pa., had in its exhibit railway frogs, crossings, switchpoints, etc., using "Adamantine" steel for center plates.

METHUEN ELECTRIC CO., Methuen, Mass., exhibited a new form of insulator for screw coupled wire joints, intended to do away with the use of tape.

J. G. BRILL CO., Philadelphia, Pa., had a large exhibit of car trucks, including their "Perfect," "Eureka Maximum Traction" and other standard forms.

McGUIRE MFG. CO., Chicago, Ill., had on exhibition a large single car truck, a motor truck sweeper and snow plow, and several coal-burning car-heaters.

STANDARD UNDERGROUND CABLE CO., Pittsburg, Pa., showed short sections of wires and cables, which clearly indicate the make up of its goods.

DUQUESNE FORGE CO., Pittsburg, Pa., exhibited several split steel axle gears, which are built up of forged steel tires and cast-steel spokes and hub.

KEYSTONE ELECTRICAL INSTRUMENT CO., Philadelphia, Pa., had a sham switchboard, upon which was a number of station instruments and switches.

BALTIMORE CAR WHEEL CO., Baltimore, Md., exhibited a No. 10 center-bearing truck for heavy car service and a "Lord Baltimore" single truck for lighter work.

WADSWORTH, HOWLAND & CO., Boston, Mass., exhibited a number of panels coated with its coach colors, and also displayed an assortment of prepared paints.

SAMPSON CORDAGE WORKS, Boston, Mass., exhibited a case containing samples of the "Sampson Spot" braided colored cord for bell ropes and fare registers.

ROCHESTER CAR WHEEL WORKS, Rochester, N. Y., had 12 sample wheels of different sizes and four pairs of standard street railway wheels mounted upon car axles.

WAGNER ELECTRIC CO., St. Louis, Mo., had several switchboard instruments for street railway power stations of the dial dead-beat type, also switches and transformers.

PARTRIDGE MOTOR BRUSH CO., Sandusky, O., was represented by its agent, Elmer P. Morris, New York, who exhibited a case of carbon self-lubricating brushes.

CROSBY STEAM GAGE & VALVE CO., Boston, Mass., exhibited spring seat globe and angle valves, recording gages, steam gages, steam indicators and Branden pump valves.

TAUNTON LOCOMOTIVE MFG. CO., Taunton, Mass., had in the basement three full-sized snow plows, weighing from 8½ to 10 tons, and intended for city or interurban service.

WHEEL TRUING BRAKESHOE CO., Detroit, Mich., had samples of its brakeshoes. These shoes have cast pockets into which is compressed a paste of some abrasive material

THE PECKHAM TRUCK CO., New York, had an exhibit which included eleven car trucks designed for special service. This was one of the largest exhibits at the convention.

AMERICAN MASON SAFETY TREAD CO., Boston, Mass., had samples of its safety tread, which consists of a steel base supporting ribs, between which are held strips of lead.

CHAS. N. WOOD, Agent, Boston, Mass., showed a large variety of electric railway supplies, including a trolley pole catching device to hold the pole down should the wheel run off.

J. D. REED, Boston, Mass., exhibited a number of models of rail joints, track sections and methods of supporting rails included in what is termed the "Perfect" railway systems.

THE INCANDESCENT ELECTRIC LIGHT MANIPULATOR & CLEANER CO., Hyde Park, Mass., showed an extension pole and clamp for replacing or cleaning incandescent light bulbs.

MICA INSULATOR CO., New York, exhibited samples of "micanite" goods, showing how this material is made up for commutators, insulating rings and for other electrical purposes.

THE HIPWOOD-BARRETT CAR & FENDER CO., Boston, Mass., exhibited a very neat model of a new type of car fender provided with a device to follow any unevenness of the street surface.

BORDMAN-TUCKER CO., Boston, Mass., had a number of railway telephones in different parts of the hall and a signal telephone set intended for use along the suburban track on exhibition.

SPRINGFIELD MFG. CO., Bridgeport, Conn., had a working exhibit, which included one of its steam and electric car wheel grinders belted to a motor with a pair of wheels in place ready for truing up.

H. W. JOHNS MFG. CO., New York, displayed its regular line of electric railway and car material, including car heaters and insulators of various kinds for use in motor and line construction, etc.,

JOHN F. OHMER REGISTER CO., Dayton, O., exhibited the top and end of a car with the Ohmer register in place. This register makes a printed classified statement of the various fares collected.

BRADY METAL CO., New York, had a number of sample bearings lined with its special lead alloy. Samples of "Magnus" metal and car brasses made of this material and battery zincs were also shown.

JOSEPH DIXON CRUCIBLE CO., Jersey City, N. J., made a display of its products suitable for railway use, including grease for trolleys, graphite paint, belt dressing and other graphite products.

THE BILLINGS & SPENCER CO., Hartford, Conn., displayed several artistic panels upon which were mounted a large number of drop-forged commutator segments for a variety of motors and generators.

PETTIGELL & ANDREWS CO., Boston, Mass., had on exhibition a 600-ft. roll of 500,000 circular mils Okonite wire and short samples of smaller sizes. A miscellaneous assortment of supplies was also shown.

THE AMERICAN RAIL JOINT & MFG. CO., Cleveland, Ohio, had a number of its rail joints on exhibition.

CAMBRIA IRON CO., Johnstown, Pa., showed short sections of rails cut at joints showing the fish-plates and how the joints were made.

THE COMPOSITE BRAKE SHOE CO., Boston, Mass., exhibited a number of specimen "compo" (cork inserted) brake shoes which had seen hard service and several new shoes showing the original appearance.

BEVERLY MACHINE WORKS, Beverly, Mass., had an exhibit of ratchet street car brakes, ratchet clutch vertical brake wheels for vestibule cars, and an assortment of car trimmings and small brass street railway supplies.

BRIGGS CAR CO., builders of the Duplex convertible car, had on exhibition a fine specimen of car work in an improved cylindrical duplex car which can be changed from a closed to an open car by sliding up the windows and sides.

ALBERT & J. M. ANDERSON, MFG. CO., Boston, Mass., displayed a light steel trolley cross-over, enclosed incandescent arc lamps burning 150 hours, hangers, pull-offs, span insulators and a large variety of trolley parts and brass goods.

BOSTON ARTIFICIAL LEATHER CO., Boston, Mass., exhibited a line of material known as "moroccoline," a material used for upholstering chairs, car seats, etc. Several street car seats were covered to show the appearance under working conditions.

HAROLD P. BROWN, New York, had on exhibition specimens of the Edison-Brown plastic rail bond, of various styles. The wearing qualities of this bond in comparison with other types, was shown by bonds which had been in use for some time.

WM. WHARTON, JR., & CO., Philadelphia, Pa., Harrington, Robinson & Co., Agents, Boston, Mass., had on exhibition specimens of special work, such as cross-overs, frogs and switchpoints, all provided with manganese steel wearing plates.

PROVIDENCE CAR FENDER CO., Providence, R. I., had three dash-boards representing car fronts placed together upon which were mounted "Providence Fenders." Distributed about were parts of this fender to show the construction and simplicity of this type.

SHERBURNE & CO., Boston, Mass., as Eastern Agents of the Watson-Stillman Co., New York city, showed hydraulic rail benders with vertical and horizontal plungers, hydraulic punches and jacks, and a motor lifting jack intended for use in the car pit of car barns.

TAYLOR ELECTRIC TRUCK CO., Troy, N. Y., exhibited an improved single truck, a single truck with extension truss for long cars, single extra heavy truck with an 8-ft. wheel base and a pair of regular "Empire State" radial trucks of new design with a swinging bolster.

JOHN STEPHENSON CO., LTD., New York, had inside the hall a beautiful 6-ft. model of the Broadway cable car complete in all details. Just outside the exhibition building was a standard full-sized car such as is now in use upon the Metropolitan Madison Ave. line, New York city.

WALKER CO., Cleveland, O., had a section of conduit street railway about 50 ft. long, complete in all details, and upon this was mounted a single truck equipped with two 33 "S" Walker motors. In addition there were two 15 "L" motors for elevated service; a 33 "S" steel railway motor; solenoid "S" controllers, open and in operation to show the solenoid spark blow-out. Other exhibits showed the construction of its motors.

WILLIAM F. ELLIS, Agent, Boston, Mass., displayed samples of the goods, for which he is the New England agent, as folows: Ramapo Iron Works, Hillburn, N. Y., "Diamond S" brake shoe; Dilworth, Porter & Co., Ltd., Pittsburg, Pa., Goldie perfect point spike and claw tie-plate; Continuous Rail Joint Co. of America, Newark, N. J., joints for tees and girder rails; J. H. Sternbergh & Sons, Reading, Pa., Harvey grip and U. S. rolled thread bolts of steel.

THE JOHNSON CO., Lorain, Ohio, had two exhibits, one on the main floor including short sections of rails and cable slot rails, and a model Dupont truck, and a larger one in the basement. The latter included full-sized frogs, cross-overs, switchpoints, crossings, etc., cast together with steel wearing plates. Also a Dupont single truck with steel motors and controller, and a heavy center-bearing truck for elevated or interurban traffic. Mounted upon wooden frames were also two steel motors swung open to show their construction.

GENERAL ELECTRIC CO., Schenectady, N. Y., made no attempt to display heavy machinery, but its exhibit was by all odds the most prominent at the convention. It consisted of an immense globe, 26 ft. in diameter, mounted upon a cylindrical pedestal. The globe was made in 36 sections, fastened together, and covered with nine layers of papier mache. The continents and islands were then painted on, and small incandescent lamps were placed in all countries where General Electric apparatus is in use. The various countries were marked by small silk flags. Around the pedestal on recessed shelves were placed specimen trolley fittings, switches, circuit breakers, lightning arresters, etc. The inside was fitted up to make a very comfortable reception room. To the rear of the globe was arranged a G. E. motor, equipped with a prony brake, controller, resistance, etc., in circuit with a G. E. car watt-meter, an instrument designed to record the power consumed by an electric car in regular operation, and a switchboard with various instruments was also shown.

WESTINGHOUSE ELECTRIC & MFG. CO., Pittsburg, Pa., had an exhibit which undoubtedly attracted as many visitors as any other at the exhibition. This consisted of a large frame supporting three plates of glass 30 × 72 ins., upon the front of which were secured brass letters forming the sentence "The Name Westinghouse is a Guarantee." The backs of these plates were covered with tin foil and a high electro-motive force supplied to the letters and tin foil caused sparks to pass from the letters around the plate to the tin foil producing a beautiful and noisy effect. To obtain the high potental, a 25-K-W. rotary transformer with separately excited fields, took current from a 300-volt direct-current generator directly connected to a two-phase alternating current motor, the rotary took current from the Boston Lighting Co. The current from the alternating side of the rotary converter operated either 12 alternating arc lamps at 105 volts, or was switched onto a 15-K-W. auto-transformer capable of raising from 80 to 4,000 volts in steps of 5 volts. It then entered the primary of a 50-K-W. high-tension transformer, which stepped the potential up as high as 60,000 volts. The power consumed varied from 5 to 15 K-W. The exhibit also included three standard street railway motors mounted on frames to show their interior, a 35-HP. armature partially wound to show its construction, and a full line of electric apparatus for cars and stations. In addition a new form of pneumatic switch and current breaker was shown, which was operated by air under a pressure of 80 lbs. per sq. in., obtained from a rotary pump built by the Westinghouse Air Brake Co., which was driven by a 2½-HP. motor.

Contract Work Should Always be Advertised in a Paper Read by Contractors.

Nearly Every Prominent Contractor and Manufacturer of Contractors' Supplies in North America Reads Engineering News.

INDUSTRIAL NOTES. 96

PERSONAL.

Mr. Henry C. Becker has been appointed President of the Board of Water Commissioners of Watervliet, N. Y.

Dr. George W. Hill has been appointed Lecturer in Celestial Mechanics in Columbia University, New York city.

Prof. J. M. Page has been appointed Associate Professor of Mathematics in the University of Virginia, Charlottesville, Va.

Mr. Ernest Rutherford has been appointed Professor of Physics in McGill University, Montreal, Que., to succeed Prof. John Cox.

Mr. John Lowber Welsh, President of the Union Traction Co., which controls all the street car lines in Philadelphia, Pa., has resigned.

Prof. E. F. Nichols, of Colgate University, Hamilton, N. Y., has accepted the position of Professor of Physics in Dartmouth College, Hanover, N. H.

Mr. Frank E. Wade, electrical engineer, of Scranton, Pa., has gone to Para, Brazil, to plan and erect an electric light and power plant for the government.

Mr. Joseph A. West, civil engineer, of the Sumpter Valley Ry., with headquarters at Baker City, Ore., has been appointed Chief Engineer of the Utah & Pacific R. R.

Mr. Henry S. Fleming, Secretary of the Anthracite Coal Operators' Association, sailed for Europe, Sept. 17, for the purpose of ascertaining what markets exist abroad for American anthracite.

Mr. Irwin J. Macomber, Instructor in Electrical Engineering in Cornell University, Ithaca, N. Y., has been appointed Professor of Electrical Engineering in the Armour Institute of Technology, Chicago, Ill.

Mr. Edwin M. Herr, Superintendent of Motive Power, of the Northern Pacific Ry., with headquarters at St. Paul, Minn., has resigned to become Assistant General Manager of the Westinghouse Air Brake Co., Pittsburg, Pa.

Mr. David J. Jennings, General Manager of the New York, Chicago & St. Louis R. R., has been appointed Manager of the Hoosac Tunnel & Wilmington R. R., with headquarters at Holyoke, Mass., to succeed Mr. Alfred W. Street.

Major Thomas W. Symons, M. Am. Soc. C. E., Corps of Engineers, U. S. Army, with headquarters at Buffalo, N. Y., has been appointed a member of the board of engineers to study and revise the subject of improvements in the waterways at Savannah, Ga., and Beaufort, S. C.

Prof. George Herbert Hamlin, M. Am. Soc. C. E., for 26 years a member of the Faculty of the University of Maine, Orono, Me., and for 17 years Professor of Civil Engineering, has resigned. Mr. Nathan Clifford Glover, of the class of 1896, Assistant Professor of Civil Engineering, has been appointed to succeed him.

Prof. Earle B. Lovell, Adjunct Professor of Civil Engineering in Lafayette College, Easton, Pa., for the past three years, has resigned to accept the position of Adjunct Professor of Civil Engineering in Columbia University, New York city, with special charge of railway engineering and of the Summer School of Surveying.

Mr. Henry St. L. Coppee, M. Am. Soc. C. E., United States Assistant Engineer, with headquarters at Greenville, Miss., has been given charge of all government levees in the Lower Yazoo Levee District in Mississippi. Mr. E. C. Tollinger has been appointed United States Assistant Engineer in charge of the government levees in the Upper Tensas Levee District in Arkansas and Louisiana.

Mr. Gardner Stewart Williams, Assoc. M. Am. Soc. C. E., lately Civil Engineer to the Board of Water Commissioners, Detroit, Mich., has been appointed Professor of Civil Engineering in charge of the Hydraulic Laboratory of Cornell University, Ithaca, N. Y. This is a newly created chair in the College of Civil Engineering. Mr. Williams graduated from the University of Michigan, Ann Arbor, Mich., in 1889, and has spent the nine years since then in water-works construction and on the United States Lighthouse Board.

OBITUARY.

Mr. Edward Allen, contractor and builder of chemical and acid furnaces, of Baltimore, Md., died Sept. 16, aged 55.

Mr. William Becker, stone contractor, of Pittsburg, Pa., died Sept. 14, aged 49.

Mr. Henry A. Cornwall, Manager of the Middlesex Quarry Co., Portland, Conn., died in Providence, R. I., Sept. 17, aged 55.

Mr. Elijah Brainard, dredging contractor, of New York city, was accidentally killed by a fall, Sept. 14. He was 55 years of age.

Mr. E. O. Jones, Superintendent of Bridge Construction of the Houston & Texas Central R. R. for the past 30 years, died at his home in Ennis, Tex., Sept. 9, aged 67.

Mr. Lewis E. Haupt, civil engineer, died in Philadelphia, Pa., Sept. 17, aged 72. He was a brother of Brig.-Gen. Herman Haupt, and was associated with him in the engineering work of the Army of the Potomac during the Civil War. He was an uncle of Prof. Lewis M. Haupt, M. Am. Soc. C. E., of Philadelphia.

Mr. Charles Spinks, of Newport, Ky., for many years one of the leading general contractors of that state, was accidentally drowned in the Ohio River, Sept. 13, while superintending the removal of some empty barges. He built many of the newly constructed streets in Newport, Lexington and Louisville, Ky., and in Cincinnati, O. He also recently completed a $400,000 contract for streets in New Orleans. He was 68 years of age.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Sept. 19. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.

CIVIL ENGINEERS' CLUB OF CLEVELAND.
Sept. 27. Secy., Wm. H. Searles, Case Library Bldg., Cleveland, O.

FRANKLIN INSTITUTE.
Sept. 27. "Rail Bonding with Especial Reference to Cast Weld Joints," W. E. Harrington. Secy., Wm. H. Wahl, 15 South Seventh St., Philadelphia, Pa.

CENTRAL STATES WATER-WORKS ASSOCIATION.
Sept. 27-29. Annual meeting, Springfield, O. Secy., John Fisher, 11 Riley St., Hamilton, O.

AMERICAN PUBLIC HEALTH ASSOCIATION.
Sept. 27-30. Annual meeting, Ottawa, Canada. Secy., Dr. C. O. Probst, Columbus, O.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS.
Sept. 28. Secy., R. W. Pope, 26 Cortlandt St., New York city.

WESTERN SOCIETY OF ENGINEERS.
Sept. 28. "The Foundations for the U. S. Government Post Office and Customs House Building at Chicago," W. Sooy Smith. Secy., N. L. Litten, Monadnock Block, Chicago, Ill.

ENGINEERS' CLUB OF COLUMBUS.
Oct. 1. Secy., H. M. Gates, 12½ North High St., Columbus, O.

CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Oct. 3. Secy., C. L. Annan, City Engineers' Office, St. Paul, Minn.

ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Oct. 3. Secy., H. J. March, Library Bldg., Buffalo, N. Y.

AMERICAN SOCIETY OF CIVIL ENGINEERS.
Oct. 5. Secy., C. W. Hunt, 220 W. 57th St., New York city.

ENGINEERS' CLUB OF ST. LOUIS.
Oct. 5. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.

BROOKLYN ENGINEERS' CLUB.
Oct. 6. Secy., A. J. Prevost, Jr., 191 Montague St., Brooklyn, N Y.

CHICAGO ELECTRICAL ASSOCIATION.
Oct. 7. Secy., J. R. Cravath, 825 Monadnock Block, Chicago, Ill.

TECHNICAL SOCIETY OF THE PACIFIC COAST.
Oct. 7. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.

MONTANA SOCIETY OF ENGINEERS.
Oct. 8. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.

NATIONAL ROAD PARLIAMENT.
Oct. 8. Omaha, Neb. Martin Dodge, Director Office of Road Inquiry, Washington, D. C.

ENGINEERS' CLUB OF KANSAS CITY.
Oct. 10. Secy., F. W. Tuttle, Baird Bldg., Kansas City, Mo.

THE LOUISIANA ENGINEERING SOCIETY.
Oct. 10. Secy., J. F. Coleman, 712 Union St., New Orleans, La.

NEW ENGLAND RAILROAD CLUB.
Oct. 11. Secy., Edw. L. Janes, P. O. Box 1158, Boston, Mass.

DENVER SOCIETY OF CIVIL ENGINEERS.
Oct. 11. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Colo.

NORTHWEST RAILWAY CLUB.
Oct. 11. Secy., T. A. Foque, Soo Line, Minneapolis, Minn.

AMERICAN RAILWAY ASSOCIATION.
Oct. 12. Holland House, New York. Secy., W. F. Allen, 24 Park Place, New York.

ENGINEERING ASSOCIATION OF THE SOUTH.
Oct. 13. Secy., C. B. Wilson, 1000 Broad St., Nashville, Tenn.

CANADIAN SOCIETY OF CIVIL ENGINEERS.
Oct. 13. Secy., C. A. McNab, 112 Mansfield St., Montreal, Canada.

ST. LOUIS RAILWAY CLUB.
Oct. 14. Secy., H. H. Roberts, 511 Commercial Bldg., St. Louis, Mo.

ENGINEERS' CLUB OF PHILADELPHIA.
Oct. 15. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.

TECHNICAL CLUB OF OMAHA.
Oct. 17. Secy., J. Harry Lawrie, Omaha, Neb.

ENGINEERS' CLUB OF MINNEAPOLIS.
Oct. 17. Secy., H. E. Smith, 1620 S. E. 4th St., Minneapolis, Minn.

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.
Oct. 18. Secy., R. A. Fessenden, 410 Penn Ave., Pittsburg, Pa.

AMERICAN INSTITUTE OF MINING ENGINEERS.
Oct. 18. Annual meeting, Buffalo, N. Y. Secy., R. W. Raymond, P. O. Box 223, New York city.

AMERICAN ASSOCIATION OF RAILWAY SUPERINTENDENTS OF BRIDGES AND BUILDINGS.
Oct. 18-20. Annual meeting, Richmond, Va. Secy., S. F. Patterson, Boston & Maine R. R., Concord, N. H.

ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Oct. 19. Secy., Frank H. Olmsted, Los Angeles, Cal.

BOSTON SOCIETY OF CIVIL ENGINEERS.
Oct. 19. Secy., S. E. Tinkham, City Hall, Boston, Mass.

WESTERN FOUNDRYMEN'S ASSOCIATION.
Oct. 19. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.

PENNSYLVANIA STREET RAILWAY ASSOCIATION.
Oct. 19-20. Annual meeting, Scranton, Pa. Secy., S. P. Light, Lebanon, Pa.

AMERICAN GAS LIGHT ASSOCIATION.
Oct. 19-21. Annual meeting, Niagara Falls, N. Y. Secy., Alfred E. Forstall, Montclair, N. J.

ENGINEERS' CLUB OF CINCINNATI.
Oct. 20. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.

NEW YORK RAILROAD CLUB.
Oct. 20. Secy., W. W. Wheatley, 168 Montague St., Brooklyn, N. Y.

SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Oct. 20. Secy., F. A. Charpiot, P. O. Box 13, Savannah, Ga.

AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENT.
Oct. 26-28. Annual meeting, Washington, D. C. Secy., D. L. Fulton, Bureau of Highways and Sewers, Allegheny, Pa.

SOCIETY OF NAVAL ARCHITECTS AND MARINE ENGINEERS.
Nov. 10-11. Annual meeting. Secy., Francis T. Bowles, 12 West 31st St., New York.

THE LOUISIANA ENGINEERING SOCIETY.—A meeting of this society was held Sept. 12. Owing to inclement weather Mr. Llewellyn's paper, "The Evolution of Structural Designs," was postponed.

AMERICAN RAILWAY ASSOCIATION.—The Fall meeting of this association will be held at the Holland House, New York city, Oct. 12, at 11 a. m. Reports will be presented by the Executive Committee and the Committees on Train Rules, Car Service, Safety Appliances, Interlocking and Block Signals, Nominations and the Metric System.

NORTHWEST RAILWAY CLUB.—The first fall meeting of this club was held at St. Paul on Sept. 13. Two papers were read, one by Mr. J. C. Barber, of the Standard Truck Construction Co., Chicago, on "Car Truck Construction and Repairs," the other by Mr. J. H. Goodyear, Chicago & Great Western Ry., on "The Proposed Consolidation of the Master Mechanics' and Master Car Builders' Associations."

FRANKLIN INSTITUTE.—The following is the schedule of meetings to be held during September and October: Sept. 27, Electrical Section, "Rail Bonding with Especial Reference to Cast Weld Joints," Mr. W. E. Harrington; "The Present Status of the Storage Battery," Mr. Herbert Lloyd; Oct. 5, meeting of the Committee on Science and the Arts; Oct. 12, Mining and Metallurgical Section, "Anthracite Coal in Peru," Wm. Griffith, Mining Engineer, Scranton, Pa.

MASSACHUSETTS STREET RAILWAY ASSOCIATION.—The annual meeting of this association was held in Boston, Mass., on Sept. 14. The following officers were elected for the ensuing year: Pres., P. F. Sullivan; First Vice-Pres., John R. Graham; Second Vice-Pres., E. C. Foster; Secy., Chas. S. Clark; Treas., W. F. Pope; Executive Committee, A A. Glasier, E. P. Shaw, Wm. A. Bancroft, F. H. Dewey, S. M. Thomas; Auditing Committee, John N. Akarman, Robert S. Goff, P. L. Saltonstall.

Charles S. Clark, Secy.

NATIONAL ROAD PARLIAMENT.—Mr. Martin Dodge, Director of Office of Road Inquiry, Washington, D. C., acting on behalf of the President of the National Road Parliament, has called a meeting for Oct. 8, at 10 a. m. The meeting will be held in the Auditorium on the grounds of the Trans-Mississippi Exposition, at Omaha, Neb. The object of this meeting is to awaken and promote a general interest in the improvement of public roads, to discuss the best methods of building and maintaining them and to promote good roads legislation.

OHIO VALLEY IMPROVEMENT ASSOCIATION.—The anual convention of this association was held on Sept. 14-15 at Wheeling, W. Va. It will be remembered that this organization has as its object the promotion of industry and commerce in the region contiguous to the Ohio River, by securing the construction by the Government of dams and locks on the navigable rivers.

Resolutions were adopted urging upon Congress the necessity of improving the Ohio River to Cairo, and particularly recommending a dam just below Cincinnati to form a pool there, and one at Marietta. It was also recommended that there be governmental improvements at the pass and at the mouth of the Mississippi.

Louisville, Ky., was selected as the convention city for next year, and the following officers were elected for 1898: Pres., John L. Vance, Gallipolis; Secy., E. P. Wilson, Cincinnati; Vice-Presidents, Hullipen Quarier, Wheeling; F. A. Laidley, Ohio; W. W. Hite, Kentucky; John Gilbert, Indiana; Capt. J. S. Dravo, Pennsylvania; Marion Wright, Illinois.

THE CIVIL ENGINEERS' CLUB OF CLEVELAND.—A meeting of this club was held on Sept. 13, with 27 members and visitors present. The proposed amendment to the constitution, changing the name of the club to "The Cleveland Society of Civil Engineers," was taken up and discussed and lost by a large majority, as was also the original motion to adopt the name, "The Cleveland Society of Engineers." A further motion to adopt "The Cleveland Technical Society" met a like fate.

Mr. John P. Coffin then read a paper on "Some Points of Interest Gathered from an Inspection of the Machinery of Vessels on the Great Lakes, Together with a Synopsis of the Rules Compiled by the Great Lakes Register for Future Construction, and the Reasons for the Same," which was listened to with great attention. The paper reported upon the prevailing types of boilers, engines, pumps and other machinery now afloat on the Great

Lakes, as ascertained from a critical survey of over 1,300 vessels; it mentioned certain defects in design and proportion, and described the rules adopted to govern future construction. Wm. H. Searles, Secy.

◆

NEW PUBLICATIONS.

PROCEEDINGS AMERICAN RAILWAY MASTER MECHANICS' ASSOCIATION, 1898.—Published by the Association, John W. Cloud, Secretary, Chicago, Ill. Cloth, 6 × 9 ins.; pp. 288; illustrated.

This issue of the proceedings contains the papers, special committee reports and the discussions and business transactions of the annual convention, held at Saratoga, N. Y., June 20, 21 and 22, 1898, which were fully reported in Engineering News, of June 23 and 30, 1898.

JOURNAL OF THE AMERICAN ASIATIC ASSOCIATION, Vol. I., No. 1.—Edited by John Foord, P. O. Box 1500, New York city.

The American Asiatic Association was organized in June last. It includes many of the firms, corporations and individuals concerned in the American export trade in the far East. The "Journal" is to be issued "as occasion may require," in order to facilitate the interchange of views among the members, and to provide a medium for the diffusion of information bearing on the development of commercial enterprise in Eastern Asia and Oceanica. The first number of the "Journal" is only four pages 8 × 10 ins. It contains in addition to a number of letters bearing upon the objects of the Association some statistics of Chinese customs revenue and a report of the new trade regulations on the Yangtze River.

THE OHIO MINING JOURNAL.—Official organ of the Ohio Institute of Mining Engineers, Nos 24 and 25. Proceedings of the meetings of Jan., 1895, and Jan. 1896. Published by R. M. Haseltine, Secy. and Treas., Columbus, O. Paper; 6 × 9 ins.; pp. 108, 158.

This volume contains a number of practical papers and discussions of subjects relating to coal mines. Among them are the following: "Long Wall Mining," by Thomas West; "Spontaneous Combustion," by John P. Jones; "The Protection of Miners, by Andrew Roy; "Mine Surveying," by Prof. Frank A. Ray; "Practical Mining," by Thomas H. Love; "Economic Questions Connected with Retort Coke Ovens, with the Resulting By-products," by R. M. Atwater; "Wire Rope Haulage, Its Uses and Abuses," by T. E. Hughes; "Theoretical and Practical Mine Ventilation," by F. C. Keighley; "Mine Wiring—Distribution of Electricity in Coal Mines," by C. A. Pratt.

ILLINOIS SOCIETY OF ENGINEERS AND SURVEYORS.—Proceedings of the 13th Annual Meeting, held at Peoria, Ill., Jan. 26, 27, 28, 1898. Recording Secretary, Mr. J. C. Quade, City Engineer, Kewanee, Ill. Paper; 8¾ × 6 ins.; pp. 198. 50 cts.

Contents: Proceedings of meeting and address of the retiring President, Mr. C. C. Stowell; "Chemistry of Water Supply," Prof. A. W. Palmer; "Purification of Sewage by the Ferrozone Polarite System," John W. Alvord; "Deep Well Pumping," E. E. Johnson; "The Improvement of Transportation in Country Districts," E. E. Russell Tratman; "Brick and Macadam Country Roads," J. Ed. Miller; "Improving the Roads of Illinois," J. T. Schmeltzer; Reports of Committees on Public Highways, Water-Works and Supply, Land and City Surveying, Drainage, Weights and Measures, Municipal Engineering, Paving Brick, and Instruments, Blanks and Records; "Railway Construction in Mexico," L. P. Atwood; "Cost of Tie-Plates on R. G. S. M. & P. Ry.," L. P. Atwood; "U. S. Government Geological Survey," John T. Stewart; "Proposed State Supervision of Water Supply and Sewage Disposal," J. A. Harman; "City Map Making," M. Huebinger; Report of Treasurer; List of Members.

MICHIGAN ENGINEERS' ANNUAL. 1898.—Published by the Michigan Engineering Society. F. Hodgman, Secretary, Climax, Mich. Paper; 8⅜ × 5¾ ins.; pp. 200. 50 cts.

Contents: "Our Country Roads," F. Hodgman; "The Engineer's Assistant," W. B. Sears; "Our Absent Members," G. G. Hubbell; "The U. S. Deputy Surveyor," Dorr Skeels; "The Ladies," Col. E. W. Muenscher; "The Country Road Maker," Wm. Appleton; "Engineer's Personal Finances," G. L. Wells; "The Sewage of Pontiac," H. E. Riggs; "A Barrel of Salt," G. G. Hubbell; "Curb and Sidewalk Grades," W. D. Elder; "Interlocking Switch and Signal Systems," Alex. Moore; "Electrolysis," R. C. Smith; "The Intakes of the Great Lakes," T. W. Barrally; "Contract vs. Day Labor," E. W. Muenscher; "The Horseless Carriage," R. E. Olds; "The Inspector and his Duties," H. Hodgman; "The Propeller Wheel," H. C. Pearsons; "A Case in Land Surveying," F. Hodgman; "Materials for Street Paving," "Report of Committee on Drain Laws and Legislation," E. Strong; "Report of Annual Convention and List of Members."

IOWA ENGINEERING SOCIETY.—Proceedings of Tenth Annual Meeting at Cedar Rapids, Iowa, Jan. 19-20, 1898. Secretary, E. P. Boynton, Cedar Rapids, Ia. Paper; 8¾ × 6 ins.; pp. 152. 50 cts.

Contents: Business meeting, addresses and committee reports; "Street Grades," L. H. Stone; "Street Car Service," B. Schreiner; "The Country Surveyor as a Map Publisher," G. S. Pingrey; "Laying a Submerged Water Main," E. P. Boynton; "The Centreville Cemetery," Wm. Steyh; "Education as a Means," Prof. J. T. Beard; "Water Supply of Des Moines," L. Higgins; "Interpretation of Sanitary Water Analysis," Prof. Floyd Davis; "Iowa Geology from an Engineering View," Prof. S. Calvin; "Lights and Lenses," Prof. W. H. Mahaffie; "Artesian Wells of Iowa," Prof. W. H. Norton; "Portland Cement," J. W. Dickinson; "Des Moines Paving Brick and Clays," E. P. Boynton; "Tests of Iowa Building Stone and Paving Brick," Prof. A. Marston; "Graphic Determination of Stresses," Prof. A. V. Sims; "Purification of Water for R. R. Purposes," Prof. Floyd Davis.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

PIPE THREADING AND CUTTING MACHINES.—The Bagnall & Keller Mfg. Co., Edwardsville, Ill. Catalogue No. 14. Pamph., 4½ × 6¾ ins.; pp. 108.

This catalogue contains illustrations and price lists of a great variety of pipe fitters' tools, including the "Peerless" and "Duplex" threading and cutting machines, vises, taps, dies, etc.

SHEET METALS AND METAL SPECIALTIES.—Merchant & Co., Philadelphia, Pa. Pamph., 6 × 9 ins.; pp. 112.

This is an illustrated catalogue and price list of a great variety of things. The firm of Merchant & Co. owns a large tin plate, smelting and refining works, and warehouses in Philadelphia, New York, Brooklyn and Chicago, where are carried stocks of metals, tin-plate, metal shingles, ventilators, cornices, troughs, finials, metallic lathing, sheet metal pipes, and many other articles used by builders. The catalogue will be of service especially to architects and workers in sheet metal.

THE LAKE SHORE LIMITED.—Passenger Department, New York Central & Hudson River R. R., New York, N. Y. Pamph., 4 × 8 ins.; pp. 32; illustrated.

This pamphlet contains, in addition to illustrations and a brief description of the cars and their appointments, a descriptive time table detailing in concise language the principal objects of interest that may be seen from time to time as the train progresses on its daily journey. For instance, in this time table the passenger is given the name of each river crossed, where it rises and where it empties, the name of the town he is passing, its population, principal industries, etc., etc., and a variety of similar information which is of particular interest to the traveler, and which he ordinarily never obtains except at the pains of many questions and much exertion. So far as we know this is a feature not heretofore made use of in railway advertising, and it is in every respect a meritorious one. A copy of this pamphlet will be sent free to any address.

RAILWAYS.

ABERDEEN & ASHBORO.—This company is now pushing work rapidly on the extension from Troy to Mount Gilead, via Wadeville, N. C., a distance of 13.8 miles, and it is expected that track will be laid by the middle of October. The line is being built by Carpenter & Gibbs. Pres., A. F. Page, Aberdeen, N. C.; Ch. Engr., J. M. Bandy, Greensboro, N. C.

ARIZONA & SOUTHEASTERN.—The Naco branch of this railway, from a point on the main line, eight miles west of Bisbee, Ariz., to the boundary line of Mexico, a distance of four miles, has recently been completed. Supt., Ben Williams, Bisbee.

BAKERSFIELD & LOS ANGELES.—This company has been incorporated in California, according to reports, to construct a railway from Bakersfield over the Tejon Pass to Los Angeles, Cal., a distance of 200 miles. It will connect with the Southern California, a branch of the Santa Fe, running from Mojave to Los Angeles, and with the San Francisco & San Joaquin Valley Ry., thus giving San Francisco another transcontinental road. The incorporators are, Claus Spreckels, John D. Spreckels, A. B. Spreckels, Robert Watt and A. H. Payson, of San Francisco, Cal.

CHICAGO & WABASH VALLEY.—This company was incorporated in Indiana, Sept. 10, with a capital stock of $50,000, to construct about 23 miles of railway from reclaimed lands in Jasper county, purchased four years ago by B. J. Gifford, to a connection with the Eastern Illinois Ry. The incorporators are: Benjamin J. Gifford, Pres., Kankakee, Ind.; James E. Jones, Harlan M. Stone, Charles D. Henry, John B. Reed, Edward D. Calkins and Charles B. Campbell. Mr. Gifford has informed us that the right of way has been obtained and the ties and rails secured; also that the length of the line, at first, would be ten miles.

CHINA.—It is announced that the final contract for granting a concession for the construction of a railway from Hankow to Hong Kong was signed at Washington, D. C., Sept. 14, by the Chinese minister and the American China Development Co. Calvin S. Brice, 80 Broadway, New York, who is said to be the chief promotor of the project, is quoted as stating that the company now has a part of its engineering force on the field, and that a new corps of engineers is being organized, which will make the survey, beginning at Hankow and extending to Canton and thence to Hong Kong, and also beginning at the southern end and coming north on an independent line. The length of the completed line will be over 900 miles, and the estimated cost is from $20,000,000 to $30,000,000. John D. Rockefeller, Levi P. Morton and George P. Bliss are also said to be interested.

CUBA.—Press reports state that Pearson, Simpson & Vaudaria, administrators and engineers of the Western R. R. of Havana, are said to contemplate the extension of its line in Pinar del Rio.

DULUTH & NORTHEASTERN.—This company has been incorporated in Minnesota to build a railway from the Duluth & Iron Range R.R., near Bassett Lake, in a southeasterly direction to Island Lake, 35 miles, and it is proposed to haul logs to this latter place, which is on the Cloquet River. About two hundred men are now said to be at work on the road. The incorporators are, Frederick Weyerhauser, St. Paul, Minn.; J. B. Phelps, Davenport, Ia.; H. C. Hornby, J. E. Lynds and J. H. Heninger, of Cloquet, Minn.

ELK & HIGHLAND.—C. H. Kemp, Kane, Pa., informs us that all the contracts have been let for the construction of this proposed steam railway from Coon Run, Elk county, to Portland, Pa., a distance of 17 miles. Pres., D. H. Miller, of Kane.

ESQUIMALT & NANAIMO.—Reports state that this railway is to be extended from Wellington to Departure Bay, and that new wharves will be built at the latter place. Pres., A. Dunsmuir, Victoria, B. C.

FORT DODGE & OMAHA.—This company was incorporated in Iowa, Sept. 14, with a capital stock of $5,000,000, to construct a line from Fort Dodge southwest to Omaha, via Council Bluffs, Ia., a distance of about 200 miles. Preliminary surveys have been made. The incorporators are: John F. Duncombe, Chas. E. Grafton, Clarence A. Moore, Henry B. Litchfield and N. C. Phillips.

FORT WORTH & RIO GRANDE.—Press reports state that Special Master Thomas P. Martin, of Fort Worth, Tex., has sold the Pan Handle branch of this line, from Pan Handle to Washburn, Tex., 15 miles, for $66,240, the purchaser being E. Wilder, of Topeka, Kan.

GEORGE'S CREEK & CUMBERLAND.—Jas. P. Gaffney, Ch. Engr., Cumberland, Md., writes us, regarding improvements to this line, that no extensions are at present contemplated. Construction from year to year is confined to the betterment of the road, which was completed in 1880, and new steel viaducts have replaced the original wooden structures. The Toledo Bridge Co., Toledo, O., has just completed a viaduct, 270 ft. long and 70 ft. high, at Nedham's Run, on this line. The approaches to this viaduct have been regraded and several sharp curves eliminated. Pres., Jas. A. Millholland, Cumberland.

GREENFIELD & MAXWELL.—J. H. Moulden, Greenfield, Ind., informs us that this proposed railway will not be constructed, as the necessary subsidy was not granted. The company was organized by Mr. Moulden and others to build six miles of line to connect the Cleveland, Cincinnati, Chicago & St. Louis Ry. at Maxwell, Ind., with the Pennsylvania system.

HONDURAS.—Wm. S. Valentine, 51 East 44th St., New York, is quoted as stating that the Honduras syndicate, of which he is a managing director, has completed five miles of new railway, and has graded ten miles additional, and that the old line, which was 57 miles in length, has already been transferred to the syndicate. When completed the road will be about 220 miles long. Construction work has been temporarily suspended.

MARSHALL, TIMPSON & SABINE PASS.—T. S. Garrison, Gen. Mgr., Timpson, Tex., informs us that grading has been completed on this line to a point within two miles of Carthage, and that the rails will soon be laid and the work completed within 30 days. The route is from Timpson to Carthage, Tex., a distance of 20 miles. Pres., L. F. Limbert, Dayton, O.

NORTH BEND & KETTLE CREEK.—This company has recently completed the building of a 3-mile extension from Lebo Run to Black Forest, Pa. A. H. Shaffer, Ch. Engr., Emporium, Pa.

OHIO.—Bids are asked by the commissioners of water works of Cincinnati, O., until Oct. 18, for the construction of a railway track and the delivery of track material on the water-works grounds, between the Cincinnati Georgetown & Portsmouth R. R. and the eastern pumping station of the Cincinnati Water-Works, near the village of California, O.; bond, $500. Pres., Aug. Herrmann, of Cincinnati.

ONTARIO & RAINY RIVER.—We are informed that the surveys have been under way for about two months on a route from Port Arthur to Rainy Lake, a distance of 200 miles, but that no decision has yet been made regarding the route. The first 20 miles have been located and let to E. F. Fauquier, of Ottawa, Ont., who began work on Aug. 10, and has about 250 men and 50 teams on the line, the force to be increased as fast as the line is located. Pres., Wm. Mackenzie, Toronto, Ont.; Ch. Engr., T. H. White, Port Arthur, Ont.

PORTLAND, VANCOUVER & YAKIMA.—L. Gerlinger, Pres., Vancouver, Wash., informs us that engineers are now in the field locating a line for an immediate extension to be 15 miles in length. The capital for construction is assured. As stated in our issue of Sept. 8, this company was incorporated last December to operate the old Vancouver, Klickitat & Yakima Ry., and to complete a line of railway from Vancouver to Yakima, Wash., a distance of 170 miles. J. W. Coovert, Ch. Engr., Vancouver, Wash.

PORTLAND & CAMDEN.—This company was incorporated in Indiana, Sept. 14, with a capital stock of $50,000, to build a road through Jay county 12 miles in length. The directors are, G. A. Mason, Hugh Kapp, W. B. Cooley, D. E. Studebaker and W. J. Cook.

PHILADELPHIA & READING.—Geo. S. Webster, Ch. Engr. of Bureau of Surveys, Philadelphia, Pa., informs us that no definite information can yet be given relative to the elevation of this company's tracks on 9th St. Some preliminary study plans have been prepared, but no negotiations have been entered into between the city and the railway company; nor has an ordinance been introduced in the city councils authorizing the work or making appropriations for the same.

POTOSI & RIO VERDE.—This company was incorporated in New York, Sept. 16, with a capital stock of $200,000, to construct a narrow-gage railway, 66 miles in length, from San Luis Potosi southerly to the district of Rio Verde, Mexico. The motive power is to be either steam or electricity. The directors are: Donald C. Brown, of San Luis Potosi, Mex.; Robert S. Towne, George F. Peabody, Edward M. Shepard, A. Foster Higgins, Charles J. Nourse, Jr., Herbert H. Dean, Samuel H. Ordway and Francis N. Holbrook, of New York.

RALEIGH & CAPE FEAR.—J. A. Mills, Pres., Raleigh, N. C., informs us that 12 miles of track have been laid and 14 miles graded on this proposed line from Raleigh to Lillington, a distance of 35 miles. Regular trains run to Raleigh every other day.

SOUTHERN CALIFORNIA.—Press reports state that surveys have been commenced for a new line from Perris, on the main line, to Lake View, Cal., a distance of about ten miles.

STATESBORO & EGYPT.—W. C. Parker, Statesboro, Ga., informs us that nothing has ever been done towards constructing this proposed line, except a survey made some time ago. The attention of Mr. Parker and associates is now turned toward the projected Statesboro & Savannah R.R., which, he says, will doubtless be built.

UNION COVE & VALLEY.—Bids are being received by this company for 30,000 ties for a standard-gage line, and also for bridge timbers, 8×10 inches, of all lengths. Surveys are said to be under way for a proposed extension. Joseph Johnson, Supt. of Construction, Union, Ore.

WABASH.—Reports state that at the annual meeting of the stockholders of this company, it was decided to build or lease a railway wholly or partially constructed, to fill the gap in the system and connect East Hannibal and Quincy, Ill., 15 miles, and also to build or lease a line to connect Moulton and Albia, Ia., and to make the Wabash a continuous line through those points.

WASHINGTON COUNTY.—F. G. Englesing, Div. Engr., Calais, Me., informs us that grading has been completed, 75 miles of track laid and 44 miles ballasted on this new railway. Station buildings, roundhouses and the telegraph line are nearing completion, and schedule trains should be running by Nov. 1. The length of completed line will be 118¼ miles. Reports state that P. H. Stratton has received the contract to build the turntables at Washington Junction and Eastport, to cost $20,000. Pres., Geo. A. Curran, Calais; Ch. Engr., W. B. Parsons, 22 William St., New York.

YORK SPRINGS.—This company was incorporated in Pennsylvania, Sept. 19, with a capital stock of $125,000, to construct a steam railway from York Springs to Dillsburg, Pa., on the Cumberland Valley R. R., a distance of about 14 miles. The incorporators are, M. B. Cumbler, Pres., Carlisle, Pa.; Geo. H. Trostle and Geo. A. Trimmer, both of York Springs, Pa.; C. W. Webbert, Boiling Springs, Pa.; T. H. Alleman, Steelton, Pa.

STREET AND ELECTRIC RAILWAYS.

BERLIN, N. H.—We are informed that a charter has recently been obtained in this city by the Berlin & Gorham Electric Ry. Co., to construct an electric line proposed to connect Berlin with Gorham, a distance of four miles. Arrangements for construction are now progressing. Carlos P. Day, Pres. Bd. of Directors, of Berlin, may be addressed.

PLYMOUTH, MASS.—We are informed that John Turner & Co., 19 Milk St., Boston, has been awarded the contract for the construction of the first section of 3¼ miles of the proposed Plymouth & Sandwich St. Ry. This section, which is wholly within Plymouth, is expected to be in operation by Dec. 1. The completed line will extend from Plymouth to Sandwich, and will be 16 miles in length. All the necessary permits have been obtained, and surveys have been made for four miles. Pres., H. B. Taylor, Boston; Ch. Engrs., Harriman Bros., 3 Somerset St., Boston, Mass.

BUFFALO, N.Y.—The Buffalo Traction Co. has made an application to the council for permission to construct a single track electric street railway on Chenango St., from Utica St. to Rhode Island St.

MANHASSET (L. I.) N. Y.—The board of railway commissioners has granted the application of the New York & North Shore Ry. Co. for permission to construct an electric road from the terminus of the New York & Queen's County R. R. at Middle Village, through Jamaica, Flushing, Whitestone, College Point and Bay Side to Manhasset, Long Island.

PEEKSKILL, N.Y.—It is reported that the Peekskill Traction Co. has advertised for proposals for furnishing 5,000 ties, and that hopes that the proposed line will be built are again revived. The proposed electric railway will run from this town through Cortlandt and Yorktown, and will be about 12 or 14 miles in length. Pres., Frank Frye; Secy. and Treas., Chas. N. Wells, both of Peekskill.

MONTCLAIR, N. J.—The North Jersey St. Ry. Co. has petitioned the town council for a franchise to construct a new electric line from Bloomfield Ave. through Elm St. and Orange Road to the Orange line. A hearing will be given on Oct. 3.

WESTFIELD, N. J.—The township committee granted a franchise to the Westfield & Elizabeth St. R. R. Co., Sept. 15, to build a trolley line through the township towards Rahway. Pres., A. A. Gaddis, Westfield.

LOCK HAVEN, PA.—It is reported that William Herr has received the contract for constructing a new trolley line on Fairview St., and that work was to begin this week and to be completed within 20 days.

PITTSBURG, PA.—The select council has passed an ordinance granting the Duquesne St. Ry. Co. the right to lay tracks on Oakland Ave.

NEWTOWN, PA.—Thomas A. Connell, of Philadelphia, Pa., was awarded the contract by the Newton Electric St. Ry. Co., Sept. 13, to build an extension to its line from Newtown to Doylestown, via Wightstown, Penn's Park, Wycombe, Forestville and Furlong, a distance of 13¼ miles. Work is to be commenced at once, and must be completed by Dec. 15. The Newtown Electric St. Ry. now controls the entire line from Newtown to Bristol, and when the Doylestown extension is completed will have 28 miles of trolley line in operation. Pres., Thomas P. Chambers, Newtown.

WILMINGTON, DEL.—Reports from this city state that work has been resumed on the Wilmington & Brandywine Springs Electric Ry. by Contractor Mahoney, and that it is now expected to complete the work before Nov. 1. A long bridge will be built across Red Clay Creek, near the terminus of the line, by the Delaware Construction Co. The construction of an extension to Kennett Square will be considered later.

MACON, GA.—T. J. Carling, Pres. and Gen. Mgr., Macon & Indian Spring Electric St. Ry. Co., informs us that he is preparing plans for a new power station and equipment. Contracts have been let for the building and the electrical equipment, but not for the boilers and engines. This company is the successor to the former Macon Gas, Light & Water Co.

POINT WASHINGTON, FLA.—Reports state that a tramway for logging purposes will soon be built in this vicinity by Strickland, Wesley & Co.

CHATTANOOGA, TENN.—Work is in progress by the Chattanooga Rapid Transit Co., on the conversion of the old belt line to East Lake into an electric railway. The company has placed orders for cars and other equipment, and has awarded the contract for erecting a new power house at Ridgedale to Adams & Schneider.

ASHTABULA, O.—The Pennsylvania & Ohio Ry. Co. has been granted a franchise to build a line in this city. Surveyors are now said to be at work between Painesville and Conneaut.

WARSAW, IND.—The council has granted a franchise to Noah J. Clodfelter for the construction of an electric street railway from Warsaw to Winona Lake. Mr. Clodfelter represents a syndicate in control of street railways in the gas belt.

VERNON, MICH.—It is reported that the Long Lake, Durand & Corunna Ry. Co. has asked the Vernon township board for a franchise to build through the township. Vernon City, Durand and Fenton have granted franchises, and as soon as this new request is granted it is expected that bids for the construction of the line will be called for.

QUINCY, ILL.—It is reported that the Quincy St. Ry. Co. has decided to increase its capital stock from $300,000 to $600,000 in order to be enabled to make extensive improvements along its line.

BARABOO, WIS.—A company which has recently been formed to construct an electric railway between Devil's Lake and Kilbourn, via Baraboo, has petitioned the council for a franchise. Among those said to be interested are, H. Cottrell, Milwaukee, Wis., and Herman Grotophorst, of Baraboo.

WICHITA, KAN.—Reports state that the city signed a contract with H. B. Church & Co., of Chicago, Sept. 14, for 15 miles of street railway and 14 new cars and an electric light plant of 200 arc lights. The company is required to have both the plants completed within six months, and has placed $10,000 in cash with City Treasurer Kernan as a guaranty fund.

KANSAS CITY, MO.—The Kansas City Interurban Ry. Co., of Kansas City, was incorporated, Sept. 10, with a capital stock of $300,000. Press reports state that the company has bought that part of the Waldo Park dummy line north of the power house at Brush Creek to Westport, and that it will change it into an electric line and possibly build an extension. H. G. Pert and Henry Pfeiffer, of Kansas City, are said to be interested.

NEVADA, MO.—The council has granted a franchise to Quigley & Co., according to reports, for an electric street railway and also for an electric light and gas plant. It is proposed to extend the electric line at once to Eldorado Springs and other points within a radius of 20 miles; estimated cost of the system, $100,000.

SEDALIA, MO.—We are informed that the Sedalia Electric Co. is a consolidation of the Electric Ry., Light & Power Co. and the Sedalia & Brown Springs Electric Ry. Co., and that it will have control of about 15 miles of track and a light plant in this city. The reconstruction of the old line only will be undertaken at present. Pres., S. H. G. Stewart, 40 Wall St., New York; Ch. Engr., J. C. DeLong, New York.

ST. LOUIS, MO.—Press reports state that the Fourth St. Ry. was sold at public auction, Sept. 20, on the foreclosure of a mortgage, to John H. Overall, at $191,000.

BEAUMONT, TEX.—The council has granted a franchise for the construction of an electric railway in this city to J. C. Ward, E. L. Bacon, James F. Ward, V. Wiess, T. H. Langham and J. F. Keith, all of whom are said to be stockholders in the electric light company.

CORSICANA, TEX.—Reports state that William Elliott has commenced the survey for the proposed street railway, a franchise for which has been granted to M. M. Bright and others.

BOULDER, COLO.—Guy D. Duncan and others contemplate the construction of a street car line in this city, and have asked the council for a franchise.

SPOKANE, WASH.—The Spokane St. Ry. Co. has applied to the council for two new franchises, one of which will permit of the abandonment of a part of its line, and the other allow the construction of a branch line on Boone Ave. through Heath's and Sinto's additions.

OREGON CITY, ORE.—The county court has granted a franchise to W. H. Burghardt, Agt., to build an electric motor line over the county road from the city limits to Highland, a distance of eight miles. It is the ultimate intention to make this line about 40 miles in length, extending it to Wilhoit Springs.

PASADENA, CAL.—The Terminal Ry. Co. has been granted a franchise by the city trustees to install electricity on its lines in Pasadena.

MONTREAL, QUE.—The car sheds of the Montreal St. Ry. Co. were destroyed by fire, Sept. 16, causing a reported loss of $100,000 to the buildings and cars and other equipment contained therein.

PERTH, WEST AUSTRALIA.—Reports state that a tramway project for Perth, to cost about $500,000, is being promoted in London, Eng.

ELECTRIC LIGHT AND POWER.

PORTLAND, ME.—The Cumberland Illuminating Co. has asked for permission to put its wire in Congress, Middle and Exchange Sts. underground.

WATERBURY, VT.—The Bolton Falls Power Co. has let the contract for building the dam for its proposed power plant to W. H. Ward & Co., Lowell, Mass. The dam is to be completed in about 14 weeks. It will be 160 ft. long and 45 ft. high. There will be two steel penstocks, one 11 ft. in diameter and the other 9 ft. The brick power house will be 132 × 25 ft. The contract for furnishing 9,000 ft. of lumber for the dam has been let to G. E. Moody, Waterbury.

AKRON, N. Y.—E. Skinner, of the Buffalo Electric Light Co., Buffalo, N. Y., has submitted a proposition to the board of trustees for an electric light plant to cost about $3,000.

HANNAWA FALLS, N. Y.—A. F. Nims, Philadelphia. N. Y., has been awarded the contract for building a canal and masonry dam for the power plant at this place, to cost, it is stated, about $100,000. Engr., W. C. Johnson, Niagara Falls, N. Y.

SEABRIGHT, N. J.—The plant of the Seabright Electric Light Co. was destroyed by fire Sept. 15, causing a reported loss of $12,000. The new plant, which it is decided to build, will be under the control of the town. Pres. Seabright Light Co., Dr. Jas. J. Reed; Secy., E. S. Nesbitt.

DARBY, PA.—New bids for furnishing the materials and for building a plant will be asked in October. Clk. Council, J. F. Wilby.

EASTON, PA.—Local papers state that T. A. H. Hay and W. O. Hay have sold the old cotton mill on the south side of the city to a New England syndicate. A light and power plant will be built at once by the new owners, it to be in operation by Feb. 1.

PHILADELPHIA, PA.—Bids are asked by the director of public safety until Oct. 4 for electric lighting for next season. Estimates are being prepared for a municipal plant. Chn. Com., Wilson H. Brown.

PITTSBURG, PA.—The Pennsylvania Tube Works Co., according to local papers, is making arrangements for the installation of a light and power plant for its works; estimated cost, $100,000. Gen. Mgr., W. B. Rhodes.

WATERFORD, PA.—Wm. R. Irwin, Erie, Pa., is reported to have been granted a franchise for a plant and awarded a 2-year contract for lighting this town. Chn. Com., Dr. W. H. West.

LYNCHBURG, VA.—Thos. D. Davis, Pres. Council, writes us that preliminary steps are being taken to establish an electrical department. Ordinances on the subject have been submitted to the council and will come up for adoption at the meeting Oct. 7.

NORFOLK, VA.—Edwin Stewart, Paymaster-Gen., U. S. N., Washington, D. C., received the following bids Sept. 13 for furnishing electrical apparatus for the navy yard: N. J. Foundry & Machine Co., 26 Cortlandt St., N. Y., $12,450; Seeman & Halsky, 100 Broadway, New York, $11,486; C. & C. Electric Co., 143 Liberty St., New York, $12,520; Burhorn & Granger, 136 Liberty St., New York, $12,088; General Electric Co., Schenectady, N. Y., $11,200.

ASHEVILLE, N. C.—Bids are asked until Oct. 7 for furnishing 100 2,000-c. p. arc lights for a term of three years, the city to have the privilege of buying the plant. Mayor, F. M. Miller; Cy. Clk., M. W. Robertson.

ORANGEBURG, S. C.—An election will be held Sept. 27 to vote on the question of issuing $40,000 in bonds for a plant and water-works.

MACON, GA.—T. J. Carling, Pres. and Gen. Mgr. Macon & Indian Spring Electric St. Ry. Co., is preparing plans for the power and light station and equipments. The contract for boilers and engines have not been placed: that for the building and electrical equipment has been. The plant will have a capacity for furnishing 235 2,000-c.p. arc and 4,000 16-c.p. incandescent lights.

PRATT CITY, ALA.—Paschal G. Shook has been granted a 15-year franchise. The plant will cost about $9,000.

TUSCUMBIA, ALA.—Press reports state as follows: The light and water company of this city, which holds a 20-year franchise, has been notified that unless it gives to the city water and light within a short time, according to the terms of the agreement with the council, it will be requested to surrender the franchise. Another company is anxious to establish water-works and an electric light plant, if it can secure the franchise.

LUMBERTON, MISS.—The question of building a plant is being considered, according to reports.

NEW ORLEANS, LA.—The council, through the light committee, has rejected the resolution asking for bids for lighting the city with electricity for 10 years. The contract with the Edison company has yet four years before its expiration.

MOUNT BLANCHARD, O.—The question of putting in a plant is being considered, according to reports.

NEW RICHMOND, O.—E. Y. Donhan, Mayor, writes us that this place voted Sept. 12 to issue bonds for building a plant and water-works; population, 2,500.

WAPAKONETA, O.—The electric light plant of Wapakoneta is to be considerably enlarged. Geo. Hornung, Mech. Engr., Newport, Ky., has been employed to prepare the plans and specifications for the building, machinery, etc.

WOOSTER, O.—An election will be held Oct. 3 to vote on the question of issuing $25,000 in bonds for the proposed plant.

PEORIA, ILL.—Bids were asked until Sept. 20 for furnishing 400 2,000-c.p. arc light for two years from Nov. 1, check $20,000. Cy. Clk., R. M. Orr.

ROCK ISLAND, ILL.—The question of a municipal plant is being investigated. The present contract for lighting the city expires in a short time. Mayor, Thos. J. Medill, Jr.; Chn. Com., T. A. Pender.

ST. JOSEPH, ILL.—Bids are asked until 7 p. m., Oct. 6, for furnishing the materials and for building a plant. It will have a brick, metal roof, station; one 60-HP. automatic self-oiling engine; a 54 × 16 tubular boiler; a feed pump and heater; a 30-K-W. 220 volt D. C. generator with instruments, and about four miles pole line, as stated is our advertising columns. Chn. Com., C. W. Gibson; Engr., J. D. Wallace, Champaign, Ill.

RICHLAND CENTER, WIS.—R. H. Dhat, Mayor, writes us that bids for furnishing and erecting a plant will be received late in October; estimated cost, about $6,000. No engineer had been engaged up to Sept. 14. The plant will have 35 or 40 arc lights. The plant will be operated in connection with the water-works. Chn. Com., Thos. Brenden.

BARNESVILLE, MINN.—Bids are asked until Oct. 4 for constructing a plant. Engr., C. F. Loweth, 94 E. 4th St., St. Paul, Minn., or 301 W. 3d St., Davenport, Ia.; Clk., H. H. Snell.

MINNEAPOLIS, MINN.—E. T. Abbott has completed estimates for the proposed Coon Creek power plant. Thos. Lowry and Frederick Weyerhauser may be addressed.

TOPEKA, KAN.—Bids are asked until Nov. 7 for furnishing the materials, machinery, etc., for improving the plant; estimated cost, $9,006. Cy. Engr., Wm. H. Barnes. Mayor, C. A. Fellows; Cy. Clk., S. S. McFadden.

NEVADA, MO.—Quigley & Co. have been granted a 20-year franchise for a plant and a 30-year franchise for a street railway. The city has made a 10-year light contract.

WAHOO, NEB.—The plant at this place owned by S. H. Jones was destroyed by fire Sept. 10, causing a reported loss of about $4,000.

SUMPTER, ORE.—Frank Geiser has been granted a 25-year franchise. Recdr., F. J. Hallock,

CREEDE, COLO.—The Amethyst Electric Light & Power Co.'s plant was destroyed by fire Sept. 8, causing a reported loss of about $14,000.

HOUSTON, TEX.—It is stated that arrangements are being made for the immediate reconstruction of the plant of the Citizens' Light & Power Co. The smokestack will be 60 ft. high, the entire plant costing about $160,000. County Engineer Polk and J. C. Polk are the engineers.

BARRIE, ONT.—E. Donnell, Town Clk. and Treas., writes us that bids have been received for the proposed plant, to cost about $35,000. The by-law has been passed by the ratepayers, but no action can be taken for about two months. Engr., Roderick J. Parke, Toronto, Ont.

NEW COMPANIES.—Trenton-Washington Light Co., Ribsam Bldg., Trenton, N. J.; $100,000, with $1,000 paid in; to introduce in Trenton a system of lighting and heating; E. Raymond Perrine, New York; Forman H. Gordon, Windsor, N. J.; Irvin Aaron, Doylestown, Pa.; George E. Fell, Levi P. Updike, Trenton.

Carteret Electric Light & Power Co., Carteret, N. J., $20,000; John A. Quinn, Jr., Carteret; Wm. J. Landsley, Elizabeth, N. J.; Walter K. Whitaker, Sewaren, N. J.

Westerville Electric Co., Westerville, O.; $9,000; C. L. Bennett, R. B. Adams, H. E. Chinn, E. S. Aldrich, Elec. Engr., Wesley Block, Columbus, O.

Winona Ice, Electric Light & Water Co., Winona, Miss.; $100,000; E. R. Blackston, D. B. Turner, C. S. Harris.

Consolidated Incandescent Light Co., 1 Exchange Place, Jersey City, N. J.; $50,000, with $5,000 paid in; Thos. F. Bedle, Pierre F. Cook, Francis H. McGee, all of Jersey City.

Mill Point Power Co., Amsterdam, N. Y.; $80,000; to furnish light, heat and power to Amsterdam, Charlestown, Florida, Glen, Mohawk, Fonda, Fultonville, Johnstown, Perth, Mayfield and Broadalbin; John Marsh, San Francisco, Cal.; John Begley, Gloversville, N. Y.; H. J. Brady, Cooperstown, N. Y.; P. T. Brady, R. E. Drake, Syracuse.

Clarksdale Water & Light Co., Clarksdale, Miss.; $35,000; Walter Clark, E. L. Anderson, W. P. Holland, P. H. Porter, W. D. Cutrer.

Hughesville Electric Co., Hughesville, Pa.; $1,000, with $100 paid in; J. Sellers Kite, 523 North 40th St., Philadelphia.

Ironclad Resistance Co., Westfield, N. J.; $25,000; to furnish this city with electric light, power and heat. Arthur W. Berresford, Aug. P. Manning, Horace M. Williams.

Citizens' Electric Co., Reading, Pa.; to supply Lebanon and a number of small cities with electric lights.

Kalamazoo Valley Electric Co., Kalamazoo, Mich.; $100,000; to develop the water power of Kalamazoo, Otsego, Plainwell, Allegan and Battle Creek, for lighting, heating and power purposes, and also for electric railways; W. A. Foote, J. B. Foote, C. H. Frisbee, Jackson, Mich.; H. C. Hoagland, Kalamazoo; S. S. Hulbert, Battle Creek, Mich.

Chicago Suburban Water & Light Co., Chicago; $600,000; to deal in gas and electricity; Charles F. Voge, J. M. Gibson, Chares B. Wood.

Lancaster & Jefferson Eectric Light Co., Lancaster, N. H.; $36,000.

BRIDGES.

EASTHAMPTON, MASS.—Bids are asked for the construction of the Ferry St. bridge abutments and dam. Engr., E. C. Davis, Northampton, Mass.

WESTFIELD, MASS.—Bids are asked until Oct. 3 for constructing a bridge, 115 ft. long and 32 ft. wide, as stated in our advertising columns. O. A. Granger, Chn. Com.; O. E. Parks, Town Engr.

CUYLERVILLE, N. Y.—John Vickers, Geneseo, N. Y., has been awarded a contract at $4,379 for the abutment for a bridge.

SCHENECTADY, N. Y.—A petition has been presented to the council to have a viaduct constructed across Vale Cemetery to connect Prospect and Mynderse Sts.

BRADFORD, PA.—Bids are asked until 2 p. m., Sept. 24, for constructing an iron bridge and stone abutments. S. D. Kelly, Jas. McKittrich, Supervisors, St. James Hotel, Bradford.

CARLISLE, PA.—J. O. Huntington, Clk. Com., informs us that the contract for the iron superstructure of the bridge at Bishops' Ford has been let to the Wrought Iron Bridge Co., Canton, O. The substructure has been completed.

WILMINGTON, DEL.—The Delaware Construction Co. has a contract to construct two bridges, 78 and 410 ft. long, for the Wilmington & Brandywine Springs Ry. Co.

PADUCAH, KY.—Bids are asked until 2 p. m., Sept. 22, for repairing the bridge across Island Creek, on Bridge St. J. M. Lang, Mayor.

CINCINNATI, O.—Bids are asked until Oct. 8 for certain bridge work. E. L. Lewis, County Audr.

CINCINNATI, O.—Bids are asked until Oct. 15 for masonry, excavating, fill, etc., for a bridge over the canal and for woodwork on the suspension bridge over Whitewater River. E. L. Lewis, County Audr.——Bids are asked until Oct. 20 for constructing the superstructure and masonry substructure for a railway viaduct over Lick Run. Chas. G. Roth, Clk. Bd. Water-Works Trustees.

CLEVELAND, O.—The county commissioners have awarded contracts as follows: Superstructure five-mile lock bridge, in Newburg township, to Variety Iron Works, at $6,450; substructure for the same bridge, to E. S. & C. F. Doolittle, at an estimated cost of $5,882; substructure of the South Park bridge, in Independence Township, to E. S. & C. F. Doolittle, at an estimated cost of $3,809 superstructure for the same bridge, to the King Bridge Co. at $5,950.

HAMILTON, O.—The contract for the 406-ft. span bridge over the Miami River, on which bids were received by the county commissioners, Aug. 22, was let on Sept. 13 to Peter E. Schwab, at $61,000. The bridge will have a 24-ft. roadway, paved with asphalt or brick, and two 6-foot sidewalks.

NEW BALTIMORE, O.—Bids are asked until Oct. 8 for constructing a bridge across the Great Miami River. E. L. Lewis, County Audr., Cincinnati.

BEDFORD, IND.—F. W. Ranno, Asst. Engr., Southern Indiana Ry. Co., Bedford, writes us that a contract has been made with the Carnegie Steel Co., Ltd., Pittsburg, Pa., for constructing girders over Salt Creek, five miles west of Bedford, and Indian Creek, 16 miles west of Bedford. The Salt Creek bridge will consist of one 100-ft. span deck, plate lattice girder, and two 50-ft. span deck plate girders. Indian Creek bridge to consist of one 100-ft. span deck plate lattice girder and two 56-ft. span deck plate girders. The piers and abutments are now under way and the bridges are to be put in place during October.

EVANSVILLE, IND.—A petition has been presented to the county commissioners for the construction of a bridge over Pigeon Creek.

EAU CLAIRE, WIS.—Bids are asked until Sept. 28 for constructing a bridge of four spans, 144 ft. each, across the Chippewa River, between Kelsey and Bridge Sts., and for removing the old structure. C. A. Alderman, Cy. Engr.; T. P. Cochrane, Clk.

OSHKOSH, WIS.—The following bids were received Sept. 6 for a bridge over Sawyer Creek:

	Design A.	Design B.
Wisconsin Bridge & Iron Co.	$6,194*	$9,984
Wisconsin Bridge & Iron Co.	2,380**	3,800
Milwaukee Bridge & Iron Works	6,400*	7,200
C. L. Strobel, Chicago, Ill.	6,450*	7,700
Meyer & Dombke	2,600**	3,300
Carl Schneider	2,400**	3,200

* Superstructure. ** Substructure.

The Wisconsin Bridge & Iron Co. and Carl Schneider bids were the lowest for design B, which was selected by the council; design A was for a fixed bridge composed of three 67-ft. plate girder through spans. Design B was for a through plate girder draw span of 129 ft., and one 67-ft. plate girder through span.

WAVERLY, IA.—Bids are asked until Oct. 3 for furnishing the material and constructing a steel bridge of two spans, 124 and 123 ft. each, and 22 ft. wide, over the Cedar River. Wm. Weiditschka, County Audr.

BRAINFRD, MINN.—A contract was awarded to L. H. Johnson, Minneapolis, Minn., Sept. 9, at $7,825, for constructing a steel bridge. F. A. Farra, Cy. Clk.

ST. THOMAS, ONT.—J. H. McKnight & Co., Toronto, Ont., have been awarded the contract for improving the court house of Elgin county, at $33,990. The plumbing will be done by Chas. T. Bull, at $1,047, and the metal work by Stacey & Co., at $1.231, both of St. Thomas.

WATER-WORKS.

HALLOWELL, ME.—Chas. N. Taylor, Natick, Mass., has completed a contract for laying six miles of 6, 8, 12 and 14-in. cast-iron water pipe in this city. He has also just completed building a 1,000,000-gallon distributing reservoir. Mr. Taylor has been awarded the contract for building a 3,500,000-gallon storage reservoir for the works. These reservoirs are clay-lined and paved with granite blocks. Mr. Taylor has also the contract for furnishing the material and for laying the pipe.

WATERVILLE, ME.—Harvey D. Eaton, Cy. Solicitor, writes us that the bill being considered to unite Benson, Fairfield, Winslow and Waterville, to be known as the Kennebec Water district, is only a proposed municipalization of the existing works.

AMSTERDAM, N. Y.—The proposed improvements to the water-works will be as follows: A new 24-in. iron conduit two miles long, from end of Hanns conduit to distributing reservoir; a new high service reservoir, a 15-in. vitrified conduit, from end of McQueen conduit to reservoir, one mile long; a new 36-in. iron diverting conduit through reservoir of Bunn Creek, a 3-acre filter bed with Babcock conduits, at the end of Hanns Creek conduit, etc. The contract for the pipe has been let to the Anniston Pipe & Foundry Co., Anniston, Ala. The work is in charge of Stephen E. Babcock, Consult. Engr., Little Falls, N. Y.

BAINBRIDGE, N.Y.—This place voted, Sept. 10, to issue $22,000 in bonds for municipal works.

BUFFALO, N. Y.—Bids are asked until Sept. 29 for laying a 20-in. cast-iron water pipe across the Buffalo River, at Ohio St.; for furnishing 1,000 extension pieces for hydrants, etc. R. G. Parsons, Secy. Bd. Pub. Wks.

DEPEW, N.Y.—The question of securing its own water supply from Lake Erie is being considered by the city. Henry W. Box, may be addressed.

IRVINGTON, N. Y.—An election will soon be held to vote on the question of extending the works, at a cost of about $50,000.

MASSENA, N.Y.—Watson B. Berry, Pres. Norwood Water Co., writes us that the construction of the proposed works will not begin until early spring. The plans and specifications will be prepared this fall, and contracts will be let during the winter. Capital stock, $15,000. Secy. and Treas., Philip J. Barry.

GLOUCESTER CITY, N.J.—The council has postponed considering the bids received Sept. 15 for furnishing a water-works pump until Sept. 29.

JERSEY CITY, N. J.—Bids are asked until Sept. 26 for furnishing and setting in place three meters at or near the Belleville pumping station. Clk. Water Comrs., Geo. T. Bouton.

BLUE RIDGE SUMMIT, PA.—The proposed works for this place will be constructed by a company. D. G. Adelsberger, 722 Pennsylvania Ave., Baltimore, Md., is preparing plans and estimates. There will be over six miles of 4 to 10-in. pipe, a reservoir on a hill 560 ft. high above source of supply, which will be springs.

KNOXVILLE, PA.—Preliminary work is in progress for complete works to be constructed this fall; estimated cost, $12,000. Engr., Howard Murphy, 326 Walnut St., Philadelphia, Pa.; present address, Knoxville, Pa.

YORK, PA.—Local papers state that the York Water Co. has awarded a contract for furnishing a 4,000,000-gallon filtration plant to the New York Filter Co., New York.

CENTREVILLE, MD.—The town commissioners are considering the question of securing a better water supply. Pres. Comrs., Chas. M. West.

DENTON, MD.—Harry A. Roe writes us that nothing will be done regarding the construction of works, reported in our issue of last week.

POCOMOKE CITY, MD.—Van D. Hitesmith, Knoxville, Tenn., has been awarded the contract, at $19,500, for furnishing the materials, excepting the water pipe, and for building the proposed works and sewerage system. The contract for the cast-iron water pipe has been let to M. J. Drummond & Co., New York, at $6,726. The well for the water supply is being bored by J. H. K. Shannahan.

ORANGEBURG, S. C.—An election will be held Sept. 27 to vote on the question of issuing $40,000 in bonds for works and an electric plant.

COLUMBUS, GA.—L. H. Chappell, Mayor, writes us that no definite steps have yet been taken in regard to a new water supply. An investigation is being made and it is expected to bore for water soon.

GREENSBORO, GA.—Bids are asked until Oct. 6 for furnishing the materials and for building the proposed works. The plant will consist of 21,000 ft. of 4 to 10-in. cast-iron water pipe; 12,000 lbs. of special castings, 32 hydrants, 22 valve boxes, 22 4 to 10-in. valves, a standpipe, 12×120 ft., a 500,000-gallon settling basin, etc. Engr., E. H. Davis, Eatonton, Ga.; Mayor, J. B. Williams; Clk., E. W. Copelan.

McRAE, GA.—The council has let the contract for boring an artesian well for a water supply, according to reports.

ROME, GA.—J. W. Rowersville, Chn. Com., writes us that this city has muddy water at times of much rain. The committee appointed by the council to select the best method has decided upon filtration beds, to be placed at the outlet end of the present settling basin.

MOBILE, ALA.—M. T. Lewman & Co., Louisville, Ky., have been awarded the contract at $460.202 for constructing the proposed works. Supervising Engr., T. W. Nicol, Mobile; Mayor, J. C. Bush.

TUSCUMBIA, ALA.—Press reports state as follows: The light and water company of this city, which holds a 20-year franchise, has been notified that unless it gives to the city water and light within a short time, according to the terms of the agreement with the council, it will be requested to surrender the franchise. Another company is anxious to establish works and an electric plant.

FAYETTEVILLE, TENN.—An election will be held Oct. 15 to vote on the question of issuing $30,000 in bonds for the proposed works. Clk., R. A. Conger; Engrs., Guild & Co., Chattanooga, Tenn.

NASHVILLE, TENN.—Bids are asked until Sept. 27 for furnishing about 250 tons of 6-in. cast-iron water pipe, hydrants, valves, etc.; estimated cost, $5,000. Supt. Bd. Pub. Wks., Geo. Reyer.

CINCINNATI, O.—Bids are asked until Sept. 29 for laying water pipe in a number of streets. Pres., Bd. Cy. Affairs, A. B. Rattermann.

NEW RICHMOND, O.—E. Y. Donham, Mayor, writes us that at the election, Sept. 12, this place voted to issue $30,000 in bonds for works and a light plant. Engr., E. F. Layman, 32 East 3d St., Cincinnati, O.

TROTWOOD, O.—Dr. W. C. Mendenhall, Secy. Trotwood Water Supply Co., writes us that the contract for building the works has not been let. The specifications are not quite prepared. There will be required a pneumatic or air-tight tank, a well about 30 ft. deep, with a capacity of about 30 to 60 bbls. an hour for fire protection and domestic use, about 3,800 ft. of 3 and 4-in. pipe, 12 to 15 hydrants, a gasoline engine, etc. The contracts will be let after asking for bids.

HENRYVILLE, IND.—We are informed that no steps have been taken toward building works, and that there probably will not be for the present.

KEWANNA, IND.—An election was held in this city, Sept. 12, to vote on the question of building works.

EATON RAPIDS, MICH.—Bids are asked until Oct. 4 for furnishing six miles of water pipe, hydrants, special castings, etc., as stated in our advertising columns. Engrs., Alvord & Shields, The Rookery, Chicago; Secy. Water-Works and Lighting Bd., Jas. H. Gallery.

PAW PAW, MICH.—The following bids were received Aug. 17 for furnishing the material and for constructing the works, the bids for pipe, hydrants, specials, etc., being given under Contract Prices: Engr., Geo. S. Pierson, Kalamazoo, Mich.: Pumps,—(1) being for two single pumps, and (2) for one single pump; (3) for two compound pumps and (4) for one compound pump; (5) for two boilers, a heater, feed pump, etc.; buildings, (6) for pumping station and (7) for chimney; water tower, (8) for brick tower and (9) for steel tower: Jos. M. Pearl, (1) $1,900, (2) $900, (5) $2,400, (6) $800, (7) $700; (8) $4,000, (9) $4,500; T. C. Brooks & Sons, Jackson, Mich., (1) $1,300, (5) $1,100, (6) $692, (7) $555, (8) $4,076; Kalamazoo Supply & Construction Co., Kalamazoo, Mich., (1) $1,300, (2) $850, (5) $825, (6) $800, (7) $700, (8) $4,000; M. Walker, (2) $2,765, including pumps and boilers; Laidlaw-Dunn-Gordon Co., Cincinnati, (1) $1,500, (2) $1,025, (3) $1,800, (4) $1,300, (5) $1,200; Snider-Hughes Co., Cleveland, O., (1) $1,375, (2) $900, (3) $1,775, (4) $1,125, (5) $1,450; Stillwell-Bierce & Smith Vaile Co., Dayton, O., (1) $1,150, (2) $700; Goulds Mfg. Co., Seneca Falls, N. Y., (1) $3,632, (2) $3,690—bids include gasoline engines; Geo. Rickman & Sons, (5) $1,019, (6) $692, (7) $555, (8) $1,476, brick work only; Jackson & Church, Saginaw, Mich., (5) $1,443, (8) $3,923; Muskegon Boiler Works, Muskegon, Mich., (5) $1,400, (8) $3,775, (9) $3,275; Biggerstaff & Atkins, (6) $748, (7) $655; Alex. McIntosh, Muskegon, (6) $700, (7) $600; Chicago Bridge & Iron Works, Chicago, Ill., (9) $4,311; Warren City Boiler Works, (9) $3,470; Abendroth & Root Mfg. Co., New York, spiral riveted steel pipe, $5,987; Fairbanks, Morse & Co., Chicago, two 28-HP. gasoline engines, $2,225.

TRENTON, MICH.—It is stated that the Trenton water board will build a new chimney 70 ft. high and will purchase a new engine capable of pumping 750,000 gallons of water daily.

CANTON, ILL.—The board of local improvements has voted to build a new reservoir, to cost about $3,800.

CHICAGO, ILL.—L. E. McGann, Comr. Pub. Wks., it is stated, will urge the council to rebuild the Chicago Ave. pumping station, at a cost of about $500,000.

SOUTH CHICAGO, ILL.—The Troy Laundry Machinery Co. is building a new soap factory at 96th and Erie Sts., South Chicago, and has given L. Wilson, 53 Dearborn St., Chicago, a contract for an artesian well for the water supply of the factory.

CARSON, IA.—The question of building works is again being considered, according to reports.

CLARE, IA.—This town is reported to have voted to build works to cost about $5,000.

ELMORE, MINN.—This place voted Sept. 10, by a majority of 17, to build works. Population, 1,200. Mayor, M. Masmerssen.

BERESFORD, S. DAK.—Bids are asked until Oct. 1 for furnishing the materials and for building the proposed works, to cost about $12,000. Plans and specifications may be seen at the First National Bank, Chicago, Ill. Mayor, August Frieberg.

PLANKINTON, S. DAK.—Bids are asked until Oct. 3 for sinking a deep well for a water supply for the poor farm, according to reports. County Audr., S. G. Kinyon.

ROSEBUD, S. DAK.—Bids are asked by Chas. E. McChesney, U. S. Indian Agent, for furnishing windmills, tanks, etc., for the water-works at this agency.

SIOUX FALLS, S. DAK.—The council on Sept. 14 decided to submit to the voters at the election in November the proposition of issuing bonds for municipal works. It is said that the proposition will be carried almost unanimously. The works will cost, complete, about $130,102. Population, 12,000. Engr., W. R. Coats, Ypsilanti, Mich., and Sioux Falls; Mayor, B. H. Lien.

WAGONER, IND. TER.—Bids are asked until Oct. 15 for constructing the proposed works, as stated in our advertising columns, and as described in our issue of last week. Engr., J. S. Thatcher, Cockrell Bldg., Dallas, Tex.; Mgr. Wagoner Water-Works Co., W. I. Nicholson.

SEATTLE, WASH.—Bids are asked until Nov. 15 for constructing the proposed Cedar River gravity water supply addition, etc., for water-works, as described in our advertising columns; estimated cost, $1,200,000. Secy. Bd. Pub. Wks., Frank Oleson.

ANTELOPE, ORE.—A. D. Sheldon is reported to have been awarded the contract for building the proposed gravity works, at about $5,000.

CONDON, ORE.—This place has voted to issue $3,000 in bonds for the proposed works.

LAKEPORT, CAL.—The board of trustees is arranging for the construction of the proposed works, to cost about $17,000. Town Clk., H. V. Keeling.

SAUSALITO, CAL.—M. M. O'Shaughnessy, Crocker Bldg., San Francisco, is preparing a report on the water supply of this place. Two small companies supply the town and much dissatisfaction exists. After the report has been submitted the trustees will consider the next step. Asst. Engr., J. S. Molony, San Francisco.

TUCSON, ARIZ.—Sylvester Watts is making tests for the proposed new water supply; estimated cost, $100,000.

RICHFIELD, UTAH.—It is reported that arrangements are being made for works. Councilmen L. H. Outzen and W. H. Seegmiller may be addressed.

WATERLOO, ONT.—Wm. Snider writes us that at present the town is supplied with water from the Berlin works, the contract for which expires next year. A committee has been appointed to investigate the question of putting in a pumping station, pipes, etc. A water supply could be secured from artesian wells, it is thought, in sufficient quantity.

WINNIPEG, MAN.—Local papers state that the Winnipeg Water-Works Co. has offered to sell its plant to the city for about $275,000. Mayor Andrews may be addressed.

BELEM, PARA, BRAZIL.—Bids are asked until Nov. 10 for the transfer by the government of the state of Para of the exclusive right for 60 years (to be extended under certain conditions for a further term of 10 years) to supply Belem, the capital, with potable water. The transfer will include certain lands, machinery, plant and other material actually in use in the present water-works or in stock. Further information may be had on application to the Brazilian Consulates and Vice-Consulates at London, England, at Berlin, Germany, and at Washington, D. C., and 22 State St., New York, N. Y.

IRRIGATION.

BEAUMONT, TEX.—The Jefferson County Irrigation Co. has awarded the contract for building an irrigation canal at Pine Island to E. A. Hayne.

SILVER CLIFF, COLO.—Surveys are being made for the West Mountain Valley reservoir to furnish water for the sugar belt raisers of Eastern Colorado and Western Kansas. The dam is to be a half-mile wide and 800 ft. thick at the mouth of Grape Creek canon.

LARAMIE, WYO.—Reports state that the ranchmen of Prairie Dog Creek and tributary streams, propose building a reservoir at the Piney Lakes, near Cloud Peak, for irrigation purposes; estimated cost, $10,000.

RIVERSIDE, CAL.—The people along the Jurupa & West Riverside Canal are planning to abandon their rights in the canal and to construct a pipe system, consisting of about eight miles of 12-in. steel pipe, to cost about $50,000.

NEW COMPANIES.—Gale Ditch Co., Echo, Ore.; $5,000; to construct flumes and ditches for irrigation; Austin Gale, Maggie Gale and May O'Garra.

Glendora-Azusa Water Co., Los Angeles, Cal.; to construct water systems, etc., to supply cities and towns in the Upper San Gabriel Valley with water for irrigation, power, etc.; D. A. Colae, J. H. Odell, E. O. Kennard, Glendora; W. R. Powell, W. C. Ormiston, C. G. Matthews, Azusa.

SEWERAGE

CONCORD, MASS.—Bids are asked until Sept. 24 for furnishing the materials and for grading and preparing the sewage filtration beds in this town. Chn. Comrs., Wm. Wheeler; Engr., Leonard Metcalf, 89 State St., Boston.

SPRINGFIELD, MASS.—Bids are asked until Sept. 26 for constructing 735 ft. of 51-in. and 33 ft. of 60-in. brick sewers. Cy. Engr., C. M. Slocum; Supt of Sts., Wm. L. Dickinson.

COHOES, N.Y.—Bids are asked by the public improvement commission until Oct. 12 for constructing certain sewers.

LYONS, N.Y.—This city has voted to build a sewer in Jackson St., at a cost of $1,000.

NEWBURG, N.Y.—Alderman David Brown writes us that it is proposed to build seven blocks of 4-ft. brick sewer at a cost of about $27,000; average cut, 12. Cy. Engr., Chas. Caldwell.

ELIZABETH, N. J.—Bids are asked until Oct. 1 for constructing about 3,200 ft. of 18 to 12-in. pipe sewers, 26 manholes etc. St. Comr., N. K. Thompson.

JERSEY CITY, N. J.—Bids are asked until Sept. 26 for constructing 400 ft. of 18-in. pipe sewer, etc. Clk. Bd. St. and Water Comrs., Geo. T. Bouton.

NEWARK, N. J.—Bids are asked until 3.30 p. m. Sept. 22 for constructing about 39,000 ft. of brick and pipe sewers. Gen. Supt. of Works, M. F. McLaughlin.

BRADFORD, PA.—Bids are asked until Sept. 26 for constructing a sewer in Washington St. Cy. Clk., Jas. A. Lindsey.

CHESTER, PA.—C. M. Black, Mayor, has approved the ordinance for a sewer in Fourth St.

OAKMONT, PA.—John Dell and Diulles & Bro., Braddock, Pa., have been awarded the contract for building a system at $36,500.

CHESAPEAKE CITY, MD.—The council is reported to have voted to build a system.

POCOMOKE CITY, MD.—Van D. Hitesmith, Knoxville, Tenn., has been awarded the contract for building the system and water-works at $19,500.

MOBILE, ALA.—Bids are asked until Oct. 17 for constructing a system, as stated in our advertising columns. Mayor, J. C. Bush; Supervising Engr., T. W. Nicol, Mobile.

EAST CLEVELAND, O.—Bids are asked until Oct. 10 for constructing sewers in a number of streets, and also for a sewage disposal plant; three bonds of $1,500 required. Engr., Rice Engineering Co., 545 Society for Savings Bldg., Cleveland; Clk., H. B. Chapman.

MARIETTA, O.—Bids are asked until Oct. 15 for constructing sewers in the Fifth district. Cy. Clk., Carl Becker.

MINGO JUNCTION, O.—Bids are asked until Sept. 27 for constructing a sewer in Jumbo Run. Clk., E. E. Pelugh.

NILES, O.—The council will probably ask for bids in October for building a sewer about a mile long, according to reports. Cy. Engr., Wm. Wilson.

DELRAY, MICH.—Jas. Grant, Detroit, has been awarded the contract for laying 8,475 ft. of sewer pipe at about $6,000.

DURAND, MICH.—Wm. H. Putnam, Village Clk., writes us that the council voted Sept. 12 not to take action on the proposed 24 and 20-in. pipe sewer until the spring. Engr., H. A. Riggs, The Nasby, Toledo, O.

CHICAGO, ILL.—Bids are asked until Sept. 27 for constructing pipe sewers in several streets. Pres. Bd. Local Improvements, L. E. McGann.

GALESBURG, ILL.—It is proposed to build a trunk sewer from the Knoxville Road to Cedar Fork Creek, at a cost of about $53,000. City Engineer Blanding may be addressed.

MONMOUTH, ILL.—J. E. Miller, Cy. Engr., writes us that contracts for building the following sewers will be in after adoption by the council Oct. 1: About 1,550 ft. of 12-in. and 1,920 ft. of 15-in. of pipe, and 2,100 ft. of 42-in. and 860 ft. of 24-in. brick sewers; estimated cost, $11,475.

DECORAH, IA.—E. Mathes, Clk., writes us that the council has received bids for plans for sewers. No action has yet been taken.

DES MOINES, IA.—Bids are asked until Sept. 30 for constructing pipe sewers in certain streets. Chn. Bd. Pub. Wks., G. A. Eberhart.

EASTON, MINN.—Bids are asked until Sept. 28 for constructing a sewer. Engrs., M. B. & A. M. Haynes, Waukato, Minn.; Recdr., F. W. Roth.

CLINTON, MO.—It is proposed to construct a sewer in district No. 25.

OTTAWA, ONT.—S. J. Davis, Chn. Com., writes us that the following work is included in the by-law to spend $425.000 voted by the people Sept. 8: Western outlet—6,400 ft. of 5-ft. circular and 2,000 ft. of 4-ft. sewer; mostly through limestone rock and cutting: Eastern outlet—8,300 ft. of 5-across the canal and Rideau River; 6,300 ft. of 5-ft., 9,100 ft. of 6-ft. and 5,300 ft. of 7-ft. sewer, mostly in rock and earth or clay cutting. The work will probably be let in three different contracts. Engrs., Rudolph Hering, 100 William St., New York, and Robert Surtees, Cy. Engr. of Ottawa.

CHERTSEY, ENGLAND.—Plans are asked until Dec. 23 for a system and a sewage disposal plant. The premiums will be $250, $150 and $100, respectively. Clk., T. E. Harland Chaldecott.

GARBAGE DISPOSAL—STREET CLEANING

BRIDGEPORT, CONN.—The board of health has rejected the offer of Frank E. Clark, Pres. Connecticut Reduction Co., recently holding the contract for burning the city garbage, to sell the plant to the city. The board has decided that for the present the garbage will be buried at the town farm. In the meantime the question of erecting a crematory will be considered. Mayor Taylor may be addressed.

LANSINGBURG, N. Y.—Bids are asked by the city clerk until Sept. 27 for cleaning the streets and alleys.

ATLANTIC CITY, N. J.—The council has awarded the contract for building a Smith-Simon incinerating plant to Thos. K. Dalzell, Reading, Pa., at $29,900.

PHILLIPSBURG, N. J.—The council has voted to build a plant to cost about $8,500, according to reports.

BEAVER FALLS, PA.—The Keystone Reduction Co. has been awarded a 5-year contract for removing the garbage, night soil, dead animals, etc. The company will pay the city $400 a year, according to reports. A plant will be built at once.

READING, PA.—H. H. Hammer, Cy. Clk., writes us that the following bids were received Sept. 16 for reconstructing the garbage disposal plant: Chas. Linsey and Benjamin Howland, Philadelphia, $4,453; John H. Hook, Lancaster, Pa., $2,375, and the General American Reduction Co., Philadelphia, $3,250. The question of awarding the contract will be considered at the meeting of the council, Sept. 26.

NEW ORLEANS, LA.—The council has adopted a resolution directing the city engineer and commissioner of public works to prepare specifications for the erection of crematories in order that all garbage collected in the city be destroyed by fire within the time guaranteed to the secretary of war.

MILWAUKEE, WIS.—The aldermen have voted to purchase a plant of the Engel Sanitary & Crematory Co. for $52,500.

SANTIAGO, CUBA.—The Dixon Cremating Co. is said to have been awarded the contract by the U. S. government to furnish this city with a plant.

STREETS AND ROADS.

BOSTON, MASS.—Bids are asked until 12 m., Sept. 23, for macadamizing portions of four streets. Benj. W. Wells, Supt. Sts.

WASHINGTON, MASS.—Reports state that W. C. Whitney is considering the question of constructing a road from his residence to Washington St., to cost about $10,000.

MILFORD, CONN.—Bids are asked until Sept. 30 for macadamizing on Broad and Cherry Sts. E. E. Bradley, First Selectman.

ALBANY, N. Y.—A contract has been awarded to Mulderry Bros., at $32,079 for paving Elm St. with brick between Grand St. and Delaware Ave.

BUFFALO, N. Y.—Bids are asked until Sept. 28 for paving in Hirschbeck St. with brick. R. G. Parsons, Secy. Bd. Pub. Wks.——The Buffalo Marblelithic Paving Co. has been awarded a contract for 32,000 sq. ft. of marblelithic sidewalk around Humboldt Park, to cost about $6,000.

DEERFIELD, N.Y.—Bids are asked until Oct. 4 for improving the River Road for 2¼ miles. C. W. Adams, State Engr., Albany.

NEWBURG, N. Y.—David Brown, Alderman, informs us that the question of asphalt paving is being considered at an estimated cost of $26,647. Chas. Caldwell, Cy. Engr.

NIAGARA FALLS, N. Y.—Bids are asked until Sept. 30 for about 1,200 sq. yds. of asphalt paving on Cherry Ave., as stated in our advertising columns. Walter Jones, Cy. Engr.; S. F. Arkush, Clk.

ROCHESTER, N. Y.—Whitmore, Rauber & Vicinus have been awarded a contract at $56,503 for asphalt paving in North Clinton St.

SALAMANCA, N. Y.—Bids are asked by the village clerk until Sept. 28 for furnishing the materials and for 9,755 sq. yds. of brick paving, as stated in our advertising columns.

SCHENECTADY, N. Y.—Bids are asked by the council until Sept. 27 for paving Summit Ave., Franklin and Mynderse Sts., with sheet asphalt.

SYRACUSE, N. Y.—Bids are asked until Sept. 26 for the purchase of $20,000 of improvement bonds. C. F. Allen, Cy. Treas.

TROY, N. Y.—Bids are asked until Oct. 4 for grading and widening Mill St. E. Ogden Ross, Secy. Contracting Bd.

ATLANTIC CITY, N. J.—Bids are asked until Oct. 3 for brick and macadam paving, as described in our advertising columns. Cy. Surv., J. A. Hackney; Chn. Com., Edward S. Lee.

ELIZABETH, N. J.—The board of trade will ask the council to expend $47,000 for asphalt paving, according to reports.

HOBOKEN, N. J.—Bids are asked until Oct. 12 for asphalt paving in portions of nine streets and for improving certain other streets. M. V. McDermott, Cy. Clk.

PHILLIPSBURG, N. J.—Bids are asked until Sept. 29 for the purchase of $60,000 of 4% street improvement bonds. G. G. Stryker, Chn. Finance Com.

ALLEGHENY, PA.—An election will be held to vote on the question of increasing the bond debt $10,000, for paving and grading the Franklin Road.

MAUCH CHUNK, PA.—The city clerk informs us that the question of increasing the bonded indebtedness for street improvements will probably not be submitted to a vote before February.

SCRANTON, PA.—An ordinance will be introduced in the council for an appropriation of about $68,000 for repairing certain paved streets.

WASHINGTON, PA.—An election was held Sept. 16 to vote on the question of appropriating $67,000 for street improvements.

YORK, PA.—The committee has submitted an estimate of 133,915 sq. yds. of paving to be laid throughout the city.

WILLIAMSPORT, MD.—Geo. Thompson, Mayor, informs us that there is a movement being made to secrue better roads by private subscription, and that the county will give double the amount appropriated. S. B. Kenedy, Engr., Chambersburg, Pa.

LOUISVILLE, KY.—Bids are asked by the board of public works until Sept. 27 for asphalt paving in 26th and Oak Sts. The council is considering the question of establishing an asphalt plant to repair pavements.

PADUCAH, KY.—Bids are asked until 2 p.m., Sept. 22, for grading and graveling Bridge St. from Broad St. to Benton Road. Jas. M. Lang, Mayor.

CLEVELAND, O.—Bids are asked until Oct. 5 for grading and paving the Ridge Road for seven-eighths of a mile. J. C. Dorn, County Clk.——Bids are asked until Oct. 7 for asphalt paving, grading, draining, etc., on portions of Pearl and Lorain Sts., and macadamizing on Carter, St. Clair and Superior Sts. Geo. R. Warden, Dir. Pub. Wks.

COLUMBUS, O.—Bids are asked until 12 m., Sept. 22, for furnishing and constructing asphalt, brick or stone pavement on Yale Ave. Jas. A. Fanning, Clk. Bd. Pub. Wks.——The Acme Paving Co. has been awarded a contract at $2,200 for laying new sidewalks on High and Broad Sts., at the state capitol grounds.

COSHOCTON, O.—The following bids have been received for paving Main St.: N. G. Abbott, Columbus, O., $27,758; Adams Bros., Zanesville, O., $20,648; J. N. Kissner, Warsaw, O., $20,647; C. B. McArthur, Kenton, O., $25,019; Townsend & Co., Zanesville, O., $20,764.

MALTA, O.—W. J. Berry, Marietta, O., has been awarded a contract at $8,630 for brick paving.

STEUBENVILLE, O.—Bids are asked until Sept. 28 for paving Fourth St. with brick. Geo. P. McCracken, Cy. Clk.

ALEXANDRIA, IND.—Bids are asked until Sept. 27 for a gravel roadway and brick sidewalks on Harris St. between Canal and Harrison Sts. G. A. Gessner, Jr., Cy. Engr.

ANDERSON, IND.—A petition signed by J. A. Cox and others has been presented to the council for asphalt paving in West Ninth St.

TERRE HAUTE, IND.—The county commissioners have awarded contracts for constructing roads to Jean, Jean & Haxton, Worthington, Ind., at $5,000, Paris Road; Fred S. Jessup, Worthington, Ind., at $3,263, National Road, and $6,739 for the Darwin Road.

DETROIT, MICH.—Bids are asked until 10 a. m., Sept. 23, for furnishing and constructing cedar block pavement, curb, etc., on four streets. D. W. H. Moreland, Pres. Bd. Pub. Wks.

CARTHAGE, ILL.—H. C. Johnson, Secy., writes us that bids will probably be asked about Oct. 15 for 25,935 sq. yds. of brick paving, estimated cost $35,000. The funds will be raised by special assessment. Engr., Thos. McClanahan, Monmouth, Ill.; M. P. Barry, Pres. Local Bd. Improvements.

CHICAGO, ILL.—The West Park commissioners propose to extend the Washington Boulevard to Maywoood, a distance of four miles, at an estimated cost of about $600,000.

CHICAGO, ILL.—Bids are asked until 3 p. m., Sept. 23, for cement walks, brick paving, grading, etc. on the grounds of certain schools. Address Board of Education, 1110 Schiller Bldg.

PONTIAC, ILL.—Bids are asked until Sept. 27 for constructing 3,975 sq. yds. of brick paving, cement curbing, etc., as stated in our advertising columns. F. W. Winkler, Cy. Attorney.

WILMETTE, ILL.—Bids are asked until Sept. 27 for grading, curbing and macadamizing on Wilmette Ave. Wm. J. Pierson, Chn. Bd. Local Improvements.

LA CROSSE, WIS.—Bids are asked until 2 p. m., Sept. 22, for grading portions of 17 streets. D. E. Bice, Chn. Comrs. Pub. Wks.

COUNCIL BLUFFS, IA.—Bids are asked by the council until Oct. 10 for asphalt and brick paving on a number of streets.

ST. PAUL, MINN.—Bids are asked by the county commissioners until Oct. 10 for macadamizing Rice St. and the White Bear Road, estimated cost about $14,000.

OMAHA, NEB.—Bids are asked until Sept. 30 for asphalt, brick or stone paving in 40th St. Andrew Rosewater, Chn.

INDEPENDENCE, KAN.—Bids are asked by the council until 5 p. m., Sept. 23, for 22,000 sq. yds. of two course brick paving, bond for $5,000.

KANSAS CITY, MO.—Bids are asked until Sept. 27 for furnishing and constructing asphalt pavement in nine streets. Henry A. Wise, Cy. Engr.

ST. LOUIS, MO.—Bids are asked until Oct. 7 for granitoid sidewalks around St. Louis Place. Robt. E. McMath, Pres. Bd. Pub. Improvements.

HELENA, MONT.—Bids are asked by the board of public works for granolithic paving and stone gutter in front of the city hall, and for 20 street crossings and furnishing crushed stone, etc.

SACRAMENTO, CAL.—The county supervisors will improve a portion of Riverside Ave. with macadam, to cost about $2,500. Address Supervisor McLaughlin.

MONTREAL, QUE.—The aldermen will present an ordinance to the council to appropriate $3,000 for improving St. Catherine St. and $2,166 for Craig St.

TORONTO, ONT.—The board of public works is considering a proposition to pave Major St. with asphalt, at an estimated cost of $27,290.

MANUFACTURING PLANTS.

EAST BOWDOINHAM, ME.—The ice plant of Clark & Chaplin at this place, consisting of twelve buildings, has been destroyed by fire; estimated loss, $50,000.

MIDDLEBURY, VT.—F. O. Sinclair, Burlington, Vt., is said to have secured the contract for two steel frame buildings, 45×152 ft., and one, 45×200 ft., for the Brandon Italian Marble Co., of Middlebury.

BUFFALO, N. Y.—Bids are asked for erecting a new brewing plant in this city to cost about $100,000. Archs., Esenwein & Johnson, 707 Mooney Bldg.

OSWEGO, N. Y.—It is reported that the malt house of the Stevenson Brewing Co., which was burned some weeks ago, will be replaced in the spring by a new plant, to cost about $100,000. Pres., James McClenahan, of New York.

TROY, N. Y.—Cluett, Coon & Co., of this city, inform us that the building which it expects to erect adjacent to its present collar factories on River St. will be used as a warehouse and not as a factory.

WOODBURY, N. J.—The window glass works at this place, owned by Col. G. G. Green, were destroyed by fire Sept. 19, causing a reported loss of $30,000.

AVONMORE, PA.—Reports from Pittsburg state that W. H. R. Hilliard, M. M. Garland, Oliver Wylie, W. S. Collier and T. H. Jeremiah have organized a company, with $200,000 capital stock, to build and operate a 6-mill tinplate plant at Avonmore that will employ about 300 men.

CONNELLSVILLE, PA.—W. H. Baldridge, of Connellsville, informs us that all the contracts have been let for additions to the plant of the Humbert Tin Plate Co. The extension to the main building will be erected by Wm. B. Scaife & Sons; all additional furnaces, foundations, etc., will be put up by Edward E. Erickson; the new engines will be furnished by Barclay M. Everson, and the hot and cold rolls, housings, etc., by the Totten & Hoag Iron & Steel Co., all of Pittsburg. All other buildings, railway tracks, etc., will be built by the company. Work is to be completed within a month. Pres., Geo. J. Humbert, Connellsville.

WILLIAMSPORT, PA.—The sawmill and lumber yard of Hunt, Deemer & Co. were damaged by fire Sept. 18, causing a reported loss of $75,000.

WHEELING, W. VA.—The Acme Box Co.'s plant at this place was burned Sept. 15, causing a reported loss of $50,000. Owner, John Arbenz.

ROSSVILLE, GA.—It is reported that E. G. Richmond, W. F. Hutcheson and N. A. Campbell, of Chattanooga, Tenn., have decided to erect a new cotton yarn mill at this place, to cost about $90,000.

GADSDEN, ALA.—It is announced that the Dwight Mfg. Co. will double the capacity of its plant, and thus will require 30,000 additional spindles. Mgr., R. A. Mitchell.

DAVENPORT, IA.—John Peters has been awarded the contract for erecting a 2-story warehouse for the Glucose Sugar Refining Co., at $11,250.

MONTREAL, QUE.—Reports state that bids are being received by Peck, Binny & Co. for the reconstruction of their large rolling mills on Mill St., which were lately destroyed by fire. Estimated cost of improvement, $100,000.

CHIHUAHUA, MEX.—Press reports state that Henry C. Creel, of Chihuahua, who is connected with the Chihuahua & Pacific Ry. Co., is about to erect a 20-ton open-hearth steel plant in this city. It is also said that the Wellman-Seaver Engineering Co., of Cleveland, O., will equip the plant.

GAS PLANTS.

BUFFALO, N. Y.—The council has appropriated $1,000 for the hire of an expert to prepare plans for a municipal gas plant.

SANDY HILL, N. Y.—A franchise has been granted to James E. Flood and James D. Sherrill to construct and operate a gas plant for light, fuel, etc. President Filkins, Bd. Village Trustees.

WYNCOTE, PA.—Reports state that a new gas plant is about to be erected here.

FOSTORIA, O.—It is reported that a syndicate represented by Samuel R. Bullock, Philadelphia, Pa., has purchased the plants of the Fostoria Light & Power Co. and the Northwestern Natural Gas Co., and will construct a new gas plant in this city for light and fuel.

FULTON, KY.—Charles Gregory has applied for a franchise to construct and operate a gas plant, according to reports. Population, about 2,000.

LINCOLN, ILL.—The plant of the Lincoln Gas Co. has been sold for $200,000 by Frank M. Mills to Joseph H. Vail, Chicago, representing Eastern capitalists. The plant is bonded for $30,000.

SAN BERNARDINO, CAL.—B. C. Roos writes us that he is about to organize a company to construct a plant for the manufacture of gas, ice and electricity.

NEW COMPANIES.—Crescent Oil & Gas Co., St. Mary's, W. Va.; $50,000, with $100 paid in; to bore for oil, gas, etc.; Henry Lenz, Wm. Muehlbrunner, Allegheny, Pa.; J. A. Elptunstone, J. F. Roessle, Wm. H. Roessle, Pittsburg, Pa.

Paulding Oil & Gas Co., Paulding, O.; $10,000; to drill for gas and oil.

California Oil & Gas Co., Yuma, Arizona; $2,000,000; W. H. Hart, N. Y. Lemance, L. L. Bettys, Henry P. Umbsen, R. J. Davis, D. E. Hayes and W. H. Snedaker.

MISCELLANEOUS CONTRACTS.

FIRE HOSE.—Owosso, Mich.—The fire department has asked the committee to purchase 1,000 ft. of new fire hose.

CEMENT.—Seattle, Wash.—Bids are asked until October for furnishing Portland cement. Capt. Harry Taylor, U. S. Engr.

POLICE SIGNAL SYSTEM.—Gloucester, Mass.—F. E. Davis writes us that a police signal system will be installed at an early date.

GASOLINE ENGINE.—Red Hook, N. Y.—D. W. Wilbur wishes to secure some cheap power (not to exceed 1 HP.) for running a cream separator.

CYCLEWAY.—Pasadena, Cal.—Horace H. Dobbins, Pres. Cycleway Co., has been granted a franchise for a cycleway to cost about $187,500.

TELEPHONE SYSTEM.—Washington, Ga.—A franchise has been awarded to Neil & Grier to establish a telephone exchange for this town and county.

LUMBER.—New York, N. Y.—Bids are asked until Oct. 3 for furnishing spruce joist, roofing boards and white pine. Francis J. Lantry, Comr. Dept. of Correction.

MACADAM ROAD.—Pittsfield, Mass.—The following contract was let Sept. 8, 1898, to Harris & Letteney, Boston, for building a macadam road in this city for the Massachusetts State Highway Commission; Secy., A. B. Fletcher, Boston: Excavation, 3,000 cu. yds., 40 cts a cu. yd.; excavation, borrow, 100 cu. yds., 38 cts.; excavation, ledge, 10 cu. yds., $4.25; rubble masonry, laid dry, 21 cu. yds., $4.60; rubble masonry laid in cement, 60 cu. yds.; $7.80; gravel, 418 cu. yds., 80 cts.; telford, 500 sq. yds., 36 cts.; shaping, 6,684 sq. yds., 2 cts.; broken stone in place, 1,719 tons, $1.94 a ton; 12-in. vitrified clay pipe, 58 cts.; fencing used for guard rail, 1,020 lin ft., 16 cts. a lin. ft.; side drains, 3,200 lin. ft., 29 cts.; stone monuments, 22 each, $1.50; total, $6,987. Extra work at following prices (materials at cost): Foremen, 40 cts. an hour; masons, 35 cts.; masons' helpers, 20 cts.; laborers 16⅔ cts.; double teams and drivers, 45 cts.; single teams and drivers, 30 cts.

INDUSTRIAL NOTES.

EXHIBITS AT THE ANNUAL CONVENTION OF THE NEW ENGLAND WATER-WORKS ASSOCIATION AT PORTSMOUTH, N. H., SEPT. 14 to 16:

VALVES AND HYDRANTS.—Rensselaer Mfg. Co., Troy, N. Y.; Coffin Valve Co., Boston, Mass.

METERS.—Thomson Meter Co., Brooklyn, N. Y.; Union Water Meter Co., Worcester, Mass.; National Meter Co., New York city; Hersey Mfg. Co., South Boston, Mass., Neptune Meter Co., New York city.

MISCELLANEOUS.—Ashcroft Mfg. Co., New York city, pressure and recording gages and safety valves; Fred. M. Gow, Medford, Mass., meter testing bench; Lead-Lined Iron Pipe Co., Wakefield, Mass., service pipe; Henry F. Jenks, Pawtucket, R. I., drinking fountains; Mueller Mfg. Co., Decatur, Ill., water-works supplies and tapping machines; A. P. Smith Mfg Co., Newark, N. J., tapping machines and water-works supplies; Builders' Iron Foundry, Providence, R. I., service boxes; Consolidated Safety Valve Co., safety valve.

EXHIBITORS AT ROADMASTERS' CONVENTION AT DENVER, COLO., SEPT. 13 AND 14.

A. O. Norton, Boston—Jacks.
Continuous Rail Joint Co., Newark, N. J.
National Lock Washer Co., Newark, N. J.
McMullen Woven Wire Fence Co., Chicago.
Page Woven Wire Fence Co., Adrian, Mich.
Weber Rail Joint Mfg. Co., New York, N. Y.
Elliott Switch & Frog Co., East St. Louis, Ill.
Coughlin-Sanford Switch Co., New York, N. Y.
W. Goldie, Jr., & Co., Pittsburg, Pa.—Tie plugs.
Eyeless Tool Co., New York, N. Y.—Track tools.
Macleod & Clark, Cincinnati, O.—The Buckeye light.
Automatic Rail-Joint Spring Co., Chicago.—Nut lock.
Roberts, Throp & Co., Three Rivers, Mich.—Hand cars.
Adams & Westlake, Chicago.—Switch and signal lamps.
Railroad Signal Lamp & Lantern Co., New York, N. Y.
L. S. Ware, Springville, N. Y.—Tie-plate, surfacer and gage.
Hussey, Binns & Co., Pittsburg, Pa.—Tamping shovels.
Ramapo Iron Works, Hillburn, N. Y.—Switches and frogs.
Standard Coupler Co., Chicago.—Wayland insulated rail joint.
Pettibone, Mulliken & Co., Chicago.—Track tools and supplies.
The Q. & C. Co., Chicago—Servis tie-plates and Bryant rail saws.
Buda Foundry & Mfg. Co., Harvey, Ill.—Handcars and track tools.
Fairbanks, Morse & Co., Chicago—Jacks, handcars, cattleguards.
Andrew Warren Railway Supply Co., St. Louis, Mo.—Track tools.
A. Bonzano, Philadelphia, Pa.—Rail joint and anti-creeping device.
Pennsylvania Steel Co., Steelton, Pa.—Switches, frogs and switchstand.
Dilworth & Porter Co., Pittsburg, Pa.—Goldie tie-plates and spikes.
Diamond State Iron Co., Wilmington, Del.—Spikes and the Churchill rail joint.
Railroad Supply Co., Chicago.—Wolhaupter tie-plates, cattle guard and crossing signal.
Matthews Woven Wire Fence Co., Jacksonville, Illl.—Fencing and posts for steel track signs.
M. M. Buck Mfg. Co., St. Louis, Mo.—Track tools and supplies, including enameled iron track flags.

THE PITTSBURG BRIDGE CO., through its New England agents, Collins & Norton, Springfield, Mass., has an order from Fitts Bros., South Framingham, Mass., for the steel framework of their new three-story building at the last-named place.

THE UNITED STATES SANITARY CO., Washington, D. C., has just completed and shipped to Santiago, Cuba, three carloads of its garbage wagons and carts. The company has in press a new booklet which will soon be out, and which will be sent free on application.

THE PITTSBURG REDUCTION CO., Pittsburg, has just received an order for 50,000 lbs. of aluminum from the Russian Government for army purposes. It is stated that the metal is being used in the Russian army for buttons, canteens, cooking utensils, buckles, and even as horse shoes.

MR. E. J. HAYDEN, for over six years a member of the firm of Harold C. Dayton & Co., 138 Dey St., New York, representative in that city of the Dobbie Foundry & Machine Co., Niagara Falls, N. Y., has established a contractors' railway and mill supply business, at 55 Warren St., New York.

THE STILWELL-BIERCE & SMITH-VAILE CO., Dayton, O., through its Chicago house, was recently awarded the contract for a compound direct-acting pumping engine at Missouri Valley, Ia.; also for electrically driven pumps at Alpena, Mich., and an air lift plant at Odell, Ill. The company reports a satisfactory trade in all its lines.

THE CLIMAX ROAD MACHINE CO., Marathon, Pa., reports that it has had to operate its works day and night for the entire past season in order to keep up with its orders for road machines. The business this year has been more than double that for 1897, which was the largest previous year. The plant will be enlarged this fall.

THE HELDERBERG CEMENT CO., 86 State St., Albany, N. Y., which recently put in operation a new plant for the manufacture of Portland cement at Howe's Cave, N. Y., reports that its orders are already more than double the capacity of the plant, and that the capacity of the plant may be quadrupled this winter. Mr. Chas. E. Lee is General Manager and Vice-President.

THE BRODHEAD CONTRACTING CO., recently incorporated as successors to Brodhead & Hickey and C. E. Brodhead & Co., has lately been awarded the contract to build the stockhouse walls and concrete pavement for the two new blast furnaces which are about to be erected by the Ohio Steel Co., at Youngstown, O. There are about 15,000 cu. yds. of rubble masonry and 15,000 cu. yds. of concrete foundation pavement.

THE AMERICAN DIAMOND ROCK DRILL CO., 120 Liberty St., New York, reports among recent orders a drill of 1,500 ft. capacity for Russia; hand drills for the Klondike and for Mexico; a No. 7 drill for Northern New York State; two 1,000-ft. drills for Mexico, and one drill for Sumatra, Asia. The company also reports a marked increase during the past two months in the diamond drill supply trade, both domestic and export, and considerable activity in orders for allied machinery.

THE BERLIN IRON BRIDGE CO., East Berlin, Conn., is erecting for Beaman & Smith, Providence, R. I., a new machine shop, 60×130 ft., with a lean-to addition, 20×50 ft. The building will be modern in every respect and will have a maximum amount of light consistent with good construction, will be practically fireproof, and arranged with traveling cranes, trolleys, and such appliances for the easy handling of materials and machines. A portion of the building will be two stories high, arranged for suitable offices, drafting rooms, store-rooms, etc. The framework of the building is steel built in brick work entirely supported by the framework, and is arranged with a view to easily attaching shafting for the transmission of power. An electric traveling crane of 40 ft. span, with a capacity of 15 tons, will run the whole length of the main building.

NEW COMPANIES.—American Indies Co., 110 East Front St., Plainfield, N. J.; $18,000,000, commencing with $50,000; to generate and distribute electricity for purposes of light, heat, power, etc., in the West Indies; R. A. C. Smith, 100 Broadway, New York; Thomas F. Ryan, 32 Liberty St., New York; Anthony N. Brady, Albany, N. Y.; Thomas Dolan and Wm. L. Elkins, of Philadelphia, Pa.

South American Construction Co., Manaos, State of Amazonas, Brazil; $400,000, commencing with $400; to manufacture asphalt pavement, and to lay and sell the same; W. D. Walker, B. F. Brennig, A. L. White, P. L. Lieborman and Rufus W. Fowler, all of New York.

New Rochelle Telephone Co., New Rochelle, N. Y.; $500,000, commencing with $100; to deal in telephones, telephone devices, apparatus and supplies; by George W. Sutton, New Rochelle; A. R. Hopkins, Montclair, N. J.; John H. Scofield and David G. Whitney, Grand View, N. Y.; Horace A. Conner, Brooklyn, N. Y.

Standard Ball Co., New York; $150,000, commencing with $500; to buy, sell, lease or mortgage all mechanical apparatus and metal-turning machines; H. S. Weed, New Canaan, Conn.; Felix Jellenik, R. L. Shainnold, A. T. George and E. M. Johnson, of New York.

Marshall & Huschart Machinery Co., Chicago, Ill.; $50,000; Alfred Marshall, Frank M. Huschart, Benjamin F. March.

Wayne Engineering & Construction Co., Worthington, Ind.; $20,000; C. S. Knight, Thos. Duncan.

Trenton Fire Brick Co., New York Ave., Trenton, N. J.; $100,000, commencing with $15,000; to manufacture and sell vitrified and refractory clay products; Geo. R. Frost, Chas. A. Pope and Francis C. Lowthorpe, all of Trenton.

Rich Patch Iron & Ore Co.; $3,000,000, commencing with $50; to manufacture iron, steel and other metals; John F. Anderson, Walter Woolcott, Ernest E. Davies, Victor H. Conkle and Frederick Maurer, all of Philadelphia, Pa.

Avery Salt Co., Avery Island, La.; $400,000, commencing with $70; to manufacture evaporated salt, and appliances used in said business; Joseph Clark, Wm. L. Chrisman, H. E. Gerhard, Wm. C. Watt and M. G. Saunders, all of Philadelphia, Pa.

Mail Delivery Notice.

Special efforts are made to deliver our paper to its readers each week at the earliest possible moment. The largest binding and mailing establishment in New York begins work on Engineering News early each Wednesday evening, and all papers for Boston, Philadelphia and Washington are usually in the New York post-office by midnight; all Brooklyn and New York city papers by 3 o'clock—in ample time for the first delivery Thursday morning. The entire edition, including foreign copies, is in the mail soon after 6 o'clock Thursday morn- If your paper is not received promptly we advise that you make a complaint to your local post-office officials.

The Circulation of ENGINEERING NEWS among Prominent Contractors Probably EXCEEDS that of any other FIVE PAPERS

PERSONAL.

Mr. H. E. Wells, of Columbus, O., has been appointed Superintendent of the city water-works and electric light plant of Rushville, Ind., to succeed Mr. A. T. Mahin, resigned.

Mr. Julius Le Roy Adams, Jun. Am. Soc. C. E., of Brooklyn, N. Y., has been appointed Chief Engineer of the Hartford, Manchester & Rockville Electric Ry. Co., Hartford, Conn.

Mr. William W. Locke, Assoc. M. Am. Soc. C. E., Sanitary Engineer of the Department of Health, Brooklyn, N. Y., was married Sept. 14, 1898, to Dr. Etta M. Ober, of Nashua, N. H.

Mr. William G. Price, M. Am. Soc. C. E., Chief Engineer of the Chicago City Ry. Co., has resigned to accept a position as engineer with the Peckham Motor Truck & Wheel Co., New York city.

Mr. David R. Lee, Assoc. M. Am. Soc. C. E., has been appointed Supervising Engineer of the Bleecker Reservoir Improvement, Albany, N. Y. He has been connected with the New York state canals, at Syracuse.

Mr. John B. Parsons, General Manager of the Union Traction Co., Philadelphia, Pa., has been elected President of the same, to succeed Mr. John L. Welsh, resigned. Mr. George D. Weidener has been elected Vice-President.

Mr. Frank A. Foster, civil engineer, of Dorchester, Mass., is a candidate for the State Legislature of Massachusetts. He was for 15 years in the office of the City Engineer, of Boston, and for the past four years has been conducting an engineering business in Dorchester, which was his birthplace.

Mr. William Barclay Parsons, M. Am. Soc. C. E., consulting engineer, of New York, and Chief Engineer of the Rapid Transit Board of that city, expects to sail from San Francisco, Cal., Oct. 25, for China, where he will undertake the location and construction of a system of railways for the Brice syndicate.

Mr. A. K. Shurtleff, General Foreman of Bridges and Buildings of the Fremont, Elkhorn & Missouri Valley R. R. and the Sioux City & Pacific R. R., with headquarters at Norfolk, Neb., has been appointed Division Engineer of the Kansas Division and Branches of the Union Pacific R. R., with headquarters at Kansas City, Mo., to succeed Mr. Charles Manhart, resigned.

Messrs. Andrew Onderdonk, Harvey C. Miller, Louis Hawkins, Eben S. Wheeler, M. Am. Soc. C. E., William D. Thomas, Richard B. Post, Percy J. Brune and Horatio H. Trundle, members of the party of engineers which has been engaged in the surveys of the Nicaragua Canal, arrived in New York, Sept. 27, on their way to Washington, D. C., to report to the Canal Commissioners.

Mr. George H. Morse, Electrical Engineer of the St. Joseph & Benton Harbor St. Ry., Electric Light & Power Co., Benton Harbor, Mich., has been appointed Instructor in Electrical Engineering and Machine Design in the University of Nebraska. He graduated from the University of Minnesota in 1893, and was for some time Instructor in Electrical Engineering in that institution.

Dr. William B. Phillips, M. Am. Inst. M. E., of Birmingham, Ala., has accepted the position of editor of the "American Manufacturer," of Pittsburg, Pa., and will take charge of that publication, Oct. 1. He was at one time a member of the staff of the "Engineering and Mining Journal," and has been a frequent contributor to that paper and to the "Mineral Industry." He has also been chemist to the Tennessee Coal, Iron & R. R. Co., and has been connected with the Alabama State University, Tuscaloosa, Ala., and the Alabama Geological Survey.

Mr. Charles E. Bigelow, President of the Geo. F. Blake Mfg. Co., 91 Liberty St., New York city, has accepted the office of President of the Ganswoort Bank in that city and will retire from the former position which he has held for the past four years. For nearly 32 years Mr. Bigelow has been connected with the Knowles Steam Pump Works, and, since its consolidation with the Geo. F. Blake Mfg. Co., he has been prominent in the affairs of the latter corporation. The employees of the company presented him with a handsome ebony gold-headed cane, Sept. 24, and the directors have adopted resolutions expressing their regret at his withdrawal. Mr. Bigelow was one of the organizers of the Gansevoort Bank a number of years ago.

Maj.-Gen. Grenville M. Dodge, U. S. Army, has been appointed President of the War Inquiry Commission, by President McKinley. He was graduated from Norwich University, Norwich, Vt., as a civil engineer, and served throughout the Civil War, being made successively Captain, Colonel, Brigadier-General and, on May 18, 1863, Major-General. He left the army in 1866, and built the Union Pacific Ry. and the Texas Pacific Ry. Since then he has been President of several railways, at present holding that office with the Fort Worth & Denver City R. R. The other members of the commission are: Maj.-Gen. Alexander McD. McCook, U. S. A.; Brig.-Gen. John M. Wilson, Chief of Engineers, U. S. Army, and M. Am. Soc. C. E.; Maj. Stephen C. Mills, Inspector-General, U. S. A., who is the Recorder of the Commission; Mr. Charles Denby, LL.D., who is a veteran of the Civil War, and who was from 1885 until July 11, 1898, Minister to China; Gen. James Beaver, a veteran of the Civil War, and formerly Governor of Pennsylvania; Col. Urban A. Woodbury, of Burlington, Vt., a veteran of the Civil War, and who has been both Lieutenant-Governor and Governor of Vermont; Capt. Evan P. Howell, a veteran of the Confederate Army and a prominent railway man of Georgia; Col. Jas. A. Sexton, a Civil War veteran and a member of the firm of Cribben, Sexton & Co., foundrymen, of Chicago, and Mr. Richard Weightman, who is the Secretary of the Commission and has been an editorial writer on the Washington, D. C., "Post" on subjects connected with conditions in Cuba.

OBITUARY.

Mr. William L. Langridge, builder, of Williamsburg, New York City, died of pneumonia, Sept. 27, aged 55.

Mr. Thomas Collins, of the firm of Collins Bros., railway contractors, of Bellefonte, Pa., died at his home in that city, Sept. 25, aged 75. The firm, which was originally composed of six brothers, is said to have built more miles of railway than any other firm in the world. Among the roads built by them were the Portage R. R. for the Pennsylvania R. R., in 1849, portions of the Philadelphia & Reading, the Lehigh Valley, the Central of New Jersey and others. Mr. Peter Collins is now the sole survivor of the family.

Mr. John M. Toucey, F. Am. Soc. C. E., formerly General Manager of the New York Central & Hudson R. R., died at his home, Garrisons-on-the-Hudson, N. Y., Sept. 23, aged 70. He was born in Newtown, Conn., and entered the railway service in 1848 as station agent on the Naugatuck R. R. He held this position until 1855, when he became connected with the Hudson River R. R., and in 1862 was made Assistant Superintendent of this road. In 1867 he was made Superintendent of the Hudson River Division of the New York Central & Hudson River R. R., and in 1881 became the General Superintendent. He was appointed as General Manager in 1890, and continued in that position until last May, when the office of General Manager was abolished. Mr. Toucey declined the position of Assistant to the President, which was created for him as a substitute, and resigned. He was then retired on a pension.

Oct. 20. Secy., F. A. Charpiot, P. O. Box 13, Savannah, Ga.
AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENT.
Oct. 26-28. Annual meeting, Washington, D. C. Secy., D. L. Fulton, Bureau of Highways and Sewers, Allegheny, Pa.
SOCIETY OF NAVAL ARCHITECTS AND MARINE ENGINEERS.
Nov. 10-11. Annual meeting. Secy., Francis T. Bowles, 12 West 31st St., New York.

NEW ENGLAND RAILROAD CLUB.—On Sept. 13 this club enjoyed its annual outing. A special train conveyed the party of about 300 to Fox Point, Providence, where a special steamer was boarded and the trip continued to Crescent Park on the Providence River.

ENGINEERS' CLUB OF ST. LOUIS.—The meeting on Sept. 21 was made a memorial to the late Col. Henry Flad. Addresses were delivered by President Bryan and Mr. Robert Moore. The latter gave a sketch of Col. Flad's life, and paid a high tribute to his inventive genius and high personal character. Richard McCulloch, Secy.

MICHIGAN ENGINEERING SOCIETY.—The next annual meeting will be held at Lansing, Jan. 24 to 26, 1899. The following officers have been elected for the ensuing year: Pres., Prof. Chas. E. Green, Ann Arbor; Vice-Pres., Jay J. Hubbell, Manistee; Secy. and Treas., Frances Hodgman, Climax; Directors—J. D. Davis, Ann Arbor; Wm. D. Sears, Saginaw; Dorr Skeels, Grand Rapids.

RAILWAY SIGNALING CLUB.—The last meeting of this club was held Sept. 13 at the Great Northern Hotel, Chicago. The committee on standard designs for interlocking materials reported, presenting a list of parts that could be readily agreed upon for standardizing. A committee of five was appointed to recommend standard specifications for signaling apparatus. Following this the subject of distant signals and two wires for operating the same was discussed.

WESTERN RAILWAY CLUB.—This club held its first fall meeting on Sept. 20. Mr. G. W. Scott presented a paper on "Heating Large Railroad Stations, Shops and Buildings," in which the use of exhaust steam was recommended as the most economical and satisfactory method. The discussion which followed indicated that this was the opinion of most of those present. It was pointed out by Mr. Thurbell that many of the defects in heating systems were due to poor engineering and not to inherent defects in the system. The following subjects were also discussed: "Economy of and Limitations in Running Locomotives Long Distances;" "Is It Practical, Safe and Economical to Use Spliced Air-Brake Hose?"

THE ENGINEERS' CLUB OF PHILADELPHIA.—The last meeting of this Club was held Sept. 17, with 59 members and visitors present. The evening was devoted to a topical discussion "On the Proper Proportions of Parts of Steam Engines." This was quite generally participated in, the opinion of the majority being that it would be very desirable to adopt standard proportions for the various parts of steam engines intended to furnish standard amounts of horse-power in different classes of service, but that this would only be possible by adopting standards for the quality of materials employed. Secretary L. F. Rondinella announces that the system of conversational meetings will be resumed. They will occur on the second Saturday of each month during the ensuing session. The first meeting of this character will be on Oct. 8.

THE LOUISIANA ENGINEERING SOCIETY.—At the last meeting of this Society, which was held on Sept. 19, Mr. F. T. Llewellyn presented a paper on "The Evolution of Structural Design," postponed from the previous meeting. This paper pointed out the fact that the development of structural design is due rather to varying and improved conditions governing the cost and availability of material than to a more perfect knowledge of the theories of mechanics. Following the paper, Mr. P. E. Carriere exhibited a number of stereopticon views of European scenery.

BROOKLYN INSTITUTE OF ARTS AND SCIENCES.—The following schedule of lectures is announced to be given under the auspices of the Department of Engineering: Sept. 30, "The Vessels in the United State Navy in Use in the Recent Spanish-American War," H. W. Raymond, Germantown, Pa.; Nov. 18, "Cableways as Employed in Construction Work and in Excavations," Spencer Miller; Dec. 16, "The Niagara Bridges," Richard S. Buck; Jan. 6, "The Civil and Military Engineering of the Cliff Dwellers," Robt. B. Stanton; Jan. 20, "Underground Rapid Transit and the Proposed Long Island Railway Tunnel between Atlantic Avenue and Lower Manhattan," Chas. E. Jacobs; Feb. 17, "The Brooklyn Water-Works," Arthur S. Tuttle; March 17, "Building Foundations," John F. O'Rourke; April 21, "The Engineering Features of Public Works in the Tropics," O. F. Nichols; May 19, "Deep Foundations of High Buildings and Piers," Henry W. Brinckerhoff.

ASSOCIATION OF EDISON ILLUMINATING COMPANIES.—The nineteenth meeting of this association was held at the Hotel Iroquois, Sault Ste. Marie, Sept. 12 and 13. Delegates were present from the Edison companies of Detroit, Chicago, Boston, Brooklyn and New York. At the first session the experience of the several companies in methods of charging for long-hour service was considered. The discussion developed the fact that several systems of charging were in use, but all agreed as to the benefits to be derived from special rates for long-hour service.

At the evening session, Mr. W. S. Barstow, of the Brooklyn Edison Co., described the system of transmission employed by his company, and Mr. J. W. Lieb, Jr., reported the conclusions of the investigating committee, consisting of Messrs. John Van Vleck, Arthur Williams and J. W. Lieb, Jr., which had been sent abroad to inspect foreign electric lighting systems. This was followed by a brief discussion dealing mainly with alternating current systems. The session of the second day began with a description of European meter practice and methods of installing lamps and systems of charging in vogue abroad, by Mr. Arthur Williams. This was followed by papers on metering by Messrs. E. A. Leslie and Charles S. Shepard, of New York, and O. J. Bushnell, of Chicago. The discussion of meters was continued at the afternoon session, at which Messrs. C. C. Perry and W. F. Kingan read papers on metering problems for small stations. The committee on Welsbach burners and acetylene gas presented a full report at this session. At the evening session, reports were received from the Executive Committee, the Committee on Incandescent Lamps, and the Lamp Testing Bureau, and the following officers were elected for 1898: Pres., R. R. Bowker, New York; Vice-Pres., G. R. Stetson, New Bedford, Mass.; Treas., W. S. Barstow, Brooklyn; Secy., Wilson S. Howell, Newark, N. J. (P. O. box 114). Executive Committee—Samuel Insull, Chicago; Chas. L. Edgar, Boston, Mass.; J. W. Lieb, Jr., New York; Alex. Dow, Detroit; J. H. Vail, Philadelphia.

As previously announced the steamer "Northwest," conveyed many of the visitors to and from the convention. On the return trip the delegates were treated to a carriage ride to the points of interest at Mackinaw Island by the General Electric Co.

AMERICAN INSTITUTE OF MINING ENGINEERS.—The seventy-fifth annual meeting of the Institute will be held at the Buffalo Library Bldg., Buffalo, N. Y., beginning Oct. 18. The excursion program includes a steamer excursion about the harbor on the afternoon of Oct. 19; a reception on the evening of Oct. 20; with a list of optional excursions for the morning and afternoon of Oct. 21. It is also planned to hold the business session of Oct. 21 at the International Hotel, Niagara Falls, where an illustrated paper on "Niagara Falls Water Power and Its Transmission and Utilization by Means of the Electric Current" will be presented. Saturday, the last day, will be spent in inspecting the many points of engineering and scenic interest.

The following is a partial list of the papers to be presented: "The Evolution of Mine-Surveying Instruments," Dunbar D. Scott; "Notes on the Forms Assumed by the Charge in the Blast Furnace, as Affected by Various Methods of Filling," Frank Firmstone; "Modern Cupola Practice, with Special Reference to the Discussion of the Physics of Cast-Iron," Bertrand S. Summers; "Experiments in the Sampling of Silver-Lead Bullion," G. M. Roberts; "The Influence of Bismuth on Brass, and Its Relation to Fire-Cracks," Erwin S. Sperry; "Graphic Records of the Screening of Crushed Material," Courtenay DeKalb; "Notes on the Mines of the Frontino and Bolivia Company, Columbia, S. A." Spencer Cragoe; "The Relations between the Chemical Constitution and the Physical Character of Steel," William R. Webster; "Does the Size of Particles have any Influence in Determining the Resistance of Fire-Clays to Heat and to Fluxes?" H. O. Hofman and B. Stoughton; "A Modification of Bischof's Method for Determining the Fusibility of Clays, as Applied to Non-Refractory Clays, and the Resistance of Fire-Clays to Fluxes," H. O. Hofman; "The Superficial Alteration of Western Australia Ore-Deposits," Herbert C. Hoover; "Mineral Lode Locations in British Columbia," William Braden; "The Kytchtym Medal," Dr. Persifor Frazer; "A New Assay for Mercury," Richard E. Chism; "The By-Product Coke-Oven in Some of Its Phases," W. H. Blauvelt; "The Alluvial Deposits of a Dry Country," T. A. Rickard; "Hübnerite in Arizona," Wm. P. Blake. There will also be discussions upon Professor Howe's paper on the "Use of the Tri-Axial Diagram and Triangular Pyramid for Graphical Illustration;" of Dr. Don's paper on the "Genesis of Ore-Deposits;" of Mr. Keller's paper on the "Elimination of Impurities from Copper-Mattes," and on the use of multiple tuyeres for the blast-furnace.

THE BRITISH ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE.—This association held its 68th annual meeting at Bristol, England, Sept. 8—12. Like the American Society of similar name, the association is divided into various sections devoted to the consideration of special subjects The following is a list of the papers presented of most interest to engineers:

Section A.—Mathematical and Physical Science.—"On the Conservation of Energy in the Human Body," E. B. Rosa and W. O. Atwater; "Comparison Between Charging a Secondary Cell at Constant Potential and at Constant Current, more especially as Regards Efficiency," A. A. Cahen and J. M. Donaldson; "On the Measurement of Small Differences in Resistance," E. H. Griffiths; "Continuity of Undulatory Theory for Sound Elastic-Solid Light and Electric Waves," Lord Kelvin; "A Platinum Voltmeter," Prof. H. L. Callendar; "The Carbon Consuming Cell of Jacques," S. Skinner; "On Standard High Resistance," J. B. Fawcett; "Experiments on the Influence of Electricity on Plants," S. Lemström; "The Temperature Coefficients of the Resistances Used in 1897 Determination of the Ohm," M. Solomon.

Conference on Terrestrial Magnetism and Atmospheric Electricity.—"On the Construction of Magnets of Constant Intensity Under Changes of Temperature," J. R. Ashworth; "On the Relative Advantages of Long and Short Magnets," Prof. Mascart; "On the Application of Terrestrial Magnetism to the Solution of Some Problems in Cosmical Physics," Prof Arthur Schuster; "On the Relations between the Variations in the Earth Currents, the Electric Currents from the Atmosphere, and the Magnetic Perturbations," Selim Lemström.

Section B.—Chemistry.—"A New Form of Stand for Electrolytic Analysis," Dr. Hugh Marshall; "On a 10-c. p. Lamp to be Used as a Standard of Light," A. G. Vernon Harcourt.

Section F.—Economic Science and Statistics.—"Municipalities as Traders," Geo. Pearson; "Ought Municinal Enterprises to Yield a Profit in Aid of Rates?" E. Cannan; "Economic and Social Influences of Electric Traction," Prof. S. P. Thompson.

Section G.—Mechanical Science.—"Electric Power in Workshops," A. Siemens; "The Application of the Electric Motor to Small Industrial Purposes and its Effect on Trade and on the Community Generally," A. H. Gibbings; "Notes on the Electric Lighting System at Bristol, with Special Reference to the Auxiliary Plant," H. Faraday-Proctor; "Electric Traction by Surface Contact," Prof. Silvanus Thompson and Miles Walker; "Combined Electric Lighting and Power Plant for Docks and Harbors," J. G. Aldridge; "Electrical Canal Haulage," A. H. Allen; "On the Pacific Cable," C. Bright.

AMERICAN SOCIETY OF CIVIL ENGINEERS.—The last meeting of this society was held on Sept. 21 at the Society House, New York. As announced, no regular paper was read, and the evening was devoted to the subject of Roads and Road Building.

Mr. James Owens favored thick roads, using a 5-in. telford topped with a 3-in. macadam in preference to an 8-in. macadam. The actual size of stone used should depend upon locality and traffic conditions, smaller sizes serving for light traffic. In all cases sizes of stone must not be mixed. Binders such as sand, gravel, loam, clay or ordinary earth should be used as a temporary means to get a road into shape. The work of the Massachusetts State Road Commission was outlined by Mr. W. E. McClintock. The most difficult roads, which were first built, cost about $10,300 per mile for a 15-ft. road. In most cases the roads consisted of 3 ins. of gravel, 6 ins. of rock, wedged, filled and covered with broken stone and rolled.

Mr. Budd, Road Commissioner of New Jersey, stated that in that state 300 miles of road had been completed under state control, and 300 miles more had been petitioned for. Early roads cost from $7,000 to $10,000. Now roads were made thinner and various modifications had been introduced until the cost had been reduced to $4,000 per mile. Good gravel roads averaged from $1,000 to $1,500 per mile where materials were convenient.

Mr. N. P. Lewis, Engineer of Street Construction and Maintenance, of Brooklyn, considered 20 to 30 ft. as the proper width of city streets and 12 ft. for country roads. Grades and drainage were very important and should receive full attention. He believed that an 8-in. macadam road 12 ft. wide could be built in most parts of New York state for $5,000 per mile and a 6-in. for $3,000.

Mr. E. W. Harrison, Chief Engineer of the Hudson County Public Roads, New Jersey, described the Hudson County Boulevard, which comprises 400,000 yds. of telford macadam, laid in the last 5 years. This road is like a city street, and is from 12 to 14 ins. deep. It is composed of 8 ins. of trap rock telford, 4 ins. of 2 to 2½-in. macadam, with 1½ in.-stone on top and finished to a height of 1½ ins. above grade, with a layer of screenings and flour well watered and rolled about 110 times with a 15-ton roller. Several others expressed their views upon the subject and it was decided to continue the discussion at another meeting.

BOSTON SOCIETY OF CIVIL ENGINEERS.—On Sept. 21 the society had an excursion in the afternoon and a regular monthly meeting in the evening. The excursion was to the new high service reservoir being built by the Metropolitan Water Board in the Middlesex Fells Reservation, which area forms a part of the Metropolitan Park System. The reservoir work comes in the division of the water system in charge of Mr. Dexter Brackett, M. Am. Soc. C. E., the chief engineer of the board being Mr. F. P. Stearns, M. Am. Soc. C. E. The reservoir will have a capacity of 38,000,000 to 40,000,000 gallons. The reservoir will be filled by pumping from Spot Pond, originally the source of the joint water supply of Malden, Melrose and Medfield, but now turned into a distributing reservoir for the Metropolitan Water System, water from the Chestnut Hill reservoir being pumped into Spot Pond, and the reservoir just named being filled from the old Sudbury River and New Nashua systems. The new reservoir in question will be described in a later issue.

At the evening session the chair was occupied by Mr. Howard Carson, M. Am. Soc. C. E., Chief Engineer of the Boston Transit Commission and President of the society. Mr. Carson announced that the piece of ancient lead water pipe, presented to the society by Mr. Clemens Herschel, M. Am. Soc. C. E., of New York city, had been suitably mounted in a glass case, and was on the desk before him and them. He also stated that the celebration of the fiftieth anniversary of the society would probably be held in November. The feature of the evening was a talk by Mr. Carson on the proposed East Boston Tunnel, illustrated by lantern slides, and including a review of various methods of submarine tunnelling. These the speaker divided into two general classes: (1) Working from headings by means of shields or otherwise and (2) building the tunnel in dredged trenches. According to Drinker's "Tunnelling," the first instance of the use of cast-iron plates, or a shield, was in 1864, under Barlow's patent, on a tunnel 7 ft. in diameter, beneath the Thames, near the London Tower, compressed air being used. Beach's shield followed, in 1865. Coming down to recent times, mention was made of the shield 27⅔ ft. high and 19½ ft. long used in the Blackwall tunnel, and of the small size of some recent London subways, only 10 to 11 ft. in diameter, with one railway track. Aside from water-works intakes of comparatively small size, the principal examples of the placing of tubes in dredged trenches were in connection with the Metropolitan Sewerage System. Here large tubes were lined with brick, towed to place and sunk in tidal waters. Although little work of this kind has been done, it has been the subject of many patents.

In the studies for the East Boston tunnel a diagram was prepared showing that two 16-ft. tunnels could be constructed in trenches with much less dredging and greater ease of construction than one 23½-ft. tube. The tripod derricks for lowering the 16-ft. tubes would have to be about 90 ft. in length. The tubes would be imbedded in concrete for a large part of their height.

Regarding the probable route of the tunnel and the conditions under which it might be built and operated. Mr. Carson explained that the statutes of 1894 authorized the Boston Transit Commission to build a two-track tunnel from the subway in Scollay Sq., Boston, to the street surface in Maverick Sq., East Boston, which involves a tunnel beneath the East Boston channel. The law of 1897 changes the location of the Boston end of the tunnel to or near Hanover Sq., and instead of saying the commission may connect these points, the act says it shall do so when the Boston Elevated Railway Co. applies for the right to construct a road on a certain route. The later act also provides that the company named shall pay the city 0.⅜% of the gross receipts of the company and 1 ct. for each passenger carried. There is some ambiguity in the last act as to whether it requires a tunnel beneath the streets of Boston.

As to the needs of a tunnel, the speaker stated that the population of East Boston is about 43,000, and of the other part of the city some 450,000. The East Boston ferries carry about 6,000,000 passengers each way per day and the Boston & Lynn Railway about 1,000,000 more.

Assuming the statute to require a subway for the whole distance between the two terminal points, the start at the Boston end would be made to avoid grade crossings with the present subway by carrying one under the other. The plans sent to the Secretary of War for approval showed the top of the tunnel not less than 35 ft. below the water level at each line of the Harbor Commission, and about 40 ft. below the deepest part of the channel. The shortest of the seven or eight lines studied would be about 6,350 ft. in length between the two terminal points. There would be two 16-ft. tubes, with feeder ducts on each side in the space between the vertical sides of the cars and the tubes. These ducts could be used for passengers to walk on in case of accidental stoppages to the cars. The estimates of cost of the tunnel were not gone into.

CONSTRUCTION NEWS.

RAILWAYS.

ATKINSON & NORTHERN.—Bids are asked, according to reports, for work on a new line of railway between Atkinson and Perry, Neb., on the Niobrara River, a distance of 25 miles. O. G. Wales, Gen. Mgr., Atkinson.

CALIFORNIA EASTERN.—Press reports state that the California division of this railway company has placed an issue of $684,000 of 5% bonds in London, for the purpose of extending its lines to Calivada, Nev., a distance of 47 miles. The present line is operated between Blake and Manvel, Cal., a distance of about 30 miles. R. S. Seibert, Gen. Mgr., Los Angeles, Cal.

CHICAGO, MILWAUKEE & ST. PAUL.—D. J. Whittemore, Ch. Engr., 1100 Old Colony Bldg., Chicago, Ill., informs us that this company has no intention of building a line this year from Linn to Stanley, Wis., a distance of about 35 miles.

COAHUILA CENTRAL.—The Coahuila Central Construction Co. has been awarded the contract for the construction of this proposed line from Saltillo to Trevino, Mexico, a distance of 60 miles. The construction company, of which W. E. Dorwin is president, and John C. McMynn purchasing agent, both of Chicago, Ill., will also build a hotel at Saltillo and a smelter, with a capacity at first of 600 tons. The railway company was incorporated at Saltillo, June 30, to construct a standard-gage railway, with officers as follows: Pres., S. J. Martin, Saltillo, Mex.; Vice-Pres., John C. McMynn, The Rookery, Chicago; Secy. and Treas., E. W. Stone, Oswego, N. Y.; Gen. Mgr., W. E. Dorwin, Chicago.

COAL RIVER & SOUTHWESTERN.—This company was incorporated in West Virginia, Sept. 19, with a capital stock of $1,500,000, to construct a steam railway from St. Albans to the Norfolk & Western R. R. in Mercer county, W. Va. The incorporators are: James Booth, H. J. Tondy, C. R. Troxbr, W. S. Booth and H. F. Tondy, all of Huntington, W. Va.

EAST LOUISIANA.—We are informed that nothing has yet been done towards the construction of the proposed extension of this line from Covington north to the state line, about 36 miles. John Poitevent, Pres.; E. S. Ferguson, Asst. Gen. Mgr., both of New Orleans, La.

ENGLAND.—Bids are asked by the Burma Railways Co. until Oct. 3 for a number of "F" class engines, duplicate parts of locomotives, and metallic fittings for carriages. Address the company, at 76 Gresham House, Old Broad St., London, E. C., England.

IOWA CENTRAL.—L. M. Martin, Ch. Engr., Marshalltown, Ia., informs us that no extension from Oskaloosa to Des Moines, Ia., has been authorized, nor will any other extensions be made this year. Press reports state that a 3-mile branch was to be built from Albia, Ia., south to new coal fields.

KANSAS CITY, OSCEOLA & SOUTHERN.—J. F. Hinckley, Ch. Engr., Bolivar, Mo., informs us that this line was completed Sept. 1, and is being operated under lease by the St. Louis & San Francisco R. R. Co., which also operates the old line from Osceola to Kansas City. Construction began about Jan. 1 from the terminus of the "Blair Line" at Osceola, and extended to Bolivar, via Vista, Gerster, Weaubleau, Flemington and Cliquot, Mo., a distance of 38.3 miles. Pres., C. Miller, Bangor, Pa. The contractors for the grading and bridge and masonry work were George S. Good & Co., of Lock Haven, Pa., who moved approximately 700,000 cu. yds. of material and erected 5,000 lin. ft. of pile and frame trestle bridge work, 2,000 cu. yds. of culvert masonry and 700 cu. yds. of bridge masonry.

KOREA.—Press reports state that an agreement has been signed at Seoul, Korea, for the construction by Japanese of a railway from Seoul to Fusan.

LEAVENWORTH, KANSAS & WESTERN.—Reports state that a steam ditching machine is at work on this road; also that the roadbed is to be relaid with steel rails. J. O. Brinkerhoff, Act. Gen. Mgr., Kansas City, Mo.

LITTLE RIVER VALLEY.—Track is said to have been laid on the new line from Morris Ferry, Ark., on the Texarkana & Fort Smith branch of the Kansas City, Pittsburg & Gulf R. R., to the state line 7 miles west; grading is in progress. The projected route is from Nashville to Neal Springs, via Howard and Sevier, a distance of 40 miles. Pres., D. C. Richardson, Horatio, Ark.

MANISTIQUE & NORTHWESTERN.—C. E. Kelso, Secy., Manistique, Mich., informs us that Swanson & Wick, of Manistique, have been awarded the contract for grading for an extension of this system from Scotts to Shingleton, Mich., a distance of 8 miles, and that the work is almost completed. About five miles of track has been laid by the company employees, and connection is expected to be made with the Duluth, South Shore & Atlantic Ry. at Shingleton within 20 days. A connection was made with Munissing R. R. at Ackers on Sept. 15. The company will soon control 53 miles of railway in operation between South Manistique and Ackers and Shingleton. Pres., A. J. Fox, Detroit, Mich.; Gen. Mgr., Geo. H. Orr, Manistique.

MARSHFIELD & SOUTHEASTERN.—Chas. H. Grundy, Gen. Mgr., Marshfield, Wis., informs us that no new work on this line is under way, but that the proposed extension from Nekoosa to Princeton, Wis., about 50 miles, is still under consideration. Pres., W. A. Scott, Chicago, Ill.

MEXICAN CENTRAL.—Reports state that this company will soon require considerable track material, as arrangements have been made to build a branch line from Oredain to Tequila, State of Jalisco, a distance of about 30 miles. It is said that the landed proprietors along the route have given the company free right of way and a cash subsidy of $30,000. The company is now building a branch from Jiminez, State or Chihuahua, to Parral. It is also reported that negotiations are being made for the purchase of the Yurecuaro and Zamora division of the Michoacan & Pacific R. R., at present under construction.

NATIONAL INTEROCEANIC, ISTHMUS OF TEHUANTEPEC.—Press reports again state that Pierson & Sons, of England, have leased this railway system, and will reconstruct the entire roadbed; also that the Mexican government will make a harbor at Coatzacoalcos on the Atlantic side of the Isthmus. O. G. Canton, Ch. Engr., Coatzacoalcos, Vera Cruz, Mex.

NEVADA.—Final arrangements have been made, according to reports, for the construction of a line of railway from the smelters in Golconda, Nev., to the copper mines, a distance of 11¾ miles. Orders have been placed for 33,000 ties and the necessary rails and equipment.

PECOS VALLEY & NORTHEASTERN.—Track is being laid on this line between Roswell, N. Mex., and Amarillo, 205 miles, at the rate of over one mile a day, and the work is expected to be completed by Dec. 15. The grading west of the Pecos River has been completed.

PHILADELPHIA & READING.—Reports state that the contract for constructing a 1½-mile extension of this line at Shippensburg, Pa., to a connection with the Western Maryland R. R., has been let to Smith & Campion, Mahoney City, Pa. This new road will be built in order to avoid heavy grades now met with in that vicinity.

PITTSBURG & LAKE ERIE.—In addition to the proposed introduction of a complete electrical block signal system on this railway, plans are said to have been approved and bids asked for interlocking switch systems at the Pittsburg terminals and at the Bellevernon Junction bridge, which is being improved and extended at an expenditure of $100,000. The larger plant will be at the Pittsburg passenger terminals, and is estimated to cost $20,000. The apparatus will be electro-pneumatic and will have 40 levers to be operated. This company has just completed the laying of new 90-lb. steel rails to displace 70-lb. rails. Twenty miles have been put down on the northbound track, and next season both tracks between Pittsburg and Youngstown will have these rails. Between the city and Youngstown the roadbed has been made of a uniform cross-section and is ballasted with slag. J. A. Atwood, Ch. Engr., Pittsburg, Pa.

PITTSBURG, JOHNSTOWN, EBENSBURG & EASTERN.—The contract for the construction of the Altoona terminal of this line from Chestnut Ave. and 9th St., in Hollidaysburg, Pa., to a point on the road above Coleman's, has been awarded to E. M. Wilkins, who is expected to commence work on the same before Oct. 1. Other contracts on that road have been let.

PONTOTOC & STARKVILLE.—It is announced that the supervisors of Chickasaw county, Miss., have contracted with this company to grade, cross-tie, bridge and trestle 13 miles of roadbed from Houston north to the Pontotoc county line. This company was incorporated in Mississippi, as stated in our issue of July 7, to build a line from Pontotoc to Starkville, via Algona, Houlka, Houston and Sparta, Miss., a distance of 60 miles. Pres. N. B. Crawford, Atlanta, Miss., or N. W. Bradford, of Houston, Miss., may be addressed.

POTOSI & RIO VERDE.—Chas. J. Nourse, Jr., 27 William St., New York, a director of this company, whose incorporation was noted in our last issue, informs us that this proposed steam railway will extend from San Luis Potosi, Mexico, in a southeasterly direction into the Rio Verde district, and that the gage will be 36 ins. Capital for construction has been secured, and 40 miles are now under construction by the Potosi & Rio Verde Construction Co. One-half of the grading has been completed, and all the rails and ties purchased. Pres., Robert S. Towne, 27 William St., New York.

SOUTH CAROLINA & GEORGIA EXTENSION.—Reports state that this company has been chartered, with a capital of $500,000, to construct a railway from the southern boundary of North Carolina to the Tennessee State line, via Marion, S. C., a distance of about 140 miles. Among those interested are: John J. Collier and Evan R. Dick, both of Philadelphia, Pa., and Samuel Hunt., Pres. Ohio River & Charleston Ry. Co., Cincinnati, O.

SOUTHPORT & TERMINAL.—This company was incorporated in North Carolina, Sept. 13, with a capital stock of $250,000, to construct and operate a railway from Southport to Wilmington, N. C., with the right to extend the road from Southport, in a westerly direction, through the county of Brunswick to the boundary line between North and South Carolina. The directors are: W. A. Cullen, Conrad Kirk, Henry McDougal, P. Murray, Thomas Hawkins and H. H. Dougherty, of Newark, N. J.; Geo. H. Bellamy, El Paso, N. C.; Franz Mayer, C. C. Brown and A. Vorhees, New York.

UTAH & PACIFIC.—W. D. Hendricks & Son, Richmond, Utah, were awarded the contract, Sept. 17, for constructing the first 75 miles of this line from Milford, Utah, south to the Nevada state line, on the old grade built by the Oregon Short Line R. R. Co. Other bidders were: Holt & Reese and Kimball & Lewis, Salt Lake City, Utah; Roylance & Thompson, of Springville, Utah; C. Erickson & Co., of California; T. W. Stewart and the Corey Bros. Co., of Ogden, Utah. The Colorado Fuel & Iron Co. was awarded the contract for furnishing all necessary bolts, spikes and fastenings. The work of construction was expected to begin within 15 days and to be completed within three months. An extension of the road beyond Stateline as far as Pioche, Nev., is said to be projected. Pres., A. W. M'Cune, Salt Lake City; Ch. Engr., Joseph A. West, Ogden, Utah.

WABASH.—W. S. Lincoln, Ch. Engr., St. Louis, Mo., informs us that no official information has yet been received regarding the proposed extension of this line from East Hannibal to Quincy, Ill., as stated in current reports.

WEST VIRGINIA.—It is reported that J. W. Everhart, formerly surpervisor of track on the West Virginia Central & Pittsburg Ry., will supervise the construction of a short line of railway, an incline plane and a tram-road at Simpson, W. Va., for the New York Coal Co., which owns 1,100 acres of big vein gas coal. Col. Thomas B. Davis, Keyser, W. Va., is connected with the company.

WYOMING & MISSOURI RIVER.—Geo. M. Nix, Pres., Belle Fourche, S. Dak., informs us that this line is again under construction, between Belle Fourche and Aladdin, Wyo., a distance of 18 miles, and work will be completed by Oct. 15. F. C. Tucker, Ch. Engr., Deadwood, S. Dak.

YORK SPRINGS.—M. B. Cumbler, Pres., Carlisle, Pa., informs us that the surveys have been made and the right of way obtained for this proposed railway from York Springs to Dillsburg, Pa., a distance of about nine miles. C. W. Webbert, Ch. Engr., Boiling Springs, Pa.

STREET AND ELECTRIC RAILWAYS.

BERLIN, N. H.—Carlos P. Day, a director of the Berlin Electric Ry. Co., of Berlin, informs us that this company has not yet elected officers, but that a charter has been obtained and capital stock subscribed. As stated in our last issue, this company proposes to construct four miles of line between Berlin and Gorham.

BURLINGTON, VT.—Elias Lyman, Pres. Burlington Traction Co., of Burlington, informs us that the right of way has all been obtained, and the necessary capital secured, for constructing a 1⅛-mile extension of this line over the lower road in this city. The company will do its own work. H. M. McIntosh, Ch. Engr., Burlington.

DEDHAM, MASS.—The Norfolk Western St. Ry. Co. received a charter of incorporation, Sept. 23, and also permission from the railway commissioners to build and operate its proposed electric railway on High St., Dedham. The proposed route of the completed line is from Dedham to Medfield, via Westwood, a distance of nine miles. Work is expected to begin soon. Pres., W. H. Mitchell, Medfield; Engrs., Hodges & Harrington, 60 State St., Boston.

PALMER, MASS.—The Palmer & Monson St. Ry. Co. is said to contemplate the extension of its lines through Palmer, Ware and Warren, in which places franchises have been applied for.

SOMERVILLE, MASS.—The aldermen have granted the Boston Elevated Ry. Co. the right to relocate its tracks on Summer St.

WHITMAN, MASS.—G. H. Pearson, Town Clk., informs us that at the town meeting, on Sept. 23, a franchise was granted to the Brockton & Whitman St. R. R. Co. The contract will probably be let as soon as franchise is obtained in Brockton.

MOUNT VERNON, N. Y.—The trustees of the village of North Pelham have granted a franchise to the Westchester Electric Co. to build a street railway through the village.

NEW HARTFORD, N. Y.—The trustees of this town, Sept. 21, granted a franchise to the Sanquoit Valley Electric St. R. R. Co. to construct a street railway between New Hartford and Utica. Pres., A. P. Seaton.

NYACK, N. Y.—Local reports state that Isaac A. Walker & Son, 1217 to 1219 Girard Bldg., Philadelphia, Pa., have the contract for building the proposed electric street railway of the Nyack Traction Co., and that about 800 men will be employed on the work. The plans and specifications are now said to be in course of completion. Pres., H. C. Howard, Media, Pa.

PENFIELD, N. Y.—A hearing will be given in this town by Henry C. March, Comr. of Highways, Sept. 30, on the application of the Rochester & Sodus Bay Ry. Co. for a franchise to build through Penfield. The company has been granted permission to build along the Ridge Road through Webster. The proposed route of the railway is from Webster to Sodus Point, a distance of 42 miles. Pres., Thos. J. Nicholl, 267 State St., Rochester, N. Y.

PORT CHESTER, N. Y.—The Port Chester St. Ry. Co. filed a certificate of extension of its lines, Sept. 24, one beginning on Main St., running easterly to the State line; the other beginning on Purchase Ave., at Elm Place, and running westerly to the Glenbrook Road.

WATERTOWN, N. Y.—It is reported that the Black River Traction Co. has purchased the plant of the Watertown Brass Co., on Newell St., and that it will soon let contracts for the building of a new power house on the site. Treas., B. B. Taggart, Watertown.

CRANFORD, N. J.—The township committee of Cranford granted a franchise to the Elizabeth & Westfield St. Ry. Co., Sept. 22, to build a trolley line through the town. The company now holds franchises from all the towns between Elizabeth and Plainfield, except through Roselle. Pres., A. A. Gaddis, Westfield, N. J.

JERSEY CITY, N.J.—It is reported that the North Jersey St. Ry. Co., Newark, will build an extension on Jackson Ave., in this city, this fall. David Young, Gen. Mgr.

PERTH AMBOY, N. J.—A new application has been made to the board of aldermen by the Perth Amboy & Sewaren Electric St. Ry. Co. for a franchise to enter the city over Railroad Ave.

PLAINFIELD, N. J.—A public hearing will be given by the council, Oct. 3, on the application of the Plainfield St. Ry. Co. for permission to extend its tracks. Pres., T. N. Nevins.

BANGOR, PA.—A local company is being organized, according to reports, for the construction of an electric railway between East Bangor, Bangor and Pen Argyle.

BUTLER, PA.—The construction of a street railway in this place is said to be wanted by the residents.

CHESTER, PA.—The trolley line now being built between Chester and Wilmington, Del., is expected to be completed by Oct. 1. The new road completes the trolley connection from Philadelphia and New Castle, Del. a distance of 35 miles. Pres., C. W. Clark, Philadelphia, Pa.

BALTIMORE, MD.—The Anne Arundel county commissioners have granted permission to the Baltimore, Marley & Mountain Ry. Co. to construct a line over Curtis Creek and Cabin Branch bridges. The company was recently incorporated with a capital stock of $50,000, to build an electric railway from Baltimore to the mouth of the Magothy River, a distance of 11 miles. The incorporators are: Jas. Bond, Baltimore; Walter R. Townsend, Baltimore county; Robt. Moss, Frank B. Hancock, Bruner R. Anderson, Dr. Elijah Williams, and others, of Anne Arundel county.

LAUREL, MD.—Mayor Phelps and others are said to be interested in the construction of a proposed electric railway to connect Laurel and Savage, via the old Washington & Baltimore turnpike.

WASHINGTON, D. C.—J. D. Croissant, Pres. Washington & University R. R. Co., 821 North Carolina Ave., Washington, informs us that surveys have been made and most of the right of way obtained for this proposed electric railway, from Washington to Glen Echo, via University Heights and University Park, a distance of three miles, with a three-mile extension into Maryland. The capital for construction has not yet all been secured, but 6% bonds will be issued this winter. The charter must be amended by Congress before contracts will be let and work commenced. V. K. Nash, Ch. Engr., Woonsocket, R. I.——Press reports state that the Capital Traction Company is getting together the material preparatory to changing the Love underground system on U St., to the General Electric system, in use on the remainder of its line, next spring. The road for 1⅛ miles will practically have to be rebuilt. It is probable that the underground system will replace the overhead trolley as far as the eastern end of the Cincinnati St. bridge over Rock Creek.

CLEVELAND, O.—Frank De H. Robinson is said to contemplate the construction of a complete new system of street railways in and about Cleveland.

CONNEAUT, O.—We are informed that surveys are about completed and most of the right of way obtained for the proposed electric railway of the Pennsylavia & Ohio Ry. Co. from Painesville to Conneaut, O., a distance of 42 miles. The capital for construction has not yet all been secured, but contracts will probably be let before Jan. 1. The engineering work is being done by the Osborn Co., Osborn Bldg., Cleveland.

DAYTON, O.—Reports state that work began on the construction of the proposed Dayton, Springfield & Urbana Electric Ry. Sept. 19, at Dayton; estimated cost, $600,000. Engr., W. G. Moler.

SOUTH BEND, IND.—The council of Mishawaka granted a franchise to the South Bend & Elkhart Electric Ry. Co. Sept. 19, which proposes to construct an electric line from South Bend to Goshen, via Mishawaka, Elkhart and Osceola, 13 miles. Reports state that Messrs. Delworth and Kennedy, owners of this new system, have bought the Indiana Electric Co.'s lines in Elkhart and connecting Elkhart and Goshen. Other extensions are also contemplated.

ALTON, ILL.—J. F. Porter, Pres. Alton Ry. & Illuminating Co., Alton, informs us that this company proposes to build from Alton to East Alton, through 6th St. and the cemetery, a distance of 5 miles. Contracts will be let early in next year for rails, ties, bonds, macadam, five cars with single trucks, three cars with double trucks, and one 100-K-W. power generator. All steam machinery is now in place.

CHICAGO, ILL.—It is announced that the Northwestern Elevated R. R. Co. will resume work soon to finish its uncompleted system. The Columbia Construction Co. erected over four miles of the structure in 1896, when work had to be suspended for want of sufficient capital.

EDWARDSVILLE, ILL.—H. Renecke, Clk. of Madison county, of Edwardsville, informs us that the Mississippi Valley Ry. Co. has secured the right of way from the county, and most of the towns along the route, and that surveys are now in progress. One route is from St. Louis to Edwardsville and thence to Alton, via East St. Louis, Collinsville and Glen Carbon; another from St. Louis to Alton, via East St. Louis, Brooklyn, Venice, Madison, Granite City, Oldenburgh, East Alton and Upper Alton, a distance of about 60 miles. Contracts will probably be let next February. Pres., Chas. E. Carroll: Vice-Pres., John A. Mehling: Secy. and Treas., August Holthaus, 1449 North 6th St., St. Louis, Mo.

ST. LOUIS, MO.—The Electric Connecting Ry. Co., of St. Louis, has been incorporated with a capital stock of $2,000 by John H. Bobring, M. T. Chestnut and Jas. D. Houseman, Jr.

PORT ANGELES, WASH.—E. W. Chillis, Erie, Pa.; John Cain and Geo. H. Clementson, of Port Angeles, are said to have applied to the council Sept. 15 for a franchise to construct a street railway through this place.

BINGHAM, UTAH.—The Highland Boy Mining Co. expects to build 12,700 ft. of tramway between the mine and the yards of the Rio Grande Western at Bingham. Mgr., Thomas Weir.

MONTREAL, QUE.—F. L. Wanklyn, Mgr. and Ch. Engr. Montreal St. Ry. Co., of Montreal, informs us that this company has commenced the construction of an extension of its line as far as Pine Ave. A further extension to the city limits near the top of Côte des Neiges Hill is under consideration.

PETERSBORO, ONT.—Reports state that the Petersboro & Ashburnham St. Ry. has been sold to Arthur Stevenson, and that some improvements will probably be made.

ST. CATHERINES, ONT.—Press reports state that Haines Bros., of New York, has bought the Niagara Central Ry., and that they will equip it with electricity and establish a new service between St. Catherines and Niagara Falls. The roadbed will be changed and several trestles abandoned.

ELECTRIC LIGHT AND POWER

LANCASTER, N. H.—We are informed that the plant of the Lancaster & Jefferson Electric Co., recently incorporated, is nearly completed.

SOMERVILLE, MASS.—The question of a municipal plant is again being considered. Alderman Lamont may be addressed.

PROVIDENCE, R. I.—The Narragansett Electric Lighting Co. has been awarded the contract for laying conduits for its wires to the American Vitrified Conduit Co., New York, N. Y. The contract will call for the laying of conduits in about 20 miles of streets, in which will be placed about 175 miles of ducts. The cost of laying the conduits will be about $250,000 and that of furnishing and drawing the wires about $250,000.

MYSTIC, CONN.—The Hyer-Sheehan Electric Motor Co., Newburg, N. Y., is reported to have been awarded the contract for furnishing and installing the machinery for the proposed plant for the Mystic Electric & Gas Light Co., at about $25,000. Engr., Thos. C. Perkins, Hartford, Conn.

AKRON, N. Y.—At a recent meeting of the board of trustees it was resolved to call an election for Oct. 10 to vote on the question of an appropriation of $3,000 to install an electric light plant.

CAZENOVIA, N. Y.—Jno. O'Connell, Marathon, N. Y., writes us that the Fairchild Mill property has been leased for a term of years. The installation of a plant with a capacity of 300 16-c. p. lights is about to commence. The contract for the equipment, to cost about $7,000, has been made.

CHARLOTTE, N. Y.—Bids are asked until October 15 for constructing a plant and water-works, as described in our advertising columns. Consult. Elec. Engr., C. O. Mailloux, 150 Nassau St., New York; Pres. Bd., Jno. M. Allen.

HERKIMER, N. Y.—An election will be held Oct. 10 to vote on the question of issuing $13,000 in bonds for a municipal plant, according to reports.

HUDSON, N. Y.—Press reports state that Charles J. Cooper, Brooklyn, N. Y., who recently purchased the Hudson Street Ry., has closed negotiations by which he also becomes sole owner of the plant and franchise of the Hudson Electric Light & Power Co. The consideration is $150,000.

LOWVILLE, N. Y.—The Wetmore Electric Co. is reported to have awarded the contract for a 230-HP. dynamo to the Westinghouse Electric & Mfg. Co., Pittsburg, and that for a 27-in. McCormick water-wheel to the S. Morgan Smith Co., York, Pa. If the demand for electricity warrants it, three dynamos and three wheels will be placed at the Beaver River Falls. The distributing station will be located on the farm of W. L. Babcock, east of the corporation limits of Lowville.

PATCHOGUE, L. I., N. Y.—Press reports state that the Patchogue Electric Light Co. is about to extend its lines from Patchogue through Blue Point, Bayport and Sayville. To meet the expense of the extension the capital stock of the company will be increased from $20,000 to $30,000. The company will also erect a new brick plant at the bank of the Patchogue River and add a 1,000 HP. dynamo and other improvements. Pres., J. S. Havens.

ROCHESTER, N. Y.—Bids are asked until Oct. 3 for electric lighting of the Free Academy building for one year from Nov. 1. Chn. Com., J. F. White, Bd. of Education.

UTICA, N. Y.—Johnson & Morton, 26 Catherine St., Utica, have been awarded the contract for placing a plant in the Broad St. works of the Savage Arms Co.

WATERTOWN, N. Y.—A report states that the aldermen are considering the question of a municipal plant or of renewing the contract with the Watertown Electric Light Co., with a provision that the city have the right to purchase the plant. It is probable that the contract will be renewed. Cy. Engr., C. O. McComb.

WHITESBORO, N. Y.—The council is considering propositions for street lighting from the Utica Electric Light Co. and the Welsbach Lighting Co. of America.

CAMDEN, N. J.—The lighting committee has directed City Clerk Kramer to communicate with cities owning their plants with a view to securing information for a municipal plant for this city.

AVOCA, PA.—The new owners of the Standard Electric Light, Heat & Power Co., it is stated, will improve the plant. Pres., W. H. Hollister, Avoca; Secy. and Treas., J. B. Russell.

BRADFORD, PA.—Benj. W. Brundred and Stanley W. Loomis, Oil City, Pa., have applied for a franchise for a plant. Action will not be taken for some time. Cy. Clk., Jas. A. Lindsey.

DARBY, PA.—J. F. Willy, Clk., writes us that the plans for the proposed plant are still under consideration by the council.

LEBANON, PA.—The contract with the Edison Electric Illuminating Co., of Lebanon, for arc lights, will terminate on June 1, 1899, and the city is about to take steps looking to obtaining bids for 125 arc lights, for a period of from five to ten years. William D. Zehnder, Lebanon, should be addressed. Cy. Engr., George W. Hayes.

MOUNT JOY, PA.—T. E. Bailey & Co., for the Manheim Electric Light, Heat & Power Co., have secured the franchise for lighting this place.

BALTIMORE, MD.—Bids are asked until Oct. 8 for furnishing and installing a plant for the new courthouse in this city. Archs., Wyatt & Nolting, 4 East Lexington St., Baltimore; Chn. Courthouse Com., Felix Angus.

RICHMOND, VA.—It is stated that T. C. Thompson, Supt. Fire Alarm Service, is investigating the cost, etc., of a plant for the almshouse.

GREENSBORO, N. C.—The Industrial & Immigration Association has voted to urge the council to arrange at once for a new contract for electric lighting of the city from Jan. 1, 1899, by asking for bids, and also for granting a franchise for a street railway.

DALTON, GA.—We are informed that at the election Nov. 2 this place will vote on the question of issuing $30,000 in 30-year 6% bonds for a plant and a sewerage system. Engr., J. L. Ludlow, Winslow, N. C.; Mayor, W. H. Pruden.

CRESCENT CITY, FLA.—C. H. Cash and W. J. Pierpont have applied for franchises for lighting plants.

FLORENCE, ALA.—It is stated that the Florence Milling Co. proposes to put in an electric plant at its mill.

PENSACOLA, FLA.—The bureau of yards and docks, U. S. N., Washington, D. C., received but one bid, that from the McCay Engineering Co., Baltimore, Md., at $12,886, for furnishing and installing a plant at the nevy yard. The bid is in excess of the appropriation of $10,000.

COVINGTON, KY.—Alderman Schlosser has introduced an ordinance creating a fund for the erection of a city plant to cost about $42,000.

FERDINAND, IND.—It is reported that this place is to have a plant.

THORNTOWN, IND.—The question of building a plant and water-works is being considered.

DECATUR, MICH.—The following bids were received Sept. 6 for building a plant, the bids for the poles and wire being given under Contract Prices; Engr., Geo. S. Pierson, Kalamazoo, Mich.: (1) being for power station building: (2) for boilers; (3) for engine; dynamos—(4) for two 30 K-W.: (5) for one 30 K-W.: (6) for 50 K-W.: (7) for 23 arc lamps: Carney & Hartsell, Decatur, (1) $985, (2) $325 setting only: (4) $35 setting only: Daniel Carney, Sr., (1) $950, (2) $315 setting only. (4) $35 setting only: Westinghouse Electric & Mfg. Co., Pittsburg, (2) $1,585: (3) $963; (4) $1,675; (5) $875; (6) $1,090; (7) $525: Fort Wayne Electric Corporation, (2) $1,522: (3) $1,116; (4) $1,450; (6) $1,275; (7) $440: General Electric Co., Schenectady, N. Y., (4) $1,677; (5) $869; (6) $1,061, 45 K-W.; (8) $438: Ridgway Dynamo & Engine Co., Ridgway, Pa., (3) $1,025; (6) $1,178; Thos. Muir & Son, agent, 31 Larned St., W., Detroit (Card Electric Co., Mansfield, O.,) (4) $1,186; (5 and 6) $1,438 together; (7) $470; add $265 for installation of generators and switchboards, price for wire, f. o. b., Decatur, 14½ cts. a lb.; (Sprague Electric Co.). (4) $1,320, 33 K-W.; (5 and 6) $1,485, one 33 K-W. and one 48 K-W.; (Warren Electric Mfg. Co., Sandusky, O.,) (5) $670; (6) $795, 45 K-W., and $996, 60 K-W: New York Safety Steam Power Co., 30 Cortlandt St., New York, (2) $1,500; (3) $1,000; Wray-Austin Machinery Co., Detroit, (3) $1,035 and $1,215; Pearl & Mills, agents, Benton Harbor, Mich., (Fort Wayne Electric Corporation) (4, 5 and 6) $4,750, $4,100 and $4,400 respectively, lump bids including 1, 2, 3 and 7; also same with following bids: (Westinghouse Electric Mfg. Co.,) (5) $4,100, (6) $4,450; (General Electric Co.,)

(4) $5,250; (5) $4,450; (6) $4,650; (Western Electric Co.,) (4) $5,150; (5) $4,350; (6) $4,650; add $150 for direct-connected dynamo; add $250 for special boiler. It is stated that the contracts were let to J. W. Pearl and Geo.. Mills, Benton Harbor, at about $7,000.

GRAND RAPIDS, MICH.—The Chase Construction Co., Detroit, has been awarded the contract for furnishing the materials and for building the proposed city plant at $89,-970. The bids will probably be given next week. Engrs., Nagle & Ball, Chicago, Ill.

MOUNT PLEASANT, MICH.—Chas. M. Brooks, mayor, writes us that this place voted Sept. 21 against issuing bonds for a plant and water-works.

LITCHFIELD, ILL.—Bids are asked until Oct. 22 for furnishing electric lights, and for constructing a plant. Cy. Clk., O. D. W. Gooch.

UPPER ALTON, ILL.—The Alton Ry. & Illuminating Co has been awarded a 5-year electric lighting contract, according to reports.

EAU CLAIRE, WIS.—The committee has recommended that the council grant a franchise for an electric lighting plant to David Douglas. Chn. Com., F. Gregoire.

ADA, MINN.—Fred. Hampson, it is stated, proposes to put in a plant.

WICHITA, KAN.—Councilman W. H. Herbig writes us that bids will probably be received within 30 days for the proposed plant for H. B. Church & Co. Mr. Church was in Chicago Sept. 19 negotiating for the construction of the plant in connection with the building of a street line. The plant will have a capacity for furnishing 175 2,000-c. p. arc lights; the number of incandescent lights is not known.

WAHOO, NEB.—S. H. Jones, owner of the electric plant, writes us that he is repairing the burned portion of the plant. In the near future a new engine and dynamo will be put in.

ANACONDA, MONT.—It is stated that arrangements are being made for completing the Big Hole power plant of the Montana Power Co. Work was suspended June 1 by a heavy rise of water which threatened the new structure. The dam is 500 feet wide, and is to supply electric power for Butte and vicinity. Col. T. C. Marshall, Missoula, Mont., may be addressed.

CASSVILLE, MO.—The question of building a plant and water-works is being considered, according to reports. Mayor, Harrison Horine.

ST. LOUIS, MO.—The St. Louis Automatic Refrigerating Co. has applied for permission to build a power plant on the wharf at Dickson St. Pres., Jas. E. Baker.

SAN ANGELO, TEX.—The San Angelo Water-Works Co. has filed an amendment to its charter for the purpose of supplying light, heat and power.

SHERMAN, TEX.—Jno. E. Kern, County Surv.. writes us that the contract for building the plant has been let.

GALLUP, N.MEX.—It is stated that this city wants to put in a municipal plant. The citizens object to the private ownership of the plant.

BREMERTON, WASH.—Bids are asked until Oct. 15 for installing a plant at the U. S. naval station, Puget Sound, Bremerton, Wash., for which $9,800 is appropriated. M. T. Endicott, Ch. Bureau Yards and Docks, Navy Dept., Washington, D. C.

LAKE VIEW, CAL.—C. G. Baldwin, of Claremont, Cal., has filed on 125 inches of water flowing into Mill Creek near its source, with which to generate electricity to be used at Lake View, Perris, Menifee, Elsinore and neighboring towns.

REDWOOD CITY, CAL.—The question of building an incandescent plant in connection with the city arc light plant is being considered by the board of trustees.

SANTA BARBARA, CAL.—At the request of Mayor Burke a committee has been appointed to investigate the question of building a plant to cost about $12,000.

BROCKVILLE, ONT.—The "Times" is urging the town to consider the question of securing electric power from Jones Falls, near Smith's Falls, a distance of about 30 miles.

ORILLA, ONT.—John Kennedy, Ch. Engr.,Harbor Comrs., Montreal, Que., is stated to have submitted a report in favor of securing electric power from a waterfall several miles from this place.

SANTIAGO, CUBA.—Press reports state that private parties are negotiating for the construction of a plant.

RATHMINES, IRELAND.—Bids are asked until Oct. 5 for furnishing a plant for this city. Engr., Robt. Hammond, 64 Victoria St., London, S. W.; Secy. Comrs., F. P. Fawcett.

NEW COMPANIES.—Empire Heating & Lighting Co., St. Louis, Mo., $5,000; S. L. Cohen, J. S. Costella, J. C. Robertson.

BRIDGES.

CAMBRIDGE, MASS.—Bids are asked until 12 m., Oct. 1 for constructing a temporary pile bridge over the Charles River, near the West Boston bridge. Josiah Quincy, Chn. Comn.

HARTFORD, CONN.—Geo. Nevero, Clk., informs us that no action other than to apply to the railroad commissioners for plans for a bridge over the tracks at Broad St., has been taken.

LIVINGSTON MANOR, N. Y.—The question of issuing $5,000 of bridge and road bonds will be submitted to a special election.

NIAGARA FALLS, N. Y.—The council is considering the question of overhead bridges at the railroad crossings on Main, Sixth and Pine Sts.

PITTSFORD, N. Y.—Geo. A. Gass, Supt. and Secy. Erie Canal Co., Pittsford, writes us that plans are being prepared for a bridge 80 ft. long and 66 ft. wide, on stone abutments; estimated cost. $18,000. Bids will be asked in October by Geo. W. Aldridge, Supt. Pub. Wks., Albany.

PERTH AMBOY, N. J.—The board of freeholders will begin preparations for a bridge across Woodbridge Creek, at Railroad Ave., at the next meeting.

LANDENBURG, PA.—The Schuylkill Bridge Wks., Phoenixville, Pa., has been awarded a contract for the construction of an iron bridge over White Clay Creek.

WILMINGTON, DEL.—The Edge Moor Bridge Works has been awarded contracts for bridge work as follows: Three bridges, to be built on the Cleveland & Pittsburg division of the Pennsylvania R. R.; two viaducts, to be built on the Lehigh Valley R. R.; one bridge, to be built on the Central R. R. of New Jersey, and two bridges, to be built on the Pennsylvania subway of the Pennsylvania R. R., according to reports.

NEWPORT NEWS, VA.—The Structural Iron Co., Baltimore, has submitted the lowest bid for constructing bridges at 25th and 34th Sts. and Chesapeake & Ohio R. R.; appropriation, $40,000.

CONCORD, N. C.—Bids are asked by the county commissioners for constructing a new bridge at Black's Mills.

ATLANTA, GA.—Reports state that the Atlanta & West Point R. R. Co. will construct five bridges and a tunnel. George C. Smith, Pres.

HAZLEHURST, MISS.—Bids are asked until Oct. 3 for the construction of two iron bridges, one at Rockport and at Georgetown, Miss., over the Pearl River; estimated cost, $15,000. J. D. Dampeer, Clk. County Supervisors.

CONCORD, TENN.—It is reported that Neely & Smith, Chattanooga, have been awarded a contract to construct several masonry culverts, on the Southern R. R., between Knoxville and Chattanooga.

CALIFORNIA, O.—The water-works commissioners, Cincinnati, have received the lowest bid from the Pittsburg Bridge Co., at $22,600, for the superstructure, and J. Delaney, at $4,850, for the masonry, for a bridge to be built at the water-works pumping station. The bids have been rejected.

CHILLICOTHE, O.—The contract for the superstructure of the bridge over Deer Creek has been awarded to the Iron Superstructure Co., Columbus, O. H. S. Adams, County Audr.

CINCINNATI, O.—Bids are asked until Oct. 26 for the purchase of $99,000 of 4% bridge bonds. Henry Korb, Pres. County Comrs.

CINCINNATI, O.—The county commissioners have awarded a contract for the erection of a bridge over Mill Creek, on Riddle Road, to the Brackett Bridge Co., Cincinnati.

CINCINNATI, O.—Bids are asked until Oct. 22 for furnishing plans and material and constructing a wrought-iron truss bridge, in Sycamore township. E. L. Lewis, County Audr.

LORAIN, O.—L. A. Fauver informs us that $175,000 in bonds have been sold for the construction of a draw bridge across the Black River at Erie Ave., to have a 120-ft. clear opening. The Osborn Engineering Co., Cleveland, O., is preparing plans. Address the county commissioners, Elyria, O.

PONTIAC, ILL.—Bids are asked until 12 m., Oct. 5, for constructing a bridge about 150 ft. long over the Vermillion River, as stated in our advertising columns. F. W. Winkler, Cy. Atty.

ELKHORN, NEB.—The Canton Bridge Co., Canton, O., has been awarded a contract, at $4,600, for constructing a county bridge over the Elkhorn River.

OMAHA, NEB.—Andrew Rosewater, Cy. Engr., writes us in regard to the proposed viaducts ordered by the city council to be built, as noted in Engineering News, that under the provisions of the Omaha city charter, requiring railway companies to construct viaducts required by public travel over their line of railway, the Engineering Department of the city is required to make plans and specifications for such work, and after such plans and specifications are approved by the mayor and city council, the railway companies will be officially notified to proceed with the construction of the same. The viaducts will be paid for by the railway companies and constructed by them. They will, doubtless, under joint arrangement, solicit bids for such construction. The city has nothing to do with receiving bids for this work, unless the companies shall refuse to proceed with such construction. In the latter event, the city will advertise and give due notice to all parties who contemplate submitting proposals, and furnish plans and specifications therefor. The viaduct now under consideration is known as the 16th St. Viaduct; is about 1,600 ft. in length, including approaches, and will range from 20 to 40 ft. above the streets and railway tracks. Plans and specifications will probably be submitted to the mayor and city council about Oct. 1, and after being approved, the railway companies will be officially notified to proceed with construction.

NEOSHO FALLS, KAN.—The Canton Bridge Co., Canton, O., has been awarded a $2,100 contract to construct a county bridge at this place.

NEWTON, KAN.—D. W. Wilcox, Mayor, informs us that the subway and viaduct crossings talked of in this city will be erected by the Atchison, Topeka & Santa Fe Ry. Co. The city has nothing to do with the matter, except to grant the privilege.

ST. JOSEPH, MO.—A contract has been awarded to Chas. W. Campbell for the Sixth St. viaduct.——The ordinance for the construction of the Grand Ave. viaduct by the Chicago Great Western Ry. Co. will be decided upon Oct. 5.

DENVER, COLO.—Petitions have been presented to the board of public works for the erection of a part of the old 14th St. viaduct, across Cherry Creek, on Stout St.

CHEHALIS, WASH.—Reports state that the contract for the construction of a bridge over Lincoln Creek has been given to the San Francisco Bridge Co., San Francisco, Cal.

MONTESANO, WASH.—The Columbia Bridge Co., Portland, Ore., has been awarded a contract to construct a steel bridge over the South Bay, according to reports.

ALBANY, ORE.—Bids are asked until 2 p. m., Sept. 29, for a bridge over the north fork of the Santiam River. Frank Crabtree, County Clk.

HEPPNER, ORE.—Bids are asked until Oct. 1 for a bridge over Rock Creek. A. G. Bartholemew, County Judge.

ISLAND CITY, ORE.—The Bullen Bridge Co., Portland, Ore., has been awarded a contract by the county commissioners, at $3,200, for a bridge over the Grande Ronde River.

OROVILLE, CAL.—Bids are asked until Oct. 3 for constructing a new approach to the bridge across the Feather River. H. D. Lansen, County Clk.

REDDING, CAL.—The county supervisors have awarded a contract to the Thompson Bridge Co.. at $6 280, for a bridge across the north fork of Cottonwood Creek.

DELHI, ONT.—Bell & McCubbin, Engrs., St. Thomas, Ont., are preparing plans for a steel bridge 66 ft. long, to be constructed at this place, according to reports.

QUEBEC, QUE.—Bids are asked until Jan. 2 for construction a railway and highway bridge across the St. Lawrence River, as stated in our advertising columns. Ulric Barthe, Secy. Quebec Bridge Co., Quebec.

KEW, LONDON, ENGLAND.—Bids are asked until Oct. 3 for removing the old bridge and constructing a new masonry bridge, repairing approaches, etc., over the Thames River; also for constructing and removing a temporary bridge, according to reports. John W. Barry and C. A. Brereton, Engrs., 21 Delahay St., Westminster.

BUILDINGS.

BATH, ME.—J. T. Crosby, Pastor of Wesley M. E. Church, 33 Union St., Bath, informs us that William Hartwell, of Bath, has the contract for erecting a new church building, to cost between $10,000 and $13,000, and that S. H. Rogers is now completing the foundation for the same. All contracts have been let except those for the pews, the glass and for frescoing. Arch., W. R. Miller, Lewiston, Me.

ST. ALBANS, VT.—The following bids were received by the supervising architect, Washington, D. C., Sept. 19, for a low pressure, return circulation steam heating apparatus in the U. S. building in this city:

		Time.
Gaylord & Eitapence, Binghamton, N. Y.	$5,173	*75 days
Edward P. Bates, Albany, N. Y.	4,373	90 "
John F. Dalton, Savannah, Ga.	3,738	90 "
Huey Bros., Boston, Mass.	4,000	65 "
Richardson & Burgess, Washington	4,967	May 1, '99
G. S. Blodgett Co., Burlington, Vt.	4,994	

---

*Working days.

WATERBURY, CONN.—Plans are about completed, according to reports, for a new 12-room brick school building, to cost $40,000. Arch., Theodore B. Peck.

BROOKLYN, N. Y.—Bids are asked by the department of public buildings, at 346 Broadway, New York, until Oct. 11, for materials and work required for certain repairs and alterations to the municipal building of the Borough of Brooklyn, city of New York.——Bids are asked by the board of education, at 585 Broadway, New York, until Oct. 10, for erecting a frame extension to Erasmus high school building, in the Borough of Brooklyn.

ST. PETER, MINN.—Bids are asked until Oct. 24 for a heating plant for the court house. Charles Hensel, County Audr.

ELDORADO, KAN.—It is reported that the Atchison, Topeka & Santa Fe Ry. Co. will erect a new $60,000 stone station in this city.

HELENA, MONT.—The following bids were received, Sept. 14, for erecting the new state capitol building in Helena: Montana Building Co., Butte, Mont., $289,891; C. E. H. Campbell, Council Bluffs, Ia., $293,216; Texas Construction Co., Galveston, Tex., $321,370 and $359,865, the difference being in the quality of the fireproofing; G. W. Atkinson & Son, Colorado Springs, Colo., $329,500; D. B. Fotheringham, Spokane, Wash., $342,000; Butler & Ryan, St. Paul, Minn., sandstone, $377,000; granite, $462,000; W. J. Spear, Toledo, O., $404,598; William Goldie & Son, Chicago, Ill., $399,423. As stated in our last issue, the contract was awarded to the Montana Building Co., Jacob Soss, Gen. Mgr., to be completed within 20 months.

SAN SABA, TEX.—Bids are asked until Nov. 15 for constructing two cells about 7×10 ft., with corridor; bond, $500. John Seiders, County Judge.

FORT LOGAN, COLO.—Bids are asked until Oct. 5 for a hot water heating apparatus for the hospital at Fort Logan. Lt.-Col. E. B. Atwood, U. S. Army, Denver, Colo.

STOCKTON, CAL.—Plans are being prepared, according to reports, for a new hotel and bath building, at Jackson's baths, south of Stockton, to cost about $20,000. Archs., Downing & Lemme, Yosemite Bldg., of Stockton.

VENTURA, CAL.—H. A. Giddings has secured the contract for the erection of a bank building in Ventura, to cost about $40,000.

CHARLOTTETOWN, P. E. I.—McDonald & Schurman are reported to have received the contract for erecting the new building for the Prince of Wales College and Normal School, to cost about $35,000. Arch., C. B. Chappell.

ST. GREGOIRE, QUE.—This city has decided to borrow $50,000, in order to erect a new school building.

SARNIA, ONT.—Geo. I. Proctor, of Sarnia, has been awarded the contract for erecting a brick roundhouse here for the Grand Trunk Ry., to cost about $60,000.

LONDON, ONT.—Bids are asked by the department of public works of Ontario, until Oct. 5, for erecting a normal school building at London.

SOPHIA, BULGARIA.—Bids are asked by the Bulgarian government, until Nov. 21, according to reports, for the erection of eight public offices, as follows: A ministry of public works, ways and communications; a ministry of commerce and agriculture; a ministry of the interior; a ministry of public instruction; a ministry for foreign affairs and public worship; a ministry of justice, and an audit office. Particulars can be obtained from the Commercial Department of the Foreign Office.

WATER-WORKS.

BERWICK, ME.—The question of securing a water supply from the works at Somersworth, N. H., is being considered by the citizens of this place. Wm. S. Mathews and Wm. H. Rich are on the committee.

WARREN, ME.—A company is reported to have been organized to build works for this place. Population (1890), 2,097. Pres., Benj. Burton; Treas., W. F. Wight.

WESTON, MASS.—The question of securing an increased water supply is being considered. Water at present is furnished by the Weston Water Co.

BRANFORD, CONN.—The Branford Electric Co. has awarded the contract for building works to M. P. Rice, of Guilford, Conn. Engrs., Nichols & Potter, New Haven,

RIDGEFIELD, CONN.—Local papers state that arrangements are being made by the Ridgefield Water Co. to begin work at once on the proposed works. Population, 1,000; in summer, 2,200.

ALBANY, N. Y.—The following bids were received by the water board Sept. 20 for improving Bleecher reservoir, as advertised in Engineering News: E. N. Haines & Co., Rhinebeck, N. Y. (awarded contract), $28,456; J. Dunfee & Co., Syracuse, $28,644; John Doyle, Albany, $29,677; Frank Pidgeon, Saugerties, $30,438; Dollard & Holler, Albany, $30,926; M. J. Dady, Brooklyn, $32,874; R. B. Lewis, Herkimer, $34,393. Engr.-in-Charge, David R. Lee.

CHARLOTTE, N. Y.—Bids are asked until Oct. 15 for constructing a system of water-works and an electric light plant for this village, as stated in our advertising columns. John M. Allen, Pres. Municipal Bd.

FISHKILL, N. Y.—The question of building works is again being considered.

NIAGARA FALLS, N. Y.—H. A. Keller, Supt. water-works, writes us that the board of public works has directed the city engineer and the superintendent to secure cost of a 10,000,000-gallon filter plant. No report has yet been submitted. The question will have to be voted upon by the citizens.

SONYEA, N. Y.—Bids are asked until Oct. 1 for furnishing the materials and for extending the water mains at the Epileptic State Hospital to the new buildings on the east side of Kisbaqua Creek. There will be required about 4,300 ft. of 4, 8 and 10-in. pipe, 13 valves, 4 hydrants, etc. Supt., Dr. Wm. P. Spratling, Sonyea; Secy., H. E. Brown.

WINDSOR, N. Y.—T. V. Furman, Pres., writes us that it is proposed to buy the works now in use and to put in a new system. Sources of supply are being investigated and it is likely that work will be begun in the spring. The village board will no doubt let the work by contract. Not more than $20,000 in bonds will be issued. Population, 800.

MILTON, DEL.—It is stated that a company will be organized to build works for this place.

PHILADELPHIA, PA.—Bids are asked until Oct. 4 for building boilers, brick chimneys and annex to boiler house for the Roxboro pumping station, and excavating pipe trench and furnishing lead for joints for the Queen Lane pumping main No. 2. Dir. Pub. Wks., Thos. M. Thompson.

WYTHEVILLE, VA.—Bids are asked until Oct. 17 for furnishing and laying 6,155 ft. of 6-in. cast-iron water pipe, 3,591 lbs. of pig lead, 100 lbs. of jute packing, etc. Chn. Com., J. E. Perkins; Financial Agent, W. L. Stanley.

WEST TAMPA, FLA.—The board of trustees have engaged J. N. Hazlehurst, Ch. Engr. Bd. Pub. Wks., Tampa, Fla., to prepare plans for works to cost $30,000. Bonds for the work have been sold. Bids will probably be asked about Nov. 15.

ELBERTON, GA.—The citizens are reported to have voted against granting a franchise for works to Geo. J. Baldwin, of Savannah. The people, however, want to have works, but prefer municipal ownership. Clk., W. B. Henry.

LAKE PROVIDENCE, LA.—R. L. Hill writes us that no decision has yet been made with regard to plans and specifications for city works. Everything awaits the voting of bonds and a special tax in November. No engineer has yet been employed.

HENDERSON, KY.—The Edward P. Allis Co., Milwaukee, Wis., is reported to have been awarded the contract for furnishing a 3,000,000-gallon pump at $12,000.

CINCINNATI, O.—The David Folz Asphalt Paving Co., Cincinnati, has been awarded the contract for the masonry work for the California pumping station at $110,000.

COLUMBUS, O.—Bids are asked until Oct. 3 for furnishing the materials and for constructing a concrete masonry dam for this city. The itemized bids, received Sept. 10, but rejected, were given in our issue of last week. Dir. Pub. Wks., F. A. Jacobs; Clk., Jas. A. Fanning.

GALLIPOLIS, O.—Bids are asked until Oct. 24 for furnishing the materials and for constructing works for the hospital. Archs., Yost & Packard, Columbus; Secy. Bd. of Mgrs. Ohio State Hospital, H. C. Rutter.

JACKSON, O.—This place voted Sept. 19 to issue bonds for works.

McCONNELLSVILLE, O.—This place voted Sept. 19 to issue $20,000 in bonds for works. Cy. Clk., Geo. Birch.

SPRINGFIELD, O.—The superintendent has submitted estimates for about 3,000 ft. of water pipe.

LEWISVILLE, IND.—The question of building works is being considered, according to reports.

LOWELL, IND.—The Lowell Water-Works Co. has been incorporated by John P. Dales, S. M. Bartlett and C. M. Seckner; capital stock, $1,500.

NEW ALBANY, IND.—We are informed that the Home Crystal Water Co. has been granted a 25-year franchise. Work will be started within 60 days from the passage of the ordinance. The company will get $50 per hydrant for 200 hydrants. About 25 miles of 6 to 20-in. pipe will be laid, and two compound 3,000,000-gallon pumps will be put in. Engr., Frank Shefold, New Albany; Pres., Peter Arlund, Copenhagen, Denmark.

THORNTOWN, IND.—The question of building works at once is again being considered.

LAKE ODESSA, MICH.—Bids were asked until Sept. 27 for building the proposed works, to cost $10,000. Pres., Wilson Elliott; Clk., Wm. Goldring.

MOUNT PLEASANT, MICH.—We are informed that this place voted Sept. 21 against issuing bonds for works and a light plant. Mayor, C. M. Brooks; Clk., W. L. Davis.

WAYNE, MICH.—The question of issuing $20,000 in bonds for works is again being considered.

MILLEDGEVILLE, ILL.—Bids are asked until Oct. 7 for furnishing and laying 3,500 ft. of 6 and 8-in. pipe, 7,000 ft. of 4-in. spiral riveted pipe, about 25 double discharge fire hydrants, etc. Clk., S. A. Smith; Pres., J. F. Greenawalt.

MONMOUTH, ILL.—The question of changing the location of the pumping station is reported as being considered. Engr., D. W. Mead, Room 502, Wm. Brown Bldg., Rockford, Ill.; Chn. Com., Councilman Turnbull.

NEKOOSA, WIS.—Thos. E. Nash writes us that this village contemplates putting in works and wishes to hear from contractors. Address the president of the village board.

OSAGE, IA.—Bids are asked until Oct. 6 for furnishing the materials and for constructing works, as stated in our advertising columns. Consult. Engr., G. H. Merridith, Cedar Rapids; Chn. Water Com., J. P. Williams.

WINONA, MINN.—C. E. Kunie, Water Comr., writes us that the city will lay 33 blocks of 6 to 16-in. cast-iron water pipe, set 29 Mathews' hydrants and 10 valves, this fall.

DES MOINES, IA.—The council has directed the Des Moines Water Co. to build new mains in 10 streets.

CASSVILLE, MO.—The question of building works and a light plant is being considered, according to reports. Mayor, Harrison Horine.

SALINA, KAN.—The new work for the plant at this place will consist of the addition of a 10- 16- 12- 18-in. duplex compound non-condensing engine, two new boilers, nine new deep wells, giving a water supply three times the present supply, with means of doubling again when necessary; some new pipe lines and some additions to pumping station. The duplex pump being for a relay is not made condensing. Most of the material is already contracted. The rest will probably be contracted for at once. Engr., G. W. Parsons, 611 Baltimore Ave., Kansas City, Mo.

WYNNE, ARK.—It is stated that the city will issue bonds at once for the proposed works and electric light plant. Chn. Com., Wm. M. Kennedy.

PALESTINE, TEX.—The Palestine Water-Works Co. has been incorporated, with a capital stock of $100,000, by G. K. Cook, W. B. Johnson and G. W. Harris. This company will probably take charge of the old works of the Palestine Water Co.

BRECKENRIDGE, COLO.—D. Mitchell Bros., Denver, Colo., have been awarded the contract for building works, at $21,400.

FLORENCE, COLO.—An election has been called for Oct. 11 to vote on the question of issuing $135,000 in bonds for works. It is proposed to construct two storage reservoirs with a capacity of 95,000,000 gallons. A pipe line, 10½ miles long, will bring the water to Florence from the mountain south of the town. Engr., Hiram Phillips, Oriel Bldg., St. Louis, Mo.

PUEBLO, COLO.—C. P. Allen, Ch. Engr. Denver Union Water Co., Denver, Col., has submitted a report for an increased water supply, to cost about $55,000. T. O. Richards, Supt. Water-Works, has been directed by the trustees to secure prices of materials for the extension.

DAVENPORT, WASH.—It is stated that the council is again considering the question of works.

TACOMA, WASH.—John Holgate, Chn. Fire and Water Comn., writes us that the city has under contemplation plans for both a new source and a better or larger water supply from the present source. Estimated cost, about $200,000.

SAN BERNARDINO, CAL.—The Highland Domestic Water Co. has been incorporated, with a capital stock of $25,000, by C. W. Longmire, C. L. Frazer and G. W. Prescott.

REDLANDS, CAL.—This city is investigating sites for a water supply source for municipal works.

PASADENA, CAL.—W. B. Clapp, Cy. Engr., writes us that the matter of municipal ownership is in the hands of the citizens' committee. It is working for an independent water supply from wells, tunnels, etc., and is not dealing with the present companies. It is proposed to sink test wells at once, and, after plans and estimates are made, submit the bond issue proposition to the voters, which will also include sewer extension, etc. Population, 12,000.

SOMONA, CAL.—An election will be held Oct. 24 to vote on the question of issuing $15,000 in bonds for completing the works. Cy. Clk., Robt. A. Pope.

TEMPE, ARIZ.—The committee has agreed to recommend to the council the granting of a franchise for works to Hoadley & Co. Chn. Com., R. O. Greeves.

VERDUN, QUE.—McConnell & Marion, Montreal, Que., are preparing plans for works and a sewerage system.

STRATHROY, ONT.—R. J. Avery writes us that nothing definite regarding the proposed works has been done as yet. The estimated cost of putting in the works four years ago was $23,000. Population, 3,000. F. J. Craig may be addressed.

XOCHIMILEO, MEXICO, MEX.—Press reports state that this place is to have water-works.

IRRIGATION.

ST. PAUL, MINN.—Bids are asked until Oct. 3 for constructing a ditch in the town of Mounds View. D. M. Sullivan, County Audr.

BEAUMONT, TEX.—A contract has been awarded to E. A. Hayne, by the Jefferson County Irrigation Co., to construct a levee canal nine miles long, from Pine Island bayou.——Geo. W. Fitch has awarded a contract to W. C. Dushine, for constructing a dam across White's bayou, to irrigate about 200 acres for rice cultivation.

JACKSON, CAL.—The Bule Lakes Water Co. is contemplating the construction of a reservoir and ditch system to cost about $400,000, according to reports.

ORANGE, CAL.—At the meeting of the Santa Ana Valley Irrigation Co. to be held Oct. 5, a proposition will be considered to cement the ditches and make other improvements.

SALT LAKE CITY, UTAH.—On Sept. 10 a contract for over a mile of 6-in. double-riveted No. 18 B. W. G. asphalted sheet steel pipe was awarded by A. V. Taylor and associates to S. V. Trent, of Salt Lake City, at 22½ cts. a ft. The pipe will be manufactured by Schaw, Ingram & Batcher, of Sacramento, Cal. It will be used for conveying the water from a spring in Neff's Canon, 10 miles east of Salt Lake City, on to a body of land for fruit-growing. This will be the first instance of water for irrigation in Utah being conveyed for any distance solely through a metal or wooden pipe. W. P. Hardesty, Engr., Salt Lake City.

HEMET, CAL.—The Hemet Water Co. proposes to spend about $20,000 in improving its water system. The flume and ditch will be covered; also a pipe line will be run from the crosscut near Florida to Park Hill, where a reservoir will be built, and large covered filters put in at an elevation of 150 ft. above Hemet, to have a capacity of 500,000 gallons per day. This water will run through an independent pipe line to the Lake Hemet Co. for domestic purposes. The company will also replace their 25 sections of flume, above Florida and Little Lake, the flume to be 36×54 ft. and have a capacity of 4,000 inches. The diversion dam will also be repaired and improved. P. N. Myers, Gen. Mgr.

SEWERAGE.

BOSTON, MASS.—Bids are asked until Sept. 30 for constructing 1,875 ft. of sewers in Savin Hill Ave. Supt. of Sts., Benj. W. Wells.

NEWTON, MASS.—H. D. Woods, Cy. Engr., writes us that plans for sewers for Newton were prepared in 1891. At a recent meeting the aldermen voted to appropriate money for sewers in Upper Falls. The work will be done by the sewer department. The only contracts that may be let will be for brick-cement by the street commission.

NEW HAVEN, CONN.—Bids are asked until Oct. 4 for constructing a sewer in Sherman St. Cy. Engr., C. W. Kelley.

ALBANY, N. Y.—Bids are asked until Oct. 3 for constructing 15 and 10-in. pipe sewer in Clare Ave. Clk. Bd. of Contract, Thos. J. Lanahan.

BUFFALO, N. Y.—The council proposes to build an 8-ft. brick trunk sewer in Emslie and Van Rensselaer Sts., at a cost of about $90,000.

BUFFALO, N. Y.—Bids are asked until Oct. 6 for a 3-ft. 3-in. brick sewer in Hickory St. R. G. Parsons, Secy. Bd.

COHOES, N. Y.—Bids are asked until Oct. 12 for constructing sewers as stated in our advertising columns. Cy. Clk. and Clk. Pub. Improvement Comn., Wm. J. Elliot.

SARATOGA SPRINGS, N. Y.—Bids are asked by the city clerk until Oct. 10 for constructing a sewer, at a cost of $1,000.

SYRACUSE, N. Y.—It is proposed to build a 24 to 15-in. pipe sewer in certain streets at a cost of about $11,000. Cy. Clk., M. Z. Haven.

NEWARK, N. J.—The contract for building sewers in Clinton Ave. has been let to Headley & Christie, at $17,181. Gen. Supt. of Sts, M. F. McLaughlin.

NEW BRUNSWICK, N. J.—It is proposed to construct a sewer in Remsen Ave. Sewer Comr., Chas. W. Kent.

SEA ISLE CITY, N. J.—Arrangements are reported as being made for a sewer to cost about $7,000.

CARLISLE, PA.—The question of building a sewer along the railway track north of Penn St. is being considered. It is probable that plans will be prepared by Chauncey Ives, Ch. Engr. Cumberland Valley R. R. Co., Chambersburg, Pa.

GREENVILLE, PA.—Bids are asked until Oct. 1 for constructing 1½ miles of pipe sewers, according to reports. Borough Secy., H. L. Keck.

SHERADEN, PA.—Bids are asked until Sept. 30 for building 7,100 ft. of 18 and 15-in. pipe sewers, and also for 3,974 cu. yds. of grading in Water St. Borough Engr., Jas. B. Smith, 434 Fourth Ave., Pittsburg.

DALTON, GA.—Plans for a system have been adopted. An election will be held Nov. 2 to vote on the question of issuing $30,000 in 6% 30-year bonds for the system and a light plant. Engr., J. L. Ludlow, Winston, N. C.; Mayor, W. H. Pruden.

PIQUA, O.—Bids will be asked at once by the city clerk for building sewers in the southern portion of the city.

SHELBY, O.—We are informed that the following bids were received Sept. 19 for constructing about six miles of sewers; Engr., J. B. Weddell; Clk., W. F. Sonnanstine: D. R. McArthur, Kenton, O., $21,623; S. S. Eaton, Lafayette, Ind., $28,542; G. P. Jacobs, Chicago Junction, O., $17,126; W. G. Irwin, Greenville, O., $20,260; M. J. Cullan, Sandusky, O., $26,751; Adams Bros., Zaneswill, O., $21,409; C. R. & S. H. DeGroodt, Youngstown, O., $17,142; Ulrick & Co., Springfield, O., $19,878. The work will include: 1,312 ft. of 12-in. pipe; 3,987 ft. of 10-in.; 5,491 ft. of 9-in.; 17,729 ft. of 8-in.; 4,690 ft. of 6-in., and 368 ft. of 10-in. iron pipe; 55 manholes, 63 lampholes and 16 flush tanks. Engineer's estimate, $18,500.

TOLEDO, O.—Jas. McKinney has been awarded the contract for building the sewer in Adams St., at $35,285.

INDIANAPOLIS, IND.—The board of public works proposes to build a main brick sewer in Michigan St. for a distance of 5,155 ft. This sewer will have branches in a number of streets.

BAY CITY, MICH.—Bids are asked by the city clerk until Oct. 3 for constructing a sewer in Raymond Ave.

CHICAGO, ILL.—The board of local improvements has passed ordinances to build 10 miles of sewers and 15 miles of pavements, to cost about $700,000.

GRANITE CITY, ILL.—The councils of this city and Madison, Ill., propose to build a joint system at a cost of $97,000. Councilmen Rosenberg and White, of Granite City, and Grayson and Hinds, of Madison, are on the committee. Julius Pitzmann, of St. Louis, Mo., prepared the plans.

MOLINE, ILL.—The council proposes to build certain sewers and pave in several streets this fall at a cost of about $15,000.

MADISON, WIS.—Bids are asked until Oct. 14 for constructing 21,606 lin. ft. of sewers from 12 to 6-in. and 12 to 3 ft in depth, as stated in our advertising columns. Cy. Engr., McClellan Dodge; Cy. Clk., O. S. Norsman.

CLINTON, IA.—Bids are asked by W. E. Russell, Cy. Clk., for building a sewer in Ash St.

COUNCIL BLUFFS, IA.—It is proposed to construct sewers in certain streets. Cy. Clk., N. C. Phillins.

OSKALOOSA, IA.—D. C. Waggoner, Cy. Clk., writes us that the city will build a system next year. About a mile of intercepting sewer will be built. Cy. Engr., Saml. Ver Ven.

FARGO, N. DAK.—Jos. Kennedy, Fargo, has been awarded the contract for constructing two miles of pipe sewers.

BILLINGS, MONT.—J. R. Hinds & Co., Butte, Mont., have been awarded the contract for building the system at about $15,000. The council will soon be petitioned to make the sewers longer than at present proposed.

BROOKFIELD, MO.—E. E. Ward, Mayor, writes us that the city voted Sept. 13 to put in a system, but voted against issuing the necessary bonds. Another election will soon be held.

KANSAS CITY, MO.—Bids are asked by the city clerk until Oct. 4 for constructing the Vine St. sewer, to cost about $35,000.

GAINESVILLE, TEX.—The New Odorless Sewerage Co. has been incorporated with a capital stock of $50,000 by Jack Steele, M. P. Kelley and W. H. Steele.

GALVESTON, TEX.—The Galveston Sewer Co. has agreed to appoint an arbitrator to consider the question of selling the system to the city. Pres., Isaac Heffron.

SHERMAN, TEX.—J. E. Kern, County Surv., writes us that the city is figuring on putting in a system. Address A. A. Fielder, Mayor.

DENVER, COLO.—The question of making extensions to the system is being considered. David Seerie and H. C. Lowrie, of the Bd. of Pub. Wks., may be addressed.

BLAINE, WASH.—The question of improving the system is being considered. Councilmen Gilday and Glen may be addressed.

RIVERSIDE, CAL.—The citizens have petitioned the city trustees to build new sewers. Supt. of Sts., C. W. Finch.

SANTA ANA, CAL.—Press reports state that the contract for building a second section of the proposed system will be let about Oct. 25.——Frank Heil and J. Damron, Santa Ana, have been awarded the contract for building the first section. The Los Angeles Sewer Pipe Association, Los Angeles, Cal., has the contract for the pipe. The entire system will cost about $65,000. Engr., H. C. Kellogg.

HAMILTON, ONT.—It is proposed to build sewers in two streets at a cost of about $6,200. Councilman Ten Eyck, Chn. Com.

VERDUN, QUE.—McConnell & Marion, Montreal, Que., are preparing plans for a system and water-works, and will superintend the construction.

MEXICO, MEX.—It is stated that the contract for building the system for this city has been let by the sanitation board to Vezin & Letellier, Paris, France. The work is to be completed in four years.

GARBAGE DISPOSAL—STREET CLEANING

BROOKLYN, N. Y.—The board of estimate has appropriated $27,000 for cleaning the sewers.

ATLANTIC CITY, N. J.—Jos. Thompson, Mayor, has vetoed the ordinance awarding the contract for a garbage disposal plant to Thos. K. Dalzell at $29,900, the price being considered excessive.

PHILLIPSBURG, N. J.—B. C. Frost, Mayor, writes us that the construction of a garbage disposal plant for this city is not contemplated.

LANCASTER, PA.—Frank B. Kendig has been awarded the contract, at $1,840, for cleaning the streets from Oct. 1 to April 1, 1899.

WARREN, PA.—Dr. John Curman, Supt. Health, writes us that the trustees have decided on the advice of an expert not to erect a garbage disposal plant.

BALTIMORE, MD.—It is estimated that $506,737 will be required for cleaning the streets the coming year. A number of garbage carts, etc., will probably be purchased. Supt. St. Cleaning, Capt. F. R. Bye.

NEW ORLEANS, LA.—The question of locating garbage disposal plants in different parts of the city is being considered. The present contract for garbage disposal will expire March 1. Councilman Dreyfous may be addressed.

BAY CITY, MICH.—L. E. Ruggles, M. D., Health Officer, writes us that there is a committee from the council to act with the board of health in regard to adopting a plan of garbage disposal. The disposal will probably be by cremation, but nothing definite has been done.

HAMILTON, ONT.—It is stated that W. E. Gower, who was recently awarded the contract to put in a garbage incinerator, has failed to sign the contract.

STREETS AND ROADS.

BOSTON, MASS.—Bids are asked until 12 m., Sept. 29, for macadamizing North Harvard St., from Western Ave. to the Charles River, and Stuart St., between Dartmouth St. and Trinity Place. B. W. Wells, Supt. Sts.

EAST PEPPERELL, MASS.—McCusker Bros., Waltham, Mass., have been awarded a $10,700 contract for road work on Main St.

HADLEY, MASS.—Bids are asked until 12 m., Sept. 29, for macdamizing a section of road. T. C. Mendenhall, Chn. Mass. Highway Comn., 4 Mt. Vernon St., Boston.

WALPOLE, MASS.—Bids are asked until 12 m., Sept. 29, for building about 5,000 lin. ft. of highway. T. C. Mendenhall, Chn. Mass. State Highway Comn., 4 Mt. Vernon St., Boston.

NEW HAVEN, CONN.—Bids are asked until Oct. 4 for crushed stone paving and cobble gutters on Arch, Prospect, Union, Frank and Munson Sts. C. W. Kelly, Cy. Engr.

AUBURN, N. Y.—The council has voted to spend $1,750 to pave a portion of Exchange St. with asphalt.

BROOKLYN, N. Y.—Bids are asked until Oct. 1 for grading at the navy yard, to cost about $15,000. M. T. Endicott, Ch. Bureau Yards and Docks, Washington, D. C.

MAMARONECK, N. Y.—Bids are asked until Oct. 5 for furnishing the material and grading in Union and Railroad Aves. Chas. W. Buckter, Village Clk.

NEW ROCHELLE, N. Y.—C. W. S. Wilson, Village Engr., informs us that the question of issuing $150,000 for paving etc., will probably not be brought up again until next spring, or until the village becomes a city.

ROCHESTER, N. Y.—Bids are asked until Oct. 7 for asphalt paving on Glenwood Park; estimated cost, $13,500. Chas. M. Beattie, Clk. Executive Bd.

CAMDEN, N. J.—Bids are asked by the council until Oct. 27 for paving Cooper St., from 11th to Federal St.——Bids are soon to be asked for paving Penn St., from 9th to 10th St., with Belgian block.

JERSEY CITY, N. J.—Bids are asked until Oct. 3 for about 340 sq. yds. of Belgian paving, 4,760 cu. yds. of excavation, etc., on Germania Ave. Geo. T. Bouton, Clk. St. Comrs.

NEWARK, N. J.—Bids are asked until Sept. 30 for grading, filling, etc., on Lexington St. and Roseville Ave. M. F. McLaughlin, Gen. Supt. St. Comrs.

CONSHOHOCKEN, PA.—Bids are asked until Oct. 1 for curbing, paving and guttering in portions of about 15 streets. A. L. Murphy, Chn. Com.

ERIE, PA.—Bids are asked by the city engineer until Oct. 6 for paving with brick 17th St., from Peach to State St., about 1,100 sq. yds.

LANSDOWNE, PA.—It has been voted to issue $15,000 in bonds for street improvements, etc.

SCRANTON, PA.—Bids are asked until 7:30 p. m., Sept. 29, for brick paving on Hyde Park Ave. M. T. Lavelle, Cy. Clk.

SHARPSBURG, PA.—Bids are asked until Oct. 18 for 4,862 sq. yds. of stone paving, 27,737 sq. yds. of brick paving, 11,946 sq. yds. of asphaltum paving, etc., as described in our advertising columns. E. C. Hulbert, Borough Engr., 1035 North Canal St.; T. R. Higgins, Clk.

PITTSBURG, PA.—Bids are asked until Oct. 6 for grading, paving, curbing and laying sidewalks in portions of about 18 streets. E. M. Bigelow, Dir. Pub. Wks.

BALTIMORE, MD.—A committee will be appointed by the North Baltimore Improvement Association to ask the council to pave Fulton Ave. with asphalt from Druid Hill to Pennsylvania Ave.

ROCKVILLE, MD.—W. D. Sales, Orange, Va., has been awarded a contract by the county commissioners at $25,757, for constructing about 7¼ miles of pike road, between this place and Bethesda.

CLEVELAND, O.—Bids are asked until Oct. 7 for brick paving, draining, flagging, etc., on Bethesda St. and Bond Alley. Geo. R. Warden, Dir. Pub. Wks.

EAST CLEVELAND, O.—Bids are asked until 12 m., Sept. 29, for grading, draining, and brick paving on Mt. Union St. Walter P. Rice Engineering Co., Engrs., Cleveland; H. B. Chapman, Village Clk.

HAMILTON, O.—Bids are asked until Oct. 17 for constructing a conduit and certain improvements on Market St., between Water and 4th Sts.; estimated cost, $25,000; also until Oct. 24 for 24,000 sq. yds. of asphalt block, sheet asphalt or brick paving, on 2d St., from Central Ave. to Black St. M. O. Burns, Clk.

LORAIN, O.—D. C. Fisher informs us that the proposed paving in 2d St., has been delayed and will not be laid before spring. The people are in favor of asphalt.

MADISONVILLE, O.—Bids are asked until Oct. 6 for constructing cement sidewalks on portions of Peabody, Walnut and Station Sts. and for grading and macadamizing Peabody Ave. Bennett Carter, Clk.

URBANA, O.—Bids are asked until Oct. 10 for furnishing material and grading, graveling, etc., on Sara St. W. E. Berry, Cy. Clk.

ANDERSON, IND.—M. M. Dunlap, Mayor, informs us that it is probable that five streets will be paved next year with asphaltum. Eleventh street and six blocks are now being paved with brick, by Chas. S. Henry and Charles Daniels, respectively. Starry Rogers, Cy. Engr.

LOGANSPORT, IND.—Walter A. Osmer, Cy. Engr., writes us that contracts for brick paving were awarded Sept. 21 to the Lux & Talbott Stone Co., Logansport, for 3d St., amounting to $7,756, and for Sycamore St., at $15,952. Bonds will be issued for payment.

INDIANAPOLIS, IND.—Bids are asked until Oct. 3 for grading, graveling, etc. M. A. Downing, Chn. Bd. Pub. Wks.

MUNCIE, IND.—Bids are asked until Oct. 10 for grading and graveling Olmer Ave. F. W. Clevenger, Cy. Clk.

RICHMOND, IND.—Bids are asked until 2 p. m., Sept. 30, for constructing brick walks on South 6th St. Geo. L. Knollenberg, Clk. Bd. Pub. Improvements.

TERRE HAUTE, IND.—Bids are asked until Oct. 4 for improving Cedar and other streets. Wm. K. Hamilton, Clk.

DETROIT, MICH.—A contract has been awarded to T. J. Kennedy, at $10,479, by the board of public works, for paving in 17th St., with cedar block.

CHICAGO, ILL.—The board of local improvements has passed an ordinance to construct 10 miles of sewers and 15 miles of pavement, to cost about $700,000.

OSKALOOSA, IA.—D. C. Waggoner, Cy. Clk., informs us that 20,000 sq. yds. of brick paving, to cost about $27,000, is proposed. Samuel Verven, Cy. Engr.

ST. PAUL, MINN.—Bids are asked until 2 p. m., Sept. 29, for grading Summit Place and Hamline Ave., and improving Marshall Ave. C. H. Bronson, Clk. Bd. Pub. Wks.

OMAHA, NEB.—Bids are asked until Oct. 7 for asphalt, brick or stone paving, curbing, etc., on Mason St., from 31st to 33d St. Andrew Rosewater, Chn. Bd. Pub. Wks.

FARGO, N. DAK.—The council has awarded a contract to James Kennedy, Fargo, for 71,000 sq. yds. of cedar block paving.

MARSHALL, MO.—H. W. Kolkmeyer & Co., Jefferson City, Mo., has been awarded a contract for macadamizing, etc., at $24,000.

PORTLAND, ORE.—The council proposes to improve Grand Ave., by grading, etc.

VACAVILLE, CAL.—Bids are asked until 1 p. m., Oct. 1 for paving the bridge over Ulatis Creek, with asphalt. A. M. Stevenson, Town Clk.

VENTURA, CAL.—Bids are asked until Oct. 6 for furnishing the material and grading, etc. A. S. Kenagy, County Clk.

MITCHELL, ONT.—The question of borrowing $5,000 for sidewalks will be submitted to a vote, according to reports.

TORONTO, ONT.—Chas. H. Rust, Cy. Engr., writes us that after bids had been received for brick paving on concrete foundation on Major St., a petition has been presented for asphalt. The people who favor brick and those who prefer asphalt paving are now striving to be the first to present a fully signed petition, so that the work may be proceeded with.

WINNIPEG, MAN.—Bids are asked until Oct. 19 for asphalt paving on Portage Ave., about 18,000 sq. yds. C. J. Brown, Cy. Clk.

MANUFACTURING PLANTS.

WATERBURY, CONN.—Holmes, Booth & Haydens, of Waterbury, are making extensive repairs and additions in their plant. The Berlin Iron Bridge Co., East Berlin, Conn., have secured the contract for the steel roof work for the boiler room, 40×80 ft.; the new muffle room, 35×80 ft.; and the new brass mill, 118×90 ft. These new additions are to be fireproof throughout. The side walls will be of brick, the roof supports of steel, and the covering of corrugated iron. The roofs are arranged with skylights for lighting the interior of the building, and monitors for ventilation.

HOMESTEAD, PA.—Press reports state that a large plant for the manufacture of guns will probably be built here by the Carnegie Steel Co.

SHARON, PA.—It is announced that the Bessemer Furnace Co., of Mahoning and Shenango valleys will build a $2,000,000 steel mill at Sharon.

TALLADEGA, ALA.—Howard & Bullock, of Pawtucket, R. I., has been awarded the contract for machinery for the new addition to the Talladega Cotton Mills. Estimated cost of improvements, $50,000.

CLEVELAND, O.—The carpet cleaning works of the D. O. Summers Carpet & Rug Mfg. Co., at 118 East Prospect St., was recently destroyed by fire, causing a loss of about $60,000.

YOUNGSTOWN, O.—It is reported that the Brown & Bonnell Iron Co., of Youngstown, is having plans prepared for the erection of a continuous mill, to cost about $150,000; to be completed by Jan. 1.

LOS ANGELES, CAL.—The Los Angeles Soap Co., whose plant was recently destroyed by fire, informs us that bids are now being received for the erection of a new 4-story brick building. Contracts will be let to local contractors. Archs., Morgan & Walls, Los Angeles.

GAS PLANTS.

BUFFALO, N. Y.—Alderman Franklin has introduced a resolution to grant a permit to the Erie County Natural Gas Fuel Co. to manufacture gas for fuel, etc. E. G. S. Miller, Julius Binz and Arthur W. Hickman are interested.

BUFFALO, N. Y.—F. V. E. Bardol, Cy. Engr., reports that the proposed municipal gas plant will consist of a building 400×90 ft., with two coal pockets, a generating house of the same dimensions and two retort houses; two gas holders, each 157 ft. in diameter, and with a combined capacity of 3,500,000 cu. ft.; two purifying houses, each 50×171 ft.; an engine room, 40×100 ft.; a relief holder, an ammonia and tar tank, two oil tanks, a tar tank and a storehouse and office; estimated cost, about $800,000.

ATLANTIC CITY, N. J.—The Atlantic City Gas & Water Co. will lay a new main on Pacific Ave. Joseph Barton, Pres.

WESTWOOD, N. J.—It is reported that the council is considering a petition for the right to construct gas works.

PITTSBURG, PA.—Reports state that Dr. F. L. Slocum, W. A. Dinker, Joseph Kelling and others, propose to construct a gas plant for fuel, to cost about $100,000.

COLUMBUS, O.—The East Ohio Gas Co. has been incorporated with a capital stock of $1,000,000. It is proposed to pipe natural gas to Canton, Akron and Massillon, O., from the Wheeling gas fields. The council is now considering the granting of a franchise.

GLENVILLE, O.—Bids are asked until Oct. 1 for furnishing gas for light and fuel for 10 years. F. L. Moores, Chn. Com.

CICERO, IND.—It is reported that a franchise has been granted to W. H. Roney for laying gas and water pipes through the town.

WABASH, IND.—The Dieterich Natural Gas Syndicate proposes to install a municipal gas plant, to furnish acetylene gas for illuminating. The apparatus for making coal gas will be taken out and acetylene generators will be substituted and new mains will be laid.

FARIBAULT, MINN.—The Faribault Gas & Engine Co. wants bids for laying about two miles of gas mains, according to reports.

GRAFTON, NEB.—A proposition to establish an acetylene gas plant for lighting the streets is being considered. Messrs. O'Donnell, Cushing and Hinkley compose the committee.

NEW COMPANIES.—Hazlehurst Gas Co., Bradford City, Pa.; $3,000, with $300 paid in; to produce and supply natural gas in Hazlehurst and Hutchins, Pa.; C. V. Merrick, Treas.; Frank A. Fralic, Wm. M. Boyce, D. H. Jack, Bradford, Pa.; H. L. Smith, Binghamton, N. Y.

The City Gas Co., Staunton, Va.; $200,000; R. D. McCue and R. D. Apperson, Staunton; Harry Marquand, New York city; Lewis C. Harris, Forest Hill, N. J., and F. B. Poor, of Hackensack, N. J.

Youngstown Acetylene Gas Co., Youngstown, O.; $10,000; to manufacture acetylene gas, appliances and supplies; W. J. Wallace, Frank A. Williams, E. Hartzell, I. Hartzell, A. I. Nicholas, D. J. Jones and J. Sylvanus.

City of Lincoln Gas Co., Lincoln, Ill.; $100,000; to furnish gas, electricity and water; Frank R. Ferguson, George Skinner, Willis Hutson.

MISCELLANEOUS CONTRACTS.

RETAINING WALL.—Warren, Pa.—Bids are asked untill Oct. 1 for a retaining wall. Joseph Hill, Chn.

PARKS.—San Francisco, Cal.—The board of supervisors have decided to lay out a park at St. Mary's Place.

FIRE HOSE.—Dunkirk, N. Y.—Bids are asked until Oct. 4 for purchasing fire hose. Wm. C. Baumgarten, Clk.

LEVEE WORK.—Dayton, O.—The board of city affairs will soon ask bids for reconstructing the levee along the Miami River, in North Dayton.

CEMENT.—Seattle, Wash.—Bids are asked until Oct. 13 for furnishing Portland cement. Capt. Harry Taylor, U. S. Engr., Burke Bldg., Seattle.

FIRE ALARM IMPROVEMENTS.—Wilmington, Del.—It is proposed to make a number of imporvements to the fire alarm telegraph at a cost of $2,000.

STEAM BOILER.—Lawrence, Kan.—Bids are asked for furnishing a steam boiler, pipe, ete., at the Haskell Institute. H. B. Peairs, Supt. School Service.

FIRE ALARM SYSTEM.—San Francisco, Cal.—Superintendent Hewitt, of the fire alarm and police telegraph, has asked the supervisor for $68,000 for a new fire alarm system and about $10,000 for the building.

DUMP CARS, ETC.—Key West, Fla.—The New Orleans Ry. & Mill Supply Co., New Orleans, La., has been awarded a contract, at $1,140, for furnishing tracks and dump cars at the Key West light house depot.

DREDGING, ETC.—League Island, Pa.—Bids are asked until Oct. 8 for dredging, filling and extending the reserve basin at the navy yard; appropriation, $120,000. M. T. Endicott, Ch. Bureau Yards and Docks, Washington, D. C.

STEEL PIER.—Atlantic City, N. J.—A steel pier will be constructed at States Ave., with a frontage of about 150 ft. Estimates for the steel work have been invited, according to reports. Geo. A. Dentzel and Kennedy Crossan are interested.

PARK.—Utica, N. Y.—The committee on public improvements of the Chamber of Commerce is considering the question of having a public park. Russel H. Wicks, Edward Trevvett, Thomas E. Kinney, John Carney and J. A. McLoughlin, Com.

DREDGING.—Waukegan, Ill.—The Lake Michigan Dredging Co., Milwaukee, Wis., is reported to have been awarded the contract for dredging the harbor at Waukegan. The contract was first let to a Detroit company, but it is said to have forfeited the contract.

CHANNEL AND JETTIES.—Barnstable, Mass.—Geo. H. Cavanagh, Boston, has been awarded a contract, at $13,690, for constructing two oak pile jetties and a channel 2,600 ft. long and 100 ft. wide, through Dead Neck beach. Woodward Emery, Chn. Harbor and Land Comrs., Boston.

BARGE.—Biloxi, Mass.—We are informed that the following bids were received Sept. 22 for furnishing a barge for the use of dredging: W. N. Johnson, Biloxi, $1,600; Kensington Engine Works, Ltd., Philadelphia, Pa., $2,325. A. C. Smith, Asst. Surgeon, U. S. Quarantine Station, Biloxi.

PIER, SLUICEWAY, ETC.—Brantford, Ont.—Bids are asked until Oct. 1 for constructing a concrete pier with stone and concrete abutment; river excavation, embankments and rip-rap walls; a timber sluiceway dam, 169 ft. long. Chas. Whitney, Chn. Bd. Wks.; T. H. Jones, Cy. Engr.

ELECTRIC WIRE AND POLES.—Decatur, Mich.—The following bids were received Sept. 6, 1898, for furnishing electric wire and poles for the proposed plant, the bids for the dynamos, etc., being given under Electric Light and Power, Engr., Geo. S. Pierson, Kalamazoo, Mich.:

DAM.—Tacoma, Wash.—Henry Longstreth, of the Tacoma Land Co., has applied for permission to repair the dam on the Puyallup River; estimated cost, $2,490.

ENAMEL SIGNS.—St. Paul, Minn.—Bids are asked until Oct. 3 for furnishing enamel iron signs; certified check for 20% of bid. Pres. Bd. Pub. Wks., John Copeland.

TELEPHONE SYSTEM.—Worcester, Mass.—Reports state that a new telephone company will be organized with a capital stock of $150,000. Israel L. Currier is interested.

DREDGING.—Boston Navy Yard, Mass.—Bids are asked until Oct. 1 for dredging; estimated cost, $15,000. M. T. Endicott, Ch. Bureau Yards and Docks, Washington, D. C.

WHITE OAK SHEETING.—Cleveland, O.—Bids are asked until Oct. 6 for furnishing about 200,000 ft. B. M. of 2-inch white oak sheeting. Geo. R. Warden, Dir. Pub. Wks.

TEAM WORK.—Raceland, La.—Team men with outfits of from 10 to 20 teams are wanted immediately for a large amount of levee work. Address Rogers & Wright, Raceland.

IMPROVING CREEK.—Lockport, N. Y.—Work will begin early this fall on the improvement of Eighteen-Mile Creek. A $15,000 appropriation has been secured to cover the work.

TELEPHONE FRANCHISE.—Summit, N. J.—The Newark Telephone Co. has applied to the council for a franchise to operate in this place. Jos. A. McClary, Rahway, N. J., may be addressed.

DREDGING.—New York, N. Y.—Bids are asked until Sept. 30 for about 200,000 cu. yds. of mud dredging in the North River, at West 34th St. J. S. Cram, Comr. Docks, Pier A, North River.

OAK SHEETING.—Cleveland, O.—Bids are asked until Oct. 6 for furnishing about 200,000 ft. B. M., of 2-in. white oak sheeting in lengths of 13 ft. 6 ins. Did Pub. Wks., Geo. R. Warden.

DREDGING.—Pensacola Bay, Fla.—Bids are asked until Oct. 22 for dredging at the entrance of Pensacola Bay, as stated in our advertising columns. Maj. F. A. Mahan, U. S. Engr., Montgomery, Ala.

DREDGING.—Oakland, Cal.—Bids are asked by the board of public works until Oct. 12 for about 600,000 cu. yds. of dredging in Lake Merritt; estimated cost, $80,000. (Postponement from Oct. 5)

LEVEE WORK.—New Orleans, La.—Bids are asked until Oct. 19 for constructing about 132,500 cu. yds. of earthworks in Barataria levee district. Maj. J. H. Willard, U. S. Engr., 3232 Prytania St.

DREDGING.—Newport, R. I.—Bids are asked until Oct. 26 for dredging in Providence River and Narragansett Bay, R. I., as stated in our advertising columns. Maj. D. W. Lockwood, U. S. Engr., Newport.

BUILDING BRICK.—Philadelphia, Pa.—Bids are asked until Oct. 10 for furnishing 9,000,000 building brick, as stated in our advertising columns. E. Kleinsmith, N. W. corner of 13th St. and Market Sts.

BROKEN STONE, ETC.—Long Island City, N. Y.—Bids are asked until Oct. 4 for furnishing broken stone and screenings of trap rock and gravel. J. P. Keating, Comr. Highways, 150 Nassau St., New York.

MACHINERY AND TOOLS.—Naval Station, Puget Sound, Wash.—Bids are asked until Oct. 18 for furnishing machinery and tools. Edwin Stewart, Paymaster-Gen., Bureau of Supplies, Washington, D. C.

CEMENT, BROKEN STONE, ETC.—Newport, R. I.—Bids are asked until Oct. 26 for furnishing cement, broken stone and sand, as stated in our advertising columns. Maj. D. W. Lockwood, U. S. Engr., Newport.

DOCKS.—North Tonawanda, N. Y.—It is stated that the Tonawanda Iron & Steel Works has contracted with Edward H. Rogers, of Tonawanda, N. Y., for the construction of a continuation of its present dockage. The dock which is about to be constructed will be about 500 ft. in length and will be along the river front of the company's preperty.

OVERHAULING SHIP.—Washington, D. C.—The following bids have been received by the navy department for converting the transport "Mohawk" into a troop-ship: Cramp & Son, Ship Builders, Philadelphia, $104,000; Newport News Dry Dock & Shipbuilding Co., $98,500; J. M. Robbins & Co., $96,855; Bath Iron Wks., $82,800, and the Morgan Iron Wks., $98,800.

CONTRACT PRICES.

INCANDESCENT LAMPS.—Chicago, Ill.—W. B. Wickersham, Secy., Public Library, informs us that the following bids were received Sept. 21, 1898, for furnishing 10,000 incandescent lamps for the library building:

SUPPLIES.—Fortress Monroe, Va.—Capt. Thos. L. Casey, U. S. Engr., Norfolk, Va., received the following bids Sept. 16, 1898, for furnishing cement, lumber, bolts, etc.; (1) being for American cement, 27,000 bbls.; (2) for Portland cement, 1,250 bbls.; (3) for 2-in. broken stone, 10,650 cu. yds.; (4) for 1-in. broken stone, 7,100 cu. yds.; (5) for broken stone granolithic size, 130 yds.; yellow pine lumber —(6) 10,000 ft. B. M., 1 × 12-in. × 16 ft.; (7) 2 × 4-in. × 16 ft., 2,400 ft.; (8) 2 × 12-in. × 16 ft., 32,000 ft.; (9) 2 × 12-in. × 16 ft., dressed, 32,000 ft.; (10) 2 × 6-in. × 16 ft., 6,000 ft.; (11) 3 × 4-in. × 16 ft.; (12) 3 × 4-in. × 26 ft., 7,500 ft.; (13) 3 × 4-in. × 20 ft., 9,750 ft.; (14) 3 × 6-in. × 16 ft., 2,400 ft.; (15) 1¼ × 3-in. × 16 ft., 6,000 ft., B. M.; steel bolts—(16) 2-in. × 8 ft., 10½ ins., 16; (17) 2½-in. × 6 ft., ¾-in., 36; (18) 2½-in. 9 ft., 2⅝-in. 42; (19) 2-in. steel ring bolts, 20; (20) I-beams and channels, 127,807 lbs.; (21) connection angles, 240 pairs; (22) cast-iron columns, 5: Standard Lime and Stone Co., Baltimore, Md.—(3, 4 and 5) $1.80 a cu. yd.; R. H. Hood & Co., St. Paul Bldg., New York—(1) 84 cts. a bbl., (2) $2.30 a bbl., (3, 4 and 5) $1.389 a cu. yd., (16) $6.40 each, (17) $7.70, (18) $9.40, (19) $7.50, (20) 1.7 cts. a lb., (21) 2¼ cts. a lb., (22) 3 cts. a lb.; Petersburg Iron Works Co., Petersburg, Va.—(16) $3.92, (17) $4.53, (18) $5.48, (19) $5.12, (22) 2¾ cts.; Lawrenceville Cement Co., 26 Cortlandt St., New York—(1) 66.9 cts.; Chas. G. Smith & Son, Washington, D. C.—(3) $1.63, (4) $1.68, (5) $1.88; Atlas Cement Co., 143 Liberty St., New York—(2) $2.41; J. B. Kendall, Washington, D. C.—(16) $7.15, (17) $8.50, (18) $8.50, (19) $7.15; New Jersey Foundry & Mach. Co., 26 Cortlandt St., New York—(16) $4.25, (17) $4.50, (18) $4.75, (19) $6.00, (20 and 21) 1.65 cts., (22) 2.1 cts.; H. A. Rogers, New York—(16) $3.95, (17) $4.40, (18) $6.35, (19) $3.75, (20) 1.67 cts., (21) 1.67 cts., (22) 2.1 cts.; Washington & Potomac River Iron & Land Co., Washington, D. C.—(3) $1.30, (4) $1.69, (5) $1.25; New York & Rosendale Cement Co., 280 Broadway, New York—(1) 66¾ cts.; T. R. Chapple & Co., Richmond, Va.—(3, 4 and 5) $1.52; Jos. Leopold, New York—(3 and 4) $1.56, (5) $1.87; Duke & Smith, Norfolk—(6) $14 per 1,000 ft. B. M., (7) $13, (8) $13.50, (9) $16, (10) $12.50, (11) $12.50, (12) $13, (13) $13, (14) $12.50; (15) $15; McClenahan & Bro. Granite Co., Port Deposit, Md.—(3, 4 and 5) $1.39, (6, 7, 8, 10, 11, 12, 13 and 14) $11, (9) $14, (15) $15.

CEDAR BLOCK PAVING.—Duluth, Minn.—It is stated that P. McDonnell, Duluth, has been awarded the contract for about four miles of cedar block paving at $1.06 a sq. yd.

Mail Delivery Notice.

Special efforts are made to deliver our paper to its readers each week at the earliest possible moment. The largest binding and mailing establishment in New York begins work on Engineering News early each Wednesday evening, and all papers for Boston, Philadelphia and Washington are usually in the New York post-office by midnight; all Brooklyn and New York city papers by 3 o'clock—in ample time for the first delivery Thursday morning. The entire edition, including foreign copies, is in the mail soon after 6 o'clock Thursday morn- If your paper is not received promptly we advise that you make a complaint to your local post-office officials.

DO YOU WANT TO PURCHASE SUPPLIES?—— ALL THE PROMINENT MANUFACTURERS READ ENGINEERING NEWS.

ADVERTISE FOR BIDS IN THIS PAPER AND SECURE DESIRABLE COMPETITION.

PERSONAL.

Lieut. Edwin R. Stuart, Corps of Engineers, U. S. Army, has been ordered to duty at Willett's Point, N. Y.

Mr. A. R. Starkey, contractor, of Marquette, Mich., has been appointed Superintendent of the water-works at St. Paul, Minn.

Mr. J. W. O'Neil has been appointed Receiver of the Topeka Water Co., Topeka, Kan., to succeed Mr. Elias Summerfield, resigned.

Mr. Charles E. Phelps, Jr., of Walbrook, Md., has been appointed Chief Engineer of the Electrical Subway Commission, Baltimore, Md.

Mr. Frank A. Tyson, President of the Water Board of Reading, Pa., has resigned, and Mr. Geo. H. Felix has been appointed to succeed him.

Col. Robert Carritt has been appointed Chief Engineer of the Mississippi Valley Ry., with headquarters at 806 Chestnut St., St. Louis, Mo.

Mr. J. B. Stevens, electrical engineer, with the L. I. Fletcher Co., Boston, Mass., has assumed the management of the Cumberland Illuminating Co., Great Falls, Me.

Mr. Seaton M. Scott, M. Am. Soc. M. E., consulting mechanical engineer, of New York city, has removed his offices from 123 Liberty St. to the Bowling Green Offices, 11 Broadway.

Mr. Charles E. White, electrical engineer, of Philadelphia, Pa., has been appointed Manager of the Municipal Light Board, Wakefield, Mass., in charge of the electric light plant.

Mr. W. I. Cooke has been appointed Superintendent of Locomotive Service of the Chicago & Eastern Illinois R. R., with headquarters at Danville, Ill., to succeed Mr. H. A. Dewey.

Messrs. Wm. M. Given and Arthur C. Aldrich have formed a partnership, with the firm name of Given & Aldrich, to conduct a general engineering business, with headquarters in Room 402, Chalifoux Bldg., Birmingham, Ala.

Mr. George H. Campbell, Terminal Agent of the Baltimore & Ohio R. R., at Baltimore, Md., has, in addition to his present duties, been appointed Inspector of Stations and Terminals over the whole line, reporting to the General Superintendents in their respective territories.

Mr. Gustav R. Tuska, Assoc. M. Am. Soc. C. E., Chief Engineer of the Panama R. R. Co., with headquarters in New York city, has also been appointed Consulting Engineer to the American Representative of the Russian Government in connection with the Chinese Railway System.

Col. George E. Waring, Jr., M. Inst. C. E., consulting engineer, of Newport, R. I., and New York city, formerly Commissioner of Street Cleaning of the latter city, has been appointed to visit Cuba to investigate the sanitary condition of the different towns where United States troops are to be located and to report what should be done to improve the same.

Mr. Alfred Lovell, formerly Engineer of Tests of the Northern Pacific Ry., has been appointed Assistant Superintendent of Motive Power, with office at St. Paul, Minn. He will have charge of the routine business of the Motive Power Department during the absence of the Superintendent of Motive Power, and will also attend to special work at the shops and on the line.

Mr. George E. Gifford, M. Am. Soc. C. E., Eastern Representative of the King Bridge Co., Cleveland, O., with headquarters in New York city, has resigned to accept the position of Treasurer of the R. H. Hood Co., 220 Broadway, New York, general contractors. He has been connected with the former company for over 10 years, for the last four being in charge of the New York office.

Mr. Martin Schenck, the Democratic nominee for State Engineer and Surveyor of New York, was born at Palatine Bridge, Montgomery county, N. Y., in 1845, and graduated from the Engineering Department of Union College, Schenectady, N. Y., in 1869. He was engaged in railway surveys and construction until 1883, when he entered the office of the State Engineer, Mr. Elnathan Sweet. He built the dikes and dredged the Hudson River between Albany and Troy, and also was engaged on the Champlain and Erie Canals. In 1891 he was elected State Engineer and served one term, and he has since then been City Engineer of Troy.

Hr. Harry H. Rousseau, Jun. Am. Soc. C. E., Assistant Engineer of the Pittsburg Bridge Co., Pittsburg, Pa., stood first on the list of candidates who passed the recent examination in Washington for the position of Civil Engineer in the United States Navy. Only 18 out of the 50 candidates who took the examination passed. Mr. Rousseau is a graduate of the Rensselaer Polytechnic Institute, Troy, N. Y., in the class of 1891.

Mr. E. G. Rosencrans and Mr. A. D. Mott have formed a partnership, under the firm name of Rosencrans & Mott, with headquarters at 1236 Marquette Bldg., Chicago, and will make a specialty of structural and bridge engineering. Mr. Rosencrans has been for a long time the engineer for Green & Wickes, architects, of Buffalo, N. Y., and Mr. Mott has been with Messrs. Purdy & Henderson, of New York city, for several years.

Mr. A. B. Coalter, of the Engineering Department of the Chesapeake & Ohio Ry., has accepted an offer to go to China in the interests of the Brice Syndicate, which will build a system of railways in that country. He will accompany Mr. William Barclay Parsons, M. Am. Soc. C. E., of New York city, whose going was noted last week, and Mr. Harry Frazier, M. Am. Soc. C. E., Chief Engineer of the Chesapeake & Ohio Ry., with headquarters in Richmond, Va. Mr. Coulter will leave for Hong Kong this week by way of Vancouver, B. C. Upon his return, in about four months, he expects to resume his position with the Chesapeake & Ohio Ry. Co., which has granted him a furlough.

Mr. Edward A. Bond, the Republican nominee for State Engineer and Surveyor of New York, was born in Dexter, Mich., April 22, 1849, and in 1867 begun work for the Delaware, Lackawanna & Western R. R., with which company he remained until 1870, when in that year he was made Assistant to the Chief Engineer of the Utica & Black River R. R. In 1875 he became Chief Engineer and had charge of the building of the lines from Lowville to Clayton and Ogdensburg. In 1886 he was appointed Chief Engineer and General Superintendent of the Carthage & Adirondack Ry., from Carthage to Benson Mines and the Oswegatchie River. He removed to Watertown, N. Y., in 1889, and became a member of the firm of Hinds & Bond, civil engineers.

OBITUARY.

Mr. Bernard Martin, contractor, of Sandusky, O., died Sept. 25, aged 62.

Mr. Charles J. Fox, civil engineer and surveyor, of San Diego, Cal., died at San Lucas, Cal., recently.

Mr. William N. Clarke, a civil engineer engaged on the Soulanges Canal, died in Montreal, Que., Sept. 25, aged 27.

Mr. W. R. Bush, for a number of years owner of the electric light plant and water-works at Lake City, Fla., died Sept. 18.

Mr. H. A. W. Reeves, architect and mechanical engineer, of New York city, died suddenly in the Bank of Commerce Bldg., in that city, Sept. 30, aged 55.

Lieut. Rodmon Vernon Beach, Adjutant of the First Regiment of United States Volunteer Engineers, died at Ponce, Porto Rico, Sept. 28, aged 33. His home was in New Haven, Conn.

Mr. John P. Kelly, civil engineer, of Troy, N. Y., died Sept. 27. He was a graduate of the Rensselaer Polytechnic Institute in that city, and had been an engineer for the Public Improvement Commission and also an Assistant State Engineer.

Mr. William Kingsford, civil engineer and historian, died at his residence in Ottawa, Ont., Sept. 29, aged 78. He was born in London, England, and practiced the profession of civil engineering in that country before coming to the United States and Canada. He was engaged here as an engineer on the Hudson River Ry., the Lachine Canal and Victoria Bridge, and later was in charge of harbor works in the Provinces of Ontario and Quebec. He wrote and published a history of Canada, up to the time of the union of Upper and Lower Canada.

Mr. Thomas Fuller, late Chief Architect of the Department of Public Works, Ottawa, Ont., died Sept. 28, aged 76. He was born in Bath, England, and went to Canada in 1857. In 1859 his design for the Parliament Building at Ottawa was accepted, and he was awarded the second prize in the competition for the Parliament and Department buildings. His design also included a residence for the Governor-General. Mr. Fuller superintended the erection of the Parliament buildings. In 1867 he won the competition for a design for the new state capitol building at Albany, N. Y., and removed to that city to superintend its erection. In 1881 he returned to Canada and was appointed Chief Architect of the Public Works Department, which position he held until about a year ago, when he was superannuated, but retained an advisory position in the department.

◆

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

CHICAGO ELECTRICAL ASSOCIATION.
Oct. 7. "Electrical Features of the Late Spanish-American War," Thos. G. Grier. Secy., J. R. Cravath, 825 Monadnock Block, Chicago, Ill.

TECHNICAL SOCIETY OF THE PACIFIC COAST.
Oct. 7. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.

MONTANA SOCIETY OF ENGINEERS.
Oct. 8. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.

NATIONAL ROAD PARLIAMENT.
Oct. 8. Omaha, Neb. Martin Dodge, Director Office of Road Inquiry, Washington, D. C.

ENGINEERS' CLUB OF KANSAS CITY.
Oct. 10. Secy., F. W. Tuttle, Baird Bldg., Kansas City, Mo.

THE LOUISIANA ENGINEERING SOCIETY.
Oct. 10. Secy., J. F. Coleman, 712 Union St., New Orleans, La.

NEW ENGLAND RAILROAD CLUB.
Oct. 11. Secy., Edw. L. Janes, P. O. Box 1158, Boston, Mass.

DENVER SOCIETY OF CIVIL ENGINEERS.
Oct. 11. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Colo.

NORTHWEST RAILWAY CLUB.
Oct. 11. Secy., T. A. Foque, Soo Line, Minneapolis, Minn.

CIVIL ENGINEERS' CLUB OF CLEVELAND.
Oct. 11. Secy., Wm. H. Searles, Case Library Building, Cleveland, O.

AMERICAN RAILWAY ASSOCIATION.
Oct. 12. Holland House, New York. Secy., W. F. Allen, 24 Park Place, New York.

FRANKLIN INSTITUTE.
Oct. 12. "Anthracite Coal in Peru," Wm. Griffith. Secy., Wm. H. Wahl, 15 South 7th St., Philadelphia, Pa.

ENGINEERING ASSOCIATION OF THE SOUTH.
Oct. 13. Secy., C. B. Wilson, 1000 Broad St., Nashville, Tenn.

CANADIAN SOCIETY OF CIVIL ENGINEERS.
Oct. 13. Secy., C. A. McNab, 112 Mansfield St., Montreal, Canada.

ST. LOUIS RAILWAY CLUB.
Oct. 14. Secy., H. H. Roberts, 511 Commercial Bldg., St. Louis, Mo.

ENGINEERS' CLUB OF COLUMBUS.
Oct. 15. Secy., H. M. Gates, 12½ North High St., Columbus, O.

ENGINEERS' CLUB OF PHILADELPHIA.
Oct. 15. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.

TECHNICAL CLUB OF OMAHA.
Oct. 17. Secy., J. Harry Lawrie, Omaha, Neb.

ENGINEERS' CLUB OF MINNEAPOLIS.
Oct. 17. Secy., H. E. Smith, 1620 S. E. 4th St., Minneapolis, Minn.

ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Oct. 17. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.
Oct. 18. Secy., R. A. Fessenden, 410 Penn Ave., Pittsburg, Pa.

AMERICAN INSTITUTE OF MINING ENGINEERS.
Oct. 18. Annual meeting, Buffalo, N. Y. Secy., R. W. Raymond, P. O. Box 223, New York city.

AMERICAN ASSOCIATION OF RAILWAY SUPERINTENDENTS OF BRIDGES AND BUILDINGS.
Oct. 18-20. Annual meeting, Richmond, Va. Secy., S. F. Patterson, Boston & Maine R. R., Concord, N. H.

WESTERN SOCIETY OF ENGINEERS.
Oct. 19. "Masonry," Geo. S. Morison. Secy., N. L. Litten, Monadnock Block, Chicago, Ill.

AMERICAN SOCIETY OF CIVIL ENGINEERS.
Oct. 19. "Stave Pipe—Its Economic Design and the Economy of Its Use," Arthur L. Adams. Secy., C. W. Hunt, 220 W. 57th St., New York city.

ENGINEERS' CLUB OF ST. LOUIS.
Oct. 19. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.

ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Oct. 19. Secy., Frank H. Olmsted, Los Angeles, Cal.

BOSTON SOCIETY OF CIVIL ENGINEERS.
Oct. 19. Secy., S. E. Tinkham, City Hall, Boston, Mass.

WESTERN FOUNDRYMEN'S ASSOCIATION.
Oct. 19. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill

PENNSYLVANIA STREET RAILWAY ASSOCIATION.
Oct. 19-20. Annual meeting, Scranton, Pa. Secy., S. P. Light, Lebanon, Pa.

AMERICAN GAS LIGHT ASSOCIATION.
Oct. 19-21. Annual meeting, Niagara Falls, N. Y. Secy., Alfred E. Forstall, Montclair, N. J.

ENGINEERS' CLUB OF CINCINNATI.
Oct. 20. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.

NEW YORK RAILROAD CLUB.
Oct. 20. Secy., W. W. Wheatley, 168 Montague St., Brooklyn, N. Y.

SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Oct. 20. Secy., F. A. Charpiot, P. O. Box 13, Savannah, Ga.

AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENT.
Oct. 26-28. Annual meeting, Washington, D. C. Secy., D. L. Fulton, Bureau of Highways and Sewers, Allegheny, Pa.

BROOKLYN ENGINEERS' CLUB.
Nov. 3. Secy., A. J. Provost, Jr., 191 Montague St., Brooklyn, N. Y.

ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Nov. 7. Secy., H. J. March, Library Bldg., Buffalo, N. Y.

CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Nov. 7. Secy., C. L. Annan, City Engineers' Office, St. Paul, Minn.

RAILWAY SIGNALING CLUB.
Nov. 8. Secy., Earl M. Seitz, Signal Engineer, C. & N. W. Ry., Chicago, Ill.

SOCIETY OF NAVAL ARCHITECTS AND MARINE ENGINEERS.
Nov. 10-11. Annual meeting. Secy., Francis T. Bowles, 12 West 31st St., New York.

THE WESTERN FOUNDRYMEN'S ASSOCIATION.—This association enjoyed its usual annual outing on Sept. 21. The party, including members and guests, left Chicago by boat for Racine, Wis., where they inspected the works of the J. I. Case Threshing Machine Co. and the Belle City Malleable Iron Co. In the evening an elaborate banquet was served at the Racine Hotel.

ROCHESTER ENGINEERING SOCIETY.—The 5th annual excursion of this society took place on Oct. 1. The trip was over the Lehigh Valley R. R. to visit the docks and coal handling machinery of the Buffalo, Rochester & Pittsburg R. R. and the Lehigh Valley R. R. at Buffalo, N. Y. The Buffalo Engineering Society met the party at the docks and acted as an escort.

ENGINEERS' CLUB OF CINCINNATI.—At the meeting of this club, held Sept. 15, Mr. W. Hildenbrand, who has had charge of the remodeling of the suspension bridge at Cincinnati, read a very interesting paper describing the work; the principal features of which consisted in the putting up of two additional cables, the entire reconstruction of the trusses and floor, the widening of the roadway and footwalks, the lengthening of the approaches and improvement in the grades. This was all accomplished without interfering with or interrupting the heavy travel of electric cars, vehicles and pedestrians. J. F. Wilson, Secy.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS.—The 127th meeting of this society was held at the house of the American Society of Mechanical Engineers, New York city, Sept. 28 The Secretary, Mr. R. W. Pope, read the paper of the evening on "The Photometry of the Enclosed Alternating Arc," by Messrs. C. P. Matthews, W. H. Thompson and J. B. Hilbish, of Purdue University, Lafayette, Ind., which was a report of a series of experiments conducted by the authors to determine something of the behavior of the alternating enclosed arc lamp. An abstract of the paper and discussion is given elsewhere in this issue.

CHICAGO ELECTRICAL ASSOCIATION.—The secretary of this association, Mr. J. R. Cravath, has issued the following list of the papers to be presented at the fall meetings: Oct. 7, "Electrical Features of the Late Spanish-American War," Thos. G. Grier; Oct. 21, "Practical Points on Electrical Measurement," W. B. Hale; Nov. 4, "The Electrical Equipment of a Model Printing Establishment," George A. Damon; Nov. 18, "The Development of the Motor-Cycle," F. B. Rae; Dec. 2, "Practical Points in Street Railway Engineering," W. A. Harding; Dec. 16, "Wireless Telegraphy," Arthur V. Abbott; Jan. 6, "Telephone Engineering—Some Problems, Solved and Unsolved," S. G. McMeen; Jan. 20, "Observations on Ventilating Fans," Gerard Swope.

THE NATIONAL RAILROAD MASTER BLACKSMITHS' ASSOCIATION.—This association held its 6th annual meeting at the American House, Boston, Mass., Sept. 6-8. Reports from committees on the following subjects were received: "Handling Scrap Materials;" "Locomotive Forging;" "Furnaces;" "Making and Repairing Frogs and Crossings;" Making and Repairing Locomotive Frames;" and "Making and Repairing Track Tools." Mr. Geo. F. Hinkens read a very complete paper on "Compressed Air in the Blacksmith Shop," and also one on "How to Get the Best Results in Working Tool Steel—High and Low Carbon." Papers were also read by Mr. G. L. Lindsay on "The Best Method of Repairing Locomotive and Car Springs," and Mr. N. B. Meissimer, on "Flues and the Best Method of Repairing Lap and Butt Welding."

Officers for the ensuing year were elected as follows: Pres., W. W. McLelland, D. & R. G., Denver, Colo.; First Vice-Pres., G. F. Hinkens, St. P. & D., Gladstone, Minn.; Second Vice-Pres., G. A. Geuthner, Bost. & Me., Boston, Mass.; Secy. and Treas., A. L. Woodworth, C. H. & D., Lima, Ohio. Milwaukee, Wis., was decided upon as the next place of meeting.

AMERICAN PUBLIC HEALTH ASSOCIATION.—The 26th annual meeting of this association was held at Ottawa, Ont., on Sept. 27. About 100 delegates were present. A resolution was adopted recommending the appointment of an American, Canadian and Mexican Commission to arrange to have the Berthilon system of disease classification adopted by the three countries.

A paper entitled "Short-History of Sewage Disposal at the Asylum for the Insane, London, by Dr. R. M. Burke, was read. The sewage of this institution, about 75,000 gallons daily, is forced by a centrifugal pump, upon filter beds which, during freezing weather, are kept soft enough to absorb the water by the heat in the sewage. Fruit and vegetables valued at $200 per acre have since been raised upon the ground.

Mr. Thomas McFarlane, Dominion Analyst, read a paper on "The Disposal of Sewage in Some European Cities," which was followed by a paper entitled "Most Recent Methods of Sewage Disposal," by C. G. Houlyky, and others on "The Filtration of Sewage," by Capt. W. F. Van Buskirk; "The Interpretation of the Chlorine Member in Well Water," by A. McGill; and "The Farm Well," by Frank Shutt.

The afternoon was spent in driving about the city inspecting points of interest, and in the evening a reception was held at the City Hall.

NEW PUBLICATIONS.

AMERICAN STREET RAILWAY DIRECTORY AND BUYERS' MANUAL. First edition. Quarterly. New York: E. L. Powers. Paper; 6 × 9¼ ins.; pp. 82.

This is the first issue of a publication which will be issued quarterly in the future. In includes a complete list of electric, cable, horse and elevated railways in the United States and Canada, in which the names of all the principle officials, mileage, gage of track, number of cars, etc., are given.

The directory is well arranged, neatly printed and will doubtless be welcomed by every dealer in street railway supplies.

REPORT OF THE BUREAU OF MINES OF THE PROVINCE OF ONTARIO.—Vol. VII. Third Part. 1898. Archibald Blue, Director of the Bureau, Toronto, Ont. Pamph.; pp., 60, with several maps, diagrams and photographs.

This report contains some papers of interest to mining engineers and others, as follows: "Economic Geology of Eastern Ontario," being a report on corundum and other minerals, by Prof. W. G. Miller. "Analyses of Corundum and Corundum-Bearing Rock," by Dr. W. L. Goodwin. "The Concentration of Corundum," by Prof. Courtenay de Kalb. "Water Powers of Ontario," by Thomas W. Gibson. "Placer Gold on Vermillion River," by A. H. Gracey. The statistics of mineral production of Ontario for 1897 make a most meager exhibit, considering the undoubtedly great mineral wealth of the Province. They are as follows: Gold, $190,244; nickel, $359,651; copper, $200,067; iron ore, $4,869; pig iron, $288,129.

ELECTRIC STREET RAILWAY HISTORY.—Part I. The Westinghouse Electric & Mfg. Co. Pamph.; 6×9 ins.; pp. 38; illustrated.

This pamphlet tells a most interesting pictorial history of the development of the Westinghouse railway motor, from the old two-pole No. 1 motor, through the four-pole No. 3, No. 12 A, No. 38, No. 38 B, No. 49, to the latest type, No. 50. In these pictures several views of the motor in question are given so that an idea of outside and inside construction and the method of suspension can be gained. As a fitting accompaniment, several illustrations of railway generators and switchboards and the Westinghouse alternating, direct-current system of power transmission are included. These show rotary converters, transformers, etc. In conclusion, a number of interior views of the company's factory and several railway plants using Westinghouse apparatus are shown.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

PECKHAM TRUCKS.—Peckham Truck Co., New York city.

These are half-tone illustrations on loose sheets of various styles of Peckham trucks for street cars of various classes.

THE DEDENDA GONG.—J. G. Brill Co., Philadelphia, Pa. Pamph.; 9 × 6 ins.

This is a brief description of a new form of gong for street cars. The feature of the gong on which stress is laid is its simplicity.

THE LARGEST DYNAMO IN THE WORLD.—By S. H. Short, Walker Electric Co., Cleveland, Ohio. Pamph.; 6 × 8 ins.; illustrated.

This is a neatly gotten up illustrated description of a 3,000-K-W. (4,000 HP.) railway generator, ordered of the Walker company, by the Boston Elevated Ry. Co. The total weight of the machine is 250,000 lbs.

BOOSTERS.—Walker Co., Cleveland, Ohio. Circular, 7⅞ × 10¾ ins.; illustrated.

This is No. 1086, superseding No. 1068, of the regular Walker series of circulars. In it motor-dynamos, or "boosters," as they are generally called, are briefly described and illustrated.

WALKER CAR MOTORS FOR STREET LINES, ELEVATED OR SUBURBAN TRAFFIC.—Circular 1085 describes the Walker motor, outlining various features, such as accessibility, speed, efficiency, simplicity, ease of repair, power, etc. Several illustrations of the armature and field parts are also given.

ALTERNATING CURRENT APPARATUS. — Circular 1084.—This gives a brief description of some of the apparatus built by this company for the generation of alternating currents. Illustrations and dimension tables accompany the text.

THE LOVE UNDERGROUND CONDUIT.—Circular 1083 explains the salient features of this conduit system, which was described in Engineering News, Aug. 4, 1898.

STEEL LIGHTING GENERATORS.—Circular 1081.—This is an illustrated description of a type of generator designed for purposes where the load is fairly constant, or where the load variations are gradual.

TYPE "S," SOLENOID BLOW-OUT CONTROLLER.—Circular 1080 is, as implied in the title, a description of this type of street railway motor controller. Illustrations serve to make its construction and use clear.

RAILWAY SAFETY APPLIANCES.—Safety Appliance Co., Boston, Mass. Pamph.; 6 × 9 ins.

This pamphlet calls attention to several safety appliances for use upon railway cars. These are: A form of brake equalizer; draw-bar adjuster, spring suspension and dead lever take up. These devices are illustrated and briefly described.

CONSTRUCTION NEWS.

CONDENSED LIST OF CONTRACTS PENDING WITH DATE OF OPENING BIDS.

Bids to be opened.	Work. Place.	See Eng. News.
Oct. 6.	Electric light plant, St. Joseph, Ill.	Sept. 22
	Advertised, Engineering News, Sept. 22.	
Oct. 6.	Water-works, Greensboro, Ga.	Sept. 22
Oct. 6.	Brick paving, Erie, Pa.	Sept. 29
Oct. 6.	Water-works, Osage, Ia.	Sept. 29
	Advertised, Engineering News, Sept. 29.	
Oct. 6.	Highway (4,600 lin. ft.), Newburyport, Mass.	Oct. 6
Oct. 6.	Sidewalks, Riverton, N. J.	Oct. 6

RAILWAYS.

ALLEGHENY & WESTERN.—S. H. Lea, Res. Engr., Adrian, Pa., informs us that track-laying has been commenced at the eastern end of this line where several miles of grading have been finished. Good progress is being made on the piers for the bridge across the Allegheny River, at Mosgrove, Pa.; work is also being carried on night and day on the "Big Cut" at Lyons farm, containing over 250,000 cu. yds. of material. The stretch of six miles from the Lyons Cut to the Allegheny River is one of the heaviest pieces of work in this country. There are to be two steel viaducts within 1½ miles of Adrian, One of these will have a maximum height of 95 ft.; the other is 102 ft. at its highest point. At the "Devil's Gulch," one mile east of Adrian, is a steep culvert with a fall of more than 40 ft.; over this culvert is an embankment 100 ft. high. The remainder of the line to the river is extremely heavy, and is such as may be termed titanic. The maximum gradient is 1%, compensated for curvature. The rails are 100 lbs. to the yard, and are made by the Carnegie Steel Co.

ATLANTA & WEST POINT.—George C. Smith, Pres., Atlanta, Ga., informs us that this company will build a belt line of steam railway, six miles in length, to extend around the eastern side of Atlanta to the Georgia R. R., and that contracts will be let in 30 to 60 days. The right of way has been obtained, and final location of the line is now being made. Reports state that five or six bridges and a tunnel will have to be erected, and that the cost of the work will be $200,000. G. F. Huggans, Ch .Engr., Montgomery, Ala.

ATLANTIC COAST LINE.—Press reports state that this company has decided to build a branch line from Denmark to Robbins, via Barnwell, S. C. I. R. Kenley, Gen. Mgr., Wilmington, N. C.

BLACK DIAMOND.—Press reports state that Sir Thomas Tancred, representing a company of English capitalists, is inspecting the right of way of this proposed railway from Springfield, Ill., to Port Royal, S. C., a distance of about 1,200 miles. Col. Albert E. Boone, Gen. Mgr., Zanesville, O.

CALIFORNIA NORTHWESTERN.—This company, which has recently been incorporated with a capital stock of $3,000,000, has leased the entire system of the San Francisco & North Pacific Ry. Co. for 20 years. The new company proposes to build a connecting line from the existing railway to the timber belt of Mendocino county. Four locations have been surveyed, but the point of connection has not yet been decided upon. F. K. Zook, Ch. Engr., San Rafael, Cal.

CHOCTAW & MEMPHIS.—Reports state that four corps of engineers are now in the field surveying for this proposed line from the terminus of the Choctaw, Oklahoma & Gulf at Wister Junction, Ind. Ter., to the Little Rock & Memphis R. R., at Little Rock, Ark., 150 miles. Henry Wood, Gen. Mgr., Smith McAlester, Ind. Ter., has stated that rails have been purchased but not the rolling stock; also that the entrance into Little Rock will probably form the south side of the river, which will necessitate the erection of another bridge across the Arkansas.

DULUTH & NORTHEASTERN.—J. H. Heininger, Cloquet, Minn., informs us that this will be a 40-mile first-class logging road to be built for the Cloquet Lumber Co. Surveys have been made, the capital secured and contracts let. The route at present will be from the Duluth & Iron Range R. R. south to the Cloquet River. Pres., F. Weyerhauser, St. Paul, Minn. J. B. Phelps, Davenport, Ia., also informs us that the contract is held by Williamson, Campbell & Gowin, of Duluth.

EL PASO & NORTHEASTERN.—J. L. Campbell, Ch. Engr., El Paso, Tex., informs us that this proposed railway has been completed from El Paso to Alamogordo, N. Mex., a distance of 86 miles. Work on the main line is suspended for the present, pending construction of a branch line, 16 miles in length, to timber along the route. The northern terminus will be at White Oaks, and the completed system will be 165 miles long. George S. Good & Co., El Paso, Tex., and Lock Haven, Pa., are the contractors. Financiering has not yet been entirely completed. After Oct. 1 the chief engineer will be H. A. Sumner. Pres., C. B. Eddy, El Paso.

FLORIDA.—Reports state that Strickland & Wesley, of Point Washington, Fla., desire to communicate with parties regarding the construction of a 10-mile logging railway.

GALVESTON, BRAZOS & SOUTHWESTERN.—Construction work along this proposed line has been abandoned for the present. The route is from Galveston to San Antonio, Tex., a distance of 200 miles. Grading has been completed between Galveston and Angleton, Tex., a distance of 30 miles. Pres., L. P. Featherstone; Ch. Engr., L. E. Beadle, both of Galveston, Tex.

GEORGIA.—A. H. Morgan, manufacturer of cross-ties, etc., Waycross, Ga., informs us that he is in the market for five or six miles of 35 or 40-lb. steel or iron relay rails, f. o. b. Boston, New York, Philadelphia or Baltimore. He also desires to furnish for the West Indies market 100,000 yellow pine ties, delivered at Port Tampa, Fla.

JASPER SOUTHERN.—L. P. Scarborough, Secy., Jasper, Tex., informs us that this company does not expect to extend its lines. The present line is 20 miles in length, extending from Kirbyville to Jasper. Pres., W. J. B. Adams; Ch. Engr., W. W. Blake, both of Jasper.

LOGANSVILLE & LAWRENCEVILLE. — We are informed that A. & C. Wright & Co., of Richmond, Va., completed the grading, trestling and masonry on this line in July; also that tracking is now about completed and operation will soon be commenced. The road is to be a feeder to the Seaboard Air Line, running from Lawrenceville, on this line, to Logansville, via Trip, Ga., a distance of ten miles. Pres., Nathan Bennett, Logansville, Ga.; Ch. Engr., N. E. Lugolf, Portsmouth, Va.

LOUISIANA & NORTHWEST.—J. D. Beardsley, Gen. Mgr., Gibsland, La., informs us that this company has completed the extension from Homer, La., north to Magnolia, Ark., a distance of 36 miles, and that it has acquired the branch of the St. Louis Southwestern Ry., running from Magnolia to the main line at McNeil, 6.4 miles. The present length of the route is 78 miles, from Bienville, La., to McNeil, Ark. William Washburn, Ch. Engr., Gibsland, La.

LOUISVILLE & NASHVILLE.—Reports state that improvements are now in progress along this line between Louisville and Bowling Green, Ky., which have in view the reduction of all grades over 0.8 per cent., where possible. The work is being done by the Globe Construction Co. A. R. Wing is also said to have a contract to build three miles of new road near Green River where the reduction of grade would not be practicable. R. Montfort, Ch. Engr., Louisville, Ky.

MEXICAN CENTRAL.—Lewis Kingman, Ch. Engr., Mexico, Mex., informs us that track-laying was finished Sept. 15, on the new extension of this line from Jiminez to Parral, Mex., a distance of 55 miles. It is proposed to open the line on Oct. 9.

NORTHERN.—Reports state that this company has recently been incorporated in Missouri to construct about ten miles of railway from Trimble to Gower, Mo., with the object of giving the St. Joseph & Grand Ry. a shorter route from St. Joseph to Kansas City. Surveys have been made. A. L. Stillwell, Pres.; H. C. Smith, Asst. Engr., both of Kansas City.

NORTON BAY & YUKON.—Press reports state that this company will begin to build next June a line of railway from the mouth of the Unalaklik River, on Norton Sound, to Kaltag, a town on the Yukon River below Nulato, a distance of about 76 miles. The survey for the first route has been finished, and it is said that the maximum grade will not exceed 2%. Pres., E. A. Gardner, Chicago, Ill.; Ch. Engr., F. A. Hill, Seattle, Wash.

OREGON & MISSOURI NORTHERN.—Robert S. Doubleday, Ch. Engr., Oregon, Mo., informs us that surveys have been made, the right of way arranged for and the capital for construction secured for this proposed line. Most of the contracts have been let, and work is now under way. T. A. Davis, St. Joseph, Mo., is the principal contractor. This company was incorporated Sept. 3 with a capital stock of $100,000, to construct a railway from Forest City to Oregon, Mo., five miles, and thence to extend north and east through towns not yet definitely specified. Pres., Irving H. Wheatcroft, of Oregon, also general manager of the Colorado Valley Ry.

PETERSBURG.—Phillips, Wright & Co., of Richmond, Va., are said to have been awarded the contract Sept. 16 for the graduation of a line about ten miles in length, beginning about two miles south of Petersburg, Va., and running southeasterly in proximity to the existing railway. E. T. D. Myers, Ch. Engr., Richmond, Va.

PORTLAND & NEHALEM.—This company has been organized in Oregon, with a capital stock of $100,000, according to reports, for the construction of a railway from a point on the Nehalem River southeast to Portland, Ore., a distance of about 50 miles. Thornburn Ross, Chamber of Commerce Bldg., Portland, is said to be interested.

SAGINAW SOUTHERN.—This company was incorporated in Arizona, Sept. 28, with a capital stock of $250,000, to construct a railway from Williams, on the Santa Fe Pacific, to Jerome, Ariz., via Cocimino and Yavapai counties, with a total length of 50 miles. Among the incorporators are: John C. Brown, George C. Wharton, Max Salzman, Wm. P. Cutting, Chas. F. Roberts and Edward M. Doe.

SAN FRANCISCO & SAN JOAQUIN VALLEY.—Reports state that work is progressing rapidly on the Franklin tunnel which is being made through the Contra Costa hills, west of Stockton, Cal., and that about 1,700 ft. are now completed. The total length will be 5,700 ft., and work is expected to be finished within ten months. Foley Bros. & Muir, St. Paul, Minn., are the contractors. W. B. Storey, Jr., Ch. Engr., San Francisco, Cal.

SAVANNAH & STATESBORO.—W. C. Parker, of Statesboro, Ga., informs us that part of this proposed railway system is now in operation between Cuyler and Woodburn, Ga., a distance of 13 miles. An extension is in process of construction from Woodburn to Statesboro, five miles. The contract requires the line to be ready for operation in nine months: considerable grading has been completed, and a subscription of $10,000 made by the citizens of Statesboro towards completing the work. The rails are reported to have been bought. Pres., Stilson Hutchins, Washington, D. C.

ST. LOUIS & OKLAHOMA CITY.—Track has been laid on this new line to a point about 65 miles southwest of Sapulpa, Ind. Ter., and the line is in operation between Sapulpa and Stroud, Okla. Grading has been completed for several months along the entire route to Oklahoma City, Okla., a distance of 103½ miles. Pres., T. G. Jones, Oklahoma City.

ST. LOUIS, CHICAGO & ST. PAUL.—Press reports state that Col. William H. Male, Pres. of St. Louis, Alton & Springfield Co., of New York, has been appointed receiver of this company.

SUMMERVILLE, BLUE MOUNTAIN & WALLA WALLA.—This company was incorporated in Oregon at the time of the incorporation of the Union, Cornucopia & Eastern Ry. Co., to construct a railway from a junction on the Union, Cove & Valley Ry. to Walla Walla, via Summerville and Elgin. Joseph Johnson, Supt. of Construction, Union, Ore.

UNION PACIFIC.—Press reports state that this company contemplates the building of a cut-off between Cheyenne and Laramie, which will materially reduce the grade. J. B. Berry, Ch. Engr., Omaha, Neb.——The Seminoe Mining Co. expects to construct a branch line from the main line of the Union Pacific to Seminoe, to be used to haul iron ore from the company's mines. Mgr., E. H. Saltiel.

VIRGINIA.—The citizens of Gloucester county will vote at Gloucester, Va., Nov. 8, on the question of issuing $50,000 of 5% railway aid bonds.

WISCONSIN.—H. Zech, of Crivitz, Wis., contemplates the construction of a railway from Crivitz, on the Chicago, Milwaukee & St. Paul Ry. up the Peshtigo River to a connection with the Minneapolis, St. Paul & Sault Ste. Marie Ry., a distance of about 30 miles. Surveys have been made and work is expected to commence soon.

STREET AND ELECTRIC RAILWAYS.

WESTBROOK, ME.—Reports state that work was commenced on the proposed Westbrook, Windham & Harrison Electric Ry., Sept. 28, under the direction of J. H. Tolman, J. C. Scates, C. M. Waterhouse and C. B. Woodman, the owners of the charter. It is expected to complete the first ten miles, of a total length of 32 miles, within the next six weeks.

BELLOWS FALLS, VT.—The Bellows Falls & Saxtons River Electric Ry. expects to begin the construction of its proposed electric railway, six miles in length, this fall, so as to have cars running by December. Pres., J. H. Holton, Burlington, Vt.; Vice-Pres., A. N. Swain, Bellows Falls; Treas., J. J. Flynn, Burlington.

NEWBURYPORT, MASS.—It is announced that the Newburyport & Amesbury St. Ry. Co. has gone into the hands of a receiver, and that the Citizens' Electric St. Ry. Co. is to be organized, with a capital stock of $150,000, to purchase and improve the system. Among those interested are: W. B. R. Ferguson, Malden, Mass.; B. D. Sumner, Newton; E. P. Shaw, Jr., Brookline; Charles Goss, Amesbury; Jas. F Shaw, Newburyport.

QUINCY, MASS.—The council has ordered a public hearing for Oct. 10 on the petition of the Boston, Quincy & Fall River Bicycle Ry. Co. for the right to build in certain portions of this city. Pres., E. Moody, Boynton.

ALBANY, N. Y.—The map and profile of the route of the proposed Albany, Helderberg & Schoharie Electric Ry. were filed with the clerk of Albany county, Sept. 30, and notices are being served, preparatory to construction. As fully stated in our issue of June 9, the contract for building the line has been awarded to the Albany Construction Co., 93 State St., Albany, of which J. S. Frost, of Albany, is secretary. The route is from Albany to Schoharie, a distance of 42 miles. Pres., Henry Burgett; Treas., Chas. E. Bibbler, both of Boston, Mass.

NYACK, N. Y.—We are informed that Isaac A. Walker & Son, General Railway Contractors, Stephen Girard Bldg., Philadelphia, Pa., have purchased the franchise, rights of way, etc., of the Nyack Traction Co., and have reorganized the company, with the following officers: Pres., Henry C. Howard, Chester, Pa.; Treas., E. F. Walker, and Secy., Geo. D. Howell, both of Philadelphia. The survey has been completed and bids have been advertised for to be in by Oct. 10. The capital for construction has been secured, and contracts will be let as shortly after Oct. 10 as possible. The projected line is about 12 miles in length, and will have all the latest improvements, ballasted track, 70-lb. rail, etc. The route is from Sparkhill along the river road to South Nyack, Nyack and Upper Nyack, with an extension from the ferry at Nyack to the West Shore R. R. station, and from Upper Nyack to Rockland Lake. The road will be built by I. A. Walker & Son.

ROCHESTER, N. Y.—The directors of the Rochester, Charlotte & Manitou R. R. Co. have decided to fill in 1,000 ft. of trestle over the inlets; to put on ten new 4-motor trolley cars, and to build a large platform at Manitou. The question of extending the road four miles to Hilton was also considered. Pres., Michael Doyle, 32 White St.

SKANEATELES, N. Y.—It is reported that construction work on the Inter-Urban St. Ry. has been begun by G. D. Grannis, of Syracuse. The proposed line is to run between Skaneateles and Auburn, with a possible extension to Syracuse. T. H. Mather, of Syracuse, is said to be the engineer in charge.

WEBSTER, N. Y.—The Rochester & Sodus Bay Electric Ry. Co. has secured the right of way through this town.

CAMBRIDGE SPRINGS, PA.—This borough has granted the Erie Transit Co. rights of way upon certain streets for the construction of a new electric railway. Burgess, J. C. Allee.

JOHNSTOWN, PA.—N. F. Thompson, Secy. of Board of Trade, informs us that the Johnstown Board of Trade is promoting the construction of a trolley line from this city to Scalp Level, a distance of seven miles. Arrangements have progressed so far as to assure of the building of a road to connect these points merely for the benefit of Johnstown. It is possible that steam may be the motive power, and freight and passenger traffic handled, but it will soon be more definitely decided.

BALTIMORE, MD.—James Bond, Pres. American Bonding & Trust Co., of Baltimore, informs us that the Baltimore, Marley & Mountain Ry. Co., the incorporation of which was noted in our last issue, is only an organization for making the preliminary surveys and obtaining right of way, etc., after which a permanent organization for construction purposes will be effected.

WASHINGTON, D. C.—E. Saxton, of Washington, is stated to have been awarded the contract for constructing the conduits for the new underground electrical system on the City & Suburban Ry., formerly the Eckington & Soldiers' Home R. R. The contract for the iron work was let to Johnson & Co., of Pennsylvania; for the overhead construction, to J. G. White & Co., Baltimore, Md.; for the track-laying, and overhead section, to W. H. Allen, of Washington.

WHEELING, W. VA.—We are informed that the Wheeling Ry. Co. is now building an extension from its present terminus in Martins Ferry to the north end of the city, a distance of about 1.1 miles, and that the construction of the one-mile extension to the fair grounds has been completed. Pres., T. H. Conderman.

KNOXVILLE, TENN.—It is reported that J. C. Monday, a contractor of Knoxville, is formulating a scheme to build an electric railway to Sevierville from this city. The surveys have all been made, and the Knox county court will be asked to appropriate $100,000 toward building the road, and the Sevier county court $50,000.

PORTAGE, O.—Bids are asked until Oct. 18 for the purchase of a franchise to build an electric line through this village. Address the village clerk.

STEUBENVILLE, O.—Preliminary surveys have been completed for a new street railway line between this city and Mingo Junction, and it is said that the line will be built within the next few months. It is also stated that the line will be a link in the system which is to connect Pittsburg with Wheeling, by way of the towns along the Ohio River.

MEROM, IND.—A. D. Hayworth, of Washington, D. C., and others are said to be interested in the construction of an electric railway from Terre Haute to Merom, 32 miles.

PORTLAND, IND.—N. K. Todd, of Bluffton, Ind., one of the incorporators of the Portland & Camden R. R., informs us that no surveys have yet been made for the projected line, nor has the capital been secured. The company was incorporated to build from Portland to Camden, via Dunkirk, Albany, Pennville and Bluffton, a distance of 12 miles.

HIGHLAND PARK, MICH.—The trustees of this village have granted a franchise to the Detroit Citizens' St. Ry. Co. to extend its line up Woodward Ave. to the Six Mile Road. Pres., Tom L. Johnson, 12 Woodward Ave., Detroit.

CHICAGO, ILL.—Bids are being received, according to reports, by the West Chicago and North Chicago St. R. R. Cos. for equipping their cars with fenders; estimated cost, $300,000.

ROCKFORD, ILL.—The Rock River Construction Co., of Chicago, has received the contract for the building of the proposed Rock River Electric Ry. from Oregon to Rockford, 30 miles, and work is expected to begin at once, so as to be completed by Jan. 1.

WICHITA, KAN.—Finlay Ross, Mayor of Wichita, informs us that the Wichita St. Ry., Light & Power Co. has had its franchise renewed on condition that the entire line of 20 miles be rebuilt of new material, and that new equipment be used; also that work be completed before April 1. Pres., H. B. Church, of Wichita.

KANSAS CITY, MO.—F. W. Sears, Gen. Mgr. of Missouri Electric Ry. Co., Baird Bldg., Kansas City, informs us that surveys have all been made for this proposed 12-mile electric railway from 11th St. and Grand Ave., in Kansas City, to Swopes Park and Dodson, and that a petition for a franchise within the city limits will be presented to the council within 60 days. Right of way outside city limits has been secured. The company is capitalized at $500,000, of which one-half is paid in. No contracts will be let until the city franchise has been granted, which will probably be before Jan. 1. Pres., Henry Smith, New York Life Bldg., Kansas City.

BEAUMONT, TEX.—J. F. Keith informs us that J. C. Ward, Jas. F. Ward, V. Wiess, T. H. Langham and J. F. Keith recently obtained a franchise for building an electric street railway in this city. A company has not yet been organized, but will be in a few days, after getting the details of the privileges finally arranged with the city authorities. The above parties are all stockholders in the Beaumont Ice, Light & Refrigerator Co., of Beaumont. In this plant there are ample buildings and boiler and engine power enough to supply the power for the electric cars, but a suitable dynamo will possibly have to be added. Some practical ideas about the construction and equipping of a railway proper are solicited.

BOULDER, COLO.—The council has granted a street railway franchise to Guy D. Duncan and others. Any street may be used, provided the consent of a majority of the property owners be first obtained.

PORT ANGELES, WASH.—John Cain, E. W. Challis and Geo. H. Clementson have petitioned the city for right to construct and operate a street railway along Liberty St., from Railroad Ave. to Front and other streets.

PASADENA, CAL.—An ordinance has been passed by the trustees granting to Geo. B. Leighton the right to construct and operate an electric street railway on certain streets in Pasadena. H. Dyer, Cy. Clk.

TORONTO, ONT.—It is reported that the Toronto St. Ry. Co. is considering the advisability of extending the Toronto & Scarboro Ry. seven miles from its present terminus, to the west side of the Highland Creek hill. James McDougall, Engr.

SHANGHAI, CHINA.—Consul-General Goodnow, of Shanghai, reports that the construction of an 18-mile overhead wire and trolley street railway is projected for this city. A concession is to be granted to a company, to be known as the Shanghai Traction Co., and will provide for three different routes.

ELECTRIC LIGHT AND POWER.

NEWPORT, R. I.—The plant of the Newport Golf Club, together with the pumping station, was destroyed by fire Oct. 3, causing a reported loss of about $9.000.

ALBION, N. Y.—The board of trustees of the State House of Refuge, it is stated, is considering the question of building a plant.

CENTRAL ISLIP (L. I.), N. Y.—The Commercial Construction Co., 1 Madison Ave., New York, has been awarded the contract, at $27,825, for electric wiring, etc., for the 36 new buildings at the Manhattan State Hospital, Central Islip.

EAST SYRACUSE, N. Y.—The franchise for plant recently granted to M. C. Mulford, of Syracuse, has become void, on account of Mr. Mulford not giving the $5,000 bond within 30 days.

PORT CHESTER, N. Y.—Press reports state that the Port Chester Electric Lighting Co. has purchased the plant and franchises of the Westchester Gas & Electric Co., and will begin in a short time to build a new plant to supply Port Chester, Rye, Harrison and Mamaroneck. Capital stock, $50,000. William E. Ward, Pres.; J. Addison Johnston, Vice-Pres.; William L. Ward, Treas. Walter S. Comby, Secy., writes us that it has not yet been decided when the question of building the new plant will be taken up.

WORCESTER, N. Y.—John Van Benthuysen has been awarded a contract to light this place; the plant to be in operation by Jan. 1.

CAMDEN, N. J.—Bids are asked until Oct. 17 for lighting the streets with electricity for a term of one, three or five years, beginning July 1, 1899. Chn. Com., Chas. C. Southard.

SEA ISLE CITY, N. J.—Walter Sexton, Pemberton, N. J., has submitted the lowest bid for lighting this place with electricity. Mayor Sickles has appointed Councilmen Whittington and Grumley to arrange the contract.

DUNCANNON, PA.—John E. Graybill, York, Pa., has been awarded the contract for constructing the plant at this place. It will have a capacity for 1,000 incandescent and 12 arc lights.

EAST MAUCH CHUNK, PA.—This place is reported to have voted to build a municipal plant.

FREDERICKSBURG, VA.—The committee on light of the council, Capt. T. McCracken, Chn., has presented a report recommending the building of an electric light plant to be owned and operated by the city. The report will be published and bids asked for, after which the matter will be voted on at a special meeting; estimated cost, $13,000. Mayor, A. P. Rowe.

GRAFTON, W. VA.—Bids are asked until Oct. 20 for the purchase of $10,000 of 5% 20-year electric light bonds. Chn. Com., O. G. Angir.

HINTON, W. VA.—The Wilson Aluminum Co., 97 Cedar St., New York, is reported to have begun the construction of a plant for developing the power of the Kanawha Falls and the New River Falls, several miles from this place.

GREENSBORO, N. C.—Bids are asked until Nov. 15 for lighting the streets with electricity for three or more years from Jan. 1. There will be required 70 or more 1,200-c. p. arc lights for city use. Commercial lighting will be wanted. Population, 10,000. Chn. Com., B. H. Merrimon.

SUMTER, S. C.—Bids are asked until Dec. 1. for furnishing this place with 37 2,000-c. p. arc lights for a term of 10 or 15 years; also for furnishing, if necessary, 160 incandescent lights for the opera house. Cy. Clk., C. H. Hurst.

WHITESBURG, GA.—We are informed that the Sewell Paper Co. wishes to purchase a 50-light dynamo, which will also be used to operate a pump 1,200 yards away for pumping water. Prices are wanted for furnishing and for putting in the dynamo.

CRESCENT CITY, FLA.—W. L. MeLeod, Pres. Council, writes us that a franchise has been granted to the Pierpont Mfg. Co. Work on the plant is to be begun within 90 days from Sept. 26, the date of signing franchise.

FLORENCE, ALA.—J. C. Rea, Mgr. Florence Milling Co., writes us that bids are wanted at once for furnishing certain machines for the proposed light plant for its mill. There will be wanted a dynamo and lamps. The power will be taken from the machinery already in place. There will be required 50 16-c p. lights.

OPELIKA, ALA.—Press reports state that the council proposes to build a municipal plant in time to light the city at the expiration of the contracts with the Opelika Electric Light & Power Co.

STURGIS, KY.—The question of electric lighting is being considered.

CAMBRIDGE, O.—Bids are asked until Oct. 10 for furnishing eight arc lights for a term of five years. Cy. Clk., T. R. Deselm.

DAYTON, O.—A new company will soon apply for a franchise for lighting this city with electricity. W. C. Henning, of Henning & Henning, Lawyers, Callahan Bank Bldg., Dayton, may be addressed.

GERMANTOWN, O.—L. S. Crickmore, Mayor, writes us that G. L. McKibben, Van Wert, O., has been engaged to prepare plans and specifications for a plant.

THORNTOWN, IND.—W. E. Young, Clk., writes us that it is doubtful if a plant is built in this place, reported as being considered.

TIPTON, IND.—J. S. Tarkington, Kokomo, Ind., has purchased the plant of the Tipton Electric Light Co., and, it is stated, will extend it.

ST. LOUIS, MICH.—Parker Merrill, Mayor, and J. R. Wilson, City Clerk, will ask the board of supervisors for permission, Oct. 21, to construct a power dam across Pine River. The dam is to be 13½ ft. high above bed of stream, to be built of piles, timber, etc.; to be an overflow dam, with apron at least 200 ft. wide, with intake and tailrace; to have a shute 10 ft. wide for the passage of logs and timber in the middle of the river, and to have a fish-shute, as provided for by law.

WYANDOTTE, MICH.—The question of building a municipal plant is being considered, according to reports.

KENOSHA, WIS.—The Milwaukee, Racine & Kenosha Electric Co. has applied for a new franchise. Mayor Pettit may be addressed.

MARINETTE, WIS.—Harry McCallum, Marinette, is reported to have made a survey of the water power of the Peshtigo River for H. Zech, of Crivitz, Wis.

BURLINGTON, IA.—The council is considering plans for redistricting the city and changing the lights. There are at present 131 arc and 290 incandescent lights, while under the new arrangement there would be 230 arc lights of 2,000 c. p. Mayor Naumann may be addressed.

SHERIDAN, MONT.—The council has granted Mr. Quirk a franchise for a plant; it to be completed in a month.

WYNNE, ARK.—Bids are asked until Oct. 15 for constructing a plant and water-works, to cost about $15,000. Cy. Recdr., Geo. W. Eldridge.

SENECA, MO.—The question of lighting this place with electricity is being considered by the Brodrick Realty Co.; population, 1,500.

WHARTON, TEX.—G. C. Gifford is reported as arranging for the construction of a plant and water-works for this place.

TEKOA, WASH.—The plant owned by Frank Mahoney and Edward Mahoney was destroyed by fire Sept. 20, causing a reported loss of about $1,500.

PORTLAND, ORE.—The council has awarded the contract for lighting the streets for two years from April 1, 1899, to the Portland General Electric Co. Gen. Mgr., H. W. Goode.

LONG BEACH, CAL.—The building of a plant to cost about $12,000 is being urged by Mayor Johnson.

LAKE MEGANTIC, QUE.—The question of building a plant is being considered by the council, according to reports.

MONTREAL, QUE.—The Lachine Rapids Hydraulic & Land Co., Montreal, is reported to have been awarded the contract for furnishing power to the plant of the Standard Light & Power Co., 11 Chenneville St. A number of improvements will be made to the plant. Supt. L. R. H. & L. Co., R. S. Kelsch.

PORT ARTHUR, ONT.—Edward S. Janison, Arch., 151 La Salle St., Chicago, Ill., is making efforts to have a power plant and canal built above the Ecarte Falls on the Kaministiqua River; estimated cost, $1,000,000.

TORONTO, ONT.—Bids are asked until Nov. 9 for supplying electric energy, to be used for electric lighting, power, etc., and for furnishing the machinery and for installing a complete plant, as described in our advertising columns. Chn. Bd. of Control and Mayor, John Shaw.

EAST LONDON, CAPE OF GOOD HOPE, AFRICA.—It is stated that this city wants bids for lighting the streets by electricity. Population, 10,000.

JOHANNESBURG, TRANSVAAL, AFRICA.—It is stated that the council is raising a loan of $750,000 for extending the city plant, etc. The new plant to be ordered out of this loan comprises a carburetted water-gas plant, two sets of 300-K-W. three-phone generators, with compound condensing engines and boilers of 600 HP.; two direct-coupled exciters of 30 K-W. each, condensing plant and other accessories. British, German and American competition will be considered.

NEW COMPANIES.—Eureka Electric Co., Chicago; $10,000; J. Kusel, Arnold Cohn, H. J. Kusel.

Georgia Lighting & Heating Co., Atlanta, Ga.; $100,000; Pres. and Mgr., Col. J. F. Burke; Secy. and Treas., R. J. Thurmond.

Dowd Electrical Co., Albany, N. Y.; $100,000; Charles Henry Fitch, of Pepperell, Mass., and four others.

Kenova Industrial Co., Charleston, W. Va.; $1,000,000; W. B. Campbell, Philadelphia, Pa.; Henry Kyd Douglas, Hagerstown, Md.; Walter H. Doyle, Norfolk, Va.; Joseph A. Gale, Roanoke, Va.; W. H. Travers, Charlestown, W. Va.

Easton Power Co., Easton, Pa.; $200,000, with $20,000 paid in; Treas., Arthur E. Childs, Boston; Alfred Clarke, Lowell, Mass.; Wm. O. Hay, Easton, Pa.

North Hudson Light, Heat & Power Co., Hoboken, N. J.; Albert B. Carlton, 124 Broad St., Elizabeth, N. J.; Frank M. Stillman, Rahway, N. J.; Samuel Hathaway, Jersey City; Arthur K. Bonta, 200 11th St., Hoboken.

McKinney Electric Light & Motor Power Co., McKinney, Tex.; $17,000; L. A. Scott, J. P. Nenney, D. T. Pardue.

Kitson Hydro-Carbon Light & Heat Co. of Arkansas, Little Rock, Ark.; $500,000, with $125 paid in; the light is an invention of Missouri parties; H. W. Perry, Pres.; E. L. Brown, Maxwell Coffin, J. M. Steward, Ashley Cockerill.

New Jersey-Washington Light Co., 7 Rilsam Bldg., Trenton, N. J.; $100,000, with $1,000 paid in; E. Raymond Perrine, New York; T. R. Allen, Trenton; N. W. Black, Cumbus, N. J.; S. W. Semple, Burlington, N. J.

BRIDGES.

BOSTON, MASS.—Bids are asked until Oct. 10 for two masonry abutments and masonry pier for the bridge on the Columbia Road. B. W. Wells, Supt. Sts.

NIAGARA FALLS, N. Y.—S. F. Arkush, Cy. Clk., informs us that nothing definite has yet been decided for the proposed bridges at Main, Sixth and Pine Sts.

CAMDEN, N. J.—Bids are asked until Oct. 12 for repairing the turntable of the Federal St. draw bridge over Cooper's Creek. Dr. J. B. Davis, Chn. Com.

JERSEY CITY, N. J.—Mortimer Lampson, Comr. St. and Water Bd., has had plans prepared for a proposed viaduct on Communipaw Ave. to extend from Monitor St. to Phillip St., about 1,600 ft.; estimated cost, $90,000.

SOMERVILLE, N. J.—The council has awarded a contract to the Berlin Iron Bridge Co., East Berlin, Conn., for constructing an iron truss bridge of 60-ft. span and 14-ft. roadway.

LACEYVILLE, PA.—A company has been organized by Dr. D. W. Sturdevant, Pres., Geo. L. Johnson, Vice-Pres., John B. Edwards, Secy. and others, for the construction of a bridge at this place, for which the contract has been awarded to the Horseheads Bridge Co., Horseheads, N. Y., at $30,000.

PITTSBURG, PA.—Bids are asked until 12 m., Oct. 7, for refilling approaches and masonry work on certain bridges. W. E. Thompson, County Controller.

TUNKHANNOCK, PA.—Bids are asked by the county commissioners until Oct. 8 for the abutments of the Meshoppen Creek bridge.

SALEM, VA.—Bids are asked until Oct. 22 for constructing two iron bridges across Mason's Creek. J. C. Langhorne, Chn. County Comrs.

DOBSON, N. C.—The county commissioners will reconstruct the iron bridge over Fish River, between Mt. Airy and Dobson.——The floods have destroyed a number of small trestles and bridges on the Northwestern Division of the Southern Ry., in Surry, Wilkes and Forsyth counties.

VAUCLUSE, S. C.—Bids are asked until Oct. 14 for rebuilding a bridge on the Vaucluse & Graniteville Road. Thos. B. Raborn, Supervisor, Aiken, S. C.

CLEVELAND, O.—Bids are asked until Oct. 12 for constructing a stone arch culvert with retaining walls, etc., on Euclid Ave., over Nine-Mile Creek. J. C. Dorn, Clk. County Comrs.

KENTLAND, IND.—Local papers state that five new bridges will be constructed this fall by the county commissioners.

GRAND RAPIDS, MICH.—Reports state that the chief engineer of the Toledo, Saginaw & Muskegon R. R., Mayor Balbirnie and City Attorney Sessions have decided to take immediate steps for a bridge or a grade crossing at Biedler St.

HART, MICH.—C. B. Stevens, Village Pres., informs us that a contract has been let to the Groton Bridge & Mfg. Co., Groton, N. Y., by the township, for building a 1,200-ft. steel bridge 20 ft. wide, on steel tubing and concrete substructure, to cost $6,000.

LANSING, MICH.—Bids are asked until Oct. 10 for erecting the old Michigan Ave. bridge at Kalamazoo St., on a new substructure. An amount of new material, bolts, rods, castings, etc., will be required. Jasper C. Davis, Cy. Engr.

GALESBURG, ILL.—It is reported that the county will construct a new bridge near Abington.

MOLINE, ILL.—Bids are asked until Nov. 30 for designs and for the construction of a high bridge across Rock Creek; also for removing the old structure, as stated in our advertising columns. Maj. W. L. Marshall, U. S. Engr., 1637 Indiana Ave., Chicago, Ill.

DES MOINES, IA.—G. A. Eberhart, Bd. Pub. Wks., informs us that nothing will be done in regard to the proposed bridge over the Des Moines River at East Sixth St., until after April 1, 1899. The abutments may then be contracted for.

ROYALTON, MINN.—Geo. E. Wilson informs us that there is some talk of building a bridge but nothing more.

ST. PAUL, MINN.—A. Munster, Engr. Bridges, informs us that bids were wanted Oct. 4 for constructing a combination bridge, one span 168 ft. long and 32 ft. wide, and 178 ft. of trestle, on masonry foundation.

PARKER, S. DAK.—Bids are asked by the county commissioners until Oct. 11 for constructing four steel bridges over the Vermillion River, according to reports.

COLFAX, WASH.—Bids are asked until Oct. 7 for furnishing the material and constructing a steel bridge of one span 140 ft. long and 20 ft. wide over the North Palouse River, in Palouse City, and a bridge across Union Flat Creek. John Tobin, County Audr.

SEATTLE, WASH.—An ordinance has been passed and referred to the street committee for two bridges on Jackson St.

AUBURN, CAL.—Bids are asked until Oct. 7 for constructing a bridge over the Central Pacific R. R., near Colfax Ave. Lee E. Wallace, Cy. Clk.

SAN JOSE, CAL.—The county surveyor has been authorized to prepare plans for a bridge across Isabel Creek, on the Kincaid Road.

WOODLAND, CAL.—The proposition to repair the bridge across Putah Creek at Winters, or to construct a new steel structure, to cost from $15,000 to $20,000, has been laid over until some future time. No agreement could be made between the county commissioners and the railroad company interested, according to reports.

RATHDRUM, IDAHO.—Bids will soon be asked by the county commissioners for a bridge on the Priest River, according to reports.

TORONTO, ONT.—The council is considering the question of a new bridge over the Don River at Queen St. Chas. H. Rust, Cy. Engr., will report on the cost of a low level bridge.

BUILDINGS.

BOSTON, MASS.—Mead, Mason & Co., 13 Exchange St., Boston, have been awarded the contract for erecting the East Boston high school building, at $203,006.

BROCKTON, MASS.—McIlvain, Unkefer & Co., of Pittsburg, were the lowest bidders, Sept. 28, for the erection, except heating plant and electric wire conduits, of the public building in this city, at $43,353; time, 12 months. Other bidders were: Daniel O'Connell & Son, Holyoke, Mass., $52,000, time, Oct. 1, 1899; Prescott H. Jackson, Brockton, $57,321, 12 mos.; Conners Bros., Lowell, Mass., $57,210, 12 mos.; McNeil Bros., Boston, $58,900, 12 mos.; Mackie Bros., Brockton, $56,800, 11 mos.; Geo. Howard, Brockton, $51,839, 1 year; Norcross Bros, Worcester, Mass, $63,444, 12 mos. Lowest bid accepted.

BROOKLINE, MASS.—Bids are asked until Oct. 6, at 5 p. m., for the erection of a building for police and court purposes at Washington and Prospect Sts. F. W. Lawrence, Chn. Bldg. Com.

NEW HAVEN, CONN.—Bids are asked until Oct. 15 for erecting the New Haven Harbor breakwater light station, as stated in our advertising columns. Lieut.-Col. D. P. Heap, U. S. Engr., Tompkinsville, (S. I.), N. Y.

WATERBURY, CONN.—Bids are asked until Oct. 13 for the erection of the Drayer St. school building. The architect, Theodore B. Peck, 65 Bank St., Waterbury, informs us that the building will be of brick and wood, 73 × 123 ft., two stories in height, with a slate roof, and heated by steam. Augustus I. Goodrich, Chn. District Com.

BINGHAMTON, N. Y.—Burr W. Mosher, Cy. Clk., informs us that Treacey Farley was the lowest bidder, Sept. 20, for erecting an isolation ward for the city hospital, at $4,050. Bids were also received for this work or for heating and plumbing apparatus, from E. L. Sullivan, Youngs & Bogart, John Schulte, D. J. Malone, C. E. Boughton & Co., Shapley & Wells, and Gaylord & Eitapenc.

BUFFALO, N. Y.—Reports state that the U. S. lighthouse board has decided to recommend Congress to appropriate $50,000 for the establishment of a new lighthouse supply station near Buffalo.

CENTRAL ISLIP (L. I.), N. Y.—Bids were received by the Manhattan State Hospital, Pres., Henry E. Howland, 1 Madison Ave., New York, Sept. 22, for the construction of four groups of hospital buildings at this place. McGibben & Son, of Brooklyn, were the lowest bidders for non-fireproof construction, at $656,370; A. Pasquini, of Albany, was the lowest for fireproof construction throughout, at $823,208; and Miles Leonard, of Binghamton, N. Y., the lowest for fireproof construction of three floors and non-fireproof roof, at $734,810, and for fireproof construction of central buildings and connecting corridors, at $679,707. The Artesian Well & Drilling Co., of New York, was the lowest bidder for the water supply and distribution, at $28,720; James Fay, New York, lowest for plumbing and drainage, at $49,750; the Commercial Construction Co., 1 Madison Ave., New York, lowest for the engines and generators, at $11,800, and for electric wire and fixtures, at $27,825. E. Rutzler, 178 Centre St., New York, is also said to have been the lowest bidder for the heating apparatus, at $240,292.

MOUNT VERNON, N .Y.—It is reported that the citizens of this city are agitating the erection of a new library building, to cost about $25,000.

NEW YORK, N. Y.—Plans are being prepared, according to reports, for a new medical department building, for Columbia University, at 1st Ave. and 27th St., to cost about $500,000. Archs., McKim, Mead & White, 160 5th Ave.——Plans have been filed by the city for a 3-story brick and stone engine house, at 119 Maiden Lane, to cost $55,000. Archs., Horgan & Slattery, 1 Madison Ave.; by Gottfried Piel, 333 West 76th St., for a 4-story and attic frame dwelling, at 87th St. and Riverside Drive, to cost $60,000. Arch., Hubert Drosser, 2 Stone St; by W. E. Thompson, 327 West 70th St., for six 4-story brick dwellings, at 329 to 339 West 70th St., to cost $56,000. Arch., J. W. Davison, 225 Cambreling Ave.; by F. V. Gaines, 103 West 93d St., for four 5-story brick flat buildings, on 135th St., near Brown Place, to cost $88,000. Arch., Harry T. Howell, 748 East 138th St.; by Emil Greene, 182 East 72d St., for four 5-story brick flats, on 117th St., near 5th Ave., to cost $104,000. Arch., Edward Wenz, 1491 3d Ave.——E. F. Dobson & Co., 1133 Broadway, is stated to have received the contract for erecting a 7-story apartment building on Central Park West, near 94th St., for William Call, to cost $115,000. Arch., Jas. E. Ware & Son, 3 West 29th St.

NEW YORK, N. Y.—We are informed that the following bids were received Oct. 3 for a heating and ventilating apparatus and electric lighting plant for public school No. 40: Blake & Williams, $30,290; E. Rietzler, $30,225; Francis Bros. & Jellett, $30,950; The Wells & Newton Co., $30,175; Francis Dobson, 218 East 42d St. (accepted), $29,350; Evans, Almirall & Co., $30,150. The bids for a similar plant in public school No. 166 were as follows: Francis Bros. & Jellett, $33,910; Francis Dobson (accepted), $32,500; Blake & Williams, $33,397; James Curran Mfg. Co., $33,975; E. Rietzler, $33,297; The Wells & Newton Co., $33,740; Evans, Almirall & Co., $34,303.

CAMDEN, N. J.—Bids are asked by the supervising architect, Washington, D. C., until Oct. 27, for the construction, except heating apparatus and electric wire conduits, of the U. S. building in this city, as stated in our advertising columns. Archs., Rankin & Kellogg, 1024 Walnut St., Philadelphia, Pa.

CAMDEN, N. J.—W. H. Day, of Camden, was awarded the contract, Sept. 30, for erecting the new high school building at Haddon and Newton Aves., at $52,600. C. W. Cramer bid lowest on the heating apparatus, at $4,000. Arch., Thomas Stephens, Masonic Temple.

AMBLER, PA.—The Trinity Episcopal Church of this place is erecting a new church building, to cost about $50,000.

HOMESTEAD, PA.—The school board has decided to erect a new $50,000 school building in the 2d Ward.

PHILADELPHIA, PA.—Plans have been prepared for a new $30,000 colonial dwelling house, to be erected on Powelton Ave., West Philadelphia, for C. C. Febiger. Archs., H. W. Sellers and Chester Kirk.——Reports state that J. E. & A. L. Pennock will soon erect a 3-story brick, stone and iron stable for the Gas Improvement Co., at 9th and Diamond Sts., to cost $55,000.——A new memorial home will soon be completed in Germantown for the St. Joseph's Female Orphan Asylum, at Church Lane and Stenton Ave., to cost about $65,000.

DUBUQUE, IA.—Bids will soon be asked, according to reports, for erecting the new seminary building for the Theological Seminary, to cost about $250,000. Archs., Buechner & Jacobson, St. Paul, Minn.

ELDORA, IA.—It is reported that the proposition to issue $45,000 in bonds for the erection of a new court house will be voted upon at the November election. Audr., C. R. Lyon.

DE SMET, S. DAK.—The contract for heating the new court house has been let to Hess & Brown, of Watertown, S. Dak., at $1,317. Other bidders were: Pond & Hasey, at $1,645, and the Archambe Heating Co., at $1,523.

KANSAS CITY, MO.—The Portsmouth Investment Co. is said to contemplate the erection of a new auditorium building in this city, to cost $50,000. It is reported that the contract for erecting the building has been let to J. W. Wood, of Chicago.

SPRINGFIELD, MO.—The St. Louis & San Francisco Ry. Co. proposes to erect a $40,000 hospital building in this city, provided that the site be donated.

ST. LOUIS, MO.—A fire in this city, Sept. 28, destroyed the building at 410 North 4th St., occupied by C. & W. McClain, causing a reported loss of about $80,000.——Reports state that the St. Louis Realty & Amusement Co. will erect a new theater building at Franklin and 7th Sts., to cost about $125,000.——T. J. Harbaugh has been granted a permit to erect several store and flat buildings at Taylor and Finney Aves., to cost about $30,000.

COLORADO SPRINGS, COLO.—A fire in this city, Oct. 1, damaged the Antlers Hotel and adjoining buildings, causing a reported loss of $1,000,000.

SEATTLE WASH.—The Great Northern Ry. Co. has been granted a permit to erect a 2-story brick building on Jackson St., near 2d Ave., to cost about $70,000.

TREHERNE, MAN.—The business portion of this village was burned Sept. 27, at a loss of about $50,000.

MEXICO, MEX.—It is reported that Milliken Bros. have been awarded the contract for furnishing the structural iron for the new building to be erected here for R. Booker & Co.; total cost, $150,000. Archs., De Lemos & Cordes, 130 Fulton St., New York.

TOKIO, JAPAN.—Press reports state that M. Manizu, an architect in the service of the Japanese government, is in New York, and that he desires all information and circulars regarding the heating and ventilating of buildings. Address, care of Y. Wooyeno & Co., 540 Broadway, New York.

WATER-WORKS.

HOLYOKE, MASS.—Jos. L. Tighe, Engr., Water Dept., has submitted a report for a new reservoir to supply the Highlands; estimated cost, $50,000.

NORTHFIELD, MASS.—We are informed that H. Osborne, of Northampton, Mass., has been awarded the contract for building an intake reservoir for the water-works for the Mount Hermon School, Northfield. The Deane Steam Pump Co., Holyoke, Mass., has the contract for the pumps, and the Flint Building & Construction Co., Monson, Mass., has the contract for building the supply reservoir and laying the pipe. The school has 700 pupils. Engr., E. C. Davis, Northampton, Mass.

TURNER'S FALLS, MASS.—The Geo. F. Blake Mfg. Co., 93 Liberty St., New York, is reported to have been awarded the contract for furnishing a new pump at the water-works.

WEST SPRINGFIELD, MASS.—At a town meeting held Sept. 27 the water commissioners were directed to employ an engineer to report on methods for a new water supply, etc.; estimated cost of new works, $25,000. Chn. Com., N. T. Smith.

ALDEN, N. Y.—Bids are asked until Oct. 18 for furnishing the materials and for building works to cost about $18,000, as stated in our advertising columns. Engr., J. F. Witmer, 705 Ellicott Bldg., Buffalo, N. Y.; Clk., Albert Yager.

BAINBRIDGE, N. Y.—J. Warren Lamb, Cooperstown, N. Y., is preparing plans for the proposed city works, for which $22,000 in bonds were voted Sept. 10.

BUFFALO, N. Y.—The commissioners of public works received the following bids Sept. 29 for a 20-in. water pipe across Buffalo River at Ohio St.—Hingston & Woods, all the work, $12,025; George W. Moore, laying pipe, etc., $15,494; Lake Erie Boiler Works, pipe, $2,895; Charles A. Haskin, $16,000; Farrar & Trefts, furnishing pipe, $2,343; Buffalo Dredging Co., laying the pipe, $9,750.

CHURCHVILLE, N. Y.—Sage & Potter, of this place, have submitted a proposition to furnish this town with water. The town will lay the pipe and erect the stand-pipe. The contract will be for five or ten years.

EAST HAMPTON (L. I.), N. Y.—A company is about to be organized to build works for this place. The capital stock will be $20,000, of which amount $14,000 has been subscribed. T. J. Gardiner, B. H. Van Scoy and Geo. A. Eldredge are interested.

HARRISVILLE, N. Y.—F. W. Werner, Chn. Com., writes us that J. W. Siegrist, Utica, N. Y., has been awarded the contract for building the works at $6,702.

BRADFORD, PA.—Bids are asked until Oct. 24 for constructing a 92,000,000-gallon storage reservoir, as described in our advertising columns. Secy. Water Comrs., E. N. Braddock.

KNOXVILLE, PA.—Bids are asked until Oct. 12 for furnishing the materials and for building works, as stated in our advertising columns. Engr., Howard Murphy, 260 South 3d St., Philadelphia; Clk., Henry A. Ashton.

BOONSBORO, MD.—W. L. Given, Burgess, writes us that the contract to supply this town with water for fire purposes has been let to the Boonsboro Water Co., who will build the works. The contract for the materials has been let and the construction of the reservoir begun. The contract for furnishing the pipe has been let to the Southern Pipe Co. Engr., H. G. Frederick, Boonsboro, Md., and Millersburg, Pa.

INDIAN HEAD, MD.—Bids are asked until Oct. 8 for furnishing and constructing a steel stand-pipe at the Naval Proving Ground, Indian Head. Chas. O'Niel, Ch. Bureau of Ordnance, Navy Dept., Washington, D. C.

WILLIAMSPORT, MD. — G. W. McCardell, Editor "Leader," writes us that the town is trying to secure plans for works. The town voted to issue bonds for works and an electric light plant, but they have not yet been issued. Population, 2,000.

COLUMBIA, S. C.—W. B. Smith Whaley, Chn., Caldwell Robertson and E. W. Robinson are on the committee to take charge of the letting of contracts for the new works and a sewerage system and to superintend the construction of the same. The contracts will probably be let in a short time; estimated cost, $450,000. Cy. Engr., C. C. Wilson.

GALLATIN, TENN.—D. K. Spillers, Chn. Com., writes us that this place voted Sept. 24 to build works, for which $35,000 will be appropriated. The water supply will be secured from the Cumberland River, three miles distant.

ROCHESTER, KY.—This place will vote Oct. 14 on the question of issuing bonds for works, according to reports.

LEWISVILLE, IND.—A. M. Potter, Jr., Clk., writes us that this village will put in works in the spring. There will be required a 20,000-gallon tank on a tower 60 ft. high.

NEW ALBANY, IND.—The Home Crystal Water Co. was incorporated Sept. 27 with a capital stock of $200,000. The board of directors is as follows: Peter Arlund, Copenhagen, Denmark; George Borgerding, Frank Shefold, Engr., New Albany; Ed. M. Bir, H. T. Sutton, G. E. D. Waggoner and L. Bloomfield. This company was recently granted a franchise by the council, noted in our issue of last week. The company has agreed to begin to furnish water to the city within a year.

TRAVERSE CITY, MICH.—This city has voted to issue $100,000 in bonds for municipal works, according to reports.

CHICAGO, ILL.—Bids are asked until Oct. 11 for furnishing and constructing a steel sheel with four stuffing boxes and glands for a well at the Springfield Ave. pumping station, and also for one at the Central Park Ave. Station. Comr. Pub. Wks., L. E. McGann.

CHICAGO, ILL.—Bids are asked until Oct. 13 for furnishing water tanks and connections for the Chicago Public Library Building. Secy., W. B. Wickersham, Public Library Bldg.

MELROSE PARK, ILL.—Bids are asked until Oct. 10 for furnishing the materials and for constructing works and laying the pipe. Engr., W. B. Ewing, 1706 Marquette Bldg., Chicago; Clk., Wm. Leeseberg.

MONMOUTH, ILL. — I. Trumbull, Chn. Water Com., writes us that the city has purchased ground near the railway and is about to build new works there and abandon the old plant. The council has appropriated $5,800 for work on it this year. It is probable that D. W. Mead, Rockford, Ill., will prepare the plans.

WHITEHALL, ILL.—It is reported that an election will be held Oct. 10 to vote on the question of issuing bonds for works.

BARABOO, WIS.—The Baraboo City Water-Works Co. has decided to increase the water supply from springs located about half a mile from the works. The improvements will be made mostly by the company and probably no contracts will be let. Cy. Engr., W. G. Kirckoffer.

MANILLA, IA.—The council has rejected the bids received by C. V. Campbell, Mayor, Sept. 19 for building works to cost about $3,000. The town will build the works.

OTO, IA.—The question of building works, it is stated, is being considered.

UTE, IA.—It is stated that the council is considering the question of building works at a cost of about $4,000.

WEBSTER CITY, IA.—Jno. E. Quackenbush, Webster City, has been awarded the contract at $3,000 for building a 100,000-gallon water tank on a steel tower 80 ft. high.

CRYSTAL, MINN.—Bids are asked until Oct. 15 for the purchase of $6,000 of 6% 20-year water bonds, according to reports. Chn. Com., W. C. Wilkinson.

ODESSA, MO.—This place is reported to have voted against issuing $10,000 in bonds for works.

WYNNE, ARK.—Bids are asked until Oct. 15 for furnishing the materials and for building the works and electric light plant, estimated to cost about $15,000. Secy. Bd. Pub. Impts., M. Holly; Cy. Recdr., Geo. W. Eldridge.

RODGERS, TEX.—Jos. S. Thompson writes us that work on the proposed plant will be begun about Oct. 15, it will cost about $5,000. Next year a pump will be put in at the artesian well.

WHARTON, TEX.—G. C. Gifford has been granted a 25-year franchise for new works and an electric light plant. It is stated that work will be begun at once.

NEW WHATCOM, WASH.—The council is stated to have made a survey for a new 24-in. water main 8,000 ft. long from Lake Whatcom, to take the place of a smaller main. The improvement will cost about $15,000.

THE DALLES, ORE.—Bids are asked until Oct. 10 for furnishing and laying 2,400 ft. of 12-in. cast-iron water pipe and also 4,120 ft. of 4 to 10-in. pipe, 11,000 lbs. of specials, 16 double-nozzle hydrants, etc. Clk. Water Comrs., Simeon Bolton.

LONG BEACH, CAL.—The question of building municipal works is again being considered; estimated cost, $20,000.

MONROVIA, CAL.—Bids are asked until Oct. 15 for furnishing this place with a water supply, or for constructing works for the city. Clk., W. A. Walker.

SAUSALITO, CAL.—We are informed that the report to the town trustees recommends the construction of a new works by the town, to include a pumping plant with a daily capacity of 200,000 gallons, a 500,000-gallon service reservoir and 10 miles of distributing mains, the water to be procured from wells 1½ miles southwest of the town. Engr., M. M. O'Shaughnessy, Crocker Bldg., San Francisco, Cal.

TUCSON, ARIZ.—Press reports state as follows: The Tucson Water Co., notwithstanding the passage by Congress of an act to enable Tucson to raise money by sale of bonds to build municipal works, is making preparations to enlarge its works. Sylvester Watts, Pres. Water Co., left a few days ago for the East to purchase material for the new works. The works will be changed from a gravity system to a steam plant. A 500,000-gallon stand-pipe will be erected on the highest place in town. The station will be equipped with a 2,000,000-gallon triple expansion and condensing pumping engine. There will be two boilers, each 66-in. shell and 18 ft. long. Test wells have been sunk 30 ft. and fine water has been developed. There will be ten of these wells.

GANANOQUE, ONT.—The question of improving the works and of building a sewerage system is being considered. Mayor, W. B. Carroll.

STIRLING, ONT.—H. S. Ferguson, Reeve, writes us that this place voted Sept. 23 to build gravity works at a cost of $20,000. It is probable that no work will be done until next summer. The water supply will be secured from Somerset Lake, nearly 300 ft. above the town and about two miles distant. Dr. Parker may be addressed.

WINNIPEG, MAN.—The council has decided to offer the English holders of the Winnipeg Water-Works Co.'s bonds $200,000 for the entire plant. This is understood to be final and calls for a release of all liabilities and encumbrances. The bondholders have asked $275,000.

ST. LAMBERT, QUE.—The St. Lambert Water-Works Co. has been incorporated to operate the works already built; capital stock, $100,000; incorporators, T. J. Drummond, Geo. E. Gudevil and Jos. T. McCall.

GLASGOW, SCOTLAND.—Press reports state that the following bids were received last month for furnishing this corporation with water pipe: R. D. Wood & Co., Philadelphia, 12-ft. lengths, $23,971; Robert Maclaren & Co., Glasgow, 9-ft. lengths, $24,274; Robert Laidlow & Son, 9 or 12-ft. lengths, $25,656; D. Y. Stewart & Co., 9 or 12-ft. lengths, $29,199. An amendment was proposed to divide the contract, giving $10,182 worth of it to R. D. Wood & Co., Philadelphia, and the balance to Robert Maclaren & Co., Glasgow. Robert Maclaren & Co. have declined to accept the contract on the conditions agreed to at the meeting. They state that their bid was for the entire contract and not for a fraction. If they accepted the contract as given they would have to add $3.12 a ton extra. Sir James Marwick, Town Clk.

IRRIGATION.

GERING, NEB.—Bids are asked until Oct. 8 for enlarging the Mitchell irrigation district canal, about 28,000 cu. yds. of material to be removed, according to reports. L. L. Raymond, Secy.

EVANSTON, WYO.—Asst. State Engr. C. Johnston has surveyed sites for reservoirs in Uinta county, to supply water to the ranches. A dam will be constructed near Iron Mountain 30 ft. high and 570 ft. long, another 20 ft. high and 430 ft. long and a reservoir on Horse Creek to cover about 10 acres. State Engineer Elwood Mead, Cheyenne, will examine the water rights claims.

BEAUMONT, TEX.—The Pine Island Irrigation & Canal Co., Beaumont, has awarded Contractor Jenkins a contract for a canal, including 300,000 cu. yds. of excavation, 3,800 yds. of flue work, boxing drains, etc.

ALBUQUERQUE, N. MEX.—J. B. Quigley & Co. will put in dams, reservoirs and ditches for irrigating their property, according to reports.

NEW COMPANIES.—Poso Canal & Irrigation Co., Bakersfield, Cal.; $100,000; H. E. Phillips, E. Browns, Spotteswood; E. O. Miller, J. G. Knox, Visalia.

Meadow Irrigation Co., Meadow, Utah; $7,128; Edwin Stott, John Nield, H. G. Lahrum, James M. Stewart and S. M. Smith.

Bingham Irrigation & Falls Co., Idaho Falls, Ida.; $50,000; to build a canal for irrigation and power purposes and a dam 12 ft. high across Snake River. Plans are being prepared by Charles Chapin, and work is to be commenced at once.

Mill Creek Reservoir Co., Woodside, Mont.; $5,000; to construct irrigation ditches to irrigate lands of the west side of Bitter Root River and to generate power to run mills; C. J. Moore, O. L. Kenney and others.

Lamar & Arkansas Ditch Co., Lamar, Colo.; $10,000; to irrigate in Bent and Prowers counties, and to control the Colorado & Kansas canal; Charles Maxwell, Adam Maxwell and C. C. Goddard.

Granite Reservoir & Irrigation Co., Salt Lake City, Utah; A. Brand, J. Boyce, A. W. Thompson and others.

Big Pine Irrigation Co., Big Pine, Cal.; $4,000, with $2 615 paid in; to store water for irrigation, etc.; Louis Schalten, Edward Reinhackle, C. L. Meyers, John W. McMurry and J. C. Crocker.

Calcasieu Irrigation & Rice Milling Co., Alexandria, La.; $500,000; to construct canals from Kinder to the Calcasieu River, to irrigate about 40,000 acres; W. F. Blackman, G. W. Bolton, E. J. Hardtner, A. Alberton, H. S. G. Gossens, J. S. Sullivan, Joseph Levinall, of Alexandria, and G. O. Elms, of Opelousas.

Northwestern Irrigation Co., Kalispel, Mont.; $12,000; Joseph Frederickson, L. H. Bradburn and U. P. Shenfeldt.

SEWERAGE.

SOMERVILLE, MASS. — The aldermen have voted to build a separate house drainage system from the Poplar St. connection of the Metropolitan system; estimated cost, about $20,000. Aldermen Lamont and Kilmer may be addressed.

SPRINGFIELD, MASS.—The sewer committee has been asked to recommend the construction of a new sewer in Oak St., Indian Orchard, to cost about $8,000.

PROVIDENCE, R. I.—Bids are asked until Oct. 7 for constructing about 1,520 ft. of 60, 48 and 36-in. brick sewer. Comr. Pub. Wks., Robt. E. Smith.

NORFOLK, CONN.—This place is reported to have voted to issue $10,000 in bonds for new sewers.

ALBANY, N. Y.—Bids are asked until Oct. 17 for constructing sewers in four streets, and also for improving the drainage of Knox St. Clk. Bd. of Contract, Thos. J. Lanahan.

NEWBURG, N. Y.—The question of building a sewer in First St. is being considered. Aldermen Brown and Bullis may be addressed.

NEW YORK, N. Y.—Bids are asked by the department of sewers, 265 Broadway, until Oct. 19, for constructing a temporary private sewer in 18th Ave., between 57th and 75th Sts., for the drainage of the Disciplinary Training School.

WATERTOWN, N. Y.—The council has been petitioned to build a sewer in Washington St.

CAMDEN, N. J.—Bids are asked by the city clerk until Oct. 10 for building a sewer in Federal St.

NEWARK, N. J.—It is stated that Alexander Potter, 137 Broadway, New York, has submitted a report on the proposed trunk sewer system to tide water. It will be for the use of Newark, Irvington, Millburn and South Orange. It is reported that the system will cost, including the right of way, about $109,000. Chn. Joint Sewer Com., Robt. S. Sinclair, South Orange.

NEWARK, N. J.—Jos. D. Alessio has been awarded the contract for building the East Branch lateral sewers, at $12,951.

PASSAIC, N. J.—Bids are asked until Oct. 15 for constructing a 15-in. pipe sewer in Madison St. Chn. Com., Cornelius Kievitt.

STOCKTON, N. J.—It is proposed to build a 5-ft. brick sewer in Federal St., from Cooper Ave. to Cooper Creek; estimated cost, $7,500.

WOODBRIDGE, N. J.—Bids are asked until Oct. 10 for constructing sewers, as described in our advertising columns. Engr., C. C. Hommann, Perth Amboy, N. J.; Chn. Com., E. W. Christie.

ALLEGHENY, PA.—Bids are asked until Oct. 7 for constructing sewers and for paving in several streets. Dir. Pub. Wks., Robt. McAfee.

PITTSBURG, PA.—Bids are asked until Sept. 6 for constructing sewers and for paving, grading, etc., in a number of streets. Dir. Pub. Wks., Edward M. Bigelow.

SOMERSET, PA.—It is stated that this borough will issue $20,000 in bonds for a system. Secy. Council, R. E. Myers.

PRINCESS ANNE, MD.—The town commissioners are considering the question of extending the system.

COLUMBIA, S. C.—W. B. Smith Whaley, Chn. Com.; W. J. Murray and Robt. W. Shands are on the committee to let contracts for building the proposed system and the water-works. It is probable bids will be asked soon.

BUCYRUS, O.—The committee has recommended the construction of sewers in Elm and Prospect Sts.

DAYTON, O.—Bids are asked until Oct. 6 for building a storm water sewer in Loraine Ave. Pres. Bd. City Affairs, J. L. Baker.——Bids are also asked until Oct. 12 and 17 for storm water sewers in two streets.

GLENVILLE, O.—Bids are asked until Oct. 26 for the purchase of $21,000 of 6% sewer bonds. Mayor, Robt. C. Wright; Clk., I. C. Farley.

MARION, O.—Bids are asked until Oct. 7 for building 1,475 ft. of 15-in. pipe sewer. Cy. Clk., Jas. I. Beatty.

INDIANAPOLIS, IND.—Bids are asked until Oct. 12 for building a local sewer in La Salle St. Chn. Bd. Pub. Wks., M. A. Downing.

SHERIDAN, IND.—Specifications have been prepared for constructing about 3,800 ft. of 24 to 12-in. pipe sewers in 4th St. Engr., J. A. Nutchell; Pres. Bd. Trustees, Jas. E. Starbuck.

CHICAGO, ILL.—The engineering commission has completed its plans for the 95th St. sewer system by which the Calumet district is to be drained. It is understood that the plans contemplate an outlay of from $1,500,000 to $2,000,000. In view of the fact that there is at present a large number of workmen in this city out of employment, Mayor Harrison is anxious to have the work under way during the winter. L. E. McGann, Comr. Pub. Wks.

BELOIT, WIS.—Bids are asked until Oct. 11 for constructing sewers in several streets. Chn. Bd. Pub. Wks., E. S. Greene.

BURLINGTON, IA.—Bids are asked until Oct. 17 for constructing the foundation of the outfall of the Valley St. sewer; excavating about 1,000 cu. yds., riprap about 800 cu. yds., Portland cement concrete about 500 cu. yds., piling about 8,000 lin. ft.; check, $800. Cy. Engr., Emmet Steece.

CLINTON, IA.—Bids are asked until Oct. 11 for constructing 36 to 10-in. pipe sewers in several streets. Cy. Clk., W. E. Russell.

COLUMBIA, MO.—R. K. Roberts, Cy. Clk., writes us that the proposition to issue $25,000 in bonds for a system was defeated Sept. 27.

INDEPENDENCE, MO.—S. H. Woodson, Mayor, writes us that a proposition for building sewers in this city will be voted upon within 50 days. Engr., Andrew Rosewater, Bee Bldg., Omaha, Neb.; Cy. Engr., H. M. Pendleton.

DENVER, COLO.—The board of public works has adopted plans for a system in Capitol Hill storm sewer District No. 1; estimated cost, $400,600. It is expected that work will be begun soon and that the system will be completed by Oct. 1, 1900. Engr., H. C. Lowrie.

VICTOR, COLO.—M. Donovan has been awarded the contracts for building a system at $57,980, according to reports.

GRASS VALLEY, CAL.—Geo. L. Nusbaumer, Oakland, Cal., has submitted a report and estimates for a system to cost about $37,000. Cy. Surv., Fred. M. Miller.

LONG BEACH, CAL.—It is proposed to construct a system at a cost of about $25,000. Mayor Johnson may be addressed.

LOS ANGELES, CAL.—Plans have been approved for a sewer in the Arroyo de los Posos district; estimated cost, $10,000.

GANANOQUE, ONT.—The question of building a system and water-works is being considered. Mayor, W. B. Carroll; Geo. Taylor, Dr. E. L. Atkinson and J. F. Green are on the committee.

GARBAGE DISPOSAL—STREET CLEANING

LANSINGBURG, N. Y.—Adolph C. Sorensen has been awarded the contract, at $1,872, for removing the refuse from the streets for one year, beginning Oct. 1.

ATLANTIC CITY, N. J.—Bids were asked until Oct. 3 for constructing a Smith-Siemens garbage crematory. Engr., M. V. Smith; Chn. Com., S. H. Kelly; Clk., E. D. Irelan.

CLEVELAND, O.—Bids are asked until Oct. 3 for furnishing the apparatus and for removing the ashes, soot, debris, etc., from the Fairmount and Division St. pumping stations for one year. Dir. Pub. Wks., Geo. R. Warden.

BAY CITY, MICH.—The Sanitary Garbage Co. has been granted a license to collect kitchen refuse.

OMAHA, NEB.—The question of purchasing a road scraper and a street sweeper is being considered. Alderman Barrett may be addressed.

KANSAS CITY, MO.—It has been decided to build a garbage dump at a cost of about $2,300. Supt. of Bldgs., Wallace Love.

STREETS AND ROADS.

GLOUCESTER, MASS.—The committee has recommended the purchase of a new road roller to cost $3,500, according to reports.

NEWBURYPORT, MASS.—Bids are asked until 12 m., Oct. 6, for constructing 4,600 lin. ft. of highway. T. C. Mendenhall, Chn. State Highway Comn., Boston.

WOBURN, MASS.—An ordinance has been presented to the council to appropriate $6,500 for macadamizing.

WICKFORD, R. I.—This place has appropriated $15,000 for macadamizing.

NEW LONDON, CONN.—Bids are asked until Oct. 15 for improving Ocean Ave.; surety, $1,000. Geo. K. Crandall, Cy. Surveyor; Peleg Williams, Chn. Com.

AUBURN, N. Y.—E. H. Herrling, Cy. Clk., informs us that a contract has been awarded to the Warren-Scharf Asphalt Paving Co., New York, at $1,750 for 1,015 sq. yds. of asphalt, as a sample.

GREECE, N. Y.—John Paine informs us that plans have been secured for the improvement of the Ridge road, but have not yet been submitted to the board of supervisors.

KINGSTON, N. Y.—John T. Cummings, Cy. Clk., informs us that the question of paving 5,000 sq. yds. with asphalt, at an estimated cost of $10,000, will be reported favorably by the street committee, provided that the adjacent property owners sustain 75% of the cost. W. Klingberg, Cy. Engr.

NEW YORK, N. Y.—Bids are asked until Oct. 13 for paving the carriageway at 59th St. and Fifth Ave. with asphalt. Geo. C. Clausen, Comr. Parks, Arsenal, Central Park.

PORT CHESTER, N. Y.—Bids are asked by the village trustees until Oct. 10 for the purchase of $42,000 of 3½% street paving bonds.

POUGHKEEPSIE, N. Y.—A petition has been presented to the board of public works for Trinidad sheet asphalt paving on North Clover St., for 760 ft.

SCHENECTADY, N. Y.—The council has fixed the cost of the proposed Albany St. paving. at $26,868.

YONKERS, N. Y.—The Barber Asphalt Co., New York, has been awarded a contract by the council, at $37,143, for paving on South Broadway with sheet asphalt.

ELIZABETH, N. J.—Peter Bonnett, P. Egenolf, Joseph McManus, Fred. C. Marsh and H. H. Isham have been appointed a committee to consider the question of paving the city streets with asphalt, according to reports.

PLAINFIELD, N. J.—An ordinance will be introduced in the council Oct. 7 for asphalt paving on Park Ave., Watchung Ave., Front St. and Somerset St.; estimated cost, about $24,395. Elliot T. Barrows, Chn. Com.

RIVERTON, N. J.—Bids are asked until Oct. 6 for constructing sidewalks on portions of Lippincott Ave. Edward Stoughton, Mayor; Chas. S. Walnut, Borough Clk.

ALLEGHENY, PA.—Bids are asked until 2 p. m., Oct. 7, for grading and paving Pennsylvania Ave., between Allegheny Ave. and Beaver Ave. Robt. McAfee, Dir. Dept. Pub. Wks.

OAKMONT, PA.—Bids were received Oct. 5 for the purchase of $65,000 of 4% street improvement bonds. Albert McGee, Pres. Council; W. A. Tomlinson, Clk.

PHILADELPHIA, PA.—The bureau of highways has asked for an appropriation of $1,497,588 for the year 1899.

RANKIN, PA.—Reports state that new bids will be asked by the council for paving Bell Ave; Ott Bros., Pittsburg, to whom the contract was awarded, at $3,885, have withdrawn.

SHARPSBURG, PA.—Bids are asked until Oct. 18 for the purchase of $60,000 in 4% street improvement bonds. Geo. D. McMorran, Chn. Finance Com.

YARDLEY, PA.—The Delaware River Quarry & Construction Co., Philadelphia, has been awarded a contract, at $5,475, for about 7,000 sq. yds. of macadam on Main St.

WILMINGTON, DEL.—Bids are asked until 7 p. m., Oct. 6, for grading and laying cement walks in the 8th St. Park. Henry R. Smith, Chn. Park Com.

ANNAPOLIS, MD. — The county commissioners have awarded a contract to Joseph M. Bryan, Baltimore, at $2,399, for about three-fourths of a mile of gravel road.——The council has appropriated $12,000 to pave Prince George St. with brick. L. J. M. Boyd, Frank H. Stockett, D. O. Parlett, Com.

OAKLAND, MD.—Reports state that the council will issue $25,000 in bonds for street improvements, and an electric light plant.

LEESBURG, VA.—It is reported that the Leesburg & Point Rocks Turnpike Co. has awarded a contract to Frank E. Conrad, Winchester, Va., at $6,000, for improving the road between Leesburg and Limestone.

PIEDMONT, W. VA.—Bids are asked by the council for brick paving in Childs Ave., according to reports.

ATLANTA, GA.—Bids are asked until Oct. 28 for furnishing and constructing asphalt brick or stone paving at the county jail yard. Grant Wilkins, Engr., 9½ Peachtree St.; Walter R. Brown, Chn. County Comrs.

NEW ORLEANS, LA.—Bids are asked until Oct. 10 for paving a portion of Canal St. with asphalt and brick. W. S. Douglass, Comptroller.

CLEVELAND, TENN.—J. I. Harrison, County Clk., informs us that the question of issuing bonds for new roads, etc., may be considered by Jan. 1.

BRIDGEPORT, O.—Reports state that the proposition to issue $60,000 in bonds for paving, is again to be voted upon.

CLEVELAND, O.—Bids are asked until Oct. 14 for grading, etc., and brick paving on seven streets. Geo. R. Warden, Dir. Pub. Wks.

CLEVELAND, O.—Bids are asked until Oct. 28 for grading, draining, curbing and brick paving in Scott and six other streets. Geo. R. Warden, Dir. Pub. Wks.

HAMILTON, O.—L. A. Dillon, Cy. Engr., has submitted plans for the proposed macadamizing of North 3d St.; estimated cost, $32,288. The plans have been referred to the committee on public improvements.

MARSHALL, O.—Resolutions have been passed to pave portions of Lafayette Ave., Jefferson Ave., North St. and Arrow St. with Trinidad asphalt. Jno. G. Miller, Mayor; A. R. James, Cy. Clk.

ZANESVILLE, O.—Bids are asked until Oct. 8 for furnishing material and grading and paving Luck Ave., from Abington Ave. to Belknap St. C. N. Bainter, Cy. Clk.

INDIANAPOLIS, IND.—A hearing will be given Oct. 17 to consider the proposed improvement of portions of Southerland Ave., 27th St., Miami St. and College Ave., by constructing new sidewalks, grading, paving, etc. M. A. Downing, Chn. Bd. Pub. Wks.

LOGANSPORT, IND.—Bids are asked until Oct. 17 for furnishing the material and for excavating, grading and asphalt paving on 8-in. concrete base, on Market St.; surety, $500. A. D. Fansler, Cy. Clk.

GRAND RAPIDS, MICH.—The board of public works has awarded a contract to Albert Prange, at $7,233, for improving Lyons St., and to Rens & Hoogerhyde, at $3,790, for improving Grand Ave.

BLOOMINGTON, ILL.—Bids are asked until 12 m., Oct. 6, for furnishing and constructing pavement in one alley. C. F. Koch, Pres. Bd. Local Improvements.

WATERTOWN, WIS.—H. Mulberger, Mayor, writes us that bids for paving five blocks of Main St. with brick were opened Sept. 17. Only two bids were received, which, owing to irregularities in each and to the high figure, $4.80 a lin. ft., front, including curbing, were not accepted. It is apparently the intention of the council to increase the proposed amount of paving to 15 blocks, for which the contract will be awarded early next spring.

ST. PAUL, MINN.—L. W. Rundlett, Cy. Engr., has submitted estimates to the board of public works for the proposed paving in East Seventh St.; with asphalt, $35,710; sandstone, $37,400; brick, $30,655. The contract will be awarded some time between Feb. 1 and April 1.

FARGO, N. DAK.—J. A. Johnson, Mayor, writes us that it is proposed to pave 80,000 sq. yds. with cedar block,at $1.06 per sq. yd. Bonds will be issued, bearing 7%, due on or before Jan. 1, 1910, and to be retired at any time after Jan. 1, 1902. S. F. Crabbe, Cy. Engr.

ST. LOUIS, MO.—Bids are asked until Oct. 14 for maintaining the natural rock asphalt pavement on Olive St., between Grand Ave. and Vandeventer Ave. Robt. E. McMath, Pres. Bd. Pub. Wks.——A hearing will be held Oct. 14 to consider petitions for improvements in 14 alleys and 18 streets; estimated cost, $189.520. Emory S. Foster, Secy. Bd. Pub. Wks.

FORT WORTH, TEX.—The city engineer has been instructed to estimate the cost of different materials for paving in Main, Houston and Cross Sts.

SHERMAN, TEX.—C. P. Gregory, Chn. St. Com., informs us that no money has yet been appropriated for the proposed paving.

PORTLAND, ORE.—The council proposes to grade portions of six streets. A. N. Gambell, Auditor.

OAKLAND, CAL.—A contract has been awarded to Hillhouse & Reardon to pave Clay St. with bitumen, from Seventh St. to San Pablo Ave.

SAN FRANCISCO, CAL.—The street committee has decided to pave 15 blocks with bitumen.

WINDSOR, ONT.—John Bairs, Mayor, informs us that no steps have been taken towards asphalt paving, as stated in our issue of July 21.

MEXICO, MEX.—The Mexican Asphalt Pavement Co. has been awarded a contract for about 36,000 sq. yds. of sheet asphalt paving on the streets of the Paseo Land & Improvement Co.

MANUFACTURING PLANTS.

OTIS, ME.—It is reported that Whitcomb & Haynes, of Elkworth, Me., will erect a mill this fall at the foot of Floods Pond.

WEYMOUTH, MASS.—The Bradley Fertilizer Co.'s works at Weymouth were damaged by fire, Sept. 28, causing a reported loss of $500,000. Insurance was as follows: $85,000 on the building, $53,000 on the machinery and $107,000 on the stock.

HARRISON, N. J.—A fire in this city, Sept. 28, destroyed the leather factory of Hahn & Stumpf, at Warren and Jersey Sts., causing an estimated loss of $70,000. The plant consisted of a dozen 2-story frame buildings, and contained considerable machinery.

LUZERNE, PA.—The foundry of J. T. Snyder, at Bennet Station, was recently destroyed by fire, causing a loss of about $12,000.

PARKERSBURG, W. VA.—The sawmill, dryhouse and lumber yard of Kreps & Pope, situated several miles east of this city, were totally destroyed by fire. Loss, $20,000; insurance, $4,000.

ANDERSON, S. C.—It is reported that efforts are being made to organize a company, with a capital stock of $125,000, to erect a new cotton mill in this city. Among those interested are: R. S. Hill, Pres. of Farmers' & Merchants' Bank; J. R. Vandiver, Dr. S. M. Orr and Geo. M. Evans.

LOUISVILLE, KY.—The Callahan & Sons Grain Co. has been granted a permit to erect a grain elevator at 13th and Lexington Sts., to cost $14,500.

CINCINNATI, O.—The Lodge & Shipley Machine Tool Co., of Cincinnati, informs us that all the contracts, except for brick and carpentry work, have been let, including engines, boilers and electric plant.

PAINESVILLE, O.—The Robison Basket Co., of this city, informs us that it has erected a temporary building to replace the one destroyed by fire on Aug. 7, causing a loss of over $100,000, and that from 23,000 to 25,000 grape baskets are now manufactured daily. Pres., Jas. T. Robison.

BEDFORD, IND.—Reports state that the Portland Cement Co., of Utah, has leased oolithic limestone lands near Bedford, and will erect a $125,000 plant.

CHEBOYGAN, MICH.—Thompson Smith's Sons, sawmill, at Duncan City, a suburb of Cheboygan, was damaged by fire Sept. 26, causing a loss of about $125,000; insurance, $60,000.

ENSLEY, ALA.—It is reported that the Riter-Conley Co., of Pittsburg, has contracted to erect ten 50-ton "Wellman" rolling furnaces for an open-hearth steel furnace plant for the Alabama Steel & Shipbuilding Co., at Ensley.——We are informed that the Tennessee Coal, Iron & R. R. Co., who operate foundries at Birmingham, Ala., and at South Pittsburg, Pa., is about to erect a new foundry, 240 × 80 ft., at Ensley, to do its own work. Vice-Pres., J. Bowron, Birmingham, Ala.

CUMBERLAND, WIS.—The plant of the Beaver Dam Lumber Co., including mill, yards and contents, was totally destroyed Sept. 29, causing a reported loss of $150,000.

HOPE, KAN.—It is reported that the Kansas Cement Co. is making arrangements to double its present capacity. Mgr., Major H. B. Merrell.

CARTHAGE, MO.—The elevator of McDaniel & Morrow was burned Sept. 24, causing a loss to the building of $30,000.

CRIPPLE CREEK, COLO.—It is proposed to build a hot water heating plant for supplying heat to the buildings in this city, to cost about $100,000.

BELLEVILLE, ONT.—The council has decided to offer a $50,000 bonus to F. A. Mitchell, of Norwich, Conn., to have him remove his rolling mills to this city.

GAS PLANTS.

SHIPPENSBURG, PA.—Reports state that J. H. Miller, McKeesport, Pa., has leased the works of the Shippensburg Gas Co., and will improve the plant.

FLORENCE, ALA.—Reports state that the Florence Gas Light & Fuel Co. will enlarge its plant and lay several thousand feet of additional mains. A proposition has been made to the council to furnish 65 additional street lights.

SANTA ROSA, CAL.—The Santa Rosa Lighting Co. will extend the gas pipe line on East Fourth St., from McDonald Ave. to St. Helena Ave., and on Cherry St., from Beaver to King St.

GALT, ONT.—The council has decided to purchase the plant of the Galt Gas Light Co., according to report.

NEW COMPANIES.—Seneca Oil Co., Salamanca, N. Y.; $144,000; to produce petroleum oil and gas; Edward B. Vreeland, Salamanca, and others.

Hope Natural Gas Co., Oil City, Pa.; $500,000, with $200,000 paid in; to produce, pipe and sell natural gas; E. Strong, John Tonkin and H. McSweeney, of Oil City, Pa.; C. N. Payne and Robert S. Hampton, of Titusville, Pa.

MISCELLANEOUS CONTRACTS.

TELEPHONE SYSTEM.—Jackson, Mich.—The New State Telephone Co. has been granted a franchise in this place.

DAM.—Middletown, O.—The state dam will be repaired, at an estimated cost of $4,350. Chas. Hayman, Supt. Canals, Columbus.

TELEPHONE SYSTEM.—Bordentown, N. J.—The council has granted a franchise to the Bordentown Telephone & Telegraph Co.

TELEPHONE SYSTEM.—St. Paul, Minn.—The Mississippi Valley Telephone Co. has been granted a franchise to operate in this city.

STEAM TENDER.—Louisville, Ky.—Bids are asked until Oct. 29 for constructing a steam tender. Capt. Geo. A. Zinn, U. S. Engr., Louisville.

TELEPHONE LINE.—Elyria, O.—A new telephone line will be constructed between Lorain and Elyria, by the Ohio Toll Line Co., according to reports.

WALL.—Atlanta, Ga.—Bids are asked until Oct. 28 for building a brick and stone wall and for the material for the county jail enclosure. A. L. Kontz, County Clk.

BULKHEAD. — Stockton, Cal. — Bids are asked by the board of public works for constructing a bulkhead 110 ft. long at the wharf of the Navigation & Improvement Co.

JETTY.—Stockton, Cal.—State Engineer Randall is preparing plans for a jetty 1,500 ft. long and 125 ft. wide, at the mouth of the San Joaquin River, according to reports.

CHANNEL.—Waterbury, Conn.—R. A. Cairns, Cy. Engr., writes us that the following bids were received Sept. 24, 1898, for dredging a channel in Little Brook; all local bidders; Chatfield & Chatfield awarded contract:

Quantities.		Chatfield & Chatfield.	Gaffney & Martin.	Edw. McManus.
6 × 5½-ft. conduit.*	215 lin. ft.	$17.25	$25.00	$17.00
6 × 4½-ft. conduit*	200 " "	15.25	21.00	16.75

PARK.—Philadelphia, Pa.—Chief Eisenhower, Bureau of Pub. Property, City Hall, is receiving estimates on plans, etc., for a new city park, to be located at Allegheny Ave., Wellington, Ellwood and Belgrade Sts. A fountain will be erected in the center and other work will include grading, walks, paving, curbing, etc.

TELEPHONE SYSTEM.—Thomasville, N. C.—The Thomasville Telephone Co., with a capital stock of $6,000, has been incorporated by F. S. Lambeth, J. W. Lambeth, C. A. Julian, J. F. Haden, W. E. Evans, R. W. Thomas, C. R. Thomas, W. M. Morton, A. Johnson, J. B. Boone and J. A. Green, to erect a telephone system in Thomasville and Davidson county.

PARK WORK.—Philadelphia, Pa.—The commissioners have asked for an appropriation of $561,000 for the maintenance of Fairmount Park for the coming year, which will include a new east shore drive, $50,000; dredging the Schuylkill River, $25,000; sprinkling drives, etc., $20,000; macadamizing, $10,000; electric lighting, gasoline and naphtha lamps, $42,300; electric lights in the East,West and Wissahickon sections, $32,300; etc.

CONTRACT PRICES.

STONE JETTIES.—Green Harbor, Mass.—Frederick N. Wales, Clk. Bd. Harbor and Land Comrs., Room 131, State House, Boston, writes us that the following bids were received Sept. 22, 1898, for constructing stone jetties at Green Harbor, as advertised in Engineering News: Thos. A. Rowe, 209 Washington St., Boston, $1.47 a ton; Simon Hess, 28 Bond St., New York, $1.44; Rockport Granite Co., 31 State St., Boston (awarded contract), $1.19; Keyes & Daloia, 12 Marion St.,Charlestown, $1.49; Pigeon Hill Granite Co., Rockport, Mass., $1.65; S. & E. S. Belden, Hartford, Conn., $1.63.

WATER PIPE, ETC.—Nashville, Tenn. — F. E. Kuhn, Secy. Bd. Pub. and Affairs, writes us that the following bids were received Sept. 27, 1898, for furnishing cast-iron water pipe, pig lead, valves and hydrants; 6-in. water pipe, 250 tons:

	A ton.
Addyston Pipe & Steel Co., Cincinnati	$17.00
R. D. Wood & Co., Philadelphia	21.00
Ohio Pipe Co., Columbus, O.	18.08
Dennis Long & Co., Louisville	16.34
*Keith, Simmers & Co., Nashville	14.75

*Agents for the Chattanooga Pipe Works, awarded contract.

Pig Lead, five tons.	A 100 lbs.
Clark & Knight, Nashville	$4.29½
Keith, Simmers & Co., Nashville	4.29½
National Lead Co., Louisville, Ky.	4.40
N. O. Nelson Mfg. Co., St. Louis	4.30
L. M. Rumsey Mfg. Co., St. Louis (accepted)	4.25
6-in. Valves, 25.	Each.
Keith, Simmers & Co., Rensselaer valve	$12.00
Keith, Simmers & Co., Ludlow valve (accepted)	11.24
Ludlow Valve Mfg. Co., Troy, N. Y.	11.25
Fire Hydrants, 25.	Each.
R. D. Wood & Co., Philadelphia	$17.84
Michigan Brass & Iron Works, Detroit (accepted)	16.40
Geo. S. Parks & Co., Agents	22.00

MASONRY DAM.—Hyde Park-on-the-Hudson, N. Y.—We are informed that the contract for building an uncoursed rubble stone masonry dam set in Knickerbocker Portland cement mortar has been let to D. Cuozzo, 150 Nassau St., New York, at $9.08 a cu. yd. Engr., Owen Morris, Hyde Park.

STREET CLEANING.—Los Angeles, Cal.—T. J. Zeehandelaar, Secy. Merchants' & Manufacturers' Association, writes us the contract for the street cleaning has been awarded to Franklin & Alexander, 201 Currier Bldg., Los Angeles, at 14½ cts. a 1,000 sq. yds. The life of the contract is from Nov. 21, 1898, to July 1, 1901. The area covers about 15 miles of asphalt paved streets; the work to be done daily by machine. In addition to the contract let the city will sweep the business portion of town (76,942 sq. yds.) by hand every day during business hours, the work to be done under the direction and supervision of the street superintendent. Local papers state that the following were the bids received Sept. 12, 1898, for the street cleaning: Specifications A being for machine sweeping of the entire city, specifications B for hand-sweeping the business section of the city, and specifications C for machine sweeping of all paved streets not included under B: H. R. Tibbets, specifications A, 23½ cts. a 1,000 sq. yds.; C. A. Potter, specifications A, 26½ cts. a 1,000 sq. yds.; Franklin & Alexander, specifications A, 14½ cts. a 1,000 sq. yds.; specifications B, 55 cts. a 1,000 sq. yds.; specifications C, 18½ cts. a 1,000 sq. yds.; Ramish & Marsh, specifications A, 21 cts. a 1,000 sq. yds.; B, 55 cts. a 1,000 sq. yds., C., 21 cts. a 1,000 sq. yds.; W. I. Hollingsworth, specifications A, class 1, 26 cts. a 1,000 sq. yds.; class 2, 28 cts. a 1,000 sq. yds.; class 3, 30 cts. a 1,000 sq. yds.; specifications B, to furnish 20 men with hand brooms and shovels, besides the necessary men to sprinkle the roadway and remove dirt, for 59 cts. a 1,000 sq. yds.; specifications C, 31 cts. a 1,000 sq. yds.

ELECTRIC LIGHT PLANT.—Grand Rapids, Mich.—The following bids were received Sept. 20 for furnishing the machinery, etc., and for building a plant, as advertised in Engineering News; in total bids for boilers all are for Hawley furnaces, except the Arbuckle-Ryan Co.; Engrs., Nagle & Ball, New York Life Bldg., Chicago, Ill.; Pres. Bd. Pub. Wks., Wm. T. Johnston; Secy., Fred A. Twamley:

BIDS RECEIVED AT GRAND RAPIDS, MICH., SEPT. 20, 1898, FOR MACHINERY, ETC., FOR AN ELECTRIC LIGHT PLANT.

Boilers.

[1] Direct-connected, 460 revolutions. [2] 6.5 ampere dynamo. [3] 9.6 ampere dynamo only. [4] 110 lights. [5] Pole line (proposition 5) without towers, $12,340; cost to make compare with new line, $25,160; total, $37,500. [6] Only 5 dynamos bid on.

Chase Construction Co., Detroit, Mich.—(3) 200-HP. Cahall B. & W. boilers, (2) 600-HP. Russell engines No. 2, (6) 60-K-W. dynamos, 500 arc lamps A-B, pole line construction; total, $89,970; boilers, 200 lbs. extra, $1,050, total, $91,020; B. & W. boilers, extra, $3,243, total, $93,213; Stirling boilers, extra, $935, total, $90,905; triple expansion Russell engine No. 1, $2,400, total, $92,370; (2) 400-HP. compound engine, deduct $3,085, total, $86,885; 6 direct-connected engines extra, $6,490, total, $96,460. The Chase company secured the contract at $89,970. N. Y. Finance & Construction Co., New York.—(3) 233-HP. automatic engines, 240 revolutions; (4) 150-HP. Parkhurst compound boilers, steam piping, (6) 125-light dynamos, foundations, belts, crane and scales; total, $55,600. Arbuckle-Ryan Co.—Bid No. 1.: (2) 600-HP. triple engines, (3) 200-HP. Stirling boilers; total, $35,000; bid No. 2.: (2) 600-HP. compound engines, (3) 200-HP. Stirling boilers; total, $32,600; bid No. 3.: (2) 400-HP. compound engines, (3) 200-HP. Stirling boilers; total, $29,600.

LAYING WATER PIPE.—Lynn, Mass.—The following contract was let by the Metropolitan Water Board, Boston, Sept. 15, 1898, to O'Rourke & Nelson, Boston, for laying cast-iron pipe in Lynn: Laying 16-in. cast-iron pipe, 12,200 lin. ft., 65 cts.; laying 12-in. cast-iron pipe, 2,800 lin. ft., 45 cts.; laying 4-in. cast-iron pipe for blow-offs, 200 lin. ft., 25 cts.; excavation—rock, above grade, 25 cu. yds., $2.00; rock, below grade, 10 cu. yds., $3.50; earth, below grade, 10 cu. yds., 50 cts.; setting air valves, 5 valves, $1.50 each; chambers for valves less than 20 ins. diameter and air valves, 19 chambers, $20.00 each; concrete masonry, 10 cu. yds., $2.50; total, $9,743.

ARC LIGHTING.—Peoria, Ill.—Robt. M. Orr, Cy. Clk., writes us that the contract for lighting the city for two years from Nov. 1, with 400 2,000-c. p. arc lights has been renewed with the Peoria General Electric Co. at $98 a light a year; the service to be all night and every night.

QUAY WALL.—San Francisco, Cal.—We are informed that the following bids were received Sept. 24, 1898, by Mordecai T. Endicott, Ch. Bureau of Yards and Docks, Washington, D. C., for building an extension to the quay wall at the Mare Island Navy Yard, San Francisco:

Bidder.	A lin. ft.	Total.	Length wall.
T. Thomson, San Francisco	$72.00	$24,552	341 ft.
J. A. McMahon, San Francisco	70.75	24,126	341 "
Johnson & Petersen, Oakland	79.40	30,966	390 "
W. H. Healy, San Francisco	68.45	26,696	390 "
Cal. Bdg & Constn Co, Oakdale	.....	29,969	...
San Francisco (Cal.) Bridge Co.	81.10	27,655	341 "

ASPHALT PAVING.—Louisville, Ky.—The Southwestern Alcatraz Co. submitted the lowest bid Sept. 27 for asphalt paving at $18 and $17.50 a sq. of 100 ft., 5-year guarantee, and at $24 and $23 a sq., 10-year guarantee.

BRICK PAVING.—Scranton, Pa.—The following bids were received in councils Sept. 22, 1898, for paving a portion of Dix Court with vitrified brick on a 6-in. concrete base: V. H. O'Hara, Scranton, Pa., $1.73 a sq. yd. for pave, 47 cts. a lin. ft. for straight curb, 83 cts. a ft. for circular curb, 15 cts. a lin. ft. for resetting curb; M. J. Ruddy, Scranton, $1.75 a sq. yd. for pave, 49 cts. a lin. ft. for straight curb, 85 cts. a lin. ft. for circular curb; W. S. Langstaff, Jr. and Thos. J. Hughes, Scranton, Pa., $1.88 a sq. yd. for pave; 47 cts. a lin. ft. for straight curb, 82 cts. a lin. ft. for circular curb. Joseph P. Phillips, Cy. Engr.

LEVEE WORK.—Marysville, Cal.—The levee commissioners awarded the following contracts Sept. 15, 1898, for levee work near Marysville: Jacob Schimpf, sections 1, 4 and 5, for 3,667 cu. yds., at 22½ cts.; 3,596 yds., at 19c.; 3,941 yds., 18c, respectively. Willis, O'Brien & Ruff, section 2, 4,549 cu. yds., 19½ cts.; John Lopez, section 3, 602 cu. yds., 17½ cts. Work will be commenced at once.

ASPHALT PAVING.—Chicago, Ill.—The Barber Asphalt Paving Co. has been awarded the contract, at $2.15 a sq. yd., for asphalt paving in North Clark St. and in North State St. The work is to be completed Oct. 31 and Nov. 30, respectively, for each street.

SIDEWALKS.—St. Paul, Minn.—The following were the only bids received by the board of public works for removing about six miles of old wooden sidewalks and laying cinder and gravel walks: Nicholas Feyen, 15.7 cts. a lin. ft., grading, 30 cts. a cu. yd.; Fielding & Shefley, 10 cts. a lin. ft., grading 15 cts. a yd.

ENGINEERING MATERIAL PRICES.

TRACK MATERIALS—
New York—Angle bars, 1.05 cts. to 1.10 cts.; spikes, 1.40 cts. to 1.50 cts.; track bolts, hexagonal, 1.80 cts. to 1.85 cts.; square, 1.60 cts. to 1.75 cts.
Chicago—Angle bars, 1.10 cts. to 1.15 cts.; spikes, 1.55 cts. to 1.60 cts.; track bolts, hexagonal, 1.90 cts. to 2.00 cts.; square, 1.80 cts. to 1.90 cts.

RAILS, STEEL—
New York, new, $18.00 to $19.00; old iron, $11.00 to $11.50; old steel $9.00.
Chicago, new, $20.00 to $22.50; old iron, $12.50 to $12.75; steel, $7.75 to $8.50.
Pittsburg, new $18.00 to $19.00; old iron, $13.50 to $13.75; steel, $10.00.

STRUCTURAL STEEL—
New York—Beams, 1.40 cts. to 1.45 cts.; channels, 1.40 cts. to 1.45 cts.; tees, 1.45 cts. to 1.50 cts.; angles, 1.25 cts. to 1.30 cts.; rivets, 1.75 cts. to 1.85 cts.
Chicago—Beams, 1.35 cts. to 1.50 cts.; channels, 1.35 cts. to 1.50 cts.; tees, 1.40 cts. to 1.50 cts.; angles, 1.30 cts. to 1.35 cts.
Pittsburg—Beams, 1.20 cts. to 1.30 cts.; channels, 1.20 cts. to 1.30 cts.; tees, 1.20 cts. to 1.25 cts.; angles, 1.10 cts. to 1.15 cts.

PLATES AND SHEETS—
New York—Universal mill plates, 1.25 cts. to 1.30 cts.; tank, 1.35 cts. to 1.40 cts.; shell, 1.40 cts. to 1.45 cts.; flange, 1.60 cts. to 1.70 cts.; firebox, 2.25 cts. to 2.50 cts.
Chicago—Universal mill plates, 1.30 cts. to 1.35 cts.; tank, 1.25 cts. to 1.30 cts.; shell, 1.55 cts. to 1.65 cts.; flange, 1.30 cts. to 1.50 cts.; firebox, 1.75 cts. to 4.00 cts.; sheets, 2 cts. to 2.05 cts.
Pittsburg—Universal mill plates, 1.10 cts. to 1.15 cts.; tank, 1.10 cts. to 1.15 cts.; shell, 1.30 cts. to 1.35 cts.; flange, 1.20 cts. to 1.25 cts.; firebox, 1.35 cts. upwards; sheets, 1.90 cts. to 1.95 cts.

MERCHANT STEEL—
Machinery, per lb., 1.60 cts. to 1.70 cts.
Tool, per lb., 5.50 cts. to 7 cts.

IRON—
Pig Iron:
New York—No. 1, $11.25 to $11.50; No. 2, $10.50 to $10.75.
Chicago—No. 1, $11.50 to $12.50; No. 2, $11.00 to $12.00.
Pittsburg—No. 1, $10.50 to $10.75; No. 2, $10.10 to $10.25.
Bar Iron:
New York, common, $1.07½ cts. to 1.10 cts.; refined, 1.15 cts. to 1.20 cts.
Chicago, common, 1.05 cts. to 1.10 cts.; refined, 1.15 cts. to 1.20 cts.
Sheets:
Common American, per lb., 1.45 cts. to 2.55 cts.
Russia, per lb., 10½ cts. to 11 cts.

LUMBER—
New York:
Hemlock timber, 20 ft. and under, per M, $12.00 to $12.50.
Piling, Eastern spruce, 35 to 40 ft., 30 to 40% 12-in. butts, 4¼ cts. to 4½ cts.
Spruce, special cargoes, per M, $15.00 to $17.50.
Yellow pine, random cargoes, $14.50 to $17.00.
North Carolina pine, $2.25 to $2.40 advance over Norfolk rates.
San Francisco:
Oregon pine, per M, $15.50 to $17.50.
Redwood, per M, $18.00 to $20.00.
Redwood tank stock, up to 10 ft., $24.00 to $25.00.

GENERAL MATERIALS—
Lead, New York, 3.90 cts. to 3.95 cts.
Nails, Pittsburg, 1.40 cts.
Solder, per lb., 8¼ cts. to 11½ cts.
Spelter, per lb., 3.90 cts. to 4.00 cts.
Copper ingots, 12.25 cts. to 12.40 cts.
Granite, rough, New York, cu. ft., 40 cts. to 50 cts.
Limestone, New York, cu. ft., 70 cts. to 80 cts.
Ohio freestone, New York, cu. ft., 85 cts. to 90 cts.
Slate, Penn. block, per square, $4.00 to $5.00.
White lead, American, per lb., 5½ cts. to 6 cts.
Lime, common state, per bbl., 70 cts.

◆

INDUSTRIAL NOTES.

THE AMERICAN VITRIFIED CONDUIT CO., New York, has the contract to construct the conduits for the underground wires and cables of the Narragansett Electric Lighting Co., Providence, R. I. Mr. C. J. Field, M. Am. Inst. E. E., 30 Broad St., New York, is the General Manager and Engineer of the former company.

THE ALABAMA BRIDGE AND BOILER CO., Birmingham, Ala., has made an assignment. It is stated that the company had a capital of $12,000.

THE BERLIN IRON BRIDGE CO., East Berlin, Conn., announces that it has secured control of the Melan patent for concrete-and-steel arch bridges in the New England States.

THE ST. LOUIS CAR CO., St. Louis, Mo., has orders for 250 street cars from the Japanese government, according to report, to be shipped within 90 days, and to cost about $300,000.

THE RITER-CONLEY CO., Pittsburg, Pa., manufacturers and builders of blast furnaces, steel plants, iron roofs, buildings, etc., has become an incorporated company under the firm-name of the Riter-Conley Mfg. Co.

LA COMPAGNIE GENERALE DES ASPHALTES DE FRANCE, LTD., known as the General Asphalt Co., has opened an office at 204 Carondelet St., New Orleans, La., in charge of Mr. Alfred F. Harley, Consulting Engineer.

THE GOULD'S MFG. CO., Seneca Falls, N. Y., has of late been awarded contracts for a number of municipal pumping plants, among the latest being orders from St. Mary's, Pa., for a large double-acting triplex power pump, operated by a gas engine, and also at Lanesboro, Minn., Morris, Minn., and some large contracts for Canadian towns.

THE CHAMBERSBURG ENGINEERING CO., Chambersburg, Pa., has orders for four 100-inch hydraulic riveting machines for the Schoen Pressed Steel Co., Pittsburg; a 1,000-ton hydraulic flanging press for the Riter-Conley Co., Pittsburg; a four-ton hammer for the Burgess Steel & Iron Co., Portsmouth, O.; a complete hydraulic riveting plant for the Cleveland Steam Boiler Co., Cleveland, O., and an order for 80 tons of steel castings for a Western foundry.

WATER-WORKS APPLIANCES.—The following exhibits of water-works appliances were made at the meeting of the Central States Water-Works Association at Springfield, O., Sept. 27-9:

General Supplies.—Dayton Supply Co., Dayton, O.; H. Mueller Mfg. Co., Decatur, Ill.

Meters.—National Meter Co., New York city; Thomson Meter Co., Brooklyn, N. Y.; Pittsburg Meter Co., East Pittsburg, Pa.; Neptune Meter Co., New York city; H. R. Worthington, New York city; Hersey Mfg. Co., South Boston, Mass.

Miscellaneous.—Wm. Engberg, St. Joseph, Mich., Automatic Device for Controlling Valves; R. D. Wood & Co., Philadelphia, Pa., Mathews Fire Hydrant; Hoppes Mfg. Co., Springfield, O., Live Steam Feed Water Purifier; Trump Mfg. Co., Springfield, O., Hoppes Meter Box; Lagonda Mfg. Co., Springfield, O., Weinland Boiler Tube Cleaners; Moran Flexible Steam Joint Co., Louisville, Ky., Flexible Joints; Lead-Lined Iron Pipe Co., Wakefield, Mass., Service Pipe; Henry R. Worthington, New York, Pumps; A. P. Smith Mfg. Co., Newark, N. J., Pipe Tapping Machines; G. T. Latta, Ludlow, Ky., Hydraulic Tunnelling Apparatus for Service Pipes.

Mail Delivery Notice.

Special efforts are made to deliver our paper to its readers each week at the earliest possible moment. The largest binding and mailing establishment in New York begins work on Engineering News early each Wednesday evening, and all papers for Boston, Philadelphia and Washington are usually in the post-office by midnight; all Brooklyn and New York city papers by 3 o'clock—in ample time for the first delivery Thursday morning. The entire edition, including foreign copies, is in the mail soon after 6 o'clock Thursday morning. If your paper is not received promptly we advise that you make a complaint to your local post-office officials.

PERSONAL.

Mr. A. M. Parent has been appointed Manager of the works of the Pullman Palace Car Co., Chicago, Ill.

Mr. F. C. Finkle, of San Bernardino, Cal., has been appointed Chief Engineer of the Redlands Electric Light & Power Co., Redlands, Cal.

Mr. F. S. Higbid has been appointed Roadmaster of the Panama R. R., to succeed Mr. R. G. Ward, with headquarters at Colon, Columbia.

Mr. Richard Caffrey, General Roadmaster of the Lehigh Valley R. R., with headquarters at South Bethlehem, Pa., has been appointed Engineer of Maintenance of Way.

Mr. John E. Davis, civil engineer, of Oskaloosa, Ia., was married, Sept. 28, to Miss Laura A. Gunn, of that city. Mr. Davis was formerly City Engineer of Oskaloosa.

Mr. W. S. Huyette, contracting engineer for Wickes Bros., Saginaw, Mich., stationary and marine boiler makers, has opened an office at 1214 Marquette Building, Chicago.

Mr. Elwood Mead, M. Am. Soc. C. E., State Engineer of Wyoming, has been studying irrigation in Montana in connection with an investigation being carried on by the U. S. Department of Agriculture.

Mr. Albert S. Crane, Jun. M. Am. Soc. C. E., Assistant Engineer in the Department of Sewers, New York city, has resigned to accept the position of Assistant Engineer of the American Lake Superior Power Co., Sault Ste. Marie, Mich.

Mr. W. P. Brown, M. Am. Soc. C. E., has assumed charge of the New York office of the King Bridge Co., located at 501 Fifth Ave. Mr. Brown has been connected with the King Bridge Co. for a number of years at their home office in Cleveland, O.

Mr. G. R. Joughins, formerly Superintendent of Motive Power of the Norfolk & Southern R. R., with office at Berkeley, Va., has been appointed Mechanical Superintendent of the Intercolonial Ry., with headquarters at Moncton, N. B.

Prof. Edgar W. Bass, Professor of Mathematics in the United States Military Academy at West Point, has been placed on the retired list. Professor Bass graduated at West Point in the class of 1868. He was appointed Professor of Mathematics ten years later, and has held the position ever since.

Mr. Andrew C. Cunningham, M. Am. Soc. C. E., of the firm of Stowell & Cunningham, civil engineers, of Albany, N. Y., and Mr. Fred. Thompson, civil engineer, of the District of Columbia, have been appointed Civil Engineers in the United States Navy, with the relative rank of Lieutenant (junior grade).

Mr. Wm. Jackson, M. Am. Soc. C. E., City Engineer of Boston, will make a study of the bridges in the principal large cities in Europe, to obtain information for use in connection with his work as engineer of the Cambridge (Massachusetts) Bridge Commission. According to press dispatches Mr. Jackson sailed early this week.

Mr. L. N. Case, Superintendent of the water-works at Detroit, Mich., has been appointed Manager of the Duluth, Minn., water-works, to succeed Mr. C. E. Vanbergen, resigned. Mr. Vanbergen's appointment was noted in our issue of Sept. 8. Mr. Jas. S. Matterson has been appointed Assistant Secretary of the Duluth Water-Works.

Mr. J. W. Schaub, M. Am. Soc. C. E., has opened an office at 1731 Monadnock Block, Chicago, for independent practice as a bridge engineer. He was formerly Engineer of the Detroit Bridge & Iron Works, Detroit, Mich., and later of the Hamilton Bridge Works, Hamilton, Ont. Mr. Schaub has recently perfected designs for a new type of bascule bridge.

Capt. Alfred E. Hunt, M. Am. Soc. C. E., President of the Pittsburg Reduction Co., Pittsburg, Pa., who went to the front with Battery B, 18th Regiment Pennsylvania Volunteers, is prominently mentioned as a desirable candidate for the next Mayor of Pittsburg. He recently returned here from the front in very poor health, but has been rapidly recuperating.

Mr. G. H. Dunlop, civil engineer, of Melbourne, Victoria, Australia, is now in this country, on his way to England. He is studying American methods and machinery for the excavation and handling of material, including steam shovels, grading machines and conveying plants, with a view to introducing them on work in Australia. He is the inventor of a new form of wooden lining for tunnels, which has been used in about 3,500 ft. of sewer tunnel in Melbourne.

Hon. John H. Moffitt, General Manager of the Syracuse Rapid Transit Ry., Syracuse, N. Y., who for the past eight years has been connected with the street railways of that city, has resigned his position. Mr. C. Loomis Allen has been appointed Acting General Manager to fill the vacancy. Mr. Allen has been the Engineer of the Syracuse street railways for the past four years, during their construction and reconstruction, and lately has held the position of Assistant General Manager.

Mr. R. Krumm, of Columbus, O., says U. S. Minister Allen, of Corea, under date of July 16, 1898, has been engaged as Chief Engineer of the Corean government. He is "to direct all engineering work, such as the laying out of irrigation works, roads, bridges, fortifications, etc." Mr. Krumm, who is a graduate of the University of Ohio, has a five years' contract, at $300 a month for the first year, and an increase of $50 a month each year. He will also have house and certain other expenses, it is said, paid by the government. He is now engaged on the Seoul-Chemulpo Ry.

The officers of the American Society of Civil Engineers, for the coming year, as named by the Nominating Committee, and which are to be voted for Jan. 18, 1899, are as follows: For President, Mr. Desmond FitzGerald, Boston, Mass.; Vice-Presidents, Mr. Robert Cartwright, Rochester, N. Y., and Mr. Robert Moore, St. Louis, Mo.; Treasurer, Mr. John Thomson, New York city; Directors, Messrs. John A. Bensel, C. W. Buchholz and Saml. Whinery, New York city; Mr. Edmund K. Turner, Boston, Mass.; Prof. Palmer C. Ricketts, Troy, N. Y., and Mr. Jas. D. Schuyler, Los Angeles, Cal.

OBITUARY.

Gen. Jas. L. Botsford, a retired iron manufacturer, died at Youngstown, O., Oct. 6, aged 66.

Mr. Elbert Fleet, formerly Fire and Water Commissioner of Long Island City, N. Y., died Oct. 5, aged 62.

Mr. Charles Patterson, civil engineer, died suddenly, at Mapimi, Mex., Aug. 26. His home was in Doylestown, Pa.

Mr. Platte R. Bush, civil engineer, of Saginaw, Mich., died in Harper Hospital, Detroit, Aug. 4, aged 25. He was a graduate of the University of Michigan, Ann Arbor.

Mr. W. H. Cline, Chief Engineer, U. S. N., retired, died in the Long Island College Hospital on Oct. 5. He was born in Baltimore on Sept. 3, 1837. In 1861 he entered the Navy on the ship "Wyoming," and took part in the chase of the "Alabama." He was promoted to Chief Engineer in 1887, and retired on Aug. 27, 1894.

Mr. A. W. Stedman, late Chief Engineer of the Lehigh Valley R. R., died at Mauch Chunk, Pa., Oct. 7. Mr. Stedman entered the service of the Lehigh Valley R. R. when a boy, as a rodman in the engineer corps, and worked his way up to the position of Chief Engineer, which position he held until about three years ago, when his health began to fail.

Mr. William E. Gilbert, Vice-President and Treasurer of the Gilbert Car Mfg. Co., Green Island, N. Y., died at Eagle Mills, N. Y., Sept. 29, aged 58. He was born in Troy, N. Y., and became associated with his father, the late Uri Gilbert, in 1863, under the firm name of Uri Gilbert & Son, railway car builders. In 1882 the firm became the Gilbert Car Mfg. Co., and Mr. Wm. E. Gilbert became the Vice-President and Treasurer.

Mr. Silas E. Weir, a member of the engineering staff of the West Virginia Central & Pittsburg R. R., died at his home in Elkins, W. Va., Oct. 5, of typhoid fever. He was born in New Brunswick, N. J., and graduated from Rutgers College, in that city, in 1871. He was for some years City Engineer of New Brunswick, and later went to Kentucky, where he built several railway tunnels. He was afterwards made Engineer in charge of the Wilkesbarre Division of the Lehigh Valley R. R.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

ST. LOUIS RAILWAY CLUB.
Oct. 14. Secy., H. H. Roberts, 511 Commercial Bldg., St. Louis, Mo.

ENGINEERS' CLUB OF COLUMBUS.
Oct. 15. Secy., H. M. Gates, 12½ North High St., Columbus, O.

ENGINEERS' CLUB OF PHILADELPHIA.
Oct. 15. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.

TECHNICAL CLUB OF OMAHA.
Oct. 17. Secy., J. Harry Lawrie, Omaha, Neb.

ENGINEERS' CLUB OF MINNEAPOLIS.
Oct. 17. Secy., H. E. Smith, 1620 S. E. 4th St., Minneapolis, Minn.

ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Oct. 17. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.
Oct. 18. Secy., R. A. Fessenden, 410 Penn Ave., Pittsburg, Pa.

AMERICAN INSTITUTE OF MINING ENGINEERS.
Oct. 18. Annual meeting, Buffalo, N. Y. Secy., R. W. Raymond, P. O. Box 223, New York city.

AMERICAN ASSOCIATION OF RAILWAY SUPERINTENDENTS OF BRIDGES AND BUILDINGS.
Oct. 18-20. Annual meeting, Richmond, Va. Secy., S. F. Patterson, Boston & Maine R. R., Concord, N. H.

WESTERN SOCIETY OF ENGINEERS.
Oct. 19. "Masonry," Geo. S. Morison. Secy., N. L. Litten, Monadnock Block, Chicago, Ill.

AMERICAN SOCIETY OF CIVIL ENGINEERS.
Oct. 19. "Stave Pipe—Its Economic Design and the Economy of Its Use," Arthur L. Adams. Secy., C. W. Hunt, 220 W. 57th St., New York city.

ENGINEERS' CLUB OF ST. LOUIS.
Oct. 19. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.

ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Oct. 19. Secy., Frank H. Olmsted, Los Angeles, Cal.

BOSTON SOCIETY OF CIVIL ENGINEERS.
Oct. 19. Secy., S. E. Tinkham, City Hall, Boston, Mass.

WESTERN FOUNDRYMEN'S ASSOCIATION.
Oct. 19. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.

PENNSYLVANIA STREET RAILWAY ASSOCIATION.
Oct. 19-20. Annual meeting, Scranton, Pa. Secy., S. P. Light, Lebanon, Pa.

AMERICAN GAS LIGHT ASSOCIATION.
Oct. 19-21. Annual meeting, Niagara Falls, N. Y. Secy., Alfred E. Forstall, Montclair, N. J.

ENGINEERS' CLUB OF CINCINNATI.
Oct. 20. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.

NEW YORK RAILROAD CLUB.
Oct. 20. "Purchasing Materials," H. B. Hodges. Secy., W. W. Wheatley, 168 Montague St., Brooklyn, N. Y.

SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Oct. 20. Secy., F. A. Charpiot, P. O. Box 13, Savannah, Ga.

CHICAGO ELECTRICAL ASSOCIATION.
Oct. 21. "Practical Points on Electrical Measurement," W. B. Hale. Secy., J. R. Cravath, 825 Monadnock Block, Chicago, Ill.

CIVIL ENGINEERS' CLUB OF CLEVELAND.
Oct. 25. Secy., Wm. H. Searles, Case Library Building, Cleveland, O.

AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENT.
Oct. 26-28. Annual meeting, Washington, D. C. Secy., D. L. Fulton, Bureau of Highways and Sewers, Allegheny, Pa.

CANADIAN SOCIETY OF CIVIL ENGINEERS.
Oct. 27. Secy., C. A. McNab, 112 Mansfield St., Montreal, Canada.

ENGINEERING ASSOCIATION OF THE SOUTH.
Oct. 27. Secy., C. B. Wilson, 1,000 Broad St., Nashville, Tenn.

BROOKLYN ENGINEERS' CLUB.
Nov. 3. Secy., A. J. Provost, Jr., 191 Montague St., Brooklyn, N. Y.

TECHNICAL SOCIETY OF THE PACIFIC COAST.
Nov. 4. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.

ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Nov. 7. Secy., H. J. March, Library Bldg., Buffalo, N. Y.

CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Nov. 7. Secy., C. L. Annan, City Engineers' Office, St. Paul, Minn.

NEW ENGLAND RAILROAD CLUB.
Nov. 8. Secy., Edw. L. Janes, P. O. Box 1158, Boston, Mass.

DENVER SOCIETY OF CIVIL ENGINEERS.
Nov. 8. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Colo.

RAILWAY SIGNALING CLUB.
Nov. 8. Secy., Earl M. Seitz, Signal Engineer, C. & N. W. Ry., Chicago, Ill.

SOCIETY OF NAVAL ARCHITECTS AND MARINE ENGINEERS.
Nov. 10-11. Annual meeting. Secy., Francis T. Bowles, 12 West 31st St., New York.

CENTRAL RAILWAY CLUB.
Nov. 11. Secy., H. D. Vought, 114 Fifth Ave., New York city.

MONTANA SOCIETY OF ENGINEERS.
Nov. 12. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.

ENGINEERS' CLUB OF KANSAS CITY.
Nov. 14. Secy., F. W. Tuttle, Baird Bldg., Kansas City, Mo.

THE LOUISIANA ENGINEERING SOCIETY.
Nov. 14. Secy., J. F. Coleman, 712 Union St., New Orleans, La.

NORTHWEST RAILWAY CLUB.
Nov. 15. Secy., T. A. Foque, Soo Line, Minneapolis, Minn.

THE ENGINEERS' CLUB OF COLUMBUS.—A regular meeting of this club was held Oct. 1. Mr. H. M. Layman presented an interesting paper on "Progress in Electric Lighting," which was discussed quite fully.

NEW YORK RAILROAD CLUB.—This club held its first meeting of the season on Sept. 15, at 12 W. 31st St., New York city. Mr. W. S. Rogers presented a paper on "Cost, Keeping and Accounting." Prof. H. Wade Hibbard outlined the course of railway engineering recently established at Sibley College, Cornell University.

TEXAS RAILWAY CLUB.—A meeting of this club was held at Rockport, Tex., on Sept. 19, at which Mr. F. Hufsmith read a paper on "The Safety in Train Air Brake Appliances." A paper by Mr. A. S. Grant on "The Necessity of Harmony in Departments of Railway Service," presented at the last meeting, was discussed quite fully. An invitation from the Agricultural and Mechanical College at Bryan to visit the college was accepted.

BROOKLYN ENGINEERS' CLUB.—On Oct. 6 this club gave a complimentary dinner to its members, who had volunteered for service in the war with Spain. Of the 15 who enlisted all except one, Corporal Edward C. Brown, returned home. This number formed 15% of the total active membership. An interesting toast list was presented, and the event proved most enjoyable.

It is announced that Mr. Willard C. Tuttle will read a paper on "Foundry Moulding Machines for Snap Flask Work," on Oct. 13. The informal "library talks" will be resumed on Oct. 20 with a paper on "Testing of Steam Boilers," by Mr. R. P. Bolton.

WESTERN SOCIETY OF ENGINEERS.—At the meeting, on Oct. 5, there was an exceptionally large attendance to listen to a paper on "The Track Elevation of the Chicago & Northwestern Ry.," which was read by Mr. Louis H. Evans, the engineer in charge of the work. The paper was illustrated by drawings and stereopticon views, showing the character of the work, much of which has been described in our columns. Special arrangements had been made to have the track elevation work of other railways in Chicago described by the several engineers in charge. The work on the Illinois Central R. R. was described by Mr. H. W. Parkhurst; that on the Chicago, Milwaukee & St. Paul Ry. by Messrs. Webb, Rogers and Reichmann, and that on the Chicago, Burlington & Quincy R. R. by Mr. G. H. Bremner. Time did not permit a full discussion, but the subject will be taken up at a later meeting and will include the following: Lake Shore & Michigan Southern Ry. and Chicago, Rock Island & Pacific Ry., Mr. L. H. Clarke; Pittsburg, Fort Wayne & Chicago Ry., Mr. W. H. Coverdale; Pittsburg, Cincinnati, Chicago & St. Louis Ry., Mr. Thomas H. Johnson; and the 16th St. crossing, Mr. G. W. Vaughn.

On Oct. 8, a special train, provided by the Chicago & Northwestern Ry., carried a large party of members and guests over this road to examine the work on the Chicago, Milwaukee & St. Paul Ry., and on the Pittsburg, Chicago, Cincinnati & St. Louis Ry. Arrangements are being made for a special trip to the Trans-Mississippi Exhibition at Omaha, Neb., Oct. 14 to 16.

THE ENGINEERS' CLUB OF PHILADELPHIA.—This club held a regular meeting on Oct. 1, with 57 members and visitors present, at which various routine business was transacted. Later, Mr. Josiah Dow presented the first paper of the evening on the "Dow Steam Engine and Chronometric Governor." This engine is a modification of the Corliss type, intended to effect greater economy in the use of steam by a new arrangement of valves and steam ports, and by means of the chronometric governor to preserve greater regularity of speed under varying loads than has hitherto been attainable. The theory of the general subject of steam-engine economy was thoroughly reviewed and the details of the author's improvements were described with the aid of stereopticon views.

The paper was discussed by Mr. Francis Schumann, who, after seeing the engine in operation, expressed the opinion that it was such a decided improvement over other types of steam engines that he believed it would mark an epoch in the development of steam power.

Mr. John C. Trautwine, Jr., presented the second paper of the evening by its title, "Popular Errors about Water Meters."

It was announced that at the meeting of Oct. 15, Mr. George S. Webster would present a paper on "The Construction of the Pennsylvania Avenue Subway and Tunnel, Philadelphia," and that Mr. Webster had extended an invitation to members to visit the work on the afternoon of Oct. 22.

ENGINEERS' CLUB OF ST. LOUIS.—The 476th meeting of this club was held Oct. 5, with 18 present.

Prof. J. H. Kinealy moved that the secretary address letters of thanks to the Wiggins Ferry Co., and to Mr. Lemon Parker for courtesies extended to the club during the summer.

A letter was then read from Mr. Charles L. Bouton, who had been appointed a delegate from the Engineers' Club of St. Louis to the 50th Anniversary Celebration of the Society of Civil Engineers of France. The President stated that the Missouri Historical Society had invited the club to participate in the arrangements for the celebration of the Louisiana Purchase.

The discussion of the smoke abatement movement in St. Louis was then taken up. Mr. Eugene McQuillan, the attorney for the Citizens' Smoke Abatement Association, addressed the club in regard to the legal questions involved. He stated that an ordinance had been passed by the Municipal Assembly several years ago which prescribe a punishment for the emission of dense, black smoke. Several convictions had been secured under this ordinance, and the smoke nuisance had been largely abated, until an appeal case the Supreme Court of Missouri decided that the Municipal Assembly had exceeded its rights under the City Charter in passing the ordinance. Mr. McQuillan stated that a new ordinance was in course of preparation, and is soon to be introduced in the Municipal Assembly.

Richard McCulloch, Secy.

NEW PUBLICATIONS.

LITERARY MAGAZINES.—The leading topic in all the magazines this month is, of course, the war and the questions which have grown out of it. Even the English reviews give prominent place to these topics. The "Contemporary" and "Fortnightly Review" for September each contain papers on the Carlist movement in Spain. Most Americans have an idea that the Carlist party in Spanish politics is actuated merely by the desire to secure a throne for their leader and fat places for his personal followers. If the writers in the above magazines tell the truth, however, Carlism aims at quite a revolution in methods of government. It promises home rule in local and provincial affairs, in place of the present plan of controlling everything at Madrid. The indictment which the defenders of Carlism bring against the present Spanish government is a formidable one, and Americans who wish to obtain some idea of Spanish political conditions will do well to read these articles.

The English reviews also have something to say respecting the new problems which this country has had forced upon it. In the "Nineteenth Century" we find an article on "The New American Imperialism," in which the writer expresses the opinion that for the United States to undertake a policy of colonial expansion is "Manifest Destiny." In the "North American Review," M. W. Haseltine writes on "What Shall Be Done About the Philippines?" He urges that the United States should keep them, but thinks it would be fair for us to assume that part of the Spanish public debt which was secured by the Philippine revenues, and, in addition, one-fifth part of the Cuban debt. The best article by far on the Philippine question that we have anywhere seen, however, is by Prof. Dean C. Worcester, of Cornell, in the October "Century." Prof. Worcester has such an intimate knowledge of the islands and their people as is possessed probably by hardly any other American of education and prominence. Briefly summarized, Prof. Worcester's opinion is that Spain would find it difficult, if not impossible, to re-establish her sovereignty in the Philippines, even if she were given a free hand. To turn the islands over to native rule would result in perpetual anarchy and civil war. European powers would at once step in and establish governments under their own flags to protect their interests, and would be justified in so doing. Any nation attempting to govern the Philippines, however, Prof. Worcester thinks, will have some knotty problems on its hands, and he sets forth very clearly what some of these problems are. We may note under what Prof. Worcester says as to the unhealthfulness of the climate the following incident, which will be of especial interest to our readers:

> About eight years ago, General Manager Higgins of the Manila & Dapitan Ry., having secured a concession from the Spanish government, organized in London a party of about 40 Englishmen, civil engineers and others, who were to survey the route and build and afterward assist in the operation and management of the railroad. Mr. Higgins gave special attention to the physical condition of his assistants, selecting only men that he believed could stand the severe climate of the archipelago. To-day not more than half of the members of that party are alive.

Of course, the stories of the war are prominent this month. That which will attract most general attention is Richard Harding Davis' account of the Battle of Santiago. We will note here that one of the chief indictments which he brings against General Shafter in this article is that there was no reconnoissance of the enemy's position and the country over which the attacking army had to pass before the memorable advance on July 1. Apparently, Davis was unaware of the reconnoissance work done by the engineers of the army, and so well described by Mr. E. J. Chibas on another page of this issue of Engineering News.

Another and almost equally good account of the taking of San Juan and Caney is given by Caspar Whitney in the October "Harper's," and the charge as to the lack of reconnoissance before the battle is repeated. This magazine also contains an interesting summary, by Wm. E. Griffis, of the past exploits of our navy in Asiatic waters.

Besides Prof. Worcester's article, noted above, the "Century" contains a description of the most remarkable "bore," or wave in the estuary of a tidal river, that has ever been recorded. The river is the Tsien-Tang-Kiang of China. According to observations by Capt. Moore, of the British survey ship "Rambler," in 1888, and 1892, this bore advances with a height of 11 to 12 ft., and the breakers which form just back of the advancing wall of water are 25 to 30 ft. above the level of the still water just in front of them. We should also notice here another "Century" article, in which an account is given of the famous "pony express," which for some two years in the early '60s carried mails from St. Joseph, Mo., to Sacramento, Cal., on a schedule time of 8 days. The quickest trip of this express was the carriage of President Lincoln's inaugural address, which was done in 7 days 17 hours (185 hours), or an average of 10.7 miles per hour, for the total distance of 1,950 miles.

The "Review of Reviews" for October, besides its usual summary of current events, has two timely papers on "Medical and Sanitary Aspects of the War," by Dr. Carroll Dunham, and "Some Military Lessons of the Struggle," by Lieut. John H. Parker.

"The North American Review" contains an account of "The Movement for Municipal Reform," by Clinton R. Woodruff, Secretary of the National Municipal League, detailing the progress that has been made toward the improvement of municipal government in several of the principal American cities. Admiral P. H. Colomb discusses the strategic position of the United States, under its new conditions, and concludes that the new possessions in the East and West Indies will weaken the country, from a military point of view, far more than they will strengthen it. The article is one which should be read by everyone who desires to form correct opinions respecting our future policy with respect to national defence.

Both "The Century" and the "Cosmopolitan" have excellent papers on the Omaha Exposition, and the latter magazine has also a popular description of the packing industry as carried on at the Union Stock Yards, Chicago.

The October "Atlantic" opens with two thoughtful papers upon the new "era of good feeling" between the United States and England, one by Hon. Carl Schurz and the other by Mr. A. V. Dicey. A historical paper on "The Development of Our Foreign Policy" is also worth mention here.

In the current "Popular Science Monthly," Mr. Edward Atkinson has a paper in which he endeavors to trace in a scientific manner the evolution of high wages from low cost of labor. "The First Half Century of the American Association for the Advancement of Science" is reviewed by Prof. Daniel S. Martin, and Dr. F. S. Oswold writes on "Weather Freaks of the West Indies," a subject of more immediate interest to us now than a year ago.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

CHAIN SAW MORTISERS.—The New Britain Machine Co. New Britain, Conn. Pamph.; 6 × 9 ins.; pp. 22.

The chain saw mortiser is a machine made for rapid mortising of timber. Its principal feature is a steel chain, each link of which has a sharpened saw tooth, so formed as to carry out its own chip. The chain travels about 1,500 feet per minute, in which time 40,000 teeth are presented to the work. Six different styles are built for different classes of work.

THE CASE HIGH-SPEED ENGINE.—The New Britain Mfg. Co. New Britain, Conn. Pamph.; 6 × 9 ins.; pp. 40.

The Case automatic engine has now been on the market for ten years. It belongs to the general type of oscillating engines, but has some features peculiarly its own, which distinguish it from earlier engines of the type which were at one time quite common. The cylinder rocks not on trunnions, but on its whole exterior surface, which is of cylindrical shape, and rocks inside of a chamber in which it is said to be balanced on a film of steam so that it rocks with practically no friction. This style of construction makes the engine exceedingly compact, so that it occupies much less space than any reciprocating engine of the same power. It is built in sizes from 2½ to 25 HP. Besides the usual style, in which the bed is bolted to the floor foundation, "bracket" and "hanger" engines are built, adapted to be bolted to the side walls or overhead beams of a room.

RAILWAYS.

ATLANTIC COAST LINE.—J. R. Kenly, Gen. Mgr., Wilmington, N. C., informs us that the work on the extension of this line, from Denmark to Robbins, via Barnwell, S C., has not yet been commenced, nor have the surveys yet been completed.

BOYER VALLEY.—This company was incorporated in Iowa, Oct. 5, with a capital stock of $10,000, to build a branch line of the Chicago & Northwestern Ry. from Sac City, to Denison, 25 miles, with a contemplated extension from Stockholm into Harrison county; total length, 100 miles. The incorporators and first board of directors are Marvin Hughitt, M. M. Kuckmer, J. M. Whitman, J. B. Bidford and H. R. McCulloch, all of whom are officers of the Chicago & Northwestern, 22 5th Ave, Chicago, Ill.

BRAINERD & NORTHERN.—Contractors Bagley, Huebner and Lisette have begun actual construction work on the last seven miles of the extension of this line between Walker and Bemidji, Minn., 30 miles, according to reports.

CANTON, ABERDEEN & NASHVILLE. — C. D. Smith & Co., Birmingham, Ala., are reported to have been awarded the contract for building the first section of this line from Winfield to New River, Ala., a distance of about 10 miles. The work is estimated to cost $100,000, and it is expected that it will be completed by Jan. 1. This company was chartered in Alabama Sept. 27 by men interested in the Illinois Central Ry., and it is proposed to build in all about 68 miles of railway from West Point, Miss., on the Illinois Central, to coal lands in Lamar and Fayette counties, Ala.

CHIHUHUA & PACIFIC.—Press reports state that this company, which is building 373 miles of railway in Mexico, is in the market for eight steam pumps and boilers for water stations for the new line. Pres., Almeric H. Paget, 80 Broadway, New York.

CEDAR RAPIDS BELT.—It has been announced at Cedar Rapids, Ia., that the Northwestern, Milwaukee, Illinois Central, and Burlington, Cedar Rapids & Northern Rys. have organized the City Belt Line, which will extend down the river from the new Northwestern bridge to the new roundhouse of that company, a distance of nearly three miles. Four tracks will be constructed, the most of the way on a fill in the river, protected by a retaining wall. It is thought that the line will relieve the present tracks through the business center of the city of 90% of its former freight traffic. Work will be commenced as soon as the Northwestern bridge is completed. The right of way has been secured and a survey made.

CLEVELAND, CINCINNATI, CHICAGO & ST. LOUIS.—This company has submitted a proposition to the council of Columbus, O., whereby the company agrees to raise its tracks and enlarge its embankment from the Scioto River westward to a point near the state pumping station at West Columbus, at a cost to the city of $29,150. This sum is to pay for 70,000 cu. yds. of material at 35 cts. a cu. yd.; 560 cu. yds. of retaining wall, at $5; ballasting 6,800 ft. of track, $1,500, etc. It is said that the council favors the acceptance of the proposition. George W. Kittredge, Ch. Engr., Cincinnati, O.

COBBOSSEECONTEE.—We are informed that this company has been organized in Gardiner, Me., to build about one mile of spur track from the Maine Central Ry. along the stream, to facilitate freight shipments from the mills of the S. D. Warren Paper Co. and others. Pres., R. H. Gardiner, Boston, Mass.; Clk. and Treas., W .E. Maxey, Gardiner; Directors, J. S. Maxey, H. E. Merriam and others, of Gardiner.

COLUMBUS, LIMA & MILWAUKEE.—Reports state that this company has been reorganized, and that arrangements have been made for the immediate completion of the road from Cleveland to Defiance, O. The roadbed and bridges were built eight years ago, and since then have lain idle. It is said to be the intention of the new company to extend the line to Milwaukee and to Columbus. Pres., J. G. W. Cowles, Pres. Cleveland Trust Co., Cleveland, O.; Vice-Pres., H. R. Reynolds; Directors, Daniel Coolridge, Pres. Lorain Steel Co., Lorain, O., and others.

DULUTH & NORTHERN MINNESOTA.—Reports state that six miles of track have been laid on this proposed line and that grading is completed for four miles more. Considerable bridge building will have to be done, however, before track-laying can be proceeded with. The company is still in need of men. It has not yet been decided how extensive the logging operations of Alger, Smith & Co. will be in the territory which the road is intended to open up. M. S. Smith, Pres., Detroit, Mich.; R. N. Marble, Asst.-Gen. Mgr., Duluth, Minn.

FORT WORTH & NORTHWESTERN.—W. D. MacMillan, Secy., Fort Worth, Tex., informs us that no contracts have yet been let for the building of this line, nor is the company ready as yet for construction. The proposed route is from Fort Worth northwest to Throckmorton, Tex., a distance of about 100 miles. Pres., B. B. Paddock, Fort Worth, Tex.

GARNER, CEDAR RAPIDS & NORTHERN.—This company is said to have just begun the construction of a line of railway from Hayfield Junction, the present terminus of the Burlington, Cedar Rapids & Northern Ry., northwesterly through the northern part of Hancock county and into Kossuth county, via Crystal Lake, Ia., a total distance of 20 miles.

GEORGIA & ALABAMA TERMINAL.—Press reports state that $1,000,000 is to be spent by this company in building railway terminals on Hutchinson's Island, opposite Savannah, Ga. The terminals will probably be leased by the Georgia & Alabama Ry. Co., Cecil Gabbett, Vice-Pres. and Gen. Mgr., Savannah.

GEORGIA NORTHERN.—This company is said to have definitely decided to complete its line between Moultrie and Albany, Ga., a distance of about 25 miles. It is expected to lay a 45-lb. steel rail. Pres., J. F. Pidcock, Moultrie, Ga.

GEORGIA PINE.—The directors of this company have resolved to amend its charter so as to permit of an extension of its line from Arlington, northerly to Columbus, via Cuthbert and Lumpkin, Ga., a distance of about 90 miles. Pres., J. P. Williams, Savannah, Ga.; Ch. Engr., Arthur Pew, Damascus, Ga.

GRAND MARAIS & NORTH SHORE.—R. W. Nichols, Ch. Engr., Duluth, Minn., informs us that the survey for this projected line from Grand Marais to Two Harbors, Minn., 90 miles, has not yet been finished. Contracts will be let as soon as surveys are completed; the right of way has been obtained. Pres., E. K. Lewis, Duluth.

GRAND TRUNK.—McCormick & McLeod, Bracebridge, Ont., have been awarded a three-years' contract according to reports, for ties for the northern division and the main line between Toronto and Montreal. Jos. Hobson, Ch. Engr., Montreal, Que.

LICKING VALLEY.—J. Morrow, Audr., Yale, Ky., informs us that four miles of this line have been graded, and track is now being laid. It is proposed to build a 15-mile extension up Licking River Valley, Ky. Pres., E. A. Smith, Providence, R. I.; Ch. Engr., J. D. Ramsey, Yale, Ky.

LITTLE RIVER VALLEY.—F. M. Butts, Secy., Horatio, Ark., informs us that this company has already built about eight miles of railway with its own capital, and that the work is now being pushed farther west. The projected route is from Nashville to Neal Springs, via Howard and Sevier, Ark., a distance of 40 miles. Pres., D. C. Richardson; Ch. Engr., S. L. Morrow, both of Horatio.

MANITOBA & NORTHWESTERN.—It is again announced that this line has passed into the hands of E. P. Osler, of Toronto, Ont.; William Hendrie, Hamilton, Ont., and others, and that it is the intention of the new owners to commence immediately a number of necessary improvements.

MINNEAPOLIS, ST. PAUL & SAULT STE. MARIE.—Reports state that about 60 miles of track have been laid on the 78-mile extension from Kulm, N. Dak., in La Moure county, to a junction with the old grade of the Aberdeen, Bismarck & Northwestern Ry., which was built in 1887 from Aberdeen, S. Dak., to Bismarck, N. Dak., but not ironed. Thomas Greene, Acting Ch. Engr., Minneapolis.

MONTGOMERY, HAYNESVILLE & CAMDEN.—We are informed that all correspondence for the official, engineering and construction departments of this railway company should be addressed to Sol. D. Bloch, Pres., Montgomery, Ala. The company proposes to construct a line from Montgomery to Camden, Ala., and thence to Suggsville, on the Mobile & Birmingham R. R. This latter stretch, from Camden to Suggsville, 45 miles, has recently been surveyed. J. A. Milner, Ch. Engr., Birmingham, Ala.

MUSKOGEE COAL & RY.—J. T. Nelson, Secy., Indian Territory Consolidated Coal Co., Fort Scott, Kan., informs us that the surveys have been made and the entire right of way obtained for this proposed line from Muskogee, Ind. Ter., to Guthrie, Okla., a distance of about 194 miles. Grading and masonry work has been completed for 12 miles, and ties laid.

PACIFIC & ARCTIC.—Press reports state that this railway now under construction from Skaguay to Selkirk, Alaska, is progressing rapidly, rails having been laid to White Pass, and trains operated to that point. The work is being done by the Pacific Contracting Co., Dexter, Horton & Co. Bank Bldg., Seattle, Wash., and of which E. C. Hawkins is chief engineer. John Hislop, Asst. Ch. Engr., Skaguay, Alaska.

PERRIS & LAKEVIEW.—This company has been incorporated in California, with a capital stock of $80,000, by W. G. Nevin, G. Holterhoff, Jr., E. Chambers, H. J. Stevens, and A. P. McGinness, of Los Angeles, Cal.

PITTSBURG & LAKE ERIE.—J. A. Atwood, Ch. Engr., Pittsburg, Pa., informs us that this company is building a quarter of a mile of second track across the Youghiogheny River, near McKeesport, Pa. C. I. McDonald has the masonry contract, at about $25,000; and the Keystone Bridge Co., the bridge work, at about $75,000.

RUSSIA.—Press reports state that the department of the imperial Russian ministry of finance, charged with the management of Russian railways, is about to discuss the construction of the projected Northern Ry. to St. Petersburg. As the grevious famine is making itself rapidly felt in the Government of Kasan and also in the neighboring governments it has been decided to begin the work of construction as soon as possible, so as to find work for the starving peasants.

SIOUX FALLS & PACIFIC.—This company is reported to have been incorporated to build in South Dakota to the Wyoming state line. P. E. Woodworth, H. H. Smith, C. E. McKinney, T. H. Brown and H. H. Lien are the incorporators.

TEXAS WESTERN.—We are informed that surveys are being made, and data collected for the reconstruction of this line to the city limits of Houston. E. A. Campbell, Gen. Mgr., Houston, Tex.

UNION PACIFIC.—New steel rails are being laid on the Salina & Oakley, Kan., branch in place of the old iron rails now in use. When the work is completed, it is expected that the iron rails on the McPherson branch will also be replaced with steel rails.

YELLOWSTONE PARK.—This company has been incorporated in Washington, with a capital stock of $1,500,000. It is proposed to operate a railway from the main line of the Northern Pacific at Bozeman, or Manhattan, through the counties of Park and Gallatin, Mont., the general route of the road being from a point near Brisbin westerly via Trail Creek, to Meadow Creek, Bozeman and Ferris, Hot Springs, thence southerly up the West Gallatin River to its intersection with Dodge Creek, ten miles. Branch lines are to run to Flat Head Pass in the Bridger Mountains from Ferris and to Hot Springs and to Three Forks. The road was incorporated some time ago as the Gallatin Ry., but the name has been changed because it has been found the line will have to pass through more than one county. The line will tap a region said to be almost inaccessible, but to contain some of the finest coal in Montana; it will also traverse a fine barley belt. Work is expected to be completed by Dec. 1. George Turner and W. W. D. Turner, of Spokane, Wash.; and Frank A. Hall, of Bozeman, Mont., are said to be interested.

STREET AND ELECTRIC RAILWAYS.

BURLINGTON, VT.—The "Free Press" announces that the contract for completing the Burlington & Hinesburg R. R., and for the electrical works, has been awarded to C. W. Blakeslee, New Haven, Conn., and that work is to be commenced this week. The rails have been ordered, and tracklaying will soon begin at the Burlington end. This road was projected as a steam railway, and considerable work done on it several years ago. The distance to Hinesburg is 12 miles.——At a special meeting of the Aldermen last week it was voted, 5 to 4, not to allow the Burlington & Grand Isle R. R. Co. to lay tracks into the city. The company refuses to enter the city over the tracks of the Burlington Traction Co., and the beginning of work on this electric railway is thus delayed. F. O. Sinclair, of Burlington, can give information in regard to either of the above roads.

EAST BRIDGEWATER, MASS.—The selectmen of this town Oct. 7 granted a franchise to the company which proposes to construct an electric railway between Whitman and Plymouth, for the right to lay rails in Washington St.

MONSON, MASS.—The Palmer & Monson St. Ry. Co. has been granted a franchise to build in this town, one route being upon the quarry road and the other upon the lower road. Charles F. Grosvenor, H. P. Holden and E. C. Hastings, of Palmer, are directors in the company.

NEEDHAM, MASS.—The railroad commissioners have authorized the Natick & Cochituate St. Ry. Co. to extend its tracks in Needham. Pres., H. Harwood, Natick.

PITTSFIELD, MASS.—The aldermen have granted a permit to the Pittsfield Electric St. Ry. Co. to lay additional tracks on North and Wahconah Sts. Mgr., P. C. Dolan.

WORCESTER, MASS.—The Worcester & Webster St. Ry. Co. has been granted a charter, with a capital stock of $150,000, to construct an electric street railway from the city hall in Worcester to Webster, via Auburn and Oxford, a distance of 15 miles. The directors are, Julius Garst, George A. Bigelow, E. L. Parker and E. P. Knowles, of Worcester; E. S. Hill, Webster; L. E. Thayer, Oxford; H. S. Shaw, Webster.

PHILMONT, N. Y.—The Columbia Traction Co., of this place, has been incorporated with a capital stock of $100,000, of which $1,500 is paid in, to construct and operate a street railway in Philmont, Columbia county. The incorporators are, Franklin G. Simmons, William C. Allen and Ernest F. Foote, of Rutherford, N. J. Principal office, 332 Harrison Ave., Harrison, N. J.

BRADDOCK, PA.—At a meeting of the North Braddock council Oct. 4, a petition was brought up for a franchise for a new street railway to run from Wilkinsburg to Turtle Creek via Swissvale, Hawkins, North Braddock and Bessemer, running eastward along the Pennsylvania R. R. L. G. Wood, of Pittsburg, is representing the company. If the petition passes, the line is expected to be completed by July, 1899.

ERIE, PA.—The council has passed an ordinance permitting the Erie City Passenger Ry., operated by the Erie Electric Motor Co., to extend its tracks to the Behrend paper mill.

PHILADELPHIA, PA.—Reports state that the Southwestern Traction Ry. Co. has begun work on its new trolley line in the 1st, 26th, 27th and 36th Wards. The new line will start at Mifflin and Otsego Sts., and will run along the latter to Jackson St., and thence to old Moyamensing Ave. to Penrose Ferry Road and to the new Penrose Ferry bridge and across the bridge to State Island Road, with its western terminus at the eastern side of Bow Creek. The primary object of the road is to open up to extensive building operations a tract of land west of Broad St. Pres., Edgar A. Tennis; Treas., U. H. Hapsenplug; Directors, William J. Burns, William O. Smith and H. M. Van Zandt.

WEST CHESTER, PA.—At a special meeting of the borough council Oct. 3 it was decided to grant a right of way to the Philadelphia, Castle Rock & West Chester Ry. Co. to enter this town by way of Gay St. to Matlock St. The line is expected to be in operation by about Dec. 10.

BALTIMORE, MD.—It is reported that the Consolidated Ry. Co., of Baltimore, has awarded the contract for building a connecting line between its Towson & Catonsville branch and the Edmondson Ave. line, of Ellicott City, to D. E. Evans, of Baltimore. Wm. A. House, Gen. Mgr.

LAUREL, MD.—D. G. Adelsberger, Engr., 722 Pennsylvania Ave., Baltimore, Md., informs us that the electric street railway project for Laurel has not yet developed, and has made but little progress towards development.

WASHINGTON, D. C.—Reports state that the contract for track work on that portion of the City & Suburban Ry. lying without the District of Columbia has been awarded to Allen & Talty, of Washington, while the trolley work on the same portion has been let to J. G. White & Co., of Baltimore. The work of constructing the portion in this city will soon be commenced. This work involves the removing and adjusting of about six and one-half miles of water mains to make room for the underground conduits. It is stated that the entire line to Berwyn will be in operation not later than Feb. 15; the roadbed has already been completed as far as that place. The power for the new line will be furnished by the Potomac Electric Power Co., of which O. T. Crosby, of Washington, is president. Mr. Crosby is also president of the railway company. Mr. A. E. Randle, Pres. Capital Ry. Co., has been granted permission by the district commissioners to extend the road through Pencote woods, from Nichols Ave. to the Alexandria branch of the Baltimore & Ohio R. R.

KING WILLIAM, VA.—A county election of King William county is to be held to vote upon the proposition of issuing $40,000 in bonds to aid in the construction of a standard gage electric railway from Richmond to Gloucester. Col. W. R. Aylett, of King William, is said to be interested.

GREENSBORO, N. C.—The Industrial & Immigration Association of Greensboro is urging investors to consider the proposition of building an electric street railway and power plant at this place. Population, 10,000. Secy., W. M. Barber.

BIRMINGHAM, ALA.—The Birmingham Ry. & Electric Co. has begun the work of reconstructing the lines of its city division, requiring the laying of new cross-ties, new rails and new switches.

CANTON, O.—Bids are asked by Louis N. Ley, Cy. Clk., until Oct. 22, for the construction and operation of street railway route No. 4, as follows: beginning on Navarre St. at the intersection with South Market St., thence southwest on Navarre St. to Garfield Ave., thence south on Garfield Ave. to Bridge St.; deposit, $100.

SANDUSKY, O.—It is reported that John MacKelvey of Sandusky, is promoting a deal for a New York syndicate for the consolidation of a number of Northern Ohio electric railways, among them being the Sandusky, Milan & Norwalk Ry. of which G. A. Dewitt is president, and the People's Electric Ry., of Sandusky. The transaction is said to be the first step of a scheme to build a net work of electric lines to connect with Cleveland and Toledo.

ELWOOD, IND.—A. J. Applegate, of Perkinsville, and Mayor Harbit, are said to be interested in a proposed electric railway to run from Elwood to Noblesville, via Perkinsville, a distance of 23 miles.

RICHMOND, IND.—Mayor Zimmerman has appointed Frank Spinning, Theodore Woodhurst, Henry Cutter, George Mashmeyer and John Rolling as a committee to secure an electric railway for this city.

ANN ARBOR, MICH.—Reports state that Col. Mapes, the projector of the Lansing, Dexter & Ann Arbor Electric Ry., has stated that work would begin in 30 days on constructing this line from Ann Arbor towards Dexter, and next spring from Mason to Dexter.

WAUKEGAN, ILL.—J. H. Van Vlissingen, of Chicago, representing the projected Chicago, Waukegan & North Shore Ry. Co., is said to be negotiating with the council for a right of way into the city from the north. The line is intended to connect Kenosha, linking the Milwaukee, Racine & Kenosha and the Chicago & Milwaukee Electric Rys. It will also do a freight business, connecting with the Elgin, Joliet & Eastern Ry. here.

KENOSHA, WIS.—J. M. Blatt, Supt. Milwaukee, Racine & Kenosha Electric Ry. Co., Racine, Wis., informs us that this line runs south from the City Hall in Milwaukee to the north city limits of Kenosha, a distance of 35 miles, and that a franchise is being obtained through Kenosha for a distance of two miles, one mile of which is expected to be built this fall. Nothing will be built; it is only extending tracks and overhead work from the present terminal one mile south to the heart of Kenosha. A 60-lb. tee-rail and standard ties will be used. Pres., Matthew Slush.

SEDALIA, MO.—The Sedalia Electric & St. Ry. Co. was incorporated, Oct. 7, with a capital stock of $400,000, to construct a street railway. The incorporators are, Carlton H. Reeve, Jas. C. Delong, John C. Van Riper and others.

PINE BLUFF, ARK.—Walter S. Jeter, D. C. Bell, W. H. Langford and other citizens have been appointed as a committee to investigate the advisability of erecting a $150,000 power plant for lighting and street railway purposes. Col. S. W. Fordyce., Pres. St. Louis Southwestern Ry. Co., of St. Louis, is interested.

CRIPPLE CREEK, COLO.—It is announced that the survey for the proposed electric line from Colorado Springs to Cripple Creek has been completed. The power will be obtained from Lake Moraine; estimated total cost, $700,000. Among those interested are, W. S. Jackson; Cashier of El Paso Bank, of Colorado Springs; P. S. Simmons, Pres. of Cog Road; A. E. Carlton, Pres. of First National Bank, of Cripple Creek.

ST. CATHERINES, ONT.—Haines Bros., 100 Broadway, New York, informs us that the St. Catherines & Niagara Central Ry. was recently purchased outright by Charles D. Haines, of Kinderhook, N. Y. Stephen D. Lake, Welland House, St. Catherines, Ont., is chief engineer, and is now at work in putting the present road in first-class condition. The line will be extended from Clifton to the Canadian Park and to a connection at the bridge with the electric railway that is operated over the bridge, a distance of one mile. From St. Catherines, the line will be extended three miles to Port Dalhousie. The motive power will be electricity.

ELECTRIC LIGHT AND POWER.

MONTPELIER, VT.—New bids have been asked by the council for lighting the city for two years from March 1.

ANDOVER, MASS.—At the special town meeting, held Sept. 26, the committee on lighting submitted its report. Another chance will be given the Andover Electric Co. to bid for the contract. Chn. Com., Colver J. Stone.

BATH, N. Y.—Bids are asked until Oct. 22 for steam heating, electric lighting, refrigerating plant and plumbing for the Soldiers' and Sailors' Home; check, 10% of bid. O. H. Smith, Secy.

LOCKPORT, N. Y.—Willard T. Ransom, of this city, and others, have obtained options on property along the east bank of the 18 Mile Creek from Newfane to Charlotteville, a distance of about ten miles. The options will expire April 1. Mr. Ransom writes us that it is proposed to produce 2,000 HP. with a 50-ft. dam. It is expected that construction will soon be begun.

MUMFORD, N. Y.—It is proposed to build a new plant. J. F. Ward may be addressed.

SHERMAN, N. Y.—The Sherman Electric Light Co., recently organized, will build a plant at once. It will have a capacity for 700 16-c. p. incandescent lights. Secy., T. J. Newell.

WATERTOWN, N. Y.—The Watertown Electric Light Co. has purchased the power plant and factory of Zimmerman & Hardiman. The company proposes to extend its plant. D. C. Middleton may be addressed.

WHITESBORO, N. Y.—Another election will be held Oct. 24 to vote on two propositions for public lighting. Proposition No. 1 is to pay $2,200 a year for five years for 29 2,000-c. p. arc lights. Proposition No. 2 is to spend $2,100 a year for three years for 72 60-c. p. Welsbach lights to be furnished by the Welsbach St. Lamp Co.

CAMDEN, N. J.—Bids are asked until Nov. 16 for lighting the streets with electricity for a term of one, three or five years, as stated in our advertising columns. Chn. Com., Chas. C. Southard.

STIRLING, N. J.—Plans for a plant are being considered, according to reports.

EASTON, PA.—Bids have been asked by Alfred Clarke, Elec. Engr., 23 Central St., Boston, Mass., for constructing a plant, to cost about $200,000 for the Easton Power Co., recently incorporated. About 1,500 HP. will be secured. W. A. Thompson is in charge of the work.

ERIE, PA.—Bids are asked by the city engineer until Oct. 20 for 400 lin. ft. of lateral electrical conduit in 9th St., 420 ft. in 7th St., and 440 ft. in Peach St., from 7th to 6th Sts., containing 6 to 32 ducts.

JOHNSTOWN, PA.—Bids are asked until Oct. 18 for furnishing about 250 2,000-c. p. arc lights for a term of one to ten years, according to reports. Cy. Clk., J. W. Cramer.

PHILADELPHIA, PA.—Press reports state that bids will soon be asked for furnishing the machinery and for building a city plant. It will have a capacity for furnishing 2,000 arc lights. The plant is estimated to cost about $250,000. The maintenance, with the overhead system, will be about $175,000 a year; with the underground system, already built, about $200,000 a year. Engr., J. J. De Kinder, Girard Bldg., Philadelphia; Chn. Com., Wilson H. Brown; Dir. Pub. Safety, F. M. Riter.

ST. MICHAELS, MD.—The town commissioners are considering the question of either lighting the town with electricity or with acetylene gas in place of gasoline, at present used.

WASHINGTON, D. C.—Otto Mears, Pres. Chesapeake Bay Construction Co., 1420 New York Ave., N. W., Washington, writes us that the company will soon ask for bids for building water-works at the Chesapeake Bay terminus of the railway, it to be so constructed as to furnish power for an electric plant.

FREDERICKSBURG, VA.—D. Franklin Stokes, Philadelphia, has been engaged to prepare plans for a plant. It is probable that bids will be asked soon; estimated cost, $13,000. Chn. Com., T. McCracken.

WINCHESTER, VA.—The light committee has voted to award the contract for putting in a plant in connection with the water-works to the Fort Wayne Electric Corporation, Fort Wayne, Ind.

ASHEVILLE, N. C.—Bids are asked until Dec. 2 for furnishing 100 2,000-c. p. arc lights for a term of three years, the city to have the privilege of buying the plant. (Postponement from Oct. 7.) Mayor, F. M. Miller; Cy. Clk., M. W. Robertson.

CHAPEL HILL, N. C.—T. F. Lloyd writes us that bids for constructing a plant of 150 lights, etc., for a new mill will be wanted about the first of the year.

RALEIGH, N. C.—The Penitentiary Board is considering the advisability of putting in a plant at the state prison. ——J. E. Ray, Supt. State Institution for the Blind, has been directed to purchase a plant. The buildings are two miles apart.

ORANGEBURG, S. C.—This place voted Sept. 27 to issue $40,000 in bonds for a plant and water-works. Dr. J. G. Wannamaker and M. Rayson are on the committee.

PORT ROYAL, S. C.—Bids are asked until Oct. 22 for furnishing the machinery and for building a plant at the U. S. naval station; appropriation, $20,000. M. T. Endicott, Ch. Bureau Yards and Docks, Washington, D. C.

SPARTANBURG, S. C.—Press reports state as follows; The purchasers of the Aetna light plant have taken no steps yet looking to the improvement of the service. It was understood that they would remodel the plant, and give better and cheaper light. Up to this month nothing has been done. It was expected that the Whitney company would have begun work by this time, but their plans also have failed.

MONROE, LA.—An election will be held Nov. 9 to vote on the question of issuing $153,000 in 40-year 5% bonds, a part of which sum will be used for a plant, water-works, school building, etc.

NATCHITOCHES, LA.—It is probable that an election will be called to vote on the question of issuing bonds for a plant and water-works.

THIBODEAUX, LA.—The question of building a city plant will be voted upon at the election in November.

PALMYRA, O.—The plant of the Palmyra Electric Light Co. will be rebuilt at once, according to reports. Pres., Orin J. Garlock.

WEST UNION, O.—A. A. Kirschner & Co., Manchester, O., have applied for a 20-year franchise.

COLUMBIA CITY, IND.—The council has purchased the plant owned by J. H. Ruch for $21,600, according to reports. The plant will be used for commercial lighting only.

MIDDLETOWN, IND.—The Fort Wayne Electric Corporation, Fort Wayne, has been granted a 10-year franchise. The plant is to be completed in 60 days.

ROCKVILLE, IND.—Jas. B. Nelson, 61 Baldwin Block, Indianapolis, Ind., has been engaged to prepare plans and specifications for a combined plant and water-works. The contract will be let at once. Population, 2,500.

EATON RAPIDS, MICH.—Bids are asked until Oct. 18 for erecting power house, pumps, etc., as stated in our advertising columns last week. Secy. Water and Lighting Bd., Jas. H. Gallery.

IRONWOOD, MICH.—The question of more lights and a better water supply is being considered. Mayor, E. D. Nelson.

CHICAGO, ILL.—A new electric plant to cost $200,000 will shortly be added to the Illinois Steel Co.'s property at South Chicago. Ground was broken Oct. 5 for the new structure just south of the new blast furnaces. The building will be of brick. Its dimensions are 50 × 135 ft. It is the intention of the company to rush the work to completion before winter sets in.

CLINTON, ILL.—Bids are asked until Dec. 1 for certain machinery and work in connection with the proposed plant to be built by H. Surgart. We are informed that the plant will have a capacity for 80 2,000-c. p. arc and 2,000 16-c. p. incandescent lights; estimated cost, $15,000. Henry Johnson is the designing engineer and R. E. Rock the official in charge.

BARRON, WIS.—This place has voted to issue $1,200 in bonds for a plant.

MANAWA, WIS.—The council is reported to have decided to light the town by electricity, the power to be furnished by the Little Wolf River Lumber Co.

MARSHFIELD, WIS.—Only one bid was received Oct. 6 for lighting the town, it being from the Marshfield Water, Electric Light & Power Co. It is stated that the bid was rejected, and that the committee was instructed to investigate the question of a municipal plant.

EARLHAM, IA.—The question of building a plant is being considered, according to reports.

EMMETSBURG, IA.—An election will be held Oct. 20 to vote on the question of granting a 20-year franchise to John McNamara, Fulton, Ill.

GLENCOE, MINN.—It is stated that W. C. Russell is securing estimates for a plant.

LITTLE FALLS, MINN.—It is stated that this city voted Oct. 4 to issue $60,000 in bonds for a plant and water-works.

MINNEAPOLIS, MINN.—E. T. Abbott, Engr. of Hennepin county, Minneapolis, has completed his report to the Twin City Rapid Transit Co. for the proposed dam and power plant on the Mississippi River, about 3½ miles above the city limits, near Rice Creek. The company has acquired more than half of the flowage rights. The dam will back up water about 12 miles. The dam and machinery will cost about $450,000, and the flowage rights and real estate will cost $75,000. With the dam now used below the falls the company would be able to do away with all its steam plants, and also have an excess of 3,000 or 4,000 HP. to sell. Congress passed the bill last winter giving the company permission to build. It is probable that a beginning will be made this winter.

OLIVIA, MINN.—The question of putting in a plant is being considered by the council, according to reports.

PERHAM, MINN.—Bids are asked until Oct. 18 for furnishing the materials and for putting in a plant and water-works. The plant will have seven arc and 300 incandescent lights. Engr., Chas. F. Loweth, 94 East 4th St., St. Paul, Minn., and Davenport, Ia.; Recdr., R. E. Bachman.

HILLSBORO, N. DAK.—The committee is said to have recommended the building of a plant, at a cost of about $5,000.

SENECA, MO.—The Brodrick Realty Co. writes us that a small plant will be wanted, on the completion of the distillery plant, to light this town, furnish power to the distillery, etc. Population, 1,500. J. E. Schreiner, Seneca, may be addressed.

SEATTLE, WASH.—Bids are asked until Oct. 31 for furnishing street lights for one year from Jan. 1; check, $1,000. Secy. Bd. Pub. Wks., Frank Oleson.

TACOMA, WASH.—The council will be petitioned to investigate the practicability of securing power from the Puyallup River, noted in our issue of Sept. 15. It is stated that a plant can be built for about $290,000.

REDLANDS, CAL.—It is probable that the city trustees will soon ask for bids for lighting the city with electricity.

REDWOOD CITY, CAL.—The city trustees have engaged an engineer to prepare plans for an incandescent light plant.

VISALIA, CAL.—Press reports state that the Mount Whitney Power Co. will soon begin the construction of its proposed plant. The water will be diverted from the Kaweah River. Water will be conveyed through pipe 3,300 ft. and will have a vertical fall of 1,300 ft. Wm. H. Hammond and A. G. Wilson are interested.

YREKA, CAL.—James Quinne, of the Yreka Electric Light Co., is making arrangements to put in a power plant. If he secures the contract for furnishing power for mines and other purposes outside of town, he will also furnish power for machinery in this city.

PROVO, UTAH.—The committee has recommended that a municipal plant be built. Chn. Com., J. B. Keeler.

HULL, QUE.—Press reports state that bids will soon be asked by the city clerk for constructing a plant to cost $4,000.

MONTREAL, QUE.—Barry, Ross & McRae, Niagara Falls, Ont., are reported to have been awarded the contract for the construction of a central power house, etc., for the development of 100,000 HP. at Shawinigan Falls, on the St. Maurice River, near Three Rivers, Que., as advertised and described in Engineering News, Sept. 1. Secy. Shawinigan Water & Power Co., B. Shepherd, Montreal; Engrs., T. Pringle & Son, Imperial Bldg., Montreal.

ORILLA, ONT.—We are informed that bids will be asked in November by the town for furnishing the machinery and for building the electric power and light plant. It will be located on the Severn River, about 16 miles from this place. It is to take the place of a steam power plant now owned and operated by the town. Wm. Kennedy, Jr., Room 14, Y. M. C. A. Bldg., Montreal, Que., will prepare general specifications for the hydraulic and mechanical work.

HULL, ENGLAND.—Bids are asked until Oct. 27 for furnishing certain machinery for an addition to the light plant. Elec. Engr., A. S. Barnard, Daggerlane, Hull; Cy. Treas., Geo. Milner.

BRIDGES.

HARTFORD, CONN.—Bids are asked until Oct. 19 for constructing a bridge over the tracks on Broad St. C. H. Bunce, Cy. Engr.; Chas. H. Northam, Pres. Bd. St. Comrs.

ONEIDA, N. Y.—The town board is considering the question of repairing a number of small bridges.

JERSEY CITY, N. J.—A report has been submitted to the board of freeholders by Edlow W. Harrison, Ch. Engr., recommending the construction of a viaduct to be 1,840 ft. long and 35 ft. wide, on the extension of the proposed boulevard to connect Jersey City and Hoboken.

WESTFIELD, MASS.—The following bids were received Oct. 3 for constructing the superstructure for a bridge over Little River at Main St. Oren E. Parks, Engr.:

Walsh Boiler & Iron Works, Springfield, Mass.	$4,290
Springfield Construction Co., Springfield, Mass.	4,497
Harrington, Robinson & Co., Boston, Mass.	5,640
Boston Bridge Works, Boston, Mass.	5,650
Wrought Iron Bridge Co., Canton, O.	5,700
Massillon Bridge Co., Massillon, O.	5,783
Groton Bridge & Mfg. Co., Groton, N. Y.	5,847
King Bridge Co., Cleveland, O.	6,145
Pittsburg Bridge Co., Pittsburg, Pa.	6,149
Variety Iron Works Co., Cleveland, O.	6,200
N. E. Structural Co., Boston, Mass.	6,267
Canton Bridge Co., Canton, O.	6,487
Berlin Iron Bridge Co., E. Berlin, Conn.	6,700
Edge Moor Bridge Wks., Wilmington, Del.	6,748
N. J. Steel & Iron Co., Trenton, N. J.	6,750
Horseheads Bridge Co., Horseheads, N. Y.	6,800
Vermont Construction Co., St. Albans, Vt.	6,900
Toledo Bridge Co., Toledo, O.	6,900
New Columbus Bridge Co., Columbus, O.	7,540
Youngstown Bridge Co., Youngstown, O.	8,473

NEWARK, N.J.—Bids were asked until Oct. 10 for a brick and steel culvert on Springfield Ave., Irvington, and for extending with steel and concrete, the bridge over Third River, Brookfield Ave., Nutley. James Owen, County Engr., Newark.

McKEES ROCKS, PA.—Reports state that J. M. Schoonmaker, Vice-Pres. and Gen. Mgr., Pittsburg & Lake Erie R. R. Co., Pittsburg, has asked the council to take steps for the construction of an overhead bridge at Turner Station.

PHILADELPHIA, PA.—The council has appropriated $810,000 for the construction of bridges during the year 1899.

JACKSON, W. VA.—Bids are asked by the county commissioners until Oct. 20 for a 150-ft. span bridge, 16 ft. wide, with a capacity of 70 lbs. per sq. ft., on masonry foundation. V. A. Dunbar, Design. Engr., Parkersburg, W. Va. ——Plans are being prepared by V. A. Dunbar, Parkersburg, W. Va., for a 125-ft. span Pratt truss. Address County Commissioners, Jackson.

MAGNOLIA, MISS.—Bids are asked until Nov. 7 for constructing a wooden bridge 190 ft. long, over the Boyne Chillo River, near Summit. W. C. Vaught, County Clk.

CHATTANOOGA, TENN.—Reports state that a number of bridges on the Cincinnati, New Orleans & Texas Pacific Ry., between Cincinnati, O., and Chattanooga, are to be repaired at once. G. B. Nicholson, Ch. Engr., Cincinnati, O.; A. Griggs, Div. Supt., and M. Walsh, Supt. Bridges, Somerset, Ky.

NASHVILLE, TENN.—Bids are asked until Oct. 25 for constructing the approaches to the Broad St. and Church St. viaducts, as described in our advertising columns. W.M. Leftwitch, Jr., Cy. Engr.

CINCINNATI, O.—Bids are asked until Nov. 7 for constructing the superstructure of a steel railroad viaduct across the valley of Lick Run. Chas. G. Roth, Clk. Comrs. Water-Wks.

CLEVELAND, O.—Bids are asked until Nov. 5 for constructing the masonry substructure, foundations, abutments, piers, approaches, etc., for the rebuilding of the Center St. bridge over the Cuyahoga River. Geo. R. Warden, Dir. Pub. Wks.

COSHOCTON, O.—Bids are asked until Nov. 4 for constructing three piers and the abutments for a bridge over the Walhonding River, in Bethlehem township, according to reports. Newton Speckman, County Audr.

PONTIAC, ILL.—A contract was awarded Oct. 5 to the Joliet Bridge & Iron Co., Joliet, Ill., at $4,379, for a 150-ft. span steel bridge, 18-ft. roadway, stone piers. G. W. Lacey, Cy. Clk.

EAU CLAIRE, WIS.—The following bids were received Sept. 28 for constructing a new steel bridge of four spans, of 144 ft. each, across the Chippewa River, between Kelsey Ave. and Bridge Sts., and also for removing the old structure: Butler-Ryan Co., sub work, piers and abutments, limestone footing and Dunnville stone above, $20,500; Winona stone for facing, $24,000; Kettle River, stone for facing, $27,000; backing of Dunnville stone. Chas. Stone, masonry, piles and timber foundation, Dunnville sandstone, $8.25 a cu. yd.; Winona limestone and limestone for footing posts, $8.50; piling (driven and cut off), 30 cts. a lin. ft.; lumber per M. ft., in grillage, B. M., $20; rip-rap, $2.50 a cu. yd. Dibley & Robinson, superstructure, taking down, removing old bridge and piling on shore not more than 1,000 ft. away, $33,200. Lafayette Bridge Co., superstructure and substructure, $49,932; remove old bridge for material in it. Newell & Stack, substructure and superstructure, $44,830. W. S. Hewitt, superstructure only, including removal of old structure and piling material within 1,000 ft. of old site, $29,500. J. B. Marsh, three river foundations, $8,100; two shore foundations, $3,200; substructure, $31,500; new steel superstructure, $19,100; taking down and removing old spans, $600; taking down and removing old substructure, $400; will allow for old bridge and piers, $600; bids 5, 6 and 7 contingent upon acceptance of bid No. 4. Milwaukee Bridge & Iron Works, superstructure and substructure, $48,272; superstructure, $29,032; deduct the sum of $400 from each of above bids if allowed to retain old materials in old bridge. Bids based upon using 4-in. rock elm plank. H. E. Horton, bridge complete with elm floor, $50,736; bridge complete, oak floor, $51,736; taking down old bridge if it becomes the property of city, $1,000; if it becomes bidders' property, nothing. Gillette-Herzog Mfg. Co., superstructure, $31,300; foundation, $19,000; will remove old bridge if given material. Pittsburg Bridge Co., substructure and superstructure, $50,500. The Canton Bridge Co., superstructure, including taking down old spans, material to become the bidders, $36,000; superstructure complete, including taking down old spans and hauling it not over 1,000 yards, material to remain property of city, $36,500; substructure, $19,000; will not take substructure without superstructure. Wisconsin Bridge & Iron Co., superstructure and substructure, $47,794; superstructure, $28,998; above bids include taking down and removal of present bridge; bid is based on rock elm plank in roadway. Wrought Iron Bridge Co., substructure, including piers and abutments, $18,997 superstructure, including taking down and removing old bridge, $31,773; substructure and superstructure, $50,493; remove old bridge for the material. L. H. Johnson, superstructure, $31,897. Hoff Bros., Redwing or Winona stone in the three river piers and Dunnville stone for abutments, bridge complete, $50,900; Redwing or Winona stone throughout, $52,700; Kettle River sandstone in the three river piers and Dunnville stone for abutments, $51,800; Kettle River stone throughout, $56,000. Carnegie Steel Co., Ltd., superstructure, $28,137; removing old bridge, included in above, $250; substructure and superstructure, including taking down old bridge and piling where designated by engineer, $46,922; removing old bridge, included in above, $250. C. A. Alderman, Cy. Engr.

ST. PAUL, MINN.—The county commissioners have passed a resolution authorizing the Minneapolis, St. Paul & Sault Ste. Marie Ry. Co. to construct a bridge at Rice St., with two spans 45 ft. wide, with a trestle support in the center, affording two roadways each 18 ft. clear; estimated cost, about $9,500. Thos. Greene, Acting Ch. Engr.

BURLINGTON, IA.—J. H. Sparks & Co., St. Joseph, Mo., have been awarded a contract at $3,640 for five county bridges.

CORYDON, IA.—Bids are asked until Nov. 1 for constructing a bridge of wood and iron, according to reports. W. E. Dennis, County Audr.

OLIVET, S. DAK.—Bids are asked until Nov. 11 for constructing a steel bridge over the James River, of three spans, 185, 50 and 35 ft. and two other bridges of 40 and 30 ft. spans, respectively, according to reports. J. S. Mueller, County Audr.

ST. JOSEPH, MO.—Bids are asked until Oct. 20 for constructing and repairing certain bridges, according to reports. Theo. Steinacker, County Surveyor.

HOUSTON, TEX.—We are informed that bids will soon be asked for a bridge over Buffalo Bayou, on Franklin Ave. W. Bradburn & Co., Engrs.; I. A. Miller, Cy. Engr.; P. S. Banner, Secy.

SPOKANE, WASH.—J. W. Strack, County Surveyor, writes us that a contract was awarded Sept. 30 to Oliver Bros., Spokane, at $775, for constructing two 60-ft. Howe truss spans, with 40-ft. approaches and 16 ft. wide, on crib and rock filled foundation, near Latah, Wash. He also states that a new bridge, probably a combination Pratt truss of 200-ft. span and approaches, will be advertised by the county commissioners about Oct. 17, to be built over the Spokane River, 18 miles east of Spokane; estimated cost, about $5,000. J. W. Strack, Design. Engr., Spokane.

FRESNO, CAL.—Bids will soon be asked by the county supervisors for constructing a bridge 520 ft. long of two spans 120 ft. each; estimated cost, $10,000. Address County Surveyor Hoxie.

LOS ANGELES, CAL.—It is reported that J. H. Dockweiler, Cy. Engr., is preparing plans for three bridges to cost about $23,000. One on Ninth St.,Ave. 26 and Hollenbeck Park. The bonds have been sold and bids will soon be asked.

OAKLAND, CAL.—Bids are asked until Nov. 7 for the construction of the Webster St. bridge over San Antonio Estuary, and removing the foundation of the old structure. Frank C. Jordan, Clk. Supvs.

SAN JOSE, CAL.—Bids are asked by the county supervisors until Nov. 9 for constructing a bridge over Isabel Creek, on the Kincaid Road.

BUILDINGS.

BURLINGTON, VT.—Prescott, Buckley & Callanan, Keeseville, N. Y., were the lowest bidders for the construction of a new high school building in this city, at $82,400. Supt., H. O. Wheeler; Arch., W. R. B. Wilcox, of Burlington.

BROOKLINE, MASS.—The following bids were received Oct. 6 for the erection of a building for police and court purposes, at Washington and Prospect Sts.; bids were submitted for a building of granite and brick or entirely of granite: W. H. & H. A. Root, $67,177 and $72,572; Woodbury & Leighton, $73.546 and $73.546; McNeil Bros., $67,900 and $72,700; Ira G. Hersey, $67,700 and $71,000; Watts H, Bowker, $63,979.85 and $67,479.85; Charles King & Co., $68,000 and $72,000; Mack & Moore, $62,700 and $65,700; Norcross Bros., $74,337 and $76,426; Johnson Bros., $66,984 and $69,754; H. P. Cummings & Co., $66,839 and $70,119; C. H. Dodge, $68,506 and $71,659; E. W. Clark & Co., $65.591 and $70,140. For heating and ventilating: Walworth Construction & Supply Co., $3,225; Huey Bros., $2,797; Smith & Anthony Co., $3,449 and $3,212; Walker & Pratt Mfg. Co., $4,345; A. B. Franklin, $4,720; Buertal & Co., $3,339; Ingalls & Kendricken, $2,972. For plumbing: Burkett & Co., $4,635; Joseph Tucker & Sons, $3,750; Pierce & Cox, $3,865; C. H. Cronin, $3,726; John Manning, $3,970.

BALLSTON SPA, N. Y. — F. R. Comstock, Arch., 98 5th Ave., New York, is completing plans for a large high school building at this place. The exterior will be of cut stone and red face brick and black slate roof with copper trimmings; the interior finish will be of hard wood, with partitions of metal lath.

BUFFALO, N. Y.—Bids will soon be asked, according to reports, for erecting a new school building to replace School No. 16. Plans have recently been approved for a 20-room building, to cost $75,000. Arch., Frederick Mohr, 265 East Utica St.

DAVIDS ISLAND, N. Y.—M. Gibbons & Son, Brooklyn, N. Y., have been awarded the contract for erecting new hospital buildings on Davids Island, opposite New Rochelle, to cost about $30,000. Work is to commence at once.

BAINBRIDGE, N. Y.—Bids are asked until Oct. 15 for constructing the proposed works and for furnishing the hydrants. The contract for furnishing 34,000 ft. of pipe was let Oct. 8. There will be required 40 hydrants, 20,000 lbs. special castings, a reservoir, etc. J. C. Scott, Clk., writes us that the water supply will be secured from a creek; estimated cost, $22,000. Engr., J. Warren Lamb, Cooperstown, N. Y.

BUFFALO, N. Y.—Esenwein & Johnson, Mooney Bldg., have submitted plans to the board of public works for the $700,000 pumping station. It will have eight boilers and engines.

CANISTEO, N. Y.—Press reports state that the council is considering the question of purchasing the works of the Canisteo Water-Works Co.

CHURCHVILLE, N.Y.—C. H. Sage writes us that the proposed new works will require a triplex power pump, a stand-pipe, 12 × 75 ft.; 6,000 ft. of 3-in. and 3,000 ft. of 4-in. cast-iron water pipe; 12 to 15 hydrants, one 4-in. gate valve, etc.; estimated cost, $4,000. A special election will be held soon to vote on the question.

IRVINGTON, N. Y.—At the election Oct. 4 this place voted to appropriate $50,000 for extending the water-works.

NEW YORK, N. Y.—Bids are asked until Oct. 20 for improving the pumping plant at Queens Point, Queens and for furnishing and laying water pipe in the Southern Boulevard, Manhattan. Comr. Water Supply, Wm. Dalton, 150 Nassau St., New York.

SARATOGA SPRINGS, N. Y.—The village engineer has submitted plans and specifications for a main from the Greenfield reservoir; estimated cost, $4,000.

ALLENHURST, N. J.—An election will be held Nov. 4 to vote on the question of purchasing the works of the Coast Water & Sewer Co.

NEWARK, N. J.—The board of works has ordered the sinking of more wells at Belleville for a better water supply.

ORANGE, N. J.—Press reports state as follows: Four reports on the question of increasing the water supply of Orange were presented at the meeting of the council Oct. 3, and after each had been read it was decided to engage another consulting engineer to meet with the council, City Engineer Fred. T. Crane, and Peter Milne, consulting engineer, 1241 Dean St., Brooklyn, N. Y., and discuss the various reports. The various plans suggested are to lay a 16-in. main from the present reservoir to Scotland St., to enlarge Campbell's Pond, to locate another reservoir at Hemlock Falls, when it would be necessary to build a pumping station on South Orange Ave., and then connect with a 16-in. main to the city; a pump at the sewage pumping station in Orange Valley, and the purchase of land for a reservoir at St. Cloud with a main running to Northfield Road, which would require a station to pump water into the present reservoir; estimated cost, about $100,000.

SPRING LAKE, N. J.—Bids are asked until Oct. 15 for the purchase of $70,000 of 30-year 5% gold bonds for constructing the proposed works and a sewerage system. Mayor, E. V. Patterson.

ALLENTOWN, PA.—The council has passed to the second reading an ordinance appropriating $14,000 for the purchase of Schantz's spring, four miles west of the city.

NORRISTOWN, PA.—The Norristown Water Co. has offered to build a 12-in. water main in Main St., at a cost of about $1,500.

PHILADELPHIA, PA.—Bids were opened at the Bureau of Water Oct. 4 for improvements to the Roxborough pumping station, the lowest and the highest bids for each item being as follows: Boilers, I. P. Morris Co., $27,742; Robert Wetherill & Co., $28,800; Brick chimney, Macy, Henderson & Co., $8,487; S. Opdyke, Jr., $14,360. Annex to boiler house, H. C. Nichols Co., $17,983; S. Opdyke, Jr., $34,600.

TYRONE, PA.—The council has offered to purchase the works of the Tyrone Gas & Water Co. for $90,000. This place voted July 7, 1897, to purchase the works.

INDIAN HEAD, MD.—E. S. Brandt, Ch. Clk. Bureau of Ordnance, Navy Dept., Washington, D. C., writes us that the following bids were received Oct. 8 for furnishing and installing a steel stand-pipe:

		Days.
Robt. Wetherill & Co., Chester, Pa..........	$10,250	180
R. D. Wood & Co., Philadelphia..............	8,200	120
Riter-Conley Co., Pittsburg, Pa..............	9,757	115
Maryland Steel Co., Sparrows Point.........	13,124	150

WASHINGTON, D. C.—Otto Mears, Pres. Chesapeake Bay Construction Co., 1420 New York Ave., N. W., Washington, writes us that the company will soon ask for bids to build water-works at Chesapeake Bay terminus of the railway, the plant to be so constructed as to furnish power also for electric lights. The company will ask for plans to be submitted for works of the character mentioned to supply a town of 5,000 people.

NORFOLK, VA.—Bids are asked until Oct. 26 for constructing dams, waste weirs and canals for an addition to the water-works and canals, as stated in our advertising columns. H. L. Smith, Supt. Water Dept.

DURHAM, N. C.—Judge Purnell, of the Federal Court bench, at Raleigh, has appointed P. H. Hardy, Philadelphia, Pa., as receiver for the Durham Water Co.

GREENSBORO, N. C.—It is stated that the city proposes to issue bonds for new works and a sewerage system, to cost about $50,000.

SALEM, N. C.—New York and New Jersey parties, who are about to build a manufacturing plant here, propose to construct works and a sewerage system.

ORANGEBURG, S. C.—This place voted Sept. 27 to issue $40,000 in bonds for works and a light plant. Dr. J. G. Wannamaker, M. Thomas and Dr. T. C. Doyle are on the committee.

SYLVANIA, GA.—E. K. Overstreet writes us that the election to vote on the question of issuing bonds for an artesian well was postponed.

MONROE, LA.—At the election Nov. 9 this place will vote on the question of issuing $153,000 in bonds for purchasing the works and light plant of the Monroe Water-Works & Light Co. and for building a sewer system, etc.

NATCHITOCHES, LA.—It is probable that this place will again soon vote on the question of issuing bonds for works and a light plant. Estimated cost, about $20,000. Population, 2,000.

WHITE CASTLE, LA.—Local papers state that a company will be organized to build works.

KNOXVILLE, TENN.—The question of the city purchasing the works of the Knoxville Water Co. is being considered by the council. Alderman W. H. Goss may be addressed.

BRAZIL, IND.—The question of securing an increased water supply from the Wabash River, a distance of 12 miles, is being considered by the council, according to reports. Estimated cost, $125,000.

ROCKVILLE, IND.—Jas. B. Nelson, 61 Baldwins Block, Indianapolis, Ind., has prepared plans and specifications for combined works and electric light plant. It is the intention of the council to let the contract without delay. Population, 2,500.

EATON RAPIDS, MICH.—Bids are asked until Oct. 18 for the power house, stand-pipe, pumps and boilers for the proposed works, as stated in our advertising columns last week. Bids were opened Oct. 4 for furnishing the pipe, castings, etc. Secy. Bd., Jas. H. Gallery.

IRONWOOD, MICH.—It is proposed to extend the works of the Ironwood Water Co. It is probable that a stand-pipe will be erected on the hill north of the city. Supt., J. S. Kennedy.

CHICAGO, ILL.—Bids are asked until Oct. 15 for building an addition to the 68th St. pumping station. Comr. Pub. Wks., L. E. McGann.

ASHLAND, WIS.—Bids are asked until about Oct. 20 for furnishing the materials and for building a water filter, with piping, etc., at the Vermillion Lake School near Tower, Wis. Address the U. S. Indian warehouse, 1602 State St., Chicago, Ill., the Indian office, Washington, or S. W. Campbell, U. S. Indian Agent, La Pointer Agency, Ashland.

CANBY, MINN.—It is reported that estimates for works will be secured, after which an election to vote on the question will be held.

LITTLE FALLS, MINN.—This place voted Oct. 4 to issue $60,000 in bonds for works and an electric plant, according to reports.

PERHAM, MINN.—Bids are asked until Oct. 18 for furnishing the materials and for constructing small works and a light plant. Engr., Chas. F. Loweth, St. Paul, Minn., and 301 W. 3d St., Davenport, Ia.; Recdr., R. E. Bachman.

ADAIR, IA.—The question of building works to cost about $10,000 is being considered, according to reports.

BLOCKTON, IA.—This place voted Oct. 1 to issue bonds for works. Population, 1,000.

UTE, IA.—J. R. Carter writes us that an election will be held Oct. 20 to vote on the question of issuing bonds for works. Population, 450.

FREMONT, NEB.—It is proposed to extend the water mains in Nye and Maxwell Aves.

JAMESTOWN, N. DAK.—Bids are asked until Nov. 1 for sinking a 4 and 6-in. artesian well 1,500 ft., with and without guarantee of water. City Audr., Geo. C. Eager.

BRITTON, S. DAK.—R. C. Libbey, it is stated, proposes to sink an artesian well.

CORSICANA, TEX.—Upton Blair, Engr. Compress Co., is reported as investigating sources for a water supply.

SHAWNEE, OKLA.—Bids are asked until Oct. 20 for furnishing the materials and for building works; estimated cost, $35,000. Check, $1,000. Address R. H. Clayton and E. E. Hood.

RENO, NEV.—Bids are asked until Nov. 12 for the purchase of $130,000 of 6% water bonds for the proposed works. Pres. Council, R. S. Osburn; Clk., F. B. Porter.

WARD, COLO.—This place voted Sept. 27 to issue $12,000 in bonds for works. As soon as the bonds are sold bids for the construction will be asked. Engr., D. J. McCanne, 1600 17th St., Denver, Colo.

OAKESDALE, WASH.—The construction of works is proposed, according to reports.

ROSALIA, WASH.—The council has levied a tax of 7 mills for the proposed works to cost about $2,500.

SAN LUIS OBISPO, CAL.—The town trustees have voted to take definite steps at once for the construction of municipal works to cost about $90,000. Cy. Clk., J. A. Goodrich.

WHITTIER, CAL.—Plans for the proposed works prepared by Burr Bassell, 524 Stimson Block, Los Angeles, Cal., have been accepted by the city trustees. About $40,000 of 20-year bonds will be sold. Cy. Engr., J. J. Jessup.

SHERBROOKE, QUE.—The following improvements to the works have been recommended by Willis Chipman, Bay St., Toronto, Ont.: Larger intake pipe, $4,000; duplicate of pumping machinery, $3,000; repairs to reservoir and new main, $4,000; filtration plant, $18,000; replacing of water mains, $33,000.

ST. CATHARINES, ONT.—The question of making certain improvements to the works and for putting in a filtration plant of 1,000,000 gallons capacity, is being considered; estimated cost, $14,000.

NEW DENVER, B. C.—J. C. Harris, it is stated, proposes to construct works for this place. Water will be secured from wells two miles distant.

PACHUCA, MEX.—Press reports state that the state government of Hidalgo has purchased the Pachuca water-works for $250,000, payable in installments extending over more than ten years. The plant consists of dams and reservoirs, eleven kilometers of conduits and four kilometers of distributing pipe, and said to be in first-class condition.

MATEHUALA, SAN LUIS POTOSI, MEX.—Press reports state that W. B. A. Dingwall proposes to build works for this city.

SEWERAGE.

BOSTON, MASS.—The Metropolitan Sewerage Commission has awarded the contracts for proposed additions to the pumping plants at Deer Island, on the southerly side of Chelsea Creek, in East Boston, and at Malden bridge, in Charlestown, to the E. P. Allis Co., of Milwaukee. The bid for that at Deer Island is $27,200; at East Boston, $25,600; at Charlestown, $25,800. Chief Engineer Brown, of the commission, is busy making a study for the new high level sewerage system for the Charles and Neponset River valleys.

CONCORD, MASS.—The contract for preparing the sewage filtration beds for this place has been let to J. W. Meskill, 164 Broadway, Everett, Mass., at $1,473. The itemized bids will be given next week. Engr., Leonard Metcalf, 89 State St., Boston.

NEWTON, MASS.—Bids are asked until Oct. 21 for furnishing about 90,000 ft. of 24 to 4-in. sewer pipe, about 4,700 bbls. of American cement, 800 lbs. of Portland cement and 200 cast-iron manhole frames and covers; check, $200. St. Comr., Chas. W. Ross.

SPRINGFIELD, MASS.—Bids are asked until Oct. 14 for constructing 600 ft. of egg-shaped, 26 × 39-in. brick sewer. Cy. Engr., Chas. M. Slocum; Supt. of Sts., Wm. L. Dickinson.

WATERTOWN, MASS.—Bids are asked until Oct. 25 for building a sewer at the Watertown Arsenal. Maj. J. W. Reilly, Ordnance Dept., Commanding.

BINGHAMTON, N. Y.—The council has voted to build a sewer in Clinton St. Mayor, Jerome De Witt.

BUFFALO, N. Y.—Mayor Diehl has vetoed the ordinance appropriating $90,000 for a sewer in Emslie and Van Rensselaer Sts.——The council has voted to build a sewer in Bryant St.

BUFFALO, N. Y.—The filling of the Hamburgh Canal is being agitated and plans have been prepared by City Engineer Bardol. The sewage disposal and filling of the canal will cost about $700,000.——New bids will be asked for constructing a sewer in Hampshire and Ferry Sts., to cost about $34,000.

NEWBURG, N. Y.—The board of public works has recommended that the council build an iron pipe and brick relief sewer in First St., fro Dubois St. to the river, at a cost of about $36,600. Cy. Clk., D. J. Coutant.

ONEIDA, N. Y.—The council will be petitioned Oct. 18 to extend the sewers.

ROCHESTER, N. Y.—H. N. Cowles was awarded contract Oct. 3 for building a sewer in North Clinton St., at $6,867.

HOBOKEN, N. J.—Local papers state that steps have been taken by the council for improving the sewers in the uptown section of the city. It is said that this is the first movement towards the reconstruction of the system of the city. Cy. Surv., W. F. Whittemore.

SPRING LAKE, N. J.—Bids are asked until Oct. 15 for the purchase of $70,000 of 30-year 5% bonds for a sewerage system and water-works. Mayor, E. V. Patterson.

CARLISLE, PA.—Maj. Chauncey Ives, Chambersburg, Pa., has been engaged to prepare plans, etc., for a system.

KINGSTON, PA.—Plans for a system have been prepared by Borough Engineer Wright. Burgess Starbird may be addressed.

WASHINGTON, D. C.—Bids are asked by the district commission until Oct.22 for building sewers.——Local papers state that Capt. Lansing H. Beach, the District Engr. Comr., has returned from a visit to Boston and Brockton, Mass., and Providence, R. I. He inspected the sewage pumping stations, the precipitation works and the filtration beds of the sewer systems of those cities. Congress has appropriated $25,000 for the preparation of plans for a sewage pumping station at the foot of New Jersey Ave., and it was in connection with these plans that Capt. Beach made his trip north. It is proposed to pump the sewage across and under the Eastern Branch, from the point mentioned, and then raised to such a height as would cause the sewage, by natural gravitation, to flow into the river, several miles below. It is believed the sewage can be carried across the hills at less expense than it would cost to precipitate it. It is the purpose of the Commission to use every effort to secure the necessary appropriations at the coming session of Congress.

RICHMOND, VA.—The question of improving the Fifth St. sewer is being considered.

TAMPA, FLA.—Bids are asked until Oct. 25 for furnishing the materials and for constructing 40,000 ft. of pipe sewers and house connections, as stated in our advertising columns. Ch. Engr., J. N. Hazlehurst; Pres. Bd. Pub. Wks., W. B. Henderson.

MEMPHIS, TENN.—The council proposes to spend $150,000 for sewers. Mayor Williams may be addressed.

COLUMBUS, O.—Bids are asked until Oct. 18 for building an 18 and 12-in. pipe sewer in Spruce St. Clk. Bd. Pub. Wks., Jas. A. Fanning.——The residents of the West Side have petitioned the council to build additional sewers to drain that portion of the city.

EAST CLEVELAND, O.—Bids are asked until Nov. 5 for constructing sewers in a number of streets. Engr., Walter P. Rice Engineering Co., Society for Savings Bldg., Cleveland; Clk., H. B. Chapman.

HAMILTON, O.—Bids are asked until Oct. 17 for constructing a storm sewer in Fourth St. Cy. Engr., L. A. Dillon; Cy. Clk., M. O. Burns.

LEBANON, O.—Bids are asked until Oct. 22 for constructing 1,262 ft. of 12-in. and 182 ft. of 6-in. pipe sewers, with necessary appurtenances. Cy. Engr., W. R. Kemper.

TOLEDO, O.—Bids are asked until Oct. 24 for constructing 15 and 12-in. pipe sewers in certain streets. Cy. Clk., L. P. Harris.——Bids will be asked at once to construct an 84 to 66-in. brick sewer in certain streets.

WELLSVILLE, O.—E. J. Millar, Wheeling, W. Va., has submitted plans and specifications for a system. At the election to be held Nov. 8 the question of issuing $75,000 in bonds for the system will be voted upon.

HUNTINGTON, IND.—Bids are asked until Oct. 25 for constructing a 24-in. pipe sewer in Warren St. Cy. Engr., Frank Guthrie; Cy. Clk., C. H. Cutshall.

INDIANAPOLIS, IND.—The city engineer is preparing plans for sewers in a number of streets to cost a total of about $160,000.

INDIANAPOLIS, IND.—Bids are asked until Oct. 19 for building sewers in West Michigan St. Pres. Bd. Pub. Wks., M. A. Downing.

LOGANSPORT, IND.—Bids are asked by the sewer committee for building 1,100 ft. of 30-in. pipe sewer in Penn St., to cost $1,200.

MONTICELLO, IND.—Bids are asked until Oct. 28 for building a 30-in. pipe sewer in Washington St. Pres. Bd. Trustees, M. Wolz; Clk., W. M. Hamlin; Cy. Engr., Web. P. Bushnell.

RICHMOND, IND.—Bids are asked until Oct. 14 for building a certain sewer. Clk. Bd., Geo. J. Knollenberg.

WHITING, IND.—Bids are asked until Oct. 24 for furnishing the materials and for constructing about 2½ miles of pipe and about a mile of brick sewers. Town Clk., John G. Erdlitz; Pres. Bd. Trustees, C. A. Johnson.

GROSSEPOINTE, MICH.—The council proposes to build a trunk sewer to the lake front.

VICKSBURG, MICH.—The Vicksburg Sewer Co. has been incorporated to operate the system here. Capital stock, $2,000. Pres., Wm. W. Scott; Secy., Frank S. Coller; Treas., Elbert L. Page.

CHICAGO, ILL.—Bids are asked until Oct. 14 for building sewers in a large number of streets. Pres. Bd. Local Improvements, L. E. McGann.

ROCKFORD, ILL.—Bids are asked until Oct. 25 for furnishing the material and constructing certain sewers on the Eighth St. sewer district, as described in our advertising columns. E. W. Brown, Pres. Bd. Local Improvements; Edwin Main, Cy. Engr.

FARGO, N. DAK.—J. A. Johnson, Mayor, writes us that it is proposed to build a mile of 15 and 12-in. pipe sewers at a cost of $2.15 a ft. Cy. Engr., S. F. Crabbe.

DENVER, COLO.—We are informed that plans and specifications, report, etc., for storm sewers, to cost $400,664, were adopted Sept. 23. This amount is for main sewers alone, the largest of which will be 81 ins. in diameter. The plans as adopted contemplate the drainage of 2,100 acres at a total cost of about $1,000,000. The contracts for the storm sewers will probably be let Dec. 15. Des. Engr., Harvey C. Lowrie, Denver; Pres. Bd. Pub. Wks., S. N. Wood.

SANTA MONICA, CAL.—Press reports state as follows: Plans and specifications are being prepared for a branch sewer which is to afford drainage for a long stretch of beach places, from which the sewage cannot be carried by gravity into the new system. In order to dispose of the sewage draining into this branch, it will be necessary to raise it by pumping. A receiving tank will be located near central portion and in connection with it a 40-HP. pump will be installed. The tank will have a capacity of 100,000 gallons. The sewer will be built on a grade to drain into the basin, from which it may be pumped into the present trunk sewer and carried to sea. The pump will have a capacity of 100,000 gallons an hour. Of the 8,000 ft. of sewer proposed, only about 1,000 ft. are to be built soon. Cost of the whole of this branch is estimated at $13,000, and of that part to be built at once about $7,500. It will be paid for out of the $40,000 bond issue, which the city has made.

LACHINE, QUE.—The council is reported to have decided to take up the matter this winter of building a system for this place; estimated cost, about $200,000.

MERIDA, YUCATAN, MEX.—It is stated that a contract will soon be let by the municipal authorities for building a system for this city; estimated cost, $1,467,000; population, 60,000.

GARBAGE DISPOSAL—STREET CLEANING

ATLANTIC CITY, N. J.—The following bids were received by the council Oct. 3 for erecting a new garbage crematory: Rudolph R. Baizley, $31,585; Fred. T. Moore, $32,211, and Cyrus Borgner, $33,265. The bids were called to see if the contracts recently let for the work to Thos. K. Dalzell, at $29,000 was too high. The council, at an adjourned meeting Oct. 4, voted to reject the bids as too high, the estimate of Mr. Dalzell still standing.

WELLSVILLE, O.—The board of health has directed the secretary to ask for estimates for building a garbage disposal plant. Messrs. Dennis, Ashley and Whitacre, of the board, may be addressed.

MILWAUKEE, WIS.—It is stated that the Engel Cremation & Sanitary Co. will begin work in a few days on its proposed plant for this city. A bond for $52,500, the amount of the contract, has been deposited. Engr. and Supt., Robt. Robinson; Gen. Mgr., C. W. Smith.

LONG BEACH, CAL.—It is proposed by the town trustees to purchase a street sprinkling wagon for $2,500.

STREETS AND ROADS.

HALLOWELL, ME.—A contract has been awarded to A. G. Westcott for about 75,000 paving blocks, according to reports.

CHELMSFORD, MASS.—Bids are asked until 12 m., Oct. 13, for about 4,400 lin. ft. of highway. T. C. Mendenhall, Chn. Mass. Highway Comn., 4 Mt. Vernon St., Boston.

NORTH READING, MASS.—Bids are asked until 12 m., Oct. 13, for about 2,700 lin. ft. of highway. T. C. Mendenhall, Chn. Mass. Highway Comn., 4 Mt. Vernon St.

MERRIMAC, MASS.—Bids are asked until 12 m., Oct. 13, for 1,600 lin. ft. of highway. T. C. Mendenhall, Chn. Mass. Highway Comn., 4 Mt. Vernon St., Boston.

GLOUCESTER, MASS.—John J. Somes, Cy. Clk., informs us that the city will not purchase a new road roller, but will repair the old one at a cost of $800.

PITTSFIELD, MASS.—The commissioners of Columbia county, N. Y., and Berkshire county, Mass., will construct a road between Pittsford and New Lebanon, N. Y.; estimated cost, $7,875.

QUINCY, MASS.—Commissioner of Works Knowlton has estimated the cost of the proposed sidewalks at $7,807.

WESTERLY, R. I.—The council has voted to purchase a steam road roller.

ENFIELD, CONN.—Bids are asked until Oct. 20 for a section of new road on High and Enfield Sts. Henry D. Alden, First Selectman.

WOBURN, MASS.—John H. Time, Cy. Clk., informs us that the council has not provided funds for the proposed macadamizing, to cost $6,500, and the work will probably not be done this year.

DEERFIELD, N. Y.—The state board of public works, Albany, has awarded a contract to James J. Dwyer, Utica, at $13,806, for the improvement of the River Road, for about 2½ miles.

BUFFALO, N. Y.—Bids are asked until Oct. 21 for furnishing the material and for paving on Mechanic and Hydraulic Sts. R. G. Parsons, Secy. Bd. Pub. Wks.——A committee has been appointed to consider the proposed improvement of Niagara Square.

LANSINGBURG, N. Y.—Chas. A. Roemer, Cy. Engr., informs us that a contract has been awarded to Thos. H. Kane, Troy, N. Y., at about $64,000, for about 50,854 sq. yds. of macadam.

PATCHOGUE (L. I.), N. Y.—The village trustees have decided to have new sidewalks laid on Main St. and Ocean Ave., with stone or brick.

POUGHKEEPSIE, N. Y.—Bids were asked until Oct. 11 for repaving Crannell St., between Main and Mill Sts.; surety, $1,000. Chas. E. Fowler, Supt.

SILVER CREEK, N. Y.—The city council has engaged O. H. Gardner, Jamestown, N. Y., to make a survey of the town and establish a grade throughout the village.

SYRACUSE, N. Y.—The council has passed a resolution to pave McBride St. with asphalt, between James and Ash Sts.

ATLANTIC CITY, N. J.—The Delaware River Quarry & Construction Co., Lambertville, N. J., was awarded a contract Oct. 3, at $56,963, for macadamizing on Pacific Ave. The itemized bids are given under Contract Prices. J. A. Hackney, Cy. Surv.; Edwards S. Lee, Chn. Com.

BAYONNE, N. J.—The council has awarded a contract to Rehill & Edwards, at $4,660, for grading on Ave. B.

GREENSBURG, PA.—A resolution has been passed by the council to pave Pennsylvania Ave. with brick, from West Pittsburg St. to Second St. F. V. B. Laird, Pres.; Ira C. Snyder, Cy. Clk.

JERSEY CITY, N. J.—Reports state that Chief Engineer Van Keuren and Chairman Nolan, of the street board, will urge the North Jersey St. Ry. Co. to pave between the tracks on Pavonia Ave.

NORRISTOWN, PA.—The highway committee has recommended that the terms of the Buffalo Pitts Co., Buffalo, N. Y., be accepted, for furnishing a road roller for $3,500, on 30 days' trial.

PHILADELPHIA, PA.—Bids are asked until Oct. 17 for about 720 sq. yds. of asphalt and 175 sq. yds. of concrete. Address Wm. H. Lambert, 395 City Hall.

READING, PA.—Bids are asked until Oct. 20 for 4,000 sq. yds. of asphalt paving and 1,000 lin. ft. of curbing, on South Fifth St. S. S. Hoff, Cy. Engr.

WASHINGTON, PA.—Geo. L. Walker, Burgess, informs us that it has been voted to issue $67,000 in bonds for paving, which will be done next spring. Geo. Jenkins, Engr.

WILLIAMSPORT, PA.—Bids are asked until 12 m., Oct. 13, for paving on West St. with brick, on 6-in. concrete foundation. Theo. Cornman, Cy. Clk.; H. C. Reeder, Deputy Cy. Engr.

HANOVER, PA.—An election will be held in a few weeks to vote on a proposition to borrow $50,000 for paving and highway improvements, according to reports.

OAKLAND, MD.—Bids are asked until Oct. 25 for the purchase of $13,000 of 4% street improvement bonds. R. S. Jamison, Mayor.

PETERSBURG, VA.—The proposed brick paving, etc., on Sycamore St., from Old St. to Washington St., is estimated to cost $14,330. N. T. Patterson, Pres.

ST. AUGUSTINE, FLA.—P. S. Amon, Cy. Clk., informs us that the council has appropriated an amount equal to the city's portion, for paving St. George St. with brick, a distance of about four blocks.

TAMPA, FLA.—Bids are asked until Oct. 25 for furnishing the material and paving about 28,865 sq. yds. with brick and for 14,500 ft. of granite curbing, as stated in our advertising columns. W. B. Henderson, Pres.; J. N. Hazlehurst, Ch. Engr.

MONTGOMERY, ALA.—Bids are asked until Oct. 17 for furnishing the material and setting stone curbing and surface sewers for six months. R. H. Sommerville, Treas.

CINCINNATI, O.—Bids are asked until Nov. 3 for constructing and repairing artificial stone sidewalks for one year. Geo. H. Spellmire, Clk. Bd. Cy. Affairs.

CINCINNATI, O.—Bids are asked until Nov. 7 for constructing and repairing of all plank sidewalks on the eastern and western districts for one year. Geo. H. Spellmire, Clk. Bd. Cy. Affairs.

CLEVELAND, O.—Bids are asked until Oct. 15 for grading and brick paving on Hickory Lane and four other streets, and until Oct. 29 for grading and Medina block paving on Willett and Quincy Sts. Geo. R. Warden, Dir. Pub. Wks.

CLEVELAND, O.—Bids are asked until Oct. 19 for furnishing and laying stone flagging on certain streets, and until Oct. 29 for grading, draining and paving portions of nine streets. Geo. R. Warden, Dir. Pub. Wks.

COLUMBUS, O.—Bids are asked until Oct. 18 for furnishing and constructing brick, asphalt and macadam pavement on Grant St., Wilson Ave., and Latta Ave., respectively. James A. Fanning, Clk. Bd. Pub. Wks.

TOLEDO, O.—Bids are asked until Oct. 24 for furnishing and constructing Buckeye brick pavement, etc., on 21st St., and until Nov. 7 for paving on Eastern Ave. with Buckeye brick, etc. L. P. Harris, Cy. Clk.——The council has passed ordinances for paving on Knower St. and one alley with Buckeye, Wassall blocks, etc., and constructing stone or brick sidewalks on Superior and Erie Sts.

URBANA, O.—The council has resolved to lay brick sidewalks on Dugan and Kenton Sts.

HUNTINGTON, IND.—Bids are asked until Oct. 25 for furnishing the material and constructing 6-ft. brick sidewalks on Washington St. and one alley. Frank Guthrie, Cy. Engr.

IRVINGTON, IND.—Bids are asked until Oct. 29 for grading and constructing cement sidewalks on Irvington Ave. John V. Coyner, Cy. Engr.

NEW ALBANY, IND.—We are informed that the question of constructing a turnpike to Bridgeport, a distance of 10 miles, is still in contemplation, and will be determined in a few days. Harry Vance, County Audr.; E. B. Coolman, County Surveyor.

RICHMOND, IND.—Bids are asked until 2 p. m., Oct. 14, for grading, graveling and setting curb and gutter on North D St., between 15th and 16th Sts. Geo. J. Knollenberg, Clk.

TERRE HAUTE, IND.—Bids are asked by the council until Nov. 1 for concrete and brick sidewalks and grading in certain streets.

DETROIT, MICH.—Bids are asked until Oct. 15 for furnishing and laying about 1,251 sq. yds. of cobble paving and for 621 yds. of excavation. D. W. H. Moreland, Pres. Bd. Pub. Wks.

GRAND RAPIDS, MICH.—Geo. W. Ames, Cy. Engr., has submitted estimates for the proposed paving of Canal St.; with asphalt, $18,625; brick, $13,250.

SAGINAW, MICH.—Resolutions have been passed by the council for constructing numerous sidewalks.

CARTHAGE, ILL.—Thos. S. McLanahan, Monmouth, Ill., is preparing plans and specifications for the improvement of the streets around the public square, and Main St. from the square to the depot, in Carthage, by paving them with brick; requiring about 25,735 sq. yds. brick and 16,420 lin. ft. of curbing and excavating about 9,000 cu. yds. Total distance about one mile, 30 ft. wide. Bids will soon be asked. Address Thos. S. McLanahan.

CHICAGO, ILL.—Bids are asked until Oct. 14 for asphalt, brick, granite and macadam paving, according to reports. L. E. McGann, Pres. Bd. Local Improvements.

QUINCY, ILL.—F. Grover, County Engr., has estimated the cost of the proposed Missouri Road at $12,000. A meeting was held Oct. 4 to consider the plans, according to reports.

OSKALOOSA, IA.—S. Ver Veer, Cy. Engr., advises us that about 1½ miles of brick paving will probably be laid next year. He states that a similar amount has been laid during the past season.

ST. PAUL, MINN.—The county commissioners are considering the question of constructing new roads.

ST. PAUL, MINN.—Bids are asked until Oct. 17 for improving Feronia and Dewey Aves. C. H. Bronson, Clk. Bd. Pub. Wks.

OMAHA, NEB.—Bids are asked until 2 p. m., Oct. 14, for grading 33d St., from Davenport St. to Chicago St. Andrew Rosewater, Chn. Bd. Pub. Wks.

ST. JOSEPH, MO.—Bids are asked until Oct. 20 for repairing 15 sections of road. Theo. Steinacker, County Surveyor.——Bids will soon be asked by the council for paving Seventh St. with asphalt from Robidoux to Olive St.

MANUFACTURING PLANTS.

MILFORD, ME.—It is reported that J. Fred Webster contemplates the erection of a large pulp and paper mill at Milford, near the plant of the Bodwell Water Power Co.

COHOES, N. Y.—The J. H. Murphy Mfg. Co. has been incorporated, with a capital stock of $150,000, to establish a plant for the manufacture of knit goods. The machinery has not yet been secured.

NIAGARA FALLS, N. Y.—Reports state that the Union Carbide Co. has made a contract with the Niagara Falls Power Co. for additional 6,000 HP., and that this will necessitate the construction of a new plant to cost about $150,000.

HOMESTEAD, PA.—The Penn Bridge Co., of Beaver Falls, Pa., is reported to have received the contract for erecting the ingot mold buildings for the Leechburg Foundry & Machine Co., of Pittsburg, which expects to remove its plant from Leechburg to Homestead.

READING, PA.—J. S. Koch has been awarded the contract for erecting a machine shop for the Carpenter Steel Works, 36×136 ft., with a 40-ft. L. Besides this, the new annex will include a crusher, laboratory, etc., to cost about $200,000.

BROOKVILLE, PA.—George W. Sykes, of Reynoldsville, and Levi Heidrick, of Brookville, will build a woollen mill at this place, to employ 100 men and cost $50,000, according to reports. Other capitalists are expected to establish a kindling wood factory, while a paper mill is among the possibilities.

RICHMOND, VA.—It is reported that the Richmond Locomotive & Machine Works contemplates the establishment of a steel plant in connection with its already extensive plant in this city.

CHINA GROVE, N. C.—The erection of a new cotton spinning mill at this place is contemplated by a company of local business men. It is said that the machinery, and probably an electric light plant, will soon be contracted for.

WELDON, N.C.—A company was incorporated Oct. 1 with a capital stock of $50,000, by W. E. Daniel, W. A. Pierce, W. T. Shaw, and others, to build and operate a large fireproof knitting mill on the Roanoke River, near Weldon.

SALUDA, S. C.—Reports state that a 7,000-spindle cotton mill will soon be started at this place by Alvin Estheridge, of Saluda, and W. S. Howland. Contracts have not yet been awarded.

CLARKSVILLE, TENN.—A fire in this city Oct. 5 destroyed the Grange tobacco warehouse, containing 4,500 hogsheads of tobacco; the Louisville & Nashville Ry. station, six freight cars, and Geacey Bros.' coal and storage shed. Total loss, over $400,000; insurance, about $300,000.

WINSTON, N. C.—Reports state that a company has recently bought 1,700 building lots in the suburbs of this city, and that it proposes to build a number of small manufacturing plants and cottages for the operators.

CLIO, S. C.—The Red Bluff Cotton Mills Co. has doubled the capacity of its plant, and will buy new machinery, according to reports.

YORKVILLE, S. C.—W. N. Ashe and others contemplate the erection of a new cotton mill here, near the present plant, to have a capacity of about 10,000 spindles.

OWOSSO, MICH.—Reports state that L. E. Woodward, whose factory was burned recently, has promised to erect a $100,000 plant, if the town would grant him a bonus of $20,000.

YPSILANTI, MICH.—The mill of the Peninsula Paper Co. was burned Sept. 28, causing a reported loss of $80,000.

SOUTH MILWAUKEE, WIS.—The United States Glue Co. has had plans prepared for its new glue factory to be erected near South Milwaukee, at a cost of about $110,000. Reports state that Paul Riesen has the masonry contract; Hansell & Elcock Foundry Co., of Chicago, the iron contract. Work is expected to be completed by Jan. 1.

GAS PLANTS.

SARATOGA SPRINGS, N. Y.—The board of street commissioners has received an application from Albert L. Judson, Albany, for a franchise for an electric light and gas plant.

TYRONE, PA.—The council has passed a resolution to purchase the gas and electric lighting plant of the Tyrone Gas & Water Co., for $90,000.

WILMINGTON, DEL.—The Wilmington Coal Gas Co. will increase the capital stock from $550,000 to $600,000, for the enlargement and improvement of the works and the extension of the mains. Edward Betts, Pres.

BIRMINGHAM, ALA.—Reports state that an opportunity is now open to any party who desires to establish a gas plant. The franchise which was awarded to Messrs. London and Haas has been annulled. Walter Moore, J. J. Altman and R. H. Kerr, Com.

FRESNO, CAL.—The Fresno Gas Co. will take up the 4-in. mains on Mariposs St. and substitute 8-in. mains. It is also the intention of the company to put in 8-in. pipes in the place of the 4-in. on K St., between Fresno and Tulare. Other improvements are talked of, according to reports.

MISCELLANEOUS CONTRACTS.

CULVERTS.—Jamestown, N. Y.—Bids are asked until Oct. 15 for building two stone culverts. C. P. Carlson, Chn. Com. Bd. Pub. Wks.

LIMESTONE.—Binghamton, N. Y.—The Helderberg Cement Co., Howe Cave, N. Y., has been awarded a contract to furnish 4,000 tons of limestone.

BREAKWATER.—Ellensburg, Wash.—Bids are asked until 10 p. m., Oct. 14, for constructing a breakwater across the Teanaway River. S. T. Sterling, County Clk.

RIVER WORK.—Maple Rapids, Mich.—Reports state that a contract has been awarded to Charles Kerr, Ashley, Mich., at about $40,000 for improving the Maple River.

DREDGING.—Boston Harbor, Mass.—The harbor and land commissioners have awarded a contract to Simon Hess, New York, at $29,990, for dredging in the south bay.

DREDGING.—Brooklyn Navy Yard, N. Y.—Bids are asked until Oct. 22 for dredging at the Brooklyn navy yard. M. T. Endicott, Ch. Bureau Yds. and Docks, Washington, D. C.

FIRE ENGINE.—Averill Park, N. Y.—Andrew Knowlson has been appointed chairman of a committee to ascertain the prices of fire engines, and to select a suitable site for an engine house.

COAL CONVEYORS.—Buffalo, N. Y.—The board of public works has received but one bid; that of the Aultman Co., Canton, O., at $16,800, for furnishing coal conveyors of a daily capacity of 200 tons.

CREMATORY.—Los Gatos, Cal.—Plans are being prepared, according to reports, for a crematory for the cemetery at Los Gatos, including a chapel, to cost about $60,000. Arch., T. P. Ross, Columbian Bldg., San Francisco, Cal.

CHIMNEYS.—Buffalo, N. Y.—Bids are asked by the department of public works until Oct. 20 for constructing three brick chimneys, each 8 ft. in diameter and 225 ft. in height, including necessary flues, changes of boilers, etc.

REMOVING WRECK.—Rockland Harbor, Me.—Bids are asked until Nov. 14 for removing the wreck of the schooner "William H. Jones," including cargo, as stated in our advertising columns. Maj. R. L. Hoxie, U. S. Engr., Portland, Me.

DRY DOCK.—Algiers, La.—Bids are asked until Oct. 31 (postponement from Oct. 21) for a combined floating and gravity steel dry dock, with shore connections and appurtenances. Mordecai T. Endicott, Ch. of Bureau of Yards and Docks, Washington, D. C.

DRAINAGE.—Harvel, Ill.—Bids are asked by the commissioners of Union Drainage District No. 2 of Kings and Harvel townships until Oct. 22 for the construction and improvement of a number of drains, requiring the excavation of about 108,167 cu. yds. of material; 26 bridges, and approximately 16,935 ft. of 8, 10 and 12-in. tiles. Engr., J. W. Dappert, Taylorville, Ill.

HOISTING ENGINES.—Buffalo, N. Y.—The following bids have been received by the board of public works for furnishing hoisting engines: American Hoist & Derrick Co., $1,390 for No. 90; $1,000 for No. 18; Lake Erie Boiler Works, hoisting engines, $2,500; S. Flory Manufacturing Co., Bangor, Pa., $915; Dobbie Foundry & Machine Co., $1,021 and $1,440, or $1,656 and $2,280.

HEATING AND PURIFYING APPARATUS.—Buffalo, N. Y.—Bids have been received by the board of public works for heating and purifying apparatus, for 34 boilers, in groups; from the following: Hoppes Manufacturing Co., Springfield, O., $14,440; Irlbacker & Sons, $8,743; Fuel Economizer Co., Matteawan, N. Y., six fuel economizers, $22,500; Manchester Manufacturing Co., North Manchester, Ind., $5,500; Robert Learmouth, $9,192; C. C. Peck, $5,500, or $3,225, or $4,000.

TELEPHONE WORK.—Bristol, R. I.—The Providence Telephone Co. has applied for permission to lay underground wires between Union and Washington Sts. Councilmen Church, Mason and Thompson may be addressed.

ICE SHIELDS.—Buffalo, N. Y.—The board of public works received the following bids Sept. 29 for furnishing ice shields for the inlet pier: Hingston & Woods, $8,200; Joseph J. Churchyard, $8,490; Lake Erie Boiler Works, $17,195; Buffalo Dredging Co., $9,600.

TUNNEL.—Boston, Mass.—The following bids were received Oct. 10 for the construction of the tunnel at the East Cambridge registry of deeds building: Richard Falvey, $7,833; Cyrus Bartan, $10,400; C. E. Trumbull, $8,500; P. T. Carter, $9,300; James Wilkinson, $5,800; G. C. Emmerson, $9,456.40; Charles McMahon, $7,970; Henry, McGahey, $8,833; I. C. Harris & Co., $8,300; Jarvis Engineering Co., $7,777; A. H. Kittredge, $8,014; Connors Bros., $7,895; Albert Eichorn, $10,987; Gustavius Co., $8,500.

CONTRACT PRICES.

STREET SIGNS.—St. Paul, Minn.—The following bids were received by the board of public works Oct. 3 for furnishing 1,200 street signs to be placed at street intersections which are illuminated with electric lights: Caesar Bros., New York, 30 cts. for both 24 and 26-in. signs; total cost, $360; C. Neuman, St. Paul, 33 and 35 cts. each; Thompson Paint Co., St. Paul, 55 and 60 cts.; F. M. Bendick & Co., Chicago, 39½ cts., both sizes; Noyes Bros. & Cutler, St. Paul, 35 and 36 cts.; Enamel Iron Co., Beaver Falls, Pa., 33 cts., both sizes; M. N. Webber, St. Paul, 47 and 50 cts.; T. R. Wilwerscheid, St. Paul, 37½ cts. both sizes; St. Louis Enamel Iron Co., 42 cts., both sizes. Clk., C. H. Bronson.

CONDUITS.—Erie, Pa.—The following bids were received Sept. 26, 1898, for 3-in. conduit laterals in 9th St. and in South Park Row: George B. Kelley, 9½ cts. a ft. in 9-duct conduits; J. McCormick & Son, 10½ cts.; Kraft & Walther, 7 7-10 cts.; Mayer Bros., 9½ cts. There were various other bids for 16 and 32-duct conduits and for the manholes, service boxes and 3-in. wrought iron pipe. Camp ducts, like those in use in the present conduit, were specified and others bid for either that material or corrugated wood.

IMPROVING RESERVOIR.—Albany, N. Y.—The following bids were received Sept. 20 for improving the Bleecker reservoir, as advertised in Engineering News; E. M. Haines & Co. awarded contract; Supt. Water-Works, George I. Bailey:

Bids Received at Albany, N. Y., Sept. 20, 1898, for Improving the Bleecker Reservoir.

Quantities.		E. M. Haines & Co., Rhinebeck, N. Y.	J. Dunfee & Co., Syracuse, N. Y.	John Doyle, Albany.	Frank Pidgeon, Saugerties, N. Y.	Dollard & Holler, Albany.	Michael J. Dady, Brooklyn, N. Y.	R. B. Lewis, Herkimer, N. Y.
Bailing and draining		$7,500	$5,950	$4,500	$8,000	$6,904	$7,150	$7,500
Excavation	14,500 cu. yds.	.38	.51½	.55	.40	.53	.50	.60

ROADS.—Boston, Mass.—The following contracts were let Sept. 15, 1898, by the Massachusetts State Highway Commission, for constructing roads in Phillipston, Uxbridge and Townsend, Mass.; Secy., A. B. Fletcher: Phillipston—J. J. Welch & Co., Salem, Mass.—Excavation, 1,160 cu. yds., 30 cts. a cu. yd.; excavation, borrow, 500 cu. yds., 40 cts.; ledge excavation, 115 cu. yds., $2.00; rubble masonry laid dry, 25 cu. yds., $4.00; rubble masonry laid in cement, 24 cu. yds., $7.00; gravel, 335 cu. yds., 50 cts.; Telford, 100 sq. yds., 35 cts.; shaping, 6,904 sq. yds., 2 cts.; broken stone in place, 1,657 tons, $1.39; 12-in. vitrified clay pipe, 30 lin. ft., 60 cts.; fencing used as guard rail, 650 ft., 15 cts.; side drains, 100 ft., 35 cts.; stone monuments, 10, each, $1.50; 24-in., vitrified clay pipe, 60 lin. ft., $2.00; total, $3,975. Uxbridge—H. H Pike and E. E. Eames, Paxton, Mass.—Excavation, 1,110 cu. yds., 32 cts.; ledge excavation, 10 cu. yds., $1.50; rubble masonry laid dry, 34 cu. yds., $3.00 rubble masonry laid in cement, 30 cu. yds., $7.00; gravel, 363 cu. yds., 46 cts.; Telford, 100 sq. yds., 30 cts.; shaping, 7,360 sq. yds., 1.5 cts.; broken stone in place, 1,766 tons, $1.28; 12-in. vitrified clay pipe, 100 lin. ft., 60 cts.; fencing used as guard rail, 250 ft., 15 cts.; side drains, 600 ft., 26 cts.; stone monuments, 14, each, $1 50; total, $3,525. Townsend—C. H. Kelleher, Newburyport, Mass.—Excavation, 1,064 cu. yds., 30 cts.; ledge excavation, 10 cu. yds., $2.50; rubble masonry laid dry, 10 cu. yds., $4.50; rubble masonry laid in cement, 6 cu. yds., $8.00; gravel, 100 cu. yds., 60 cts.; Telford, 100 sq. yds., 35 cts.; shaping, 8,369 sq. yds., 2 cts.; broken stone in place, 2,030 tons, $1.35; 12-in. vitrified clay pipe, 140 lin. ft., 60 cts.; fencing used as guard rail, 50 ft., 20 cts.; side drains, 100 ft., 30 cts.; stone monuments, 15, each, $2 00; total, $3,594. Extra work at following prices: Materials at cost; foremen, 40 cts. per hour; masons, 35 cts.; masons' helpers, 20 cts.; laborers, 16⅔ cts.; double teams and drivers, 45 cts. an hour; single teams and drivers, 30 cts.

PAVING.—Atlantic City, N. J.—The following bids were received Oct. 3 for brick paving and for 6-in. macadam paving on a 4-in. gravel foundation in Pacific Ave., as advertised in Engineering News; contract awarded the Delaware River Quarry & Construction Co.; Cy. Surv., J. W. Hackney:

Bids Received at Atlantic City, N. J., Oct. 3, 1898, for Brick and Macadam Paving.

Bidder.	Macadam, 42,086 sq.yds.	Vitrified brick, 11,165 sq.yds.	Concrete, 304 cu.yds.	Curb: Straight, 21,744 lin ft.	Curb: Curved, 2,826 lin.ft.	Curb: Resetting, 100 lin.ft.	Total.
Del. River Quarry & Construction Co., Lambertville, N.J.	$0.62	$1.75	$4.50	$0.38	$0.60	$0.05	$56,963
Dennis Roe, Trenton, N. J.	.63	2.05	4.49	.39	.77	.03	61,427
J. B. Reilly & Co., Atlantic City, N. J.	.69	2.09	4.50	.35	.54	.04	62,883
Kennedy, Crossan & Co., Philadelphia, Pa.	.73	2.47	5.90	.355	.50	.10	63,879
Connell & McCann, New York, N. Y.	.67	2.25	5.00	.35	.60	.05	64,363
Thomas J. McGovern, Trenton, N. J.	.69	2.25	6.60	.40	.60	1.00	66,448
Alcatraz Paving Co., Philadelphia, Pa.	.79	2.00	4.75	.37	.55	.10	66,632
Fred T. Ley & Co., Springfield, Mass.	.73	1.87	4.25	.43	.57	.25	69,236
Michael J. Dady, Brooklyn, N. Y.	.81	2 23	5.00	.35	.65	.10	69,965
David McMahon & Co., Philadelphia, Pa.	1.10	2.05	4.49	.39	.77	.03	81,924
Frank Pidgeon, Saugerties, N. Y.	1.05	2.59	6.50	.58	.95	.20	90,400

ASPHALT PAVING.—Niagara Falls, N. Y.—S. F. Arkush, Cy. Clk., writes us that the following bid was received Sept. 30, 1898, for asphalt paving: Barber Asphalt Paving Co., Buffalo, N. Y., pavement, 1,200 sq. yds., $2.44; excavation, 75 cu. yds., $1.50; overhaul 50 cu. yds., 2 cts.; sewer connections, 100 ft., $1.50; water connections, 100 ft., 90 cts.; gas connections, 100 ft., 25 cts.; trenches, 20 rock excavations, $3.50; $3,302.

SEWER WORK.—Steubenville, O.—Floto Bros. were awarded the contract Sept. 20 for the new sewer at Calligan's crossing by the Commissioners as follows: Hauling 48-in. pipe 12 ft. long, weight 7,200 lbs., from Mingo to Calligan's, piece $3; excavating and filling a cu. yd., 34 cts.; laying the pipe a lin. ft., 28 cts.; hauling 30-in. pipe by 12-ft. long, weight 3,000 lbs., to Mingo flour mill, $1.50 each; excavating and filling, 34 cts.; laying 30-in. pipe, 17 cts. a lin. ft. Castner Bros'. bid was as follows: Hauling 48-in. pipe, $7.75 a joint; excavation, 40 cts. a cu. yd. Hauling 30-in. pipe, $4.50 a joint.

FLOOD GATES.—Dayton, O.—The following bids were received Oct. 3, 1898, for furnishing and placing flood gates on the canal at the Apple St. sewer; Comptroller J. E. Gimperling:

Quantities.		O'Connor & Kirchner.	Bruno Ritty.
Masonry (limestone)	191.5 perches.	$6.50	$8.50
Rubble masonry	80 "	4.15	4.50
Canal gates	—— each	265.00	300.00
Sewer gate	—— "	995.00	1,125.00
Foundation timber	16,027 ft. B.M.	20.00	24.00
Total		$3,157.29	$3,797.40

INDUSTRIAL NOTES.

MR. L. WILSON, 53 Dearborn St., Chicago, has the contract to sink an artesian well for the Plano Co., West Pullman, Ill.

THE AMERICAN ELECTRICAL & MAINTENANCE CO., 451 Greenwich St., New York, went into the hands of receivers, Oct. 7. Liabilities, $35,199; nominal assets, $29,126. Alfred K. Warren and Francis Higgins were appointed receivers.

THE BERLIN IRON BRIDGE CO., East Berlin, Conn., is furnishing the steel roof for one of the store houses of the Laflin & Rand Powder Co., Pompton, N. J. The building is 45 × 150 ft., with roof trusses of steel covered with corrugated iron supported on steel purlins.

THE Q & C COMPANY, Chicago, announces that the Dustless Roadbed Co., of Philadelphia, has placed its entire business in the hands of the Q & C Co. This company has already treated several hundred miles of track with oil, and the Q & C Co. is now negotiating for large additional quantities.

THE RUSSELL SNOW-PLOW CO., Tremont Bldg., Boston, Mass., reports that it has an order for a Russell wing elevator snow plow, size No. 2, from each of the following lines: Grand Rapids & Indiana Ry.; Chicago & West Michigan Ry., and Detroit, Grand Rapids & Western R. R. The plows for the last two named roads are to have the Russell air flanger added to the same and are also to be equipped with Westinghouse air brakes.

THE AMERICAN WOOD PRESERVING CO., Philadelphia, has just received an order from the New York Central & Hudson River R. R. Co. for several hundred gallons of moss green "Woodiline stains," for use on roofs. The company now makes a stain, using the wood preservative "Woodiline" as a basis, and the penetrative qualities of the preservative united with coloring matter combines to make the color more permanent, it is claimed, than in other stains. It has been used in exposed places on the sea coast especially since December, 1895, on the cottage of Mr. Wilson Brown, Superintendent of the South Amboy Division of the Pennsylvania R. R., at Seaside Park, N. J.

THE RISDON IRON & LOCOMOTIVE WORKS, San Francisco, Cal., are building gold dredges that will handle 2,000 cu. yds. of gravel a day at a depth of 50 ft. below water, and at a cost, it is claimed, of 3 cts a cu. yd. The company has recently built an Evans elevator at Breckenridge, Colo., for use in placer mining where water under pressure is available and facilities for a gravity dump do not exist. It will handle 2,000 cu. yds. of gravel a day, being sunk 43 ft. to bed rock and working under a pressure of 145 ft. at the surface. The first elevator was so satisfactory, it is stated, that a second one has been built. The Alaska Treadwell Mill of 240 stamps, which is said to crush 250,000 tons of ore a year, at a cost of 35 cts. a ton and a 3,500-HP. hoisting engine for the Washoe Copper Co., Butte, Mont., are among some of the orders filled by the company.

LES USINES CLEMENT is the name of a company which has been organized in France to build American motor vehicles and chainless bicycles. A large plant, the main building of which is 400 × 800 ft., has just been completed at Levallois-on-the-Seine, directly outside of the fortifications of Paris. In this building will be installed, it is stated, several hundred thousand dollars' worth of American machine tools, of which about $100,000 worth is now open for bids. The machinery will all be operated by electricity and two 500-HP. engines have already been purchased in Europe for the purpose and will be direct-connected to dynamos, one of which will be situated at the end of each line of shafting. The motor vehicles to be manufactured will be of the gasoline and electric types. Mr. Hart O. Berg, formerly Manager of the Colt's Patent Firearms Co., Hartford, Conn., will be the General Manager, and Mr. A. F. Bardwell, Superintendent of the motor carriage department of the Pope Mfg. Co., Hartford, will be the General Superintendent. The Superintendent of the Machine Shop will be Mr. R. C. Lewis, who has been the Manufacturing Superintendent of the Yale & Towne Mfg. Co., Stamford, Conn. It is stated that the only connection which the Pope Mfg. Co. will have with the French company is that the former is to receive a royalty on its patents, which will be used.

Mail Delivery Notice.

Special efforts are made to deliver our paper to its readers each week at the earliest possible moment. The largest binding and mailing establishment in New York begins work on Engineering News early each Wednesday evening, and all papers for Boston, Philadelphia and Washington are usually in the New York post-office by midnight; all Brooklyn and New York city papers by 3 o'clock—in ample time for the first delivery Thursday morning. The entire edition, including foreign copies, is in the mail soon after 6 o'clock Thursday morning. If your paper is not received promptly we advise that you make a complaint to your local post-office officials.

Contract Work Should Always be Advertised in a Paper Read by Contractors.

Nearly Every Prominent Contractor and Manufacturer of Contractors' Supplies in North America Reads Engineering News.

INDUSTRIAL NOTES 132

PERSONAL.

Lieut. Thos. R. Sullivan, First Regiment, and Capt. John A. Laird, Third Regiment, United States Volunteer Engineers, have been honorably discharged.

Mr. C. G. Edwards has been appointed Assistant Engineer, and Mr. Raleigh Thomas, Chief Draftsman, of the Subway Commission of Baltimore, Md.

Mr. J. Robert Fortune, Chief Draftsman of the Murphy Iron Works, Detroit, Mich., has resigned to accept a similar position with the American Stoker Co., New York city.

Mr. Christopher Steadman, civil engineer, on the engineering staff of the State Highway Commission of Massachusetts, was married, Oct. 10, to Miss Lena M. Redmond, of Salem, Mass.

Capt. Jas. G. Warren, Corps of Engineers, U. S. A., has been detailed as Engineer of the Ninth Lighthouse District, with headquarters at Detroit, Mich., to relieve Lieut. Col. Milton B. Adams, Corps of Engineers, transferred.

Mr. H. A. Sumner, Chief Engineer of the Alamogordo & Sacramento Mountain Ry., a subsidiary line of the El Paso & Northeastern Ry., has been appointed Chief Engineer of the latter road also, with headquarters at Alamogordo, N. Mex.

Mr. Thomas E. Inslee, Assistant Superintendent of the foundry of the H. B. Smith Co., manufacturer of steam and water heating apparatus, Westfield, Mass., has resigned, and Mr. Arthur A. Brown, of Champaign, Ill., has been appointed to succeed him.

Mr. Wallace C. Johnson, M. Am. Soc. C. E., Chief Engineer, of the Niagara Falls Hydraulic Power & Mfg. Co., Niagara Falls, N. Y., has been appointed Consulting Engineer of the Shawinigan Water & Power Co., Shawinigan Falls, Que., on the St. Maurice River.

Mr. A. C. Bell, Jun. Am. Soc. C. E., City Engineer of New Orleans, La., has been authorized by the City Council to spend ten days in studying the asphalt pavements of Washington, New York city, Troy, Syracuse, Detroit and Chicago. Mr. Bell was in New York this week for that purpose.

Mr. John Lundie, formerly connected with the Illinois Central R. R., has been appointed Electrical Expert of the Brooklyn Elevated R. R., Brooklyn, N. Y., and will at once begin preparing plans and specifications for the proposed change of motive power from steam to electricity. The cost involved will be about $750,000.

Mr. Leighton Lee, Superintendent of the firm of Lee & Co., engineers and contractors, of Philadelphia, Pa., in attempting to board an elevated train in Chicago, Ill., Oct. 14, after the platform gates had been closed, missed his footing and fell through the trestle work upon a picket fence 25 ft. below. He received injuries that will probably prove fatal.

OBITUARY.

Mr. Edwin Darling, formerly Superintendent of the waterworks at Pawtucket, R. I., died recently, aged 64.

Mr. George Wilson Phillips, mechanical engineer and inventor, died at Springfield, Mass., Oct. 14, aged 79.

Mr. James Carmichael, Superintendent of the machine shops of the Harlan & Hollingsworth Co., Wilmington, Del., died Oct. 8, aged 69.

Mr. Charles Edward Widener, civil engineer, of Cumberland, Md., died of pneumonia, Oct. 11, aged 45. He was City Engineer of Cumberland in 1893 and 1897.

Mr. Chas. E. Van Houten, contractor and builder, of New York city, was killed at Jamaica, N. Y., Oct. 13, while walking on the track of the Long Island R. R. He was 79 years of age.

Mr. William W. Boyington, architect, of Chicago, Ill., died at his home in Highland Park, Oct. 16, aged 80 He was the architect of many churches in Chicago and vicinity, of the old University of Chicago and its Observatory, and the Rock Island and Northwestern railway depots.

Mr. John Malcolm Forbes, Sr., President of the Board of Directors of the Chicago, Burlington & Quincy R. R., died at his home, Milton, Mass., Oct. 13. He was born in Bordeaux, France, Feb. 23, 1813, and was brought to this country by his parents while an infant. He became interested in Western railways in 1836, and was for many years President of the Michigan Central R. R., and Chairman of the Board of Directors of the Chicago, Burlington & Quincy R. R.

Mr. William G. Morris, senior member of the firm of Morris & Barlow, malleable iron founders, of Newark, N. Y., died suddenly in Philadelphia, Pa., Oct. 5, while attending the convention of the Foundrymen's Association. He was born in Newark, and began his mechanical career as an apprentice of the late Seth Boyden.

Mr. Frank F. Hemenway, M. Am. Soc. M. E., who for 14 years was connected with the Editorial Department of the "American Machinist," for several years as its Editor-in-Chief, died at his home in Brooklyn, N. Y., Oct. 14. He was born at Hartford, N. Y., Oct. 29, 1837, and served a regular apprenticeship as a machinist in Keene, N. H. For some time following he worked in the Putnam Shops, Fitchburg, Mass., and then at the outbreak of the Civil War he enlisted in the Union Army. After the war he was employed in various machine shops, and about 1870 entered the shops of the Troy & Boston R. R., now the Fitchburg R. R., at Troy, N. Y., where he was associated with the late George W. Richardson. Mr. Hemenway did the work and the experimenting connected with the inventing and the perfecting of the Richardson pop safety valve, and also had much to do with the development of the Richardson balanced slide valve and other inventions. From the railway shops he went to those of Starbuck Bros., Troy, N. Y., and after a year or two became Foreman of the machine shop, holding this position as long as the works continued in operation. While connected with this establishment he invented the Hemenway automatic cut-off engine, and about the same time became a charter member of the American Society of Mechanical Engineers. His literary work began about 1879, when he first contributed to the columns of the "American Machinist," of which he became an associate editor in July, 1881. In 1885 he published his book on the steam engine indicator. He was made Editor-in-Chief of the above periodical in July, 1887, upon the death of Mr. Jackson Baily, and held this position until October, 1894, when he resigned.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

AMERICAN GAS LIGHT ASSOCIATION.
Oct. 19.-21. Annual meeting, Niagara Falls, N. Y. Secy., Alfred E. Forstall, Montclair, N. J.

NEW YORK RAILROAD CLUB.
Oct. 20. "Purchasing Materials," H. B. Hodges. Secy., W. W. Wheatley, 168 Montague St., Brooklyn, N. Y.

SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Oct. 20. Secy., F. A. Charpiot, P. O. Box 13, Savannah, Ga.

THE DETROIT ENGINEERING SOCIETY.
Oct. 21. "Coal-Handling Machinery," C. W. Russell. Secy., Henry Goldmark, Wayne Co. Sav. Bank Bldg., Detroit, Mich.

CHICAGO ELECTRICAL ASSOCIATION.
Oct. 21. "Practical Points on Electrical Measurement," W. B. Hale. Secy., J. R. Cravath, 825 Monodnock Block, Chicago, Ill

CIVIL ENGINEERS' CLUB OF CLEVELAND.
Oct. 25. Secy., Wm. H. Searles, Case Library Building, Cleveland, O.

FRANKLIN INSTITUTE.
Oct. 25. "Thermo-Electric and Galvanic Action Compared," Chas. J. Reed; "Electric Elevators," Wm. J. Baxter, Jr. Secy., Wm. Wahl, 15 South Seventh St., Philadelphia, Pa.

AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENT.
Oct. 26-28. Annual meeting, Washington, D. C. Secy., D. L. Fulton, Bureau of Highways and Sewers, Allegheny, Pa.

CANADIAN SOCIETY OF CIVIL ENGINEERS.
Oct. 27. Secy., C. A. McNab, 112 Mansfield St., Montreal, Canada.

ENGINEERING ASSOCIATION OF THE SOUTH.
Oct. 27. Secy., C. B. Wilson, 1000 Broad St., Nashville, Tenn.

WESTERN SOCIETY OF ENGINEERS.
Nov. 2. "Construction of Retaining Walls for the Sanitary District of Chicago," James W. Beardsley; "Berthier Method of Coal Calorimetry," Chas V. Kerr; "Brakes for Electric Cars," William G. Price. Secy., N. L. Litten, Monadnock Block, Chicago, Ill.

AMERICAN SOCIETY OF CIVIL ENGINEERS.
Nov. 2. Secy., C. W. Hunt, 220 W. 57th St. New York city.

ENGINEERS' CLUB OF ST. LOUIS.
Nov. 2. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.

BROOKLYN ENGINEERS' CLUB.
Nov. 3. Secy., A. J. Provost, Jr., 191 Montague St., Brooklyn, N. Y.

TECHNICAL SOCIETY OF THE PACIFIC COAST.
Nov. 4. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.

ENGINEERS' CLUB OF COLUMBUS.
Nov. 5. Secy., H. M. Gates, 12½ North High St., Columbus, O.

ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Nov. 7. Secy., H. J. March, Library Bldg., Buffalo, N. Y.

CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Nov. 7. Secy., C. L. Annan, City Engineer's Office, St. Paul, Minn.

NEW ENGLAND RAILROAD CLUB.
Nov. 8. Secy., Edw. L. Janes, P. O. Box 1158, Boston, Mass.

DENVER SOCIETY OF CIVIL ENGINEERS.
Nov. 8. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Col.

RAILWAY SIGNALING CLUB.
Nov. 8. Secy., Earl M. Seitz, Signal Engineer, C. & N. W. Ry., Chicago, Ill.

SOCIETY OF NAVAL ARCHITECTS AND MARINE ENGINEERS.
Nov. 10-11. Annual meeting. Secy., Francis T. Bowles, 12 West 31st St., New York.

ST. LOUIS RAILWAY CLUB.
Nov. 11. "The Performance of a Four-Cylinder Compound Locomotive." Discussion. Secy., H. H. Roberts, 511 Commercial Bldg., St. Louis, Mo.

CENTRAL RAILWAY CLUB.
Nov. 11. Secy., H. D. Vought, 114 Fifth Ave., New York city.

MONTANA SOCIETY OF ENGINEERS.
Nov. 12. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.

ENGINEERS' CLUB OF KANSAS CITY.
Nov. 14. "Rectification of the Red and Atchaflaya Rivers," A. F. Woolley, Jr. Secy., F. W. Tuttle, Baird Bldg., Kansas City, Mo.

THE LOUISIANA ENGINEERING SOCIETY.
Nov. 14. Secy., J. F. Coleman, 712 Union St., New Orleans, La.

NORTHWEST RAILWAY CLUB.
Nov. 15. Secy., T. A. Foque, Soo Line, Minneapolis, Minn.

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.
Nov. 15. Secy., R. A. Fessenden, 410 Penn Ave., Pittsburg, Pa.

ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Nov. 16. Secy., Frank H. Olmsted, Los Angeles, Cal.

BOSTON SOCIETY OF CIVIL ENGINEERS.
Nov. 16. Secy., S. E. Tinkham, City Hall, Boston, Mass.

WESTERN FOUNDRYMEN'S ASSOCIATION.
Nov. 16. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.

ENGINEERS' CLUB OF CINCINNATI.
Nov. 17. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.

ENGINEERS' CLUB OF PHILADELPHIA.
Nov. 19. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.

TECHNICAL CLUB OF OMAHA.
Nov. 21. Secy., J. Harry Lawrie, Omaha, Neb.

ENGINEERS' CLUB OF MINNEAPOLIS.
Nov. 21. Secy., H. E. Smith, 1620 S. E. 4th St., Minneapolis, Minn.

ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Nov. 21. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.

ST. LOUIS RAILWAY CLUB.—At the meeting held Oct. 14, Prof. C. M. Woodward delivered an address entitled, "What Shall We Do With Our Boys?"

NEW ENGLAND RAILROAD CLUB.—A regular meeting of this club was held at Boston, Mass., on Oct. 11, at which a paper on "Present and Future Economy in Railway Equipment Painting," by Mr. Chas. E. Copp, was discussed.

BOSTON SOCIETY OF CIVIL ENGINEERS.—This society will visit Holyoke, Mass., on Oct. 22, where they will be entertained by the Holyoke Water Power Co. The new dam, the plant of the Deane Steam Pump Co., and other points of interest in the vicinity will be inspected.

BROOKLYN ENGINEERS' CLUB.—A regular meeting of this club was held Oct. 13. Routine business was followed by the appointment of a nominating committee to prepare a list of officers for the ensuing year, and the reading of a paper on "Foundry Moulding Machines for Snap Flask Work," by Mr. Willard S. Tuttle.

FRANKLIN INSTITUTE.—The bulletin for the month of October, issued by the Committee on Meetings, is as follows: Oct. 25, "Thermo-Electric and Galvanic Actions Compared," Charles J. Reed; "Electric Elevators," Wm. Baxter, Jr. Nov. 9, Meeting of the Mining and Metallurgical Section. "Mining and Minting of Gold and Silver," Mr. A. E. Outerbridge, Jr.

AMERICAN SOCIETY OF MUNICIPAL IMPROVEMENTS.—The fifth annual convention of this society will be held in Washington, D. C., Oct. 26-28, as already announced. The program as far as it is at present completed includes the following papers: "Utilization of the Sewage of Vienna, Germany," Capt. L. H. Beach, U. S. A., Wash., D. C.; "Tree Planting in the Streets of Washington" and "A Street Extension Plan for the Entire District of Columbia," Wm. P. Richards, Wash., D. C.; "The Selection of Paving Materials," Geo. W. Tillson, Brooklyn, N. Y.; "The Proper Regulating of Curbing and Streets," Horace Andrews, Albany, N. Y.; "Cost of Repairs to Asphalt Pavements in Buffalo, N. Y.," C. B. Guthrie, Buffalo, N. Y.; "Electrolysis Tests at Dayton, Ohio," Harold P. Brown, New York city.

THE LOUISIANA ENGINEERING SOCIETY.—The regular meeting of this society was held Oct. 11. The evening was devoted to a paper entitled, "Live Engineering Questions of the Hour," by the Secretary, Mr. J. F. Coleman, which was a resumé of local questions, such as river bank protection, sewage disposal and street paving in New Orleans.

One of the causes of caving banks was attributed to underlying strata of quicksand, and some of the methods of overcoming this were described. The drainage question he considered solved by the plan adopted and now being executed by the city. The sewerage question was so nearly akin to drainage that it might be considered part of it. There was, however, a question as to the advisability of discharging sewage into the Mississippi River.

A plan of rearrangement of the track on Canal street was then exhibited and fully discussed.

THE CIVIL ENGINEERS' CLUB OF CLEVELAND.—The regular monthly meeting of this club was held Oct. 11. The discussion upon the proposed amendment to the Constitution, changing the name of the club, was resumed. It was finally moved as an amendment to strike out the proposed term "The Cleveland Society of Engineers" and insert "The Cleveland Engineering Society." This was carried.

Mr. Arthur A. Skeels, member of the club, presented some "Notes and Observations on a Recent Trip Through Mexico." Monterey was described as a most ancient and foreign-looking city. Its water supply is taken from local wells, and its sanitation is exceedingly bad. It, however, has electric lights and street cars hauled by mules.

Guadalajara is the most beautiful town in Mexico; the theater and church are magnificent edifices and not far away are the Falls of Juanacatlan, the largest water falls in Mexico. These falls are utilized for power, and furnish electricity for lighting the city. Wm. H. Searles, Secy.

CHICAGO ELECTRICAL ASSOCIATION.—At the regular meeting of this association, held Oct. 7, Mr. Thos. G. Grier read a paper on "The Use of Electricity in the Spanish-American War."

This was a brief review of the electrical work done along the coast of the United States in connection with submarine mines, range finders for fortifications, etc. The harbor defenses of New York and Boston were described in more detail. The extensive use of the telephone, the use of the X-ray apparatus and other devices on land, and the helm indicators, speed indicators, direction indicators and range finders on shipboard were all interestingly described.

SOCIETY OF NAVAL ARCHITECTS AND MARINE ENGINEERS.—The sixth annual meeting of this society will be held in New York City, at the house of the American Society of Mechanical Engineers, 12 West 31st street, the first session opening at 10 a. m., November 10.

The following are the papers to be read and the topics for discussion: Nov. 10—"Torpedo Boat Destroyers for Sea Service, with Special Reference to the Conditions that Prevail on the Pacific Coast," G. W. Dickie; "The Standard Navy Boats," Arthur B. Cassidy; "Bilge Keels and Rolling Experiments U. S. S. 'Oregon,' " Asst. Naval Constructor Lawrence Spear, U. S. N.; "Steam Economy Test of a Unique Form of Feed Pump," F. M. Wheeler; "Portable Pneumatic Riverters in Shipbuilding," W. I. Babcock. Topical discussion of the following questions: "The utility of Torpedo Boats, and has the Sub-Marine Boat a place?"; "In what respects have the recent Naval Engagements affected opinion as to the value and best distribution of armor for war-ships?" Nov. 11.—"The Steam Yacht as a Naval Auxiliary," William P. Stephens; "Designs of the New Vessels for the U. S. Navy," Chief Constructor Philip Hichborn, U. S. N.; "Methods of Securing Water-tight Work," Asst. Naval Constructor H. G. Smith, U. S. N.; "Tests of the Strength of a Longitudinal Bulkhead Separating Two Engine Rooms," Naval Constructor J. L. Woodward, U. S. N.; "An Electrically Operated 150 Ton Revolving Derrick," Walter A. Post; "Stability of a Battleship under Damaged Conditions," Prof. Cecil H. Peabody. Topical discussions of the following questions: "Under the circumstances of the Blockade at Santiago, which was the more economical method of maintaining the boilers in readiness for immediate action—banking the fires or keeping them spread but very thin?"; "Can you give any data as to the cost in coal of maintaining the engines and boilers in readiness for immediate service?"; "What, if any, difficulty was there in maintaining the supply of fresh water for the boilers, and, if there was any difficulty, to what do you attribute it?"; "As a result of experience on the Blockade, what particular points about the machinery were most likely to give trouble, and what could be done to prevent a recurrence of such trouble?" On the evening of November 11 a banquet will be held at Delmonico's.

AMERICAN RAILWAY ASSOCIATION.—The regular fall meeting was held at the Holland House, New York city, on Oct. 12-13. There were present 100 delegates, representing 95 members. The Executive Committee reported that the membership is now 248 companies, operating 163,000 miles of railway, and also reported in favor of the amendment presented at the last meeting prohibiting voting by proxy at future meetings. This was adopted by the association.

The principal business of this meeting was the consideration of the revision of the Standard Code of Train Rules which was presented by the Committee on Train Rules. The greater part of the two days was devoted to this. Some amendments were suggested and were referred to the committee for consideration, and final action was deferred until the spring meeting. The Committee on Car Service reported in favor of the per diem plan of settling for car interchange between roads at a rate of 15 cts. per day. After some discussion further consideration was postponed until the next meeting.

The Committee on Safety Appliances presented some statistics showing what progress had been made towards the introduction of automatic car couplers and air-brakes and repeated the recommendation made at the meeting of last spring with reference to the restrictions upon the use of power brakes not conforming to the M. C. B. standard of excellence. As this matter was not brought up until the latter part of the last session it was laid over until the spring meeting.

The Committee on the Metric System reported as follows:

> The events of grave and national importance that have transpired during the past six months, which may result in changes in the foreign relations of the country, have been used as an argument by those who favor the adoption here of the Metric System. It is claimed that unless our manufacturers make their goods according to the metric weights and measures they will be handicapped in their competition for foreign markets. If, however, such a demand should arise from any cause, it would be important that our railway officials should know what would be necessary for them to do in making the change.
>
> Your Committee has, therefore, under consideration a plan by which it hopes to be able to report upon the methods which it would be necessary to employ in the introduction of the Metric System in each railway department. This would include an examination into the difficulties to be overcome and the expense involved in changing from one system to another.

In addition the committee presented an abstract of a paper by Mr. Edward Grafstom, of the Pittsburg, Cincinnati, Chicago & St. Louis Ry., giving experience during the adoption of the metric system in foreign countries.

The Committees on Safety Appliances and on Car Service were re-elected.

The date of time table change was fixed as Nov. 13, and the association adjourned to meet in Detroit, Mich., next April.

THE AMERICAN BOILER MANUFACTURERS' ASSOCIATION.—The 10th annual meeting of this association was held, Oct. 3-6, at the Southern Hotel, St. Louis, Mo. The formalities of opening the meeting were pleasantly disposed of, after which attention was for a short time centered upon Secretary E. D. Meier, who read his report and the reports of the various committees. The rest of the morning was devoted to a brief discussion of the report of the committee on Uniform Boiler Specifications, and on Betterment of Business Conditions, both of which were finally assigned for special consideration at following sessions.

On Oct. 4, the consideration of the report of the Committe on Uniform Standard Specifications was resumed, and, after considerable discussion, was finally adopted in the form given elsewhere in this issue. After the appointment of a committee on the next place of meeting the meeting adjourned to the following day.

The forenoon of Oct. 5 was given up to committee reports, and the consideration of applications for membership. Cleveland, O., and the month of July were selected as the place and time of the next meeting.

Mr. E. D. Meier, the secretary, offered his resignation, saying that after nine years in that position he felt it for the best interests of the association to elect a new man to fill the office. His resignation was accepted with general regret.

The following list of officers was then submitted by the Nominating Committee and unanimously elected: Pres., Henry J. Hartley, Philadelphia, Pa.; First Vice-Pres., Daniel Connally, Cleveland, Ohio; Second Vice-Pres., John O'Brien, St. Louis, Mo.; Third Vice-Pres., R. D. Monroe, Jr., Pittsburg, Pa.; Secy., J. D. Farasey, Cleveland, Ohio; Treas., Richard Hammond, Buffalo, N. Y.

The session of the last day was brief, and was devoted to various unfinished business and minor matters. Immediately after adjournment those present witnessed a practical boiler test at the John O'Brien Boiler Works. This boiler was a horizontal tubular boiler, 14 × 5 ft., with 50 tubes, made of ⅜-in. steel, with a tensile strength of 55,000 lbs., intended to work at pressures below 200 lbs., 400 lbs. per sq. in. caused considerable leakage at the rivets, 600 lbs. increased the leakage so that the boiler was almost hidden by the spray. At 660 lbs. per sq. in. an expansion of over 3 ins. was observed.

The afternoons of the convention days were devoted to inspection tours, the Anheuser-Busch Brewing Co., the city water-works and other points of interest being included.

NEW PUBLICATIONS.

REPORT OF ONTARIO BUREAU OF MINES, Vol. VII., Third Part, 1898. Printed by order of the Legislative Assembly of Ontario. Toronto. Paper; 9¾ × 6½ ins.; pp. 207 to 265.

The bulk of this report is taken up in the location of corundum deposits in Ontario, its analyses and concentration. Short reports follow upon the water powers of Ontario; placer gold on Vermillion River, and mining schools and mining classes.

SURFACE PLANTS OF BITUMINOUS COLLIERIES AND COKE WORKS. Wilkins & Davison, Civil Engineers, Pittsburg, Pa. Pamph.; 6 × 9 ins.; pp. 43.

This pamphlet is a reprint of several illustrated articles that have appeared in "Mines and Minerals" and in the "American Manufacturer," describing head shafts, tipples and coke plants that have been designed and erected by Messrs. Wilkins & Davison. The illustrations are excellent, and the articles should be of interest to owners and managers of coal mines.

STREET RAILWAY FRANCHISES AND OPERATIONS IN CHICAGO.—Report of a Special Committee of the City Council; Chairman, Carter H. Harrison (Mayor); Secretary, George G. Hooker. Cloth; 8vo.; pp. 313; numerous folding tables and a map.

A special committee to investigate the franchises, financial operations, and wages paid by the street railway companies, was appointed in October, 1897, and made its report in March, 1898, but the report has only recently been issued. The report is unfriendly to the companies, but contains much interesting and important information.

PUBLIC WATER SUPPLIES.—Address by Judge George Hillyer, President Water Board, Atlanta, Ga., before the Detroit Convention of the League of American Municipalities, Aug. 3, 1898. Reprinted from "City Government" of August, 1898, by the New York Filter Mfg. Co., 26 Cortlandt St., New York. Paper; 4 × 7 ins.; pp. 12.

Although this pamphlet is being distributed for advertising purposes it was not written with that end in view. It describes the water-works of Atlanta, and the benefits of meters, filtration and municipal ownership, as seen by the author and shown by the official records. It makes an especially strong showing for the use of meters and indicates that without them filtration might be out of the question.

REPORT OF THE RAILWAY COMMISSIONERS FOR NEW SOUTH WALES, AUSTRALIA.—Paper; 8vo.; pp. 39; maps and diagrams.

This colony has 2,691 miles of railway, all owned by the government, and in the year ending June 30, 1898, the total earnings amounted to $15,133,740, while the total expenditures were $8,073,025. The operating expenses were 53.34% of the gross earnings. During the year, meetings of the premiers and the railway commissioners of the several colonies were held to consider the question of establishing uniform gage, and thus eliminating the present troubles incident to break of gage. The tramways and street railways of Sydney (which are also owned by the government) aggregate 65 miles, operated partly by cable and partly by electricity.

ORES OF NOVA SCOTIA; Gold, Lead and Copper.—E. Gilpin, Jr., LL.D., F. R. S. C., Inspector of Mines, Halifax, N. S. Pamph.; 6½×10 ins.; pp. 46; with map.

This report contains in abbreviated form the most important facts, collected from public and private sources, relating to the gold, lead and copper deposits of Nova Scotia. The lead and copper deposits are as yet undeveloped, but they are said to be widespread and promising. The gold fields became known about 1860, and many mines were started in the next ten years, most of which were unprofitable, but recently there has been quite a revival, and veins and deposits are being profitably worked, on business principles, which a few years ago would have been spurned. Local investors are now able to mine and mill quartz profitably on a small scale, when the crushed quartz does not yield over $2 of free gold per ton. The gold production of Nova Scotia since 1862 has amounted to over $12,000,000, averaging about $12 per ton of crushed quartz.

THE COLUMBIA ENGINEER.—Transactions of the Engineering Society of Columbia University, New York. Published by the Society. Cloth; 7 × 10 ins.; pp. 158; illustrated.

This is the annual proceedings of the Engineering Society of Columbia University. The following is a list of the papers contained "Some Details of Rapid Transit," Wm. Barclay Parsons; "Some Reservoirs Which I Have Seen," J. James R. Croes; "Subterranean Temperatures," Prof. William Hollock; "Sewage Disposal," Col. George E. Waring, Jr.; "Engineering Features of the Nicaragua Canal Problem," Foster Crowell; "Interpretations of Water Analyses," George C. Whipple; "Treatment of Steel for Car Axles," L. R. Pomeroy; "Masonry," George S. Morison; "Railroad Accidents and Their Prevention," Col. H. G. Prout; "Heating and Ventilation of Buildings at the New Site of Columbia University," George A. Suter; "New and Old Systems of Power Distribution in Factories," Gano S. Dunn; "Improved Canal Facilities Between Lake Erie and New York City," Prof. William H. Burr; "The Inspection of the Materials of Engineering," P. S. Hildreth.

TWELFTH ANNUAL REPORT OF THE COMMISSIONER OF LABOR, 1897.—Economic Aspects of the Liquor Problem. Washington Government Printing Office: Cloth; 8vo.; pp. 275.

The Department of Labor has been engaged during the past year in investigating the effect of machinery upon labor and the cost of production, and has also carried on an investigation relating to municipal and private gas, electric and water plants, besides the investigation into the liquor question, to which latter subject the whole of the present report is devoted. The reports on the other subjects are, as yet, incomplete, and their publication is postponed to a later date. The report on the economic aspect of the liquor problem includes statistics of manufacture; importation, distribution and sale; consumption; revenue, national, state and municipal; capital invested and labor employed; experience and practice of employers in regard to use of intoxicants by their employees; recommendations from employers in regard to means to be adopted for lessening the consumption of liquors; and a digest of the liquor laws of the several states and territories. It appears that there was a considerable decrease in the per capita consumption of liquors in the United States from 1893 to 1896, as shown in the following figures, in gallons per capita: Distilled spirits, from 1.51 to 1.00; wines, 0.48 to 0.26; malt liquors, 16.08 to 15.16; total, 18.07 to 16.42. Whether this was due to decreasing appetites or to the hard times is not stated. A comparison of the figures of 1880 and 1890 shows a great increase in the drinking, which may be a result of increasing capacity to purchase, or of increasing appetite, or both. The figures for these years are: Distilled spirits, 1.27 to 1.40; wines, 0.56 to 0.46; malt liquors, 8.26 to 13.67; total, 10.00 to 15.53. The report is a magazine of information from which the student of the liquor question, the political economist and the legislator may draw their own conclusions.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

COMBINATION STOVE AND FURNACES.—The National Pipe Bending Co., New Haven, Conn.

This is a circular briefly describing a form of stove and furnace for water and air heating of houses.

POLYPHASE INDUCTOR GENERATORS.—Westinghouse Electric & Mfg. Co., Pittsburg, Pa. Circular; 7 × 10 ins.; illustrated.

This is circular 201 of the Westinghouse series. It illustrates and briefly describes the type of generator in which the armature and field is stationary and the moving part is reduced to a star-shaped rotating piece of iron with no moving wire. These machines are manufactured in sizes ranging from 180 to 750 K-W., either belted or direct connected.

LONG-BURNING ARC LAMPS—For Direct and Alternating Current Circuits.—Circular 202 calls attention to some of the latest forms of arc lamps on the market. They are of the enclosed type for use on 110-volt circuits with a burning limit per trimming of about 100 hours. Other types are shown and described, and some information regarding globes, carbons, etc., is given.

CONCRETE MIXERS.—The Contractors' Plant Co., 85 Water St., Boston, Mass. Paper; 5 × 7 ins.; pp. 11; illustrated.

This pamphlet describes a portable mixer, in which the mixing is done while the material passes through the device by gravity.

ELECTRIC RAILWAY GENERATORS.—Walker Co., Cleveland, Ohio. Pamph.; 8 × 10⅞ ins.; illustrated.

In this circular, which is number 1082 of the Walker series, the requirements of a modern street railway generator are outlined, and the manner in which the apparatus manufactured by this company fulfills these requirements is fully explained.

THE AMERICAN FEED WATER HEATER.—The Whitlock Coil Pipe Co., Elmwood, Conn., U. S. A. Pamph.; 3½ × 6 ins.

This is a small pamphlet outlining the construction of the American feed water heater and describing briefly the advantages accruing from the use of feed water heaters in general.

TELEPHONY.—The International Correspondence Schools. Scranton, Pa. Pamph.; 4 × 6½ ins.; pp. 30.

This is a brief synopsis of the course in telephony recently established by this school. It is divided into three parts: Principles, Apparatus and Circuits; Telephone Exchanges and Systems; and Telephone Lines and Their Construction.

RUBBER GOODS.—The Mechanical Rubber Co., Chicago, Ill. Pamph.; 5½ × 8½ ins.; pp. 76.

In this pamphlet is given a complete illustrated list of rubber goods such as: general belting, concentrator belts, hose for water, steam and air, and a great variety of rubber goods for mechanical purposes.

THE NATIONAL FEED WATER HEATER.—The National Pipe Bending Co., New Haven, Conn. Pamph.; 3½ × 6 ins.

This is an attractive little pamphlet calling attention to the merits of the National Feed Water Heater. In addition, tables and illustrations afford an idea of the construction and dimensions of the several types manufactured.

GRINDING AND POLISHING MACHINERY.—Builders' Iron Foundry, Providence, R. I. Pamph.; 3½ × 6 ins.; pp. 112.

The Builders' Iron Foundry has added to its extensive foundry and machine business a department for the manufacture of grinding and polishing machinery, countershafts and wood polishing wheels. The pamphlet is an illustrated catalogue and price list of productions in this line.

THE NATIONAL FEED WATER HEATER.—The National Pipe Bending Co., New Haven, Conn. Pamph.; 3¼ × 6 ins.; pp. 60.

This little pamphlet starts with the statement given on the cover, "Our Record 700,000 HP." and in the following 60 pages gives the names and addresses of some of the manufactories, power plants, etc., using "National" feed water heaters and included in the total.

THE CORRESPONDENCE SCHOOL OF SHEET METAL PATTERN DRAFTING.—The International Correspondence Schools, Scranton, Pa. Pamph., 6 × 9 ins.; pp. 88.

This pamphlet contains information on the correspondence method of teaching the subject of drafting for sheet metal workers, which has for some time been one of the many courses of study taught by the International Correspondence Schools.

STREET RAILWAY TRACK.—Lap-Joint Railway Track Co., Bowling Green Building, New York. Paper; 6 × 9¼ ins.; pp. 11.

This pamphlet describes the built-up or compound rail systems invented by Mr. T. H. Gibbon, Chief Engineer of the company, and used in combination with metal ties or chairs. The track has been laid in Albany, Fulton and Brooklyn, N. Y. It was described in our columns some time ago.

THE GENERAL ELECTRIC CO., AT OMAHA.—The General Electric Co., Schenectady, N. Y. Pamph.; 5⅛ × 7¾ ins.; illustrated.

This is an attractive little pamphlet from the press of the General Electric Co., in which is given a series of characteristic illustrations of its apparatus, including arc lamps, and generators, single phase, polyphase and monocyclic generators, transformers, street-car motors and controllers and various other apparatus.

MAIL CHUTING.—An Occasional Brochure. Part Two. The Cutler Mfg. Co. Rochester, N. Y. Five engraved sketches by Henry P. Kirby; 8 × 10 ins.

The "mail chute" is in common use in office and public buildings, for dropping letters from the several upper floors to a mail box on the ground floor. The Cutler Mfg. Co. has chosen an odd way to advertise its business, but a very good one. The sketches have nothing to do with mail chuting, but represent specimens of cathedral and other Gothic architecture.

COMBINED SIDEWALK AND VAULT ROOF.—P. H. Jackson & Co., 228 First St., San Francisco, Cal. Photograph, backed with circular.

This is a view taken beneath the sidewalk of a building in San Francisco where use has been made of Jackson's combined artificial stone sidewalk and galvanized corrugated steel roof for vaults. The total thickness is less than 4 ins., making a form of construction readily adaptable to limited vertical spaces.

THE CORRESPONDENCE SCHOOL OF PEDAGOGY.—The International Correspondence Schools, Scranton, Pa. Pamph., 6 × 9 ins.; pp. 72.

This pamphlet is a "circular of information" describing a system of home study in the pedagogies of arithmetic, grammar, history, orthography, geography, civics and rhetoric. The course of study is intended to take the place of the training received in normal schools, and is especially recommended to those now engaged in teaching.

STEAM BOILERS, FOUNDRY CUPOLAS, ETC.—The Bigelow Co., New Haven, Conn. Pamph.; 9¼ × 11½ ins.; pp. 32.

This is an illustrated descriptive list of the various forms of steam boilers and boiler appurtenances manufactured by the Bigelow Co., and includes return tubular boilers for high or low pressure services, sparkless boilers, locomotive boilers and the Bigelow-Manning vertical tubular boiler. In addition, packing house apparatus, such as dryers, digesters and coolers and foundry cupolas, tuyer plates, forges, etc., manufactured by this company, are mentioned.

ORE AND ROCK CRUSHERS; SCREENING AND CONVEYING MACHINERY. Earle C. Bacon, Engineer, Havemeyer Building, New York. Farrel Foundry & Machine Co., Ansonia, Conn. Pamph; 7½ × 9¾ ins.; pp. 74.

This pamphlet is a very complete illustrated catalogue and price list of crushers of the Blata and other patterns, crushings rolls, revolving screens, bucket and rubber belt conveyors, chute gates, etc. Sectional drawings and photographs of many complete screening and crushing plants are given.

WOOD'S WATER TUBE SAFETY BOILERS.—New Haven Boiler Works, New Haven, Conn. Pamph., 9¼ × 11½ ins.

This pamphlet is made up of a number of illustrations of details of the Wood's Water Tube Safety Boiler and an accompanying description, in which such matters as circulation of water, rapid steaming, dry steam, accessibility for cleaning and repairs, capacity, etc., are treated. There is also included a set of directions for operating the boiler and a partial list of users.

POWER AND ELECTRIC PUMPS.—The Goulds Mfg. Co., Seneca Falls, N. Y. Paper; 7 × 7 ins.; pp. 20; illustrated.

One of these catalogues describes a variety of power pumps, including those for water supplies, boiler feeding and hydraulic power. The other is devoted to electric pumps for house supplies, both on the open and closed tank systems; and to electric pumps for a variety of other purposes, including supplies for hydraulic elevators, boilers, fire protection, mines, fountains, villages and supplementary service for cities.

PUMPS, GOVERNORS, VALVES.—The Gardner Governor Co. Quincy, Ill. Pamph.; 7¾ × 5¼ ins.; pp. 21.

The Gardner governor was first made in 1860, and its total sales to date are upwards of 135,000. Four styles are illustrated in this catalogue, two of them having springs in addition to the revolving balls, making them suitable for high-speed engines. The Gardner pump is of the direct-acting, duplex type. It is made in various styles and sizes. The catalogue also shows a pump governor, a balanced lever valve, and globe and angle valves.

THE GENERAL ELECTRIC AT BOSTON.—The General Electric Co., Schenectady, N. Y. Pamph.; 5¼×7¾ ins.; pp. 66; illustrated.

This is one of the neatest pamphlets that has come to our attention in some time. It was published for distribution at the American Street Ry. Convention, held in Boston, Sept. 6-9, and contains descriptions of the various street railway plants of the city and vicinity. A considerable proportion, however, is given up to descriptions of the many points of interest and the best routes for sight-seers to follow.

ELECTRICITY FOR MACHINE DRIVING.—Westinghouse Electric & Mfg. Co., Pittsburg, Pa. Pamph.; 6 × 9 ins.; illustrated.

This is a brochure pointing out in a brief manner a few of the advantages secured by using separate electric motors in place of long lines of shafting and the usual system of belting. A list of industries to which electric motors are applicable and the advantages to be derived are given, the latter being subdivided into such topics as reliability, convenience and flexibility, saving of power, sanitary improvements, increased output, etc.

ARMOR-PLATE.—The Carnegie Steel Co., Limited, Pittsburg, Pa. Cloth; 12¾ × 9¼ ins.; pp. 73, of photogravures and text.

This handsome publication, printed in both English and French, illustrates and briefly describes the armor-making plant of the Carnegie Steel Co.; presents views of a large number of the new ships of the United States Navy, and shows the results of ballistic tests of armor-plate of various forms and thicknesses made by this firm. The text accompanying these plates gives the location, date and conditions of each test, and the results for each round.

SURFACE CONDENSERS; COOLING TOWERS; FEED-WATER HEATERS.—Wheeler Condenser & Engineering Co., 120 Liberty St., New York. Three pamphlets; 6 × 9 ins.; pp. 30, 16, 19.

These three pamphlets contain illustrated descriptions of several styles of the "Wheeler" surface condensers and feed-water heaters, and of the "Barnard" cooling tower, used for cooling the circulating water discharged from surface condensers. In this tower the water is cooled by passing down over a series of vertical galvanized steel wire mats while a current of air is blown upward through the mats by means of a fan.

CORLISS AND COLUMBIA ELECTRIC ENGINE STOPS.—Springfield Engine Stop Co., Springfield, Mass. Circular; 6 × 9 ins.; also a pamphlet, 8¼ × 5 ins.

These are brief descriptions of a form of electric engine stop which consists of a small steam cylinder, controlled by an electrically operated valve, whose function is to raise the side rod of the Corliss governor, thus lifting the governor balls and preventing the grab hooks from opening the main engine valves. The electric valve can be operated from any point by pressing a button. Reasons for employing an engine stop and several letters from users are included.

GRANITE ROCK WOOL.—American Insulating Material Mfg. Co., 215 North Third St., St. Louis, Mo. Paper, 7¾ × 10¾ ins.; pp. 32.

This material is said to be made by converting granite rock to a fibrous condition, and is claimed to be superior to the ordinary mineral wool made from furnace slag in its freedom from acids and impurities. It is adapted for boiler and pipe coverings, for sound deadening and heat insulation in all classes of building, and especially in cold storage warehouses, ice houses, etc., and in passenger car and refrigerator car construction. An analysis is given showing that the material is free from sulphuric acid and contains much less alumina and iron oxide than mineral wool. It weighs about 7 lbs. per cu. ft., and is sold put up in burlap bags at $30 per ton of 2,000 lbs. The material is also used for the filtration of water, and is made up in sectional forms for use in boilers, steam pipes, brine tanks, etc.

POWER TRANSMISSION AND CONVEYING MACHINERY.—The Link Belt Machinery Co., Chicago, Ill. Paper; 6 × 9 ins.; pp. 300; illustrated.

This catalogue replaces all previous catalogues of the above-named company's products in standard conveying, hoisting and power transmission machinery. It illustrates and describes briefly complete plants and separate machines, fittings and supplies for conveyors, elevators, coal screening and washing machinery; coal and ash handling plants; cane conveyors, granulators, strainers, etc., for sugar refineries and plantations; packing house elevators and conveyors; grain elevator and flour mill conveying and packing machinery; barrel and bottle washing and conveying machinery for breweries, malt houses and distilleries; conveyors for fish, fruit and vegetable canneries, log hauls, conveyors and elevators for saw mills, etc., etc. The book is handsomely printed and illustrated and is provided with an adequate index.

SUPPLEMENTARY GAS FUEL FOR STEAM BOILERS.—Economy Mfg. Co., New York. Pamph.; 7 × 10 ins.; pp. 16.

This pamphlet describes W. L. Teter's patent system for "perfecting the combustion of coal" under steam boilers. A retort formed of a coil of 2-in. pipes is placed just back of the bridge wall, and into it is carried a current of steam and a small quantity of oil which is fed in drop by drop. The mixture of superheated steam and petroleum vapor is taken from the retort to a series of pipes which are placed parallel to and a short distance below the grate bars. These pipes are perforated with a number of small holes, which serve to distribute the steam and vapor uniformly under the grates. An increase of from 20 to 40% in efficiency is, of course, claimed for this device, and a $500,000 company has been formed to exploit it. Whatever merit this device has is probably due to its discharging steam under the grate, which may prevent the formation of clinker and improve the draft, but this is not new nor patentable.

CONSTRUCTION NEWS.

CONDENSED LIST OF CONTRACTS PENDING WITH DATE OF OPENING BIDS.

Bids to be opened.	Work. Place.	See Eng. News.
Oct. 20.	Viaduct over Lick Run, Cincinnati, O.	Sept. 22
Oct. 20.	Greenhouses, etc., New York, N. Y.	Oct. 13
Oct. 20.	Brick chimneys (3), Buffalo, N. Y.	Oct. 13
Oct. 20.	Bridge, 150-ft. span, Jackson, W. Va.	Oct. 13
Oct. 20.	Electric conduits, Erie, Pa.	Oct. 13
Oct. 20.	Asylum building, Newark, N. Y.	Oct. 13
Oct. 20.	Water pipe, etc., New York, N. Y.	Oct. 13
Oct. 20.	Macadam road, Enfield, Mass.	Oct. 13
Oct. 20.	Water-works, Shawnee, Okla.	Oct. 13
Oct. 20.	Electric light bonds, Grafton, W. Va.	Oct. 6
Oct. 20.	Steam heating, etc., York, Pa.	Oct. 6
Oct. 20.	Cottage, Lancaster, O.	Oct. 6
Oct. 20.	Levee work, New Orleans, La.	Oct. 20
Oct. 20.	Highway (3,000 lin.ft.), Sudbury, Mass.	Oct. 20
Oct. 20.	New Lebanon road, New Lebanon, N.Y.	Oct. 20
Oct. 20.	Pumping engine, Fort Wayne, Ind.	Oct. 20
Oct. 20.	Bridge approach, Kansas City, Mo.	Oct. 20
Oct. 21.	Granite walks, St. Louis, Mo.	Oct. 20
Oct. 21.	Grading, Terryville, Conn.	Oct. 20
Oct. 21.	Grading, paving, etc., Dayton, O.	Oct. 20
Oct. 21.	Brick sewer, Memphis, Tenn.	Oct. 20
Oct. 21.	Wire (750 miles), Washington, D. C.	Oct. 20
Oct. 21.	Interior finish, Columbus, Ga.	Oct. 13
Oct. 21.	Paving, Buffalo, N. Y.	Oct. 13
Oct. 21.	Sewer pipe, cement, etc., Newton, Mass.	Oct. 13
Oct. 21.	Levee work, West Memphis, Tenn.	Sept. 22
	Advertised, Eng. News, Sept. 22 to Oct. 13.	
Oct. 22.	Electric lighting, heating, etc., Buffalo, N.Y.	Oct. 13
Oct. 22.	Electric light plant, Port Royal, S. C.	Oct. 13
Oct. 22.	Drainage, Harvel, Ill.	Oct. 13
Oct. 22.	Dredging at navy yard, Brooklyn, N.Y.	Oct. 13
Oct. 22.	Sewers, Washington, D. C.	Oct. 13
Oct. 22.	Pipe sewers, Lebanon, O.	Oct. 13
Oct. 22.	Iron bridges (2), Salem, Va.	Oct. 6
Oct. 22.	Bridge, plans and material, Cincinnati, O.	Sept. 29
Oct. 22.	Electric plant, Litchfield, Ill.	Sept. 29
Oct. 22.	Dredging, Pensacola Bay, Fla.	Sept. 29
	Advertised, Eng. News, Sept. 29 to Oct. 13.	
Oct. 22.	Grading, North Main St., Thomaston, Conn.	Oct. 20
Oct. 22.	Grading Michigan Ave., Washington, D. C.	Oct. 20
Oct. 22.	Heating, plumbing, etc., Bath, N. Y.	Oct. 20
Oct. 22.	Electric plants (2), Boston, Mass.	Oct. 20
Oct. 22.	Laying water mains, Amsterdam, N. Y.	Oct. 20
Oct. 22.	Extending water mains, Bremerton, Wash.	Oct. 20
Oct. 22.	Fire alarm system, Mobile, Ala.	Oct. 20
	Advertised, Engineering News, Oct. 20.	
Oct. 22.	Bonds, Troy, O.	Oct. 20
Oct. 24.	Markets, etc., Belem, Brazil	Apr. 28
Oct. 24.	Paving with asphalt, etc., Hamilton, O.	Sept. 29
Oct. 24.	Water-works, Gallipolis, O.	Sept. 29
Oct. 24.	Heating plant, St. Peter, Minn.	Sept. 29
Oct. 24.	Storage reservoir, Bradford, Pa.	Oct. 6
	Advertised, Eng. News, Oct. 6 and 13.	
Oct. 24.	Fire engine house, Chicago, Ill.	Oct. 13
Oct. 24.	Elevators (3), New York, N. Y.	Oct. 13
Oct. 24.	Sewers, Toledo, O.	Oct. 13
Oct. 24.	Sewers, (3¼ miles), Whiting, Ind.	Oct. 13
Oct. 24.	Brick paving, Toledo, O.	Oct. 13
Oct. 24.	Highway, Rochester, Mass.	Oct. 20
Oct. 24.	Grading, etc., Main St., Woodbury, Conn.	Oct. 20
Oct. 24.	Brick paving, etc., Louisville, Ky.	Oct. 20
Oct. 24.	Paving bonds, Cambridge, O.	Oct. 20

Oct. 24. Sidewalk bonds, Richwood, O. ....Oct. 20

No date. School building, Somerville, N. J....Oct. 20

RAILWAYS.

ARGENTINE.—Press reports from Germany state that Herr Schiefiner, a German capitalist, has just secured from the Argentine government a concession for the construction of a complete network of railways, having a total length of 2,000 miles, which, when complete, will serve the entire southern portion of the province of Buenos Ayres as far as Bahia Blanca. A German-Belgian syndicate will be formed for the undertaking.

ASHLAND & WOOSTER.—J. L. Eberhardt, Ch. Engr., Wooster, O., informs us that surveys have been made and the right of way secured for about 40 miles of this proposed line from Ashland to Beech City, via Jeromeville, Austin, Terra Cotta, Wooster, Applecreek and West Lebanon, O., a distance of 52 miles. When final location has been made, the capital for construction will be forthcoming. No contracts of importance will be let. Pres., H. B. Camp, Akron, O.

ATLANTIC, VALDOSTA & WESTERN.—F. W. Long, Ch. Engr., Haylow, Ga., informs us that contracts are now being let for work on this proposed line between Valdosta and Jacksonville, via Haylow, Ga., and Crawford, Fla., a distance of 105 miles. All surveys have been made, the right of way obtained and capital secured. J. D. Hardin, Naylor, Ga., will do some of the work. The line is already built between Haylow and Ewing, 49 miles. G. S. Baxter & Co., of Haylow, are interested. Pres., Walton Ferguson, Jr., 18 Wall St., New York.

BAKERSFIELD & LOS ANGELES.—W. B. Storey, Jr., Ch. Engr. of San Francisco & San Jocquin Valley Ry., 321 Market St., San Francisco, Cal., informs us that this company, whose incorporation was noted in our issue of Sept. 22, has been organized in San Francisco to build a line from Bakersfield to Los Angeles, Cal., an estimated distance of 200 miles, and that this is practically all. The organization has been effected in order to enable surveys to be made and a route to be decided upon. The country to be passed over is excessively rough and the work will be necessarily heavy. It cannot be definitely stated that the road will be built until the cost of same is known. Press reports state that Mr. Storey left for Bakersfield, Oct. 6, to make a reconnoissance of the Tejon Pass and the surrounding country.

CANADIAN PACIFIC.—Reports state that most of the track has been laid on the Crow's Nest Pass extension of this railway from Lethbridge, N. W. T., to Kootenay Lake, B. C., over Crow's Nest Pass of the Rocky Mountains. Work on the proposed Columbia & Western extension, from Robson to Midway, B. C., will be in progress throughout the winter. W. F. Tye, Ch. Engr., Trail, B. C.

CANADIAN PACIFIC.—We are informed that the Ontario and Quebec division of this system is now being double-tracked between St. Anne de Bellevue, Que., and Western Junction, 6½ miles from Montreal, a distance of fourteen miles. The grading, of which there will be about 3,000 cu.yds., will be done by J. W. Munroe, Pembroke, Ont. R. W. Leonard, Ch. Engr. and Mgr. of Construction, Montreal Junction, Montreal.

CAPE FEAR & NORTHERN.—Press reports state that this railway, which is in course of construction between Apex and Holly Springs, N. C., 60 miles, will be extended south to Fayetteville, and north to Durham, connecting at the latter place with the Lynchburg & Durham line of railway. Pres., Benjamin Duke, Durham, N. C.

CHICAGO & NORTHWESTERN.—This company is reported to have let contracts for grading a new line from Denison to Algona, via Pocahontas, Ia., a distance of about 90 miles. This will provide a much shorter route than that through Sioux City.

CHIHUAHUA & PACIFIC.—Thos. J. Brennan, Secy., 80 Broadway, New York, informs us that about 10 miles of track has been laid on this proposed line from Chihuahua, Mex., via Guerrero, to the Pacific Coast, a distance of 600 kilometers (372.6 miles), and that grading has been completed on about 40 kilometers; steel bridges are now being erected. The equipment will consist of five locomotives, fifty box cars, thirty flat cars, two cabooses and nine passenger and combination coaches, most of which have already been built and delivered. The company is in the market for pumps and boilers for eight water stations and for two 60-ft. turntables. Pres., Almeric H. Paget, New York; Ch. Engr. E. S. Safford, Chihuahua.

CHINA.—Wm. Barclay Parsons, 22 William St., New York, has been engaged by the American-China Development Co. to go to China in order to locate the proposed line of railway from Hankow to Hong Kong, the contract for which was signed at Washington, D. C., by the Chinese minister and the company, on Sept. 14. Surveys are to be commenced at once.

CUBA.—It is reported that Col. Hecker, who is in charge of the transportation bureau of the war department of the United States, has been sent to Cuba to secure data and information relative to the construction of a system of railways on that island.

DALLASTOWN.—This company has been incorporated in Pennsylvania, Oct. 12, with a capital stock of $12,000, to construct a steam railway between Dallastown and a point on the York Southern R. R., one mile east of Dallastown, Pa. The incorporators are, Daniel F. Lafeau, Pres.; Henry H. Weber and George E. Neff, of York, Pa.; John C. Heckert and Charles Kohler, of Dallastown.

GEORGIA & ALABAMA.—Reports state that the Georgia & Alabama Terminal Co. has been organized, with a capital stock of $300,000, by W. W. Williamson, C. D. Baldwin, W. V. Davis and others, of Savannah, Ga., in order to construct new terminals for this railway on Hutchinson Island, near Savannah. The work will probably be done by the Georgia Construction Co., which has recently been incorporated for that purpose by W. W. Mackall, J. R. Anderson, W. W. Williamson, of Savannah, and others.

GILA VALLEY, GLOBE & NORTHERN.—A. C. Laird, Secy., Los Angeles, Cal., informs us that the Midland Construction is now at work extending this line from Geronimo to Globe, Ariz., via San Carlos, 58 miles. The entire line has been located and right of way obtained. Much of the grading has been completed and some track has been laid. Pres., William Garland, Los Angeles; Ch. Engr., Russell Chase, Geronimo, Ariz.

GREAT EASTERN.—This company was incorporated in North Carolina, October 14, with a capital stock of $650,000, to construct a railway, 130 miles in length, through Johnston, Wayne, Greene, Pitt, Beaufort and Hyde counties to a connection with the Southern Ry. at Goldsboro or Selma, N. C. J. D. McCormick and J. N. Allen, of New York; J. W. Lynch, Kinston; J. H. McCleary, Suffolk; Geo. W. Suggs and Josiah Exum, of Snow Hill, are directors.

GREENBRIER.—J. M. Gill, Huntington, W. Va., informs us that nothing further has been done towards building this line than to obtain a charter for the company. It was proposed to construct a railway from White Sulphur Springs, W. Va., to the coal and lumber district at the fork of the Greenbrier River.

KELLYTON & ROCKFORD.—This company was incorporated in Alabama, Oct. 6, with a capital stock of $50,000, to construct and operate a railway from Rockford to Kellyton, Ala., on the Central of Georgia Ry., a distance of about 15 miles. The incorporators are J. P. Batson, E. V. Jones, H. W. Pond and others, of Rockford.

LOUISIANA & ARKANSAS.—J. A. Buchanan, Gen. Mgr., Stamps, Ark., informs us that the construction of this line was completed Oct. 1, running from Stamps, Ark., to a connection with the Arkansas, Louisiana & Southern at Cotton Valley, La., a distance of 38 miles. The line is now open for traffic from Stamps to Sibley, La. Pres., Wm. Buchanan, Stamps.

MANSFIELD SHORT LINE.—We are informed that four miles of this proposed line from Lucas to Shelby, via Mansfield and Springfield, O., a distance of 19 miles, have been graded, and the contracts let for the necessary ties and steel rails. The Lucas Construction Co., of Mansfield, are the general contractors, and the Crouch Construction Co., of Chicago, the sub-contractors. Pres., C. W. French; Ch. Engr., R. E. Harwood, both of Mansfield.

MEXICO.—Press reports state that the Mexican government has granted a concession for a standard gage railway, 150 kilometers maximum length, with a liberal subsidy, to the Inguaran Copper Mining Co., in which the Paris Rothschilds are said to be interested. The railway is being planned to connect the mines with the Bay of Zituataneza, on the Pacific Coast, and will be an outlet for the copper productions.

MUNISING.—E. H. Scott, Gen. Mgr., La Porte, Ind., informs us that it is not likely that further construction will be undertaken on this line before next spring. The company already has 47 miles in operation from Munising, on Lake Superior, to Little Lake, Mich., on the Chicago & Northwestern Ry. The total projected length of the system is 110 miles. Pres., Daniel P. Eelles, Rocky River, O.; Ch. Engr., R. C. Young, Munising.

OHIO SOUTHERN.—This line is reported to have been sold, October 15, by John T. Adams, Special Master, of Waverly, O., to W. A. Read, of New York, and others, for $2,000,000, which was the upset price.

ROSSFORD & TOLEDO.—This company was incorporated in Ohio, October 12, with a capital stock of $10,000, to construct a short line of railway from the foot of the Maumee Rapids to the Cincinnati, Hamilton & Dayton Ry. The incorporators are: Edward Ford, Rathbun Fuller, William P. Tyler, Matthias R. Pepper, Thomas R. Taylor and F. H. Tanner, with headquarters at Toledo, O.

SANTA FE, PRESCOTT & PHOENIX.—W. A. Drake, Ch. Engr., Prescott, Ariz., informs us that this line has been completed to Mayer, Ariz., a distance of 25.8 miles, and that operation was to commence on October 15. Pres., F. M. Murphy, Prescott.

ST. LOUIS, OKLAHOMA & SOUTHERN.—C. N. Points, Director, Shawnee, Okla., informs us that this company has located 200 miles of this projected line from Claremore south to Willis, Ind. Ter., on the Red River, via Okmulgee, Wewoka, Sasakwa and Tishomingo. It is also expected to locate a 100-mile branch soon through Shawnee to Purcell. Pres., Gov. John F. Brown, Sasakwa, Ind. Ter.

TENNESSEE.—Press reports state that the Stevens Lumber Co. has determined to construct a new standard gage railway from Dyersburg to Tiptonville, Tenn., a distance of 28 miles. Six miles of line are now in operation as a logging road, but it is proposed to open the completed line to general service.

UTAH & PACIFIC.—Jos. A. West, Ch. Engr., Milford, Utah, informs us that the surveys have all been made, the right of way obtained and capital secured for the first 76 miles of this line, which, when completed, will be 576 miles in length. The contract for its construction, as stated heretofore, has been let to W. D. Hendricks & Sons, Richmond, Utah. Actual work on the line began October 3. Pres., A. W. McCune, Salt Lake City, Utah.

WELLINGTON & POWELLSVILLE.—J. W. Branning, Pres., Edenton, N. C., informs that this line has been completed and was opened for business on September 15. The extension just completed runs from Windsor to Ahoskie, N. C., a distance of 18 miles.

WESTERN RY. CONSTRUCTION.—This company, with offices at New York, was incorporated in West Virginia, October 8, with a capital stock of $5,000,000, with $100 paid in, to construct and operate a railway between Culiacan, State of Sinaloa, across the Sierra Madre Mountains, to Durango, Mexico. The incorporators are: John R. Newberry and R. J. Hartman, of Los Angeles, Cal.; Floyd B. Wilson, James Yalden and Bryan W. Tichenor, of New York.

WILMINGTON & NORTHERN.—Reports state that the Baltimore & Ohio R. R. Co. purchased this line, October 12, extending from Wilmington, Del., to Reading, Pa., 90 miles, and it will open up a new southern route from the anthracite coal regions in Pennsylvania.

STREET AND ELECTRIC RAILWAYS.

BANGOR, ME.—It is reported that the Bangor, Hampton & Winterport Ry. Co. is preparing plans to extend its line in the early spring to Winterport, and to complete the same by July 1. Pres., H. L. Mitchell, 29 Hammond St.

HAMPTON FALLS, N. H.—The Hampton & Amesbury St. Ry. Co. has petitioned the railroad commissioners of New Hampshire for authority to issue $40,000 of capital stock in order to construct and equip a street railway in Hampton Falls and Seabrook, a distance of four miles.

BELLOWS FALLS, VT.—F. C. Kennedy, of Burlington, Vt., informs us that all the franchises have been granted and the capital secured for the proposed Bellows Falls & Saxtons River Electric Ry., from Bellows Falls to Rockingham, via Westminster, Vt., a distance of six miles. Contracts will all be let ready for construction and some of the work done this fall and completed early next spring. Pres., J. H. Holton, Burlington; Ch. Engr., V. K. Nash, Woonsocket, R. I.

BURLINGTON, VT.—We are informed that C. W. Blakeslee & Sons, New Haven, Conn., will commence work at once on the construction of the Burlington & Hinesburgh R. R., which is to be an electric line, 16 miles in length, to be operated between Burlington and Hinesburgh. Surveys have been made and most of the right of way obtained and track supplies ordered. Pres., W. T. Babcock, Boston, Mass.; Ch. Engr., F. O. Sinclair, Burlington.

BRAINTREE, MASS.—It is reported that the selectmen of this town have granted a franchise to the Braintree & Weymouth St. Ry. Co., of Weymouth, to build on Meadow Road and French's Ave.

NEW BEDFORD, MASS.—It is reported that the New Bedford, Brockton & Middleboro St. Ry. Co. has decided upon a route for its proposed line, and will probably request a new franchise within a few days. Mayor Ashley is said to be interested.

QUINCY, MASS.—The Quincy & Boston St. Ry. Co. will soon build a carhouse, according to reports, near Neponset bridge on Robinson's wharf. The dimensions will be 93 × 23 × 144 ft., and the cost, $15,000. B. J. Weeks, Purchasing Agt. and Supt., 4 Washington St., Quincy.

WHITMAN, MASS.—Waldo Dyer, of Whitman, a director of the Brockton & Whitman St. Ry. Co., informs us that the surveys have been made, the location granted and the capital secured for this proposed electric line from Brockton to Whitman, a distance of 3½ miles. The franchise was granted on Sept. 23. Jas. F. Shaw & Co., 53 State St., Boston, Mass., have charge of the construction work. Vestibule cars will be used, and the line will serve as a connecting link in the system which is projected to run from Brockton to Rockland and Nantasket Beach, via Whitman and Abington, 30 miles. Work will begin at once. Pres., John J. Whipple, of Brockton.——We are also informed that a new organization, the Old Colony St. Ry. Co., proposes to build a 10-mile electric line in this locality early next spring, probably in April. The promotors are ready to receive proposals as to the cost of construction, etc., and may be addressed at P. O. Box 466, Whitman.

WORCESTER, MASS.—E. S. Hill, Tremont Bldg., Boston, Mass., informs us that the capital has been secured for the construction of the proposed Worcester & Webster St. Ry. from Worcester to Webster, via Auburn and Oxford, 15 miles, and that the contract has been let to the New England Electrical Ry. Construction Co., of Worcester. As stated in our last issue, the company was recently chartered, with a capital stock of $150,000. Pres., Julius Garst, of Worcester.

BRISTOL, R. I.—The Lap Joint Railway Track Co., 11 Broadway, New York, is reported to have begun work on the proposed electric line to Mount Hope. A power house and car shed will be built at Mount Hope Park, and work is to be completed before May 1.

ALBANY, N. Y.—J. S. Frost, Secy. Albany Construction Co., of Albany, contractor for the proposed Albany, Helderberg & Schoharie Electric Ry., informs us that the map and profile have been filed in Albany, and preliminary steps been taken preparatory to commencing the construction work. The route is from Albany to Schoharie, via Delmar, New Scotland, New Salem, Thompson's Lake, East Berne, Berne, West Berne and Gallupville, a distance of 42 miles. Pres.. Henry W. Burgett, 82 Devonshire St., Boston, Mass.; Ch. Engr., George Yost, Albany.

BROOKLYN, N. Y.—It is announced that plans and specifications are being prepared for the changing of the motive power on the Fifth and Lexington Ave. lines of the Brooklyn Elevated R. R.; estimated cost, $750,000.

MARION, N. Y.—It is reported that L. Brown and C. L. Tassell, of Marion, are securing the right of way for a proposed electric railway between that village and Palmyra. It is said that the line will be constructed during the coming year, as a part of the capital has already been pledged; estimated cost, about $75,000.

NEW YORK, N. Y.—The board of railroad commissioners, August 28, authorized the Twenty-eighth and Twenty-ninth St. Crosstown Ry. Co., controlled by the Metropolitan St. Ry. Co., New York, to change the motive power of its line from horse to the underground electric system.

ATLANTIC CITY, N. J.—The Atlantic City St. Ry. was granted a franchise, Oct. 10, to construct and operate a double-track crosstown trolley line from South Carolina Ave. and the beach to the inlet section, via South Carolina, Arctic and Rhode Island Aves. Levi C. Albertson is interested.

SOUTH ORANGE, N. J.—The village trustees, October 17, granted a franchise to the South Orange and Maplewood Traction Co., to maintain a grade across Montrose Ave.

ALLENTOWN, PA.—The Inland Traction Co., of Allentown, was incorporated, Oct. 14, with a capital stock of $200,000, to construct a street railway in Montgomery county, 12 miles in length. The incorporators are: John H. Pascoe, Allentown; J. B. Alderfer, Pres.; Edwin S. Landis and Edwin H. Alderfer, of Souderton, Pa.; C. F. Hecklen, Quakertown, Pa.

JOHNSTOWN, PA.—The Johnstown and Somerset Traction Co. is stated to have been incorporated, October 5, by Charles S. Price, Morris L. Woolf, Pres.; David Barry, secretary; Herbert H. Weaver, and Fred Krebs, of Johnstown. It is proposed to build a trolley line from Johnstown to Geistown, Scalp Level and Windber, with several branches.

NEWTOWN, PA.—A. Chambers, of Newtown, informs us that all of the right of way has been obtained for this proposed line between Newtown and Doylestown, 14 miles. Thos. A. Connell, of Philadelphia, the contractor, began work just outside of Newtown on Oct. 10. It is reported that work will be completed by Dec. 15. Pres., Thos. P. Chambers; Ch. Engr., B. F. Knabb, both of Newtown.

BALTIMORE, MD.—David E. Evans & Co., of Baltimore, are said to have been awarded a contract, Oct. 12, for the construction of the Schroeder St. line of the Consolidated Ry. Co., to a connection, on Saratoga St., with the old Columbia & Maryland Ry.

WASHINGTON, D. C.—The stockholders of the Columbia Ry. Co. have been granted permission to issue $500,000 in bonds for the extension of the line eastward and the changing of motive power in the city from cable to underground electricity. This eastern extension is from 15th St. and Benning Road to the District line, connecting with the Chesapeake Beach Ry., with a branch line from Deanewood to Kenilworth, about seven miles in all. Its construction will involve the erection of a steel bridge 500 ft. long. It is reported that contracts for this extension will soon be let.

LYNCHBURG, VA.—The Lynchburg Electric Ry. & Light Co. has been granted a franchise by the council for constructing new lines in this city. Pres., H. P. Woodson; Directors, W. C. Ivey, R. I. Owen and others.

NEW ORLEANS, LA.—Alden McLellan, Pres. St. Charles St. R. R. Co., informs us that this company does not contemplate the building of any extensions in the near future, as currently reported.

NASHVILLE, TENN.—Reports state that the construction of an electric railway from Nashville to Lebanon and Smithville is contemplated by Pittsburg capitalists. E. E. Beard, of Lebanon, can give further information.

CINCINNATI, O.—The Cincinnati, Milford & Goshen St. Ry. Co. was incorporated, Oct. 10, with a capital stock of $10,000, to build an electric line from Linwood, in Cincinnati, to Goshen, along the Cincinnati, Columbus & Wooster Turnpike. The incorporators are: W. A. Goodwin, F. B. Niederhelman, W. C. Compton, Pres. of the Turnpike Co.; Lennox O. Goodwin and S. W. Kittering.

CLEVELAND, O.—Reports state that about 15 miles of grading have been completed on the new Cleveland & Eastern Electric Ry., and that rails for the road have been contracted for. E. G. Tillotson, Vice-Pres. Lorain & Cleveland Ry. Co., 61 Garfield Bldg., Cincinnati, is said to be interested.

CLEVELAND, O.—It is announced that the Cleveland, Berea, Elyria & Oberlin Ry. Co. is going to extend its line next summer from Oberlin to Norfolk, about 30 miles, and that the right of way is now being obtained. Pres., A. H. Pomeroy, Garfield Bldg.

LANCASTER, O.—We are informed that the Fairfield Traction Co. has been organized, with $100,000 capital stock, to build a railway between Lancaster, O., and the Boys' Industrial School, a State institution, six miles south of Lancaster. The contract for constructing the line ready for equipment has been awarded to Ingham & Neeb, of Lancaster, and work is to commence at once.

LOGANSPORT, IND.—The commissioners of Carroll county have granted a franchise for the proposed Logansport & Burlington Electric Ry. to the Business Men's Association, of this city, which will organize a company to build a line.

SUMMIT CITY, MICH.—Clark Cornwall, of Jackson, Mich.; Arthur Woodard, Ann Arbor. Mich., and Walter Joslyn, Ysilanti, Mich., have been granted a franchise by the township board of Summit to construct an electric railway to Vandercook's Lake to Summit.

EL PASO, TEX.—The citizens of this place contemplate the construction of an electric street railway in this city.

SHAWNEE, OKLA.—C. N. Points, Director of St. Louis & Oklahoma Southern Ry. Co., Shawnee, informs us that he has a franchise for a street railway in Shawnee, which it is expected to build soon. Information regarding street railway construction is solicited.

AUSTRALIA.—Press reports state that J. G. White & Co., Engineers and Contractors, 29 Broadway, New York, are beginning to ask quotations on the various requirements for the electric railway which they are soon to build in one of the principal towns in Australia.

ELECTRIC LIGHT AND POWER.

WILDER, VT.—The contract for installing the electric lighting plant for the Wilder Club & Library Building has been awarded to Austin & Letteney, Tremont Bldg., Boston, Mass.

BOSTON, MASS.—An ordinance is before the council authorizing an appropriation of $7,000 for extending the electric plant on Deer Island.

BOSTON, MASS.—Bids are asked until 12 noon, Oct. 22, for furnishing the machinery and for installing a plant at the new battery at Grover's Cliff, Winthrop, and also a plant at Nantasket Head, Hull. Each plant will consist of a boiler, one direct connected generating set, one switchboard, one storage battery, the electric blowers and starting boxes for the blowers. The plants must be completed by Dec. 31. Col. S. M. Mansfield, U. S. Engr..

PITTSFIELD, MASS.—Press reports state as follows: A scheme is on foot, backed by capitalists from New York and the west, for the consolidation of the entire electric light plants of Pittsfield, Lenox, Lee, Housatonic and Great Barrington, for the purpose of furnishing light and power to all towns and villages in Southern Berkshire. The plans of the promoters further contemplate the establishment of a railway between Pittsfield and Great Barrington—possibly a three-rail line. A number of the capitalists who have been in Pittsfield are reported as having said that $2,000,000 is available, if the necessary purchases to carry out the plans can be made. Daniel Odell and Charles N. Nelson, New York; E. A. Merrill, Minneapolis, and Thomas Greenwood, Great Barrington, are interested.

SOMERVILLE, MASS.—The council has voted in favor of establishing a municipal plant. It is probable that the question will be submitted to a vote of the citizens, Nov. 16. Alderman Lamont, Chn. Com., and Mayor Perry may be addressed.

PROVIDENCE, R. I.—The stockholders of the Narragansett Electric Lighting Co. have voted to increase the capital stock to $4,000,000, to enable the company to carry on its proposed improvements.

CROMWELL, CONN.—F. H. C. Reynolds, Pres. Cromwell Water Co., 7 Exchange Place, Boston, is reported as considering the question of building a plant in connection with the water-works.

EAST HARTFORD, CONN.—The fire district has voted to light the district with electricity. It has been recommended to make a short contract with the East Hartford Light & Power Co. The committee has also recommended that authority be secured from the legislature to build a plant to be owned by the fire district. The committee consists of E. E. King, Chn., C. F. Bingham, C. R. Forbes and A. W. Wickham.

AKRON, N. Y.—This place voted, Oct. 10, to build a municipal plant.

AUBURN, N. Y.—Press reports state that the D. M. Osborne Co. proposes to build an electric plant on the raceway to supply light and power to its three plants in the different parts of this city. The company has been asked to have the plant large enough to furnish commercial lighting.

BELFAST, N. Y.—It is stated that arrangements are being made for the proposed plant.

CANANDAIGUA, N. Y.—Thos. H. Bennett and M. D. Munger are interested in a new company which has applied for permission to build a plant. The capital stock will be about $30,000.

CHARLOTTE, N. Y.—The citizens have asked that another special election be called to allow them to reconsider their previous vote in favor of a plant and water-works, to cost $10,000 and $25,000 respectively. Bids were asked until Oct. 15 for constructing these improvements, as advertised in Engineering News, Sept. 29 and Oct. 6. Now it is proposed that so much of the sum realized on the bonds as relates to the electric lighting shall be invested and the proceeds therefrom used to pay the interest, and should any surplus be left the amount is to be added to the principal. It also authorizes the board to enter into a contract with some individual or corporation to furnish the lighting for the village instead of the village, through municipal ownership, furnishing its own lights. Engrs., Stanwix Engineering Co., Rome, N. Y.

CHATHAM, N. Y.—J. M. Klinglesmith has purchased the Spengler farm, water power, etc. It is stated that the purchaser will at once build a power plant.

HUDSON, N. Y.—Erskine Waldron, a taxpayer of this city, has commenced action in the Supreme Court looking towards annulling the lighting contract recently let to the Hudson Light & Power Co.

GREENPORT (L. I.), N. Y.—The question of the municipal ownership of the plant and water-works is being considered.

MALONE, N. Y.—F. D. Kilburn and J. F. Wright, Malone, and J. H. Abbott, of Gouverneur, N. Y., have organized a new electric light company. If the franchise already asked for is granted, work on the plant will begin at once.

MUMFORD, N. Y.—J. Ward writes us that F. H. Hyde, whose plant was destroyed in February, has purchased dynamos for the new plant, noted in our issue of last week as proposed.

NEW YORK, N. Y.—Bids are asked until Oct. 24 for furnishing gas and electric light fixtures, etc., for the department of public charities. Pres. Dept., J. W. Keller, foot East 26th St., Manhattan.

NIAGARA FALLS, N. Y.—The Union Carbide Co., of this city, has made a contract with the Niagara Falls Power Co. for 5,000-HP. in addition to that already secured.

PALMYRA, N. Y.—Olin J. Garlock, Pres. Palmyra Electric Light & Power Co., writes us that the company is building a new station, to which the old machinery will be moved. The plant will have a capacity for 32 1,200-c. p. and 1,800 16-c. p. incandescent lights; estimated cost, $35,000. Supt. and Vice-Pres., W. D. Willcox.

SHERMAN, N. Y.—T. J. Newell, Secy. Sherman Electric Light Co., writes us that the contract for furnishing the materials and for building the plant has been let to H. King & Son, Corry, Pa. The plant will have 8 to 12 arc and 350 to 700 16-c. p. incandescent lights. J. L. Thayer writes that it will be completed Dec. 1.

SIDNEY, N. Y.—Press reports state that the Sidney Camp Grove Association has decided to put in a plant and water-works for its grounds.

UTICA, N. Y.—The Utica Electric Mfg. & Supply Co. has been awarded the contract for furnishing and placing a 200 incandescent light machine in the plant of the New York Mills Co., of this city.

WATERTOWN, N. Y.—The Watertown Electric Co. has submitted a proposition to light the streets under a new contract. Pres., D. C. Middleton.

CRANFORD, N. J.—The township committee has awarded a 5-year contract for furnishing 196 lights to the Suburban Electric Light Co., at $15 a light a year.

IRVINGTON, N. J.—The question of this place having its own plant is being considered by the council. Councilman Lacombe may be addressed.

HALLSTEAD, PA.—The council has awarded a contract for electric lighting, according to reports. Work on the plant will be begun at once. The city will take six 2,000-c. p. arc and 25 32-c. p. incandescent lights. The D. L. & W. Ry. Co. will take 14 arc lights for its yards, besides other lights for the roundhouse and other property.

MARCUSHOOK, PA.—The council has passed an ordinance granting a five-year franchise for a plant to Walter G. Rust.

NEW BLOOMFIELD, PA.—The Perry Electric Light, Heat & Power Co. has submitted a proposition to light this place. The company has already begun the construction of its line from Newport to this place.

PERKASIE, PA.—The borough council has decided to submit the question at the next election of either granting a franchise for a plant or of erecting a municipal plant.

PHILADELPHIA, PA.—A meeting of the Southern Electric Light & Power Co. will be held Nov. 23 to consider the question of increasing the capital stock from $400,000 to $2,000,000. Pres., John M. Mack, Tacomy, Philadelphia.

TYRONE, PA.—A report states that the council has passed a resolution instructing the legal committee to offer the Tyrone Gas & Water Co. $90,000 for the assets, property and franchises, and if the same is not accepted, proceedings are to be instituted to take the plants under the provisions of the acts of the assembly. On July 7, 1897, this place voted to increase the debt for municipal plants.

BALTIMORE, MD.—Bids are asked until Nov. 2 for the electric lighting, heating, etc., of the executive and wardens' buildings at the state penitentiary. Arch., Jackson C. Gott, 1 East Fayette St.; Engr., Herbert G. Gear, Baltimore; Warden, John E. Weyler.—The courthouse commissioners received the following bids, Oct. 8, for furnishing the machinery and installing a plant at the new courthouse; Archs., Wyatt & Nolting, 4 East Lexington St: The McCay-Howard Engineering Co., Baltimore, 2-wire system, with Wheeler dynamo and Ball, Fisher or Ideal engine, $37,349, or with Buffalo Forge engine, $36,869; with General Electric or Walker dynamo, $37,369 or $37,849. The same company submitted separate bids for engines, generators and switchboards, ranging from $11,460 to $12,590. For wiring alone it bid $25,269 for a 2-wire system. Blake & Williams, New York, $34,840, 2-wire system, $35,104 3-wire system. J. F. Ferguson & Co., Philadelphia, $30,500 2-wire system, $31,500 3-wire plant; wiring alone, $18,000. The Southern Electric Co., Baltimore, 2-wire system, with Wheeler dynamo, $36,869; with General Electric dynamo, $37,369; for dynamos and engines alone, Crocker, $11,460; General Electric, $11,960; wiring alone, 2-wire system, $25,869. The same company offered engines, dynamos and switchboard, using the Ideal engine and Bullock dynamo, for $13,627. T. M. Mobrey, Philadelphia, $24,000 2-wire system $25,000 for 3-wire system. The D'Olier Engineering Co., Philadelphia, engine and dynamo for 2-wire plant, $12,782; complete, 2-wire plant for $28,781. Engines and dynamos alone the bids were: Cohen & Staughton, $12,226; Walker Co., $13,098; Crook, Horner & Co., $12,295 and $12,650; Fort Wayne Electric Corporation, $12,200; F. T. Potter, New York, $18,184; Talmadge & Wilson, Washington, D. C., $16,000 and $16,500; Thomas C. Basshor & Co., $12,620 and $12,935. Contract was let to Ferguson & Co., Philadelphia. It was not determined which system will be used. The contract for engines and generators will not be awarded until a future meeting of the commission.

WILLIAMSPORT, MD.—The committee will submit its report for a plant and water-works in a few days. L. D. Byron and Dr. W. S. Richardson are on the committee.

FREDERICKSBURG, VA.—T. McCracken, Chn. Com., writes us that bids for furnishing the machines and for building a plant will probably be received in about 30 days. The plant will have a capacity for 72 2,000-c. p. arc lights; estimated cost, $10,000. Engr., Fort Wayne Electric Corporation, Fort Wayne, Ind.

HAMPTON, VA.—The Chesapeake Light & Power Co. proposes to extend its plant. Mgr., Segar Whiting.

GREENSBORO, N. C.—Bids are asked until Nov. 15 for lighting the streets with electricity for three or more years from Jan. 1. There will be required 70 or more 1,200-c. p. arc lights for city use. Extensive commercial lighting will be wanted. Population, 10,000. Chn. Com., B. H. Merrimon.

HAW RIVER, N. C.—The Granite Cotton Mills Co., owned by Holt Bros. & A. W. Haywood, will install a plant of about 750 lights capacity.

SUMTER, S. C.—Bids are asked until Dec. 1 for furnishing this place with 37 2,000-c. p. arc lights for a term of 10 or 15 years; also for furnishing, if necessary, 160 incandescent lights for the opera house and for commercial lighting. Cy. Clk., C. H. Hurst.

FITZGERALD, GA.—The council is reported to have voted to award the contract for building a plant and waterworks to Moore &McRae, Atlanta, Ga.

FLORENCE, ALA.—Frank M. Perry, it is stated, is interested in the proposed electric light and power plant.

OPELIKA, ALA.—G. L. Webster, Cy. Clk., writes us that it is not definitely settled as yet whether the council will put in a plant or continue to have the city lighted by contract. The question will be finally decided upon in a few months.

NEW ORLEANS, LA.—The Crescent City Electric Co. has purchased land at Carrollton Ave. and the New Basin, on which it proposes to build a plant. The machinery, it is stated, will be purchased at once. The plant will have about 1,220 H. P. Gen. Mgr. and Supt., J. B. Craven.

CHICAGO JUNCTION, O.—Bids are asked until Oct. 25 for furnishing the material and for building a complete plant, as described in our advertising columns. Engr., Chas. F. Sturtevant, St. Louis, Mo.; Clk., Louis Simmermacher; Mayor, Louis C. Hess.

CLEVELAND, O.—Bids are asked until Nov. 16 for furnishing the following machinery for the addition to the plant at the Cleveland State Hospital: Div. I—Two 50-K-W.—110 W. direct connected dynamos to operate about 300 R. P. M.—Change in present switchboard and addition thereto—connecting wires from dynamo to switchboard, and one 10-HP. motor, one 7½-HP. motor, one 4-HP. motor, or (an alternative bid) one 50-K-W. dynamo, and the balance as stated above. Div. II—Two automatic high-speed engines, each to develop 75-HP. at ¼ cut off and 80 lbs. pressure at the throttle and foundations for same, or (an alternative bid), one engine of the above size. Div. III—Wiring. From the present main to the location of motor in the serving room, laundry, and machine shop, and change in the existing wiring and wiring for two arc lamps and two 50-c. p. incandescent lamps. Engrs., E. P. Roberts & Co., Osborn Bldg., Cleveland; Secy., State Hospital, H. C. Eyman.——A report states that the trustees of the Cleveland State Hospital have awarded Russell & Co., of Massillon, O., the contract for furnishing the engine and dynamos for the new electric light plant to be erected at the institution.

GIRARD, O.—The question of building a plant is being considered by the council.

LIMA, O.—The council has directed the committee to secure estimates for a new lighting contract, and also for a municipal plant. Councilman McClurg may be addressed.

NEW RICHMOND, O.—Bids are asked until Nov. 10 for the purchase of $30,000 of electric light plant and waterworks bonds, according to reports. Clk., Chas. R. Day.

KOKOMO, IND.—Press reports state as follows: The electric light plant of the Citizens' Light & Power Co. was ordered sold at receiver's sale by Judge Mount Oct. 11, the sale to take place Nov. 12. The company does the lighting at $70 a light, and is capitalized at $70,000. The creditors urging the sale are the Capital National Bank, Indianapolis; American Savings Bank, Detroit, and Joseph L. Cohn, of Indianapolis. Pres., E. Snow, Indianapolis.

WORTHINGTON, IND.—C. A. Geckler, Clk., writes us that a franchise and contract for a plant and public lighting have been given to C. S. Knight, of the Fort Wayne Electric Corporation, and also for water-works. The city will use 34 lights and 41 hydrants. The town will have the option to purchase the plants within 30 days after completion.——Press reports state that the case of several citizens of Worthington as plaintiffs against the town board and C. S. Knight, contractor, to enjoin the latter from putting in a water-works and an electric light plant at this place was dismissed from court Oct. 7.

LAWTON, MICH.—This place voted Oct. 11 to issue $5,000 in bonds for electric lights.

GRAND RAPIDS, MICH.—The council has overruled the mayor's veto by awarding the contract for furnishing the machinery and for building the plant to the Chase Construction Co., 1113 Majestic Bldg., Detroit, Mich. The bids for the machinery were given under Contract Prices in our issue of Oct. 6.

JONESVILLE, MICH.—This place voted, October 10, to issue $28,000 in bonds for a plant and water-works, according to reports.

LEROY, ILL.—The Leroy Electric Light, Power & Heating Co. has purchased land for its new plant, according to reports.

ST. JOSEPH, ILL.—The bids received Oct. 6 for furnishing and erecting a plant, as advertised in our issue of Sept. 22, have been rejected. Engr., J. D. Wallace, Champaign, Ill.; Chn. Com., C. W. Gibson.

MANAWA, WIS.—We are informed that the Little Wolf River Co. is figuring on putting in a plant to be operated by steam for its own use. The company will probably buy a small dynamo and an engine. The plant will have a capacity for 100 16-c. p. lights.

MARSHFIELD, WIS.—John H. Thomas, Cy. Clk., writes us that the council rejected the bids for furnishing 28 arc lights opened Oct. 1 on account of their being too high. The city may build its own plant.

SOUTH MILWAUKEE, WIS.—The council has resolved to purchase the plant of the South Milwaukee Electric Light & Power Co. for $19,000, paying for it in monthly installments covering a period of ten years, the amount paid each month being the same that the city would pay as rent for the lights. The mayor is stated in a later reported to have vetoed the resolution.——The company has asked for a renewal of its contract. Mayor, George Bush.

RED LAKE FALLS, MINN.—We are informed that the contract for a water power plant for this place has been let to Marcus Johnson. It will have a capacity for 10 1,200-c. p. arc lights

WINNEBAGO CITY, MINN.—Bids are asked until Oct. 31 for the purchase of $8,000 of 5% bonds for the proposed plant. Pres. Village Council, Andrew C. Dunn.

WINONA, MINN.—L. D. Frost, Recdr., writes us that nothing has yet been done in regard to the building of a municipal plant. It is stated that a committee has been appointed to investigate the question and to make a report about Jan. 1.

COGGON, IA.—It is stated that the question of building a plant is being considered.

HILLSBORO, N. DAK.—Fred. L. Goodman, Mayor, writes us that the question of building a plant has been agitated, but no definite action has as yet been taken; estimated cost, $3,000.

HORTON, KAN.—The council is reported to have awarded the contract for the proposed plant to the Warrick Electric Co., Cleveland, O.

PONCA, NEB.—The question of building a plant is being considered, according to reports.

PINE BLUFF, ARK.—Walter S. Jeter is reported as interested in the proposed electric light plant and street railway; estimated cost, $150,000.

WYNNE, ARK.—Bids are asked until Nov. 8 for furnishing the machinery and for building a plant and waterworks, to cost about $15,000. (Postponement from Oct. 15.) Engr., Owen Ford, Security Bldg., St. Louis, Mo.; Chn. Com., W. M. Kennedy.

TUSCARORA, NEV.—Press reports state that the Tuscarora mines are to be developed on a large scale. S. N. Milner, Mgr. of the Dexter mine, and associates, will harness the Snake River in Idaho and utilize its power. A stand-pipe will be built and the necessary dynamos will be installed. The distance from Snake River to Tuscarora in a direct line is about 115 miles, and $100,000 will be used for building the line and plant, which will deliver about 5,000 HP. at Tuscarora.

ANACORTES, WASH.—It is stated that the council has repealed the ordinance granting a franchise for a light and power plant to the Skagit Mill Co.

TACOMA, WASH.—C. B. Talbot, Civil Engr., writes us that he has projected a water power plant, to cost about $260,000. The council is considering the question of building it, it having been petitioned to do so by 800 citizens. It is proposed to secure about 12,000 HP. from the Puyallup River by way of a canal and flume, 8 × 12 ft. One-third is to be equipped for present use. The contractor is to receive annual payments of $60,000 until paid.

REDWOOD CITY, CAL.—Daniel R. Stafford, Town Clk., writes us that bids will soon be asked for an incandescent plant in connection with the water-works; estimated cost, about $3,000.

LONG BEACH, CAL.—O. F. A. Johnson, Pres. Bd. Trustees, writes us that nothing has been done yet in regard to the proposed plant. The opposition is so strong that it is probable the question will be dropped for this year.

LOS ANGELES, CAL.—The National Board of Managers has appropriated $4,500 for a plant at the Soldiers' Home in this city. Maj. W. H. Bonsall, of the board of managers, Los Angeles, may be addressed.

POMONA, CAL.—The trustees have terminated the contract with the San Antonio Light & Power Co. It is stated that the question of a municipal plant will be decided soon.

SANTA BARBARA, CAL.—Edmund M. Burke, Mayor, writes us that it will be over three months before bids will be asked for building the proposed plant. On Sept. 15 the council appointed a committee to investigate municipal ownership, but it has not yet commenced its labors. The plant will have 60 or more 2,000-c. p. arc and 1,000 16-c. p. incandescent lights, and will probably be operated by steam power. It is said that the local lighting company has been furnishing poor lights at high prices. Population, 10,000. Information is specially solicited by Mayor Burke and Chas. Weile, Chn. Com.; Cy. Engr., Frank F. Flournoy.

STOCKTON, CAL.—The Standard Electric Co. of California, the company organized by Prince A. Poniatowski and his associates for the purpose of conducting electricity from the electrical works of the Blue Lakes Water Co., in Calaveras county, to San Francisco, and for supplying intermediate towns, will apply for a franchise covering the city of Stockton, allowing the company to distribute its power throughout this city.

SALT LAKE CITY, UTAH.—The council is considering the question of making the Utah Power Co. forfeit its franchise, granted Dec. 26, 1896. It is stated that the company has done no work on its proposed plant. Pres., Francis Armstrong.

HULL, QUE.—Bids are asked until Nov. 1 for supplying and maintaining 50 1,600-c. p. arc lights. R. W. Farley, Cy. Engr., writes us that the question of building a municipal plant is at the same time under consideration.

MITCHELL, ONT.—The council is reported as considering the question of extending the city plant, at a cost of about $5,000.

PORT ARTHUR, ONT.—It is stated that this town has made an arrangement with Edward S. Jennison, Arch., 134 Van Buren St., Chicago, Ill., for the supply of 560 HP. and of 500,000,000 gallons of water a year from his power canal at Kakabeka Falls. The contract is to be submitted to the people for their approval at once. Mr. Jennison agrees to have the works completed within three years. Mr. Jennison will attempt to have manufacturing plants established here to utilize the power. Estimated cost, about $1,000,000.

NELSON, B. C.—Judge Walkem, Victoria, B. C., has submitted a decision against the council purchasing the plant of the Victoria Electric Co. for $48,000. Mayor Houston may be addressed.

CHINA.—A. L. Kuehmsted, Treas. and Gen. Mgr. the Charles E. Gregory Co., 47 South Jefferson St., Chicago, Ill., has received an order for an electric light plant for a town in North China. This plant, it is said, will be the first of the kind to be installed in that part of China. It consists of a 1,000-light dynamo, together with a complete equipment. It is considered by parties in the trade that this will be the beginning for quite a business in medium-sized plants from that part of the world.

NEW COMPANIES.—International Incandescent Light Co., Philadelphia, Pa.; $1,000,000, with $100 paid in; W. H. Hollis, W. D. Black, W. W. Lucas, G. H. Taylor.

New York Gas & Electric Light, Heat & Power Co., New York; $25,000,000; Henry J. Honmens, Frank D. Allen, F. Allen, J. F. Yawger, Louis M. King, C. N. Flint, M. W. Smith, New York. Flower & Co., New York, and Samuel A. Beardsley, Utica, N. Y., are said to be behind the company.

Pratt-Ensley Light & Power Co., Pratt City, Ala.; J. M. Landsden, Jr., Roger M. Newbold, J. M. Meigham.

The Myerstown Electric Light & Heating Co., Myerstown, Pa.; $20,000; to furnish light, heat and power; Dr. W. G. Bower, Hattie E. Bower, A. S. Rummel, Robert H. Sechler.

Erie County Electric Co., Erie, Pa.; $10,000, with $1,000 paid in; Treas., Wm. C. Readro, New York; Wm. E. Brown, New York; Wm. S. Carroll, Erie.

Kanawha Electric Co., Montgomery, W. Va., $25,000, with $50 paid in; J. W. Strangham, Dego, W. Va.; W. L. Montgomery, Jacob Segal, Montgomery.

Metropolitan Electric Co., Ottawa, Ont.; Jas. Robinson, Montreal, Que.; A. B. Broderick, T. Lindsay, Ottawa.

Pike's Peak Power Co., Colorado Springs, Colo. and Council Bluffs, Ia.; $100,000; Henry M. Blackmen, T. A. Chapman, D. W. Ross.

Black Canyon Hydraulic & Electric Power Co., Prescott, Ariz.; $5,000,000; Louis C. F. Lotz, H. S. Hildreth, Chas. V. Van Duzer.

Sherman Electric Light Co., Sherman, N. Y.; $5,000; Pres., J. L. Thayer; Secy., T. J. Newell; Treas., C. H. Corbett.

Winn Water & Power Co., Winn, Me.; Pres., Nathaniel M. Jones, Lincoln, Me.; Clk., M. F. Scott, Winn.

Hinsdale Electric Light & Power Co., Lake City, Colo.; $100,000; R. E. Peniston, D. K. Anders, Thos. L. Ashworth.

Union Incandescent Light Co., New York; $8,000; to manufacture incandescent gas lamps, mantles and globes; Leon Pistner, 230 East 50th St., New York.

BRIDGES.

ASHFIELD, MASS.—The following bids were received, Oct. 6, for constructing a bridge. A. B. Fletcher, Secy. Mass. Highway Comn., Boston:

Boston Bridge Works, Boston, Mass	$1,425
King Bridge Co., Cleveland, O	1,430
N. E. Structural Co., Everett, Mass	1,432
Walsh Boiler & Iron Works, Springfield (accepted)	895
Berlin Iron Bridge Co., E. Berlin, Conn	1,460
New Jersey Steel & Iron Co., Trenton, N. J.	1,375
Wrought Iron Bridge Co., Canton, O	1,476
Massillon Bridge Co., Massillon, O	1,503
Pittsburg Bridge Co., Pittsburg, Pa	1,349

BOSTON, MASS.—A contract has been awarded to D. F. O'Connell, at $23,800 for constructing two masonry abutments and a central pier for the bridge over the railway track on the Columbia Road. B. W. Wells, Supt. Sts.

CAMBRIDGE, MASS.—The board of aldermen has authorized an issue of $50,000 of 3½% bridge bonds, according to reports.

MALTA, N. Y.—The city clerk informs us that it has been decided not to construct the proposed bridge at Baker's flats to have a span of 84 × 18 ft., at present.

NORWICH, N. Y.—Bids will soon be asked by the highway commissioner for designs and the construction of a new iron bridge over the Canasawacta Creek at West Main St.

CAMDEN, N. J.—Bids are asked until November 9 for the improvement of the turning of the draw of the Federal Street bridge, over Cooper's Creek, as stated in our advertising columns. Dr. J. B. Davis, Chn. Com., Bd Freeholders.

KNOXVILLE, PA.—Reports state that the Knoxville Land and Improvement Co. propose to construct a steel viaduct, 500 ft. long.

NEWTOWN, PA.—A. Chambers, Newtown, writes us that a contract has been awarded to Thos. H. Connell, Fidelity Bldg., Broad and Arch streets, Philadelphia, for constructing a plate girder bridge of one span, 65 ft. wide, on stone foundation.

WASHINGTON, D. C.—Surveys are being made for the construction of the Massachusetts Ave. and the Connecticut Ave. bridges over Rock Creek.

NEWPORT NEWS, VA.—The King Bridge Co., Cleveland, O., has been awarded a contract by the council at $43,989, for constructing viaducts at 25th and 34th Sts. and Chesapeake & Ohio R. R.

RICHMOND, VA.—An ordinance has been passed by the council to construct a bridge over the alley at the Old Dominion hospital. Benj. T. August, Clk.

WILKESBORO, N. C.—Bids are asked by the county commissioners until Nov. 7 for constructing a bridge at Curtis Ford, Yadkin River; also for a number of smaller bridges.

SPARTANBURG, S. C.—Reports state that the Southern Ry. Co. proposes to construct a new iron bridge at North Church St. C. H. Hudson, Ch. Engr., Washington, D. C.

INVERNESS, FLA.—Bids are asked by the county commissioners for a bridge at Tsala Apopka Lake, according to reports.

SELMA, ALA.—P. Y. Wood, Probate Judge, informs us that a contract has been awarded to the Indiana Bridge Co., Muncie, Ind., for an iron bridge over the Cahaba River, between Beloit and Cahaba.

CINCINNATI, O.—The board of city affairs has decided to construct a viaduct over the railroad tracks at Brighton station, from State Ave. to Barnard St.; estimated cost, $250,000, according to reports.

CHICAGO, ILL.—Bids are asked until Dec. 7 for furnishing the material and for changing the substructure and superstructure of the approach span at Van Buren St. across the by-pass along the Chicago River. James Reddick, Clk. Bd. Sanitary Trustees, 1110 Security Bldg.——The sanitary trustees have decided to ask new bids for the construction of the eight-track railroad bridge at Campbell Ave. over the drainage channel, on account of an injunction between the city and C. L. Strobel, who had formerly been awarded the contract. Bids will be received only on the Scherzer design.

KANKAKEE, ILL.—H. A. Magunder, Mayor, writes us that it is proposed to construct a stone or concrete bridge of six 100-ft. spans, 40 ft. wide, on stone foundation. The matter has just been taken up by the council, and probably the bridge will not be built before next season. W. K. Woodruff, Des. Engr., Kankakee.

PEKIN, ILL.—A contract was awarded, Oct. 8, for an iron bridge across the Mackinaw River, to the Wrought Iron Bridge Co., Canton O., according to report.

PONTIAC, ILL.—G. W. Lacey, Cy. Clk., informs us that the following bids were received Oct. 5 for a steel bridge, 150-ft. span, 18-ft. roadway and 6-ft. sidewalk on stone piers; advertised in Engineering News, Sept. 29:

Joliet Bridge & Iron Co., Joliet, Ill. (accepted)	$4,379
Indianapolis Bridge & Iron Co., Indianapolis, Ind	4,800
B. F. Parks & Co., Cedar Rapids, Ia	4,587
Bellefontaine Bridge & Iron Co., Bellefontaine, O.	4,587
Massillon Bridge Co., Massillon, O	4,477
King Bridge Co., Cleveland, O	4,492
Toledo Bridge Co., Toledo, O	4,740
Lafayette Bridge Co., Lafayette Ind.	4,575
R. D. Wheaton Bridge Co., Chicago, Ill	4,590
L. S. Leversedge & Co., Chicago, Ill.	4,800
I. J. Walker, Chicago, Ill.	4,900

EAU CLAIRE, WIS.—Bids are asked until Oct. 26 for constructing a bridge across the Chippewa River, between Kelsey and Bridge Sts. A description of the bids received Sept. 28, which have been rejected, was given in our issue of Oct. 13. T. P. Cochrane, Cy. Clk.

FORT DODGE, IA.—The Mason City & Fort Dodge R. R. Co. has awarded a contract to Geo. Keppner, at $3,000, for constructing two bridges.

MINNEAPOLIS, MINN.—The question of issuing $80,000 in bonds for the construction of a bridge over the Mississippi River, connecting 32d Ave. and 25th Ave., will be submitted to a vote at the election, Nov. 1.

ST. PAUL, MINN.—The board of aldermen has awarded a contract to Wm. A. Lee, at $8,000, for reconstructing the Forest St. bridge.

TOPEKA, KAN.—The county commissioners are considering a proposition to construct a steel bridge 800 ft. long over the Kansas River, near Valencia, to cost about $14,000. Address Commissioner Williams.

WELLINGTON, KAN.—The county commissioners are considering the question of constructing a new bridge over the Minnescha River, near Belle Plaine, according to reports.

WICHITA, KAN.—Estimates have been submitted to the council by H. H. Hendershot, Asst. Cy. Engr., for a proposed viaduct on Douglas Ave., from Fourth to Washington Ave. Length, 1,500 ft.; width, 34 ft.; 25,000 cu. yds.

of dirt; 8,000 cu. yds. of masonry; if steel is used it will take 550 tons; estimated cost, $95,000; stóne, estimated cost, $60,000.

KANSAS CITY, MO.—Bids are asked until 10.30 a. m., Oct. 20, for grading the approaches to the bridge over Blue River. Thos. F. Callahan, County Surveyor.

ST. CHARLES, MO.—The St. Charles Co. is considering the question of constructing a bridge over the Missouri River. Theo. Bruere, Pres., informs us that no specifications have yet been prepared.

UNIONVILLE, MO.—Bids are asked until Oct. 26 for constructing a number of steel and combination bridges, according to reports. Chas. C. Bailey, Bridge Comr.

POCAHONTAS, ARK.—J. M. Rose, Pres., Pocahontas Bridge Co., informs us that plans have been prepared by M. S. Hasie, Fort Worth, Tex., for a steel railway and highway bridge, 210 and 97-ft. spans, 18 ft. wide, on steel cylinder piers; estimated cost, $35,000.

HOUSTON, TEX.—Bids are asked until Nov. 14 for constructing a 100-ft. steel bridge over Buffalo Bayou, as stated in our advertising columns. Cy. Engr., I. Austin Miller; Mayor, S. H. Brashear.

LOS ANGELES, CAL.—Press reports state that the Southern Pacific R. R. Co. will shortly have in process of construction in different parts of California, 12 steel railway bridges, to cost about $300,000. The company purposes by degrees to substitute steel bridges for crossings of other styles throughout its entire system.

CHATHAM, ONT.—Owen McKay, Ch. Engr., Lake Erie & Detroit River Ry., Walkerville, Ont., writes us that B. Douglas, Bridge Engr., Michigan Central Ry., Detroit, Mich., is now preparing plans for a new steel bridge over the River Thames, for the Erie & Huron Ry. The structure will be 270 ft. long, and consist of two girder spans, 75 inches in length, and a draw span of 120 ft. The plans will be submitted to Owen McKay, Ch. Engr.

TORONTO, ONT.—Chas. H. Rust, Cy. Engr., writes us that no definite action has yet been taken by the council in regard to the proposed bridge across the River Don, on Queen St.; span, 125 × 66 ft.; bow string design, capacity 150 lbs. per sq. ft., on stone and concrete foundation.

BUILDINGS.

FAIR HAVEN, VT.—A fire in this city destroyed Knight's Block, a 3-story building used as an opera house, with stores beneath, causing an estimated loss of $40,000; insurance, $30,000.

CAMBRIDGE, MASS.—Mayor Sortwell has vetoed the ordinance appropriating $8,000 for the construction of the Hobbs Brook reservoir.

AMSTERDAM, N. Y.—Bids are asked until 7:30 p. m., Oct. 22, for hauling, etc., about 5,900 ft. of 36 to 10-in. cast-iron and vitrified pipe. Pres. Comrs., John Kellogg.

BUFFALO, N. Y.—The commissioners of public works have rejected the bids opened Sept. 29 for laying a 20-in. pipe across Buffalo River to afford protection from fire to those on the island. The bid of Hingston & Woods, which was lowest, was $1,675 in excess of the appropriation of $10,000 made by the council. It is believed that the property owners will make a protest in order to secure the work being done this winter if possible.

CHARLOTTE, N. Y.—We are informed that the citizens of this place have asked that another election be held for them to reconsider their vote of last spring on the question of issuing $25,000 in bonds for works, and $10,000 for an electric plant. Bids were asked, until October 15, for furnishing the machinery and for building the plants, as advertised in Engineering News. The plans were prepared by the Stanwix Engineering Co., Rome, N. Y.

GREENPORT (L. I), N. Y.—The village trustees are considering the question of the municipal ownership of the works of the Greenport City Water Co.

JAMAICA (L. I.), N. Y.—The Jamaica Water Supply Co. has issued $400,000 of 5% bonds, $250,000 of which is to be used in retiring outstanding bonds and the remainder is to be used in the building of the proposed extension of the mains to Queens and Hollis, and the installing of new hydrants in that territory. The capital stock of the company is $300,000, divided into 3,000 shares of $100 each. The majority of the stock is held by Boody, McLellan & Co., David A Boody, ex-Mayor of Brooklyn, and the estate of John and John C. Lockwood.

SIDNEY, N. Y.—It is stated that the Sidney Camp Grove Association has decided to build works and a light plant for its grounds.

WEST TROY, N. Y.—The Watervliet water board, it is reported, is considering the question of asking the taxpayers to grant it authority to purchase the works of the West Troy Water Co.

EAST NEWARK, N. J.—Edward Kenney, Mayor, has applied to the street and water board to extend the water mains to this borough, the borough to pay the cost of the mains, etc.

FRENCHTOWN, N. J.—The question of securing a water supply is being considered.

GLOUCESTER, N. J.—The following bids were received Sept. 15, but not opened until Oct. 11, for furnishing a 2,500,000-gallon pumping engine: Robert Wetherill, $10,825; Loretz & Sons, $10,450; Givin, Longacre & Lamborne, $13,217 and $12,587; Barr Pumping Engine Co., $10,000.

JERSEY CITY, N. J.—The National Meter Co., New York, has been awarded the contract for furnishing three meters for the Belleville works, at $8,474.

ORANGE, N. J.—We are informed that nothing definite has yet been done in regard to an increased water supply. Several plans have been suggested, as noted in our issue of last week. Pres. Council, Geo. Letrhidge; Chn. Com., Alderman Cuddy.

SPRING LAKE, N. J.—Bids are asked, until Nov. 1, for furnishing and laying about 20,000 ft. of water-pipe, as stated in our advertising columns. Engrs., Lehlbach Bros., Newark, N. J.; Mayor, E. V. Patterson.

CARBONDALE, PA.—The Crystal Lake Water Co., it is stated, has decided to build a new dam next summer. The dam will be 54 ft. high and 42 ft. thick at the bottom.

ERIE, PA.—The select council has voted against an ordinance introduced by Councilman Emling creating a board of water and light commissioners.

LANCASTER, PA.—Local papers state that Allen Hazen, St. Paul Bldg., New York, and Dr. M. L. Davis will complete a report, plans, etc., for a 10,000,000-gallon filtration plant. Supt., E. H. Frailey.

MEADVILLE, PA.—On account of errors in the legislation for the purchase of the works of the Meadville Water Co. another election will be held Nov. 8 to vote on the question of appropriating $153,000 for the purchase.

MILLERSBURG, PA.—The Swartara Water Co. has been incorporated, with a capital stock of $500, of which $50 is paid in; Treas., E. H. Leffler, Millersburg; incorporators, N. C. Freck, R. E. Woodside and H. L. Lark, Millersburg.

PHILADELPHIA, PA.—An application is pending for a charter for a corporation to be known as the Philadelphia Water Co., the object of which, is is stated, is to supply the city with pure water. The incorporators named in the application for a charter are: J. W. Marshall, William J. Moore, John D. Hughes, Thomas A. Berry and John S. Thackeray, of Chestnut St., and their solicitor is H. W. Clark.

MILTON, DEL.—Alderman S. B. Chandler writes us that this town has no works, except a pump. There is a good water supply at the head of navigation at the mill pond. It is probable that in the near future works, an electric light plant, etc., will be built. Population, 1,400.

WILMINGTON, DEL.—The water commissioners have been asked to extend the water mains to Edgemoor.

BALTIMORE, MD.—Bids are asked until Oct. 26 for furnishing about 150 tons of Omaha pig lead. Ch. Engr., Water Bd., Wm. L. Kenly.——The Tuxedo Park Protective Association has granted a 25-year franchise to the Tuxedo & Embla Parks Water & Light Co.

HARPER'S FERRY, W. VA.—Mrs. H. R. Miles, Pres. Village Improvement Society, 1610 Q St., N. W., Washington, D. C., writes us that an engineer (probably W. A. McFarland, Washington) had been engaged by the society to submit estimates for works, to cost about $35,000. The water supply could be secured from the Potomac River on the north or the Shenandoah River on the south side of the town. The matter of issuing bonds will be agitated. It will probably be some time before the question is submitted to a vote of the people.

HINTON, W. VA.—The Hinton Water-Works Co. wants estimates for a 1,000,000-gallon filter, according to reports.

LOGAN, W. VA.—Chas. Bennett and Mr. Campbell are interested in the proposed works for this place.

CAMDEN, S. C.—The council is reported as again having taken up the question of building works, and that contracts will be let this winter.

CHARLESTON, S. C.—The ways and means committee has submitted another plan for obtaining an increased water supply for municipal works.

ORANGEBURG, S. C.—F. Demas, Clk., writes us that the city will issue $40,000 of 5% bonds for the proposed works and electric plant. No definite plans have been decided upon. The water supply will be secured from artesian wells. Population, 5,000. Up to Oct. 12 no engineer had been engaged. T. M. Rayser and T. C. Doyle are on the committee.

ATLANTA, GA.—This city voted Oct. 5 against issuing $200,000 in bonds for extending the water mains. Mayor, Chas. A. Collier.

FITZGERALD, GA.—The contract for building works and a light plant has been let to Moore & McRae, Atlanta, Ga.

GREENSBORO, GA.—Capt. A. W. Walton and L. J. Wagner, Rome, Ga., are reported to have been awarded the contract for building the works, noted in our issue of Sept. 22. Mayor, J. B. Williams.

CRYSTAL SPRINGS, MISS.—Bids are reported as wanted for the purchase of $16,000 of bonds for constructing the proposed works and electric plant. Engr., W. G. Kirkpatrick, Jackson, Miss. Chn. Com., W. C. Wilkinson.

TULLAHOMA, TENN.—The question of building works is again being considered. Mayor, H. Henley.

RUSSELLVILLE, KY.—B. B. Andrews, Mayor, writes us that the city has contemplated building water-works, but on account of a bonded indebtedness, no action will be taken at present. Mayor Andrews is very desirous of having works in this place. Population, 3,500.

STURGIS, KY.—The council is reported as planning to build the proposed works.

ALLIANCE, O.—At the election Nov. 8 this city will vote on the question of purchasing the works of the Alliance Water-Works Co. Councilman Conger, Chn. Com.

COLUMBUS, O.—The board of public works has rejected the bids received, October 3, for constructing the new water-works dam, on account of their being too high. Local papers state that city will do the work itself. The itemized bids are given in another column.

MARIETTA, O.—Bids are asked until Oct. 31 for furnishing and installing a 3,000,000-gallon pumping engine. Supt., J. B. West; Pres. Trustees, J. H. McConnell.

NEW RICHMOND, O.—Bids are asked until Nov. 10 for the purchase of $30,000 of bonds for the proposed works and electric plant. A filtration plant will be put in. The water supply will be secured from the Ohio River. Engr., E. F. Layman, 32 East 3d St., Cincinnati; Cy. Clk., C. R. Day.

URBANA, O.—The council has appropriated $300 for plans for the proposed municipal works. Population (1890), 7,000. Councilmen Hitt and Brennan may be addressed. Bids for building the works will probably be asked soon.

WELLSVILLE, O.—The council has decided not to submit the question of issuing bonds for extending the water mains at the election Nov 8, according to reports.

CICERO, IND.—The Home Gas & Water Co. has been incorporated, with a capital stock of $15,000, by Wm. Winkel and Wm. H. Roney.

FORT WAYNE, IND.—Bids are asked until Oct. 20 for furnishing and installing a 6,000,000-gallon high duty pumping engine, according to reports. Chn. Trustees, Wm. Tagtmeyer.

NEW ALBANY, IND.—The Home Crystal Water Co. has awarded the contract for two 150-HP. boilers to M. Zier & Co., at $6,600. Other contracts are soon to be let. Engr., Frank Shefold.

WORTHINGTON, IND.—C. A. Geckler, Clk., writes us that a franchise for works and a light plant has been granted to C. S. Knight, of the Fort Wayne Electric Corporation, Fort Wayne, Ind. The city will use 41 hydrants and 34 lights, to be put in at a cost of $39,000. The city has the option of purchasing the plants within 30 days after completion.

BAY CITY, MICH.—The water board is making estimates for extensions to the water mains for next year. The board laid two miles of mains this year.

GRAND RAPIDS, MICH.—The committee has been authorized to engage a mechanical engineer to recommend the best method for increasing the capacity of the pumping station.

JONESVILLE, MICH.—This place voted Oct. 10 to issue $28,000 in bonds for works and an electric plant.

DETROIT, MICH.—It is proposed to put in a new system of intake pipes, at a cost of from $40,000 to $120,000. Supt., Marshall H. Godfrey; Engr., C. W. Hubbell.

ALTON, ILL.—The committee has recommended that the council negotiate for the purchase of the works of the New England Water-Works Co. and that the question be submitted to a vote of the citizens.

CHICAGO, ILL.—Bids are asked, until October 28, for laying water-mains in a number of streets. L. E. McGann, Comr. Bd. Local Improvements.

MILLEDGEVILLE, ILL.—The council has rejected the bids received Oct. 7 for furnishing about 10,500 ft. of 4, 6 and 8-in. cast-iron water pipe, etc., according to reports. Pres., J. F. Greenawalt.

WHITEHALL, ILL.—This place voted, Oct. 10, to issue $8,500 in bonds for the proposed works.

PERSIA, IA.—Reports state that this place has voted to issue $3,000 in bonds for works. Recdr., L. D. Tupper.

BERESFORD, S. DAK.—The following bids have been received by Aug. Frieberg, Mayor, for furnishing the tank for the proposed works, to cost about $12,000: Jackson & Moss, Des Moines, Ia., $6,485 and $6,823; W. W. Allen & Co., Hawarden, Ia., $5,928 and $6,428.

DEADWOOD, S. DAK.—Bids are asked until Oct. 24 for furnishing 4,000 ft. of 4 and 10-in. cast-iron water pipe, special castings, etc. Bids were opened Oct. 17 for building a 200,000-gallon tank, excavating, etc., for the works. Chn. Com., D. A. McPherson.

BOZEMAN, MONT.—This city has voted for the third time in favor of issuing $165,000 of 5% 20-year bonds for the purchase of the works of the Bozeman Water-Works Co. The mains will probably be extended about a mile. Cy. Clk., Geo. D. Pease.

TOPEKA, KAN.—It has been decided to hold the election Nov. 12 to vote on the question of purchasing the works or building a new plant instead of Nov. 5. Mayor Fellows may be addressed.

CARTHAGE, MO.—The Carthage Water Co. has been incorporated, with a capital stock of $125,000, by H. H. Harding, E. B. Jacobs and Howard Gray.

INDEPENDENCE, MO.—An election will be held Nov. 1 to vote on the question of issuing $75,000 in bonds for extending the works and the sewerage system.

WYNNE, ARK.—Bids are asked until Nov. 8 for furnishing the materials and for building the proposed works and electric light plant, to cost about $15,000. (Postponement from Oct. 15.) Engr., Owen Ford, 710 Security Bldg., St. Louis, Mo.; Chn. Com., Wm. M. Kennedy.

WACO, TEX.—Press reports state that the Bell Water Co. will probably rebuild at once the stand-pipe which is said to have burst Oct. 6. There were two iron standpipes, one of 188,000 gallons, 20 × 80 ft., and the other of 206,000, 20 × 88 ft. Pres., J. D. Bell.

CRIPPLE CREEK, COLO.—Two plans are being considered for a better water supply. One plan proposed is to turn the waters of Oil Creek through the saddle between Carbonate and Tenderfoot hills and thence into Cripple Creek. If this can be accomplished the city can get a supply of 400,000 gallons a day. Another plan is to buy the works of the Michigan Pipe Co., Bay City, Mich., the owner of the works on Beaver Creek. The reservoir has a storage capacity of 78,000,000 and a daily flow of 1,600,000 gallons. J. Stanley Jones may be addressed.

FLORENCE, COLO.—P. T. McGuire, Mayor, writes us that the proposed works will furnish water by gravity, the water supply being secured from the mountains. There will be required 10½ miles of supply main, four miles of laterals, 40 hydrants, a stand-pipe, 30 × 50 ft., etc.; estimated cost, $135,000. Bids will probably be wanted in about 25 days. Engr., Hiram Phillips, Oriel Bldg., St. Louis.

GREELEY, COLO.—The council is reported as considering plans for increasing the water supply. Population (1890), 2,400.

LAKE CITY, COLO.—This place is reported to have voted to change its water supply from Lake Fork Branch to Wade's Gulch, so that the former stream may be used by the mills.

PALMER LAKE, COLO.—The question of a better water supply is being considered, according to reports. P. O., Palmer.

BREMERTON, WASH.—Bids are asked until Oct. 22 for extending the mains at the Puget Sound naval station, Bremerton. Appropriation, $4,007. M. T. Endicott, Ch. Bureau Yards and Docks, U. S. Navy, Washington, D. C.

SEATTLE, WASH.—Bids are asked until Nov. 15 for constructing certain additions to the water-works, as described in our advertising columns. The plans and specifications may be seen at the office of the Engineering News Publishing Co., Monadnock Block, Chicago, and 220 Broadway, New York. Secy. Bd. Pub. Wks., Frank Oleson.

HEMET, CAL.—W. B. Rider, Redlands, Cal., is reported as making surveys for the proposed filtration plant for the Lake Hemet Water Co.

OAKLAND, CAL.—The Investors & Promoters Co. has secured permission to build works for the Alvarado district. Orestes Pierce and Wm. Pierce Johnson are interested.

PASADENA, CAL.—Bids are asked until Oct. 25 for deepening the city well, etc. Cy. Clk., Herman Dyer.——It is stated that J. B. Lippincott has been engaged to prepare plans and estimates of cost for works. Bonds will be issued for the purposes.

PORTERSVILLE, CAL.—The Portersville Water Development & Improvement Co. has been incorporated, with a capital stock of $10,600, all of which has been subscribed. It is said that all contracts have been let. G. T. Frost, W. C. Brumfield and W. W. Henry are interested.

REDLANDS, CAL.—Press reports state that the trustees have taken the first steps for the municipal works. Later on a proposition will be made to issue bonds from $8,000 to $15,000 for the purpose of making investigations as to the sources, etc., of a water supply, and the cost. W. P. McIntosh has made a proposition to sell to the city the Mentone Tunnel, 1,300 ft. long, in the bed of Mill Creek Canyon, in which there has been developed 75 ins. of water, and an excavation partly made for a submerged dam, for $125,000.

SAN MATEO, CAL.—This city will vote Oct. 22 on the question of issuing $80,000 in bonds for works. Engr., C. E. Moore, Santa Clara, Cal.

SAN PEDRO, CAL.—The trustees will probably soon submit to the voters the question of issuing about $50,000 in bonds for new works.

SALT LAKE CITY, UTAH.—The city engineer has been directed to investigate the sources for an additional water supply. The council has appropriated $2,500 to pay for surveys, etc. Councilmen Robertson, Callister and Morris may be addressed.

SANDY, UTAH.—The Sandy Pipe Line Co. has been incorporated to build works and an irrigation plant in this place; capital stock, $5,000. C. C. Craps, A. G. Robertson and Wells Clark are interested.

VERDUN, QUE.—Matthew Dineen, Montreal, Que., has been awarded the contract for laying 2,750 ft. of 10-in. main for the works. The Three Rivers Iron Works Co., Montreal, has been awarded the contract to furnish the cast-iron water pipe and special castings. Work on the plant will begin Oct. 10. Plans and specifications for the complete works are not yet ready. Engrs., McConnell & Marion, New York Life Bldg., Montreal.

BARRIE, ONT.—Two of the three arbitrators engaged to make a valuation of the works of the Barrie Water-Works Co. in order that the city might purchase the plant have estimated the works to be worth $70,684 with interest. A report states that the Council has passed a by-law to be submitted on Nov. 14, asking authority to issue bonds to raise $100,000 to be used in purchasing the water-works, paying the expenses of the arbitration, and extension of the system to other parts of the town.

TORONTO, ONT.—Bids are asked until Oct. 26 for filling the old filter basin on the island. Mayor and Chn. Bd. Control, John Shaw.

YMIR, B. C.—The Ymir Water-Works Co. has been incorporated to build works to cost about $2,500.

IRRIGATION.

GREAT FALLS, MONT.—Reports state that the Conrad Investment Co. awarded a contract to Daniel McGovern for 3½ miles of irrigating canal, near Dupuyer.——The commissioner of Indian affairs has been authorized to spend $34,000 for improving the irrigation system on the Fort Belknap reservation, according to reports.

SHIELDS, MONT.—It is reported that Henry Shadean, Shields, has filed with the county clerk a notice of location, claiming 160 inches of the waters of Crazy Creek, to be used for irrigating purposes.

BEAUMONT, TEX.—The Beaumont Irrigation Co., Beaumont, has awarded a contract to Andrews & Son, New Orleans, La., for constructing a 12-mile twin levee irrigating canal in this county. The contract was previously let to E. A. Hayne. A. F. Goodhue, Pres., and W. S. Davidson, Secy. and Treas., Beaumont.

KIONA, WASH.—Frank Dudley, Niagara Falls, N. Y., has purchased the Kiona ditch and will award a contract for repairing and enlarging it, according to reports.

LOS ANGELES, CAL.—The Santa Ana Valley Irrigation Co. held a meeting, Oct. 4, to consider the question of improving the irrigation system, according to reports.

SANTA ANA, CAL.—It is intended to raise $15,000 to be expended in the cementing and extension of ditches throughout this district. Address M. Nisson, Santa Ana.

CHEYENNE, WYO.—The Wyoming Development Co. proposes to build a storage reservoir on the Laramie plains, and is arranging to commence work at once to store the waters of the Laramie River during the next flood season. The reservoir will be built near the McGill ranch, 20 miles east of Rock Creek. The dam will be 30 ft. high, and the reservoir will cover 5,060 acres and contain 80,000 acre-ft. of water; estimated cost, $65,000, according to reports.

NEW COMPANIES.—Western Ditch & Land Co., Denver, Colo.; $35,000; James H. Crandall, John B. Andrews, W. G. Brown, Denver.

North Side Irrigation Ditch Co., Craig, Colo.; $25,000; Charles A. Seymour, J. Lee Tower, George D. Woolley, Alexander S. Robinson and A. M. Raney, Craig.

New Deal Water Co., Los Angeles, Cal.; $100,000; to acquire wells, pipe lines, flume, ditches, etc., in Los Angeles county; W. T. Michael, J. E. Marsh, D. C. Tegue, William Ferry, H. O. Mace.

Lompoc Valley Water Co., Lompoc, Cal.; $100,000, with $80,400 paid in; to deal in water, construct canals, dams, etc.; E. E. Hall, H. S. Hall, A. G. S. Hall, H. Poland and C. A. Stilson.

Portersville Water Development & Improvement Co., Portersville, Cal.; $10,600; to do a general aqueduct and irrigation business; G. T. Frost, W. C. Brumfield, W. W. Henry, James Wilson, H. F. Brey.

SEWERAGE.

HAVERHILL, MASS.—The aldermen are considering plans for a trunk sewer or sewage disposal beds for the new Hale hospital buildings. Wm. W. Roberts writes that no action has yet been taken.

INDIAN ORCHARD, MASS.—R. D. Maynard, of Springfield, Mass., has been awarded the contract for building a sewer in this place, at $2,397.

BROOKLINE, MASS.—T. F. Crimmings and C. E. Trumbull & Co. have been awarded the contract for building sections 1 and 2 of the 26 × 39-in. brick sewer to connect with the Metropolitan sewer, at $2,960 and $8,081, respectively.

LAWRENCE, MASS.—R. J. Shea, Cy. Audr., writes us that a loan of $75,000 has been authorized for sewers. The sewers are being constructed under the direction of the superintendent of streets. Cy. Engr., Arthur D. Marble.

WEBSTER, MASS.—It is probable that the system will be extended next year at a cost of about $20,000.

BUFFALO, N. Y.—Bids are asked until Oct. 26 for constructing a 3½ and 2¼-ft. brick sewer in Bryant St. Secy. Bd. Pub. Wks., R. G. Parsons.——The committee has recommended the construction of the Emslie and Van Rensselaer St. sewer at a cost of $90,000. The ordinance recently passed by the council was vetoed by the Mayor.

LANSINGBURG, N. Y.—Chas. A. Roemer, Village Engr., writes us that the village is awaiting a reply from the state board of health in regard to a trunk sewer, which it is proposed to build to drain the low lands in the Fourth Ward.

OWEGO, N. Y.—Surveys are being made for an extension to the system.

SYRACUSE, N. Y.—It is proposed to build a trunk sewer in the First Ward at a cost of about $60,000. Bids will probably soon be asked. Alderman Costello may be addressed.

UTICA, N. Y.—The council is again considering the question of a new sewer in Neilson and Mills Sts. The sewer was first recommended by Rudolph Hering, 100 William St., New York. Alderman Luker may be addressed.

ALLENHURST, N. J.—The question of purchasing the plants of the Coast Water & Sewer Co. will be voted upon Nov. 4.

GLOUCESTER, N. J.—The council has voted to build a sewer in Ridgeway St.

HOBOKEN, N. J.—Bids are asked until Oct. 26 for cleaning and repairing the Newark St. sewer. Cy. Clk., M. V. McDermott.

SOUTH ORANGE, N. J.—It is stated that Robert S. Sinclair, Chn. Joint Sewerage Com., having in charge the proposed sewer for West Orange, South Orange, Vailsburg, Irvington and Millburn, reported, Oct. 17, that the engineer had submitted a plan to the committee for a joint outlet sewer from a point about two miles south of Irvington, emptying into Staten Island Sound, where it would have an outlet into 20 ft. of water, with a rapid tidal flow. This was so far removed from existing water rights as to be unlikely to be affected by any action of the Passaic Valley Commission. The estimated cost of the outlet is $110,000, exclusive of the rights of way, which it is thought will not prove excessive.

SPRING LAKE, N. J.—Bids are asked until Nov. 1 for constructing about 4,600 ft. of pipe sewers and ocean outlet for the same, as stated in our advertising columns. Bids were opened Oct. 15 for the purchase of $70,000 of 30-year 5% sewer and water bonds. Engrs., Lehlbach Bros., 770 Broad St., Newark, N. J.; Mayor, E. V. Patterson.

STOCKTON, N. J.—B. F. Sweeten & Son, Camden, N. J., have been awarded the contract for building a sewer in Federal St.

NEW HAVEN, PA.—The council has decided to spend $6,500 for sewers, etc. Burgess. J. B. Maloney.

WARREN, PA.—Four citizens have subscribed $4,000 towards the state hospital sewage disposal plant. This amount, together with the state appropriation of $10,000, will probably be sufficient to commence the building of the plant at once.

WASHINGTON, D. C.—Capt. Lansing H. Beach, U. S. Engr. and Engr. Comr. for the District of Columbia, writes us as follows in regard to the improvements to the system: Several years ago plans were prepared by a board of experts for a system of sewage disposal for Washington. providing for the construction of intercepting sewers and the collection of all sewage at the foot of New Jersey Ave., from which point it was to be pumped across the Anacostia River and flowed by gravity to such a point down the Potomac River that there would be no danger of its being carried back to the city by the inflowing tide. About $500,000 worth of work has been done upon the intercepting sewers to date; the entire system is estimated to cost about $4,000,000. The appropriations made by congress during its last session provided for the construction of some more of the interceptors and the preparation of plans for the sewage pumping station. This work is now in progress.

NORFOLK, VA.—Jas. L. Winston writes us that another election will be held Nov. 8 to vote on the question of building sewers in the Brambleton Ward, at a cost of about $105,000.

WINSTON, N. C.—It is stated that certain northern parties interested in the proposed manufacturing plants to be built here, will take steps for the construction of a system and water-works.

NEW ORLEANS, LA.—The New Orleans Sewer Co. has submitted a proposition to the council for the construction of a system. The company offers to furnish a bond for $50,000. Work on the system will begin within six months after signing the contract. Councilman Clark has introduced an ordinance instructing the city engineer to prepare plans and specifications for the sewering of New Orleans, and submit the same to the council with the object of adjudicating a franchise for the sewering of the city in accordance with the terms of the charter, which provides that all franchises shall be sold to the highest bidder. Mr. Dreyfous has introduced an ordinance inviting all persons desiring to compete for the erection and operation of a sewerage system, to present their plans and propositions within 30 days, all further negotiations with the old sewerage company in the meantime to be broken off. Secy. New Orleans Sewerage Co., Samuel Henderson, Jr.

CHATTANOOGA, TENN.—The question of improving the Washington St. sewer at a cost of about $10,000 is being considered.

MEMPHIS, TENN.—Bids are asked until 12 noon, Oct. 21, for furnishing the materials and for building 5,800 ft. of 4-ft. brick sewer, etc., from the city limits to the Wolf River; check, $500. Mayor, J. J. Williams.

EAST CLEVELAND, O.—The following bids were received, Oct. 10, for constructing sewers in a number of streets, and also for a sewage disposal plant; all bidders of Cleveland when otherwise not stated: Sewage disposal plant; Herbert Tate, New York, $21,787; D. A. Tompkins Co., Charlotte, N. C., $20,670. Sewers: Cleveland Contracting Co., $11,515, $9,609 for section Nos. 3 and 4, respectively; R. J. Clements, $14,309, $14,204; R. H. Gray, $13,134, $11,222; Wm. McDowell, $15,169, $11,984; The Northern Ohio Paving & Construction Co., $15,999, $13,197; Ford P. Beers, $14,178, $11,423; R. P. Burnett, $23,183, $17,884; Clements Bros. Construction Co., informal, $13,188. Engrs., The Walter P. Rice Engineering Co., Society for Savings Bldg., Cleveland; Clk., N. A. Chapman.

ST. BERNARD, O.—Jos. Schwegman, Mayor, writes us that the council has done nothing definite towards the construction of a system.

BEARDSTOWN, ILL.—The question of improving the system and of paving certain streets is being considered.

CHICAGO, ILL.—Bids are asked until Oct. 28 for constructing pipe sewers in a number of streets. L. E. McGann, Comr. Bd. Pub. Wks.

FARIBAULT, MINN.—O'Neil & Son, Faribault, have been awarded the contract for building a sewer in the east side, at a cost of $10,000.

SIOUX FALLS, S. DAK.—The South Side Sewerage Co. has been incorporated with a capital stock of $12,000 by Park Davis, Adrian L. Peck and C. O. Bailey.

TOPEKA, KAN.—The question of building a sewer in North Topeka will soon be considered again by the council.

CARROLLTON, MO.—Wm. Riblett, Cy. Clk., writes us that an election will be held Oct. 25 to vote on the question of issuing $50,000 in bonds for constructing a system and for paving. Alex. Trotter, Thos. B. Goodson and Herman David are on the committee.

INDEPENDENCE, MO.—An election will be held Nov. 1 to vote on the question of issuing $75,000 in bonds for extending the system and water-works.

KANSAS CITY, MO.—Mike Walsh has been awarded the contract, at $38,598, for building the Vine St. sewer.

MACON, MO.—F. W. Blees has offered to donate $5,000 to aid in the construction of the proposed system, to cost about $25,000.

MADISON, MO.—The question of issuing $50,000 in bonds for a system is being considered by the village board, according to reports.

ST. JOSEPH, MO.—It is proposed to construct 15 and 12-in. pipe sewers in two streets. Cy. Clk., C. S. Shepherd; Mayor, P. J. Kirchner.

SHERMAN, TEX.—A. A. Fielder, Mayor, and Geo. E. Hardwicke are in Philadelphia, Pa., to confer with Geo. W. Ruch, in regard to building the proposed system, to cost about $200,000.

GRAND JUNCTION, COLO.—The question of constructing a system is being considered.

PALO ALTO, CAL.—This place will vote about Oct. 22 on the question of issuing $40,000 in bonds for a system. Engr., C. E. Moore, Santa Clara, Cal.

VERDUN, QUE.—Plans and specifications for the proposed system and water-works are not yet ready, but work on certain pipe laying has already been begun. Engrs., McConnell & Marion, New York Life Bldg., Montreal, Que.

GARBAGE DISPOSAL—STREET CLEANING

NEWTON, MASS.—The question of building a garbage disposal plant is being considered. It is proposed to ask Watertown and Waltham to join in the construction and the use of it.

BRIDGEPORT, CONN.—The board of health is securing information about garbage disposal plants; estimated cost, $12,000.

BUFFALO, N. Y.—Henry P. Burgard, Prudential Bldg., Buffalo, who was recently awarded the contract for cleaning District No. 12, under the 5-year contract, will soon begin work. It is said that he has not yet purchased the necessary cleaning and sweeping machines.

NEW ROCHELLE, N. Y.—It is reported that Frederick Lorenzen has recommended the construction of a plant.

ATLANTIC CITY, N. J.—M. V. Smith, Philadelphia, has been awarded the contract for constructing a garbage crematory, at $27,500, this bid being lower than Thos. Dalzell's, at $29,900.

NORRISTOWN, PA.—L. Lemish, Philadelphia, has submitted a proposition to the board of health to remove and dispose of the garbage of the city.

READING, PA.—The General American Reduction Co., Philadelphia, has been awarded the contract, at $3,250, for reconstructing the crematory, according to reports.

ATLANTA, GA.—The question of hauling the city garbage to the dumps by the cars of the Collins Park & Belt St. Ry. Co. is being considered by the city officials. The city pays $60,000 a year for collecting and hauling the garbage, and it is thought that this plan will save the city about $16,000 a year. The mayor is in favor of a new crematory.

NEW ORLEANS, LA.—Councilmen Clark and Dreyfous have introduced an ordinance authorizing the council to ask for bids for the construction of two garbage plants, one in the upper and the other in the lower section of the city.

LOUISVILLE, KY.—The aldermen and the board of health are considering the question of the city's purchasing a plant.

MANSFIELD, O.—The council is again considering the question of better methods for the disposal of the garbage.

MILWAUKEE, WIS.—Local papers state that the plans for the garbage crematory to be erected on Jones' Island were submitted to the board of public works Oct. 7. The building will be 140 × 44 ft., on foundation walls, and two stories high, constructed of brick with a slate roof. There will also be a coal shed, 156 × 28 ft., 1-story high, also of brick with a slate roof. The plant will be built by the Engel Cremation & Sanitary Co., as noted last week.

GAINESVILLE, TEX.—Press reports state that the council will rebuild the garbage crematory, destroyed by fire Oct. 5.

HOT SPRINGS, S. DAK.—The City Garbage Co. has been incorporated, with a capital stock of $12,000, by Alex. McDonald, of Omaha, Neb., and Chas. L. Fargo, of Hot Springs.

MITCHELL, S. DAK.—The council has authorized Councilman Edwards and the board of health to investigate the subject of a garbage crematory.

OAKLAND, CAL.—J. W. Northup has applied for a 50-year franchise to collect and cremate garbage. Mr. Northup, it is stated, represents the company recently granted a like franchise in San Francisco.

SAN FRANCISCO, CAL.—Bids were asked until Oct. 17 for collecting and removing the garbage and refuse for a period of two years from Jan. 1, 1899; bond, $12,500. Clk. Bd. Supervisors, Jno. A. Russell.——Local papers state as follows: A communication was received Oct 7 by the supervisors from the Merchants' Association, asking that action be postponed on the garbage collection contract until Oct. 24, for the reason that the specifications for the proposed work do not appear to be satisfactory. The association stated that it is collecting data from other cities.

STREETS AND ROADS.

QUINCY, MASS.—C. F. Knowlton, Comr. Pub. Wks., informs us that the sidewalks mentioned in our last issue have been constructed.

ROCHESTER, MASS.—Bids are asked until Oct. 24 for constructing a highway about seven-eighths of a mile long. J. Dwelley, County Comr., Plymouth, Mass.

SUDBURY, MASS.—Bids are asked until 12 m., Oct. 20, for building about 3,000 lin. ft. of highway. T. C. Mendenhall, Chn. Mass. Highway Comn., Boston.

FERRYVILLE, CONN.—Bids are asked until 2 p. m., Oct. 21, for grading a section of the Flag Hollow Hill Road. Henry E. Hinman, First Selectman, Plymouth, Conn.

THOMASTON, CONN.—Bids are asked until Oct. 22 for grading on North Main St. Aaron Thomas, First Selectman.

WOODBURY, CONN.—Bids are asked until Oct. 24 for grading and graveling on Main St. Chas. S. Curtiss, First Selectman.

ALBANY, N. Y.—Horace Andrews, Cy. Engr., is preparing plans for paving on Elizabeth, Hamilton, Rose and Dove Sts., to be constructed in 1899.

COHOES, N. Y.—Bids are asked by the public improvement commission until Nov. 9, for grading and paving of South Saratoga St.

NEW LEBANON, N. Y.—Bids are asked until 12 m., Oct. 20, for improving the road from New Lebanon to Pittsfield, Mass. C. W. Adams, State Engr., Albany.

OLEAN, N. Y.—Bids are asked until October 29 for constructing a brick pavement on concrete foundation, on South St., about 1,200 sq. yds., as stated in our advertising columns. F. L. Bartlett, Chn. Pub. Wks.; E. E. Allen, Supt. Sts.

PATCHOGUE, (L. I.), N. Y.—Jas. T. Losee, Village Clk., informs us that no steps have been taken for new sidewalks on Main St. and Ocean Ave.

SALAMANCA, N. Y.—The council has awarded a contract to Shean & McGann, Dunkirk, N. Y., at $15,000, for about 9,755 sq. yds. of brick paving.

SYRACUSE, N. Y.—The following bids were received, Oct. 10, for paving North Salina St., from James to Fulton St., and Fulton St., from Salina St. to Belden Ave. Empire Contracting Co., Alcatraz asphalt, $29,260.80; Warren-Scharf asphalt, $29,260.80; Warren-Scharf Asphalt Paving Co., Trinidad asphalt, $29,227.60; Columbia Construction Co. (accepted), Trinidad asphalt, $29,014.70; Asphaltina Construction Co., asphaltina, $29,036.50.

UTICA, N. Y.—Bids are asked until Nov. 1 for the purchase of $8,000 of 6% road bonds, according to reports. W. E. Richards, County Treas.

FORT HANCOCK, N. J.—Bids are asked until Nov. 3 for grading, constructing roads, walks, etc: Capt. G. G. Bailey, Q. M., Army Bldg., Whitehall St., New York.

PITTSBURG, PA.—Bids are asked until Nov. 3 for improving certain highways. F. W. Patterson, County Engr.; W. E. Thompson, County Controller.

SHIPPENSBURG, PA.—Reports state that the council is considering the question of issuing $10,000 in bonds for street improvements.

WASHINGTON, D. C.—Bids are asked until 12 m., Oct. 22, for grading Michigan Ave. J. B. Wight, Chn. Comrs.

NORFOLK, VA.—W. T. Brooke, Cy. Engr., has estimated the proposed paving on Brambleton Ave., 19,000 sq. yds., with Belgian block, at $32,300, with brick, $36,100; Park Ave., 13,600 sq. yds., with Belgian block, at $23,120, with brick, at $25,840. Messrs. Ferrebee, Gale and Sterling, Bd. of Local Improvements, have been appointed a committee to consider the question of issuing $20,000 in bonds for the work.

PETERSBURG, VA.—N. T. Patterson, Pres. Com. Council, informs us that the question of paving is being considered by the street committee which will probably report at the meeting of the council Nov. 1. It has not yet been decided whether Sycamore St. will be paved with brick or asphalt.

MONROE, LA.—The street committee has been authorized to contract with the Talbot Paving Co., Detroit, Mich., for the paving of Desiard St., from the river to Sixth St., according to reports.

NEW ORLEANS, LA.—Bids are asked by the Orleans & Jefferson Ry. Co., Ltd., until Oct. 28, for grading on Napoleon Ave., and for grading and paving the Metairie Road. Robt. R. Zell, Engr., 708 Union St.

LOUISVILLE, KY.—Bids are asked until 12 m., Oct. 24, for grading, curbing and brick paving on portions of 12 streets. Chas. F. Grainger, Chn. Bd. Pub. Wks.

AKRON, O.—The council has awarded a contract to P. T. McCourt & Co., for brick paving on Bittman St., from Maple to Crosby St.

CAMBRIDGE, O.—Bids are asked until Oct. 24 for the purchase of $24,000 of 4½% street paving bonds, according to report. T. R. Deselin, Cy. Clk.

CINCINNATI, O.—The following bids have been received by the board of city affairs for improving Delta Ave.: William Fogarty, (accepted), $23,822; A. J. Strauss, $24,678; Queen City Construction Co., $24,892; J. M. Quill, $25,399.60; J. W. Sullivan, $25,664; A. J. Henkel & Bro., $25,727; Vansandt & Medes, $26,800; T. Evans, $24,607; McCaren & Dawson, $26,943; D. Foltz Asphalt Co., $26,247; T. Folz, $25,008; N. J. Williams, $26,067; J. A. Ebersole, $26,267.

DAYTON, O.—Bids are asked until 12 m., Oct. 21, for grading, graveling and paving in five alleys. J. L. Baker, Pres. Bd. Cy. Affairs.

FINDLAY, O.—Bids are asked until Oct. 27 for grading, draining, macadamizing, etc., on East Hardin St., from Main to East St. A. W. Ray, Clk.

RICHWOOD, O.—Bids are asked until Oct. 24 for the purchase of $6,000 of 6% sidewalk bonds, according to report. S. D. Evans, Village Clk.

SALEM, O.—Bids are asked until Oct. 25 for the purchase of $5,047 in paving bonds, according to report. Geo. Holmes, Cy. Clk.

TOLEDO, O.—It is stated that the viewers have reported favorably on the proposed stone road, about 18 miles long, to connect Maumee, Waterville and Whitehouse, at a cost of about $80,000. The question will soon come before the county commissioners.

WARREN, O.—Bids are asked until Oct. 28 for furnishing the material and constructing 1,400 lin. ft. of curbing and drain tile, 800 cu. yds. of excavation and 2,400 sq. yds. of macadam. A. E. Andrews, Cy. Clk.

GREENCASTLE, IND.—Reports state that a contract has been awarded to O'Brien & Co., Cloverdale, Ind., at $11,500, for macadamizing in Warren township.

INDIANAPOLIS, IND.—Bids are asked until Oct. 24 for asphalt paving, etc., on 14th St., and brick paving on Geisendorf St. M. A. Downing, Chn. Bd. Pub. Wks.

GRAND RAPIDS, MICH.—Geo. W. Ames, Cy. Engr., informs us that nothing has been done toward the repaving of Canal St, besides securing estimates.

CARTHAGE, ILL.—N. P. Berry, Mayor, informs us that about three-fourths of a mile, 40 ft. wide, will be paved with brick, early next summer.

CHICAGO, ILL.—Bids are asked until October 28 for constructing cement sidewalks on about 20 streets. L. E. McGann, Pres. Bd. Local Improvements.

DECORAH, IA.—E. Mather writes us that the council has decided to pave about 1,000 lin. ft. There will be nothing done this season. T. F. Acechmoody, Cy. Clk.

ST. PAUL, MINN.—The county commissioners awarded a contract, Oct. 10, to John W. Fleetham, at $16,985, for macadamizing about 2 1-7 miles, on Rice St. and White Bear Road.

LEAVENWORTH, KAN.—J. D. Edmond, Mayor, writes us that at the last meeting of the council bids were received for brick and asphalt paving, but have been rejected. New bids are now being asked. He also states that considerable paving will be laid in the near future.

CARROLLTON, MO.—Wm. Riblett, Cy. Clk., writes us that an election will be held, Oct. 25, to vote on a proposition to issue $50,000 in bonds for paving and constructing sewers. Alex. Trotter, Thos. B. Goodson, Herman David and others, compose the committee.

KANSAS CITY, MO.—The park board has awarded a contract to Adam Armstrong, at $34,454, for paving Benton Boulevard, between 24th and 31st Sts., and to Bunton, Schryer & McGannon, Indianapolis, Ind., at $49,127, for constructing sidewalks, curb, gutter, etc., on Benton Boulevard, between Independence Ave. and 31st St.

MARSHALL, MO.—Bids are asked until Oct. 26 for furnishing and constructing Trinidad asphalt pavement and stone curb on portions of Lafayette Ave., Jefferson Ave., North and Arrow Sts. Jno. G. Miller, Mayor; A. R. James, Clk.

ST. LOUIS, MO.—Bids are asked, until 12 m., October 21, for furnishing and constructing granitoid walks around market. Robert E. McMath, Pres., Bd. Pub. Wks.

BEAUMONT, TEX.—Aldermen Kelly, Ives and Millard have been appointed a committee to secure plans and specifications of different kinds of paving, according to reports. D. P. Wheat, Mayor.

TACOMA, WASH.—Reports state that County Surveyor Bullard has completed a survey for a new road from Carbonado to Mount Ranier, and work will soon be commenced.

SAN FRANCISCO, CAL.—The board of supervisors has passed a resolution to pave Market St. with bitumen, between Sixth St. and Van Ness Ave.

WINNIPEG, MAN.—Bids are asked until Oct. 27, for asphalt paving on Poladd Ave., about 18,000 sq. yds., according to reports. C. J. Brown, Cy. Clk.

MANUFACTURING PLANTS.

OAKVILLE, CONN.—It is reported that plans have been prepared for a 2-story office building and two additions to the factory of the Oakville Co., to cost about $30,000. Arch., Theo. B. Peck, 65 Bank St., Waterbury, Conn.

BUFFALO, N. Y.—The Buffalo Co-operative Brewing Co. filed plans, Oct. 10, for a new brick building to replace the present plant at High and Michigan Sts., to cost about $84,000.

OSWEGO, N. Y.—George Barlow, of Seneca Falls, N. Y., has been awarded the contract for the masonry work on the foundation of the McGowan brewery.

CAMDEN, N. J.—The oilcloth and pattern factory of Dorner & Visser was destroyed by fire Oct. 13, causing a loss of about $35,000.

HARRISON, N. J.—The Berlin Iron Bridge Co., of East Berlin, Conn., is erecting an extension, 51 × 152 ft., to the foundry of the Benjamin Atha & Illingworth Co., at Harrison. The framework is to be of steel throughout; the sides are covered with corrugated iron on steel purlins, and are arranged for suitable doors and windows. The side columns support a 30-ton electric crane having a span of 46 ft. The roof construction is of steel trusses and purlins arranged with openings in the roof for skylights.

JERSEY CITY, N. J.—A fire in this city, Oct. 9, damaged the storage building of the Eagle Brewery, at 186 9th St., causing a loss of about $45,000.

WILMINGTON, DEL.—The 5-story morocco factory of Tadham & Hickman, at 208 West 4th St., was burned Oct. 7, causing a reported loss of $35,000.——Reports state that extensive improvements are to be made to the works of the Johnson Forge Co., at Wilmington.

MACON, GA.—A fire in this city Oct. 13 destroyed the candy and cracker factory of the Winn-Johnson Co., and adjoining buildings, causing a total loss of about $125,000.

COTTONPORT, LA.—It is reported that the sugar refinery on the Dora plantation, owned by F. Regard, was destroyed by fire, Oct. 11, causing a loss of about $75,000; insurance, $40,000.

MAUMEE, O.—The Dewey Glass Co., of Cincinnati, will erect a 24-pot window factory at Maumee, according to reports. It will cost $50,000, and will be completed in six months.

DETROIT, MICH.—A building permit has been granted for the erection of a factory and warehouse building for the Boydell Bros. White Lead & Color Co., at Champlain and Beaubien Sts., to cost $50,000. Archs., A. C. Varney & Co., 48 Campau Bldg.

UNION CITY, MICH.—A recent fire at the Peerless Portland Cement Co.'s works destroyed property valued at about $40,000. The new $200,000 brick and iron factory had just commenced operations.

MILWAUKEE, WIS.—Reports state that new additions will be built to the trunk factory of Abel & Bach, at St. Paul Ave. and 18th St., to cost about $75,000.

GAS PLANTS.

SOMERSET, KY.—The Kentucky Oil & Pipe Line Co. has awarded a contract to the National Tube Works Co., Pittsburg, Pa., at about $45,000, for the construction of a pipe line from Somerset to Slick Ford, a distance of about 36 miles; capacity, about 2,500 bbls. per day. H. W. Breckenridge, Gen. Mgr., Wellsville, N. Y.

CHARLOTTE, N. C.—The Consolidated Gas Co., Philadelphia, Pa., has decided to purchase the works of the Charlotte Gas Light Co. for $50,000. The plant and service will be enlarged and new apparatus and machinery will be installed.

DAYTONA, FLA.—Reports state that the council is considering the question of constructing acetylene gas works. Address E. Dillingham.

MASSILLON, O.—The council has granted a franchise to the East Ohio Gas Co. It has been proposed to lay eight miles of pipe within four months, and within one year 20 miles must be laid. Natural gas will be piped from West Virginia, according to reports.

NEW COMPANIES.—Louisville Gas Co., Louisville, Ky.; $15,000; Frederick Forcht, Jr., Albert Struby and Joseph O'Donnell.

James Oil Co., Charleston, W. Va.; $250,000 with $35 paid in; to operate for oil and gas; L. James, A. C. Hickel, J. H. Gaines, D. J. W. Clarkson, J. A. Jones, Charleston, W. Va.

Somerset Gas Light Co., 32 Division St., Somerville, N. J.; $25,000, with $5,000 paid in; to construct, maintain and operate gas works; A. M Young, New York; James L. Griggs, Chas. R. Knapp, John R. Garretson, Chas. J. Smith, A. G. Anderson, C. H. Bateman, James Brown, Jr., Peter Struve, Mathew P. Lane, Somerville, N. J.

Kentucky Oil & Pipe Line Co., Somerset, Ky.; $50,000; E. B. Sayre, Lexington, Ky.; George B. White, Paris, Ky.; J. A. Geary, Lexington, Ky.; J. B. Henady, Somerset, Ky.; H. W. Breckinridge, Weltville, N. Y.; O. H. Waddle, Somerset, Ky.; F. M. Hardin, Winton Place, O.; R. Kolker, Somerset, Ky.

American Gas Engine Co., Fort Wayne, Ind.; $50,000; O. N. Guldin, E. F. Lloyd, Fort Wayne; Wm. W. Goodwin, Bordentown, N. J.; Wm. Henry White, New York, E. W. Mumford, Philadelphia, Pa.

Canisteo Gas Co., Canisteo, N. Y.; $25,000; to manufacture and supply gas; J. B. Bradley, Bolivar; E. C. Bradley, Wellsville; William T. Morris, Penn Yan.

Home Gas & Water Co., Cicero, Ind.; $15,000; to construct a gas plant this fall and a water-works system next spring; William Michel, William H. Roney, Emil Dietz, George J. Hall, William J. Case.

MISCELLANEOUS CONTRACTS.

WHARF.—Baltimore, Md.—C. C. Buckman proposes to construct a wharf 200 ft. long at Calvert St., according to reports.

LEVEE.—Union City, Tenn.—The county court has authorized an appropriation of $5,000 for a levee across the Ohio River bottom.

SURVEY.—Olympia, Wash.—Bids are asked until Nov. 8 for surveying certain districts. W. McMicken, U. S. Surveyor-Gen., Olympia.

CHEMICAL FIRE-ENGINES.—Albany, N. Y.—The fire commissioners have decided to purchase two chemical fire engines, according to reports.

BONDS.—Troy, O.—Bids are asked until Oct. 22 for the purchase of $7,000 of 6% ditch bonds, according to reports. J. T. Bartmess, County Audr.

DAM.—Wichita, Kan.—The council has awarded a contract to J. R. Burton, at $2,633, for furnishing the material and constructing a dam across the Little River.

LEVEE WORK.—New Orleans, La.—Bids are asked by the board of state engineers, until 12 m., October 20, for about 31,500 cu. yds. of levee work on sections 3 and 4.

DREDGING.—Coos Bay, Ore.—Bids are asked until Nov. 15 for dredging in Coos Bay, as stated in our advertising columns. Maj. W. L. Fisk, U. S. Engr., Portland, Ore.

HARBOR WORK.—Stockton, Cal.—Bids are asked until Nov. 2 for improving the San Joaquin River and Stockton Channel. John Markley, Secy. Pub. Wks., Sacramento.

INSULATED WIRE.—Richmond, Va.—Bids were asked until Oct. 17 for furnishing the fire alarm department with about 10 miles of No. 10 B. & S. gage insulated wire. W. H. Thompson, Supt.

DREDGING.—Port Royal, S. C.—Bids are asked until until Nov. 12 for dredging at the U. S. naval station; appropriation, $100,000. M. T. Endicott, Ch. Bureau Yards and Docks, Washington, D. C.

DRAINAGE PUMPS.—San Francisco, Cal.—The Pumping Association in charge of the arrangements to drain the lower Comstock levels has asked for bids for furnishing the necessary pumping machinery.

FIRE ENGINE.—Laurel, Md.—This place will establish a fire department and will purchase an engine and other apparatus. Wm. H. Diven, Pres.; M. J. Tighe, Treas., and Lawrence A. Ellis, Ch. Engr., are interested.

STONE.—Brooklyn, N. Y.—Bids are asked until Oct 27 for furnishing large field stone or boulders, about 140,000 cu. ft., at Sunset Park. Geo. C. Clausen, Chn. Park Comrs., Arsenal, Central Park, New York.

TRAVELING CRANE.—Norfolk, Va.—Bids are asked until Oct 29 for furnishing an electric traveling crane and bridge, with a capacity of 40 tons, for the navy yard. Edwin Stewart, Paymaster Gen., Washington, D. C.

WHARF.—Palatka, Fla.—Reports state that the Georgia Southern & Florida Ry. Co. has awarded a contract to Capt. William Boyd for the construction of a new storage wharf, 30 × 250 ft. Jeff Lane, Gen. Supt., Macon, Ga.

STORAGE CYLINDERS.—Mare Island, Cal.—Reports state that bids will soon be asked by the navy department, Washington, D. C., for the erection of tanks for the cold storage cylinders at the navy yard; appropriation, $43,000.

FLOOD GATES.—Dayton, O.—Bids are asked until Oct. 25 for furnishing and constructing flood gates and masonry across the tail race owned by the Cooper Hydraulic Co., at Perry St. J. L. Baker, Pres.; J. E. Gimperling, Cy. Comptroller.

DRY DOCK.—Algiers, La.—Bids are asked until Nov. 30 (postponement from Oct. 31) for a combined floating and graving steel dock, with shore connections and appurtenances, for the U. S. naval reservation. M. T. Endicott, Ch. of Bureau, Washington, D. C.

WIRE.—Washington, D. C.—Bids are asked until 2 p. m., Oct. 21, for furnishing about 50 miles of stranded wire, seven ply; 50 miles stranded wire, insulated and braided, seven ply; 350 miles, No. 8, galvanized iron wire; 300 miles, No. 14, galvanized iron wire; 3,000 porcelain insulators. A. W. Greely, Ch. Signal Officer.

TELEPHONE LINE.—Charlotte, N. C.—The Queen City Telephone Co., Charlotte, has decided to establish a telephone service between Charlotte and Salisbury, a distance of about 50 miles, taking in several intermediate towns. Address J. A. Helvin, Queen City Telephone Co., and L. T. Coltraine, Concord local exchange, Concord, N. C.

WHARF, DREDGING, ETC.—St. John, N. B.—Bids are asked by the Intercolonial Ry. Co. until Oct. 26 for constructing a wharf 160 × 650 ft., using 60-ft. piles, dredging the berth to a depth of 28 ft. at low water, removing the rock, etc., and furnishing a diving outfit. A freight-shed will be built on the wharf. W. B. McKenzie, Ch. Engr., Monocton, N. B.; Station Master Ross, St. John.

PIERS, ETC.—Philadelphia, Pa.—The following requests have been presented to the board of port wardens for permission to construct piers, etc.: The William Cramp & Son's Ship Building Co., to fill a dock near Norris St.; the Pennsylvania R. R. Co., for a temporary rack of piles at Dock St.; Belt Line R. R. Co., for a track trestle, near Bridesburg; Thos. Clyde, for the extension of Pier No. 1; J. B. King Co., for a pier 350 × 60 ft. at Morton St., Chester, Pa.; Pennsylvania Steel Casting & Machine Co., Chester, Pa., for the extension of a bulkhead.

REFITTING TRANSPORT.—Washington, D. C.—The following bids have been received by the navy department for refitting the steamer "Massachusetts" as a permanent transport: The Atlantic Works, East Boston, Mass, $109,000; Morse Iron Works, $96,000, to be completed in 50 working days; Maryland Steel Co., Sparrow's Point, Md., $137,000, to be completed in 90 days; John N. Robins Co., $98,000; Newport News Shipbuilding & Dry Dock Co., Newport News, Va., $99,500, to be completed in eight weeks; William Cramp & Son's Ship & Engine Building Co., Philadelphia, Pa., $120,000, to be completed by Dec. 10 if turned over at once; if allowed to go to sea first, 60 days from date of delivery.

WELL DRILLS AND WINDMILLS.—Cape Town, South Africa.—Press reports state that Consul J. G. Stowe, Cape Town, states that the demand for windmills in South Africa is to increase after the various systems of irrigation are established. A number of American windmills have already been introduced in South Africa, but as they are entered at the custom houses under the head of agricultural implements, it is not possible to ascertain the number or value. Well drills have also been introduced, but not in sufficient numbers to meet the demand. The windmills manufactured in the United States, if properly pushed, will meet with success. Samples and tests will produce quicker and better results than catalogues.

WELLS AND SHAFTS.—Gila County, Ariz.—Bids are asked until Nov. 5 for sinking wells and shafts to ascertain the depth of bed rock at a place on Gila River, known as Buttes, and also on Queen Creek. H. Rizer, Acting Dir. U. S. Geological Survey, Washington, D. C.

TIDE GATES.—Cohasset, Mass.—A hearing was to be given by the harbor and land commissioners, Boston, Oct. 12, to consider an application for permission to construct tide gates at Little Harbor. Address B. Preston Clark, Cohasset, or Woodward Emery, Chn., Boston.

FIRE ALARM SYSTEM.—Mobile, Ala.—Bids are asked until Oct. 22 for furnishing and installing a complete fire alarm system, including 52 signal boxes, about 35 miles of No. 12 copper wire, etc., as stated in our advertising columns. Cary W. Butt, Chn. Com.; J. C. Bush, Mayor.

TELEPHONE CONDUITS.—Harrisburg, Pa.—The Pennsylvania Telephone Co. has decided to lay the wires in conduits of creosoted wooden pipes made in Norfolk, Va. A new office building will be erected at Walnut St. and Court Ave.; also a new switch board will be established, to cost about $25,000.

LADDER TRUCK AND BOILERS.—New York, N. Y.—Bids are asked until Oct. 26 for furnishing one Haye's extension ladder truck and fire escape and for repairing 10 steam fire-engines, to be furnished with new Fox sectional water-tube boilers, etc. John J. Scannell, Fire Comr., 157 East 67th St.

CONTRACT PRICES.

LAYING WATER PIPE.—Boston, Mass.—The Metropolitan Water Board, 3 Mount Vernon St., Boston, received the following bids Sept. 15 for laying cast-iron water pipe in Revere and Saugus; the contract was awarded Mirick & Wentworth; Ch. Engr., Frederic P. Stearns:

Bids Received at Boston, Mass., Sept. 15, 1898, for Laying Cast-iron Water Pipe in Revere and Saugus.

ROAD ROLLER.—Sheboygan, Wis.—We are informed that the following bids were received Oct. 1, 1898, for furnishing a 28,000-lb. steam road roller, f. o. b. Sheboygan, as advertised in Engineering News; Cy. Engr., C. U. Boley:

O. S. Kelly Co., Springfield, O.	$3,250*
Russell & Co., Massillon, O.	2,500
Optenburg & Sonnenmann, Sheboygan, Wis.	3,250†
Buffalo Pitts Co., Buffalo, N. Y.	3,300

*30,000-lb. roller, $3,350; 33,000-lb., $3,450; 35,000-lb., $3,500; 37,000-lb., $3,700. †Steam steering gear; $3,050 for hand steering gear.

ASPHALT PAVING.—Denver, Colo.—The contract for paving in Champa St. with Alcatraz asphalt is reported to have been let to the Denver Paving Co. at $1.98; total, $71,219.

ASPHALT PAVING.—Kansas City, Mo.—The Barber Asphalt Paving Co., New York, has been awarded the contracts for about 50,000 sq. yds. of asphalt paving in 8 streets at the following prices: 10-year guarantee, $1.85 a yd., $2.24, $2.34; 5-year guarantee, $2.12 a yd.

STATE HIGHWAYS.—Boston, Mass.—The Massachusetts State Highway Commission, 3 Mount Vernon St., Boston, awarded the following contracts Oct. 13, 1898, for building highways in certain towns; Secy., A. B. Fletcher, Boston: North Reading, Mass.—Contract awarded to C. H. Kelleher, Newburyport, Mass.: Excavation, 2,100 cu. yds., 25 cts. a cu. yd.; ledge excavation, 20 cu. yds., $2.00; rubble masonry—laid dry, 42 cu. yds., $4.50 a cu. yd.; laid in cement, 22 cu. yds., $8.00; gravel, 300 cu. yds., 45 cts.; Telford, 100 sq. yds., 20 cts. a sq. yd.; shaping, 6,274 sq. yds., 2 cts.; broken stone, in place, 1,506 tons, $1.30 a ton; 12-in. vitrified clay pipe, 30 lin. ft., 60 cts. a lin. ft.; fencing used as guard rail, 1,070 lin. ft., 20 cts.; side drains, 500 lin. ft., 35 cts.; stone monuments, 8, each $1.50; total, $3,587. Chelmsford.—Awarded to C. H. Kelleher, Newburyport: Excavation, 2,200 cu. yds., 25 cts. a cu. yd.; ledge excavation, 10 cu. yds., $2.00; rubble masonry—laid dry, 15 cu. yds., $5; laid in cement, 10 cu.yds.,$8; gravel 600 cu.yds.,45 cts.; Telford, 100 sq. yds., 30 cts. a sq. yd.; shaping, 11,592 sq. yds., 2 cts.; broken stone, in place, 3,043 tons, $1.90 a ton; 12-in. vitrified clay pipe, 50 lin. ft., 60 cts. a lin. ft.; fencing used as guard rail, 100 lin. ft., 20 cts.; side drains, 100 lin. ft., 20 cts.; stone monuments, 19, each $1.00; 10-in. vitrified clay pipe, 50 lin. ft., 50 cts. a lin. ft.; catchbasins, 1, $20.00; total, $7,173. Merrimac.—Awarded to M. Cashman, Newburyport: Excavation, 150 cu. yds., 32 cts., a cu. yd.; excavation, borrow, 1,000 cu. yds., 40 cts.; ledge excavation, 30 cu. yds., $1.50; rubble masonry—laid dry, 17 cu. yds., $3.00; laid in cement, 11 cu. yds., $5.00; gravel, 600 cu. yds., 60 cts.; Telford, 100 sq. yds., 40 cts. a sq. yd.; shaping, 3,705 sq. yds., 1¾ cts.; broken stone, in place, 890 tons, $1.35 a ton; 12-in. vitrified clay pipe, 30 lin. ft., 50 cts., a lin. ft.; fencing used as guard rail, 50 ft., 23 cts.; side drains, 800 lin. ft., 22 cts.; stone monuments, 9, each 75 cts.; total, $2,475. Extra work at following prices; materials at cost: Foreman, 40 cts, an hour; masons, 35 cts.; mason's helpers, 20 cts.; laborers, 16⅔ cts.; double teams and drivers, 45 cts.; single teams and drivers, 30 cts.; side drain extensions, 20 cts. a lin. ft.

STATE HIGHWAY.—Boston, Mass.—The Massachusetts State Highway Commission, Boston, awarded the following contracts for building state highways in Northboro, Sept. 22, 1898, and in Hadley and Walpole, Mass., Sept. 29, 1898; Secy., A. B. Fletcher: Northboro.—Fred. E. Ellis, Melrose: Excavation, 2,060 cu. yds., 40 cts.; ledge excavation, 150 cu. yds., $1.00; rubble masonry laid dry, 21 cu. yds., $6.00; rubble masonry laid in cement, 14 cu. yds., $9.00; gravel, 500 cu. yds., 45 cts.; Telford, 100 sq. yds., 30 cts.; shaping, 9,040 sq. yds., 2 cts.; broken stone in place, 2,170 tons, $1.20; 12-in. vitrified clay pipe, 30 lin. ft., 80 cts.; fencing used as guard rail, 120 lin. ft., 30 cts.; side drains, 100 lin. ft., 30 cts.; stone monuments, 22, each $1.50; total, $4,389. Hadley.—A. J. Wellington, Boston: Excavation, 460 cu. yds., 50 cts.; excavation borrow, 600 cu. yds., 60 cts.; ledge excavation, 10 cu. yds., $4.00; rubble masonry laid dry, 10 cu. yds., $6.00; rubble masonry laid in cement, 10 cu. yds., $12.00; gravel, 300 cu. yds., 80 cts.; Telford, 100 sq. yds., 50 cts.; shaping, 5,717 sq. yds., 2 cts.; broken stone in place, 1,470 tons, $2.20; 12-in. vitrified clay pipe, 30 lin. ft., 70 cts.; fencing used as guard rail, 100 lin. ft., 25 cts.; side drains, 500 lin. ft., 50 cts.; stone monuments, 13 each, $1.50; total, $4,764. Walpole.—John J. Falvey, Somerville: Excavation, 2,570 cu. yds., 30 cts.; excavation, borrow, 200 cu. yds., 30 cts.; ledge excavation, 10 cu. yds., $2.00; rubble masonry laid dry, 110 cu. yds., $3.00; rubble masonry laid in cement, 36 cu. yds., $6.00; gravel, 100 cu. yds., 35 cts.; Telford, 100 sq. yds., 35 cts.; shaping, 11,525 sq. yds., 2 cts.; broken stone in place, 2,766 tons, $1.28; 12-in. vitrified clay pipe, 106 lin. ft., 60 cts.; fencing used as guard rail, 550 lin. ft., 20 cts.; side drains, 750 lin. ft., 30 cts.; stone monuments, 20, each, $1.50; total, $5,667.

STATE HIGHWAYS.—Newburyport and South Hadley, Mass.—The Massachusetts State Highway Commission, Boston, awarded the following contracts Oct. 6, 1898, for constructing highways in Newburyport and South Hadley, Mass.; Secy., A. B. Fletcher: Newburyport—Michael Cashman, Newburyport—Excavation, 98 cu. yds., 17 cts. a cu. yd.; ledge excavation, 40 cu. yds., 10 cts.; rubble masonry laid dry, 32 cu. yds., $2.50; rubble masonry laid in cement, 32 cu. yds., $3.50; gravel, 600 cu. yds., 29 cts.; Telford, 100 sq. yds., 40 cts. a sq. yd.; shaping, 10,732 sq. yds., 1 ct.; broken stone, in place, 2,760 tons, $1.00; 8-in. vitrified clay pipe, 25 lin. ft., 25 cts. a lin. ft.; fencing used as guard rail, 100 lin. ft., 23 cts.; side drains, 300 lin. ft., 20 cts.; stone monuments, 23, each 50 cts.; catchbasins, 2, each $26.00; 18-in. cast-iron pipe, 60 lin. ft., $1.60; total, $3,693. South Hadley.—Amos D. Bridge, Hazardville, Conn. —Excavation, 400 cu. yds., 20 cts. a cu. yd.; excavation, borrow, 300 cu. yds., 50 cts.; ledge excavation, 10 cu. yds., $1.40; rubble masonry—laid dry, 10 cu. yds., $3.75; laid in cement, 10 cu. yds., $6.00; gravel, 350 cu. yds., 60 cts.; Telford, 10 sq. yds., 60 cts. a sq. yd.; shaping, 7,063 sq. yds., 2½ cts.; broken stone, in place, 1,818 tons, $1.90 a ton; 12-in. vitrified clay pipe, 30 lin. ft., 70 cts. a lin. ft.; fencing used as guard rail, 100 lin. ft., 15 cts.; side drains, 100 lin. ft., 22 cts.; stone monuments, 6, each $1.50; total, $4,255.

ELECTRIC LIGHTING.—Philadelphia, Pa.—The following bids were received by the director of public safety, Oct. 4, 1898, for arc lighting for 1899: The Brush Co., which lights the center of the city, and has by far the greatest number of lights, bids for its pole lines, south of Pennsylvania Ave., 30 cts. a light a night; north of Pennsylvania Ave., 31½ cts.; for light supplied through the city's underground cables, 29 cts., and for service on its own cables, 32 cts. The Powelton Electric Co., whose lines cover the district west of the Schuylkill, 32 cts. for its overhead lines, and 29 cts. when supplied over the city's cables. The Manufacturers' Electric Co., which operates between Susquehanna Ave. and Lehigh Ave., east of Broad St., 33 cts. for overhead lines, 29 cts. over the city's cables; 512 lights. The Diamond Electric Co., operating between Montgomery Ave. and Tioga St., 33 cts. for its overhead lines, and 29 cts. for lights supplied over the city's cables; 510 lights. The Suburban Electric Co., supplying 543 lights in the 23d and 35th Wards, 35½ cts. for overhead lines. The Wissahickon Electric Light Co., supplying 189 lights in Manayunk, Wissahickon, Roxborough and Falls of Schuylkill, 34 cts. for overhead lines. The Germantown Electric Light Co., supplying Germantown and Chestnut Hill, 35¼ cts. The Cheltenham Electric Light & Power Co., competing for the eastern portion of the 22d Ward in competition with the Germantown company, 36 cts. for overhead lines; 33 cts. when using the city's cables, and 39 cts. for lights supplied over cables controlled by the bidder. The Kensington Electric Light Co., with 650 arc lights, 34 cts. for overhead wires. The Southern Electric Light Co., operating south of South St. to Washington Ave., 30½ cts.; south of Washington Ave., and between the two rivers, 32 cts., all for overhead lines; when using city cables, 29 cts. This year the company supplies 1,251 lights.

SAND AND PEBBLES.—Fort Washington, D. C.—Bids for delivering sand and pebbles at Fort Washington, D.C., were opened by Lieut.-Col. Chas. J. Allen, U. S. Engr., Washington, Oct. 10, 1898, and were as follows; (1) pebbles, (2) sand: Henry Wells, 1210 G St., N. W., Washington, D. C.—(1) 93 cts. a cu. yd.; W. A. Richards, 21 N St., N. W., Washington, D. C.—(1) 99 cts., (2) 88c. a cu. yd.; John B. Lord, 17th St. wharf, Washington, D. C.—(1) 90 cts., (2) 80 cts.

PIPE SEWERS.—Albany, N. Y.—The following contracts were let Oct. 17, 1898, for laying vitrified pipe sewers: Second St.—Contract let to Michael F. Dollard: 15-in. pipe sewer, 40 lin. ft., $1.35 a lin. ft.; 12-in., pipe sewer, 748 lin. ft., $1.32; 12-in. square box, 100 ft., 68 cts.; 6-in. pipe sewer, 1,090 lin. ft., 12 cts.; 12-in. Y's, 70 ft., $2.94; manhole, $40.00; lamphole, $12.50; trenches, 1,090 lin. ft., 45 cts. a lin. ft.; 6-in. bends, 68 ft., 40 cts.; total, $2,016. Third, Thornton and Judson Sts.—Awarded to John Doyle, Albany; 15-in. pipe, 337 lin. ft., $2.25 a lin. ft.; 12-in. pipe, 483 lin. ft., $2.00; 12-in. square wooden box, 127 ft., $1.25; 6-in. pipe, 982 lin. ft., 20 cts.; 15-in. Y's, 22 ft., $4; 12-in., 45 ft., $3; manholes, 2, each $65; lamphole, $20; trench, 982 lin. ft., 70 cts. a lin. ft.; 6-in. bends, 67 ft., 50 cts.; total, $3,173.

LEVEE WORK.—Dayton, O.—The following bids were received Oct. 3 for enlarging the Riverdale levee from Main St. to River St., etc.:

Bids Received at Dayton, O., Oct. 3, 1898, for Enlarging the Riverdale Levee.

Bidder.	Stone masonry Old, 472 perches.	Stone masonry New, 200 perches.	Slope-wall masonry, 77 perches.	F'ndat'n timber, 30,887 ft. B.M.	Filling, 13,720 cu. yds.	Lump bid. Filling.	Lump bid. Masonry, etc.	Total.
Geo. R. Hively	$7.00	$4.00	$3.00	$20.00	$0.16¾	$2,308	$4,953	$7,261
E. Brentlinger	6.40	6.40	3.00	15.00	.24½	3,361	4,995	8,357
Bruno Ritty	6.50	6.50	4.00	20.00	...	.....	5,294	.....

David Beard	...	...	...	.....	.23½	3,224	.....	.....

IRRIGATION CANAL—Salt Lake City, Utah.—The letting of the contract for building the dam of the Davis and Weber Counties Canal Co. was noted in our issue of Sept. 1. Since then the Andrews Bridge Co., of Salt Lake City, has withdrawn from the contract, and Perham Bros. & Parker, of Montana, have signed the bonds for the contract and are actively at work. Following are the contract prices: Excavating and placing rock in the body of the dam and face wall, 80 cts. a cu. yd. in place; funnel, $8 a cu. yd. excavated; asphalt concrete, $10 a cu. yd.; Portland cement concrete, $8 a cu. yd.; rough rubble masonry in cement mortar, $10 a cu. yd. The steel core and other work was let in a lump sum. The total amount of the contract is $27,910. The dam is located in a solid rock gorge, 52 ft. between walls at the bottom and 90 ft. at the top, and it is to be 68 ft. high.

LEVEE WORK—Port Allen, La.—Donovan & Daley submitted the lowest bid, Sept. 21, 1898, at 22.90 cts. a cu. yd., for constructing the Allendale levees, in West Baton Rouge. The bids were rejected.

LEVEE WORK—New Orleans, La.—The following bids were received by the U. S. Engineers, Sept. 22, 1898, for levee work in the districts of Lafourche and Atchafalaya: Lafourche Levee—Hymella to Killona—Hayes & Bros., 11.75 cts. a cu. yd.; Donovan & Daley, 12.70 cts.; J. A. Andrews & Sons, 15.50 cts. Pelican to Flagtown—Hayes & Bros., 12.75 cts.; Donovan & Daley, 16.90 cts.; J. A. Andrews & Sons, 16 cts. Lone Star—Hayes & Bros., 18 cts.; J. A. Andrews & Sons, 23 cts. Louisa—Hayes & Bros., 16 cts.; Donovan & Daley, 13.90 cts.; J. A. Andrews & Sons, 14 cts. Coopersville—Hayes & Bros., 18 cts.; Donovan & Daley, 17 cts.; J. A. Andrews & Sons, 14.75 cts. Atchafalaya Levee—Hermitage—B. O'Brien, 33 cts.; Donovan & Daley, 35 cts. Beaulieu to Antonio—M. L. Linan, 10.97 cts.; Thomas Whelan, 14 cts.; I. R. Bobbit, 13.50 cts.; B. O'Brien, 14 cts.; George Byrne, 12.40 cts.; Donovan & Daley, 13.70 cts.; Hearn & O'Connor, 12.95 cts.; J. A. Andrews & Sons, 19 cts. Missouri—I. R. Bobbit, 14.50 cts.; B. O'Brien, 15 cts.; G. Byrne, 16.50 cts.; Donovan & Daley, 14.90 cts.; J. A. Andrews & Sons, 19.50 cts. Australia—M. L. Linan, 10.95 cts.; G. Bryne, 16.50 cts.; Donovan & Daley, 17.90 cts.; J. A. Andrews & Sons, 16.50 cts.

LEVEE WORK—New Orleans, La.—The following bids were received by the State Engineers, Sept. 23, 1898, for levee work in the Grand Prairie district, etc., (1) being for the Grand Prairie district and (2) for the Rosehill Highland: Thos. B. Cleary (1), 12.90 cts.; M. Michell (1), 13¾ cts.; Geo. Jurgen and P. Lyon (1), 13.75 cts.; Donovan & Daley (2), 16.39 cts.; I. R. Bobbitt (2), 16⅜ cts.; Jos. Hingle, Jr. (1), 11⅓ cts.; Felix S. Hingle (1), 13½ cts.; Cosse & Schavot (1), 11.99 cts.

LEVEE WORK—New Orleans, La.—The U. S. Engineers received the following bids, Sept. 28, 1898, for certain levee work: Esperanza, sections 1 to 4—B. O'Brien, 19.90 cts.; Bush Bros., 23.125 cts. Ashley, sections 1 to 3—John Scott & Sons, 11.36 cts.; H. J. Loonan, 12.70 cts.; Donovan & Daley, 13.70 cts.; B. O'Brien, 13.73 cts.; Bush Bros., 12.74 cts.; Jos. R. Marlou, 11.94 cts. Ashley, sections 4 to 6—John Scott & Sons, 11.36 cts.; Donovan & Daley, 13.70 cts.; B. O'Brien, 12 cts.; Bush Bros., 12.74 cts. Ashley, sections 7 to 10—John Scott & Sons, 11.36 cts; Donovan & Daley, 13.70 cts.; B. O'Brien, 13.98 cts.; Bush Bros., 13.90 cts. Ashley, sections 11 to 13—John Scott & Sons, 11.36 cts.; Donovan & Daley, 13.70 cts.; B. O'Brien, 11.98 cts.; Bush Bros., 12.90 cts.

BRICK PAVING—Erie, Pa.—The following contract has been let to John McCormick & Son for brick paving, etc., in 17th St.: Mack No. 1 plain brick, $1.72 a sq. yd. complete, including grading, foundation and curbing, and $30 each manhole; 30 cts a sq. ft. 6-in. pipe. Other materials: Park No. 1 vitrified, $1.75; Mack, repressed, $1.75, and Canton, repressed, red granite, $1.72.

BRICK PAVING—Toledo, O.—Geo. H. Cole submitted the lowest bid, Oct. 12, 1898, for brick paving in Scott St., at $1.44; total, $3,000. H. J. Jenneson submitted the lowest bid for paving in Oak St. at $1.47 a sq. yd. The high bid on this work was at $2 a sq. yd. Total for Jenneson's bid, $5,000. H. P. Streichen was lowest bidder at $1.34 for the paving of Sixth St., from Main St. to Kelsey Ave.; total, about $5,500.

LEAD PIPE—St. Paul, Minn.—Crane & Ordway have been awarded the contract for furnishing seven tons of lead pipe at $4.50 a 100 lbs.

ASPHALT PAVING—Schenectady, N. Y.—We are informed that the contract for 2,000 sq. yds. of asphalt paving, etc., in Summit Ave. has been let to the Metropolitan Paving & Construction Co., Schenectady, at $2.27½ a sq. yd.; curbing, 60 cts. a ft. The same company has the contract for 14,000 yds. of asphalt paving in Franklin St. at $2.27.

ASPHALT PAVING.—Independence, Mo.—The Columbia Construction Co., Syracuse, N. Y., has been awarded the contract for 8,500 sq. yds. of asphalt paving at $1.85 a sq. yd. Mayor, S. H. Woodson; Cy. Engr., M. Pendleton.

SIDEWALKS.—Toledo, O.—James H. Horan has been awarded contracts by the sidewalk committee of the council for laying plank walks at 23½ cts. a ft. for 6-ft. walks and 15½ cts. for 4-ft. walks. C. Peck & Son were awarded contracts for stone walks at 12⅜ cts. a sq. ft.

BRICK PAVING.—Council Bluffs, Ia.—Wickham & Co. have been awarded the contract for paving certain streets with Council Bluff brick in top and bottom courses at $1.098 a sq. yd.

BRICK AND CEDAR BLOCK PAVING.—Detroit, Mich.—Henry Merdian has been awarded the contract for Trimble brick paving in Second St. at $1.57 a sq. yd.; Liphardt & Winterhalter have the contract for paving in Stanley Ave. with cedar blocks at $1.46 a yd.

◆

INDUSTRIAL NOTES.

THE OHIO BRASS CO., Mansfield, O., has just opened an office at 39 Cortlandt St., New York, in charge of Mr. R. A. Byrns, formerly with the Walker Co., Cleveland.

THE JEANESVILLE IRON WORKS, Jeanesville, Pa., has an order, according to report, for an electric power mine pump of 600 ft. lift for the Moon Anchor Gold Mining Co., Cripple Creek, Colo.

THE HARRISBURG FOUNDRY & MACHINE WORKS, Harrisburg, Pa., will soon begin work, it is reported, on a large contract for steam engines and boilers for a woolen mill at Tien-Tsin, near Pekin, China.

THE NATIONAL TUBE WORKS CO., McKeesport, Pa., is announced to have contracted to furnish about 35 miles of pipe to the Kentucky Oil & Pipe Line Co., for its new line from Slick Ford to Somerset, Ky.

THE PLAYFORD STOKER CO., Cleveland, O., has the contract for six 250-HP. automatic stokers for the Apollo Iron & Steel Co., Vandergrift, Pa., and for two 250-HP. stokers to be installed in the Allegheny, Pa., water-works.

THE UTICA ELECTRIC MFG. & SUPPLY CO., Utica, N. Y., has a contract from the New York Mills Co., New York Mills, N. Y., for a light dynamo, switchboard and 11 arc and 200 incandescent lamps, according to report.

HALLSTED & McNAUGHER, civil engineers and inspectors of iron and steel for structural purposes, and Robert W. Hunt & Co., associates, have removed their offices from 80 Broadway to the Empire Bldg., 71 Broadway, New York.

THE SNOW STEAM PUMP WORKS, Buffalo, N. Y., has the contract for the pumps for the new Russian battleship, Russian cruiser and the American battleship "Maine." Mr. Lewis S. Silva, 126 Liberty St., New York, is Eastern representative of the company.

WM. B. SCAIFE & SONS, Pittsburg, have the contract to build a new steel frame shop building and other extensions to the plant of the Pennsylvania Car Wheel Co. The firm also has the contract to erect a steel tipple building and engine house for the Washington Coal & Coke Co., near Dawson, Pa.

THE ITHACA GUN CO., Ithaca, N. Y., is reported to have purchased the entire plant of the Wilkesbarre Arms Co., Wilkes-Barre, Pa., manufacturers of the Wilkesbarre and Parry guns, and will move the plant to Ithaca, making the former company's plant, it is said, one of the largest of its kind in the world.

THE RICE & SARGENT ENGINE CO., Providence, R. I., recently supplied to the Brown & Sharpe Mfg. Co., of the same city, a 350-HP. cross-compound condensing Rice & Sargent engine for use in the main machine shop. This engine takes the place of two non-condensing Corliss type engines, built in 1872, and it is claimed that the change will effect a saving of 10 tons of coal a week.

THE CLONBROCK STEAM BOILER CO., Brooklyn, N. Y., has been successful in its suit against Thos. J. Lawler, of the Columbian Steam Boiler Works, for infringement of its patents on the Climax boiler. In an opinion handed down by Judge Thomas in the U. S. Circuit Court for the Eastern District of New York, on Oct. 6, the patents of Morrin & Scott 309,727 and Morrin's patents 463,307 and 463,308 covering the construction adopted in the "Climax" boiler were sustained. The boilers constructed by the Columbian Works for the Brooklyn Edison Co. were declared infringements.

THE DELAWARE ELECTRIC & SUPPLY CO., Wilmington, Del., has the following orders: A 60-HP. boiler and a 25-HP. engine for J. E. Rhoades & Son; two large pumps, several hydrants and two 40-HP. boilers for the water-works at Pocomoke City, Md,; a 15-HP. boiler to go to Hockessin, Del.; a 25-HP. boiler for the Fibre Specialty Co., Hockessin, Del.; 2,150 ft. of 2½-in. fire hose for the Eddystone Mfg. Co., Eddystone, Pa.; 500 ft. of the same for the Jackson & Sharp Co., Wilmington, Del.; 200 ft. of the same for the Diamond Ice Co., and 400 ft. of the same for the Harlan & Hollingsworth Co., Wilmington.

THE FEDERAL STEEL CO., Cleveland, O., is announced in press reports to have completed its organization by the election of its permanent officers and is to establish a large shipbuilding plant in or near New York for the construction of steel merchant vessels and battleships, cruisers and other war vessels. The new company has a capital of $200,000,000, and has been formed by the consolidation of the Minnesota Iron Co., the Illinois Steel Co., the Elgin, Joliet & Eastern R. R. Co. and the Lorain Steel Co. The officers are: Pres., Mr. E. H. Gary, Chicago, and Secy. and Treas., Mr. Richard Trimble, New York.

THE VULCAN IRON WORKS, Chicago, has received orders from the Chicago, Burlington & Quincy R. R. Co. for the steam operating machinery for its new bridge at Quincy, Ill.; from the Chicago & Northwestern Ry. Co. for the gasoline operating machinery and the turntable machinery for its bridge over the Kinnickinnic River, at Milwaukee, Wis., and also from the latter company for the hand-operating machinery and turntable for its bridge at Oshkosh, Wis. The Vulcan Iron Works has about finished seven sluice gates for the Cincinnati Water-Works, and has an order from the city of Chicago for a 7-ft. tunnel-gate.

THE ABENDROTH & ROOT MFG. CO., 28 Cliff st., New York, manufacturers of Root's spiral riveted pipe, reports a number of large orders recently for this pipe for water-works. Among recent shipments are the following: Sheely & O'Shee Co., contractors, Lincoln, Neb., 12,000 ft., which will be used in extending the water-works at Lanesboro, Minn.; about 10,000 ft. to Milledgeville, Ill., and 15,000 ft. to the city of Augusta, Wis. The U. S. Water & Steam Supply Co., contractors, Kansas City, Mo., has placed an order for about 5,000 ft. of pipe to be used at Concordia, Mo., and 6,500 ft. have been ordered by J. L. White, contractor, Wyoming, Ill.

THE KENNEY CO., 72 Trinity Place, New York, reports that the War Department has ordered the installation of 63 Kenney flushometers in the transport "Mohawk," now being overhauled at the Bath Iron Works, Bath, Me. The Navy Department has also given the company a second order for flushometers to be used in its building in Washington, D. C. The company also reports that the Philadelphia Board of Health, after a thorough investigation, has amended the building laws so as to permit the installation of the Kenney system, by which one tank is used to supply one or more water-closets. instead of requiring individual tanks.

THE NEW BRITAIN MACHINE CO., New Britain, Conn., has just furnished two 25-HP. steam engines of the Case type for the United States Government, to be direct connected to C. & C. dynamos. One of the smaller sizes of these engines is now being used at Santiago, Cuba, for driving a search light dynamo on a tug, by means of which the salvage work in charge of Naval Constructor Hobson is being expedited. The company has recently shipped several of its chain saw mortises to the Navy Yard, at Brooklyn, N. Y., and Mare Island, Cal., and at present is engaged in completing an order for similar machines for government dock yards at Devenport and Chatham, England.

THE GOUBERT MFG. CO., New York, manufacturer of the Goubert feed-water heater, states that it is exceedingly busy at present and that it has the following orders: One 3,000-HP. heater for a pulp mill of the New York & Pennsylvania Co.; one 3,000-HP. heater for the Cleveland Ry. Co., Cleveland, O.; one 5,000-HP. auxiliary heater for the Metropolitan St. Ry. Co., New York, making 35,000 HP. now being built for that company alone; a 3,000-HP. heater has just been delivered to the People's Electric Light Co., Newark, N. J. These orders are in addition to regular calls for heaters of smaller sizes, among the latter being 1,000 HP. for the Schenectady Ry. Co., Schenectady, N. Y., and 1,800 HP. for the Citizens' Light & Power Co., Houston, Tex.

THE EDWARD P. ALLIS CO., Milwaukee, Wis., reports that among recent orders are two vertical cross compound direct-connected engines, with cylinders 38 and 76×48, for the Metropolitan West Side Elevated Ry. Co., of Chicago, which company for several years has been using four Allis engines of similar design. The Metropolitan Sewage Commission of Boston has recently ordered three more sewage pumping engines, similar to those supplied the commission during the past few years. The shops of the company are very busy, and among the orders in hand are four pair of vertical cross compound blowing engines with steam cylinders 42 and 80×60, air cylinders 87×60. It is also building two pair of similar blowing engines for the Carnegie Steel Co., with steam cylinders, 5 and 96×60; air cylinders, 100×60. The company states that it has recently had to decline a number of orders offered, as it was unable to meet the delivery desired.

THE WILLIAMS PATENT CRUSHER & PULVERIZER CO., St. Louis, Mo., has removed its general eastern office from Philadelphia to the Washington Life Bldg., New York, in addition to having also just taken more commodious quarters in Philadelphia. The company is making a specialty of crushers and pulverizers for reducing limestone, cement, clinker, phosphate rock, shale, clays, bones, etc., in addition to making a bark mill for tanners and extract manufacturers. The company has recently installed mills in the following plants: Lawrence Cement Co., Siegfried, Pa.; Kelly Island Lime & Transport Co., Kelly Island, O.; Vanner Cement Co., Louisville, Ky.; Portland Cement Co. of Utah, Salt Lake City; Virginia & Carolina Chemical Co., Richmond, Va.; Bradley Fertilizer Co., Boston; Philadelphia and Boston Face Brick Co., Boston; Standard Flint & Spar Co., Frenchtown, N. J., and Cleveland Dryer Co., Cleveland, O. Swift & Co., of Chicago, has just placed orders for three more mills for bone grinding, and the Philadelphia Hydraulic Press Brick Co., Philadelphia, has ordered three pulverizers. The company has also recently sold mills to the following tanners: A. T. Prindle & Co., Hornellsville, N. Y.; J. S. Young Co., Baltimore, Md. (two mills); Smoot & Co., Alexandria, Va. Additions to its works, made necessary by the increasing demand for these machines, have just been completed by the Williams company. The officers are: Pres., Milton F. Williams; Vice-Pres., Hoyt H. Green; Secy. and Treas., Geo. F. Cottrill.

Mail Delivery Notice.

Special efforts are made to deliver our paper to its readers each week at the earliest possible moment. The largest binding and mailing establishment in New York begins work on Engineering News early each Wednesday evening, and all papers for Boston, Philadelphia and Washington are usually in the New York post-office by midnight; all Brooklyn and New York city papers by 3 o'clock—in ample time for the first delivery Thursday morning. The entire edition, including foreign copies, is in the mail soon after 6 o'clock Thursday morning. If your paper is not received promptly we advise that you make a complaint to your local post-office officials.

The Circulation of ENGINEERING NEWS among Prominent Contractors Probably EXCEEDS that of any other FIVE PAPERS.

ADVERTISE YOUR WORK IN ENGINEERING NEWS.

PERSONAL.

Mr. Clarence Goldsmith, of Andover, Mass., has been appointed Superintendent of the Water-Works system of North Andover.

Mr. Russell Harding, General Superintendent of the Great Northern Ry., it is reported, will soon assume the Vice-Presidency of the Cotton Belt System.

Mr. E. Sherman Gould, M. Am. Soc. C.E., is still in Cuba. His present address is "Hotel Pasaje, Habana, Cuba," instead of "Hotel Inglaterra," as previously noticed.

Mr. Eustace Oxley, formerly with the United States Electric Light Co., Washington, D. C., is now associated with the engineering staff of the General Electric Co., Schenectady, N. Y.

Capt. W. W. Peabody, Vice-President of the Baltimore & Ohio Southwestern Ry., has been forced to retire from active work on account of his eyesight, and will present his resignation.

Lieut.-Colonel John Biddle, M. Am. Soc. C. E., Corps of Engineers, U. S. A., has been ordered to join the First Army Corps, located at Lexington, Ky., to act as chief engineer officer.

Messrs. R. S. Hale, Assoc. M. Am. Soc. M. E., and J. S. Codman have formed a partnership for the practice of steam, electrical and general consulting engineering, with offices at 31 Milk St., Boston, Mass.

Mr. William M. Greene, General Manager of the Baltimore & Ohio R. R. Co., it is reported, will resign on Nov. 1 to become Vice-President and General Manager of the Baltimore & Ohio Southwestern Ry. Co.

Mr. Jesse M. Smith, M. Am. Soc. M. E., consulting mechanical and electrical engineer, of Detroit, Mich., has removed to New York City, and opened an office in the St. Paul Bldg. He will also retain his Detriot office.

Mr. Frank H. Olmstead, of Los Angeles, Cal., who is associated with Mr. J. B. Lippincott, the consulting engineer of the Pasadena Water-Works, received the Republican nomination for City Engineer of Los Angeles.

Prof. Francis B. Crocker, of Columbia University, New York city, President of the American Institute of Electrical Engineers, has started on a tour of the world which, it is expected, will occupy most of a year's leave of absence which has been granted him.

Mr. Chas. F. Walker, of the business department of Engineering News, was married on Oct. 20 to Miss Jennie Van Name Dodd, at the residence of her father, Mr. Marvin Dodd, in East Orange, N. J. Mr. Walker was formerly a student in the School of Mines, Columbia University.

Col. Geo. E. Waring, Jr., late Commissioner of Street Cleaning of New York, arrived at New York, on Oct. 25, on the steamer "Yucatan" from Cardenas and Havana. Colonel Waring was suffering from malaria, but expects to be in Washington in a few days, when he will present to the President his report regarding the means necessary to put Havana in a healthy condition.

Mr. Wm. P. Bates, Superintendent of the J. H. Somers Fuel Co.'s mine No. 2, at Belle-Vernon, Pa., was very seriously injured on Oct. 13 by a land slide at the entrance to the mine. Mr. Bates, in company with his brother, Mr. Albert D. Bates and Mr. Chas. W. Somers, General Manager of the company, started to inspect some improvements at the entrance. Mr. Somers noticed the slide and called to the others. Messrs. Somers and A. D. Bates escaped with slight injury.

OBITUARY.

Mr. Mark M. Cohn, President of the Board of Water Commissioners of Saratoga. N. Y., died at his residence on Oct. 22.

Mr. Wm. H. Case, mining and civil engineer, died at his home in Brooklyn, N. Y., on Oct. 24. Mr. Case was born in New York state April 27, 1841. In 1866 he was graduated from Union College. From that time on he was actively engaged in the practice of engineering in New York and the Southern States.

Capt. Philip Inch, Chief Engineer, U. S. N., who was retired last August, died at Saratoga, N. Y., on Oct. 18, aged 62 years. His appointment to the navy was from the District of Columbia on Nov. 21, 1857. He became a chief engineer in 1863. At the time of his retirement he was the senior officer of the Engineer Corps of the Navy.

Mr. Louis De Blois Bartlett, of Fitchburg, Mass., died suddenly on Oct. 19. Mr. Bartlett was born in 1825, at Marblehead, and started his career of mechanical engineering under the late Otis Tufts, of Boston. In 1859 he moved to Fitchburg, Mass., where he became successively director, treasurer and president of the Putnam Machine Co. In 1885 he retired from the company.

Mr. Horace B. Miller, formerly President and General Manager of the "American Machinist," died on Oct. 25, at Napa, Cal. Mr. Miller was born in Philadelphia about 60 years ago. In partnership with Messrs. Jackson and Bailey he founded the "American Machinist," of which he was president and general manager for 16 or 17 years. Later he sold out his interest and went to New Mexico for his health.

Mr. John H. Dialogue, of Camden, N. J., senior member of the firm of Dialogue & Son, iron shipbuilders. died at his home in Camden on Oct. 23, after a brief illness. He was born in Philadelphia, Pa., in 1828. In 1850 he started a small machine shop in Camden, which grew to its present proportions as a result of his untiring industry. The firm has within recent years built many government craft, the latest vessel being the "Princeton."

Mr. Frank C. Doran, M. Am. Soc. C. E., died on Oct. 15 at his home at Englewood, Ill. Mr. Doran was born in Eastern Indiana in 1850. His first engineering work was on the old Panhandle R. R. Later he settled in Indianapolis, where he became associated with Mr. George Epsy and built the Union Station of that city. From Indianapolis he went to Omaha to build a union railway station, which was not completed owing to litigation between the railways and the city. Leaving there he went to Chicago to take charge of the construction of the new Chicago Belt R. R., upon which he was engaged at the time of his death.

Col. A. P. Robinson, one of the pioneer civil engineers of the country, died at Conway, Ark.. on Oct. 12. He was born in 1822 in Hartford county, Conn. He began engineering work as a rodman on the first section of the Erie R. R., west of the Hudson River. After the civil war he made an exploration from the Missouri River as far as Denver, under government escort. Following this he was engaged by the Missouri, Kansas & Texas R. R. until 1869, when he went to Little Rock, Ark., and became connected with the St. Louis, Iron Mountain & Southern R. R. and the Little Rock & Fort Smith R. R., as chief engineer. He also laid out the government reservation at Hot Springs. In 1871 Col. Robinson located on a tract of 640 acres which he had previously purchased from the Little Rock & Fort Smith R. R. Co. Around him grew up the city of Conway, of which he was several times elected mayor.

Mr. John Gjers, whose death occurred in the week ending Oct. 15, has for years been a prominent figure in the iron industry of England. He was born in Gothenburg, Germany, in 1830, and went to Manchester, England, at the age of 21, where he was engaged in drafting and machine designing. In 1854 he went to Middlesborough, where he built the Ormesby blast furnaces. In 1855 he became the manager of these works and from this time on developed many improvements in blast furnace apparatus. Among his inventions may be mentioned a type of vertical blowing engine, an improved soaking pit, a system for granulating blast furnace slag, a process for manufacturing steel rails, etc. In 1870 Mr. Gjers founded the firm of Gjers, Mills & Co., of which he was principal partner until his death. He was one of the founders of the Iron and Steel Institute, and received in 1894 the Bessemer gold medal.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

AMERICAN INSTITUTE OF ARCHITECTS.
Nov. 1-3. Annual meeting, Washington, D. C. Secy., Alfred Stone, Providence, R. I.
WESTERN SOCIETY OF ENGINEERS.
Nov. 2. "Construction of Retaining Walls for the Sanitary District of Chicago," James W. Beardsley; "Berthier Method of Coal Calorimetry," Chas V. Kerr; "Brakes for Electric Cars," William G. Price. Secy., N. L. Litten, Monadnock Block, Chicago, Ill.
AMERICAN SOCIETY OF CIVIL ENGINEERS.
Nov. 2. Discussion on "Roads and Road Making." Secy., C. W. Hunt, 220 W. 57th St., New York city.
ENGINEERS' CLUB OF ST. LOUIS.
Nov. 2. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.
BROOKLYN ENGINEERS' CLUB.
Nov. 3. Secy., A. J. Provost, Jr., 191 Montague St., Brooklyn, N. Y.
TECHNICAL SOCIETY OF THE PACIFIC COAST.
Nov. 4. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.
BROOKLYN INSTITUTE OF ARTS AND SCIENCES.
Nov. 4. Illustrated Lecture, T. C. Martin. Secy., Henry I. Weed. Brooklyn Institute of Arts and Sciences, Brooklyn, N. Y.
CHICAGO ELECTRICAL ASSOCIATION.
Nov. 4. "The Electrical Equipment of a Model Printing Establishment," Geo. A. Damon. Secy., J. R. Cravath, 825 Monadnock Block, Chicago, Ill.
ENGINEERS' CLUB OF COLUMBUS.
Nov. 5. Secy., H. M. Gates, 12½ North High St., Columbus, O.
ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Nov. 7. Secy., H. J. March, Library Bldg., Buffalo, N. Y.
CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Nov. 7. Secy., C. L. Annan, City Engineer's Office, St. Paul, Minn.
NEW ENGLAND RAILROAD CLUB.
Nov. 8. Secy., Edw. L. Janes, P. O. Box 1158, Boston, Mass.
DENVER SOCIETY OF CIVIL ENGINEERS.
Nov. 8. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Col.
CIVIL ENGINEERS' CLUB OF CLEVELAND.
Nov. 8. Secy., Wm. H. Searles, Case Library Building, Cleveland, O.
RAILWAY SIGNALING CLUB.
Nov. 8. Secy., Earl M. Seitz, Signal Engineer, C. & N. W. Ry., Chicago, Ill.
FRANKLIN INSTITUTE.
Nov. 9. "Mining and Minting of Gold and Silver," A. E. Outerbridge, Jr. Secy., Wm. Wahl, 15 South Seventh St., Philadelphia, Pa.
CANADIAN SOCIETY OF CIVIL ENGINEERS.
Nov. 10. Secy., C. A. McNab, 112 Mansfield St., Montreal, Canada.
ENGINEERING ASSOCIATION OF THE SOUTH.
Nov. 10. Secy., C. B. Wilson, 1000 Broad St., Nashville, Tenn.
SOCIETY OF NAVAL ARCHITECTS AND MARINE ENGINEERS.
Nov. 10-11. Annual meeting. Secy., Francis T. Bowles, 12 West 31st St., New York.
ST. LOUIS RAILWAY CLUB.
Nov. 11. "The Performance of a Four-Cylinder Compound Locomotive." Discussion. Secy., H. H. Roberts, 511 Commercial Bldg., St. Louis, Mo.
CENTRAL RAILWAY CLUB.
Nov. 11. Secy., H. D. Vought, 114 Fifth Ave., New York city.
MONTANA SOCIETY OF ENGINEERS.
Nov. 12. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.
ENGINEERS' CLUB OF KANSAS CITY.
Nov. 14. "Rectification of the Red and Atchaflaya Rivers," A. F. Woolley, Jr. Secy., F. W. Tuttle, Baird Bldg., Kansas City, Mo.
THE LOUISIANA ENGINEERING SOCIETY.
Nov. 14. Secy., J. F. Coleman, 712 Union St., New Orleans, La.
NORTHWEST RAILWAY CLUB.
Nov. 15. Secy., T. A. Foque, Soo Line, Minneapolis, Minn.
ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.
Nov. 15. Secy., R. A. Fessenden, 410 Penn Ave., Pittsburg, Pa.
ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Nov. 16. Secy., Frank H. Olmsted, Los Angeles, Cal.
BOSTON SOCIETY OF CIVIL ENGINEERS.
Nov. 16. Secy., S. E. Tinkham, City Hall, Boston, Mass.
WESTERN FOUNDRYMEN'S ASSOCIATION.
Nov. 16. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.
NEW YORK RAILROAD CLUB.
Nov. 17. Secy., W. W. Wheatley, 168 Montague St., Brooklyn, N. Y.
SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Nov. 17. Secy., F. A. Charpiot, P. O. Box 13, Savannah, Ga.
ENGINEERS' CLUB OF CINCINNATI.
Nov. 17. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.
ENGINEERS' CLUB OF PHILADELPHIA.
Nov. 19. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.
TECHNICAL CLUB OF OMAHA.
Nov. 21. Secy., J. Harry Lawrie, Omaha, Neb.
ENGINEERS' CLUB OF MINNEAPOLIS.
Nov. 21. Secy., H. E. Smith, 1620 S. E. 4th St., Minneapolis, Minn.
ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Nov. 21. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.

BROOKLYN INSTITUTE.—A meeting of the Department of Mineralogy was held on Oct. 13, to listen to a lecture of Prof. W. G. Levison, on "Luminescent Minerals."

MONTANA SOCIETY OF ENGINEERS.—At the last meeting of this society, held Oct. 12, a committee was appointed to select a place of meeting for the annual convention. Helena was chosen and the time fixed as the second Saturday in January.

PITTSBURG FOUNDRYMEN'S ASSOCIATION.—The regular meeting of this association was held Oct. 24. The paper of the evening was by Dr. R. Moldenke, Pittsburg, Pa., on "The Melting Point of Cast Iron," and is given in full elsewhere in this issue.

WESTERN RAILWAY CLUB.—A regular meeting of this club was held Oct. 18 in the Auditorium Hotel, Chicago. Mr. P. H. Peck presented a paper on "The Adoption of a Standard Knuckle," which was followed by a topical discussion on "What is the Best Disposition to be Made of the Exhaust from the Air Pump?"

NEW YORK ELECTRICAL SOCIETY.—The 190th regular meeting of this society and the first meeting of the fall of 1898 will be held by the courtesy of the Edison Electric Illuminating Co., at the Pearl St. sub-station, Brooklyn, N. Y., at 7:30 p. m., on Oct. 27. Mr. W. S. Barstow, Chief Engineer, will give a brief address, after which special trolley cars will be boarded and a flying visit made to sub-station "A" and the large Union Central Station at Bay Ridge.

NEW YORK ACADEMY OF SCIENCES.—The geological and mineralogy section of this association held a meeting on Oct. 17, at which Prof. J. F. Kemp, of Columbia University, read a paper on "The Copper Mines at Ducktown, Polk County, Tenn." A number of views of the mines and samples of ores were exhibited. This was followed by papers entitled "Notes on Glacial Phenomena of Staten Island," by Prof. Arthur Hollick, Columbia University, and "The Sedimentary Formations of Northern South America," by Francis C. Nicholas.

ENGINEERS' CLUB OF PHILADELPHIA.—At the last meeting of this club, held Oct. 15, Mr. George S. Webster, Chief of the Bureau of Surveys, read a paper on the "Pennsylvania Avenue Subway." This was a statement of the conditions which necessitated a change in the system of carrying the traffic of the Reading R. R. to the Terminal station and the various remedies suggested. The plans adopted and the difficulties encountered in carrying them out were explained. The work was described in Engineering News of April 16, 1896.

FRANKLIN INSTITUTE.—At the last meeting of the Institute, held at the Institute Hall on the evening of Oct. 8, three papers were presented and discussed, as follows: "The Johnson-Lundell Surface-Contact System of Street Railway," Edward H. Johnson, Vice-President and General Manager of the Sprague Electric Co., New York; "An Improved Form of Marine Boiler," Edward J. Moore, Philadelphia, Pa.; "Chimneys for Incandescent Gas Lamps," Ernest M. Moore, Philadelphia; "Some Observations on Scientific and Technical Matters, Gleaned During a Recent Visit Abroad," Prof. Joseph W. Richards, Bethlehem, Pa.

At the meeting of the mining and metallurgical section of the Institute, held Oct. 12, Mr. William Griffith presented a paper, entitled "Anthracite Coal in Peru."

This was a description of the two main coal fields in Northern Peru which produce coal equal in quality to the average of Pennsylvania anthracite. In the first of these, if surface indications are as reliable here as elsewhere, there are very large quantities of coal which are entirely above the water level and can be mined by simply running drifts or tunnels. This enormous coal supply is only 300 miles from the navigable part of the Amazon and 150 miles from the Pacific Ocean. The other, about 100 miles from the first, is on the Chicama River, about 30 miles southwest from Huama Chuco. At this point coal can be traced over a large area. In quality it is also very good, fully equal to the Pennsylvania coal. This bed is only about 100 miles from the Pacific coast.

AMERICAN SOCIETY OF CIVIL ENGINEERS.—The regular meeting of this society was held at the Society House, New York city, Oct. 19, at which a paper by Mr. Arthur L. Adams, on "Stave Pipe—Its Economic Design and the Economy of Its Use," was read. This is abstracted elsewhere in this issue.

After the discussion, the secretary, Mr. Chas. W. Hunt, read a letter from the American Architectural League, inviting the society to attend a meeting of the League to be held on Nov. 1, at 8:30 p. m., at which the question of proper schemes and designs for recreation piers, viaducts and public baths for New York city would be discussed.

The discussion upon "Roads and Road Making," begun at the first fall meeting, will be resumed at the meeting of Nov. 2.

CENTRAL RAILWAY CLUB.—The next meeting of this club will be held at the Hotel Iroquois, Buffalo, N. Y., on Nov. 11, at 2 p. m.

The morning will be devoted to visiting the shops of the New York Central R. R., and the Lackawanna shops at East Buffalo.

Reports will be received from committees on the following subjects: "Perfection of Top-Hinged Oil-Box Lids, so as to more completely exclude dust from journal-boxes, and the relation of a tight-fitting lid to cost of lubrication and number of hot boxes;" "The Most Desirable Material for Diving Boxes, and Should They be Solid or Have a Shell Bearing?" There will also be a discussion on the subject "Which is the more economical, a single nozzle or a double nozzle, and what should be the ratio between height of nozzle and radius of boiler?'

ENGINEERS' CLUB OF ST. LOUIS.—The 447th meeting of this club was held on Oct. 19, with 35 members and visitors present.

A motion directing the representatives of the Engineers' Club of St. Louis on the Board of Managers of the Association of Engineering Societies to bring before the board the question of publishing annually in the Journal a list of all the members of all the clubs belonging to the association was carried. The paper of the evening, by Mr. B. H. Colby, was entitled "Repairs to the Mill Creek Sewer." The section of this sewer is 20 × 15 ft. and its present length is about 25,000 ft. The present dry weather flow is about 40,000,000 gallons. It was begun in 1860 and has been built by piecemeal. The sewer was originally built on a timber bottom and the weight of the side walls has forced up the timber under the center of the sewer. The timber is now being replaced by a concrete inverted arch and the methods employed to effect these repairs were described. Richard McCulloch, Secy.

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.—This society held a regular meeting Oct. 18, at the society's house, 410 Penn Ave., Pittsburg, Pa.

The paper of the evening, on "Transportation of Iron Ore," was read by Mr. E. B. Taylor, Superintendent of Transportation on Pennsylvania Lines West of Pittsburg. This was the first of a series of papers which will be read at the Engineers' Society during this and next year. The subjects of the other papers are as follows: "Manufacture of Pig Iron;" "Foundry Practice;" "Malleable Castings;" "Wrought Iron Making;" "Bessemer Steel, Acid and Basic;" "Open-Hearth Steel, Acid and Basic;" and "Crucible Steel." The authors of these papers will be the chief authorities in each branch, and it is expected that the series of papers will be one of the most valuable ever published on the subject of iron manufacture.

Mr. Taylor's paper contained a great deal of valuable statistical information and was illustrated with numerous drawings, blue prints, and photographs of docks and machinery used in handling the ore.

PENNSYLVANIA STREET RAILWAY ASSOCIATION.—This association held its 7th annual convention at Scranton, Pa., on Oct. 19.

Two papers were read, one on "Parks and Amusements," by E. H. Davis, Williamsport, Pa.; the other, "A System of Collection of Fares and Checking Employees," by A. F. Walter, Allentown. The secretary then read a report on "Standing Rules for Government of Conductors and Motormen," which had been prepared by a committee of the American Street Railway Association. Reports of officers and committees followed, and the meeting closed after selecting Lebanon as the next place of meeting. The afternoon was spent in trolley rides over the local lines, and the evening in enjoying the usual convention banquet.

The officers elected for the ensuing year were Pres., Frank Silliman, Jr.; First Vice-Pres., William B. Given, Lancaster; Second Vice-Pres., Dallas Sanders, Schuylkill Traction Co.; Secy., S. P. Light, Lebanon & Annville Street Railway Co.; Treas., W. H. Lanius, York; Executive Committee, Messrs. Silliman, Light and Lanius, E. C. Felton, Harrisburg, and C. P. King, Pottsville.

AMERICAN INSTITUTE OF ARCHITECTS.—The 32d annual convention of the Institute will be held at the Arlington Hotel, Washington, D. C., on Nov. 1-3.

The programme announced is as follows:

Nov. 1—The consideration of committee reports, reports of officers and the annual address of the President. The afternoon session will be a continuation of that of the morning, luncheon being served in the convention hall during a brief intermission.

In the evening the entire party will inspect the Congressional Library under the direction of Mr. Bernard R. Green, who had charge of its construction.

Nov. 2—morning—"Acoustics," Prof. W. B. Sabine, Harvard University; a communication upon the same, Adolf Cluss, Washington, D. C.; "Some Peculiarities of Timber," Prof. B. E. Fernow, Cornell University; "Some Characteristics of Building Stones," Prof. G. P. Merrill, Washington, D. C. These papers will be followed by committee reports, unfinished business, etc.

Evening—"The Place to be Assigned to Jewish People in Architectural History," Dr. Cyrus Adler, Smithsonian Institute; "General Practice in Regard to the Employment of Electrical, Heating and Sanitary Engineers," H. G. Bradlee, Boston, Mass.

Nov. 3—morning—Reports of committees, unfinished business, election of officers, etc.

A very interesting schedule of excursions has been arranged to occupy the afternoons of the convention days.

WESTERN SOCIETY OF ENGINEERS.—On Oct. 15 there was a second trip to inspect the track elevation work now in progress in Chicago. A special train on the Pittsburg, Fort Wayne & Chicago Ry. carried the party over that line as far as Colehour. On returning, stops were made to enable the party to see the style of masonry and type of bridge floors adopted, and at Englewood some time was spent in examining the work where the road crosses (at grade) the track elevation of the Chicago, Rock Island & Pacific Ry. and Lake Shore & Michigan Southern Ry. As the yard will be raised at this point, it was desired to avoid the obstructions of bridge girders, and there will be a large area of flat steel floors, the plates being riveted to Z-bars resting upon I-beams, supported by masonry walls and steel columns. The P., Ft. W. & C. Ry. uses a ballasted trough floor, and the ballast deadens the noise of trains, so that in the subway underneath only a slight rumbling is heard when a heavy train passes. Near 16th St. a number of the party left the train and walked over to inspect the progress of work at the 16th St. crossing.

A special train for the Omaha exhibition left Chicago on Friday night, Oct. 14, returning Monday morning.

On Oct. 21 there was a "ladies evening," an informal meeting at which Mr. Geo. S. Morison, M. Am. Soc. C. E., delivered a popular lecture on "Masonry," illustrated by excellent stereopticon views of ancient structures in Rome, Egypt and Mexico, temples and reservoir dams in India, and ancient and modern churches, monuments, bridges, etc.

THE AMERICAN GAS LIGHT ASSOCIATION.—The 26th annual meeting of this association was held last week at Niagara Falls, N. Y.

At the opening session, Oct. 19, a committee on nominations was appointed, and later presented the following list: Pres., A. C. Humphreys, New York; Vice-Presidents, G. G. Ramsdell, Philadelphia; E. G. Platt, Des Moines, and W. R. Beal, New York; Secy. and Treas., Alfred Forstall, Montclair, N. J.; Members of the Council, Rollin Norris, Philadelphia; Malcolm S. Greenough, Cleveland, O.; C. H. Dunbar, Elgin, Ill., and S. J. Fowler, Springfield, Mass. These gentlemen were elected.

The address of the President, Mr. J. B. Crockett, San Francisco, was a lengthy treatment of the subject of municipal encroachment upon private enterprise and the damage to gaslight property by electric street railway companies. The afternoon session was occupied by papers on "How Can We Make the Use of Gas More Universal," by H. L. Doherty, Madison, Wis., and "The Loss of Illuminating Power of 25 to 30-Candle Gas When Mixed with Air," by Dr. E. G. Love.

The morning session of the second day of the convention was well occupied in attending to a paper by J. M. Rusby, Jersey City, N. J., on "Depth of Fire in a Water Gas Set," and one entitled "Notes on Mains and Main Laying," by Walton Forstall, Philadelphia. The session closed after selecting New York as the next place of meeting.

At the afternoon meeting two "topics" were considered: "A Gas Engine in a Blowing Plant," H. L. Rice, Norfolk, Va., and "An Experiment with the Shadbolt Self-Enriching Process," Irwin Butterworth, Columbus, O. Mr. A. E. Forstall, the secretary, also read a paper, "Can We Make All Our Business Pay?" and Mr. A. R. Foote closed the meeting with remarks of interest to those present.

The closing day, Oct. 21, was largely given up to excursions and sightseeing trips.

The attendance was large, there being fully 250 present.

CONSTRUCTION NEWS.

CONDENSED LIST OF CONTRACTS PENDING WITH DATE OF OPENING BIDS.

Bids to be opened.	Work. Place.	See Eng. News.
Oct. 27.	Macadamizing, etc., Findlay, O.	Oct. 20
Oct. 27.	Building, Central Islip (L.I.), N. Y.	Oct. 20

RAILWAYS.

ALABAMA & FLORIDA.—P. J. Gantt, River Falls, Ala., informs us that all of the grading is about completed and ready for track-laying on this proposed line from Georgiana to River Falls, a distance of 30 miles. The capital necessary for completion has been secured. R. M. Quigley & Co., of St. Louis, Mo., are the contractors. Pres., E. L. Moore, River Falls, Ala.; Ch. Engr., Charles Seymour, Georgiana, Ala.

ALLEGHENY JUNCTION.—This company was incorporated in Pennsylvania, Oct. 19, with a capital stock of $5,000, to construct a connecting link of steam railway in Pittsburg. The incorporators are: A. H. Keith, Pres.; V. L. Crabble and W. P. Potter, of Pittsburg; J. W. Anderson, Allegheny, Pa.

ATCHISON, TOPEKA & SANTA FE.—Press reports state that this company has purchased a controlling interest in the San Francisco & San Joaquin Valley Ry., and that a new line will be built from Mojave to Bakersfield, Cal., parallel to the Southern Pacific Ry., and thus obtain an entrance into San Francisco. If this project be carried out, it is thought that the construction of the proposed line between Bakersfield and Los Angeles will be abandoned. Robert Watt, 1st Vice-Pres., San Francisco & San Joaquin Valley, San Francisco, may give further information.

ATLANTIC COAST LINE.—Bids are asked by this company until Nov. 4 for the grading and trestle work on the extension of the Charleston & Western Carolina branch from Denmark to Robbins, N. C., a distance of 34.7 miles, as stated in our advertising columns. F. Gardner, Ch. Engr., Wilmington, N. C.

CANTON, ABERDEEN & NASHVILLE.—C. D. Smith, Birmingham, Ala., informs us that all the surveys have been made and practically all of the right of way obtained for this new line between Aberdeen, Miss., and Winfield, Ala., via West Point, a distance of 68 miles. C. D. Smith & Co., of Birmingham, have the contract for the bridging and ties for the first ten miles, which has been sub-let; good progress is being made on the work. David Sloan, Ch. Engr., Chicago, Ill.

CHARLESTON, CLENDENNIN & SUTTON.—Press reports state that $3,000,000 of this company's bond have been disposed of to an English syndicate, and the proposed extension will be built at once. The projected route is from Clay Courthouse to Sutton, W. Va., a distance of about 48 miles. J. Wainwright, Gen. Mgr., 14 South Broad St., Philadelphia, Pa.

DALLASTOWN.—D. F. Lafean, Pres., York, Pa., informs us that a preliminary survey has just been completed for this proposed 1 1-10-mile line of railway near Dallastown, Pa., and that the location will probably be made this week and the work then rushed to completion. The incorporation of this comapny was noted in our last issue.

EASTMAN & OCMULGEE RIVER.—This company has been organized, according to reports, with a capital stock of $25,000, to construct about 18 miles of railway from Eastman to a connection with the Georgia & Alabama Ry. J. B. Caldwell, Eastman, Ga., is interested.

ENGLAND.—Bids are asked until Oct. 31 for supply of (a) Fairlie engines, (b) flexible buffers and screw couplings, for the Burma Railways Co., Ltd. Address the company at 76 Gresham House, Old Broad St., E. C., London.

FLORIDA.—Strickland & Wesley, Point Washington, Fla., inform us that nothing has yet been done towards constructing a railway through their timber lands, but that they are willing to give a free right of way and to assist in building such a line.

GREAT NORTHERN.—Reports state that work has been commenced at Cambridge, Minn., on the Eastern Minnesota cut-off intended to shorten the distance between St. Paul and Duluth by about 30 miles. It is expected that about 60 miles of new track will be built for use next year.——Surveys have been made for a possible extension of this line from a point near Wanatchee, Wash., to Lakeside, at the southern end of Lake Chelan. N. D. Miller, Ch. Engr., St. Paul, Minn.

GUADALOUPE VALLEY.—It is announced that the stockholders of this company have authorized the issuance of $16,000 in bonds to the mile, and that track-laying will commence from O'Connersport, Tex., within 30 days. The line will pass through Yoakum, Tex., which has granted the required bonus. Pres., Uriah Lott, Victoria, Tex.

GULF, TEXAS & NORTHERN.—L. W. Lloyd, Vice-Pres., Marshall, Tex., informs us that the surveys have been made and the right of way procured and completed from Orange to Marshall. Capital for construction has been secured, but no contracts have yet been awarded. The proposed route is from Orange to Marshall, via Jasper, San Augustine, Center, Tenaha and Carthage, a distance of 200 miles. Pres., D. C. Plumb, Marshall; Ch. Engr., C. S. Breckenridge, Orange.

HAWKINSVILLE, FITZGERALD & GULF.—Reports state that an application will be made to the next legislature of Georgia for a charter for this proposed railway from Hawkinsville to the Gulf of Mexico, via Rochelle and Fitzgerald, Ga. R. V. Bowen, of Lulaville, Ga., and P. H. Fitzgerald, of Indianapolis, Ind., are said to be interested.

HOLLY RIVER & ADDISON.—George A. Hechmer, Palmer, W. Va., informs us that surveys have been completed for the present, and that all the right of way has been practically obtained. The work is being done by the company, which has completed from ten to twelve miles of grading and two miles of track-laying. The projected route is from Palmer to Addison, via Holly, Removal, Diana and Jumbo, a distance of 23 miles. Pres., John T. McGraw, Grafton, W. Va.; Ch. Engr., T. G. Baylor. Palmer, W. Va.

JONESBORO, LAKE CITY & EASTERN.—W. H. Stevens, Audr., Jonesboro, Ark., informs us that 20 miles of this proposed line from Nettleton to Monette, via Jonesboro and Lake City, Ark., 30 miles, have been completed, and that the ten remaining miles are under construction. All the work is being done by the company. Pres., J. E. Jones; Ch. Engr., C. M. Ferguson, both of Jonesboro.

MINNEAPOLIS, ST. PAUL & SAULT STE. MARIE.—Thomas Greene, Ch. Engr., Minneapolis, Minn., informs us that this company has just completed an extension from Kulm, La Moure county, to Hebard, at the north line of Emmons county, a distance of 77 miles. The new line was to be opened for traffic on Oct. 17. Pres., Thomas Lowry, Minneapolis.

MONROE.—Wm. B. Reily, of the Monroe Ry. & Construction Co., Monroe, La., informs us that the locations have been completed for this proposed line from Monroe to Nachitoches, via Winnfield, La., a distance of 80 miles. The capital for construction, however, has not yet been secured, and until it has been, work will not be commenced. Pres., L. D. McLane, Monroe; Ch. Engr., Ira W. Sylvester, Alexandria, La.

NASHVILLE, CHATTANOOGA & ST. LOUIS.—Contracts have been let, according to reports, for constructing a 6-mile extension of this line on its Middle Tennessee & Alabama division. This company has reballasted about 100 miles of road and rebuilt about four miles of trestle work.

NATCHEZ & GULF.—L. N. Dalgarn, Natchez, Miss., informs us that, at the last meeting of this company, the president was authorized to issue bonds and to place mortgages on the road for the construction of the same. Surveys have all been made and considerable right of way obtained, and there are fair prospects of the line being built at once. The route is from Natchez via Lumberton, Miss., to a connection with Gulfport, over the Gulf & Ship Island R. R. Pres. Hardy, Meridian, Miss., may be addressed.

NEW YORK & OTTAWA.—F. D. Anthony, Ch. Engr., Cornwall, Ont., informs us that the track on the 15-mile extension of this line from Moira, N. Y., north to the St. Lawrence River, has been laid and was put in operation on Oct. 17. The bridge over the north channel of the river lacks only the north cantilever to complete it, and the work of removing the wrecked spans of the south channel bridge is being pushed with a view to the earliest restoration possible; each bridge is 1,125 ft. in length. In addition to the old line between Moira, on the Ogdensburgh & Lake Champlain Ry., and Tupper Lake, 56½ miles, the company now operates the above extension to the St. Lawrence River and, on the Canadian side, a new line from Cornwall to Ottawa, Ont., 53 miles. An extension from Tupper Lake to North Creek, a distance of about 50 miles through the Adirondack region is also contemplated, as a connection with New York can thus be made via Saratoga, rather than as at present via Utica.

NORTON BAY & YUKON RY. & NAVIGATION.—F. A. Hill, Ch. Engr., National Bank Bldg., Seattle, Wash., informs us that a preliminary survey line for the 76-mile railway which this company proposes to build in the Yukon district has been run from a point 45 miles northeast of St. Michael, Alaska, to the Yukon River, 35 miles below Nulato. The United States government gives right of way. An English syndicate has promised to furnish necessary capital so as to construct the line in 1899. Pres., E. A. Gardner, Seattle.

OHIO.—We are informed that the following bids were received by the commissioners of water-works of Cincinnati, Oct. 18, for the construction of a railway track and delivery of track material on the water-works grounds; all local bidders; Clk., Chas. S. Roth:

Quantities.		Edw. W. White.	Louis Drach.	J. J. Smith.
Track on graded roadbed	4,200 lin. ft.	$6,048	$7,560	$8,610
On viaduct	650 " "	787	748	878
Switches, complete	2 sets	390	125	347
Steel rails	4 tons	88	100	102
Joints	15 pairs	18	9	7
Spikes	300 lbs.	9	6	6
Cross ties	75	37	75	59
Total		$7,378	$8,623	$10,008

OKLAHOMA.—A charter has been received by C. Richards, S. James, T. H. Martin and W. W. Gregory, of Tonkawa, Okla., and C. F. Leech, of Arkansas City, Kan., to organize a construction company to extend the railway from Braman to Tonkawa, by way of Kay Center. It is understood that the work of building will begin soon. The new road will open to outside trade a large wheat belt, which, heretofore, was compelled to haul its product by wagon to the Atchison, Topeka and Santa Fe Ry., a distance of 45 miles.

OMAHA BRIDGE & TERMINAL.—Reports state that this company is planning to extend its lines to complete connection with all of the other roads entering Council Bluffs, Ia. J. A. L. Waddell, Ch. Engr., Kansas City, Mo.

PORTSMOUTH & YORKTOWN.—This company has been incorporated, with a capital stock of $25,000, to construct a railway from Portsmouth to Yorktown, O. The incorporators are L. D. York, B. F. Vincent, and others, with offices at Portsmouth.

RICHMOND, PETERSBURG & CAROLINA.—Gen. Jas. S. Negley, Vice-Pres. and Gen. Mgr., 141 Broadway, New York, informs us that the first 20 miles south of Petersburg, Va., has just been completed and will be operated as a freight and passenger line without delay. Along this new route there is much valuable timber land, and it is reported that a number of new saw mills have already been established. The completion of the entire line, to a connection with the Seaboard Air Line at Ridgeway, N. C., will be pushed with energy.

ST. LOUIS, KANSAS & SOUTHWESTERN.—Reports state that this railway was sold at auction at Arkansas City, Kan., Oct. 22, to Samuel Baker, of Hamilton, O., representing the creditors, at $150,000. The line is 60 miles long, running from Arkansas City to Anthony. Francis S. Eaton, Gen. Mgr., Arkansas City.

TACOMA & COLUMBIA RIVER.—This company was reorganized in Tacoma, Wash., Oct. 21, according to reports, with the folowing officers: Pres. and Gen. Mgr., William Bailey, 66 Broadway, New York; First Vice-Pres., and Asst. Gen. Mgr., Samuel Collyer; Secy., E. G. Dorr; Treas., Calvin Phillips; Ch. Engr., W. O. Holliday; Supt., E. G. Dorr. It is said that new capital has been secured and that construction work will be rushed at once.

WILMINGTON & NORTHERN.—It is announced that this railway has been bought by the Philadelphia & Reading Ry. Co., and not the Baltimore & Ohio R. R. Co., as previously stated.

STREET AND ELECTRIC RAILWAYS.

CARIBOU, ME.—Reports state that a preliminary survey is being made for the location of an electric railway from Caribou to Van Buren, and that John P. Donworth, of Caribou, is interested.

WESTBORO, MASS.—The Westboro, Hopkinton & Milford St. Ry. Co. has been organized with a capital stock of $80,000, to construct an electric railway eight miles in length, via Woodville and Hopkinton. It is expected to obtain the necessary franchises and to begin work in time to operate the line next summer. The temporary board of directors comprise Melvin H. Walker, Westboro; Frank W. Wood, Hopkinton; Edgar K. Ray, Franklin; Wm. S. Reed, Leominster, Mass.; Wm. H. Tylee, Worcester, Mass.; William S. Reed, Leominster; Joseph G. Ray, and Edgar K. Ray, Franklin, Mass.

BRISTOL, R. I.—We are informed that the surveys have been completed, the right of way obtained and the contract awarded to the Lap Joint Railway Track Co., 11 Broadway, New York, on Oct. 11, for the construction of the proposed 4-mile electric railway from Ferry Fall River, Mass., to Mount Hope, and from Mount Hope to Bristol, for the Bristol Land & Investment Co. Work is to be completed and road equipped by May 1. Pres., W. B. D'Wolf, Bristol; Ch. Engr., J. A. Latham, Providence, R. I.

CATSKILL, N. Y.—The board of trustees has granted permission to the Catskill Electric Ry. Co. to lay tracks on the village streets provided that a 70-lb. T-rail 4½ inches in height be used.

MARION, N. Y.—We are informed that the surveys have been made for the proposed Wayne Central R. R., between Marion and Palmyra, six miles. The company has not yet been incorporated, but will probably be soon. Electric motive power will be used. Le Grand Brown, Ch. Engr., Rochester, N. Y.

MOUNT VERNON, N. Y.—It is reported that the electric railway between this city and Yonkers will be double tracked at once, owing to greatly increased traffic over the line. This line is said to be under the control of the Union Traction Co. of New York.

NEW YORK, N. Y.—Reports state that compressed air, and not the underground system of electricity, will be used as the new motive power on the 28th and 29th St. lines of the Metropolitan St. Ry. Co.

NYACK, N. Y.—B. F. Sweeten & Son, Camden, N. J., are reported to have been awarded the contract for the necessary track-laying, trestle work and excavation for the proposed line of the Nyack Traction Co., to cost about $35,000. W. G. Mendenhall & Co., Philadelphia, Pa., received the contract to furnish the cars and rails, to cost about $40,000. Other contracts were to be awarded. The power house will be a brick structure, having an engine room, 60 × 55 ft., and a boiler room, 30 × 55 ft., and two 300-HP. engines will be installed. The general contract is held by Isaac A. Walker & Son, Stephen Girard Bldg., Philadelphia, Pa. Pres., Henry C. Howard, Chester, Pa.

ROME, N. Y.—A plan is under consideration for the organization of a new corporation to supplant the Rome City St. Ry. Co. and to build and operate an electric railway system in and about the city on an extensive scale. The old line is 6.7 miles in length and is operated by horse power. J. G. Lieper, G. W. Chance and T. Blume, all of Philadelphia, Pa., are said to be interested. Pres., John S. Wardell, 115 John St., Rome.

PERTH AMBOY, N. J.—The Perth Amboy R. R. Co. was incorporated in New Jersey, Oct. 24, with a capital stock of $30,000, with all paid in, to construct a railway in this town. The incorporators are: Leonard Lewisohn, Adolph Lewisohn, Charles J. Hittenberg, of New York; James C. McCoy, Geo. J. Haney, Wm. E. Tobey, C. P. Sells, and Wesley J. Havell, of Perth Amboy. Principal office at 258 Smith St., Perth Amboy.

WOODBURY, N. J.—The National Park Association is said to be about to award contracts for the construction of a trolley line from the railway station to National Park.

ALLENTOWN, PA.—We are informed that no arrangements have yet been made for the construction of the proposed electric railway of the Inland Traction Co., whose incorporation was noted in our last issue, from Sellersville to Landsdale, via Telford, Souderton and Hatfield, a distance of 12 miles. Pres., John H. Pascoe, of Allentown. Address J. B. Aldefer, Souderton, Pa.

FREEMANSBURG, PA.—Warren R. Roberts, of Freemansburg, informs us that Pascoe & Crilly, contractors, of Allentown, Pa., have made an application for the right of way through this town. If granted, it is expected to build an electric line to connect with that of the Allentown Traction Co., at South Bethlehem. The ordinance has passed its first reading.

JOHNSTOWN, PA.—N. F. Thompson, Secy. of Board of Trade, informs us that the right of way for the proposed 8-mile electric railway of the Johnstown & Somerset Traction Co. has been secured for that portion outside of the city limits. Capital for construction has been secured and work will commence as soon as city franchise has been granted, which is expected within the next 30 days. Pres., Morris Wolf, Johnstown, Pa.

PHILADELPHIA, PA.—It is announced that the construction of the Philadelphia, Castle Rock & West Chester Electric Ry. is being pushed forward with all haste, and tracks are now laid right up to Milltown. Within three or four weeks it is expected that the rails will have been laid right to the terminus at Gay and Matlack St., West Chester.

RICHMOND, VA.—G. E. Detwiler, Chn., of Truxillo, Va., informs us that the proposed Richmond & Tidewater Ry. will be owned largely by the counties through which it is expected to pass, and in consequence no election will be held to appoint officers until the subscriptions required are voted by the counties at the November elections. The length of the line will be about 120 miles, though permanent surveys have not yet been made; motive power will be electricity.

ALLIANCE, O.—Hugh Berkley and C. W. Kieff, of Alliance, are said to be interested in the construction of an electric railway to be built between Alliance and Akron, which is to enter Akron over the lines of the Akron St. Ry.

CLEVELAND, O.—E. G. Tillotson, of the Cleveland Trust Co., Cleveland, informs us that the Cleveland & Eastern R. R. Co. has secured 20 miles of private right of way and has eight additional miles promised for its proposed electric line from Cleveland to Charden, Burton and Chagrin Falls, via Fullertown, O., a distance of 43 miles. Grading has been completed for 12 miles, and 14 miles are under construction. There have been 50,000 ties ordered, delivery to commence Nov. 1, also the rails, rail connections and spikes. Pres., H. P. McIntosh, the Guardian Trust Co.; Ch. Engr., W. C. Jones, Wade Bldg., of Cleveland.

PORTAGE, O.—The council has granted a franchise for the proposed electric railway which is to be built at once by Contractor Leach, Monroe, Mich.

CARTHAGE, MO.—Frank E. Moore, of Carthage, informs us that the controlling interest in the Southwest Missouri Electric Ry. Co., amounting to $336,200, has been sold to Pennsylvania parties. The new directors are, A. H. Rogers, Pres., Joplin, Mo.; E. Z. Wallower, A. G. Kniseley, E. C. Felton, H. L. Hershey, and others, of Harrisburg, Pa.

BEAUMONT, TEX.—The city council on Oct. 18 passed an ordinance granting to John C. Ward and others a 50-year franchise for an electric railway on the streets of Beaumont.

VICTOR, COLO.—Reports state that the motive power on the Gold Belt Line, now about eight miles in length, will soon be changed from steam to electricity, power to be derived from the power plant in course of construction at Goldfield.

SANTIAGO, CUBA.—Press reports state that a franchise for building an electric railway from Santiago to the cemetery and to El Caney has been granted by General Wood to prominent local business representatives.

HONOLULU, HAWAII.—The Honolulu Rapid Transit & Land Co. has recently been organized, according to reports, for the construction of an electric railway. Pres., L. A. Thurston; Vice-Pres., J. B. Castle; Secy., J. A. Gilman; Gen. Mgr., C. G. Bellentyne.

PERTH, WESTERN AUSTRALIA.—We are informed that J. G. White & Co., Engineers and Contractors, 29 Broadway, New York, are preparing plans for a car barn and power house for a company with offices at London, England, which proposes to construct electric tramways at Perth. J. G. White & Co. will also superintend the construction work, and will purchase for the company rails and other necessary materials for track construction and equipment. Babcock & Wilcox will furnish the boilers; the Robb Engineering Co., Amherst, N. S., tandem compound condensing engines; J. G. Brill & Co., cars and trucks. The rails and special work will be of American manufacture, but have not yet been purchased; the rails will be 6-in. and 9-in. girder sections; the special work will be 9-in. girder sections. Part of the road will be paved with Jarrah wood blocks. Contracts for the structural work, including roof trusses for buildings, will be let in the United States as soon as plans have been prepared. Ten miles of single track, with turnouts, will be built at once. The extensions. amounting to over ten miles additional of single track, will then be built, and additional cars and power house equipments will be shipped. The single track will be laid with a view of double tracking a large part of the system in the near future.

ELECTRIC LIGHT AND POWER.

WINN, ME.—M. F. Scott, Clk. Winn Water & Power Co., recently incorporated, writes us that nothing has been done as yet in regard to the proposed plant.

BEVERLY, MASS.—Luther S. Herrick, Cy. Clk., writes us that a report for a municipal plant has been made to one branch of the council. It will have to be accepted by both branches of the council for two successive years and then submitted to the voters.

BOSTON, MASS.—We are informed that the following bids were received Oct. 22 for furnishing the machinery and installing the electric plant at Grover's Cliff, Mass., and at Nantasket Head, Mass.: all bidders, of Boston, except N. J. Foundry and Machine Co.; U. S. Engr., Col. S. M. Mansfield, Boston:

Bidder.	Grover's Cliff.	Nantasket Head.
Electric Storage Battery Co., 60 State St*	$1,468	$1,468
General Electric Co., 180 Sumner St	3,295	3,650
G. M. Angier & Co., 64 Federal St.†	2,385	2,610
	2,315	2,540
Bibler-White Co., 49 Federal St	3,659	3,434
	3,709§	3,484
Almon, Sargent & Conant, Equitable Bldg.	3,925	4,175
N. J. Foundry & Machine Co.,New York‡	3,549	3,772
	3,395	3,620
Lord Electric Co., 181 Tremont St.‖	3,972	4,392
	4,074	4,494
	3,875	4,295

*Incomplete; storage battery only. †Electric storage battery and Hatch storage battery, respectively. §Cell terminals connected by burning lead. ‡Steam engine and oil engine, respectively. ‖Westinghouse apparatus and Hatch apparatus, respectively.

SALEM, MASS.—The council is considering the question of building a municipal plant. The present contract expires at the end of the year.

SOMERVILLE, MASS.—Councilman Jas. F. Davlin writes us that the matter of constructing a municipal plant has been advanced one stage by its being adopted by one branch of the council. If it passes next year's board it will go to the legislature, and if favored there it will be submitted to the voters for their approval.

CROMWELL, CONN.—We are informed that nothing definite has yet been done in regard to the proposed plant. A little later a plant may be established in connection with the water-works of the Cromwell Water Co. Engrs., Shedd & Sarle, Providence, R. I., and Cromwell, Conn.

CHARLOTTE, N. Y.—We are informed that the following bids were received Oct. 15 for furnishing the machinery for the electric plant, as advertised in Engineering News: Westinghouse Electric & Mfg. Co., Pittsburg, Pa., with Atlas engines, Fairbanks belting and shafting, 16,000 alternations incandescent dynamo, $8,050; 7,200 alternations incandescent dynamo, $8,200; Machinist Supply Co. belting and shafting, 16,000 alternations, $8,300; 7,200 alternations, $85,450; Machinists' Supply Co., Rochester, N. Y., belting and shafting only, $998; Fort Wayne Electric Corporation, Fort Wayne, Ind., station equipment (dynamo No. 7) and arc lamps, $3,562; and F. P. Little Electric Construction & Supply Co., Buffalo, N. Y., engines, $1,325; belting and shafting, $1,070; dynamo and lamps, $3,975; line work, $3,850; total, $10,220. The contract was let to the Westinghouse Co. Engrs., Stanwix Engineering Co., Rome, N. Y.

CHATHAM, N. Y.—We are informed that J. M. Klingelsmith, Pres. Chatham Electric Light, Heat & Power Co., has purchased the mill and water power of H. C. Spengler on Kinderhook Creek and will develop about 1,500 HP. for power purposes and will operate his plant in Chatham from there.

HERKIMER, N. Y.—Bids are asked until Oct. 29 for installing an incandescent light plant, to cost about $13,000. The plant will be completed Dec. 20. Clk. Municipal Comn., E. W. Sluyter; Pres., C. R. Snell.

HUDSON, N. Y.—Bids are asked until Nov. 3 for furnishing and installing electric light and gas fixtures at the state armory building. State arch., I. G. Perry, Albany and Binghamton, N. Y. Address J. Rider Cady, 10 South 4th St., Hudson.

MIDDLEPORT, N. Y.—Our correspondent informs us that the village trustees have decided to contract for a plant. A new law authorizes them to arrange for an annual expenditure to a certain limit, and it is believed that the lights can be supported within this limit.

OXFORD, N. Y.—The Binghamton Electrical Construction Co., Binghamton, N. Y., has been awarded the contract for wiring the dormitory to be erected at the Woman's Relief Corps Home.

TRENTON ,N. J.—John T. Dryden, Pres. Prudential Insurance Co., Newark, N. J.; Col. A. R. Kuser and Judge R. S. Woodruff, Trenton, are reported as interested in the proposed power plant on the Delaware River. Certain rights have to be purchased from the Trenton Water Power Co. and the Delaware River Improvement Co. The proposed wing dam will cost about $100,000.

LEBANON, PA.—Bids are asked until Nov. 7 for furnishing the city with 125 2,000-c. p. arc lights for a term of five or ten years from June 1, 1899. Chn. Police Com., Geo. B. Schock.

PHILADELPHIA, PA.—Wm. Dougherty, 1604 Sansom St., is reported as receiving bids for a 2-story addition to a power house.

BALTIMORE, MD.—We are informed that bids for putting in the proposed subways and conduits for the electric wires, except those of the trolley lines, will be asked in about two weeks; estimated cost, $1,000,000. Asst. Engr., Chas. G. Edwards; Ch. Engr., Chas. E. Phelps, Jr.

BALTIMORE, MD.—Local papers state that the court-house commission on Oct. 19 awarded the contract for dynamos, engines, etc., needed for lighting and electric power in the new court-house to Cohen & Staughton, Baltimore, at $12,226. Col. Theo. F. Lang, Supt. of Bldgs., has recommended that a plant be put in the basement of the city hall; estimated cost, about $30,000.

NEWPORT NEWS, VA.—The sale of the Newport News, Hampton & Old Point Ry. to the Newport News & Old Point Ry. Co., involving about $750,000, was arranged last week, and the title will pass in a few days. The new company recently purchased the electric light plant at Hampton and recently secured a franchise for the erection of a plant at Newport News also, and it is understood will purchase some electric light and power machinery.

HARPERS FERRY, W. VA.—John A. Liners, Gettysburg, Pa., has been granted a franchise. The plant will be completed in December.

ASHEBORO, N. C.—John T. Moffit is reported as interested in the proposed plant.

DURHAM, N. C.—V. Ballard, Mgr. Durham Electric Lighting Co., writes us that the company will put in additional 1,200-light alternator and 30-light arc dynamo; present light-house will be enlarged. The dynamos have already been purchased and the work begun at once. One plant furnishes both arc and incandescent lights, but no power.

GREENSBORO, N. C.—B. S. Johnson, J. H. Lee and H. P. Jones, Baltimore, Md.. and R. R. King, Greensboro, propose to build a plant in this place.

RALEIGH, N. C.—Geo. Allen, Secy. Chamber of Commerce, writes us that the matter of improving the plant is awaiting the subscription of about $50,000 before any work can be done. The property has 5,000 HP. ready for use.

SALISBURY, N. C.—The council has granted a franchise for a plant to F. E. Boordman, Salisbury. The power will be secured from the proposed power plant to be built on the Yadkin River, near Salisbury. The Baltimore Loan & Trust Co., Baltimore, Md., it is stated, will furnish the capital.

ORANGEBURG, S. C.—J. G. Wannamaker writes us that it will probably be 30 days before the council will be ready to receive bids for constructing the plant and water-works, to cost about $40,000.

PORT ROYAL, S. C.—We are informed that the following bids were received by the bureau of yards and docks, Washington, Oct. 22, for constructing a plant at the naval station:

J. F. Buchanan, Philadelphia, Pa.	(1) $18,888
McCay Engineering Co., Baltimore, Md.	(2) 20,979
Ft. Wayne Electric Corporation, Fort Wayne, Ind.	19,700
J. P. Hall, New York, N. Y.	19,900

(1) Also 11 conditional bids ranging from $19,181 to $21,633; (2) also three conditional bids ranging from $19,650 to $21,760.

KEY WEST, FLA.—J. L. Watrous, it is stated, has asked for a franchise for a plant, street-way and telephone plant.

MIAMI, FLA.—The question of building a plant is being considered, according to reports. J. A. McDonald may furnish information.

YAZOO, MISS.— The question of building a plant, water-works, etc., is being discussed, according to reports.

FRANKLIN, TENN.—D. F. Gardner is reported to have purchased a site for a power house and light plant.

WOODSFIELD, O.—This place voted Oct. 22 on the question of building a plant.

WOOSTER, O.—An election will be held Nov. 8 to vote on the question of issuing $25,000 in bonds for a plant.

VINCENNES, IND.—Bids are asked until Jan. 2 for lighting the streets and public places with 2,000-c. p. arc lights for a period not to exceed 20 years from Dec. 25, 1900; also to furnish commercial and private lighting. Mayor, Geo. E. Greene.

JONESVILLE, MICH.—W. M. Wetmore, Village Clk., writes us that this place voted Oct. 10 to issue $10,000 in bonds for a plant and $18,000 for water-works. The plant will be operated in connection with the water-works. The pole line of the present lighting company was purchased. Up to Oct. 22 no engineer had been engaged to prepare plans and specifications.

ST. JOSEPH, ILL.—It is reported that the contract for the construction of the new electric lighting plant at St. Joseph, to furnish 500 incandescent lights, has been awarded to T. C. Reed, of St. Louis, Mo., at about $5,000. It is stipulated that the plant shall be completed and turned over to the village authorities in 90 days.

BALDWIN, WIS.—The Baldwin Electric Light Co. has been granted a 10-year franchise. The plant will be built at once. Arthur Peabody and Andrew Sabley are interested.

GREEN BAY, WIS.—The council will probably soon ask for bids for lighting the city with electricity, according to reports. The present contract with the Green Bay Gas & Electric Light Co. expires in May. Cy. Clk., W. Kerr.

TOWER, MINN.—The council has granted a 10-year extension to the franchise of the Tower Electric Light & Telephone Co. It is stated that a new plant will be built. Pres., Geo. H. Clayton.

WINNEBAGO CITY, MINN.—Bids are asked until Nov. 2 for installing a plant, to cost $8,000. Engr., W. J. Bonwell, 1013 Pioneer Press Bldg., St. Paul, Minn.; Pres. Council, A. C. Dunn.

EMMETSBURG, IA.—L. Stanhiner, Mayor, writes us that this city voted Oct. 20 to grant a franchise for a plant to John McNamara, Fulton, Ill.

HERINGTON, KAN.—J. T. Chapell, of Sherman, Tex., is reported to have leased the plant owned by this place.

WICHITA, KAN.—The council has been petitioned to call an election to vote on the question of issuing bonds for a plant. Mayor Roos may be addressed.

MARYVILLE, MO.—The question of a municipal plant and water-works is reported as being considered.

CREDE, COLO.—Press reports state that the plant, recently burned, will soon be rebuilt.

SHERIDAN, MONT.—The council is reported to have decided to build a plant.

BREMERTON, WASH.—Bids are asked until Oct. 29 for installing a plant at the naval station, Puget Sound, Bremerton; appropriation, $9,800. M. T. Endicott, Ch. Bureau Yards and Docks, Washington. D. C.

BAKERSVILLE, CAL.—Press reports state that the Kern-Rand Co. has filed on 10,000 ins. of water at the lower end of the Manache meadows, where a site for a dam has already been located. It is the intention to put in a 50-ft. dam, and impound the waters of Kern River, using the meadow as a reservoir and carrying the waters out by means of ditches, flumes, etc. The principal use to which the water will be put will be the generating of electricity. Electric power so developed will be conducted to Randsburg and Los Angeles and intermediate points.

VISALIA, CAL.—Bids are asked until Nov. 9 for the purchase of a franchise for operating wires along the roads of Tulare county. Clk., Wm. H. Hammond.

PROVO, UTAH.—J. B. Keeler, Chn. Com., writes us that R. M. Jones, Salt Lake City, is preparing plans and specifications for the proposed plant. It will have a capacity for about 80 2,000-c. p. arc lights and will be operated by water power. Bids will be asked in about a month.

OTTAWA, ONT.—Press reports state that the Metropolitan Electric Co., recently incorporated, has purchased a water power at Britannia, six miles above the city, for about $20,000. The capacity is understood to be 40,000 HP. Work will be completed next spring, but the company will not wait till then to sell light in the city, for it intends to use another power inside of two months to begin operations. A. B. Broderick, and T. Linsay, Ottawa, and Jas. Robinson, Montreal, Que., are interested.

CAMBELLTON, N. B.—Bids are asked until Oct. 26 for furnishing the machinery and installing a plant. Chn. Com., W. W. Doherty.

MONTREAL. QUE.—Barry, Ross & McRae, of Niagara Falls, Ont., are reported to have been awarded the contract for building the dams, canal, etc., for the proposed plant at the falls on the Jacques Cartier River, at the outlet to Lake St. Joseph, about 20 miles from Quebec. Work has already been begun and it is stated that it will be completed by March 15. A company, composed of New York capitalists has been organized, with a capital stock of $500,000.

TEPEC, JALISCO, MEX.—The city authorities are reported as negotiating for a plant for this city; population (1895), 12,000.

KNOWLE (FAREHAM), ENGLAND.—Bids are asked until Nov. 16 for furnishing and installing two engines and dynamos, equal to an output of 24,000 watts each, together with all necessary washing machinery, lathe, drill, motors, lamp installations, etc., required in connection with the centralization and increase of the light, heat and power generating plant at the County Lunatic Asylum, Knowle, Fareham. W. J. Taylor, County Surv., The Castle, Winchester.

QUITO, ECUADOR.—It is stated that Mr. Riendenburg, Consul for Ecuador, in Cincinnati, is securing information about motors and electrical machinery in general.

JOHANNESBURG, SOUTH AFRICA REPUBLIC.—Bids are asked by the general manager of the lighting department until Jan. 6 for furnishing a complete carbureted water gas plant. Specifications may be secured from Robt. Whyte & Co., 22 Bury St., St. Mary Axe., E. C., London, England.——Press reports state as follows regarding work in South Africa: A contract for the electric lighting installation for the Pretoria Theater has been placed with an American firm, the Johannesburg town council having been empowered to raise $750,000 for electric lighting purposes, two-thirds of which sum will be devoted to the purchase of new machinery, street extensions and other works; thus opportunity for the securing of some valuable orders should be afforded. A company with a capital of $25,000 has been formed at Ledysmith, Natal, for promoting the electric lighting of the town. Everything is required for this plant, and American competition will be considered. The electric lighting and tramway installation for East London and the electric lighting of the Grahamstown exhibition, besides the installation of an electrical equipment of a large building in Johannesburg and the electric plant for the Bank of Africa's branch at Lorenzo Marquez, are to be carried out by the firm of Reunent & Leuz, of Johannesburg.

NEW COMPANIES.—Northwestern Electric Heat & Power Co., Macon, Mo.: $30,000; F. W. Blees, John F. Schafer, Charles E. Roehl.

Electric Current Co., Brooklyn, N. Y.; $3,000; John W. Cleary, 186 Remsen St., Brooklyn.

Lake City Power Co., Lake City, Colo.; $50,000; David K. Lee, B. Gibson, Frank C. Gaudy.

Waterbury Battery Co., Waterbury, Conn.; $10.000; C. M. Platte, Lewis A. Platte, Chas. B. Schaemuchl.

Council Bluffs Gas & Electric Co., 60 Grand St., Jersey City, N. J.; $250,000, of which $1,000 is paid in; Hunter Wykes, Victor Cumberson, Wm. B. Hord.

Northern Development Co., Bangor, Me.; $1,000,000; to furnish Indian townships, Nos 1 and 2, Penobscot county, with water, electric lights and heat and of supplying electric power for factories and other industries; Henry M. Prentiss, Bangor; Chas. W. Mullen, Old Town, Me.

Darby-Lansdowne Electric Co., Darby, Pa.; $1,000, with $100 paid in; Treas., T. P. Street; Edwin B. Lewis, Lansdowne.

Clifton-Lansdowne Electric Co., Clifton Heights, Pa.; $1,000, with $100 paid in; Treas., T. P. Street, Lansdowne; N. Y. Mitchell, Philadelphia, Pa.

Yeadon-Lansdowne Electric Co., Yeadon, Pa.; $1,000, with $100 paid in; Treas., Edwin B. Lewis, Lansdowne.

Standard Electric Construction Co., Rochester, N. Y.; $5,000, with $500 paid in; Edgar H. Freeman, Walter H. Tobey, Burton A. Vandy, Rochester.

Wyoming Valley Electric Light, Heat & Power Co., Wilkes-Barre, Pa.; $500; Eugene W. Milligan, Wilkes-Barre; Will P. Billings, Kingston, Pa.; Edward C. Jones, New York.

BRIDGES.

BENNINGTON, VT.—The Vermont Construction Co., St. Albans, Vt., has been awarded a contract for constructing two or three iron bridges, 140 × 16 ft. at $9,706 each. There are also four smaller bridges that will have to be built. Col. J. H. Walbridge, First Selectman.

ALBANY, N. Y.—Reports state that plans are being prepared by the New York Central & Hudson River R. R. Co. for the construction of bridges at Livingston Ave. and at Spencer St.

HOOSICK, N. Y.—Dean & Westbrook have submitted the lowest bid to the town board, at $1,492, for constructing an iron bridge at North Hoosick, with a 110-ft. span.

McKEES ROCKS, PA.—The city clerk informs us that no steps have yet been taken toward the construction of a bridge at Turners Station and Pittsburg & Lake Erie R. R.

HAMILTON, O.—The county commissioners have resolved to construct an iron bridge across Seven-Mile Creek, on Oxford Road, near Somerville, to cost about $40,000.

GRAND HAVEN, MICH.—The county supervisors voted Oct. 21 on the question of constructing two bridges across the Grand River, to cost about $10,000 each.

MUSKEGON, MICH.—The question of constructing a new bridge over the Muskegon River on the North Muskegon Road is being considered by Mayor Balbirnie and the board of aldermen.

OSHKOSH, WIS.—It is reported that Adolph Green, Green Bay, Wis., has been awarded a contract by the Chicago & Northwestern Ry. for constructing the substructure of the new double-tracked steel drawbridge to be built across the Fox River.

ST. PAUL, MINN.—The county commissioners have notified the Minneapolis, St. Paul & Sault Ste. Marie Ry. Co. to construct a bridge at the Vaduals Park crossing of Rice St.

WICHITA, KAN.—W. Q. Church, Gen. Mgr., Wichita Ry., Light & Power Co., informs us that the construction of the bridge across the Big Arkansas River, will be included in the contract for rebuilding the street railway lines, plant, etc.

ST. JOSEPH, MO.—A contract for a plate girder viaduct over the railway track has been awarded to E. H. Connor, Fullerton Bldg., St. Louis, Mo. It consists of seven 51-ft. spans and two 34-ft. spans, 25 ft. wide.

OMAHA, NEB.—Andrew Rosewater, Cy. Engr., has completed plans for the new viaduct at South Sixth St. The structure will be about 1,573 ft. long, of stone and steel, and will cost between $150,000 and $200,000.

MISSOULA, MONT.—W. F. Hughes, informs us that it is proposed to construct a wooden and iron bridge, to cost about $7,500.

PALOUSE, WASH.—The county commissioners, Colfax, Wash., have rejected the bids for a 140-ft. span steel bridge across the Palouse River at this place; estimated cost $5,000. It is stated that the bridge will probably not be constructed until next year.

TACOMA, WASH.—The council has decided to reconstruct the Tacoma Ave. bridge, which was burned some time ago, according to reports.

COLFAX, WASH.—Bids are asked until Nov. 11 for furnishing plans and materials and constructing two bridges 60 ft. long each. John Tobin, County Audr.

LINCOLN, CAL.—Bids are asked until Nov. 1 for constructing a bridge in District No. 2. J. S. Mariner, Supervisor.

STOCKTON, CAL.—Geo. A. Atherton, County Surveyor, is preparing plans for a How truss wooden bridge across the Middle River, to be 199 ft. long. The plans will be submitted at the meeting of the board in November, according to reports.

LEWISTON, IDAHO.—The contract for a new cantilever bridge over Snake River at this place has been awarded to the Pittsburg Bridge Co., Pittsburg, Pa. It will be 1,500 ft. long, with a channel span of 374 ft., and 22-ft. roadway.

VICTORIA, B. C.—Reports state that bids will soon be asked by the council for a bridge between Bay St. and Rock Bay Ave.

BUILDINGS.

BARRE, VT.—Bids are asked by the city council until Oct. 31 for heating and plumbing the new city hall building. Burt H. Wells, Cy. Treas.; Geo. G. Adams, Arch., Lawrence, Mass.

FITCHBURG, MASS.—Sketch plans have been accepted, according to reports, for a brick, stone and iron hospital building for this city, to cost about $100,000. Rodney Wallace, Chn. Bldg. Com.; Kendall, Taylor & Stevens, Archs., 87 Milk St., Boston, Mass.

PITTSFIELD, MASS.—Harrington & Robinson, of Boston, are said to have been awarded the contract for erecting the steel work and roofing of the car-house and offices of the new street railway company.

BROOKLYN, N. Y.—Bids are asked until Oct. 31 for erecting additions and improvements to the state armory building for 47th Regiment, N. G. N. Y., in Brooklyn. Address Charles W. Tillinghast, Adj.-Gen., Albany, N. Y.——The lowest formal bid received by the bureau of yards and docks, Washington, D. C., Oct. 15, for constructing a steel storehouse at the navy yard in this city was that of Cooper & Wigand, 1133 Broadway, New York, at $38,977. The appropriation made for the work was $30,000.——It is reported that plans have been approved by the state board of charities for the proposed $100,000 addition to the county hospital, at Flatbush.

BUFFALO, N. Y.—Plans have been filed for the new hospital building, 114 × 50 ft., to be erected on Jefferson St., near Genesee St., for the German Hospital Association, to cost $47,000.

CENTRAL ISLIP (L. I.), N. Y.—The state commission on lunacy, Oct. 20, awarded the contract for erecting and finishing the cottage colony buildings at Central Islip, which are to form a part of the Manhattan State Hospital, to Miles Leonard, of Binghamton, N. Y., at $697,707. The contract calls for semi-fireproof construction, involving fireproof corridors and a fireproof main cottage.

NEW YORK, N. Y.—Bids are asked by the department of education, at 585 Broadway, until Oct. 31, for improving the sanitary condition of public schools 4 and 18, Borough of Richmond; also for supplying heating and ventilating apparatus and electric lighting plant for public school 159, Borough of Manhattan.——Bids are asked by the fire department, 157 East 67th St., until Nov. 2, for constructing and erecting a building for the fire department on Scofield Ave., east of Main St., at City Island; two sureties, $4,000 each.——Bids are asked by the armory board, at the City Hall, until Nov. 4, for furnishing an alteration and improvement to the roof of the 22d Regiment armory building, at Columbus Ave. and 67th and 68th St.; two sureties, $2,000. Address Thos. L. Feitner, Secy., 280 Broadway.——Plans are being prepared, according to reports, for a 10-story fireproof business building to be erected on Broad and Beaver Sts. for Edward Kemp. Arch., Robt. W. Gibson, 18 Wall St.——Plans have been filed by Barnett Cohen, 58 Forsyth St., for a 6-story brick flat and store building at South and Jackson Sts., to cost $50,000. Arch., Samuel Sass, 23 Park Row; by Charles Naarden, for three 5-story brick flat and store buildings on 125th St., near Amsterdam Ave., to cost $72,000. Archs., Schneider & Herter, 48 Bible House; by Mark E. Stevens, for four 5-story brick flat buildings, on 89th St., near Columbus Ave., to cost $76,000. Arch., C. C. Manning, 58 East 86th St.; by Zimmerman & Valente, 1804 Madison Ave., for three 5-story brick flat buildings on 122d St., east of 8th Ave., to cost $240,000. Arch., Geo. F. Pelham, 503 5th Ave.; by Teichman & Potter, 181 Broadway, for a 6-story brick flat building on 91st St., near Central Park West, to cost $90,000. Arch., Geo. F. Pelham; by Henry Hanlein, 401 East 103d St., for five 5-story brick tenement buildings on 95th St., near 2d St., to cost $90,000. Arch., Franklin Baylies, 52 Bible House.——The bid received by the fire department Oct. 19 for a building on Main St., Borough of Bronx, was that of Ryan & McFerran, 106 East 23d St., at $7,828.

PERRY, N. Y.—David Andrus, of Perry, has been awarded the contract for erecting a new 2-story brick block on Main St., 65 ft. in length, for T. H. Bussey.

SYRACUSE, N. Y.—Ray B. Smith, 618 Kirk Block, Chn. of Com., informs us that the plans and bids for the proposed penitentiary building for Union county have been received, but that no further steps can be taken until the meeting of the board of supervisors in November.

ATLANTIC CITY, N. J.—It is reported that a 5-story hotel building will soon be erected on South Carolina Ave., near the beach, for Clarence M. Busch, to cost $50,000.

JERSEY CITY, N. J.—It is reported that plans have just been completed for the new railway station to be built in this city for the Pennsylvania R. R. Co. The main waiting room will be 80 × 97 ft., and the train shed will be extended by an addition 125 × 256 ft.

NEWARK, N. J.—Charles Marsh is reported to have received the contract for erecting the new building at 158 and 160 Market St. for the New York & New Jersey Telephone Co., 18 Bridge St., Brooklyn, N. Y., at $71,990. Arch., Jeremiah O'Rourke, 756 Broad St., Newark.

NEWARK, N. J.—A. B. & W. J. Westervelt, of New York, have been awarded the contract for erecting the bookstacks for the Free Public Library, made under the Stikeman patents, at $17,500.

LEWISTON, PA.—Bids are asked until Oct. 30, according to reports, for a brick and stone Methodist Church building, to cost $25,000. Archs., W. O. Weaver & Son, 1125 North 3d St., Harrisburg, Pa.

McKEESPORT, PA.—Plans are being considered for a new building for the Central High School, to cost about $80,000.——The erection of a new $60,000 city hall building is also contemplated.

PHILADELPHIA, PA.—William Stille & Son are reported to have been awarded the contract for rebuilding the Dobson Building, on Chestnut St., near 8th St.; work will begin as soon as plans have been approved.——A building permit has been granted to Charles McCaul, Contractor, for erecting a 15-story office building, 40 × 50 ft., at Broad St. and South Penn Square, for the West End Trust & Safe Deposit Co.; estimated cost, $300,000. Work is to be completed by May 1, 1899.——A building permit was granted Oct. 19 for the new 20th Ward school building to be erected on Friendship Ave., near Roup St., to cost $105,000.

SHIPPENSBURG, PA.—G. R. Dykeman, of Shippensburg, informs us that the contract for heating the building of the Cumberland Valley State Normal School; also for pipe work, radiators, power house and stack complete, has been awarded to Henry F. Murphy & Co., 27 North 7th St., Philadelphia, Pa.; and the contract for 600-ft. pipe tunnel to Frank Hafer, of Shippensburg. Engr., Robt. C. Clarkson, 641 Drexel Bldg., Philadelphia.

YORK, PA.—The following bids were received by the county commissioners, Oct. 20, for apparatus to heat the courthouse: Broomell, Schmidt & Co., York, Pa., $19,466; Evans, Almirall & Co., New York, $19,361, and McGinnes, Smith & Co., Pittsburg, Pa., $19,287.

BALTIMORE, MD.—The following bids were received by the police board, Oct. 19, for work on the new police station to be erected in the Northern Annex; Arch., Henry Brauns: William Ferguson & Bro., $60,618; J. J. Walsh & Son, $60,000; Edward D. Preston, $65,986; D. W. Thomas, $59,600; Morrow Bro., $64,975; John Stack & Son, $60,989; George Mann, $58,023; G. Sheehan & Sons, $58,285; J. Henry Miller, $59,917; Henry Smith & Sons, $77,140; John Gill & Son, $61,271, and B. F. Bennett, $66,552.

NORFOLK, VA.—Bids are asked by the supervising architect, Washington, D. C., until Nov. 22, for the construction (except heating apparatus, elevator and electric wire conduits) of the U. S. building in this city, as advertised in Engineering News. Archs., Wyatt & Nolting, 4 East Lexington St., Baltimore, Md.

HUNTINGTON, W. VA.—Gresham & Boyd, Charleston, W. Va., are reported to have been awarded the contract for erecting the first of 15 buildings for the State Asylum for Incurables; total estimated cost, $200,000. Arch., Harrison Albright, Charleston.

FORT CASWELL, N. C.—Bids are asked until Oct. 28 for constructing one temporary set of officers' quarters, one mess building and two barrack buildings, at this post. Harry G. Bishop, 2d Lt. and Q.-M.

COLUMBUS, GA.—The following bids were received by the supervising architect, Washington, D. C., Oct. 13, for the interior finish, plumbing, and approaches of the U. S. building at Columbus: Peter Schumahl, Savannah, Ga., $2,358, Jan. 1; John F. Dalton, Savannah, Ga., $1,988, 30 working days; J. S. Henley, Columbus, Ga., $2,068, 60 days.

SHEFFIELD, ALA.—Reports state that the contract has been let for erecting the new union station, to cost $12,000, for the use of the Nashville, Florence & Sheffield, the Northern Alabama and the Southern Rys.

FRANKFORT, KY.—S. C. Cryer, of Frankfort, has the contract for enlarging the hospital at the Frankfort prison, at $4,000.

LEXINGTON, KY.—The proposition to issue $100,000 in bonds for erecting a new court house to replace the one destroyed by fire will be voted upon in Fayette county on Nov. 8.

LOUISVILLE, KY.—W. N. Haldeman, Pres. of the Courier-Journal Co., has been granted a permit to make improvements to the Courier-Journal building at 4th and Green Sts., to cost $45,000.

SHELBYVILLE, KY.—The erection of a new $50,000 court house is said to be contemplated. Mayor Willis is interested.

WASHINGTON C.-H.,O.—Plans have been accepted for the new $50,000 masonic temple to replace the one destroyed by fire.

MANSFIELD, O.—Bids are asked by the managers of the Ohio State Refermatory, until Nov. 16, for the erection of the east cell and lateral wing roof of the reformatory building. Secy., D. J. Gibson, Jr.; Archs., Weary & Dole, both of Mansfield.

DETROIT, MICH.—Bids are asked by the board of public works, a readvertisement, for the erection of a new G. A. R. memorial hall to cost not more than $38,000.

CHICAGO, ILL.—The Hennessy Bros. & Evans Co. has been awarded the mason work contract for W. D. Stein's 10-story building, at 303 and 305 Dearborn St. Arch., S. B. Eisendrath, 1439 Marquette Bldg.——Bids are being received, according to reports, for erecting a 3-story apartment building, 100 × 227 ft., on Graceland Ave., to cost about $90,000. Address Engstrand, Lothgren & Co., Builders, 6327 South Peoria St.; A. G. Lund, Arch., 602 West 63d St.

DANVILLE, ILL.—The following were the lowest bidders Oct. 12 for work at the National Home for D. V. S.: L. J. Mueller Furnace Co., Milwaukee, Wis., for heating apparatus, $2,156; the Prox & Brinkman Mfg. Co., Terre Haute, Ind., for plumbing and gas piping, $1,360; the Warren Electric Mfg. Co., Sandusky, O., for laundry machinery, shafting, at $6,943.

FREEPORT, ILL.—Bids are asked until Oct. 31 for erecting the superstructure, etc., of the proposed city hall building. The bids received in response to the former call were all too high, so plans have been altered. Address Geo. H. Tandy, Cy. Clk.; D. S. Schureman, Arch., 215 South Church St., Rockford, Ill.

DECORAH, IA.—The proposition of erecting a new $75,000 court house for Winneshiek county will be voted upon on Nov. 8.

ORANGE CITY, IA.—The erection of a new $35,000 court house will be voted upon at the next election.

ST. PAUL, MINN.—Bids are asked by the board of school inspectors, B. Zimmerman, Pres., until Oct. 31, for furnishing three smoke preventers at the Madison school.

FORT LOGAN, COLO.—H. W. Michael, of Denver, has been awarded the contract for a heating apparatus at Fort Logan, at $3,471.

SILETZ, ORE.—Bids are asked by the office of Indian affairs, Washington, D. C., until Nov. 17, for erecting at the Siletz Agency boarding school a frame hospital building. Comr., W. A. Jones.

SACRAMENTO, CAL.—It is reported that Samuel Ginsberg contemplates the organization of a stock company to erect a 5-story hotel and theatre building, to cost $200,000.

SAN JOSE, CAL.—T. and C. D. Mechell and W. Schuh are said to have been awarded the contract for the marble work on the new building to be erected here for Mrs. Jane L. Stanford, at $13,208.

UKIAH, CAL.—Contracts have been let for the constructing of the Mendocino State Hospital, at Ukiah, as follows: Rhody Ringrose, for masonry, $25,490; W. L. Prather, Jr., for iron and steel work, $4,269; Andrew Wilkie, carpentry work, $15,441; J. J. Grannis & Co., for heating and ventilating, $3,450; total cost, $55,034.

PHOENIX, ARIZ.—Bids are asked until Nov. 1 for erecting the territorial capitol building in this city, to cost about $100,000. Secy., F. H. Parker; Arch., J. M. Creighton.

WATER-WORKS.

OAKLAND, ME.—Wm. T. Harris, Waterville, Me., writes us that the proposed works will have a 1,000,000-gallon Worthington duplex pump, a 1,000,000-gallon reservoir, 30 hydrants, 6 miles of 6, 8 and 10-in. pipe; estimated cost, $50,000.

PLYMOUTH, N. H.—F. H. Rollins writes us that nothing has yet been done toward securing municipal works. A preliminary survey only has been made.

BUFFALO, N. Y.—The question of extending the water mains to Depew is being considered by the aldermen. The Depew end of the matter is being promoted by Henry W. Box, White Bldg., Buffalo.

CHARLOTTE, N. Y.—We are informed that the following bids were received Oct. 15 for building works, etc., as advertised in Engineering News; Engrs., Stanwix Engineering Co., Rome, N. Y.:

Birdseye & Lewis (accepted), Herkimer, N. Y.	$24,600
Jones & Luddington, Charlotte, N. Y.	25,544
Thos. Holohan, Rochester, N. Y.	25,900
Hill & Norton, Rome, N. Y.	26,375
Chambers & Casey, Rochester, N. Y.	26,572
Wm. Fuller, Rochester	29,075
S. M. Neff, Newark, N. J.	29,276
Jno. Dunfee & Co., Syracuse, N. Y.	32,300

COPENHAGEN, N. Y.—This place voted Oct. 18 to clean the springs, looking to the establishment of works.

FISHKILL-ON-THE-HUDSON, N. Y.—C. E. Spaight, trustee, writes us that something definite will soon be known in regard to the proposed new water supply. The city is in communication with several parties looking to a new supply, or for the reconstruction of the old works.

MIDDLETOWN, N. Y.—The question of a filtration plant at the water-works is again being considered by the water board.

SIDNEY, N. Y.—E. J. Patten, Supt., writes us that a committee has been appointed to investigate the question of putting in a new power pump to force the water from a new spring to the camp grounds.

WINDSOR, N. Y.—It is stated that this place has voted to spend $20,000 for works, the construction to be begun in the spring. Clk., M. A. Tompkins.

GLOUCESTER, N. J.—The council has awarded the contract for furnishing a 2,500,000-gallon pump to Robt. Wethill & Co., Chester, Pa., at $10,500.

IRVINGTON, N. J.—The residents of Manhattan Park have petitioned the council of this place to extend the water mains to that borough.

NEWARK, N. J.—The board of works has asked the council for $65,000 with which to construct a new feeder main in the annexed district.

KNOXVILLE, PA.—The following have been awarded contracts for furnishing the materials and for constructing works, as advertised in Engineering News: Pipe and specials, R. D. Wood & Co., Philadelphia, Pa.; hydrants, valves, boxes, check valves, relief valves, etc., Rensselaer Mfg. Co., Troy, N. Y.; building reservoir, laying pipe, etc., Chas. Wilson, Philadelphia. Engr., Howard Murphy, Philadelphia; Clk.. H. A. Ashton.

NORRISTOWN, PA.—The council proposes to build municipal works, at a cost of about $250,000. Councilman Frank Smith may be addressed.

OIL CITY, PA.—Bids are asked, until Dec. 5 for furnishing one vertical cross compound crank and fly wheel pumping engine, of 3,300,000 gallons capacity, as stated in our advertising columns. Park C. Porter, Clk., Water Bd.

READING, PA.—A. B. Dundor, Pres. Bd. of Health, writes us that the question of securing a loan for constructing a water filtration plant will be voted on by the citizens Nov. 8.

LAUREL, MD.—D. G. Adelsberger, 722 Pennsylvania Ave., Baltimore, Md., has submitted a report for works, to cost about $33,000.

WHEELING, W. V.—The question of a water supply for the 8th ward is being considered. H. F. Jones, Pres. Water Bd.

ROCK HILL, S. C.—Bids are asked until Nov. 15 by the Rock Hill Water, Light & Power Co. for furnishing the materials and for constructing the proposed works, as stated in our advertising columns, Engr., J. L. Ludlow, Winston, N. C.; Pres., J. M. Cherry.

ATLANTA, GA.—Alderman Woodward has introduced an ordinance calling for another election to vote on the question of issuing $200,000 in bonds for extending the water mains.

WOODLAWN, ALA.—The question of building works for this place, a suburb of Birmingham, is being considered; estimated cost, about $20,000. J. S. Kennedy and John T. Hook, Woodlawn, may be addressed.

LAKE PROVIDENCE, LA.—This place will vote about Nov. 30 on the question of issuing bonds for works. R. L. Hill may be addressed.

SUMMIT, MISS.—It is stated that the date set for receiving bids for the construction of water-works was postponed until Oct. 25, owing to quarantine restrictions.

YAZOO CITY, MISS.—Information is wanted for works, a sewerage system and electric light plant for this place, according to reports. L. G. Montgomery may be addressed.

FAYETTEVILLE, TENN.—This place voted Oct. 15 to issue bonds for works.

ROCHESTER, KY.—It is reported that this place will build works, at a cost of about $2,000.

LANCASTER, O.—Bids are asked until Nov. 1 for furnishing and laying or setting cast-iron pipe, valves and hydrants. Secy. Water Bd., Louis J. Snyder.

YOUNGSTOWN, O.—Press reports state that the waterworks trustees have presented a proposition to the effect that if the board of health will condemn the use of water from the Mahoning River it will arrange to secure a supply of water from Mill Creek, issue bonds to pay for the improvements, and pay principal and interest. The proposition will probably be accepted.

ANDERSON, IND.—Superintendent Lowell has submitted estimates for extending the mains to Shadeland, at a cost of $3,150.

BOYNE, MICH.—It is stated that this place will soon have works, the water supply to be secured from springs.

IRONWOOD, MICH.—We are informed that new works will be built by the Citizens' Water-Works Co. The works will be built in conjunction with the electric light company. There will be electric pumps with a capacity of 1,000,000 gallons. The company is also in the market for 36,000 ft. of pipe and a standpipe. Population, 10,000. E. D. Nelson may be addresed.

JONESVILLE, MICH.—W. M. Wetmore, Clk., writes us that on Oct. 10 this place voted to issue $18,000 in bonds and $10,000 for a light plant, to be operated in connection with the works. Up to Oct. 22 no engineer had been engaged.

BELLEVILLE, ILL.—The Deep Well Water-Works has been granted permission to lay five miles of pipe to connect the new works with the old.

UTE, IA.—J. P. Harker, Mayor, writes us that an election will be held Oct. 31 to vote on the question of issuing $3,000 in bonds for works; population, 450.

ST. PAUL, MINN.—Bids are asked until Nov. 7 for furnishing two 18-ft. × 54-in. tubular boilers, and also for setting the same at Como Park pumping station. Matt Jensen, Cy. Clk.

WEST DULUTH, MINN.—Alderman Krumrieg has introduced an ordinance authorizing an appropriation of $100,000 for the purchase of the works of the West Duluth Water Co., or for building a new plant.

CARTHAGE, MO.—E. B. Jacobs, Secy. Carthage Water Co., writes us that this company succeeds the original company, which was sold out under mortgage. The plant is complete and is being operated by a receiver until the new company is organized. No extensions or improvements will be made to the works. Mgr., H. C. Messenger.

LAMAR, MO.—Press reports state that M. T. Davis has been appointed receiver of the water and electric light company of this city. Indebtedness amounting to over $80,000 has been filed against the company. Jerry Guinney, Pres. and Mgr., has temporary charge.

WACO, TEX.—E. S. McKenney, Secy. Bell Water-Works, writes us that the company has not yet decided what will be done towards securing a new standpipe, but it is probable something will be done soon. Pres., J. D. Bell.

NEW WHATCOM, WASH.—Bids are asked until Nov. 7 for constructing 8,600 ft. of 24-in. wooden stave water main, at a cost of about $30,000. Cy. Clk., F. B. Graves.

THE DALLES, ORE.—The Pacific Bridge Co. has been awarded the contract for furnishing the materials and for building the works, at $9,433.

COLTON, CAL.—Press reports state that the recent bond issue amounting to $20,000 for works has been declared illegal.

LOS ANGELES, CAL.—The Cienega Water Co., has been incorporated, with a capital stock of $150,000. Incorporators: S. A. Stowell, B. T. Allen, Westwood H. Collins, George F. Platt and William Bowring.

SAN BERNARDINO, CAL.—Bids are asked until Nov. 7 for the purchase of a franchise for putting in works. Clk., J. B. Parazette.

STENT, CAL.—It is stated that arrangements are being made for the proposed works.

WHITTIER, CAL.—J. J. Jessup, Cy. Engr., writes us that the proposition before the city is to buy the works of the old company for $18,500, and also to build a new pumping station, the water supply to be secured from a new source, estimated to cost about $21,500. An election will soon be called to vote on the question of issuing $40,000 in bonds. Engr., Burr Bassell, Los Angeles, Cal.

TEMPE, ARIZ.—G. W. Hoadley, Phoenix, Ariz., has been granted a franchise for works.

GRAND MERE, QUE.—This place is to have works at once at a cost of about $40,000, according to reports.

LEVIS, QUE.—It is stated that the council has voted to build works at once.

PORT ARTHUR, ONT.—Edward S. Jennison, Arch., 134 Van Buren St., Chicago., Ill., has submitted a proposition to furnish this place with 500,000,000 gallons of water a year for a term of 99 years. This water supply will be in connection with the electric power plant.

HONOLULU, H. I.—Bids are asked by Jas. B. King, Minister of the Interior, Honolulu, or by the Hawaiian Consulate, 65 Wall St., New York, until Nov. 25, for furnishing cast-iron water pipe and connections.

SAN LUIS POTOSI, MEX.—Press reports state that an American company is negotiating with the authorities of San Luis Potosi regarding the construction of a waterworks for this city. The water is to be taken from the Matehuala River. Population, 70,000.

JALAFA, VERA CRUZ, MEX.—It is stated that the work of constructing new works for this city has commenced. The estimated cost will be $800,000, of which amount $500,000 is borne by the state government. Population (1895), 10,000.

SEWERAGE.

NEW HAVEN, CONN.—Bids are asked until Oct. 31 for constructing sewers in certain streets. Cy. Engr., C. W. Kelley.

ALBANY, N. Y.—Bids are asked until Nov. 7 for constructing 15 to 6-in. pipe sewers in two streets; two sureties of $1,200 each and two of $500 each.

COHOES, N. Y.—Frank S. Ablett, of Cohoes, has been awarded the contract for building the first section of the system, at $29,734. The bids are given under Contract Prices.

FULTON, N. Y.—Bids will be wanted at once by the manager of the Fulton Worsted Mills Co., Oswego Falls, N. Y., for constructing a system for the buildings, according to reports.

GLENS FALLS, N. Y.—The sewer commissioners are considering the question of building a system.

NEW YORK, N. Y.—Bids are asked until Nov. 2 for constructing a temporary private sewer in 18th Ave., from 57th to 75th St. Comr. of Sewers, Jas. Kane, 267 Broadway.

ROCHESTER, N. Y.—It is proposed to build a 48 to 30-in. brick sewer this winter on East Ave.; estimated cost, $28,000.

SARATOGA SPRINGS, N. Y.—Bids are asked by the village trustees until Nov. 1 for the construction of an 8-in. sewer in State St., from Greenfield Ave. to Alger St. Jesse S. Mott, Village Engr., 420 Broadway, Saratoga Springs.

SYRACUSE, N. Y.—The following bids were received by the council Oct. 17 for constructing a 24 to 15-in. pipe sewer in West Fayette St.: G. W. Dakin, $6,542; James Swift, $6,528; C. T. Hookway, $6,147; F. S. Spasato, $7,035; Thomas Marnell, $6,972; Matthew Dillon, $6,224; P. J. Mack, $6,343; P. H. Lyons, $7,471; Martin & Sullivan, $7,426; Gleason & Kiely, $8,480; Richard Barrington, $6,989; T. F. Moore, $6,878; Martin Lavelle, $6,437; L. D. Hulbert, $6,721; J. W. Bustin, $6,916; E. C. Gay Co. (accepted), $5,573.

SOMERSET, PA.—At the election Nov. 8 this place will vote on the question of issuing $24,000 in bonds for a system.

WASHINGTON, PA.—The question of building sewers for East Washington is being considered by the council of that borough; estimated cost, $9,000. St. Comr., Wm. West.

WILLIAMSPORT, PA.—It is proposed to build sewers in certain streets. Councilmen Bennett and Cauldwell may be addressed.

MOBILE, ALA.—The following submitted bids to the council Oct. 17 for constructing sewers, as advertised in Engineering News: J. B. Neely & Co., Chattanooga, Tenn.; Van Sandt & Meed, Cincinnati, O.; M. T. Lewman & Co., Louisville, Ky.; Greenville Construction Co., Greenville, O.; Dowdle & Dungan, Chicago; Thos. J. Shea, Quincy, Ill.; St. John & Co., Mobile, Ala.; Guild & Co., Chattanooga; Blackmer & Post, St. Louis, Mo. (pipe only). The contract was let to T. J. Shea, Oct. 19, at $186,273.

YAZOO CITY, MISS.—The question of building a system. water-works, etc., is under consideration, according to reports.

DAYTON, O.—Local papers state that the following bids were received by the board of city affairs for building a 36-in. pipe or brick sewer in Main St.: James Reid & Co., $3,859 and $3,607, for brick and pipe sewer, respectively; E. Brentlinger, $4,365 and $4,101; J. J. Smith, $5,475 and $4,983. The contract was let to Reid & Co., at $3,607.

TOLEDO, O.—Bids are asked until Oct. 31 for building a 15-in. pipe sewer in Champlain St., and until Nov. 21 for building an 84 to 60-in. brick sewer in Paine St. L. P. Harris, Cy. Clk.

TOLEDO, O.—Bids are asked until Nov. 21 for the construction of a cylindrical brick sewer with a 13-in. and a 9-in. shell along the center line of Paine Ave., from the Maumee River to Woodford St., 84 ins. inside diameter, from the Maumee River to Genesee St., and 66 ins. inside diameter from Genesee St. to Woodford St. Lem. P. Harris, Cy. Clk.

EVANSVILLE, IND.—Michael Weber has been awarded the contract for building a main sewer in Washington Ave. from Garvin St. to Linwood Ave.

WABASH, IND.—Bids are asked until Nov. 7 for building sewers in two streets. Cy. Clk., Fremont McLees.

PEORIA, ILL.—Bids are asked until 2 p. m. Oct. 27 for building 700 ft. of brick tunnel sewer and about 2,000 ft. of pipe sewers for the Illinois Asylum for the Incurable Insane. F. W. Menke, 22 Arcade Bldg., Peoria.——The board of local improvement proposes to build a main sewer in Persimmon St.

DAVENPORT, ILL.—The question of building an intercepting sewer and certain other sewers at a cost of about $150,000 is being agitated by the Business Men's Association.

QUINCY, ILL.—Peter Simons submitted the lowest bids Oct. 10 for building sewers in four streets, at a total cost of about $7,000.

VALLEY JUNCTION, IA.—The council is reported as arranging to put in a system.

KENOSHA, WIS.—Reports state that Hanson & Co., of Racine, Wis., have been awarded the contract for building sewers on Naida St., in Kenosha.

ST. CLOUD, MINN.—Clarence L. Atwood, Pres. Council, writes us that the city engineer is preparing plans for a main sewer in the lower ravine to drain about 800 lots, and to extend from Lake George to Mississippi River. The main sewer will be built of granite or brick and tile pipe will be used for laterals. No time has yet been set for opening bids.

TOPEKA, KAN.—The council has decided to build a sewer in the First Ward, North Topeka.

SHERMAN, TEX.—Press reports state that work on the proposed system will begin within a few months; estimated cost, $100,000. The system will be built by Geo. W. Puch & Co., 2851 Hutchinson St., Philadelphia, Pa.; Mayor, A. A. Fielder.

SAN BERNARDINO, CAL.—Bids are asked until Oct. 26 for caring for and disposing of the sewage of this city for one year. Clk. Bd. Trustees, A. W. Clark.

TORONTO, ONT.—C. H. Rust, Cy. Engr., has submitted a report for the sewage disposal of the city. Two systems are suggested, each to cost about $1,500,000.

GARBAGE DISPOSAL—STREET CLEANING

NEW ROCHELLE, N. Y.—G. H. Crawford, Pres. Bd. of Health, writes us that it is probable that a plant will be built here not later than spring. Frederick Lorenzen, Chn. Com.

JERSEY CITY, N. J.—The Thackeray Incinerating Co., of New Jersey, has been incorporated with a capital stock of $100,000. Charles B. Thurston, Jersey City; F. W. Montgomery, New York, and Lewis Perrine, Trenton, N. J.

ORANGE, N. J.—Mayor Stetson is urging the council to consider better methods of disposing of the city garbage than by dumping it into vacant lots.

NORRISTOWN, PA.—C. R. Weaver, Health Officer, writes us that no appropriation has yet been made for a garbage crematory. The question of garbage disposal has been discussed for years by the board of health. The borough council is just beginning to take some interest in the matter.

ATLANTA, GA.—The board of health is in favor of building two garbage crematories in the central portion of the city. The committee is composed of Lewis H. Jones, Chn.; Dr. C. F. Benson and John A. Miller.

FORT THOMAS, KY.—Bids are asked until Nov. 2 for the construction of a garbage crematory at Fort Thomas, Ky. Address Capt. Chas. D. Palmer, Acting Ch. Q. M., 415 Pullman Bldg., Chicago, Ill.

LOUISVILLE, KY.—Health Officer Allen has written to about 15 cities for information as to their methods of disposing of the city garbage, and also for detailed information of the crematories in use. A plant for this city is estimated to cost about $40,000.

EAST LIVERPOOL, O.—The question of a better method of garbage disposal is considered.

TOPEKA, KAN.—Bids will probably be asked at once by the city clerk for the removal of dead animals.

SAN FRANCISCO, CAL.—The supervisors have delayed the awarding of the garbage contract, noted last week, until Nov. 11.——Efforts are to be made to show that the 50-year franchise recently granted to Sanitary Reduction Works is illegal.

SAN JOSE, CAL.—A company has applied for a franchise for a plant.

STOCKTON, CAL.—J. W. Northrup, of San Francisco, is reported to have applied for a franchise.

HAMILTON, ONT.—W. E. Gowe, Montreal, Que., has been awarded the contract to build an incinerator at the sewage disposal works, at $3,700, according to reports.

STREETS AND ROADS

ATHOL, MASS.—It has been voted to appropriate $2,500 for the purchase of a stone crushing plant.

SUDBURY, MASS.—A contract has been awarded to White & Gaffney, Medford, Mass., at $5,325, for a section of State highway.

PAWTUCKET, R. I.—Samuel H. Roberts, Cy. Clk., informs us that a resolution has been introduced appropriating $9,000 for paving. Nothing has been done toward preparing plans, etc.

NEW LONDON, CONN.—Bids are asked until Nov. 5 for improving Ocean Ave. Geo. K. Crandall, Cy. Surveyor; Peleg Williams, Chn. Com.

ALBANY, N. Y.—A contract was awarded Oct. 20 to E. A. Matthews, Binghamton, N. Y., at $7,200. C. W. Adams, State Engr., Albany.

BUFFALO, N. Y.—A petition has been presented to the council to pave Court St. with asphalt, between Main St. and Delaware Ave.

GOSHEN, N. Y.—A proposition to appropriate $1,000 for a stone crusher will be submitted to a vote at the coming election, according to reports.

NIAGARA FALLS, N. Y.—Bids are asked until Oct. 28 for paving on Second St. and Cherry Ave., with asphalt, about 8,190 sq. yds., as stated in our advertising columns. Walter Jones, Cy. Engr.; S. F. Arkush, Clk.

ROCHESTER, N. Y.—The following bids have been received for paving: North Clinton St.—Warren-Scharf Asphalt Paving Co. (accepted), $60,638; Rock Asphalt Pavement Co., $62,309; Rochester Vulcanite Pavement Co., $62,483. Glenwood Park—Rock Asphalt Pavement Co., $10,137; Rochester Vulcanite Pavement Co., $10,503; Warren-Scharf Asphalt Paving Co., $10,539. The Highlands—Rochester Vulcanite Pavement Co., $6,040; Rock Asphalt Pavement Co., $6,281; Warren-Scharf Asphalt Paving Co., $6,213.

TROY, N. Y.—Bids are asked until 11 a. m., Oct. 28, for brick paving on Church St., from Ferry to Division St. E. Ogden Ross, Secy. Contracting Bd.

PLAINFIELD, N. J.—Andrew J. Gavett, Engr. and Comr., 152 Park Ave., writes us that it is proposed to pave 13,180 sq. yds. with asphalt or brick; estimated cost, $31,000.

READING, PA.—The park board is preparing to construct a section of the new addition to the Mt. Penn Boulevard, for which plans have been completed. The addition will add over a mile to the drive, although only about 1,300 ft. of this is to be built this fall.

SCRANTON, PA.—Bids are asked by the council until Nov. 3 for repairing asphalt pavements, according to reports.

WILKESBARRE, PA.—Bids are asked until Oct. 29 for excavating, furnishing material and laying about 2,000 lin. ft. of 8-ft. flagstone sidewalks on Carlisle St. Fred. H. Gates, Cy. Clk.

TAMPA, FLA.—Harry Levick has been awarded a contract to construct a new road six miles long, from this city to the Hillsboro River, according to report.

LOUISVILLE, KY.—The board of public works has rejected the bids received for asphalt paving on Chestnut St., to cost about $75,000, on account of being too high.

MEMPHIS, TENN.—Bids are asked until Oct. 29 for hauling, spreading, breaking and rolling gravel on certain streets. D. P. Prescott, Secy. County Comrs.

CINCINNATI, O.—Bids are asked until Nov. 12 for drain pipe, masonry, fill, broken stone, gravel and lumber on the Shepherd Creek Road. E. L. Lewis, County Audr.

CLEVELAND, O.—The following bids were received by the park board for constructing a drive through Wade Park: Northern Ohio Paving & Construction Co. (accepted) $28,259; Blanan & Baisch, $29,498; M. I. De Celle, $29,626; Spence Bros., $30,749; John E. O'Brien, $32,121; Condon & Blasberg, $32,334; William Wachs, $34,957.

DAYTON, O.—Bids are asked until Oct. 31 for 5,000 sq. yds. of Buckeye block paving, 3,250 lin. ft. of curb, etc., on Sycamore St. from Perry St. to the boulevard; until Nov. 4 for 2,631 sq. yds. of Buckeye block paving and 2,380 lin. ft. of curbing on Charter and Council Sts. J. L. Baker, Pres. Bd. Cy. Affairs.

FINDLAY, O.—Bids are asked until Oct. 31 (postponement from Oct. 27) for macadamizing, etc., on East Hardin St. A. W. Ray, Clk. Bd. Improvements.

TOLEDO, O.—Bids are asked until Oct. 31 for Buckeye block paving on Potter St. and one alley. L. P. Harris, Cy. Clk.

QUINCY, ILL.—F. A. Grover, County Surveyor, informs us that the committee has accepted the plans for the proposed Missouri Road, to cost $12,000, and that bids will soon be asked.

OTTUMWA, IA.—Bids are asked until Oct. 31 for brick paving, etc., on South Green St. Thos. F. Keefe, Chn. Com.

LOS ANGELES, CAL.—J. H. Dockweiler, Cy. Engr., has prepared plans for the proposed improvements on Boyle Ave., from 5th St. to Stephenson St., estimated cost about $6,500, according to reports.

NAPA, CAL.—Bids are asked until Nov. 17 for constructing a road in Sage Canyon. N. W. Collins, County Clk.

SANTA BARBARA, CAL.—Bids are asked until Nov. 14 for grading section No. 3 of the Refugio Road. H. H. Doyle, Clk. Supervisors.

MANUFACTURING PLANTS.

MILTON, VT.—McCaghey & Lineham, general contractors, of Milton, have been awarded the contract to build a large pulp mill on the Lamoille River, at Milton, for the International Paper Co., of New York, and will commence the work at once.

ANSONIA, CONN.—It is reported that the Harris Rubber Co. has just been formed and that it will erect a large factory building in Beacon Falls, a suburb of this city, in order to commence business by March 1. The contract for the entire equipment of machinery has been given to the Farrell Foundry & Machine Co., of Ansonia. The principal stockholders are J. H. Wettimore, Harris Wettimore and A. D. Warner, all of Naugatuck, Conn.

COHOES, N. Y.—The old Weed & Becker axe factory on the Champlain Canal was destroyed by fire Oct. 17, causing a loss on the building of $10,000 and a total loss of about $50,000.

DEXTER, N. Y.—Reports state that the Sulphite Co. is about to erect a new boiler house, 60 × 80 ft., to contain six large boilers. Contractors, Foster & Reed; Arch., Charles Eaton, Carthage, N. Y.

TROY, N. Y.—Plans have been prepared for a new steel storage building, 70 × 70 ft., to be erected on 7th Ave. for Conway Bro. & Kane, near their present brewing plant; estimated cost, $25,000. Archs., M. F. Cummings & Son, Troy.

WATERVLIET, N. Y.—The Troy Malleable Iron Works Co. expects to erect an annex to its plant in this city, to cost about $15,000. Arch., M. F. Cummings & Son, Troy.

HOBOKEN, N. J.—Press reports state that an artesian well 300 ft. deep has been discovered on property on the Palisades, in West New York, owned by Wm. H. Schmidt, and that an ice plant will be erected thereon at a cost of about $100,000.

AVONMORE, PA.—Bids have been asked, according to reports, for the erection of two of the six mills which the newly incorporated Alcania Tin & Terne Co. expects to build here. Engr., S. Diescher, of Pittsburg. Among the directors are W. H. Hilliard and M. M. Garland, Collector of Internal Revenue of Pittsburg, Pa.

BRADFORD, PA.—The Aschman Steel Casting Co., of Sharon, Pa., is said to be negotiating for the erection of a new steel foundry near this place.

PITTSBURG, PA.—A fire in this city, Oct. 19, destroyed the machine shop and the copper and brass rolling mills of C. G. Hussey & Co. at 2d Ave. and Murphy St., causing an estimated loss on machinery, etc., of about $25,000.—— Reports state that the Riter-Conley Mfg. Co. will soon erect a blacksmith and paint shop building, 250 × 75 ft., for the Schoen Pressed Steel Co.

PRICEBURG, PA.—A new silk mill is being erected in this borough on the old Crippen estate, to cost about $25,000. There will be one main building 100 × 150 ft., an engine room 30 × 60 ft., and a boiler house 30 × 60 ft.

SEIGFRIEDS BRIDGE, PA.—James Stewart & Co., Engineers and Contractors, Prudential Bldg., Buffalo, N. Y., have secured the contract for erecting six brick and steel fireproof buildings for the Lawrence Cement Co. at Siegfried. They consist of a kiln building 120 × 126 ft., mill building 63 × 285 ft., engine bbuilding, 75 × 105 ft., boiler house 42 × 105 ft., stock house 120 × 462 ft., and fuel building 50 × 60 ft.; estimated cost when completed about $225,000. There were 20 bidders.

SHARON, PA.—The contract for erecting an addition 215 × 70 ft. to the P. L. Kimberly rolling mill, at Sharon, has been awarded to the Shiffler Bridge Co., of Pittsburg. Work will be started at once.

WILMINGTON, DEL.—Megary & Son will soon erect a 6-story brick building, 154 × 100 ft., at Orange and 6th Sts., to be occupied as a warehouse and furniture factory.

SALISBURY, MD.—It is reported that J. H. Tomlinson has purchased a tract in Salisbury and will move his crate and basket factory here and enlarge his plant, now situated at Hebron.

HAMILTON, GA.—Beers Bros., of this city, contemplate the erection of a large machine shop opposite the Columbus & Rome Ry. station.

ROCKMART, GA.—Col. J. D. Waddell is reported to have just completed arrangements with New England parties for the erection of a cotton factory here to employ about 200 hands.

BIRMINGHAM, ALA.—A fire in the plant of the Hood Machine Co. Oct. 17, at 1st Ave. and 15th St., caused damage to property valued at about $15,000. It is said that the plant will be rebuilt at once.

LOUISVILLE, KY.—Hoffman, Ahlers & Co., of Louisville, are said to have been awarded the contract for erecting the building and copper work for the new distillery to be run in connection with the works of the White Mills Distilling Co. at 18th and Howard Sts. The owners will be Hoffheimer Bros., of Cincinnati, O., and the cost about $50,000.

ELYRIA, O.—A fire at this place, Oct. 18, damaged the linseed oil works, owned by the C. H. Price Co., of Cleveland, O., causing a reported loss of $40,000.

INDIANAPOLIS, IND.—A part of the plant of the T. B. Laycock Mfg. Co., on 10th St., was damaged by an explosion Oct. 12, which originated in the foundry; estimated loss $20,000 to $25,000.

CHICAGO, ILL.—Pendergast & Clarkson, 161 La Salle St., are said to have the mason contract for the proposed brewery to be erected at Elston Ave. and Snow St. for Virgil M. Brand, 1251 Elston Ave. and Snow St. for $150,000. Arch., Louis Lehle, Schiller Bldg.

MILWAUKEE, WIS.—Plans have been completed, according to reports, for a cooperage plant, 164 × 141 ft., to be built at 9th and Winnebago Sts., for the Pabst Brewing Co.; estimated cost $70,000.

LEHI CITY, UTAH.—The directors of the Utah Sugar Co. Oct. 17 decided to make additions to the present plant next year so as to permit of a capacity of from 50,000 to 60,000 tons of beets a season.

GAS PLANTS.

GOWANDA, N. Y.—Gaenssler, Fisher & Co. are making arrangements to construct a pipe line to furnish the town with natural gas.

SYRACUSE, N. Y.—The Syracuse Gas Co. is preparing to put in a system of flues for the purpose of condensing odors. The west side of the plant will be remodeled.

PITTSBURG, PA.—Reports state that the Bellevue & Glenfield Natural Gas Co., which supplied Bellevue, Glenfield, Emsworth, Ben Avon, Avalon and Coraopolis, has been purchased by the Manufacturers' Natural Gas Co. for $250,000. It is reported that the mains will be extended to Allegheny.

BRIDGEWATER, VA.—Reports state that the Bridgewater Acetylene Gas Co. is being organized to manufacture an improved acetylene gas generator.

CHARLOTTE, N. C.—We are informed that the purchase of the Charlotte Gas Light Co. was made by the United Gas Improvement Co., Philadelphia, Pa., instead of the Consolidated Gas Co., Philadelphia, as stated in our last issue; also that the price paid was considerably in excess of $50,000.

RALEIGH, N. C.—It is reported that Baltimore capitalists have purchased a controlling interest in the Raleigh Gas Light Co. and will increase the capacity of the plant about 100%. An electric dynamo may also be put in. B. P. Williamson, Pres.; W. T. McGee, Secy.

FOSTORIA, O.—Howard Swartz, Secy., informs us that the City Heat & Light Co. is arranging for the construction of a gas plant with a capacity of 1,000,000 cu. ft. per day. A building 200 × 40 ft. will be erected. Samuel R. Bullock, Des. Engr., Philadelphia, Pa.

JOHANNESBURG, SOUTH AFRICAN REPUBLIC.—Bids are asked by the council until Jan. 6 for a complete carburetted water-gas plant, according to reports. Address Robert Whyte & Co., 22 Bury St., St. Mary-Axe, E. C.

NEW COMPANIES.—Council Bluffs, Ia.; $25,000; to establish acetylene gas plants. W. H. Harris, R. J. Hart and T. A. Harris.

Winnisimmet Gas Co., Revere, Mass.; $50,000; to furnish gas to Revere, Winthrop and vicinity. Scott F. Bickford, Pres.

New York Gas & Coke Co., New York, N. Y.; $500,000; P. H. Childs, J. A. Hawes and F. E. Mygott.

MISCELLANEOUS CONTRACTS.

FIRE ALARM SYSTEM.—Perth, Ont.—Reports state that bids will probably be asked soon for a fire alarm system.

TELEPHONE SYSTEM.—Mamaroneck, N. Y.—The board of trustees has granted a franchise to the Phoenix Telephone Co.

WATER TOWER.—Atlantic City, N. J.—The council has decided to purchase a water tower for the fire department, to cost about $1,000.

FIRE APPARATUS.—St. Marys, N. B.—It is reported that the question of purchasing more fire apparatus is being considered by the council.

TELEPHONE WORK.—Flint, Mich.—The Saginaw Valley Telephone Co. will issue $70,000 in bonds for the improvement and extension of the plant.

TELEPHONE SYSTEM.—Lyons, N. Y.—S. E. Bishop and Alvin B. Bishop, Clyde, N. Y., have been awarded a franchise to construct a telephone exchange.

TUNNEL REPAIRS.—Troy, N. Y.—Holbrook, Cabot & Daly, Boston, Mass., have been awarded a contract to repair the 6th Ave. tunnel between Ferry and Congress Sts.

TOOLS, ETC.—Norfolk, Va.—Bids are asked until Oct. 29 for furnishing condenser tubes, lathes and one boring and drilling machine, for the navy yard. Edwin Stewart, Paymaster-General, Washington, D. C.

CRANE.—Port Royal, S. C.—Bids are asked until Nov. 26 for furnishing a jib crane of 40 tons capacity for the navy yard; estimated cost, $45,000. M. T. Endicott, Ch. Bureau Yards and Docks, Washington, D. C.

HARBOR WORK.—Wilmington, Del.—A contract has been awarded to the New York Dredging Co. for removing the dirt and mud, and to John J. Fitzpatrick, Plattsburg, N. Y., for removing rock, for the improvement of Wilmington Harbor, to cost about $200,000.

REMOVING WRECK.—Portchester Harbor, N. Y.—Bids are asked until Nov. 28 for removing a wreck and cargo in Long Island Sound, off Portchester Harbor, as stated in our advertising columns. Major H. M. Adams, U. S. Engr., Army Bldg., New York.

NAVAL SUPPLIES.—St. Augustine, Fla.—Bids are asked until Nov. 21 for furnishing cement, stone, steel beams, anchor bolts, ammunition trolley systems, hoists and cranes, as stated in our advertising columns. Lieut.-Col. W. H. Benyaurd, U. S. Engr., St. Augustine.

CANAL.—Saratoga County, N. Y.—N. O. Belyea, Civil Engr., 547 State St., Hudson, N. Y., informs us that T. D. Welch & Co., Nassau, N. Y., were awarded a contract Oct. 24 to construct a canal 2,000 ft. long in Saratoga county, requiring about 10,000 cu. yds. of rock, and 22,000 cu. yds. of earth to be excavated.

PIERS, ETC., BURNED.—Brooklyn, N. Y.—A fire Oct 24 destroyed a number of piers and warehouses on the waterfront between Vandyke and Walcott Sts., estimated loss, about $650,000. Among the losers are Geo. L. Hammond, the Brooklyn Wharf & Warehouse Co. and E. F. & W. Roberts, Liverpool, England.

ARCH WORK.—Hamilton, O.—The following bids have been received by the board of control for arching the hydraulic from 4th to Front Sts.: Jos T. Guillaume, No. 1, brick, $15,191; No. 2, paving brick, $15,745. S. E. Irwin, $16,560. W. H. Louthan, $16,731; Louis Drach, $16,660, with own specifications, $15,391.

NAVAL STATION.—Goat Island, Cal.—Reports state that bids will soon be asked by the navy department, Washington, for constructing a barracks and dock for the proposed naval training station, at this place, to cost about $100,000.

CONTRACT PRICES.

SEWERS.—Marietta, O.—The following bids were received by the council Oct. 15, 1898, for constructing sewers in the 5th District:

King Bridge Co., Cleveland, O....	9,700	3.0	30.00

Lockport Highway Bridge—The itemized bids were the same as those submitted for the Wire Mills Bridge. The total bids for the Lockport bridge were as follows: Wisconsin Bridge & Iron Co., $10,954; Pittsburg Bridge Co., $11,235; Toledo Bridge Co., $11,880; Penn Bridge Co., $11,965; Wagner Co., $11,967; Massillon Bridge Co., $12,400; King Bridge Co., $12,500. Substructure—236 cu. yds. of excavation, and 460 cu. yds. Portland cement concrete: Griffiths & McDermott, $3,523; Hayes Bros., $3,613; McArthur Bros. Co. and Winston Co., $3,810; Frederick S. Brown, $3,820.

GRADING.—Brooklyn, N. Y.—The following bids were recently received by the bureau of yards and docks, U. S. N., Washington, for grading in the New York navy yard: Michael J. Curley, Jersey City, N. J., 45 cts. a cu. yd., $135,400; Ambrose F. Dudley, 100 Broadway, New York, 49 4-10 cts.; Eugene Lentilhon, 11 Broadway, New York city, 79½ cts.; Maurice Fitzgerald, 219 Havemeyer, Brooklyn, N. Y., 30 cts.; Frank J. Gallager, 534 Park Place, New York, 44 cts.; The F. W. McNeal Co., 80 Reade St., New York, 55 cts.; Nicholas Ryan, 491 Smith St., New York, 49 cts.; Washington Buckly, 94 Emerson St., Brooklyn, N. Y., 48 cts.; R. H. Hood Co., New York, 42 4-10 cts.; Charles Hart, 531 3d St., Brooklyn, N. Y., 48 cts.; Geo. H. Aspinwall, 136 Liberty St., New York, 49⅝ cts.; Johnson & Reynolds, Girard Bldg., Philadelphia, 59¾ cts.; Wm. Beard, 13 William St., New York, 45 cts.

MACADAM PAVING.—Janesville, Wis.—A. E. Badger, Cy. Clk., writes us that the contract for macadamizing a portion of South Hogler St. and of Dodge St. has been let to J. H. Watson at 29¼ cts. a sq. yd. Chn. Com., J. B. McLean.

LEVEE WORK.—Columbus, O.—John Keeler and Foley Bros. submitted bids Oct. 11, 1898, at 28 cts. and 29 cts. a cu. yd., respectively, for 28,000 cu. yds. of levee work between Mound St. and Green Lawn Ave.

HAULING WATER PIPE, ETC.—West Springfield, Mass.—The water commissioners received the following bids Oct. 17, 1898, for hauling and laying the pipe for a water main on the Holyoke Road, from the First Church to the Holyoke line. The contract calls for 17,300 ft. of 10-in. pipe: F. T. Ley & Co., Springfield, Mass., (accepted), 12¾ cts. a foot; R. D. Maynard, 16½ cts.; A. H. Wright & Son, 17 cts.; M. L. Tourtellotte, West Springfield, 17 cts.; Sackett Bros., 13 cts.; J. K. Barber, 16 cts.; O'Connell & Son, Chicopee, 14¾ cts.; Monson Granite Co., Monson, 16.95 cts.; Atkins & Co., Palmer, 14 cts.; Lane & Co., Syracuse, 18 cts. The contract for hauling pipe was awarded to M. J. Shinkwin, of Springfield, at 45 cts. a long ton. There were 10 bids ranging from 45 cts to 80 cts.

LEVEE WORK.—Memphis, Tenn.—We are informed that Bodkin Bros., Little Rock, Ark., have been awarded the contract at 15 cts. a cu. yd. for 2,193,000 cu. yds. of levee embankment from mile $\frac{127}{28+00}$ to mile $\frac{151}{28+00}$; total, $330.000. Geo. Arnold, Memphis, submitted a bid at 16 cts. a cu. yd. for field work and at 18 cts. for woods work, beginning at Frenchtown and working south to the amount of $50,000. There will be eight miles in Lee county from Kent's north to Frenchtown. This bid covers about five of the eight miles. It has been held for further consideration. Ch. Engr., Harry N. Parr, 49 Southern Express Bldg., Memphis.

STREET CLEANING.—Buffalo, N. Y.—Henry B. Bayard, Contractor, Prudential Bldg., writes us that he has been awarded the contract for street cleaning of the whole city for five years from Aug. 1, 1898, to Aug. 1, 1903, as follows: Brick, 23½ cts. a great square; asphalt, 23½ cts.; stone, 33½ cts. The work will be done with rotary brooms and Furnas' suction sweepers. Supt. of Sts., Jno. H. Schifferens.

WOODEN WATER PIPE.—Pueblo, Colo.—The contract for furnishing 34-in. wooden water pipe has been let to Holmes & Allen, of Denver, Colo., at $1.20 a ft.

SEWERS.—Cohoes, N. Y.—The following bids were received Oct. 12 for constructing sewers in Section No. 1 of the sewerage system, as advertised in Engineering News; Harrison & Sons' figures for the sewers are the total bids for the various streets; Engr., Edward Hayes:

Bids Received at Cohoes, N. Y., Oct. 12, 1898, for Constructing Sewers in Section No. 1.

DREDGING.—Pensacola Bay, Fla.—Capt. C. A. F. Flagler, U. S. Engrs., Montgomery, Ala., informs us that the following bids were received Oct. 22 for dredging at the entrance of Pensacola Bay, as advertised in Engineering News: The National Dredging Co., Wilmington, Del., 17 4-10 cts. a cu. yd., capacity of dredge, 2,300 yds. a day; Rittenhouse-Morse Dredging Co., Mobile, 15 cts. a cu. yd., capacity of dredge, 8,000 cu. yds. a day (maximum).

◆

INDUSTRIAL NOTES.

THE NATIONAL FOUNDRY & PIPE WORKS, Scottdale, Pa., has changed its Pittsburg office from 402 Lewis Block to 403-404 Murtland Building.

CURRAN & HUSSEY, Pittsburg, Pa., engineers and contractors, have removed their offices from 347 Fifth Ave. to 703-4-5 Hussey Bldg.

THE COLUMBIA CONSTRUCTION CO., 2 Warner Bldg., Syracuse, N. Y., has removed its New York offices from 1210 Lord's Court Building, to 1205 Exchange Court Bldg.

THE WELLMAN-SEAVER ENGINEERING CO., Cleveland, O., has the contract for eight electric traveling cranes for the new plant of the Leechburg Foundry and Machine Co.

THE MORGAN ENGINEERING CO., Alliance, O., is said to have just received an order from Austria for a complete open hearth steel mill, and also a large order from Russia for cranes, etc.

THE SAFETY APPLIANCE CO., LTD., Wentworth Bldg., Boston, Mass., is equipping all the coaches and baggage cars of the Dayton & Union R. R. with its brake equilizer, and dead lever "take-up," and states that during the past month it has received orders to equip over 900 cars.

THE CONSOLIDATED CONSTRUCTION CO., 1007 Neave Bldg., Cincinnati, O., has been formed by E. H. Moorman and F. G. McMahon, to carry on a general contracting business. Mr. Moorman is a young architect of Cincinnati, and Mr. McMahon has for the past six years been located in Cleveland as the Ohio representative for G. W. G. Ferris & Co., Pittsburg.

THE PITTSBURG BRIDGE CO., Pittsburg, through its New England agents, Collins & Norton, Springfield, Mass., has recently secured the contract for five iron highway bridges, varying from 18 to 35 ft. in length, over Mill River, at Plainfield, Mass. The company has also the contract for an iron bridge over the Chicopee River, at Red Bridge, between Wilbraham and Ludlow, Mass., consisting of two spans of 65 and 75 ft. respectively.

THE JOLIET BRIDGE AND IRON CO., Joliet, Ill., shipped Oct 14 two bridges each of 100-ft. span, to Honolulu, by rail to Seattle, Wash., and thence by steamship to Honolulu. The bridges are for the Hawaiian Government on road improvements in the vicinity of Honolulu, and are of a good, serviceable type, being built in accordance with "Cooper's Standard Specifications for Highway Bridges." The company has at present enough orders to keep it running full for several months to come, and is sending work to several States.

THE JOHN STEVENSON CO., LTD., New York, has had Albert A. Wilcox, Paterson, N. J., and Louis Stern, New York, appointed temporary receivers, upon application of Chas. H. Davis, the President; Leander M. Delamater, Secretary and Treasurer; A. L. Phillips and B. P. Flint, directors. The assets of the company are $1,175,776, which is said to be considerably in excess of the liabilities. It is claimed that obligations aggregating over $200,000 will fall due within four months, and that these cannot be met. The company has recently erected a large plant at Bayway, N. J., and has not as yet been able to sell its New York property. The company will probably be reorganized.

NEW COMPANIES.—Waldberg Brewing Co., Boston, Mass.; $100,000, commencing with $100; M. H. Cobe, Geo. E. Cobe, M. S. Cobe, J. L. Frouck and A. I. Morris, all of Boston.

Knapp Shop, Incorporated, Boston, Mass.; $20,000, commencing with $125; to manufacture mechanical devices, etc.; Harry W. Bates, John D. Huhn, W. H. Brown and R. L. Stedman, of Boston; E. D. Luxton, of New York.

Southern Carbon Co., Warren, Pa.; $50,000, commencing with $500; to manufacture and sell carbon black and its products; Olive W. McNutt, Jefferson, O.; H. M. Preston, F. M. Knapp and John B. Cable, all of Warren, Pa.; Wm. S. Hoskins, Mount Jewett, Pa.

McCaull-Webster Elevator Co.; $100,000, commencing with $1,000; to construct and operate grain elevators and warehouses; Jas. L. McCaull, Douglas Webster and Chas. W. Crowl, all of Minneapolis, Minn.; Geo. H. Webster, Chicago, Ill.; John M. Siberz, Aberdeen, S. Dak.

American Motor Co., Kenova, W. Va.; $25,000, commencing with $10; to manufacture pumps, iron specialties, etc.; Wm. C. Reh, H. A. Schlingman, E. R. Deming, all of Toledo, O.; C. C. Coe and John P. Reh, of Kenova.

American Drilling Tool Co., St Mary's, W. Va.; $50,000, commencing with $500; to manufacture all kinds of oil and gas well machinery; W. P. Kingsbury, Parkersburg, W. Va.; H. P. Boyd, Pittsburg, Pa.; R. J. Boyd, Spencerville, O.; D. W. Reynolds and M. D. Hanes, of St. Mary's.

West Indies Plant Co., Boston, Mass.; $1,000,000, commencing with $1,520; to build and operate railways, vessels, etc., in connection with the transportation of plants; Thos. F. Galvin, J. De L. Galvin and Jas. H. McManus, of Boston; Louis Ross, New York; Geo. H. Wood, Winthrop, Mass.

Terrapin Knob Improvement Co., Parkersburg, W. Va.; $50,000, commencing with $1,250; to mine for oil, gas and minerals; H. H. Moss, C. H. Shattuck, H. P. Moss, Edward McCreary and J. M. Carfer, all of Parkersburg.

National Motor Carriage Co., 259 Washington St., Jersey City, N. J.; $500,000, commencing with $1,000; to manufacture vehicles of all descriptions, and motors operated by steam, vapor, etc.; Arthur W. Winslow, 44 Manhattan Ave., and Thos. D. Merrigan, 1987 Amsterdam Ave., both of New York; Chas. W. Parker, Jersey City.

New England Rubber Tire Wheel Co., Charleston, W. Va.; $50,000, commencing with $50; to place steel on iron channels on wheels in connection with rubber tires by a patent process; Dudley H. Bradlie, A. C. Gunther, M. H. Straughan, D. M. Black and J. M. Caldwell, all of Charleston, W. Va.

Continental Construction Co., 243 Washington St., Jersey City, N. J.; $250,000, commencing with $10,000; to construct railways, bridges, wharves, etc.; Henry N. Bates, Warren Hunt and Chas. N. King, 243 Washington St., Jersey City.

Choctaw Construction Co., 765 Broad St., Newark, N. J.; $600,000, commencing with $1,000; to build and equip a railway or railways in Arkansas; Francis I. Gowan, Chas. E. Ingersoll and Robert H. McCarter, all of Philadelphia.

Hartford & Springfield Railway Construction Co., Flemington, N. J.; $100,000, commencing with $1,000; to build and equip railway lines, electric light and power plants, etc.; George W. Dunham, Flemington, N. J.; Henry Seligman, Edward R. Gilman and Thos. A. Lee, of New York.

Iron Clad Resistance Co., Westfield, N. J.; $25,000, commencing with $1,000; to conduct a business of electrical and mechanical engineers; Arthur W. Berresford, August P. Munning and Horace M. Williams, all of Westfield.

Hevner Roadbed Construction Co., 419 Market St., Camden, N. J.; $250,000, commencing with $10,000; to construct and equip roads and roadbeds; Justus Straub, Jos. L. Dailey and John P. Batt, of 419 Market St., Camden.

Federal Steel Co., 60 Grand St., Jersey City, N. J.; $200,000,000, commencing with $3,000; to conduct a general mining and manufacturing business; Chas. C. Cluff, Chas. MacVeagh and Benj. C. Van Dyke, all of Jersey City.

Rudman Iron Foundry Co., 49 Hermon St., Newark, N. J.; $25,000, commencing with $2,100; to conduct a general foundry and casting business; Charles Rudman, John Ortman, John Kern and John B. Oelkers, all of Newark.

Standard Light & Heat Co., Philadelphia, Pa.; $1,000,000, commencing with $1,000; to manufacture and sell gas machines, etc.; R. M. Robinson, Wm. L. Teter, E. C. Wharton and Henry Robertson, of Philadelphia; Jos. W. Irwin, Govanstown, Md.

Baechtold Electric Co., 1 Montgomery St., Jersey City, N. J.; $50,000, commencing with $33,000; to manufacture dynamos, electric lamps, etc.; Christian Baechtold, 194 Cornelia St., and John P. Bonney, 1302 Jay St., both of Brooklyn, N. Y.; Dennis B. Ryan, 1 Montgomery St., Jersey City.

Briquette Coal Co., New York; $600,000, commencing with $63; to manufacture or deal in artificial and natural fuel; Geo. A. McGlone, Harry E. Swan, F. G. Corning, T. J. Hurley and J. F. Ryan, all of New York.

Alconia Co., Pittsburg, Pa.; $150,000, commencing with $4,200; to manufacture iron and steel; W. H. R. Hillard, M. M. Garland and Wm. S. Collier, Pittsburg; Oliver Wylie, Wilkinsburg, Pa.; T. H. Jeremiah, Youngstown, O.

Tudor Co., Charleston, W. Va.; $12,000, commencing with $3,000; to quarry stone and to operate lands for oil and gas; Alfred Ely, H. D. Macdona, Alfred Monierre, Harold Binney and H. H. Porter Jr., all of New York.

Ecuador Development Co., 19 West 8th St., Bayonne, N. J.; $200,000, commencing with $112,500; to construct and maintain all kinds of public works, including railways, water-works, etc.; Archer Harman, 30 Broad St.; M. F. McLanahan, 27 Pine St., and C. H. Sherrill, 30 Broad St., all of New York; T. C. Wellman and Hugh Sivell, both of Bayonne.

General Equipment Co., 301 Market St., Camden, N. J.; $100,000, commencing with $1,000; Edward Dudley, G. G. Browning, Benj. C. Reeve, Wm. S. Scull and E. A. Armstrong, all of Camden.

Lewiston & Greene Telephone Co., Lewiston, Me.; $10,000, commencing with $30; to build and operate telephone lines in Androscoggin and Kennebec counties; Pres., William Williams, Monmouth; Treas., Walter H. Brown, Lewiston.

Ottumwa Long Distance Telephone Co., Ottumwa, Ia.; $60,000; to construct and operate telephone lines in Iowa and Missouri; Pres., Jay C. Goddard; Vice-Pres., P. E. Wilcox, both of Ottumwa.

Bryan Telephone Co., Bryan, O.; $40,000; Wm. W. Morrison, I. C. Gardner, E. E. Barber, Jas. S. Bailey, Jr., and R. C. Starr.

Allen County & Smith Grove Telephone Co., incorporated in Kentucky; $2,400; G. W. Motley and P. H. Beckham.

Atlanta Telephone Co., Atlanta, Macon county, Mo.; $2,700; H. H. Abbott, S. H. Nash, R. B. Turner and others.

Silver Creek Telephone Co., Yazoo City, Miss.; $1.000; R. M. Beaman, Smith & McDonnell, T. W. Fisher, J. P. Moore, J. D. Upshaw, Campbell & Stubblefield, Commercial State Bank.

Huntingdon County Telephone Co., Saltillo, Pa.; $25,000; C. Kapp, John Kapp, G. Sleeman.

Mentor Telephone Co., Mentor, O.; $25,000; to construct and operate a telephone line in Lake county; J. W. Lowe, Carl Hogenberger, A. I. Ingersoll, P. M. Fuller and others.

North Park Telephone Co.; $15,000; to operate a telephone line between Walden, Colo., and Laramie, Wyo.; Monte Blevins, J. S. Mosman, G. F. Scott, C. E. Mosman, M. A. Ward.

Montowese Brick Co., New Haven, Conn.; $12,000, with $2,400 paid in; to manufacture and sell all kinds of brick, terra cotta and tiling; William Spitter and Frederick Westermann, of New Haven; Henry Born and Edward Boehm, North Haven.

Automatic Air Coupler Co., Pierre, S. Dak.; $500,000; A. H. Van Camp, Highmore, S. Dak.; William J. Pugh and J. H. Vail, Muscatine, Ia.

Universal Mfg. Co., Portland, Me.; $10,000, commencing with $30; to manufacture automatic gas valves of every description; Pres., William J. Ross, Chelsea, Mass.; Treas., Edward L. Rand, Jamaica Plains, Mass.

Schilicht Combustion Process Co., Jersey City, N. J.; $1,000,000; for the development and introduction of systems of generating and supplying heat, light, power and ventilation; Frank M. Doane and Walter T Kase, Jersey City, and Joseph W. Connelly, Caldwell, N. J.

Hoosier Cement Co., Clark county, Ind.; $35,000; to manufacture cement; John H. McQuiddy, Emmet Cuddy, Augustus H. Gray and others.

John Howland Construction Co., Rolla, Mo.; $100,000; W. C. Johnson, Herman Dowd, E. A. Johnson and F. E. Dowd.

American Iron & Steel Co., 60 Grand St., Jersey City, N. J.; $1,000,000, commencing with $2,100; to do a mining and manufacturing business; to build ships, railways, etc.; Wm. Fillingham, Kenneth K. McLaren and Harry W. Meen, 60 Grand St., Jersey City.

Mail Delivery Notice.

Special efforts are made to deliver our paper to its readers each week at the earliest possible moment. The largest binding and mailing establishment in New York begins work on Engineering News early each Wednesday evening, and all papers for Boston, Philadelphia and Washington are usually in the New York post-office by midnight; all Brooklyn and New York city papers by 3 o'clock—in ample time for the first delivery Thursday morning. The entire edition, including foreign copies, is in the mail soon after 6 o'clock Thursday morning. If your paper is not received promptly we advise that you make a complaint to your local post-office officials.

DO YOU WANT TO PURCHASE SUPPLIES? —— ALL THE PROMINENT MANUFACTURERS READ ENGINEERING NEWS.

ADVERTISE FOR BIDS IN THIS PAPER AND SECURE DESIRABLE COMPETITION.

INDUSTRIAL NOTES 148

PERSONAL.

Mr. Lawrence F. Lewis, city commissioner in charge of the streets and sewers of Baltimore, Md., has resigned from the position.

Mr. J. H. Dockweiler, City Engineer of Los Angeles, Cal., has been renominated for that office by the city Democratic convention.

Mr. C. P. Gilbert, general manager of the Sacramento Electric, Gas & Ry. Co., has been forced to resign owing to continued ill health.

Mr. H. H. Rosseau, Civil Engineer, U. S. N., has been ordered to the New York Navy Yard, as an assistant to the civil engineer of that yard.

Mr. Albert S. Crane, of New York city, has entered the civil engineering corps of the Michigan Lake Superior Power Co., Sault Ste. Marie, Mich.

Mr. William J. Richards has been promoted to the position of General Superintendent of the Lehigh & Wilkes-Barre Coal Co., Wilkes-Barre, Pa.

Mr. Samuel Insull, President of the Chicago Edison Co., gave a complimentary dinner, on Oct. 15, to the employees of that company who volunteered in the war.

Capt. Mason M. Patrick, Corps of Engineers, U. S. A., has been assigned to duty as temporary secretary and disbursing officer of the Mississippi River Commission.

Lieut.-Colonel William R. Livermore, Corps of Engineers, U. S. A., will act as Chief Engineer Officer of the Army of Occupation of Cuba, on the staff of Gen. Lee.

Mr. E. D. Jameson has been appointed assistant master mechanic of the Grand Trunk Ry., in charge of the Western division. His office will be at Battle Creek, Mich.

Mr. Charles F. Huber, formerly engineer in charge of the Honeybrook Division of the Lehigh & Wilkes-Barre Coal Co., now occupies the position of mining engineer of the company.

Mr. S. Oi, electrical engineer for the Japanese Government, having in charge the Department of Communication of Tokio, is in this country, studying American telephone and telegraph systems.

Mr. H. L. Noyes, civil engineer, 846 Ellicott Square, Buffalo, N. Y., has accepted the position of mechanical engineer of the Union Carbide Co., Niagara Falls, N. Y., and **has removed to the latter city.**

Mr. Fred. H. Burdick, of Pittsburg, Pa., and Miss Katherine C. Mueller, of Saginaw, Mich., were married at the home of the bride's parents, on Oct. 19. Mr. Burdick is connected with the firm of Riter & Conley.

Mr. I. W. von Leer, civil and hydraulic engineer, 1201 Stephen Girard Bldg., Philadelphia, Pa., sailed for Cuba on Oct. 29. Mr. von Leer will be connected with engineering work to be undertaken by the U. S. Government.

Mr. Frank B. Ward, Secretary and General Manager of the Michigan Brass & Iron Works, Detroit, Mich., resigned his position on Oct. 1. Mr. Ward was at one time the resident engineer of the Pittsburg Testing Laboratory, with headquarters in Chicago. On Oct. 22, the employees of the Michigan Brass & Iron Works gave Mr. Ward a farewell dinner, at which they presented him with a silver punch bowl and ladle.

Mr. Charles A. Schott, Chief of the Computation Division of the Coast and Geodetic Survey, has been awarded the "Wilde" prize by the Academy of France. This prize is awarded by a committee consisting of some of the best-known scientists in France for remarkable discoveries or writings in the field of astronomy, chemistry, geology, physics or mechanics. It was awarded to Mr. Schott for his discussion of terrestrial magnetism.

Lieut.-Colonel Robert Craig, Signal Corps, U. S. A., has been ordered to proceed to Santiago and thence to Guantanamo, Baracoa and Sagua de Janamo, Cuba, to examine and report upon the extent and condition of the telegraph lines in the Department of Santiago, the availability of timber supplies in the country for their construction and other essential points connected with the reconstruction of such lines as are necessary for military purposes.

Mr. D. S. Hough, M. Am. Soc. C. E., who enlisted in the First Volunteer Engineers, U. S. A., has been promoted to be Captain. In a personal letter from Ponce, Porto Rico, dated Oct. 5, to Mr. John Thomson, President of the Engineers' Club, Mr. Hough writes that a large number of promoters already have agents in Porto Rico looking for opportunities for investments. While many wild-cat schemes will probably cause loss to those who invest in them, he believes that capital invested on a large scale and carefully looked after should yield good returns in sugar, coffee and tobacco plantations and in electric railways. Mr. Merritt H. Smith, Jun. Am. Soc. C. E., with the same regiment, in another letter to Mr. Thomson, from which we are permitted to quote, writes that a syndicate has purchased a street railway in San Juan and is securing right of way for an extension to Ponce.

OBITUARY.

Mr. W. H. Brodhead, civil and mining engineer, died at Hailey, Idaho, on Oct. 21.

Mr. E. C. Palmer, secretary and general manager of the Standard Tool Co., Cleveland, O., died on Oct. 13.

Mr. John Hare, for many years assistant superintendent of the Troy, N. Y., Water-Works, died on Oct. 22.

Mr. William J. Brodrick, Vice-President of the Los Angeles City Water Co., died at his home, on Oct. 18.

Mr. Charles Meredith Du Puy, formerly a railway operator and civil engineer, died on Oct. 7, at his home in New York city.

Mr. James Carmichael, superintendent of the machinery department of the Harlan & Hollingsworth Co., Wilmington, Del., died recently.

Mr. Thomas S. Blair, of Pittsburg, Pa., formerly of the firm of Shoenberger, Blair & Co., iron manufacturers, died in Pittsburg, on Oct. 22, at the age of 73.

Mr. Arthur R. Sweet, for many years City Engineer of Pawtucket, R. I., and later of Woonsocket, R. I., died at the former place, on Oct. 23, at the age of 47.

Mr. Clarence G. Davenport, for several years an electrical expert of the General Electric Co., died of typhoid fever in Puerto Rico during the past week. Mr. Davenport was a corporal in the First Volunteer Engineer Regiment, now in Puerto Rico.

Mr. Andrew D. Smith, President of the La Belle Steel Co., Manchester, Pa., died at his home in Allegheny, Pa., on Oct. 21. Mr. Smith was a prominent business man, and besides being President of the La Belle Co., was a director in several banking institutions.

Mr. Thos. R. Hewson, of the firm of Tyrrell & Hewson, civil engineers and surveyors, of Sudbury, Ont., died on Oct. 22. Just previous to his death Mr. Hewson was in the employ of the Dominion Government surveying townships in the Nipissing district, where he contracted typhoid fever, which disease caused his death.

M. Camille A. Faure, whose name is well known in connection with the improvement of the storage battery, died on Sept. 14. M. Faure was born in Vizille, France, May 21, 1840. He was largely self-taught, and early evinced a taste for physics and mechanics and his early work as mechanical draftsman and constructing engineer in France and England, gave him a wide experience. In 1878 he discovered the value of employing spongy metallic lead for the negative plates of storage batteries, and it was this and his later discoveries in the same field that brought him into prominence. He was also the inventor of a number of chemical processes, and during the latter part of his life devoted his energies to improving gas engines and to developing apparatus for the propulsion of wagons and carriages.

Capt. Henry E. Waterman, Corps of Engineers, U. S. A., died on Oct. 26. Captain Waterman was born in Minnesota, from which State he was appointed to West Point, July 1, 1878. Upon graduation he was appointed to the Engineer Corps, and was for three years assistant to Lieut.-Colonel Barlow. He then served on various boards in connection with river improvement work in the Ohio valley, and later as assistant to Major Chas. E. L. B. Davis, engaged on river and harbor improvement work on Lake Michigan. He was a member of the Board of Engineers appointed to establish harbor lines at Pittsburg, Pa., was in charge of portions of the work of Ohio River improvement, and assisted Major Lockwood in the improvement of the Kentucky River. His final office and the one held at the time of his death was secretary and disbursing officer to the Mississippi River Commission.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

BROOKLYN ENGINEERS' CLUB.
Nov. 3. Secy., A. J. Provost, Jr., 191 Montague St., Brooklyn, N. Y.

TECHNICAL SOCIETY OF THE PACIFIC COAST.
Nov. 4. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.

BROOKLYN INSTITUTE OF ARTS AND SCIENCES.
Nov. 4. Illustrated Lecture, T. C. Martin. Secy., Henry I. Weed. Brooklyn Institute of Arts and Sciences, Brooklyn, N. Y.

CHICAGO ELECTRICAL ASSOCIATION.
Nov. 4. "The Electrical Equipment of a Model Printing Establishment," Geo. A. Damon. Secy., J. R. Cravath, 825 Monadnock Block, Chicago, Ill.

THE ENGINEERS' CLUB OF PHILADELPHIA.
Nov. 5. "Notes on Recent Progress in Electrical Engineering," Carl Hering; "Coal Handling Machinery," Charles Piez. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.

ENGINEERS' CLUB OF COLUMBUS.
Nov. 5. Secy., H. M. Gates, 12½ North High St., Columbus, O.

ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Nov. 7. Secy., H. J. March, Library Bldg., Buffalo, N. Y.

CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Nov. 7. Secy., C. L. Annan, City Engineer's Office, St. Paul, Minn.

NEW ENGLAND RAILROAD CLUB.
Nov. 8. Secy., Edw. L. Janes, P. O. Box 1158, Boston, Mass.

DENVER SOCIETY OF CIVIL ENGINEERS.
Nov. 8. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Col.

CIVIL ENGINEERS' CLUB OF CLEVELAND.
Nov. 8. Secy., Wm. H. Searles, Case Library Building, Cleveland, O.

RAILWAY SIGNALING CLUB.
Nov. 8. Secy., Earl M. Seitz, Signal Engineer, C. & N. W. Ry., Chicago, Ill.

FRANKLIN INSTITUTE.
Nov. 9. "Mining and Minting of Gold and Silver," A. E. Outerbridge, Jr. Secy., Wm. Wahl, 15 South Seventh St., Philadelphia, Pa.

CANADIAN SOCIETY OF CIVIL ENGINEERS.
Nov. 10. Secy., C. A. McNab, 112 Mansfield St., Montreal, Canada.

ENGINEERING ASSOCIATION OF THE SOUTH.
Nov. 10. Secy., C. B. Wilson, 1000 Broad St., Nashville, Tenn.

SOCIETY OF NAVAL ARCHITECTS AND MARINE ENGINEERS.
Nov. 10-11. Annual meeting. Secy., Francis T. Bowles, 12 West 31st St., New York.

ST. LOUIS RAILWAY CLUB.
Nov. 11. "The Performance of a Four-Cylinder Compound Locomotive." Discussion. Secy., H. H. Roberts, 511 Commercial Bldg., St. Louis, Mo.

CENTRAL RAILWAY CLUB.
Nov. 11. Secy., H. D. Vought, 114 Fifth Ave., New York city.

MONTANA SOCIETY OF ENGINEERS.
Nov. 12. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.

ENGINEERS' CLUB OF KANSAS CITY.
Nov. 14. "Rectification of the Red and Atchaflaya Rivers," A. F. Woolley, Jr. Secy., F. W. Tuttle, Baird Bldg., Kansas City, Mo.

THE LOUISIANA ENGINEERING SOCIETY.
Nov. 14. Secy., J. F. Coleman, 712 Union St., New Orleans, La.

NORTHWEST RAILWAY CLUB.
Nov. 15. Secy., T. A. Foque, Soo Line, Minneapolis, Minn.

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.
Nov. 15. Secy., R. A. Fessenden, 410 Penn Ave., Pittsburg, Pa.

WESTERN RAILWAY CLUB.
Nov. 15. Secy., F. M. Whyte, 225 Dearborn St., Chicago, Ill.

ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Nov. 16. Secy., Frank H. Olmsted, Los Angeles, Cal.

BOSTON SOCIETY OF CIVIL ENGINEERS.
Nov. 16. Secy., S. E. Tinkham, City Hall, Boston, Mass.

ENGINEERS' CLUB OF ST. LOUIS.
Nov. 16. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.

WESTERN FOUNDRYMEN'S ASSOCIATION.
Nov. 16. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.

WESTERN SOCIETY OF ENGINEERS.
Nov. 16. "The Manchester Ship Canal," Elmer L. Corthell. Secy., N. L. Litten, Monadnock Block, Chicago, Ill.

AMERICAN SOCIETY OF CIVIL ENGINEERS.
Nov. 16. "Launhardt Formula and Railroad Bridge Specifications," H. B. Seaman. Secy., C. W. Hunt, 220 West 57th St., New York city.

NEW YORK RAILROAD CLUB.
Nov. 17. Secy., W. W. Wheatley, 168 Montague St., Brooklyn, N. Y.

SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Nov. 17. Secy., F. A. Charpiot, P. O. Box 13, Savannah, Ga.

ENGINEERS' CLUB OF CINCINNATI.
Nov. 17. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.

TECHNICAL CLUB OF OMAHA.
Nov. 21. Secy., J. Harry Lawrie, Omaha, Neb.

ENGINEERS' CLUB OF MINNEAPOLIS.
Nov. 21. Secy., H. E. Smith, 1620 S. E. 4th St., Minneapolis, Minn.

ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Nov. 21. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.

NORTHWESTERN TRACK AND BRIDGE ASSOCIATION.
Dec. 16. Secy., D. W. Meeker, St. Paul, Minn.

ROCHESTER ENGINEERING SOCIETY.—A regular meeting of this society was held on Oct. 21, at which Mr. H. A. Nicholl, read a paper describing the storage battery equipment of the Rochester Ry. Co. This battery plant consists of 248 cells, weighing together 150 tons, and when complete will have a capacity of 700 ampere hours.

THE KANSAS GAS, WATER AND ELECTRIC LIGHT ASSOCIATION.—This is the name of a new association, recently formed at Topeka, Kan., for the promotion of mutual interests and for mutual benefit and protection of the gas, water and electric light interests of the State of Kansas.

The following officers were elected to serve during the ensuing year: Pres., L. T. Palmer, Leavenworth; First Vice-Pres., E. Willis, Atchison; Second Vice-Pres., A. T. Rogers, of Beloit; Third Vice-Pres., F. D. Alev, Wichita; Secy. and Treas., James H. Foley, Leavenworth; Executive Committee, Geo. B. Wing, R. C. Johnston and Jacob Mulvane.

NEW YORK ACADEMY OF SCIENCES.—The Astronomy and Physics Section of this society held a meeting at the house of the American Society of Mechanical Engineers, on Oct. 31, at which Prof. George W. Blodgett, Electrical Engineer of the Boston & Albany R. R., delivered an interesting illustrated lecture, entitled "Railroad Signalling, Past and Present." The lecture presented a large number of stereopticon views, illustrating the development of railways from early and primitive forms of roadbed and rolling stock to those at present in use. The subject of railway signalling was treated in a historical way, the complex interlocking systems of the present time were described in detail, and a model of the Hall system was shown in operation.

AMERICAN RAILWAY ENGINEERING AND MAINTENANCE OF WAY ASSOCIATION.—This new association, which is now being organized, is an outcome of the action of the Roadmasters' Association of America in voting down a very wise proposition to change its name to the Railway Maintenance of Ways Association. Mr. A. Torrey, Chief Engineer of the Michigan Central R. R., is provisional chairman, and Mr. L. C. Fritch, Division Engineer of the Baltimore & Ohio Southwestern Ry., is Secretary of the new society. At a meeting held in Chicago, on Oct. 21, the chairman was instructed to appoint a committee to draft a constitution and a set of by laws. This committee will report at the next meeting, which is to be held in Buffalo, in March, 1899.

CIVIL ENGINEERS' CLUB OF CLEVELAND.—The semi-monthly meeting of this club was held on Oct. 25, with 41 members and visitors present.

The paper of the evening, entitled, "The Electric Motor in Shop and Mine," by Mr. Clarence M. Barbor, member, was read by the Secretary.

The paper treated of the development of the electric motor in its different forms, and of the different industries to which it has been applied. A comparison was made of the economics of steam and electric installations in manufacturing concerns, and the advantages and disadvantages of each pointed out. The advantages gained in the coal mining industries by the introduction of electricity were referred to. The efficiencies of electric and pneumatic drills were compared, the advantage still remaining with the pneumatic drill where percussion work is required.

W. H. Searles, Secy.

NEW ENGLAND WATER-WORKS ASSOCIATION.—The Secretary of this association, Mr. J. C. Whitney, announces that at the meetings to be held this winter, only one subject will be considered at each meeting. The subjects are as follows: Dec., "Pumping Engines"; Jan., "Street and Force Mains of Cast Iron, Wrought Iron, Steel and Wood"; Feb., "Filtration, Slow Sand and Mechanical"; Mar., "Organisms Which Cause Unpleasant Taste and Odors in Water Supplies."

At each of these meetings one or more leading papers will be given by some members of the association who are competent to treat the subject, after which it is expected that the members will freely discuss the subject, and also read short papers, giving facts and figures and their experiences which relate to the subject under consideration. This notice is given at this early date that all may have time to make ample preparation for the winter meetings.

ARCHITECTURAL LEAGUE OF NEW YORK.—A meeting of this association was held at the Art League building, New York city, on Nov. 1, to consider the question of "The Water Front of New York and Its Future Embellishment." Invitations to be present and take part in the discussion had been extended to the American Society of Civil Engineers and the Engineers' Club, and both societies were well represented.

The proceedings took the form of a verbal discussion, the stereopticon being used to illustrate the various schemes suggested. In general there were only two plans; one, to widen the marginal streets along the North and East River fronts, and the other to build some form of elevated structures. The pros and cons of these were briefly discussed, as were also the good points and defects of recreation piers. The question of the wisdom of emptying the city sewage into the rivers near to the recreation piers was broached and the ultimate necessity of a large intercepting sewer surrounding the city was pointed out.

Perhaps the most instructive talk of the evening was given by Geo. S. Morison, M. Am. Soc. C. E., who said that the development of the water front of New York was a commercial matter, and hence one for the civil engineer, with his utilitarian views, rather than the architect. Regarding the idea of laying out some extensive scheme for all time to come, he considered it far preferable to follow the custom of the Anglo-Saxon race and meet the special problems as they arose. In other words, it was impossible to anticipate the needs of 25 years from now, and what we might build to-day would be entirely unsuited for that time.

NEW YORK ELECTRICAL SOCIETY.—The 190th regular meeting of this society was held, as announced in our last issue, on Oct. 27, at the Pearl Street Station of the Brooklyn Edison Electric Illuminating Co. The meeting proper was very brief, owing to the considerable amount of ground to be covered in carrying out the inspection trips. The meeting was largely attended, and the total number, some 175, was divided into parties, which, under the guidance of men from the Edison Company, made the round.

The Pearl Street Station, the first inspected, was designed and erected in 1889, with a capacity of 3,000 HP. It has since been enlarged, and now has 5,000 HP., with an ultimate capacity of 15,000. Except at maximum load, this station is supplied from the Union Station, which was visited later, with three-phase current at 6,000 volts. This is stepped down, and transformed by means of rotary converters to direct low tension current for use upon the Edison three-wire mains. The various points of interest in this station were examined, after which special cars were boarded, and the entire party proceeded to the great Bay Ridge Station, which, in many respects, is the most remarkable in the country.

The present building, designed to contain 15,000 HP., is only one-quarter the contemplated size of the final plant, which, it is expected, will be 60,000 HP. At present there are only two units installed. These consist of a Hamilton-Corliss 1,500 HP. engine connected to a 1,000 K-W. General Electric three-phase generator, furnishing, at full load, current at 6,600 volts, and a 3,000 HP. McIntosh, Seymour & Co. tandem, twin compound horizontal side crank engine, and a 2,000 K-W. general electric, three-phase generator, stationary armature type, also of 6,600 volts.

Current from these generators passes to the switch-board on a gallery at one end of the immense engine-room, thence out on the underground cables to the various substations, where it is transformed by rotary converters or induction motors, driving arc machines into the proper current for lighting, either incandescent or arc lamps.

One of the substations, Station "A," was next visited. This was formerly a steam plant. It is now a combination of storage batteries and arc light machines driven by 100 K-W. General Electric induction motors, directly on the 6,000 volt circuits, each motor driving two 120-lamp Brush machines, or 24 machines in all. This battery plant has 14,000 ampere hours' capacity, with regulating end switches, which are used in charging or discharging to adjust the voltage.

On an upper floor of this station the members and visitors were treated to a luncheon, after which the special cars were again boarded, and all carried back to the Brooklyn Bridge, where the parties disbanded.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS.—The last regular meeting of the Institute was held Oct. 26, at the House of the American Society of Mechanical Engineers, New York city. Previous to the paper of the evening, the President, Dr. A. E. Kennelly, announced that the committee of seven appointed by the council to arrange for a co-operation between the Institute and the various colleges having testing laboratories had held its first meeting. This committee was appointed with an idea of creating a closer relation between the Institute and the colleges, so that any engineering problems arising in the minds of the members which needed laboratory apparatus and work for their proper solution, could be given to advanced students at the various engineering colleges.

A circular letter, giving a list of such problems, would in the near future be sent to the colleges, and it was hoped that all members would take advantage of this to submit all the problems that had occurred to them. They would then be forwarded to the various institutions, and when solved the solutions would be printed in the Transactions of the Institute, where they would be available to all. At the same time, the work could be printed in any other place.

Mr. A. A. Knudson then read a paper entitled "An Electrical Survey in the Borough of Manhattan, New York City," the substance of which will be given in our next issue. The discussion was limited almost entirely to a communication from Mr. William Maver, of the Empire City Subway Construction Co., New York city, which was read by the Secretary, Mr. R. W. Pope. Mr. Maver had inquired of the managers of the various gas companies regarding electrolysis of gas mains, and had received the general reply that there were no indications of any such action. In connection with his work, he had examined many conduits and cables in the city, and could, as a result, say positively that there was no evidence, at least up to the present, of electrolytic action.

NEW PUBLICATIONS.

REPORT, MASTER CAR BUILDERS' ASSOCIATION.—Secy., John W. Cloud, 974 Rookery, Chicago, Ill. Cloth, 6×9 ins.; pp. 452; illustrated.

This volume of the Association's annual report contains in full the proceedings of the conventions held at Saratoga, N. Y., June 15, 16 and 17, 1898, besides the usual plates of designs adopted as standards or recommended practice.

REPORT OF THE IOWA STATE RAILROAD COMMISSION.—Wm. W. Ainsworth, Secretary, Des Moines, Ia., Pub. Doc. Cloth, 6×9 ins.; pp. 419; map.

The report proper of the Commission occupies only ten pages, and is a brief resume of the year's work, containing very little of general interest. The remainder of the volume is devoted to a digest of decisions of the Iowa Supreme Court, relating to railways; operating statistics, railway laws; decisions of the Commission; complaints, and other routine matters, and concludes with a general index covering 53 pages, of all the volumes of reports of the Commission from 1878 to 1897, inclusive.

SOFT COAL BURNING.—By C. M. Higginson. 5th edition. The Railway Master Mechanic, Chicago. Pamph., 6×9 ins.; pp. 18.

This pamphlet treats of smokeless and economical combination of soft coal, but so far as we can discover the author advances nothing new or important on the subject. Much of the matter is of the same kind that may be found in all the books on the subject of combustion that have been published within the past 50 years, such as the theory of combustion, the value of introducing air above the grate, at or behind the bridge wall, etc. The author tells how smokeless combustion can be accomplished, naming as essential conditions, a good draft, open grate bars, an air supply over the fire, an intimate mixture of air with the burning coal gases, and distance in which to complete the combustion of the mixed air and gas, but he fails to mention one condition without which all the others combined will give only partial success, that is a large and highly heated combustion chamber lined with fire brick, in which the admixture of gas and air shall take place before it is allowed to touch the heating surface. The book contains also several old fallacies, copied from earlier writers, no doubt, such as that "smoke once formed cannot be done away with," and that a draft of ½-in. of water column is necessary with any kind of coal in all conditions of weather. The facts are that smoke can be burned, by passing it through a bed of incandescent coal, as is done in the Hanley down draft furnace, and that good bituminous and semi-bituminous coal may be burned with ¼-in. draft, with some boilers, in which the grate surfaces and the draft are as large in relation to the amount of coal to be burned. No mention is made of automatic stokers, without which any treatise on soft coal burning is incomplete.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

BROWN UNDERGROUND ELECTRIC SYSTEM.—The Johnson Co., Johnstown, Pa. Pamph., 9⅜ × 6¾ ins.; pp. 34; illustrated.

In this pamphlet is given a description of the Brown surface contact electric street railway and also a number of illustrations of details of the contact blocks, car shoe, etc.

SOCKETS, SWITCHES AND CUT-OUTS.—The Bryant Electric Co., Bridgeport, Conn. Pamph.; 6×3¾ ins.; pp. 90.

This is a convenient list of the products of the Bryant Co., which include a variety of incandescent lamp fittings, switches, cut-outs, fuses, etc., and, in fact, everything pertaining to interior house wiring.

IMPROVED BRUSH ARC LAMPS.—General Electric Co., Schenectady, N. Y. Pamph; pp. 40.

In this attractive little pamphlet attention is called to the well-known "Brush" arc lamp in what may be termed its up to date form. The principle upon which these lamps operate is briefly given, together with some of the salient points of improvement over the old forms.

FIRE HOSE BRIDGES FOR CROSSING STREET RAILWAYS.—Rochester Hose Bridge Co., Rochester, N. Y. Pamph.; 8½×6 ins.

This pamphlet describes a device for use where fire hose must cross a street railway track. With this bridge the car runs up a very slight incline over the hose and down another incline. The length over all is 16 ft., and the greatest height 5 ins.

ROOF DRAINER.—Safety Appliance Co., Ltd., Wentworth Building, Boston, Mass. Pamph.; 9×6 ins.

This pamphlet calls attention to a device for use on open street cars, which adds to the comfort of passengers. It consists of a gutter arranged to catch the water shed from the car roof and hollow side handles through which the water passes to the ground.

MACHINE TOOLS.—Patterson, Gottfried & Hunter, Limited, 146-150 Centre St., New York. Paper; 9×6 ins.; pp. 32; illustrated.

This catalogue illustrates and gives the dimensions, weights and capacity of engine lathes, tool-grinders, polishing machines, tapping machines, etc., dealt in by this firm. These tools are made by the Springfield Machine Tool Co., Whitney Mfg. Co. and Builders' Iron Foundry.

BRIDGES AND DREDGING.—San Francisco Bridge Co., San Francisco, Cal.; New York Dredging Co., World Building, New York. Paper; 9×6 ins.; pp. 56; illustrated.

In this pamphlet are illustrated and described some of the bridges, piers, lighthouses, etc., built by the bridge company and work in excavation, dredging and filling performed by the dredging company, along with views of the dredgers and their fittings.

U. S. MAIL CHUTES.—Cutler Mfg. Co., Rochester, N. Y. Paper; 12½×9½ ins.; pp. 15; 10 photogravures.

This is a reprint of "Classical Architecture on the Shores of the Mediterranean." by Russell Sturgis, the well-known architect, illustrated by 10 photographic views of examples of Greek and Roman architecture. It is an interesting article and handsomely illustrated; and as it is a thing to be preserved, the Cutler Co. is to be congratulated upon its enterprise and good taste.

STREET LAMPS FOR ALTERNATING CURRENT CONSTANT POTENTIAL CIRCUITS.—Westinghouse Electric & Mfg. Co., Pittsburg, Pa. Circular; 7×10 ins.

This circular, numbered 88, calls attention to an improved street lamp for use on alternating circuits which permits the use of high tension currents and stepdown transformers, with the resulting saving in copper cost. The individual converters and fuse blocks accompanying each lamp are also illustrated and described.

GENERATORS AND ROTARY TRANSFORMERS FOR ELECTROLYTIC WORK.—This is circular number 55 of the Westinghouse series. It describes briefly the special forms of generators and rotary converters constructed by this company for use where large currents at low voltage are required. The text is accompanied by a number of excellent illustrations of several such machines and outline drawings and table giving the dimensions of parts.

SWITCHES, FROGS AND INTERLOCKING.—The Weir Frog Co., Cincinnati, O. Cloth, 8¾ × 5 ins.; pp. 323.

This catalogue includes a varied list of switches, frogs and crossings, built up of T and girder rails, for use on steam, cable, electric and horse railways. Switchstands, slip switches and movable-point crossings are also included, while among the track accessories are bridge guards, expansion joints, rail braces, and foot guards. Derailing switches for sidings and for the crossings of street railways with steam railways are also shown, the latter requiring the car conductor to cross the railway track and operate a lever closing the switch. Several pages are devoted to industrial tracks of light rails on steel ties, and to special street railway work in the way of crossings, curves and junctions. There are also diagrams of switch layouts and tables of switch timbers. A new department in the company's catalogue is that of electric signaling and interlocking, in which is described a system covered by the patents of F. C. Weir, Joseph Ramsey, Jr., and others. The special feature of this system is that it employs electricity for operating the signals and switches, as well as for the locking movements.

CONSTRUCTION NEWS.

CONDENSED LIST OF CONTRACTS PENDING WITH DATE OF OPENING BIDS.

RAILWAYS.

ALLEGHENY & WESTERN.—The work of boring the tunnel on this line through the Simpson Hill has been completed by Bennett, Talbott & Smith, of Greensburg, Pa. The tunnel is 2,317 ft. in length, and has been under construction for five months. J. M. Floesch, Ch. Engr., Kittanning, Pa.

ALLEGHENY JUNCTION.—A. H. Keith, Pres., Pittsburg, Pa., informs us that this company was incorporated merely to construct one mile of railway in Pittsburg to connect the Allegheny Valley Ry. with the Pittsburg Junction R. R. and this with the Baltimore & Ohio and the Pittsburg & Western Rys. The greater portion of the line has been constructed and is in operation. J. W. Patterson, Ch. Engr., Pittsburg.

BISMARCK & POTOMAC VALLEY.—This company is said to have been incorporated in West Virginia, with a capital stock of $100,000, by C. R. Herr and Samuel Mason, of Philadelphia, Pa. F. M. Howard, Forest Bldg., Philadelphia, may be addressed.

BRITISH COLUMBIA.—It is announced that D. Vincent and I. Thompson will apply to the legislature for the granting of a charter to a company, which proposes to construct a railway from Midway, B. C., along the valley of Kettle Creek to a point near the mouth of Beaver Creek.——A charter has been granted to the Cariboo-Omenica Charter Co. for the construction of a railway from some point on the Canadian Pacific Ry. between Kamloops and Aschroft, B.C., to a point near Barkersville. Under the charter, work must commence on the line before May next.

CARP, ALMONTE & LANARK.—Reports state that the construction of this proposed railway from the Ottawa, Arnprior & Parry Sound branch of the Canadian Atlantic Ry., at Carp, Ont., to the Canadian Pacific Ry., at Madoc, via Almonte. The line is designed to open up a new section of Ontario, and also to form a shorter connection between Toronto and Ottawa. William Stafford and Andrew Bell, of Almonte, Ont., are said to be interested.

CHATTAHOOCHEE VALLEY.—L. Lanier, Pres., West Point, Ga., informs us that a company composed of Z. Hagedorn, L. S. Turner and N. L. Atkinson, proposes to build a line from Riverview to Columbus, Ga.

CHICAGO, SIOUX FALLS & PACIFIC.—Reports state that this company, formerly known as the Sioux Falls & Pacific, has been incorporated with a capital stock of $8,000,000, to build a line from Sioux Falls, S. Dak., to the Wyoming state line.

CLEVELAND & NEW CASTLE.—Work is reported to have stopped on this proposed extension of the Lake Erie & Western, between Akron, O., and New Castle, Pa. The roadbed was nearly completed, and about $1,000,000 has been expended on the line in the last three months. It is said that the company has secured control of the Pittsburg & Western Ry., which runs over part of the same field. Pres., J. H. McVey; Ch. Engr., J. H. Pirkey, of Youngstown, O.

COLORADO VALLEY.—Mr. Sloan, of Trammel & Co., Sweetwater, Tex., has been appointed receiver of this company, and intends to complete the line from Sweetwater to San Angelo, a distance of about 75 miles. A further extension is also projected from San Angelo to a connection with the Atchison, Topeka & Santa Fe at Sugden. Geo. S. Moore, Ch. Engr., Sweetwater.

CRYSTAL RIVER.—Orman & Crook, of Pueblo, Colo., have the contract for the construction of a portion of this railway, which is now being completed from Carbondale, Colo., to Redstone, a distance of about 34 miles. Surveys are in progress for additional lines. The work is said to be quite heavy. J. A. Kebler, Gen. Mgr., Denver, Colo.

DAVENPORT, ROCK ISLAND & NORTHWESTERN.—Reports state that J. W. Gates, Pres. Illinois Steel Co. Chicago, and others, intend to revive the project of constructing this proposed short line, designed to connect the trunk lines passing through Davenport, Ia., and Rock Island and Moline, Ill.

DETROIT & LIMA NORTHERN.—Press repors state that a new line will be built by this company from Peoria, Ill., to Columbus, O., thus providing a continuous system from Chicago to Norfolk. J. R. Megrue, Gen Mgr., 120 Griswold St., Detroit, Mich.

FLORIDA EAST COAST.—Bids are asked until Nov. 10 for furnishing this company with 200,000 all heart-pine cross-ties. For specifications and information address E. Ben Carter, Roadmaster, St. Augustine, Fla.

GREAT EASTERN.—Surveys have been made and bonds will be issued so as to begin work soon on this proposed railway from Selma to Goldsboro, and thence to the coast, a distance of 130 miles; estimated cost, $2,700,000. Pres., J. W. Lynch, Kinston, N. C.; Gen. Mgr., J. H. Macleary, Suffolk, Va.

ILLINOIS CENTRAL.—This company is to push the work of constructing its proposed Fort Dodge & Omaha division, to be about 200 miles in length; grading will be done along the line as fast as it is located.——The 5-mile branch from Fort Dodge to Tara, Ia., is being double-tracked, requiring the construction of bridges across the Lizard and Des Moines rivers.——The grading of the line between Otto and Gilman, Ill., a distance of 21 miles, is said to be in progress. The work is light with a maximum grade of 26 ft. The American Bridge Works will erect one iron bridge about 96 ft. in length. D. Sloan, Ch. Engr., Park Row, Chicago, Ill.

KEOKUK & WESTERN.—A. C. Goodrich, Gen. Mgr., Keokuk, Ia., informs us that nothing further has been done towards the construction of this railway from Cainesville to Pattonsburg, Mo., than the completion of surveys. There has been trouble over securing the right of way.

KELLYTON & ROCKFORD.—J. P. Batson, Rockford, Ala., informs us that the preliminary survey of this proposed line from Kellyton to Rockford, 15 miles, was made on Oct. 25. It is expected that contracts will be let in January or February. John L. Cowan, Opelika, Ala.

LOUISVILLE, HENDERSON & ST. LOUIS.—A movement is on foot at Hartford, Ky., looking to a new line of railway to connect that city with the Fordsville branch of this system, at Mitchell's Station, via Dundee and Sulphur Springs, a distance of about 19 miles. Jas. F. Carson, Secy. of Hartford Commercial Club, of Hartford, is interested.

MISSISSIPPI RIVER, HAMBURG & WESTERN.—L. A. Cole, Pres., 100 William St., New York, informs us that 20 miles of this proposed railway have been completed and put in operation, and that capital has been secured, and all the contracts let for completing the line from Hamburg, Ark., to Lima Landing, on the Mississippi River, a total distance of 40 miles. Mgr., J. M. Parker, Hamburg, Ark.

MISSOURI PACIFIC.—Press reports state that this company will build at once an extension to its St. Louis, Iron Mountain & Southern branch, from Little Rock to Fort Smith, Ark., on the south side of the Arkansas River. Surveys are said to have been started. C. G. Warner, Vice-Pres., St. Louis, Mo.

NASHVILLE & KNOXVILLE.—A. J. Crawford, Pres., Terre Haute, Ind., informs us that surveys have been completed for the proposed extension from Monterey to Glen Mary, via Glades, Tenn., 35 miles, but that work has not yet been commenced.

NEW MEXICO & WESTERN.—G. M. Latimer, Pres., East Las Vegas, N. Mex., informs us that work will not be started until next spring on this proposed railway from Maxwell City to Taos, N. Mex., a distance of 100 miles. J. B. Latimer, Ch. Engr.

NEW YORK, WYOMING & WESTERN.—It is announced that this company, which is to build an outlet to tidewater, has just completed an important agreement with the Erie & Wyoming Valley R. R., running from Scranton, Pa., to Hawley, and to Port Blanchard, south of Pittston, by which the new road can use the Erie & Wyoming tracks. This gives it connections with nearly every coal mine not belonging to the railway corporations. The present purpose of the new concern is to build its line from Jersey City to the village of Wimmers, on the Erie & Wyoming Valley line.

NORTHERN PACIFIC.—This company is considering plans for the construction of a new cut-off from Missoula, Mont., to Pasco, Wash., over a pass in the Rocky Mountains, thus shortening the distance by about 100 miles.

OHIO.—Edward W. White, Vice-Pres. Cincinnati, Georgetown & Portsmouth R. R., Cincinnati, O., has been awarded the contract for the construction of a railway track for the water-works commission to the eastern pumping station at California, at $7,378. Full bids on the work were published in our last issue.

PECOS VALLEY.—The railway has been completed to Summerfield, Castro county, Tex., and all the necessary material for the bridges over the Spring, Berrendoes and Pecos rivers is now at Roswell, N. Mex.

PENNSYLVANIA.—As a result of the recent inspection of this line, it is said that double-tracking will be undertaken between Chicago and Logansport Ind., involving the expenditure of about $1,000,000; also that a number of curves will be removed. Pres., Frank Thomson, Broad St. Station, Philadelphia.

POINT HARBOR & TERMINAL JUNCTION.—This company was incorporated in New York, Oct. 29, with a capital stock of $100,000, to build a steam surface railway for the transportation of freight only, from a junction of the Terminal Ry., of Buffalo with the Lake Shore & Michigan Southern Ry, at Smoke's Creek, to Buffalo Harbor at Stony Point, in West Seneca, Erie county, a distance of four miles. The directors are: Edward T. Hingston, Stephen Lockwood, S. Munch Keilander, Herbert Meldrum, Stephen T. Lockwood, William E. Hingston, Harry L. Lockwood, Charles McAllester and John H. Lockwood, of Buffalo, N. Y.

RUTLAND-CANADIAN.—A bill has been introduced in the legislature of Vermont providing for the incorporation of the Rutland-Canadian R. R. Co., with a capital stock of $1,000,000. The proposed incorporators are Dr. W. Seward Webb, Frank R. Wells, Wallace C. Clement, H. E. Smith, Frederick W. Wilder, W. W. Stickney, George Pottum, John W. Stewart and Percival W. Clement. Another bill was introduced allowing the Rutland R. R. Co. to buy or control any railway in the county or elsewhere.

SABINE PASS & NORTHWESTEN.—This company is reported to have been incorporated in Texas with capital stock of $400,000, to construct a railway from Sabine Pass to Bonham, Tex., a distance of about 300 miles. W. H. Brooker, San Antonia, Tex.; R. M. Lusk, Bonham, and others, are interested.

ST. LOUIS, PEORIA & NORTHERN.—This company contemplates, according to reports, the extension of its system from Clinton to Chicago, via Peoria, Ill., requiring the construction of about 250 miles of track; estimated cost, $13,000,000. Pres. and Gen. Mgr., W. E. Guy, St. Louis, Mo.

UNION, COVE & VALLEY.—G. E. Howe, Ch. Engr., Union, Ore., informs us that the surveys have all been made and right of way obtained for this new line from Cove to Union, a distance of 11.15 miles. The company is doing its own work and has the grading completed; no iron has yet been laid. Pres., E. P. McDaniel, Cove, Ore.
